PROCEEDINGS AND DEBATES OF THE SEVENTIETH CONGRESS
FIRST SESSION

## SENATE

MONDAY, *April 23, 1928*

*(Legislative day of Friday, April 20, 1928)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

### MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed the bill (S. 1648) for the relief of Oliver C. Macey and Marguerite Macey, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 967. An act for the relief of George J. Illichevsky;

H. R. 1957. An act for the relief of Wendell M. Saunders;

H. R. 2474. An act for the relief of the San Francisco, Napa & Calistoga Railway;

H. R. 3222. An act for the relief of John M. King;

H. R. 3224. An act for the relief of Ichabod J. Woodard;

H. R. 3470. An act granting relief to Havert S. Sealy and Porteus H. Burke;

H. R. 3893. An act for the relief of Francis L. Sexton;

H. R. 3949. An act for the relief of Frank F. Moore;

H. R. 3960. An act for the relief of William Downing Prideaux;

H. R. 4012. An act for the relief of Charles R. Sies;

H. R. 4101. An act for the relief of U. R. Webb;

H. R. 4111. An act to correct the naval record of Peter Hansen;

H. R. 4440. An act for the relief of Frederick O. Goldsmith;

H. R. 4664. An act for the relief of Capt. George R. Armstrong, United States Army, retired;

H. R. 4827. An act providing for the promotion of Chief Pharmacist Laurence Oliphant Schetky, United States Navy, retired, to the rank of lieutenant, Medical Corps, on the retired list of the Navy;

H. R. 4839. An act for the relief of the Press Publishing Co., Marianna, Ark.;

H. R. 5398. An act for the relief of the heirs of the late Dr. Thomas C. Longino;

H. R. 5910. An act for the relief of Ralph Ole Wright and Varina Belle Wright;

H. R. 5931. An act for the relief of Thomas Heard;

H. R. 5968. An act for the relief of Byron Brown Ralston;

H. R. 7061. An act for the relief of William V. Tynes;

H. R. 7898. An act to ratify the action of a local board of sales control in respect of contracts between the United States and the Lagrange Grocery Co., of Lagrange, Ga.;

H. R. 7976. An act for the relief of Mrs. Moore L. Henry;

H. R. 8001. An act conferring jurisdiction upon certain courts of the United States to hear and determine the claim by the owner of the steamship *City of Beaumont* against the United States, and for other purposes;

H. R. 8440. An act for the relief of F. C. Wallace;

H. R. 8484. An act for the relief of Henry Manske, jr.;

H. R. 9148. An act for the relief of Ensign Jacob E. DeGarmo, United States Navy;

H. R. 9568. An act to authorize the purchase at private sale of a tract of land in Louisiana, and for other purposes;

H. R. 9620. An act for the relief of E. H. Jennings, F. L. Johanns, and Henry Blank, officers and employees of the post office at Charleston, S. C.;

H. R. 10218. An act authorizing the Court of Claims of the United States to hear and determine the claim of the city of Park Place, heretofore an independent municipality, but now a part of the city of Houston, Tex.;

H. R. 10261. An act for the relief of Edward Tomlinson;

H. R. 10336. An act for the relief of Nannie Swearingen;

H. R. 10352. An act to correct the military record of Edward Delaney;

H. R. 10536. An act granting six months' pay to Anita W. Dyer;

H. R. 10702. An act for the relief of Elbert L. Cox;

H. R. 10957. An act to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by act of March 6, 1920;

H. R. 11429. An act granting six months' pay to Marjory Virginia Watson;

H. R. 11716. An act authorizing and directing the Secretary of the Interior to issue patents to Ethel L. Saunders, and for other purposes;

H. R. 11741. An act for the relief of Thomas Edwin Huffman;

H. R. 11764. An act conferring jurisdiction upon the Court of Claims of the United States or the district courts of the United States to hear, adjudicate, and enter judgment on the claim of A. Roy Knabenshue against the United States for the use or manufacture of an invention of A. Roy Knabenshue covered by Letters Patent No. 858875, issued by the Patent Office of the United States under date of July 2, 1907;

H. R. 11978. An act granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service;

H. R. 12049. An act to authorize the Secretary of the Interior to sell to W. H. Walker, Ruth T. Walker, and Queen E. Walker, upon the payment of $1.25 per acre, the southeast quarter section 34, township 2 north, range 14 east, Choctaw meridian, Clarke County, Miss.;

H. R. 12063. An act for the relief of the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased;

H. R. 12189. An act for the relief of Marie Rose Jean Baptiste, Marius Francois, and Regina Lexima, all natives of Haiti;

H. J. Res. 47. Joint resolution for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased, United States Marine Corps; and

H. J. Res. 77. Joint resolution concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield, and State of Ohio.

### PETITIONS AND MEMORIALS

Mr. SHEPPARD presented resolutions adopted by the St. Ann's Women's Catholic Society, of Castroville, Tex., protesting against the treatment of Catholics in Mexico and requesting this Government to use its good offices at once to bring about a peaceful solution of this question, which were referred to the Committee on Foreign Relations.

Mr. WARREN presented resolutions adopted by the Lions Club, of Sheridan, and Engstrom-Duncan Post, No. 22, the American Legion, of Rawlins, both in the State of Wyoming, favoring the passage of legislation providing for aided and directed settlement on Federal reclamation projects, which were referred to the Committee on Irrigation and Reclamation.

Mr. CAPPER presented memorials numerously signed by members of the Kansas Yearly Meeting Christian Endeavor Union, Friends Church, of Wichita, Kans., remonstrating against repeal of the eighteenth amendment to the Constitution or any modification of the so-called Volstead Act, which were referred to the Committee on the Judiciary.

Mr. WALSH of Massachusetts presented letters in the nature of memorials from the New England States Holstein Friesian Association; the librarian, the City Library Association; and

C. S. Woodworth Co., all of Springfield, Mass., remonstrating against the passage of Senate bill 1752, to regulate the manufacture and sale of stamped envelopes, which were referred to the Committee on Post Offices and Post Roads.

Mr. McLEAN presented a letter in the nature of a petition from the International Institute, Young Women's Christian Association, of Bridgeport, Conn., praying for the passage of the so-called Walsh-MacGregor bill, providing for the uniting of separated families under the immigration law, which was referred to the Committee on Immigration.

He also presented letters in the nature of petitions from the Connecticut State Association of Letter Carriers of Hartford, and Silver City Branch, No. 227, National Association of Letter Carriers of Meriden, both in the State of Connecticut, praying for the passage of the so-called Dale bill, being Senate bill 1727, relative to the retirement of civil-service employees, which were referred to the Committee on Civil Service.

He also presented telegrams and letters in the nature of petitions from the National Council of Jewish Women, of Hartford; the Bunker Hill Literary Club, of Waterbury; the Men's Club of the Congregational Church, of Simsbury; the Sprague League of Women Voters, of Hanover; the League of Women Voters, of Wallingford; and of sundry citizens of Westport and Wethersfield, all in the State of Connecticut, praying for the adoption of the so-called Gillett resolution, being the resolution (S. Res. 139) suggesting a further exchange of views relative to the World Court, which were referred to the Committee on Foreign Relations.

Mr. COPELAND presented petitions of sundry citizens of New York City, N. Y., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

PRINTED RETURN CARDS

Mr. COPELAND. Mr. President, I present a resolution adopted by the New York Press Association, assembled at its seventy-sixth annual meeting, held at Syracuse, N. Y., February 2–4, 1928, condemning the practice of the Post Office Department in furnishing special printed return cards. I ask that the communication may be referred to the Committee on Post Offices and Post Roads and be printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Post Offices and Post Roads and ordered to be printed in the RECORD, as follows:

NEW YORK PRESS ASSOCIATION,
OFFICE OF THE SECRETARY,
*Elmira, N. Y.*

The New York Press Association, assembled at its seventy-sixth annual meeting, held in Syracuse, N. Y., February 2–4, 1928, does hereby—

"*Resolve*, That we condemn the present practice of the Post Office Department of the United States in furnishing special printed return cards on Government stamped envelopes as unfair competition and unwarranted invasion of private industry by the Government. We ask the Senators and Congressmen from New York State to favor the principles embodied in the Oddie bill, now pending in the Senate, and thus relieve the publishing industry in the small cities and rural sections of cut-price competition such as no other business in the country is called upon to face."

Carried unanimously.

ELMER E. CONRATH, *President*.

Certified from the records.

[SEAL.] JAY W. SHAW, *Secretary*.

REPORTS OF COMMITTEES

Mr. STEPHENS, from the Committee on the Judiciary, to which was referred the bill (H. R. 12320) to amend the longshoremen's and harbor workers' compensation act, reported it without amendment.

Mr. HOWELL, from the Committee on Claims, to which was referred the bill (H. R. 5297) for the relief of Christine Brenzinger, reported it with an amendment and submitted a report (No. 866) thereon.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (H. R. 2654) for the relief of Anton Anderson, reported it without amendment and submitted a report (No. 867) thereon.

He also, from the same committee, to which was referred the bill (H. R. 2657) for the relief of Thomas Huggins, reported it with an amendment and submitted a report (No. 868) thereon.

Mr. WATERMAN, from the Committee on Claims, to which was referred the bill (S. 3917) for the relief of the State of Florida, reported it without amendment and submitted a report (No. 869) thereon.

He also, from the same committee, to which was referred the bill (H. R. 6367) authorizing the redemption by the United States Treasury of 20 war-savings stamps (series of 1918) now held by Dr. John Mack, of Omaha, Nebr., reported it adversely and submitted a report (No. 870) thereon.

Mr. BLACK, from the Committee on Claims, to which was referred the bill (S. 2274) for the relief of William H. Chambliss, reported it with amendments and submitted a report (No. 872) thereon.

Mr. COPELAND, from the Committee on the District of Columbia, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 4170) to authorize plans for a hospital at the Home for Aged and Infirm in the District of Columbia, and for other purposes (Rept. No. 873); and

A bill (S. 4174) to establish a woman's bureau in the Metropolitan Police Department of the District of Columbia, and for other purposes (Rept. No. 874).

Mr. SACKETT, from the Committee on Banking and Currency, to which was referred the bill (S. 4039) to exempt joint-stock land banks from the provisions of section 8 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended, reported it with amendments and submitted a report (No. 875) thereon.

Mr. BLACK. Mr. President, on last Thursday I reported a bill from the Committee on Military Affairs by mistake. The number was wrong. It appears as a report on the bill (S. 1894) to increase the efficiency of the Army, and for other purposes; but as a matter of fact it was a report on the bill (S. 3089) to increase the efficiency of the Military Establishment, and for other purposes, as amended by the committee. I ask unanimous consent that Senate bill 1894 be recommitted to the committee and to substitute Senate bill 3089 as amended, and I submit a report (No. 871) thereon.

The VICE PRESIDENT. Without objection, Senate bill 1894 will be recommitted to the Committee on Military Affairs and the report on Senate bill 3089 will be placed on the calendar.

ENROLLED BILLS PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that that committee presented to the President of the United States the following enrolled bills:

On April 21, 1928:

S. 2725. An act to extend the provisions of section 2455, United States Revised Statutes, to certain public lands in the State of Oklahoma; and

S. 3640. An act authorizing acceptance from PETER G. GERRY of the gift of the law library of the late Elbridge T. Gerry.

On April 23, 1928:

S. 1736. An act for the relief of Charles Caudwell;

S. 1738. An act for the validation of the acquisition of Canadian properties by the War Department and for the relief of certain disbursing officers for payments made thereon;

S. 1758. An act for the relief of Fred A. Knauf; and

S. 1771. An act for the relief of Peter S. Kelly.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WARREN:

A bill (S. 4187) for the relief of Con Murphy (with accompanying papers); to the Committee on Claims.

By Mr. McKELLAR:

A bill (S. 4188) granting a pension to Callie Manley; to the Committee on Pensions.

By Mr. KING:

A bill (S. 4189) to authorize the designation and bonding of persons to act for disbursing officers and others charged with the disbursement of public money of the United States; to the Committee on the Judiciary.

By Mr. THOMAS:

A bill (S. 4190) authorizing an appropriation for the encouragement and benefit of the International Petroleum Exposition Corporation, of Tulsa, Okla.; to the Committee on Mines and Mining.

By Mr. WHEELER:

A bill (S. 4191) to amend an act for the relief of certain tribes of Indians in Montana, Idaho, and Washington; to the Committee on Indian Affairs.

By Mr. COPELAND:

A bill (S. 4192) granting a pension to John Seyne; and

A bill (S. 4193) granting a pension to Laura Kenyon; to the Committee on Pensions.

By Mr. WATSON (for Mr. ROBINSON of Indiana):

A bill (S. 4194) granting an increase of pension to Ruhamah Shafer;

A bill (S. 4195) granting an increase of pension to Eliza A. Conner (with accompanying papers); and

A bill (S. 4196) granting an increase of pension to Amelia G. Underwood (with accompanying papers); to the Committee on Pensions.

By Mr. WATSON:

A bill (S. 4197) granting an increase of pension to Charles F. Burch; to the Committee on Pensions.

VETERANS' BUREAU HOSPITAL NO. 90, MUSKOGEE, OKLA.

Mr. THOMAS submitted an amendment intended to be proposed by him to the bill (H. R. 12821) to authorize an appropriation to provide additional hospital, domiciliary, and outpatient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

AMENDMENT TO NAVAL APPROPRIATION BILL

Mr. McKELLAR submitted an amendment intended to be proposed by him to House bill 12286, the naval appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 53, after line 17, insert the following:

"*Provided*, That no part of the appropriations made in this act shall be used for the purpose of maintaining marines or troops in the Republic of Nicaragua on and after February 1, 1929, unless specifically authorized by the Congress: *And provided further*, That in the event of an emergency the President is authorized to land troops temporarily for the protection of lives and property under international law or the Monroe doctrine only, in which event the President will report to the Congress immediately, if the Congress be then in session, and upon the convening of the Congress if it shall not be in session."

INVESTIGATION OF SINKING OF SUBMARINE "S-4"

Mr. ODDIE submitted the following resolution (S. Res. 205), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That the Committee on Naval Affairs or a duly authorized subcommittee thereof is hereby authorized and directed to make a full and complete investigation of the sinking of the submarine *S-4* in collision on December 17, 1927, with the United States Coast Guard destroyer *Paulding* off the Massachusetts coast, and the rescue and salvage operations carried on by the United States Navy subsequent thereto; and to report thereon to the Senate as soon as practicable, giving the results of its investigation and with such recommendations as it deems advisable. For the purposes of this resolution such committee or subcommittee is authorized to hold hearings, to sit and act at such times and places, to employ such experts and clerical, stenographic, and other assistance, to require by subpœna or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony and make such expenditures as it deems advisable. The cost of such stenographic service to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of such committee or subcommittee, which shall not be in excess of $10,000, shall be paid from the contingent fund of the Senate.

BOGUE CHITTO RIVER BRIDGE, ST. TAMMANY PARISH, LA.

Mr. STEPHENS. Mr. President, I ask unanimous consent for the immediate consideration of Calendar 788, being the bill (S. 3808) to authorize the construction of a temporary railroad bridge across Bogue Chitto River at a point in township 5 south, range 6 east, St. Tammany Parish, La. It is a bridge bill in the usual form.

Mr. CURTIS. Mr. President, let the bill be read.

The Chief Clerk read the bill.

The VICE PRESIDENT. Is there objection to the request of the Senator from Mississippi?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Commerce with amendments, on page 1, line 5, after the word "at," to insert the words "or near"; in line 6, after the word "range," to strike out "6" and insert "13"; and in the same line, after the word "east," to insert "St. Helena meridian," so as to make the bill read:

*Be it enacted, etc.*, That the Lamar Lumber Co. (Inc.) is hereby authorized to construct a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La., some few miles below where the New Orleans Great Northern Railroad crosses that stream, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La."

PROTECTION OF WATERSHEDS

Mr. McNARY submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1181) authorizing an appropriation to be expended under the provisions of section 7 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," as amended, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment, as follows:

In lieu of the matter inserted by said amendment insert the following: "available July 1, 1928, $2,000,000; available July 1, 1929, $3,000,000; available July 1, 1930, $3,000,000; in all for this period, $8,000,000, to be available until expended"; and the House agree to the same.

CHAS. L. McNARY,
HENRY W. KEYES,
*Managers on the part of the Senate.*

G. N. HAUGEN,
FRED S. PURNELL,
J. B. ASWELL,
*Managers on the part of the House.*

The report was agreed to.

OLIVER C. MACEY AND MARGUERITE MACEY

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 1648) for the relief of Oliver C. Macey and Marguerite Macey, which was to strike out all after the enacting clause and insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $3,000, to Oliver C. Macey and Marguerite Macey, of Anne Arundel County, Md., on account of the death of their infant daughter, Eleanor Macey, who was killed December 14, 1925, by reason of the negligence of the operator of the United States Navy commissary truck, and for injuries sustained in said accident by Marguerite Macey.

Mr. BRUCE. I move that the Senate disagree to the amendment of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, and that the conferees on the part of the Senate be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. HOWELL, Mr. NYE, and Mr. BAYARD conferees on the part of the Senate.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED

The following bills and joint resolutions were severally read twice by their titles and referred as indicated below:

H. R. 10957. An act to amend the act entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes," approved August 25, 1919, as amended by act of March 6, 1920; to the Committee on Public Buildings and Grounds.

H. R. 12189. An act for the relief of Marie Rose Jean Baptiste, Marius Francois, and Regina Lexima, all natives of Haiti; to the Committee on Foreign Relations.

H. R. 9568. An act to authorize the purchase at private sale of a tract of land in Louisiana, and for other purposes;

H. R. 11716. An act authorizing and directing the Secretary of the Interior to issue patents to Ethel L. Saunders, and for other purposes; and

H. R. 12049. An act to authorize the Secretary of the Interior to sell to W. H. Walker, Ruth T. Walker, and Queen E. Walker, upon the payment of $1.25 per acre, the southeast quarter section 34, township 2 north, range 14 east, Choctaw meridian, Clarke County, Miss.; to the Committee on Public Lands and Surveys.

H. R. 3222. An act for the relief of John M. King;

H. R. 3224. An act for the relief of Ichabod J. Woodard;
H. R. 3893. An act for the relief of Francis L. Sexton;
H. R. 4664. An act for the relief of Capt. George R. Armstrong, United States Army, retired;
H. R. 5931. An act for the relief of Thomas Heard;
H. R. 10261. An act for the relief of Edward Tomlinson;
H. R. 10352. An act to correct the military record of Edward Delaney;
H. R. 10702. An act for the relief of Elbert L. Cox; and
H. R. 11429. An act granting six months' pay to Marjory Virginia Watson; to the Committee on Military Affairs.
H. R. 1957. An act for the relief of Wendell M. Saunders;
H. R. 3960. An act for the relief of William Downing Prideaux;
H. R. 4012. An act for the relief of Charles R. Sies;
H. R. 4111. An act to correct the naval record of Peter Hansen;
H. R. 4827. An act providing for the promotion of Chief Pharmacist Laurence Oliphant Schetky, United States Navy, retired, to the rank of lieutenant, Medical Corps, on the retired list of the Navy;
H. R. 5910. An act for the relief of Ralph Ole Wright and Varina Belle Wright;
H. R. 5968. An act for the relief of Byron Brown Ralston;
H. R. 8484. An act for the relief of Henry Manske, jr.;
H. R. 9148. An act for the relief of Ensign Jacob E. DeGarmo, United States Navy;
H. R. 10536. An act granting six months' pay to Anita W. Dyer;
H. R. 11978. An act granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service; and
H. J. Res. 47. Joint resolution for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased, United States Marine Corps; to the Committee on Naval Affairs.
H. R. 967. An act for the relief of George J. Illichevsky;
H. R. 2474. An act for the relief of the San Francisco, Napa & Calistoga Railway;
H. R. 3470. An act granting relief to Havert S. Sealy and Porteus R. Burke;
H. R. 3949. An act for the relief of Frank F. Moore;
H. R. 4101. An act for the relief of U. R. Webb;
H. R. 4440. An act for the relief of Frederick O. Goldsmith;
H. R. 4839. An act for the relief of the Press Publishing Co., Marianna, Ark.;
H. R. 5398. An act for the relief of the heirs of the late Dr. Thomas C. Longino;
H. R. 7061. An act for the relief of William V. Tynes;
H. R. 7898. An act to ratify the action of a local board of sales control in respect of contracts between the United States and the Lagrange Grocery Co., of Lagrange, Ga.;
H. R. 7976. An act for the relief of Mrs. Moore L. Henry;
H. R. 8001. An act conferring jurisdiction upon certain courts of the United States to hear and determine the claim by the owner of the steamship *City of Beaumont* against the United States, and for other purposes;
H. R. 8440. An act for the relief F. C. Wallace;
H. R. 9620. An act for the relief of E. H. Jennings, F. L. Johanns, and Henry Blank, officers and employees of the post office at Charleston, S. C.;
H. R. 10218. An act authorizing the Court of Claims of the United States to hear and determine the claim of the city of Park Place, heretofore an independent municipality but now a part of the city of Houston, Tex.;
H. R. 10336. An act for the relief of Nannie Swearingen;
H. R. 11741. An act for the relief of Thomas Edwin Huffman;
H. R. 11764. An act conferring jurisdiction upon the Court of Claims of the United States or the district courts of the United States to hear, adjudicate, and enter judgment on the claim of A. Roy Knabenshue against the United States for the use or manufacture of an invention of A. Roy Knabenshue, covered by Letters Patent No. 858875, issued by the Patent Office of the United States under date of July 2, 1907; and
H. R. 12063. An act for the relief of the widow of Surg. Mervin W. Glover, United States Public Health Service, deceased; to the Committee on Claims.
H. J. Res. 77. Joint resolution concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield, and State of Ohio; to the Committee on the Judiciary.

BILL RECOMMITTED

Mr. NORRIS. Mr. President, I desire, under direction of the Committee on the Judiciary, to ask that the Senate refer back to the Committee on the Judiciary Calendar No. 812, being the bill (H. R. 6687) to change the title of the United States Court of Customs Appeals, and for other purposes.

The VICE PRESIDENT. Without objection, the bill will be recommitted.

NAVAL APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12286) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1929, and for other purposes, the pending question being on the amendment of Mr. BLAINE, to insert, after line 17, page 53, the following proviso:

*Provided*, That after December 25, 1928, none of the appropriations made in this act shall be used to pay any expenses incurred in connection with acts of hostility against a friendly foreign nation, or any belligerent intervention in the affairs of a foreign nation, or any intervention in the domestic affairs of any foreign nations, unless war has been declared by Congress or unless a state of war actually exists under recognized principles of international law.

The words "acts of hostility" and the words "belligerent intervention" shall include within their meaning the employment of coercion or force in the collection of any pecuniary claim or any claim or right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against the government of a foreign nation, either upon the initiation of the Government of the United States, or upon the invitation of any foreign government existing de jure or de facto.

Mr. NORRIS obtained the floor.

Mr. JOHNSON. Mr. President, has the Senator any objection to a call for a quorum before he proceeds with his speech upon the pending measure?

Mr. HEFLIN. Mr. President, I wish the Senator would permit us to have a quorum called.

Mr. NORRIS. I yield for that purpose.

Mr. JOHNSON. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Edge | Keyes | Shortridge |
| Barkley | Edwards | King | Simmons |
| Bayard | Fess | La Follette | Smith |
| Bingham | Fletcher | Locher | Smoot |
| Black | Frazier | McKellar | Steck |
| Blaine | George | McMaster | Steiwer |
| Blease | Gerry | McNary | Stephens |
| Borah | Goff | Mayfield | Swanson |
| Bratton | Gooding | Metcalf | Thomas |
| Brookhart | Gould | Neely | Tydings |
| Broussard | Greene | Norbeck | Tyson |
| Bruce | Hale | Norris | Vandenberg |
| Capper | Harris | Nye | Walsh, Mass. |
| Caraway | Harrison | Oddie | Walsh, Mont. |
| Copeland | Hawes | Overman | Warren |
| Couzens | Hayden | Phipps | Waterman |
| Curtis | Heflin | Pittman | Watson |
| Cutting | Howell | Ransdell | Wheeler |
| Dale | Johnson | Sackett | |
| Deneen | Jones | Schall | |
| Dill | Kendrick | Sheppard | |

Mr. LA FOLLETTE. Mr. President, I desire to announce that the Senator from New Hampshire [Mr. MOSES] is detained on business of the Senate before the Committee on Post Offices and Post Roads.

Mr. SWANSON. I wish to announce that my colleague the junior Senator from Virginia [Mr. GLASS] is detained from the Senate by illness.

Mr. CARAWAY. I wish to announced that my colleague the senior Senator from Arkansas [Mr. ROBINSON] is still detained from the Senate by reason of illness.

The VICE PRESIDENT. Eighty-three Senators having answered to their names, a quorum is present.

Mr. NORRIS. Mr. President, I believe the debate on the question now before the Senate has resulted in a great deal of good and perhaps a better understanding. The question of our action in Nicaragua is one which has not been debated as it seems to me it should have been debated on the floor of the Senate. An honest debate and a fair consideration of the questions involved are not only of benefit to the Senate but will have a tendency to clear up the situation before the people of the country.

I was rather astounded on Saturday that the claim was made by the Senator from Connecticut [Mr. BINGHAM] that there is not a state of war existing in Nicaragua. While I do not believe the settlement of that question is necessary for a determination of what we should do under present conditions, it does have a bearing more or less important. The Senator from Idaho [Mr. BORAH], in the very able address which he delivered on the subject a few days ago, admitted, if not in direct language I think at least by implication—and if I misquote him, I shall be glad to have him interrupt me—that there is

a state of war existing now in Nicaragua between our Government and at least one of the factions there claiming to have the right to govern that country. The Senator from New Jersey [Mr. EDGE] very fairly and frankly admitted that, at least in a technical sense, he thought that war is now in existence.

The question has an important bearing as to whether the President of the United States, in what he has done in Nicaragua, has overstepped the authority given him by the Constitution of the United States. Everyone concedes that the President of the United States has no power or authority to declare war. I think everyone concedes, on the other hand, that the President has authority to use the forces of the United States to protect life and property if he does not go to the extent of bringing on a state of war. Therefore, it is important, I think, to consider whether or not there is a state of war existing now in Nicaragua.

The interesting historical incidents which were recited by the Senator from Connecticut [Mr. BINGHAM], which he offered, I presume, to show that there is no state of war existing, were, to my mind, with very few exceptions, not to the point and have no application whatever to the present condition of things in Nicaragua. Most of the instances he gave were instances where it was conceded that the President had not overstepped the authority conferred on him as Commander in Chief of the Army and Navy, and no one, I think, upon a fair consideration of most of those instances would reach the conclusion that there was a state of war existing or that the President brought on a state of war. I am not going over that, Mr. President, but I want to refer to one instance which the Senator cited which seemed to him, and, perhaps, seemed to others, to show that President Coolidge had not overstepped his authority in Nicaragua because he was following a precedent, namely, the instance where our Army was sent into China during the Boxer revolution.

In that case there was no attempt on the part of the American Government to take territory; there was no attempt in that case to participate in a war that was in existence between different factions in China for the purpose of controlling and administering the Chinese Government. It was simply an instance where the President used the Army and the Navy to protect American citizens, mostly American officials, who were in Peking at the time. I think I shall be able to show by authority that can not be controverted that such a condition is not war, while the condition now existing in Nicaragua is war.

Before I go into that, I want to reply to another criticism that has been made of those who are opposed to what we are doing in Nicaragua. It was dwelt upon particularly by the Senator from New Jersey [Mr. EDGE] in the very able address which he delivered to the Senate the other day. Reduced to a nutshell, it is that we must not criticize the President, particularly in matters pertaining to our foreign relations. Mr. President, not for a single moment can I submit to that proposition; not for a single moment, in my judgment, can any one who believes in the perpetuity of our Government or of any form of free government, or one who believes in the different departments of government carrying on their separate functions without infringing upon the functions of any other department agree to that kind of proposition.

I know those of us who do criticize the President in the conduct of foreign affairs, and in other matters also, but particularly in foreign matters, bring down upon our heads the condemnation and criticism of a great many people, who are well minded and moved by the very best of motives; but honest criticism, Mr. President, is at the foundation of every free government; constructive criticism is not only beneficial to the person or the official criticized but it is the best way in any debate in any legislative body to bring out the best results. Without it, we shall just as surely, as night follows day, gradually surrender the functions of the legislature, and in the end become a monarchy; not only a monarchy but an absolute monarchy. Probably at this time the only government of a civilized nation that does not tolerate any criticism is the Government of Mussolini, which no Italian dare criticize; and if we ever start on the theory that as to any important function of the executive department no man must criticize, where no one must find fault, then we shall be leading up to the time when we shall abdicate as a legislature; when we shall gradually turn the Government over to a monarch.

I am not thinking of any President; I am not thinking of President Coolidge any more than I am of any other President; I am not thinking in any disrespectful way of the actions of the President or of the President as an individual or as an official, but I claim the right—I not only claim it is the right but I claim it is the duty particularly of a Member of Congress representing the legislative functions of the Government—to criticize any official of the Government, whether it be the President or anyone else where I honestly believe that such criticism is due.

Such criticism does not mean that we impugn the motives of the person criticized, but it merely means that we are expressing our honest dissent, as we have the right to do, as it is our duty to do, particularly if we are members of the legislative department of the Government and wish to perform our full duty; and, in my humble opinion, we can not perform it in any other way. We are derelict in our duty if we think there is something wrong in an important branch of our Government and we fail to speak. We are not only failing to do our duty as members of the legislative department of the Government, but we are not doing our full duty as patriotic citizens of that Government should we remain silent.

I think that is particularly true in relation to foreign affairs, because that is one function of the Government in connection with which the official duties of the Executive are carried on in secret; where there is no publicity. I think that is all wrong, but the foreign affairs of the Government are not open to the light of day. We have no access to the documents, to the letters, to the correspondence, and to everything else that is going on officially in the State Department. We can not always even get them by asking for them, because the President may say that, in his judgment, it is not compatible with the public interest to give us the information. So we are having one function of government, our dealings with foreign nations, perhaps the most important of any for the peace of the country, the peace of the world, and the life of our own citizens may be at stake—perhaps the most important of any that can be conceived—carried on officially in secret to a great extent and we are denied, even though we ask for it in the name of the Senate, information to enable us properly to act as representing the American people.

When we take that into consideration, it seems to me it is very important that we should, wherever we deem it to be our duty, criticize the President, just as any of us would have the right to criticize another Member of this body. We do that every day in our debates and, if we are courteous about it, the person criticized can find no possible objection to that kind of course. Yet when we dare to suggest that we think some action on the part of the executive department is not right or that we ought to have more information in regard to it we are denounced oftentimes as enemies of our country.

Not many months ago the President of the United States announced publicly to the newspapers of the country that he thought the newspapers ought not to criticize the Government in matters of foreign relations. Anyone who will consider that suggestion for a moment and think where it will lead us, must reach the conclusion—there can be no escape from it—that if we carry it out to its legitimate end we will eventually destroy our form of government. Criticism is a healthy thing; it is a righteous thing; it is the best means by which we can approach, even though we never reach, perfection. So that what I am saying is said with perfect respect; it is said, however, without fear and without any idea of stopping, because somebody else may say—and the statement may do a great injury—that I am not loyal to the President of the United States. I have no such intention; I have no such idea; but I am going to perform what I believe to be my duty, even though I subject myself to those who would unjustly criticize me for that kind of action.

Now, Mr. President, I wish to read one or two extracts from some decisions of the Supreme Court of the United States. The Supreme Court said:

> By the Constitution, Congress alone has the power to declare a national or foreign war * * *. The Constitution confers on the President the whole executive power * * *. He is the Commander in Chief of the Army and the Navy of the United States * * *. He has no power to initiate or declare a war either against a foreign nation or a domestic State.

That is a quotation from the decision of the United States Supreme Court in the Prize cases, in Second Black, 635 to 668.

Mr. BINGHAM. Mr. President, will the Senator yield at that point?

Mr. NORRIS. Yes.

Mr. BINGHAM. Does the Senator think that the scatterbrains of Sandino are either a foreign nation or a domestic state?

Mr. NORRIS. No; but if the Senator will do me the honor of listening to me he will find when I come to take it up that I will make what I believe to be a direct application to Sandino and his followers and what they are doing in Nicaragua and what we are doing to them, and I think I will demonstrate that there is a war now being carried on. It has not been declared by the Congress of the United States; it has not been

declared by the Nicaraguan Government; but there is war just the same. The conflict has all the elements of war, as I think I shall be able to show.

The Supreme Court said again:

The whole powers of war being by the Constitution of the United States vested in Congress, the acts of that body can alone be resorted to as our guides in this inquiry. It is not denied, nor, in the course of the argument, has it been denied that Congress may authorize general hostilities, in which case the general laws of war apply to our situation; or partial hostilities, in which case the laws of war, so far as they actually apply to our situation, must be noticed.

It may, I believe, be safely laid down that every contention by force between two nations in external matters under the authority of their respective governments is not only war but public war.

That was decided in the case of Talbot *v.* Seeman, 1 Cranch, from the first to the twentieth page.

Mr. BINGHAM. Mr. President, will the Senator yield again?

Mr. NORRIS. Yes.

Mr. BINGHAM. I do not quite understand the Senator's quotation. It said "war between two governments."

Mr. NORRIS. Yes; that is what it said.

Mr. BINGHAM. Between two governments?

Mr. NORRIS. Yes.

Mr. BINGHAM. And the Senator expects to prove before he concludes that the forces of the bandit Sandino are another government?

Mr. NORRIS. No.

Mr. BINGHAM. I am very glad to hear the Senator say that.

Mr. NORRIS. The Senator is drawing a conclusion that he is not justified in drawing.

Mr. BINGHAM. I did not see any application of the quotation from the decision of the Supreme Court unless the Senator should say that the forces of Sandino constituted another government.

Mr. NORRIS. I will give the Senator a citation that will apply to Sandino and his forces and show, before I get through, that there is now war in Nicaragua.

As shown by the able Senator from Wisconsin [Mr. BLAINE] there has been a gradual increase in the authority exercised by the President in the use of the Army and the Navy. For the last 20 years it has been growing; and I want to pause before I go into other definitions of war to show the danger that comes from such a condition.

We established a precedent, and the person in power uses that precedent. He uses all the power that he has. It is human nature. I am not offering that in criticism of anybody or any President. It is natural for every official—there are exceptions to it, I admit—to take all the power he has, and stretch it to the utmost.

If you will look over the history of the world, if you will look over the history of civilization, you will find that that is true in all governments and of all rulers; so that there is danger in precedents. There is danger, if we remain silent and say nothing, that the power of declaring war, although given to Congress by the Constitution, will be entirely taken away by the executive department. I think that danger is practically here now; and no one wants to do that. No one has argued for that; but that is where we are drifting.

During the twentieth century there has been a gradually increasing encroachment upon this power by the executive department through the use of the Army and Navy, until to-day it in effect claims the right to make war. The executive officials do not use that language; but the effect of what they do is to make war or to authorize warlike acts abroad, without the consent of Congress, to the extent to which such warfare can be carried on by the military forces under the command of the President.

One President goes where he thinks is the limit of his authority in the use of the Army and the Navy. Another President coming after him, perhaps purely with the idea of doing what is right, goes to the same extent, and a little bit further. The next President uses that as a precedent, and goes still further, until we have reached a point where the President uses the Army and the Navy to make war upon any nation that he sees fit to make war upon, without consulting anybody; and we have been drifting that way.

We are now in Nicaragua; and I want to read a definition of war given by Thomas Jefferson. It seems to me it covers the matter. It seems to me it must stand uncontradicted.

In the case of actual physical attacks upon American citizens or their property or the immediate danger of such attacks, the forces of the United States may be used for strictly protective purposes without the consent of Congress.

Let me read that again; and no one, so far as I know, contradicts it.

In the case of actual physical attacks upon American citizens or their property or the immediate danger of such attacks, the forces of the United States may be used for strictly protective purposes without the consent of Congress. * * * When, however, any attempt is made to take over the control of territory, to use force for the collection of claims due to American citizens, to interfere with the military operation of foreign troops, or, above all, to interfere between two governments, each claiming to be the legal government of the country, war (perhaps only partial war, but still war) is waged, and this can only be constitutionally done under the authorization of Congress.

Mr. EDGE. Mr. President, will the Senator yield at that point?

Mr. NORRIS. Yes.

Mr. EDGE. As a practical proposition, referring directly to the situation in Nicaragua, as I followed the first paragraph read from Jefferson, it stated without qualification that the use of troops to protect American property or on the defensive was entirely proper, did it not?

Mr. NORRIS. Yes.

Mr. EDGE. These troops being on the defensive, they are certainly subject to attack. Members of the troops being actually killed from ambush, and Congress not being in session—that occurring, as I recall, in May or June of last year—could the commandant of the troops do anything else in the world, in the interest of protection of the lives of the men under him, but pursue an offensive?

Mr. NORRIS. Well, perhaps in the way the Senator states it, I would not contradict it.

Mr. EDGE. That did actually happen.

Mr. NORRIS. If he is attacked, he must defend himself, of course.

Mr. EDGE. That did actually happen, with Congress not in session.

Mr. NORRIS. The Senator talks about Congress not being in session. Great heavens! Congress has been in session since December this time. It was in session during an entire session commencing the December before.

Why, Mr. President, we have done in Nicaragua and are doing there almost exactly in words what Thomas Jefferson described as war. We are interfering with the Government. We have been taking sides between two factions, each claiming the right to govern. We have taken possession of territory. We are now proposing, without authority from the Congress of the United States and without authority from the Nicaraguan Congress, to carry on an election in Nicaragua. We are performing the functions of government. We have been doing it from the beginning. We have gone away beyond the protection of life and property; and, in my judgment, the protection of life and property down there is 99 per cent an exaggeration. The Senator from Idaho [Mr. BORAH] in his able address said that there was practically nothing to it. In his judgment we had not any right to put the marines in there on the theory of protecting life and property. It was not necessary. It was not demanded.

But, of course, Mr. President, when war was going on, as it was down there for a year or two, between different factions, each claiming the right to govern the country, there would be danger to those who were noncombatants. There would be danger to an American citizen or anyone else if he was in the path of one of the armies or between the two. That, however, is not the kind of protection that the President is authorized to afford in using the Army and Navy.

The Senator from Minnesota [Mr. SHIPSTEAD] the other day called our attention to the great Battle of Gettysburg. It is an exaggerated case, it is true, but it illustrates the principle. Suppose, when those two armies were about to fight, some citizen of Great Britain had been between them, and the officials of Great Britain had landed an army and navy and said, "Gentlemen, you must not fight here, because you may injure the property and take the lives of British subjects." It is true that that might happen, but no one would be so wild as to claim the right to interfere in that way.

It is true without any question that when Sacasa was fighting against Diaz down there trying to get what it is usually conceded by those who have studied the question most that he was entitled to, the Presidency of Nicaragua, whenever he made an advance, whenever he overcame the Diaz army, our Government interfered and said, "This is neutral territory. You must not fight here." They took sides indirectly with the Diaz faction down there; and incidentally we ought to know, too—we do know, if we will think about it—that Diaz was our man. We put him in office. He could not have remained in office

24 hours without the American Army. He was a man we set up.

Mr. BINGHAM. Mr. President, will the Senator yield a moment?

Mr. NORRIS. Yes.

Mr. BINGHAM. Did the Senator say that Diaz could not have remained in office 24 hours without the American Army?

Mr. NORRIS. Yes.

Mr. BINGHAM. Why, Mr. President, there was not an American soldier in Nicaragua when Diaz assumed the Presidency.

Mr. NORRIS. I am not speaking of the remote days, but of the time when we did go there. At a time when he was about to be overthrown we stepped in. We put him in office in the first place. He was our man. We put ourselves in office, and then we made a contract with ourselves afterwards to hold an election. That is just what happened. As the Senator from Idaho [Mr. BORAH] has suggested, Diaz himself pleaded with us to intervene. He has officially said that he could not maintain his place without the American marines. He has asked us to intervene.

Mr. BINGHAM. But the Senator implied in his remarks that we had troops there at the time Diaz was made President.

Mr. NORRIS. I did not intend to imply that. I am unaware that I did. It does not make any difference what was done yesterday or day before yesterday or to-day. The Senator can not quibble out of it by stating that at a particular time we did not have troops there. Everybody knows, and nobody will dispute—not even Diaz himself, not President Coolidge, not Secretary Kellogg, and I hope nobody here will dispute—that Diaz would have gone down; he could not have maintained his position without the assistance of the American Government. The Senator from Connecticut will not deny that.

Mr. BINGHAM. Mr. President, the Senator from Nebraska will not deny, I hope, that the regularly elected President, Solorzano, would have maintained office, together with the regularly elected Vice President, Sacasa, if the American marines had not been withdrawn.

Mr. NORRIS. I do not think that has any more to do with this question than the flowers that bloom in the springtime. There are a lot of things that might have happened, and probably a lot of bad things would have happened. I am not saying that these people who were trying to get the Presidency were angels or that they were perfect. I would not say that about Mussolini; but I would not be in favor of taking the Army and the Navy and going over there and setting up another man and backing him up and putting Mussolini out.

Mr. WHEELER. Mr. President——

The PRESIDING OFFICER (Mr. DENEEN in the chair). Does the Senator from Nebraska yield to the Senator from Montana?

Mr. NORRIS. I do.

Mr. WHEELER. The Senator does know as a matter of fact that the reason why Diaz was put in there was because of the fact that it was known, and the American minister let it be known, that Diaz was acceptable to the American Government, and they let it be known that they would protect Diaz if he was put in there.

Mr. NORRIS. Yes. I thank the Senator from Montana. I think it can be fairly said that there is really no dispute about this proposition. Diaz could not have maintained himself without the assistance of the American Army. He will not claim that himself. No one can claim it and get away with it. There is not any question about our Army being used to maintain him in office. The representative of President Coolidge, Mr. Stimson, in his letter, which I will read after a while, says practically the same thing. He says, "We are going to administer this election, and we think that Diaz ought to be maintained in office to the end of the term." They are going to maintain him. They do maintain him. They have maintained him all the time. He is our man. He owes his office to the Government of the United States. He owes his ability to stay there to the marines, to the Army, and to the Navy of the United States. There can be no question about that.

Mr. BINGHAM. Mr. President, will the Senator yield a moment?

Mr. NORRIS. Yes.

Mr. BINGHAM. In the interest of accuracy, I hope the Senator will correct his speech to the effect that there were no members of the Army present, and that Diaz does not owe his position to the Army and Navy of the United States, because the Army was not there—just to be accurate; that is all.

Mr. NORRIS. The Senator distinguishes the Army from the marines?

Mr. BINGHAM. Anyone familiar with international law knows the distinction between the use of marines and the use of an army on foreign soil.

Mr. NORRIS. Yes. I suppose the Senator would say that if a marine burned up a house or killed a man that would not be anything, because he did not happen to be a member of the Army.

I do not care to distinguish between marines and the Army. The Senator may call them anything he wants to; they are soldiers of the United States. They are under the command of American officers. They are carrying out the orders of the President of the United States, and the Senator ought to be broad minded enough, and great enough, and big enough not to try to quibble because I call them an army instead of calling them marines.

Mr. BINGHAM. I am not desiring to quibble, but the Senator is trying to prove a very delicate, technical point; and when he wants to be technical about the use of the term "war," he should be careful to distinguish between the use of the word "marines," who, everyone recognizes, may be properly used in foreign countries for the protection of American life and property, and the term "the United States Army," which may not be so used properly.

Mr. NORRIS. I suppose that if Congress desired they could provide that hereafter all the forces of the United States should be called marines, that we could have 200,000 marines, and then we could carry on war, we could use those marines to invade countries, to kill people, and to destroy property, and we would escape the charge that we were carrying on a war, because we called them marines instead of soldiers. A rose by any other name would not smell any different. It would be just the same.

Mr. BINGHAM. But it would have to be done by the vote of the Congress.

Mr. NORRIS. Exactly; that is what I am pleading for, and in this case it has not been done by act of Congress. The Senator is going on the theory—I think it is quibbling; it is way beneath what a great statesman like him ought to try to do—that the President can send as many marines as he desires to take possession of any country, and still not violate the Constitution of the United States, which says that Congress alone may declare war. He can carry on a war with marines just as well as he can carry on a war with men who are called something else. I do not care what they are called.

Mr. BINGHAM. If the Senator chooses to quibble over the use of the word "war," I have nothing further to say.

Mr. HEFLIN. Mr. President, if the Senator will permit me there; you kill the natives of Nicaragua just as dead with the marines.

Mr. NORRIS. I suppose that when a man is killed it will not make much difference to him whether he was killed by a marine or a soldier or a sailor; he is dead just the same.

Mr. BORAH. Mr. President——

Mr. NORRIS. I yield.

Mr. BORAH. I seem to misunderstand the contention. Does the Senator from Connecticut claim that, so far as the question as to whether the President is making war is concerned, it makes any difference whether he is using the marines or part of the Army?

Mr. JOHNSON. I am interested in that, too.

Mr. BORAH. Does the Senator contend that, so far as the act of making war is concerned, as to whether the President is carrying on war or whether war is being waged, it makes any difference whether the President is using the marines or using a part of the United States Army?

Mr. BINGHAM. Not if the President is engaged in making war.

Mr. BORAH. Whether it is the marines or the Army throws no light on the question here as to whether the President is making war. Certainly he can make war with the marines just the same as he can with the Army.

Mr. BINGHAM. But it is not necessarily true that when marines are used we are engaged in war.

Mr. BORAH. No.

Mr. NORRIS. Nobody said so.

Mr. BORAH. Neither would it be necessarily true that if he were using the Army he would be engaged in war. If the Army were used solely for the purpose of protecting American life and property, it would not be waging war, although the President had the entire Army there.

Mr. BINGHAM. Undoubtedly the Senator realizes that in the present situation in China the President very carefully refrained from sending the Third Battalion of the Fifteenth Infantry from the Philippines to Tientsin when the lives and property of American citizens were in danger, to protect them,

because he was afraid that that would seem like an act of war, whereas he sent a great many more marines to Tientsin to protect American lives and property, because that could be done without infringing the rights of China, as would have been threatened had he used the Third Battalion of the Fifteenth Infantry.

Mr. BORAH. No; Mr. President, he could have used the Third Battalion for the same purpose for which he used the marines. As a matter of policy, and for its effect upon the Chinese people, a different question might arise; but as a matter of whether or not he was waging war, as an actual fact, it would not make any difference whether he sent the Infantry or sent the marines.

Mr. NORRIS. I do not suppose it would be claimed that it made any difference whether he sent the Cavalry or the Infantry. It would not make any difference whether he sent the air force or the Navy, he would send that which he wanted to use, and which, in his judgment, he could most effectually use. If what they did constituted war, it would be no defense to say that the fellows were not called soldiers. I suppose the Senator from Connecticut could say that the men who bombed the villages and the towns and the followers of Sandino were not members of the Army, and therefore that the bombing constituted no act of war. The point I want to make—and I almost apologize to the Senate for trying to make it—is that it does not make any difference whether you call the men marines, or soldiers, or sailors, or what not, that has not anything to do with the case any more than the uniform which they wear.

Mr. SHORTRIDGE. Mr. President, may I ask the Senator a question?

Mr. NORRIS. Certainly.

Mr. SHORTRIDGE. I think I understand the Senator's position, but if he will answer me categorically, is it the Senator's position that a state of war has existed and now exists in Nicaragua as between the United States and that Government, or anyone claiming to represent the Nicaraguan people?

Mr. NORRIS. Yes, Mr. President. To say that a state of war exists does not necessarily mean always that there must be a government. There was no Federal Government in this country during the Revolutionary War. No one will claim that that was not a war. There was no Federal Government here at that time. There were 13 independent Colonies. There was not any declaration of war, and, of course, no one will claim that a declaration was necessary. But the war went on, and all the world realizes and knows that the Revolutionary War was a war which lasted eight years, and it has always been so recognized.

Mr. SHORTRIDGE. The Senator will observe, however, that my question was not limited to an existing war as between two existing governments.

Mr. NORRIS. I understand the Senator's question.

Mr. SHORTRIDGE. Does the Senator claim that there is a war to-day as between us, this Government, and anyone representing the Nicaraguan people?

Mr. NORRIS. Yes.

Mr. SHORTRIDGE. A state of war?

Mr. NORRIS. Yes; that is what I have said, or tried to say several times, that there is such a condition, that it constitutes war, and that it is war right now.

Mr. SHORTRIDGE. As a legal proposition?

Mr. NORRIS. Yes; as a legal proposition, as a moral proposition, as a religious proposition, or as a spiritual proposition. Let us not be technical. Let us take the conditions as they are.

Mr. BINGHAM. Let us be accurate.

Mr. NORRIS. Yes; let us be accurate; and so, to be accurate and to be technical, we would say, according to the Senator from Connecticut, that there is not any war because all the destruction of these lives and this property was by marines rather than by soldiers.

Mr. BINGHAM. Does the Senator maintain that General Sandino has set up a government?

Mr. NORRIS. No; he has not had a chance. He does not get a chance. Will the Senator maintain that George Washington had set up a government? He had not set up any government, and the Government was not set up for years after the Revolutionary War was over.

Mr. BINGHAM. The Senator thinks that the Continental Congress, then, did not constitute a government?

Mr. NORRIS. I did not say that. The Senator can draw that conclusion. If he were an uneducated man, I would think he might draw such a conclusion, but with the great ability of the Senator I can not understand how he will try to quibble out of it, and draw that kind of a conclusion. I did not say anything of the kind. I did not say anything by any possible construction could be construed into meaning that.

Thomas Jefferson in his definition——

Mr. BORAH. Mr. President, before the Senator leaves that, may I say that the subject which the Senator from Nebraska is discussing is one of very great general interest. What its application may be to the amendment before us is a different proposition, as he said in his opening.

Mr. NORRIS. Yes.

Mr. BORAH. But we ought to keep in mind, when we are determining the question of whether the President is initiating a war or carrying on a war, that we are trying to distinguish between the powers of the Congress and the powers of the President, trying to get the correct construction of our own Constitution. It is not like a case where you are trying to settle belligerent rights between two different nations.

Mr. WHEELER. Mr. President——

Mr. NORRIS. I yield.

Mr. WHEELER. A few moments ago the Senator from Connecticut made the statement that at the time Diaz was put into office there were no marines and no Army officers and no naval officers in Nicaragua, as I understood him; and he wanted to have the record kept straight. For the benefit of the Senator from Connecticut, and for the purpose of keeping the record straight, let me say that at the time Diaz was elected, and before he was elected, Lawrence Dennis, who was the American minister in Nicaragua, had his picture taken with Diaz, and then they paraded up and down the street with American soldiers or American sailors off of one of the American warships that lay in the harbor.

Mr. NORRIS. Of course, that would not constitute war, according to the theory of the Senator from Connecticut, because they were sailors, they were not soldiers.

Mr. BINGHAM. Does the Senator think that every time a group of sailors goes ashore in a foreign country it constitutes war with that country? That is an extraordinary theory.

Mr. NORRIS. I suppose the Senator is asking that question for information. I thought he probably understood that without asking the question. Perhaps I have an exaggerated idea of the Senator.

Mr. BINGHAM. That seems to be the implication of the Senator from Montana.

Mr. WHEELER. Oh, no.

Mr. NORRIS. I will say, in answer to the Senator, no. That is a kind of a kindergarten question, but the Senator wants to know, and I will give him the information.

Mr. EDGE. Mr. President, I do not want to interrupt the Senator——

Mr. WHEELER. Let me just say that that was not the implication of the Senator from Montana, but the impression I gained from it, and the impression that was given to the people of Nicaragua. The statements that were issued were to the effect that Diaz would be acceptable to the Government of the United States, and for the purpose of showing that he was acceptable, Dennis and the American soldiers and sailors paraded up and down the streets of Nicaragua to show the people there that the American Government was back of him, and that they would back him up with their Army and with their Navy.

Mr. EDGE. Mr. President, I want to discuss that phase.

Mr. NORRIS. Let me discuss it before the Senator interrupts me.

I do not regard it as extremely important, as I said a while ago, whether at any particular time there were soldiers or sailors or marines in Nicaragua, or whether there were marines there or soldiers there or sailors there at the time Diaz was put into power by us. It is sufficient to say, it seems to me, that the evidence stands undisputed that there are at the present time, and for quite a long time past there have been, American forces there, they are there now, they have been interfering with the Government of Nicaragua, have been attempting to assist the side we set up originally as against the other, they participated in a civil war, and are, under the control of the Government, undertaking to go on and get in control of all of it for the purpose of holding an election, without the consent of the American Congress or the Nicaraguan Congress. Now I yield to the Senator from New Jersey.

Mr. EDGE. The Senator will recall that I drew attention to the fact that the American marines were attacked by Sandino's forces and that, taking the offensive in a natural desire to save their own lives, undoubtedly were, as I frankly said before, pursuing what would be properly interpreted as technical warfare. I want to ask the Senator this question. I understood him to say that he thought they were entirely justified in doing that, Congress not being in session, and even if Congress were in session. What is the Senator's view as to the next move? They are now pursuing men who have attacked them. They did not provoke the attack.

Mr. NORRIS. How could Sandino have attacked the American Army if the American Army had not been in Nicaragua? Sandino does not have ships, he does not have flying machines, he does not have automobiles. It is admitted that whatever army he has is in Nicaragua, and has been all the time. Now Senators want to say, on the one hand, that our Army was not there, that we did not have anything to do with it, and that we are fighting these fellows because they attacked us. It is subterfuge, Senator. It has no truth for its basis. We all understand what the facts are. We are there, and our Army was there before Sandino became what you call now a despot and a bandit. We were there then. We said to him in so many words, "We are going to supervise this election. We are going to keep Diaz on the throne until the expiration of his term. You can lay down your arms or we will compel you to do it by force." There is no dispute about what the facts are. The Senator says they attacked us. Does he suppose these men, even though they be bandits, are to be followed through the hills and marshes, bombs dropped upon their homes, their property destroyed, their towns burned, and that they will never attack us in return? Is it not the most natural thing in the world? That is what makes war.

Mr. EDGE. Perhaps it is. I did not understand the Senator's viewpoint to be that the President did not have the right and the constitutional power originally to have sent the troops to Nicaragua, whether it was for the purpose of bringing about peaceful conditions and protecting American lives and property by supervising an election, or whether it was for some other purpose. I thought he had agreed that the President had a perfect constitutional right to send troops.

Mr. NORRIS. It depends upon conditions. I have said and I believe that while there might be conditions under which he could do it, he has no right to take possession of their territory; he has no right to take sides between two factions engaged in a civil war. When he does that he makes war under this definition, and there can be no dispute about it. He has no right to take possession of that country and their affairs. That is war. He has done it, and he is doing it now. He does not deny it. He admits it. He says he is going on until the expiration of the Diaz term.

We might conceive of a condition where he ought to land troops in Nicaragua, but we can not conceive of a condition in this civilized world where he would do the things he has done in Nicaragua if it was a government which was big enough to take care of itself. No man for a moment would think that he would dare to do such a thing in Canada, yet he has the same right. He would not do such a thing in Japan. He would not do such a thing in Great Britain. He would not do such a thing in any government that is able to take care of itself. Why should not the principle apply to the poorest and the weakest as well as the greatest and the strongest?

Mr. FRAZIER. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. FRAZIER. Does the Senator from Nebraska think that the size of the country has something to do with the interpretation of the Constitution?

Mr. NORRIS. One would think from some of the questions which have been asked here that that might have something to do with it.

Mr. SIMMONS. Mr. President, may I ask the Senator from Nebraska a question?

Mr. NORRIS. Certainly.

Mr. SIMMONS. I want to ask the Senator if he has been able to discover any evidence that at this time or recently Sandino has been doing anything to interfere with the rights of Americans in the possession of their property or to imperil their lives?

Mr. NORRIS. Not that I know of.

Mr. BINGHAM. Has not the Senator heard of the case with which the Senator from California [Mr. SHORTRIDGE] is familiar?

Mr. NORRIS. Yes; but that is not the question.

Mr. BINGHAM. Has not the Senator from Nebraska——

Mr. NORRIS. Just let me talk, if the Senator please. I have the floor.

Mr. BINGHAM. I beg the Senator's pardon.

Mr. NORRIS. That is not the question asked by the Senator from North Carolina. He asked whether Sandino is doing anything now. I understand the Senator from California claims that several years ago Sandino committed robbery, that he robbed a man or killed an American citizen, or something of the kind.

Mr. BINGHAM. It was not several years ago. I think the Senator is mistaken.

Mr. NORRIS. I do not know when it was.

Mr. BINGHAM. It was a few months ago, during the present episode, while he was a rebel against the Liberal Party, that he seized this mine belonging to a citizen of California and destroyed property of the value of a million dollars. I was surprised to hear the Senator from Nebraska say he was not familiar with any such thing.

Mr. NORRIS. So far as the question of war is concerned, I would be willing to admit that he took possession of 100 mines. That only makes my case all the stronger. If he is taking mines and taking property like an army does, like our Army does, like every army does when it is in the field, that is another demonstration that war is going on down there. Why should not the army take a mine? Why should not they take anything they think necessary? We do it. We kill people, we burn houses, and destroy villages. I do not think we ought to be there doing it; but if we are carrying on war we have a right to do it, and that is one of the reasons why I maintain there is war there now.

Mr. BINGHAM. In reply to the question asked by the Senator from North Carolina [Mr. SIMMONS], the Senator from Nebraska should change his answer.

Mr. NORRIS. No; I will not change it. I will let it stand. If the Senator from North Carolina will let his question stand it will be read in the RECORD, and it will be found that my answer is technically correct, so far as I know. I do not know, from the very beginning, of instances where either Sacasa or Moncada or Sandino were trying to destroy American property or kill American citizens. There is the best reason in the world why they should avoid it wherever they could, because they knew that that would bring down upon them the power of the American Government. There is no doubt in my mind, although some Senators claim to the contrary—and yet I have the approval of the Senator from Idaho [Mr. BORAH], who has probably studied this question more than any one else—that the question of the destruction of American lives and American property is mostly a myth. They did not undertake to injure them. They were careful not to do so. It was the most natural thing in the world not to do it. They did not want to do it. But there would come times in carrying on the war, of course, where anybody's property might be seized, where anything that would sustain an army might be taken. That is civilized warfare, and because Sandino did it and because we do the same thing now is only more evidence that there is war existing in Nicaragua.

Mr. President, I have for some time tried to repeat some of of the definition given by Thomas Jefferson.

Mr. SHORTRIDGE. Mr. President, will the Senator yield?

Mr. NORRIS. Will the Senator let me finish this and interrupt me later?

Mr. SHORTRIDGE. Very well.

Mr. NORRIS. Jefferson's definition continues:

When any attempt is made to take over or control the territory—

We are doing that—

to use force for the collection of claims due to American citizens—

That is another reason not involved in this case—

to interfere with the military operations of foreign troops—

That is what we have done from the very beginning—

or above all to interfere between two governments which claim to be the legal government of the country.

That is just the condition that existed down there until we compelled one of them to surrender. In other words, according to this definition of what is war, we have it in Nicaragua on all fours. There can be no doubt about it that it is war.

I am merciful to the President of the United States when I claim it is war. If I had the idea that those Senators who contend there is no war, then I do not know what I would be compelled to say about the President, because he has used the armed forces of the United States to destroy human life, to burn villages, to bomb innocent women and children from the air. He can do that if there is war, but if there is no war between the countries then what must be said of that kind of conduct? The people who are trying to excuse every act of the President, no matter what it may be, are getting themselves in a hole and are putting their hero in a position where he would be subject to much more and much more bitter criticism than I am trying to administer.

I yield now to the Senator from California.

Mr. SHORTRIDGE. If war exists, it exists between this Government and Sandino, does it not?

Mr. NORRIS. I think so; but I am not on the witness stand. I am not going to be the Senator's witness. Let him ask his question.

Mr. SHORTRIDGE. My question is, if war exists, and of course the Senator has stated that it does, then does not war exist as between this Government and Sandino or his forces?

Mr. NORRIS. Yes. I want to repeat to the Senator what I said a while ago, that there can be war even if there is no organized government.

Mr. SHORTRIDGE. Yes; I so understood the Senator.

Mr. NORRIS. And our own country is a living example, having been born under those conditions.

Mr. SIMMONS. Mr. President, will the Senator yield to me again?

Mr. NORRIS. Gladly.

Mr. SIMMONS. If the Senator will pardon me, I have assumed—whether rightfully or wrongfully I do not know, because I have not had an opportunity to make a study of the question; I have depended largely upon the public press for my information and upon speeches I have heard here upon the floor of the Senate—I have assumed that Sandino, at present at least, and probably in the beginning, was engaged in a revolution in an attempt to overthrow the Diaz government. I have assumed also that in the beginning of the struggle, probably in the disorder that was occasioned, harm or injury might have been inflicted upon Americans either with respect to their property or their lives.

But I have assumed, since I did assume that to be the case—and that is why I asked the question of the Senator a few moments ago—that if that had happened in the first stages of this revolutionary movement, then when the United States interceded for the purpose of protecting American property, Sandino had sufficient sagacity to know that this Government was able to protect its property and its citizens, and that he dared not to continue to trespass upon the rights of American citizens.

The question that I asked was whether at the present time there is any evidence that Sandino, in carrying on his revolutionary operations against the Diaz government, is interfering with the rights of American property or jeopardizing the lives of American citizens?

Mr. NORRIS. That is the question the Senator asked me before and the question that I answered, and I said I did not know of any such evidence, and I still stand by that answer. If there is any such evidence, I do not know what it is, and it is not an answer to say that some time ago this man, who has been denounced as a bandit, did something that was wrong. That does not answer it.

I want to say in further answer to the Senator that Sandino was a part of Moncada's army. A part of that army surrendered to the United States and we disarmed them. They surrendered to our forces. Sandino refused to do it. He is a part of that army, so he is fighting the United States. He claims that the United States has no right on the territory of Nicaragua to take control of that Government. He is contesting that right in his feeble way, and that constitutes war again.

Mr. EDGE. Mr. President——

Mr. NORRIS. I yield to the Senator from New Jersey.

Mr. EDGE. If the Senator will permit me, I would say positively that evidence was given before the Committee on Foreign Relations, and I shall be glad to insert it in the RECORD later, to the effect that Sandino had occupied, during the present manifestation, American property and exacted fines or tributes and destroyed American property.

Mr. NORRIS. I am sorry the Senator from New Jersey does not understand the question of the Senator from North Carolina.

Mr. EDGE. I understand his question.

Mr. NORRIS. The Senator's question is whether Sandino is now destroying property or trying to destroy the property of Americans. Is he now trying to kill citizens of the United States? I said I have no evidence of it.

Mr. EDGE. I understood the Senator's question was whether he had done so during this present episode.

Mr. SIMMONS. No; I did not ask that.

Mr. EDGE. That is, within three or four months.

Mr. NORRIS. Mr. President, in carrying on a war either side has a right to take possession of the property of the neutrals of the other side. We have done that in every war in which we have ever been engaged.

Mr. KING. And of our own nationals.

Mr. NORRIS. Yes. Why should not Sandino have the right to do it? Are we going to deny that right? With this highly civilized country of ours standing upon a pedestal before the world, flaunting our security, and claiming that we are only moved by peaceful motives, are we going to deny to this tramp whom we call a bandit, this outcast, the same privileges that we assume now and always have assumed?

It is perfectly foolish, it seems to me, for grown men to make that kind of contention, and I am surprised that anybody should do so.

Mr. KING. Mr. President, will the Senator yield to me for a moment?

Mr. NORRIS. I yield.

Mr. KING. Mr. President, the Senator from Nebraska will recall that in the recent war the United States took possession of the property of American nationals and has not paid them for it to this day.

Mr. NORRIS. The United States took possession of the property of German nationals.

Mr. KING. The Government took possession of the property of German nationals, but it also took possession of the property of our own nationals. The Senator from Nebraska stated that during time of war we have the right to take possession of the property of neutrals, but we also took possession of the property of our own nationals.

Mr. NORRIS. We have that right, and nobody denies it.

Mr. KING. We had the right to do so, but under our Constitution we promised that we would pay; yet in a number of instances suits have been brought which have not as yet been terminated, and American nationals, as I am advised, are still without payment for property which was taken by our Government. So, if Sandino did take the property of American nationals in his country, he did no more than we did in the case of our own nationals in the United States during the recent war.

Mr. NORRIS. Mr. President, I think that is a fair statement of the case, and I do not believe anyone in his sober moments can dispute the proposition that the Senator from Utah has laid down and which I tried in my weak way also to lay down.

Mr. President, let us see what we have been doing there. Several thousand marines have from time to time been taken down there; we have an army in Nicaragua that far surpasses the army that we are fighting. From official records, from the report of the Secretary of the Navy that was laid before the Senate not long ago, we find that we have used 36 American vessels in carrying on that contest. Does that look like war? Does that look as though we were trying to defend somebody's property or somebody's life against a little nation? Does it require 36 American vessels to transport our soldiers, even though we call them marines, down to Nicaragua, and to transport munitions of war, airplanes, and bombs in order to protect American lives and property?

Mr. CARAWAY. Mr. President, may I ask the Senator from Nebraska a question?

Mr. NORRIS. Yes.

Mr. CARAWAY. I believe we assumed the right to seize the arms of the contending forces in that country. If there is no war down there, what is that?

Mr. NORRIS. Yes; we not only claimed that right, but we have exercised it. We went in there when there were two factions fighting for supremacy, and we disarmed them all, except Sandino. Sandino is a part of the army that we were going to disarm, but he refuses to be disarmed. Whether it is right or not, whether he is using good judgment or not, is entirely beside the question. The point I am now making is that it is war and nothing else can be made out of it. We have spent many millions of dollars in the aggregate; we have lost many precious human lives; we have killed hundreds and hundreds of Nicaraguans, many of them having been unarmed. That is one of the results of war. I am speaking of that now to show that there was war and that there is now war.

Let us see. I hold in my hand an announcement by the Associated Press no longer than a few days ago; in fact, it was printed on the 13th day of this month:

MANAGUA, Nicaragua, April 13.—Determination by American marines to use their every resources in rounding up the remaining followers of the rebel general, Augustino Sandino, was seen to-day in announcement of operations in northern Nicaragua.

A new landing field was opened at Condega. This made nine fields scattered throughout the country to which transport planes could carry men and munitions during the rainy season, which, starting next month, will make the jungle trails impassible to transport trains.

By force of our Army, called marines, we have taken nine fields in different parts of Nicaragua, "to which transport planes could carry men and munitions during the rainy season." Does that look like war? Is that an effort to save somebody's life? Is that an effort to protect somebody's property? No, Senators, that is war.

Mr. CARAWAY. That is but an incident to holding an election.

Mr. NORRIS. This dispatch continues:

Land troops are disposed in 48 posts—

Does that sound like war? That is in accordance with the Jeffersonian definition. We are taking possession of the country. We have our troops in 48 different places in Nicaragua—

to which provisions, arms, and ammunition have been going forward steadily during the past months, since Maj. Gen. John A. Lejeune, commander of the marines, came to Nicaragua to survey their activities. Twenty-five patrols are operating daily through the area where the Sandinistas and their leader are said to be hiding.

Does that look like trying to protect somebody's property? That is the pursuit of an army. Senators may say they are bandits down there, but the Nicaraguans say that Sandino is the Nicaraguan Washington. I heard some Senators discussing this matter the other day leisurely and good naturedly, and one of them said, "I saw the Nicaraguan Army; they were a lot of ragamuffins; they were barefooted; they were dressed in overalls, and wore straw hats."

Mr. President, when I was a small boy, away back among the Buckeye hills, I was taught out of a little history that there was a man by the name of George Washington who had an army at Valley Forge, and that they were almost naked in the dead of winter; they did not have even straw hats; they did not even have overalls, and many of them, like the Nicaraguans, were barefooted. That book further told me that they left the marks of their tracks on the snow and the ice from their own blood as they traveled to and fro in that great army of Washington. Are we now to say that Sandino, because he is ragged, because he has not sufficient money with which to equip his men or to clothe them properly, is, therefore, not entitled to be treated even according to the rules of war?

Mr. President, I wish to read briefly from an article by Mr. Beals, whose articles have been running for some time in the Nation. He went down to Nicaragua and finally got in touch with Sandino's army. He describes it to some extent. I shall not read from the article at length, because it would take too long, but he tells their condition; he tells what they are doing. The statements that I shall read will be those which he asserts have been corroborated. He makes other statements as to incidents which were related by Sandino and his followers, but without other corroboration. I am not going to read anything of that kind, but I am only going to read what this writer says he saw and some of the conclusions that he has drawn from what he saw:

The marines are not accustomed to fight in tropical forests, and they are dealing with a tricky opponent who declares "God and my native mountains are fighting for me." It is perhaps only prudent before advancing into a dense growth of these hostile mountains—especially since ammunition is plentiful and the American taxpayer generous—to blaze away with machine guns. But in these mountains and in these forests people have their homes, humble to be sure, and their little clearings, both invisible a few yards away. One of the juanas, or camp women, wounded in the forehead by a piece of shrapnel in an aerial bombardment of El Chipote, put it to me, "The Machos [Americans] have killed many civilians, many animals; they have burned many homes, but they've been careful to kill few Sandino soldiers."

* * * * * * *

Some of these stories may come from official Sandino sources. General Sandino showed me the following letter he had received:

Then follows a letter—

On December 6 this town (Ciudad Antigua) was attacked by two Yankee airplanes, the combat of machine guns and bombs lasting an hour and a half, as a result of which—

Then he goes on to tell what the results were. I am not going to read it all, because, as I have said, I do not want to read anything that has not come within the actual visual observation of this writer.

When I went through most of Mataguineo the inhabitants were in such a state of fear that on the approach of strangers they either whipped out their guns and shot without warning or else took to the hills in full flight. We always sent a single, unarmed Indian ahead of us to advise the householders that friends were approaching and not to take flight or shoot.

As we came nearer to El Chipote the sense of desolation became more overpowering. And when we landed in Murra at sundown on a rainy night and found the town completely deserted, the effect was gruesome in the extreme. The fear of war gripped us with a hundred vicelike terrors. Everyone had left Murra hurriedly. Some of the doors were padlocked; others had been hastily tied with pieces of cloth or rawhide; some were not even tied. From the refugees we learned that they thought the place would be sacked and burned by the marines.

That is a pleasant thought! That is war, Mr. President. We are carrying that on. Did it occur to you, sir, that the American flag is leading that kind of attack; that it is being done in the name of this blessed Government, which we say is founded upon human freedom; that it is being done by our authority; that it is being done by our President? Does that look like protecting human life, or does it look like the protection of property? We have these people frightened to death; there is not any question about that.

Most of the belongings—

Says this writer—

had been left behind. Only a few valuables or cherished objects which could be carried on the shoulder or head had evidently been removed. Those people were not running from Sandino; they were running from the marines.

And as we proceeded we found the mountains silent, depopulated; the food supply was for days exceedingly difficult. At the few houses where people remained there were only men; they had sent the women into hiding with all available food. It grew more and more terrifying to go on, without proper equipment, into mountains from which most of the human inhabitants had vanished. We were lucky to get a few green bananas, a few tortillas—without salt, for salt had become more precious than gold. The refugees who had not gone into Honduras had gone deeper into the wilder mountains. They had found concealed nooks where they had built temporary lean-to's out of branches and sulta palm. In many cases they had even concealed the entrances to the narrow paths leading to their erstwhile abodes. All the way to Little Mataguineo we found no people, only evidence here and there of the passing of refugees. In Little Mataguineo, a place of one house, we came upon a family—man, wife, three children, and a sick old man with a bandage around his head—all emigrating, but they were kind enough to share a few beans with us—again without salt. The owner of the house, we learned, was in the vicinity, but in hiding.

When we later crossed into the Coco River basin the cry was the same: "The Machos are coming!" "They will burn our houses." Here again part of the region had lost many inhabitants.

Whatever the rest of Nicaragua may think of us, this little corner knows only bitterness and hatred. We have taken a place in the minds of these people with the hated Spanish conquerors of other days. The password runs among the people and it echoes in their song, "We must win our second independence; this time from the Americans, from the Machos, the Yankees, the hated Gringos." Names enough they have for us.

My personal opinion is that if Sandino had arms he could raise an army of 10,000 men by snapping his fingers; that if he marched into Managua, the capital, to-morrow, he would receive the greatest ovation in Nicaraguan history. America's friends in Nicaragua are the politicians who have bled the country for so many decades; they are the politicians who wish to stay in power, or to get into power with our help. I would not advise any American marine to walk lonely roads at night in Nicaragua.

Mr. President, this writer goes on to tell how he saw these people who were trudging along, some of them carrying some little trinket that they had taken from their homes, some carrying a little food, some leading a little child, some with bandages about different parts of their bodies where they had been wounded. I remember that he tells about one woman driving a pig, and others taking what little they could into places where they could hide in order to escape our Army—our Army, the American Army, dropping bombs, scaring and frightening these people. They are more frightened than we would be; but we would be frightened under the same circumstances. These people are unused to the civilization that we claim for ourselves. They are not familiar with airplanes and big navy vessels and well-uniformed armies; and when there are dropped out of the heavens the bombs that burn their homes, that shatter their bodies, and scatter the fragments to the four winds of heaven, is it any wonder that these people are emigrating and hunting places in the mountains for the concealment of themselves? Is it any wonder that they have no food? Is it any wonder that the Nicaraguan Army has to go barefooted and wear overalls and straw hats?

My own impression is, Mr. President, that if the American people could see the suffering that is being caused down there they would rise as one man and say, "Get out of this country! Let their country alone! There is nobody there who wants you, except" as this man says, "a few politicians."

It is conceded that a large majority of the people are opposed to Diaz, the man whom we put in power and who is maintained in power by our Army. They are opposed to him. He could not hold his job 24 hours, as I said a while ago,

without the assistance of our Army. Everybody admits it; everybody knows it; and still we are appropriating money to carry on that kind of a warfare.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. CAPPER in the chair). Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. Yes.

Mr. KING. I invite the Senator's attention to a fact with which he is more familiar than I—that during the World War, when it was charged that the Germans were dropping bombs upon French cities, and some of their airplanes passed over London and over English towns and dropped bombs, we denounced those acts as atrocities that were outside the pale of civilized nations; and yet in the case of those poor, defenseless people in Nicaragua we send our armies down there and our airplanes, and we drop bombs upon their little villages and hamlets and destroy and kill and wound and burn.

Mr. NORRIS. Mr. President, those people are moved by the same things that move us. They have the same sensations that all other human beings have. If you prick one of them with a pin it will hurt as badly as though he were an American, wrapped up in the American flag. They love their little children. They love their homes. We would call them hovels, but they are the best they have. We have burned them and destroyed them and killed some of their little children, killed some of their wives, killed some of their women, every one of whom was unarmed and not a single one of whom had ever raised a finger against us. Not one of them had ever done anything against us. They had nothing against us. They wanted to be our friends, and still we are carrying on this warfare against them.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. NORRIS. Just a moment.

Why, Mr. President, through it all, and while these people are running to get away from our Army, I can not conceive of a worse condition. Maybe, Pollyannalike, they thank God that they do not live in Chicago, but at least they are as bad down there; and that leads me to inquire, Mr. President, if President Coolidge wants to use the Army and the Navy and the marines and the sailors to purify elections, why does he not go into Philadelphia, where they vote men who have been dead for 15 years, where they get the names off the tombstones in the cemetery—something they can not do in Nicaragua, because they do not have the money or the financial ability even to put up tombstones at the graves of their dead? Even now for some time we have been deprived of the association and the assistance of the lone Senator from Illinois [Mr. DENEEN], the statesman from Chicago, who has had his time almost entirely taken up in Chicago delivering funeral orations over his dead political heroes.

There is room enough at home if we want to reform somebody. If we want to purify an election, we have the whole United States before us. There are many places where we ought to devote our energies instead of interfering down there; and why down there? What for? What good is it going to do? What are we going to accomplish by killing those men and those women and those children and burning those little hovels and those little homes? What are we going to accomplish?

If Sandino is no more than they say he is, and we are bound to hold an election, why not go on and hold it? He can not interfere with us. He is up in the mountains. He is driven away. He can not come to a voting place. We can hold the election; but we are following him. This Associated Press article shows that there are many places in Nicaragua where we have headquarters. We have 49 posts where we can carry provisions and munitions of war and men with airplanes, even after the rainy season begins. We have 25 places where we are engaged in surveying activities, marching men back and forth, policing the country. We have taken possession of it. We have used the force of arms to do it for the purpose of holding an election it seems now. They have given up the idea that there is any property to be preserved, or that the lives of any Americans are in danger, and they say now, "We are going to hold an election."

Let us see for a moment about that.

In the first place, we put Diaz in power. We keep him in power with our Army, and we make an agreement with him—which is making an agreement with ourselves—that we will supervise an election. The American Congress has not passed any law that gives that authority. The Nicaraguan Congress has not passed any law that gives that authority; but we have made an agreement with ourselves that we are going to supervise an election down in Nicaragua, and that is what we are doing. That is what we are getting ready for; and why should we supervise an election?

It is said now that since we have made that agreement we ought to carry it out; that we have disarmed the liberals, and therefore they will not stand a fair show unless we carry out the agreement. If we have done what Stimson's letter says, we have disarmed both sides; and that would not be a bad thing to take the arms away from all of them. If we have done that—and I assume that we have; I am going to read Mr. Stimson's letter here now, and he was going to disarm both sides—if he has done that, why not get out to-morrow? Neither side is armed. Why not get out to-morrow and let the people of Nicaragua hold their election as they want to? There will be no danger, even to the liberals, if they are the fellows you want to sustain, because the other side will not have any arms.

Let me read this letter:

DEAR GENERAL MONCADA: Confirming our conversation of this morning, I have the honor to inform you that I am authorized to say that the President of the United States intends to accept the request of the Nicaraguan Government to supervise the election of 1928—

That is the Diaz government. That is our government. In other words, the President has accepted an invitation from one of his own people to supervise that government, and he is going to do it.

That the retention of President Diaz during the remainder of his term is regarded as essential to that plan and will be insisted upon—

There you have it. There is some one speaking for the President of the United States, backed by the Army and the Navy of the United States, to Moncada. He is talking to him in this letter. He says:

We are going to see that Diaz serves out his term. We are going to insist that he remain in office during the balance of his term.

What does that mean? That is to a man, Moncada, with an army that can not compete with ours. Everybody knows that. He knows that with the great force of the Government of the United States he will eventually be conquered; he will eventually have to surrender; and so, in my judgment, it is surrendering at the point of a gun.

Let me read on—

that a general disarmament of the country is also regarded as necessary for the proper and successful conduct of such election—

To begin with, we have decided—there is no compromising here—the Government of the United States has decided, first, that Diaz shall remain in office until the expiration of his term. Second, the Government of the United States is going to hold an election in Nicaragua. Third, in order to carry that out a general disarmament is necessary.

and that the forces of the United States will be authorized to accept the custody of the arms of those willing to lay them down, including the government, and to disarm forcibly those who will not do so.

In other words, we say: "The United States Government is going to keep Diaz in power. We are going to disarm everybody. We are going to use the whole Army of the United States to do it if necessary. We are going to hold an election, and we are going to disarm both sides; and those who do not willingly surrender and lay down their arms will be forced by the power of the Government of the United States to do so." That is the contract that we are asked now to carry out!

If there ever was a contract that was void on its face, if there ever was a contract that was brought about by force and intimidation, that is one of them. Nobody can dispute it. In the first place, we make a contract that we have no authority to make. We make a contract with somebody else, and we compel them by force to surrender their arms and lay them down. We compel a surrender, and now we say, "If we do not carry that out we will be violating our contract."

Mr. President, if we are to permit precedents of this kind to go uncriticized; if we are to permit the President of the United States to use the public funds that we appropriate to carry out that kind of a contract, made without any authority of law, made with people who are defenseless and who are forced to sign on the dotted line, who are compelled to surrender at the point of a gun—if we are going to approve that precedent, then where is the next Congress coming in with the next precedent? We will not have to go any further than that. That precedent is enough to permit any man who is President of the United States at his own sweet will to plunge this country into a war with any country on earth. Nobody can dispute that. No one can get away from that; and we will have a President some day who will do that very thing.

Talk about amending the Constitution because we are trying to put this legislation on an appropriation bill! Great heavens!

Have we not amended the Constitution already? If this is sustained, have you not taken out of the Constitution that provision which gives to Congress the right to make war? You have, as fully and completely as though it had a constitutional majority here and had been approved by a sufficient number of State legislatures. You have given to the President of the United States the power to make war at any time against anybody that he pleases to make war against. There can be no escape from that.

Mr. President, I am coming to the point now where I want to plead for the American Government; I want to plead for its perpetuity; I want to plead for the continuation of the life of our Government; I want it to continue to be a representative government; I want it to be a democracy, a liberty-loving democracy, that will stand before the world as an emblem of human freedom. To do that, I must stand against the usurpation of this authority; I must condemn, and the Senate and the Congress ought to condemn, by refusing to appropriate money to carry it out—such an unholy, such an illegal contract as that—however good the motives may be of the men who made it.

I want to call attention, on that point, to what George Washington said in his Farewell Address, one of the finest documents, it seems to me, that has ever been penned by human hand.

Mr. KING. Mr. President, before the Senator proceeds to that will he suffer an interruption?

Mr. NORRIS. Yes.

Mr. KING. I listened with very great interest to part of the address of the able Senator from Idaho [Mr. BORAH] the other day, and was called from the Chamber before he concluded. I have also listened to a number who have spoken, with a view to ascertaining what limitations, if any, there were upon the power of the President to enter into agreements which, in effect, were treaties, which, in effect, according to the contention of some, constitute the supreme law of the land, the Senate having no voice whatever in the negotiation of the agreements, and the agreements never being presented to the Senate for ratification.

I should be very glad if the Senator, before he concludes, would tell us if the President may, at his discretion, enter into such agreements with foreign powers, the effect of which may be, and in some instances inevitably will be, to bring about conflicts, war, in which the United States will be involved.

Mr. NORRIS. Of course, he has no such authority; of course, he has no such power, and here is an instance where he is assuming that power; here is an instance not only where he has assumed it, but has made a contract in violation of the Constitution of the United States, and the executive department of the Government is here now to get money to carry out that contract, and it is up to us to say whether we shall appropriate the money.

It is said we should not do this on an appropriation bill. I admit this is an indirect way of doing it, but I do not know of any other way to do it. We have no other opportunity to do it, and I am opposed to remaining silent now, no matter what the result may be on this amendment and other amendments that will be offered if this is defeated. I am opposed to remaining silent. I want to put my views on record, and I want to put the Senate on record as to what it is going to stand for in this kind of a deal, whether we are going to permit our President to use the powers of his office to make a contract that the Constitution of the United States says he shall not make, and make it in a way that is more dangerous to our national life than any other action could possibly be.

It would not be so bad if the President made some contract with the governor of some State that was illegal along the same line; it would not mean the destruction of our Government; but I want to tell the Senate that if this precedent is carried out—and it will be, because similar precedents are relied on now, none of which has gone quite so far—it will only demonstrate that when you give to an official power, he will go a little beyond what the other fellow did; he will go a little bit farther. The President has now gone to the very limit, so that it will be within the power of any President to make war at any time, according to his own sweet will, upon any country on earth, and we will have nothing to do except to appropriate the money to carry it on.

Listen for a moment to the words of Washington:

> It is important, likewise, that the habits of thinking in a free country should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding, in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominates in the human heart, is sufficient to satisfy us of the truth of this position.

Those are not my words; they are the words of the Father of Our Country, and applied to this case they mean that if you are going to approve this precedent you will take only the first step, which will ultimately bring about the destruction of our Government and the establishment of a despotism upon the ruins. You can not get away from it. If George Washington was right, then the Congress of the United States, in his memory, if for no other reason, ought to call a halt—we ought to stop our President. It does not mean that we necessarily impugn his motives. He may have the holiest of motives; he may mean to be doing good by it; but he is using an illegal means to do it, and some one following him, even though he does good by this wrongful act, will use that wrongful act as a precedent to do something that is in itself wrong, and that will bring ruin to our Government and our people.

It seems to me, therefore, Mr. President, that we have reached the time now when the Congress of the United States ought to speak, not only because we think that Nicaraguans are not being treated right but for the salvation of our country, realizing that we are approaching a point where, if we do not call a halt, we eventually will bring down the structure of our Government upon our heads.

Mr. NORBECK. Mr. President, no country in the world is so far away that its welfare is not our concern to some degree, but the happenings of this continent are either in our house or in our dooryard. We must frankly take their part in dealing with any trouble that arises between the Arctic Ocean to the north and the Panama Canal to the south. I only plead for a little more frankness in the admission of well-known facts toward the solution.

As to the countries bordering on the Gulf of Mexico, there have been lengthy debates in Congress from the beginning of our history. The speeches have referred to the limitation of our Constitution and the duties of the American Government. They have had to bear on the question of self-determination and religious freedom, as well as the protection of life and property. The debates in Congress have apparently been exhaustive, but never a word is said as to why our troubles come to the south of us and never to the north of us. One would almost be led to believe that the same steady, self-reliant people that inhabited Canada have a counterpart in every island and every Republic to the south of us. If so, why this trouble?

It was my privilege at one time to spend about a month in a so-called republic lying south of us, a country that enjoys civil and religious liberty, if constitutional and legal declarations are to be taken at par. Their constitution was, in fact, modeled after our own. But I found the relations between the ruler and the ruled were entirely different. There was no safety for life or property unless you belonged to the faction in power. If a candidate for the presidency lost the election he would still get the office, provided he had the support of the army—ballots did not count; the elections are just pretexts.

The "upper class," if such a term can properly be used, were the property-owning class. They were the office-holding class. They were educated and cultured, and they were white—real Caucasian stock. They were not inferior people, but they did lack the stability and patience of the north European people, even though they may be well advanced in art and learning. They came from those Mediterranean countries that periodically prefer a dictator. They frequently get into a mess that requires a dictator to untangle.

But that is not the most serious situation, for Mediterranean people do not need some outsider to come in and handle their affairs. The sad thing is that only 20 per cent of the population were white—one out of every five. The other 80 per cent of the voting population were largely descendants of the old American stock that inhabited this continent prior to the discovery by Columbus. It is true there was a little mixture of white. The effect of the mixture seemed to be about the same there as on a South Dakota reservation—often the best qualities of the old stock were lost and the vices of the whites were taken on. It did not improve the situation much.

If they lived within the borders of the United States, we would recognize the situation as it is. We would not try to fool ourselves. The population of the Southern States, both white and colored, have accepted the situation, where the bulk of the responsibility falls on the whites. Even in Northern States the native population are denied the right of self-government and are wards of the Nation. If they lived in Nicaragua we might argue for their competency in self-government, but we do not if they live within our own borders.

I could imagine the resentment on the part of the Senators from Mississippi or Alabama if some protesting foreign govern-

ment should insist on a majority rule in those States and the subdivisions thereof. No Member of Congress, North and South, is for giving our own Indians the same responsibility in control of government as the white people enjoy. I do not speak of the Indian as an inferior race. He does have a different culture from ours. He has some virtues the white man lacks, but on the other hand he lacks those traits and experiences so common to a self-governing European people.

Why not accept the situation frankly and admit that we must rely on the white population in those countries for whatever stability can be given the government and whatever protection there may be to life and property, until such a time as the native population has reached that test of civilization—the willingness to sacrifice to-day for the good of to-morrow, the present for the future, and have also learned that the individual must yield for the benefit of the whole, in order to establish safety, stability, and justice?

I do not care to defend the white man's policy or philosophy in dealing with primitive races or his acts of aggression in discovery, exploration, and settlement. The settlement of the countries to the south of us is to some extent a repetition of the history of our own country. We start with letting our self-sacrificing missionaries go out and introduce the Christian religion, to establish schools and hospitals, to segregate the leper, to relieve the sick and the poor.

Next comes the enterprising American who "opens up the country," as he calls it. Plantations are established, mines are opened, factories are built. Employment is given to the natives at a wage five or ten times what they were able to earn before. A new prosperity puts money in circulation. Churches and schools get their part; towns grow up, highways are built. A new era comes into being, but it must be admitted that it is not an ideal situation. Wages are still low compared to those paid in other countries. Property is none too secure and life is often put in jeopardy.

Next we find a few natives, or more likely mixed bloods, have acquired what he calls an American education. It was not an education in the use of the spade and the hoe. It was not a development of patience and self-sacrifice, nor was it the stimulating of the better impulses of the human heart. It was rather a book learning. These young people are thoroughly familiar with our Declaration of Independence, the American spelling book, and the American dime novel. They do not believe in evolution nor in slow growth—they are for direct action and quick action. The leader has a political mind—he takes advantage of the political opportunity. He stirs the prejudice of the ignorant against the white man's invasion and calls attention to the fact that larger wages are paid in New York, and the trouble is on. Our Government has stood idly by—in fact, has even encouraged what has taken place.

A considerable number of Americans have gone into these lands with their families, some engaged in altruistic undertakings and others in money-making occupations. Trouble comes periodically, and when it comes there is nothing more natural than for the man or woman born in the United States to look to our flag for protection. The President may send the marines, and the critics will say that this is a violation of the Jeffersonian theory of self-government—though they refrain from being too specific as to when or where Jefferson said any such thing.

We are told that we are denying these people what we insist on having for ourselves—a free government—in which each individual takes its full part and receives the full benefit. Every argument we hear is based on the theory of equality between races, but the equality is not asserted. If this is a sound doctrine abroad, it should be a sound one at home. If it is fallacy at home, it should be fallacy abroad. Let us quit fooling ourselves.

I am unable to find a reason for our attitude unless it lies in a consciousness of our own wrong-doing toward the natives of this country. If atonement for our transgression is to be given, we might find it more convenient to make such sacrifice in Nicaragua than in North Dakota.

It is not so difficult to call on the Americans who are out in the foreign field to sacrifice their lives and property as a blood offering for their own misdoings. We do not intend to start any reforms in our own dooryard—we are going to start them a thousand miles away from home, where such high purpose will not interfere with our own selfishness.

INEVITABLE

I share the views of the Senator from Idaho [Mr. BORAH] that we can not change our policy abruptly. We must carry out not only written treaties but implied obligations. That all goes to the question of our national policy.

If the policy is to be changed, let us announce frankly—do it in advance and adhere strictly to the announcement—but let us not betray anybody who has relied on our counsel.

MONROE DOCTRINE

The Monroe doctrine placed additional obligations upon this country. At one time it was a necessary doctrine. The need for it does not exist to the same extent. Why not announce to the world our intention of abandoning this as far as applicable to the South American Continent at the end of a 25 or 50 year period?

UNCLE SAM'S OBLIGATION

Let us at the same time announce that we recognize it is our obligation to maintain order all the way from the Canadian border to the Panama Canal. We can not avoid the responsibility for peace and order in our own dooryard. It is not necessary to impose any unfair terms on anybody. We have been helpful to Cuba in bettering their conditions, though we have occasionally had to use a strong arm. It may become necessary to do it again, but we will have the support of the most intelligent and the most patriotic class of her citizens. We have supervised elections in Cuba, Santo Domingo, and Haiti. Our policy has not reflected party politics. We have done this under Democratic administrations as well as under Republican administrations. We are going to carry on. Why not announce our policy frankly? Let us give assurances that our policy will protect the life and property of every citizen in these countries, be he an American banker or an American laborer. Tell our citizens living in foreign lands that in case of trouble it will not be necessary to use any such false pretenses as to run up the British flag and claim protection under same. Give them to understand that our flag will be their protection to-day, to-morrow, now, and in the future, and as long as our Republic endures.

Mr. SWANSON obtained the floor.

Mr. BINGHAM. Mr. President, will the Senator yield to enable me to suggest the absence of a quorum?

Mr. SWANSON. I yield for that purpose.

Mr. BINGHAM. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Dill | Kendrick | Sackett |
| Barkley | Edge | Keyes | Schall |
| Bayard | Edwards | King | Sheppard |
| Bingham | Fess | La Follette | Shortridge |
| Black | Fletcher | Locher | Simmons |
| Blaine | Frazier | McKellar | Smith |
| Blease | George | McLean | Smoot |
| Borah | Gerry | McMaster | Steiwer |
| Bratton | Goff | McNary | Stephens |
| Brookhart | Gooding | Mayfield | Swanson |
| Broussard | Greene | Metcalf | Thomas |
| Bruce | Hale | Neely | Tydings |
| Capper | Harris | Norbeck | Tyson |
| Caraway | Harrison | Norris | Vandenberg |
| Copeland | Hawes | Nye | Walsh, Mass. |
| Couzens | Hayden | Oddie | Walsh, Mont. |
| Curtis | Heflin | Overman | Warren |
| Cutting | Howell | Phipps | Waterman |
| Dale | Johnson | Pittman | Watson |
| Deneen | Jones | Ransdell | Wheeler |

The VICE PRESIDENT. Eighty Senators having answered to their names, a quorum is present.

HERBERT HOOVER

Mr. BLEASE. Mr. President, will the Senator from Virginia yield to me for the purpose of asking to have something printed in the RECORD and to make a statement of about five minutes in connection with it?

Mr. SWANSON. I yield to the Senator from South Carolina for that purpose.

Mr. BLEASE. Mr. President, this Republic was founded by the best and most intelligent manhood that existed on the earth at the time it was brought into being. They did not have to fight their way up from the caves and jungles as the people who had established governments in other parts of the world had had to do. They came here to escape the oppression of monarchies which cursed the Old World, and with their own hands and brawn fought back the oppressors who pursued them here. They builded a government that has become, in a century and a half, the greatest nation and the freest nation that ever existed on the earth. Its keeping is in their own hands and they should have the fullest light on every question on which they are expected to pass at the ballot box.

I can conceive of no greater crime against the Republic than to mislead the people to make them ignorantly destroy their country in attempting to conduct its affairs in the way marked out by the fathers who had offered their lives as a sacrifice on the battle field to make them and their offspring free men.

When a man asks the people to intrust him and elevate him to the exalted station as their Chief Magistrate for four years the people should have all the light on his life obtainable before they should intrust him with their destiny. The candidate for this lofty position should convince the people of distinguished service he has rendered for his country before he should seek so great a reward at their hands.

One of the candidates before the people to-day seeking their suffrages for the exalted office of President of the United States is Herbert Hoover, the present Secretary of Commerce in the Cabinet of the present Executive, Calvin Coolidge. He is asking a great deal at the hands of the people of the country, and they should know who he is before they are qualified to cast a ballot for him. His life's story is best written by himself and its evolution is clearly set forth in the biographical sketches which he has furnished to the currently published books, Who's Who in England and Who's Who in America, covering the period of the past 12 years, during which he has figured before the public.

Mr. BRUCE. Mr. President, will the Senator yield to me?

Mr. BLEASE. Certainly.

Mr. BRUCE. May I observe to the Senator that it seems to me, in view of the doubt as to whether Hoover is an Englishman or an American, his life might well appear in a book entitled "Which is Who?"

Mr. BLEASE. Mr. President, I am going to prove in a minute that he is not an American; that is, if he himself told the truth.

In Who's Who in America in 1916 he gave his life story, as follows:

Hoover, Herbert Clark, engineer, * * * assistant Arkansas geological survey, 1893; United States Geological Survey Sierra Nevada Mountains, 1895; assistant manager Carlisle Mines, New Mexico, and Morning Star Mines, California, 1895; in western Australia as chief of mining staff of Bewick, Moreing & Co., and manager of Hannan's Brown Hill Mines, 1897; manager for Sons of Gwalia and E. Murchison Mines, 1898; chief engineer for the Chinese Imperial Bureau of Mines, 1899, doing extensive exploration in the interior of China; took part in the defense of Tientsin during the Boxer disturbances in 1900; representative of the bondholders in the construction of Ching Wang Tow Harbor in 1900; general manager of the Chinese Engineering & Mining Co. in 1901; partner of Bewick, Moreing & Co. Mines Operators of London from 1902 to 1908; director of Zinc Corporation (Ltd.), Oraya Exploration Co. (Ltd.), Russo-Asiatic Corporation (Ltd.), from 1908 to 1914; was chairman or director of the Burma Corporation (Ltd.), of the Santa Gertrudis Mining Co., Camp Bird (Ltd.), Irtysh Corporation (Ltd.); chairman of the American Relief Commission, of London, 1915 and 1916; chairman for the relief of Belgium; trustee of Stanford University (founded by a British subject); Fellow of the Royal Geographic Society; member of the American Institute of Mining Engineers, of the Society Ingenieurs Civil de France, of the Society Belgian des Iengeneers et des Industriales, Society of Mining and Metals, Society A. A. A. S., Hukluyt Society, etc.; his clubs are Devonshire (England), Ranclaugh (England), Albemarle (England). Is a writer of articles on mining and mines for European publications. His home is Red House, Hornton Street, London, England; offices, No. 1 London Wall Buildings, London E. C., England, and 71 Broadway, New York, and Mills Building, San Francisco.

In the Who's Who in England of 1919, Mr. Hoover sets forth that he holds degrees of doctor of law from Harvard, Princeton, Brown, Pennsylvania, Oberlin, Yale, and Alabama Universities; that he is commander of the Legion of Honor; won the French Academy Audiffret prize in 1918; gave his address at Stanford University of California and his clubs as University of New York, Pacific Union, Bohemian of San Francisco; Metropolitan, Cosmos, and Chevy Chase, of Washington, D. C.

In the English Who's Who of 1920 his title is set forth as "Food Administrator of the United States of America" and "member of the War Trade Council since 1917" and "director general of Allied Relief Administration at Paris after the armistice," and he takes the degree "doctor of civil law," besides many others. In the Who's Who in America of 1918 his address is given as United States Food Administrator, Washington, D. C. In the Who's Who in America of 1920 he has become a member of the Lawyers' Club and the Bankers' Club of New York and gives his address as 120 Broadway, New York.

Mr. President, the Chinese people had lived their own lives at home and defended themselves against foreign pirates for more than 6,000 years; their government reached the state 2,500 years ago where they had all the laws they needed, and their people had but little use for a government to rule over them. They built their first great canal system and lowered the beds of their two great rivers after their 13 years' flood 3,750 years before Christ, and completed their great wall to keep the barbarians out of their country 2,500 years ago. These land and mine and water-front and railroad-grant pirates from the British Empire came upon them unaware during the war between the United States and Spain in 1898 and 1899 and took from them their substance when they were not prepared to defend themselves from the seas, and the Boxer rebellion resulted. Herbert Hoover had renounced his citizenship from the United States and had become a subject of this most imperialistic monarchy that ever existed on the earth and was one of their ready plunderers of the defenseless east, China and Siberia, and it was when this Boxer rebellion was engendered that he first wrapped the flag of the United States about his shoulders and asked protection of the United States Army and Navy in his operations in his new-found kingdom.

Mr. President, here are four reasons why Herbert Hoover should never be President of the United States:

First. When his name was up for confirmation as Secretary of Commerce a noted Senator said:

This man, Herbert C. Hoover, has spent all his grown-up life in the employ of British corporations in England and Australia. He never voted in the United States 'til 1916, for Woodrow Wilson.

The last statement is quoted verbatim.

Second. When Americans—in United States—were paying 10 cents a pound loaf for green, soggy "substitute" bread, England, France, and Belgium were paying 3½ and 4 cents a pound loaf for all-flour, American wheat bread, furnished them by Herbert C. Hoover, the American.

Third. He never accounted for $11,000,000 of the $33,000,000 placed in his hands by the "American Charities (Inc.)" for the starving children of central Europe. Repeated efforts and interrogations by New York publications failed to elicit any response from Herbert C. Hoover or his subordinates in office.

Fourth. When newly appearing in American affairs he, with friends, speculated in American wheat up to $50,000,000 at a time, in the Far East. No denial was ever made.

These facts were all thrashed out by metropolitan dailies at the time of occurrence.

All Americans who could read had this information plainly before their eyes.

Mr. President, here [exhibiting] is a picture of Mr. Hoover. Below it are the pictures of two negroes. They are his candidates for delegates in the Ohio primary. I shall not read the statements around the pictures, but ask that they may be placed in the RECORD as a part of my remarks. I wish, however, to read from the last one, over the pictures of these two negroes:

They know that a vote for Hoover delegates is a vote for Hoover, the antisegregationist.

And the negroes should stand by him.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From the Gazette, Cleveland, Ohio, Saturday, April 21, 1928]

VOTE FOR HOOVER

Long residence in countries abroad, even extensive travel through foreign lands, broadens and materially improves nearly all who have such experience. Herbert L. Hoover spent many years abroad in various countries, Australia and the Orient being among the number, with the result made so clear in recent months by favorable action of great interest to Afro-Americans.

When Principal Robert N. Morton, of Tuskegee, Ala., N. & I. Institute, and the flood sufferers' committee, of which he is chairman, wired United States Secretary of Commerce Herbert L. Hoover, asking the removal of a prejudiced New York woman, an official of the flood sufferers' relief committee in the South because of her heart-rending discrimination against Afro-American flood sufferers, she was promptly relieved of her duties and separated from the service.

When the segregation of Afro-American clerks in the United States Department of Commerce, over which Secretary Hoover presides, was called to his attention a few weeks ago by Neval H. Thomas he promised an investigation, and when the facts were presented to him and he learned the truth of Professor Thomas's segregation charges, Secretary Hoover immediately stamped it out! He was too big and broad-minded a man to tolerate such an outrage upon American citizens of color or anyone else in a United States department presided over by him.

These are the things that best show the man, from the Afro-American's standpoint, and ought to have a marked influence upon their determination as to whom to vote for on April 24, 1928. The utmost confidence can be placed in a man whose mind has been so broadened by travel and residence abroad as well as at home that he is able to rise above the contemptible prejudice of the day to secure justice even to employees of color in his department of the Government service at Washington, D. C. Vote for Herbert L. Hoover next Tuesday.

OUR CANDIDATES ON HOOVER TICKET IN OHIO PRIMARY

A graduate of Howard University, Washington, D. C., Capt. Leroy H. Godman, of Columbus, was a staff officer of the Three hundred and sixty-sixth Infantry, Ninety-second Division, during the war and served overseas as judge advocate for his unit. He is a member of the Ohio State Bar Association, American Legion, and numerous other civic and fraternal organizations.

Dr. Leroy N. Bundy, of Cleveland, representing our people of northern Ohio, is a candidate for delegate from the twenty-first district. He is a leader among our people of Cleveland and adds decided strength to the Hoover cause in this industrial center. His Cleveland indorsements include six Republican clubs and the county Republican organization. There is no doubt of his triumphant election Tuesday.

Ohio Afro-Americans know that in supporting the Hoover delegates they are voting for the best interests of themselves and the whole Nation. They know that a vote for Hoover delegates is a vote for Hoover, the antisegregationist.—(Adv.)

Mr. BLEASE. I also ask leave to print at this point in my remarks an article published in the Chicago Daily News of April 21, 1928, entitled "From the negro's point of view," and will only read the last few words of the article, which states:

True enough, the Commerce Department has seen segregation for the last four years, but that was before Mr. Hoover had become a serious contender for the Presidency.

That statement is from one of his negro friends' newspaper.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From the Chicago Daily News, Saturday, April 21, 1928]

FROM THE NEGRO'S POINT OF VIEW

By Chandler Owen—Hoover, BLEASE, and the negro

A little while ago Neval H. Thomas, president of the Washington (D. C.) branch of the National Association for the Advancement of Colored People, protested to Secretary of Commerce Hoover against racial segregation in his department. Quite promptly thereafter Mr. Hoover abolished such discrimination. In doing so, however, the Secretary of Commerce incurred the hostility and castigation of Senator COLE BLEASE, of South Carolina, whose annual bills for a Federal anti-intermarriage law and a Jim Crow car for the District of Columbia have already been introduced and are now resting peacefully with the Judiciary Committee, to which they were tactfully referred.

Senator BLEASE declares Hoover's action in abolishing racial segregation in the Department of Commerce has spelled a death blow to all of his (Hoover's) hopes for breaking the "solid South."

Of course, Mr. Hoover has already figured the whole problem out, and he understands that a Republican candidate for the Presidency has much more to gain from a "solid Republican northern negro vote" than from a "solid Democratic southern white vote," when the latter is invariably cast against the G. O. P. candidate. So there is neither principle nor good politics to recommend Mr. BLEASE's course to Mr. Hoover.

True enough, the Commerce Department has seen segregation for the last four years, but that was before Mr. Hoover had become a serious contender for the Presidency.

Mr. BLEASE. I have another article entitled "Thomas to Mills," with a picture of a negro named Thomas, who wrote the letter—he is supposed to be the head of some organization here—to his devoted friend Ogden L. Mills, which I ask may be inserted in the RECORD as a part of my remarks.

The PRESIDING OFFICER (Mr. JOHNSON in the chair). In the absence of objection, it will be so ordered.

The article is as follows:

[From the Gazette, Cleveland, Ohio, Saturday, April 21, 1928]

THOMAS TO MILLS—NEVAL STILL AFTER UNDERSECRETARY MILLS (A NEW YORKER) OF THE TREASURY DEPARTMENT—COOLIDGE ADMINISTRATION SEGREGATION

WASHINGTON, D. C.—A definite statement by Ogden L. Mills, Undersecretary of the Treasury, on the segregation of our employees in the Treasury Department is requested in a letter sent, April 13, by Prof. Neval H. Thomas, president of the local N. A. A. C. P. branch; Robert J. Nelson, of the Elks; and Thomas A. Johnson, of the National Equal Rights League. The letter to Mr. Mills is as follows:

"We have the honor of asking you for the results of your investigations in your vast department and your future policy dealing with your colored employees. It has been three months since we first called on you at the Treasury Department. Since then we have had two lengthy interviews with you and paid five additional visits to see you without success. In the meantime we have had no word from you as to your disposition of our case. We, therefore, take this means of contact. You will remember that we complained about segregation first, and informed you of the immense injury the undemocratic practice is doing our people, the Government service, and the Constitution itself. We pointed out the 'Jim Crow' section of the office of the Register of the Treasury where pernicious discrimination keeps superior negro clerks in lower salary grades, in inferior work, and under constant humiliation of being huddled together on the basis of color. Then we told you of the office of the United States Treasurer where there are the Hon. John T. Howe, ex-member of the North Carolina Legislature, and five other competent negro clerks of superior intelligence and long service, set off from their white coworkers and retained in low salary grade and on the simple mechanical work of 'stating accounts.' White men whom they have taught have passed over them to higher placement and even to the position of chiefs of departments. You spoke to us of the immensity of your department with its 67,000 employees. We held that the merit system can not prevail there when, out of so vast an army being paid by all of the people, there is not one negro in a directive position. We know all too well of the superiority of the negro clerk and that of all of the other colored employees, for white men of their caliber and attainment secure far more lucrative activities in the economic, civil, and political life of the Nation. Hence, if the merit system prevailed in the Treasury Department, or in any other of the many other bureaus of the Nation and the municipality here at the Capital, there would be thousands more negro employees, and many of them holding important executive positions. In the Bureau of Engraving and Printing, the Government Printing Office, and in others of the thirty-odd huge establishments that come under your jurisdiction the same complaints can be justly made. We, therefore, respectfully ask that you make us reply—belated, if you please—to our complaints."

Mr. BLEASE. In the Afro-American of Baltimore, Md., there is another article on Mr. Hoover and his segregation, which I ask to have printed in the RECORD. I also have a letter which I received a few days ago, written by a very distinguished citizen of our country, giving some past history, which I ask to be inserted in my remarks.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From the Afro-American, Baltimore, Md.]

WORK ABOLISHES JIM CROW IN INTERIOR DEPARTMENT—PARTITIONS SEPARATING RACES IN LAND OFFICE ARE TAKEN DOWN—BLEASE RILED, YELLS IT'S "SOCIAL EQUALITY"—N. A. A. C. P. EXPECTS SEGREGATION IN TREASURY TO END NEXT.

WASHINGTON, D. C.—By order of Secretary Hubert Work, segregation of Interior Department workers because of race ended April 13.

Last week Secretary Herbert Hoover abolished Jim Crow in the Department of Commerce, and Secretary Andrew Mellon, of the Treasury, is expected to take similar steps.

Conditions in the Federal departments will now go back to what existed before the first administration of President Wilson. Democratic subordinates of Mr. Wilson were the first to issue segregation edicts, which separated workers of both races who had been working in the same room, and in many cases, at adjoining desks for 25 years.

WORK'S ORDER

In accordance with the order of Secretary Work Miss Gretta D. McRae, a colored stenographer in a "Jim Crow" division of the Land Office, was transferred to the stenographic division. She was later transferred to the survey division, and is doing stenographic work for any employee of that division who may need the services of a stenographer.

Partitions which have separated white and colored employees in the Land Office are being removed, and white and colored clerks are being put to work together in the same rooms.

BLEASE PEEVED

In the Senate last Monday Senator COLE BLEASE (Democrat, South Carolina) accused Secretary Hoover and his campaign managers, Doctor Work and Ogden L. Mills, Assistant Secretary of the Treasury, with seeking to gain the negro vote in the doubtful States by ending this segregation.

The Secretary of Commerce, BLEASE said, is using his influence also with his campaign managers and assistants in other departments. For eight years, he stated, the conditions under which they were working were not disturbed. After Mr. Hoover became a candidate for President he abolished segregation in the Census Bureau.

BLEASE read into the CONGRESSIONAL RECORD a letter from an unnamed white girl clerk and a newspaper article in which the Land Office was referred to as a "hell hole" at best. The white chief of the mineral division, for 35 years termed "Bully McGhee," is ignorant, uncouth, dirty, sneaking, and listening, and knowing nothing of the work.

SOCIAL EQUALITY

The new order which makes all girls use the same lavatory was referred to by BLEASE as an attempt at social equality.

Hon. COLEMAN BLEASE, M. C.,

*United States Senator from South Carolina,*

*The Capitol, Washington, D. C.*

DEAR SENATOR BLEASE: I note with interest the remark by yourself as cited in the CONGRESSIONAL RECORD of April 18 (6696), respecting

the circulation of the report that a candidate for the Republican nomination at Chicago had negro blood, in order to win support for him from the negro delegates from the South. I was present as a spectator at the time of that nomination, and I was told this by the Louisiana negro delegates, of whom seven were seated on the sidewalk outside the auditorium and talking cheerfully about the matter.

The same report was circulated about this same man when he first ran for the State senate; it was circulated about him when he ran for lieutenant governor; it was circulated about him when in 1910 he ran for governor and was defeated by Judson Harmon; it was circulated about him when he ran for Senator against Timothy Hogan, a better man and a first-class lawyer, in 1914 and won.

In 1920 I was a member of the city council of a city of this my native State and that of my forefathers for several generations, and chairman of the police committee, in which capacity it was represented to me on a Sunday in July that a negro preacher from outside the city was in the pulpit of a negro church and had asked every negro and negress of the city to go to the polls and vote for this man because he had negro blood. I was told by indignant citizens to stop this outrage before it should happen again.

It did happen again and it happened that very Sunday evening and again two Sundays later. The police statutes of the city, county, and State are inadequate to meet any such situation. The Republicans were very urgent that I should allow this preaching to go on, because they believed that it would improve the chances of election for this candidate.

Ohio has many colored folks who have crossed the line and "come white." The notion that Democrats circulated this tale is false at least in Ohio. It was of Republican origin, in order to get out the negro votes, as it certainly did.

The man himself was frequently appealed to in order that the tale might be stopped, but he always took the ground that to deny its truth would cost him the negro vote and support. Among white people his white friends always asserted that he was an all-white man, of course. It was a great political play in a State with a great negro vote. These same white friends talked differently whenever they thought that the negroes would hear of what they were saying. These same white men are now telling their negro supporters that the man was a very fine President and that all the stories about corruption in his administration are Democratic lies. And because the negroes have no way and no time to find the facts, they believe that a man of their own race has made a splendid record as President.

White is black, black is white to these Republican managers.

Yours very respectfully,

———— ————.

(Dated April 21, 1928.)

Mr. BLEASE. Mr. President, I made a charge here on the floor the other day that "Mr. Hoover had made this change in the department only for the purpose of obtaining the negro vote." There are negro newspapers and negro correspondents stating that to be the fact, and there is an appeal to the colored people of Ohio to vote for Mr. Hoover because he has issued this order. I think the country is entitled to have that information, and I think it is also entitled to the information for which I asked the Senator from Kentucky [Mr. SACKETT] the other day. See CONGRESSIONAL RECORD, April 20, 1928, page 6862.

## THE POLITICAL SITUATION

Mr. TYDINGS. Mr. President, I ask unanimous consent to have printed in the RECORD a speech delivered by the senior Senator from Iowa [Mr. STECK] before the Democratic State convention at Des Moines, Iowa, on April 20.

The VICE PRESIDENT. Without objection, it is so ordered. Senator STECK's speech is as follows:

In a discussion of political conditions affecting our Government and our people so many angles present themselves, so many questions are of importance, that anything approaching a full discussion of them all or even a major part would be impossible.

It is my intention to go over briefly the more important issues and to but mention others which are almost of equal importance.

From 1912 until 1918, only six years, the Democratic Party was in absolute control of the executive and legislative branches of our Government. In these few years we made a record of accomplishment which is without parallel in the history of this or any other Government. With a loyal majority in both Houses of Congress, under the matchless leadership of Woodrow Wilson, the Democratic Party wrote into our law:

Federal reserve banking act, wresting control of money power from Wall Street.

Farm loan act, enabling farmers to negotiate loans at low rates of interest.

Smith-Lever Agricultural Extension Act, extending aid to farming industry.

Federal Trade Commission act, for prevention of unfair trade practices.

Clayton Antitrust Act, in which it was declared that labor is not a commodity.

Underwood-Simmons Tariff Act, under which trade reached unparalleled dimensions.

Extension of parcel post and postal savings bank system.

Tariff Commission act.

Income tax amendment and act, levying taxes according to ability to pay.

Constitutional amendment for election of United States Senators by popular vote.

Corrupt practices act, aimed at ending practice of corrupting elections.

Bureau of Farm Markets and Bureau of Farm Management act.

Creation of Department of Labor, first full recognition of labor.

Creation of Federal Employment Bureau.

Workmen's compensation act.

Eight-hour law applicable to railroad and Federal employees.

Establishment of Woman's Bureau.

Act exempting labor and farmer organizations from inhibitions of antitrust law.

Vocational training act.

War-risk insurance act, and other measures for relief and rehabilitation of World War veterans.

During the years while this legislative record was being written, America became involved in and prosecuted to victory the greatest war in the history of the world. It raised and equipped fighting forces numbering 5,000,000 men and transported 2,000,000 of them across submarine-infested seas to the fields of France and Belgium without the loss of a single life. This was done at enormous cost, of course, but let it never be forgotten that, despite the ghoulish rakings of numerous investigating committees, appointed by the hostile majority that had gained control of Congress, in all that stupendous record they utterly failed to find evidence of crookedness, corruption, or graft upon which a Republican Department of Justice could obtain one single indictment of an official intrusted with power by Woodrow Wilson. This is a record that will be reviewed with pride so long as our Nation lives.

The Republican Party has had entire control of the legislative branches of our Government since 1918 and control of both the legislative and Executive since 1920. The mere statement of these facts should be sufficient to insure Democratic victory in this year of 1928. It should seem unnecessary to remind the voters of the country that all the ills and evils from which we have suffered have come during the past 10 years, between 1918 and 1928.

In 1919 when the Republican Party succeeded to the control of Congress the country was at peace and enjoying unprecedented prosperity. What is the record since that date?

The deflation and resultant ruin of our farmers.

A new record of bank failures, 4,300 since 1920.

A new record of business failures and bankruptcies.

A boom in the business and profits of certain great industries, but the ruin or near ruin of the great mass of smaller ones.

Five million men out of work in 1922.

Four million men out of work in 1928.

The farmer's dollar worth but 60 cents.

Corruption in high places. Ferreted out by Democrats. Complacent silence or acquiescence by Republican officials.

There was the disarmament conference which Republicans hailed as the greatest step toward peace of all history, but now it develops that we lost $300,000,000 worth of the finest battleships that ever floated under any flag, while the British tore up some blueprints and pictures. They matched their wits with the foreign diplomats and it cost the taxpayers $300,000,000.

Immediately the Republican Party gained control of Congress in 1919 they proceeded in every conceivable way to annoy President Wilson in his efforts to arrive at fair and honorable terms of peace between the United States and the Central Powers.

The proudest boast of this administration is what they call their economy program, but the fact is that, notwithstanding the constant reduction of the public debt and resultant lessening of interest charges, the cost of Coolidge economy government has increased during each year of his administration, while the taxpayer has continued to be burdened with war-time taxes. In spite of the annual guesses of the "greatest Secretary of the Treasury since Alexander Hamilton," enormous surpluses have piled up each year. As a result of these annual surpluses either taxes should have been reduced or, by applying the surplus to a reduction of the public debt, our annual costs of government, including interest charges, should show a steady reduction. Neither of these things have happened. The administration has not permitted a real reduction of taxes, and Coolidge economy has given us a constant increase in cost of government.

CORRUPTION

Throughout the existence of our Government no holder of high office under a Democratic administration has been successfully accused of graft or corruption, while it has been charged that no Republican administration since Lincoln has escaped the proven indictment of some of its officials high in Government service.

One could talk for hours and not tell all the story of corruption in high places since the Republicans came into power in 1919.

There is the story of the sale of the country's resources. A story reeking with filth and smeared with oil.

There is the story of the sale of patronage and privilege to the highest bidder.

There is the story of the Indiana elder who took tainted—some say stolen—bonds to pay Republican campaign deficits, and peddled them around the country among the faithful.

There was the looting of the Veterans' Bureau, and the granting of special favors by the Alien Property Custodian for a consideration.

It is a sordid story of debauchery, of corruption, of graft, brought to light through Democratic effort in spite of silence and even opposition in high places. Just to call the roll tells the story:

Albert B. Fall, Secretary of Interior, trader in the country's resources. Resigned.

Harry K. Daugherty, Attorney General. Permitted to resign.

Will H. Hays, Postmaster General. Receiver of bonds. Resigned.

Edwin Denby, Secretary of the Navy. Just dumb. Resigned.

Charles R. Forbes, Director of Veterans' Bureau. Convicted felon.

Thomas W. Miller, Alien Property Custodian. Convicted by a jury and refused retrial by our highest court.

Jesse B. Smith, friend of Daugherty. Suicide.

The record is blacker than the corruptions of Grant's administration or the scandals of and following the Spanish War. We do not charge the rank and file of the Republican Party with being dishonest or unpatriotic. We know such a charge would be untrue. That party has, however, at times been unfortunate in its choice of leaders.

PROSPERITY

According to Republican propaganda the country is enormously prosperous. Figures are published to prove this claim, figures furnished by departments of the Government. Endless statistics are quoted conclusively showing that the Republican Party has brought the country to the highest state of prosperity it has ever known. Of course, we could not expect the Republicans to broadcast a tale of business depression, agricultural poverty, unprecedented bank failures, and general unemployment, especially just before an election, but if the different departments of the Government give out any information it should be in accordance with the facts. Government departments should not be used to spread misleading and untrue information for purely partisan political purposes.

Republican officials say that industry is prosperous. We will admit that the larger ones, the great combinations, are prospering as never before, but they do not publish the fact that the smaller companies are at the lowest peak in many years or that the record shows more bankruptcies than ever in our history.

They say that agriculture is on the road to recovery, and if just let alone will ultimately recover. If this be true, if agriculture does ever reach the plane of prosperity it held under Democratic rule, it will be by the labor and thrift of the farmer himself and not because of any help from the present administration.

The record of bank failures surely does not indicate prosperity. Four thousand three hundred of them in seven years of Republican prosperity as compared with 578 failures during eight years of Democratic control. It is interesting to note that in the industrial States there have been less bank failures since 1920 than for a 10-year period prior to 1920. In the New England and Eastern States from 1909 to 1920 there were 128 bank failures, while from 1920 to June 30, 1927, there were 78 failures.

In the agricultural States an entirely different situation is shown.

In the 13 Southern States from 1909 to 1920 there were 220 bank failures, while in the period from 1920 to 1927 there were 1,116 such failures.

In the Middle Western States there were 184 bank failures from 1909 to 1920, and 1,327 from 1920 to 1927. Iowa is in this group and had but 13 bank failures from 1909 to 1920 and 453 failures during the past seven years. The year by year record of bank failures shows an increase each year from 1921 reaching over 900 during 1927. It has been often said that the condition of our banks reflects the state of our prosperity. If this be true, the Republican boast of prosperity is without basis in fact.

The Republicans claim there are only about 2,000,000 men unnecessarily out of work. This means that there are about 2,000,000 men who want work and can not get it. Other agencies say the true figure is around 4,000,000, and this estimate is concurred in by labor bodies and reports from State labor commissions.

Accepting the Republicans' figure of 2,000,000, surely it can not be successfully claimed that we are enjoying general prosperity when approximately 10 per cent of our wage earners are walking the streets hunting work, when this last winter we saw bread lines in all our larger cities, the charitable institutions swamped with men hungry and cold, and the jails crowded, not with criminals but with honest men who had no other place to sleep. It does seem that we have had enough of Republican prosperity to do us for many years.

AGRICULTURE

In 1919, when the Republicans took over control of both Houses of Congress, agriculture was enjoying the greatest prosperity. For the only time in history farming was financially on a par with other industries.

The Republicans' first legislative act was to pass an emergency tariff law, soon followed by the Fordney-McCumber act, which under the guise of a protective tariff gave us the present prohibitory tariff. Then in 1920 the Republican platform declared for "courageous and intelligent deflation," and immediately after the Harding administration came into power in 1920 the Republicans proceeded to carry out this plank of their platform. This act was hailed by Republicans as a guaranty of agricultural prosperity. The effect was to plunge agriculture into the darkest days it has ever known. Their action may have been "courageous," but certainly no one will admit its "intelligence."

Another plank in the Republican platform of 1920 said that—

"The Republican Party pledges itself to the development and enactment of measures which will place the agricultural interest of America on a basis of economic equality with other industries to assure its prosperity and success."

We have seen that they faithfully carried out the deflation plank of their platform, but what have they done in eight years to carry out in any degree their promise of economic equality for agriculture? The fact is that nothing has been done and it may properly be charged that no good-faith effort has been made to carry out their platform pledge to the farmer. They have proven either that the Republican Party has not the ability to protect the farmers or they have demonstrated that that party is indifferent to the farmers' interests.

The McNary-Haugen bill, devised to relieve the farmer, was defeated in 1926 when the Republican Party had entire control of Congress. The same bill was passed in 1927, but was passed by Democratic votes. The record shows:

That in the House 58 per cent of the Democrats voting voted for this measure, while of the Republicans voting only 51 per cent voted affirmatively. In the Senate, of the Democratic Senators present and voting, 56 per cent voted for the bill as compared with 52 per cent of the Republicans.

Then a Republican President vetoed the measure, presenting a long message setting forth his reasons, in the preparation of which he was assisted by those great friends of the farmer—Mellon, Hoover, Sargent, and Jardine. The veto message was a patchwork of ideas glaring with inconsistencies and false logic. It showed an inability to understand or appreciate the farmers' problems and a lack of sympathy with the farmers' condition. Last week the Senate again passed the McNary-Haugen bill. On this vote, of the Democrats voting 28 voted "aye" and 9 "no"; of the Republicans voting but 25 voted "aye" and 14 voted "no," so again the Democrats furnished the votes to pass this bill demanded by our farmers, which, it is rumored, the President will again refuse to sign.

The Republican Party has long posed as the friend of the farmer. For a generation and longer the farmers of the great Middle West have been the backbone of that party and have kept it in power. Our farmers have been faithful to the Republican Party and have accepted its pledges of friendship. But they now see that these pledges have been mere bait for votes; that while the farmers furnished the votes all Republican favors have gone to other industries. Our farmers are now demanding legislative aid, including a revision of the tariff, and threaten to bolt the Republican Party. I am wondering if they will be able to abandon the habits of a lifetime and carry out their threat. I predict that the Republican platform of 1928 will repeat the age-old pledges to the farmer and I fear that the farmer will again be persuaded to believe these pledges sincere. Let us hope that they will not forget the years of broken Republican promises and unfulfilled Republican pledges, and will remember that under Democratic administration every pledge was redeemed, every promise fulfilled.

For years the farmers of the Middle West have been told by the Republican Party that the Republican tariff acts have brought them good times by protecting their products from foreign competition. The Republicans have always placed high duties on farm products, but anyone who cares to study the subject soon discovers that no matter how high the duties may be put they do not affect the price the farmer receives, even to the slightest degree; there may be some exceptions, but so far as the Iowa farmer is concerned tariff duties add nothing to the price of his products.

On the other hand, the tariff compels the farmer to pay higher prices for almost everything he buys.

Even Republican defenders of high tariff have been compelled to admit that the Republican tariff has not done for the farmer what that party has so long claimed.

Senator WATSON of Indiana, one of the old guard of the Republican Party said not long ago in the Senate, "We have discovered that the tariff on agriculture has not been effective." The fact is that the high duties imposed on agricultural products were enacted by the Republican Congress purely to make a big showing to the farmer, to make him believe that he would get all the excess duty in one form or another, and to make it easy for him to swallow the high duties on manufactured goods. Conditions which have existed following the enactment of the Fordney-McCumber Tariff Act must prove to anyone of even slight intelligence, who is sufficiently interested to enter upon even the slightest investigation, that this Republican prohibitory tariff act has accomplished exactly what we Democrats prophesied at the time of its passage; that is, it has worked to the benefit of the large manufacturing interests and against the interests of agriculture and the smaller industrials. Yet the Republicans have refused to even consider a revision of existing rates.

The only remedy they have suggested is to raise the present tariff schedules. They display no originality. In nine years the Republicans have not passed a single piece of progressive legislation. In nine years they have not even suggested one piece of constructive legislation. Their inability to create legislation to remedy existing conditions proves that President Wilson was right when he said that the Republican Party had not had an original idea in the last 50 years. During this session of Congress, Senator MCMASTER, Progressive Republican, introduced a resolution asking for the revision downward of existing excessive tariff schedules for the purpose of establishing a closer parity between agriculture and industry. It passed the Senate by a vote of 54 to 34 and was defeated in the House. In the House every Member from Iowa voted against the resolution, thus helping defeat a move to increase the duties on agricultural products and at the same time to decrease the duties on the products our farmers must buy.

The Democrats are not and never have been free traders. We believe in a tariff which will protect our own industries, but which at the same time will be fair to the consumer. We do not believe that under the cloak of a "protective tariff" certain industries should be preferred to the detriment of others. During the operation of the Democratic tariff act all our people, all industry was prosperous, while under the present Republican tariff only the great industries have prospered, and other industries, including agriculture, have been suffering a general depression. The mere statement that from 1912 to 1919 the country was operating under a Democratic tariff and that from 1919 to 1928 it has been under a Republican tariff act should be sufficient for anyone who has been familiar with conditions during these periods.

LAW ENFORCEMENT AND PROHIBITION

Whatever opinion any individual may have on the prohibition question, all who are honest must agree that so long as the prohibitory amendment is a part of our fundamental law, and so long as the Volstead Act remains on our statute books, they must, as a matter of common decency, be enforced. We all know of the disgraceful conditions existing due to Republican failure to enforce these laws. Conditions could hardly be worse than they have been with the prohibition enforcement under the direction of Mr. Mellon, the Republican Secretary of the Treasury. I see no reason why the Democratic Party should permit itself to be divided on the liquor question. As Democrats, we believe that the Democratic Party is better qualified and fitted to solve this annoying question than the Republican Party, and, believing in the ability and honesty of purpose of the Democratic Party, every Democrat, no matter what his convictions may be on this question, should unite in putting his party in power to give that party a chance to solve this as it has solved so many other important issues.

This same logic applies to all other questions on which any of us may have settled convictions. We may and do differ among ourselves as to how these various matters should be settled, but we are all Democrats. We agree on the fundamentals which make us Democrats. We know that the Democratic Party is the best political agency we have at our disposal to settle the many important questions confronting the country. We have seen that the Republicans either can not or will not meet these issues, so all Democrats must, temporarily at least, put aside personal ideas, forget personal prejudices, and in a spirit of tolerance, as Americans and Democrats, submit to the judgment of the majority of our party expressed through this and our national convention. Acting together in such a spirit we can and will win; failing to do so we invite certain defeat.

The people have slowly, but I believe surely, come to realize that they can not expect anything from a Republican administration. There is a general feeling of unrest and dissatisfaction with existing conditions such as has always occurred when the people have retired the party in power. This feeling will grow in intensity from now until the election in November, notwithstanding the frantic efforts of the Republican Party. It will not be stopped by fair promises, by false propaganda, or by the expenditure of huge slush funds. The American people once aroused will sweep aside all obstacles which can be put in their way and at the polls in November retire from power the party which has demonstrated its unfitness to serve the Nation.

EDWIN MARKHAM

Mr. COPELAND, Mr. President, this is the birthday of Shakespeare, universally recognized as the world's greatest poet; and by a most interesting coincidence, it is also the birthday of one of the world's greatest living poets, a constituent of mine—Edwin Markham.

A few weeks ago the Senate paused long enough to pay deserved homage to the world's best-loved poet—Longfellow. It will honor itself to-day by similar recognition of two whose achievements in the realm of letters will live long after most others are forgotten; and I suggest that two of Markham's wonderful poems, The Man With the Hoe and Lincoln, the Man of the People, be placed in the RECORD.

There being no objection, the poems were ordered to be printed in the RECORD, as follows:

This revised version was chosen out of 250 Lincoln poems by the committee headed by Chief Justice Taft, chosen to be read at the dedication of the great Lincoln Memorial erected by the Government in Washington, D. C. This was in 1922. There were 100,000 listeners on the ground and 2,000,000 over the radio. President Harding delivered the address.

LINCOLN THE MAN OF THE PEOPLE

When the Norn mother saw the whirlwind hour
Greatening and darkening as it hurried on,
She left the heaven of heroes and came down
To make a man to meet the mortal need.
She took the tried clay of the common road—
Clay warm yet with the genial heat of earth,
Dasht through it all a strain of prophecy;
Tempered the heap with thrill of human tears;
Then mixt a laughter with the serious stuff.
Into the shape she breathed a flame to light
That tender, tragic, ever-changing face;
And laid on him a sense of the mystic powers,
Moving—all husht—behind the mortal veil.
Here was a man to hold against the world,
A man to match the mountains and the sea.
The color of the ground was in him, the red earth;
The smack and tang of elemental things;
The rectitude and patience of the cliff;
The good will of the rain that loves all leaves;
The friendly welcome of the wayside well;
The courage of the bird that dares the sea;
The gladness of the wind that shakes the corn;
The pity of the snow that hides all scars;
The secrecy of streams that make their way
Under the mountain to the rifted rock;
The tolerance and equity of light
That gives as freely to the shrinking flower
As to the great oak flaring to the wind—
To the grave's low hill as to the Matterhorn
That shoulders out the sky. Sprung from the West,
He drank the valorous youth of a new world.
The strength of virgin forests braced his mind,
The hush of spacious prairies stilled his soul.
His words were oaks in acorns; and his thoughts
Were roots that firmly gript the granite truth.
Up from log cabin to the Capitol,
One fire was on his spirit, one resolve—
To send the keen ax to the root of wrong,
Clearing a free way for the feet of God,
The eyes of conscience testing every stroke,
To make his deed the measure of a man.
He built the rail pile as he built the State,
Pouring his splendid strength through every blow:
The grip that swung the ax in Illinois
Was on the pen that set a people free.

So came the captain with the mighty heart,
The man of great compassion and great peace;
And when the judgment thunders split the house,
Wrenching the rafters from their ancient rest,
He held the ridgepole up, and spikt again
The rafters of the home. He held his place—
Held the long purpose like a growing tree—
Held on through blame and faltered not at praise.
And when he fell in whirlwind, he went down
As when a lordly cedar, green with boughs,
Goes down with a great shout upon the hills,
And leaves a lonesome place against the sky.

THE MAN WITH THE HOE

(Written after seeing Millet's world-famous painting of a brutalized toiler)

"God made man in his own image
In the image of God made He him." (Genesis.)

Bowed by the weight of centuries he leans
Upon his hoe and gazes on the ground,
The emptiness of ages in his face,
And on his back the burden of the world.
Who made him dead to rapture and despair,
A thing that grieves not and that never hopes,
Stolid and stunned, a brother to the ox?
Who loosened and let down this brutal jaw?
Whose was the hand that slanted back this brow?
Whose breath blew out the light within this brain?

Is this the thing the Lord God made and gave
To have dominion over sea and land;
To trace the stars and search the heavens for power;
To feel the passion of eternity?
Is this the dream He dreamed who shaped the suns
And markt their ways upon the ancient deep?
Down all the caverns of hell to their last gulf
There is no shape more terrible than this—
More tongued with censure of the world's blind greed—
More filled with signs and portents for the soul—
More packt with danger to the universe.

What gulfs between him and the seraphim!
Slave of the wheel of labor, what to him
Are Plato and the swing of Pleiades?
What the long reaches of the peaks of song,
The rift of dawn, the reddening of the rose?
Thru this dread shape the suffering ages look;
Time's tragedy is in that aching stoop;
Thru this dread shape humanity betrayed,
Plundered, profaned, and disinherited,
Cries protest to the judges of the world,
A protest that is also prophecy.

O masters, lords, and rulers in all lands,
Is this the handiwork you give to God,
This monstrous thing distorted and soul-quencht?
How will you ever straighten up this shape;
Touch it again with immortality;
Give back the upward looking and the light;
Rebuild in it the music and the dream;
Make right the immemorial infamies,
Perfidious wrongs, immedicable woes?

O masters, lords, and rulers in all lands,
How will the future reckon with this man?
How answer his brute question in that hour
When whirlwinds of rebellion shake all shores?
How will it be with kingdoms and with kings—
With those who shaped him to the thing he is—
When this dumb terror shall rise to judge the world,
After the silence of the centuries?

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed the bill (S. 1368) to extend the benefits of the employees' compensation act of September 7, 1916, to Martha A. Hauch, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had severally passed, without amendment, the following bills of the Senate:

S. 205. An act to authorize the Secretary of the Treasury to pay the claim of Mary Clerkin;

S. 463. An act for the relief of David J. Williams;

S. 484. An act for the relief of Joe W. Williams;

S. 802. An act for the relief of Frank Hanley;

S. 1377. An act for the relief of Lieut. Robert Stanley Robertson, jr., United States Navy;

S. 1428. An act for the relief of R. Bluestein;

S. 1848. An act for the relief of Frank Dixon;

S. 2008. An act for the relief of the parents of Wyman Henry Beckstead;

S. 2442. An act for the relief of Lieut. Henry C. Weber, Medical Corps, United States Navy;

S. 2926. An act for the relief of the Old Dominion Land Co.;

S. 3366. An act to authorize a per capita payment to the Shoshone and Arapahoe Indians of Wyoming from funds held in trust for them by the United States;

S. 3506. An act for the relief of the owners of the British steamship *Larchgrove;* and

S. 3507. An act for the relief of the Eagle Transport Co. (Ltd.) and the West of England Steamship Owners' Protection & Indemnity Association (Ltd.).

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 1736. An act for the relief of Charles Caudwell;

S. 1738. An act for the validation of the acquisition of Canadian properties by the War Department and for the relief of certain disbursing officers for payments made thereon;

S. 1758. An act for the relief of Fred A. Knauf;

S. 1771. An act for the relief of Peter S. Kelly;

H. R. 8835. An act to amend section 98 of the Judicial Code, as amended, to provide for terms of court at Bryson City, N. C.;

H. R. 10437. An act granting double pension in all cases to widows and dependents when an officer or enlisted man of the Navy dies from an injury in line of duty as the result of a submarine accident;

H. R. 11404. An act authorizing the Port Huron, Sarnia, Point Edward International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Clair River at or near Port Huron, Mich.; and

H. R. 12441. An act to amend section 2 of an act entitled "An act in reference to writs of error," approved January 31, 1928, Public, No. 10, Seventieth Congress.

NAVAL APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed consideration of the bill (H. R. 12286) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1929, and for other purposes, the pending question being on the amendment of Mr. BLAINE.

Mr. HEFLIN. Mr. President, I have been much interested in the very eloquent speech of the able Senator from Virginia [Mr. SWANSON]. He and I are usually in agreement on matters pending here. I am sorry we can not agree to-day. I do not think that it requires any gift of prophecy for a Senator to be able to state what he thinks about the advisability of bringing our armed forces from Nicaragua and what time, if at any time, he thinks they should be brought out. We do not have to be on Mount Sinai, as the Senator has intimated, in order to be able to tell our own views as to when we think the troops ought to come out of Nicaragua.

The Senator from Virginia concedes that the marines have no business in Nicaragua and every Senator here ought to take that position. I think the Senator from Idaho [Mr. BORAH] takes that position, and some other Senators who are willing to keep our armed forces in Nicaragua——

Mr. McKELLAR. Those Senators go further than that, if the Senator from Alabama will permit me, and contend that the marines ought never to have been sent down there.

Mr. HEFLIN. The Senator from Tennessee is right; those Senators admit that the troops should never have been sent there in the first place. Then, having been sent there wrongfully, their presence there not being justified by any rule of right or law of justice, how can any Senator in all good conscience stand in this body and defend the program to keep the marines in Nicaragua when we agree and openly declare that they ought never to have gone there, that the mission they are on did not justify us in sending them there in the first place? How can we, who have sworn to protect and preserve this Government in its integrity, get ourselves worked up to the point where we are willing to shut our eyes and blindly plant ourselves behind any President, be he Democrat or Republican, who takes the American marines off on a mission that we do not and can not approve? Will the people whose Government this is be satisfied if Senators in defending their position simply say, "Oh, well, the President did this unjust and wrongful thing, but we decided that we would just swallow our own convictions, violate our oaths, and back the President in doing what we believe is an unjust and un-American thing, even if it takes the last drop of American blood and the last dollar of American money to carry out an unjustified program, one that no American can defend"?

Senators, that is a mistaken policy. It is not the principle and policy of the American people and I am not for it. If my President goes off on a mission like that, and I am convinced that American boys are being killed to carry out such a program, it is my duty to the American boy whose life is being sacrified, my duty to my country since I have sworn to hold it true to the purpose of its creation, to tell the President to

get out of that ugly and indefensible predicament. End the inexcusable slaughter and bring the marines home.

Why, Senators, I have been taught from my youth time that if you took a position that was untenable, a position that you were not justified in taking, a position that you admit is wrong, the most manly thing on this earth that you can do is to make amends for it, to apologize, and get back out of it in the quickest way possible. But now we are having a new doctrine in this new day of imperialism in America—that if a President ventures out upon this imperialistic road, unfurls the flag and spills American blood on foreign soil, it is the duty of every Senator and every Member of the House to stultify himself, and get right behind the President, and call more boys to the colors, and have them butchered in a slaughterhouse behind a cause that can not be defended.

Senators, your position is untenable and un-American; and let me tell you there is more trouble for some of you connected with this issue than you seem to realize. I have a newspaper article here somewhere which shows that in every place in the country where this matter has been discussed in the schools and colleges the resolutions which demanded that we get out of Nicaragua have won in the debates. Committees have been here to call on the President, petitioning him to bring our boys back home from Nicaragua. A father, a man from Missouri by the name of Ferguson, whose son was killed down in Nicaragua recently, wrote the President a letter and said that his boy had an honorable record in the World War in France; he had won the cross of honor; he had rendered signal service to his country; and now this father wrote to the President, the Commander in Chief of the Army and Navy, and said, "I feel that my boy has been murdered by the Government that he fought to uphold and save in France."

Senators, you may not be thinking just about the people at home when you come to consider this question. I must say that I can not understand the position of some Senators when they admit that this thing is wrong; they admit that we have gone off into something we had no business meddling with; they practically admit that we have invaded a foreign country, and that we are there with force of arms bullying the people of that country; you have a revolution going on by a native, Sandino, supported by natives, and they are protesting against the American program in Nicaragua, and you ask them what is in their minds, and they say, "We are fighting for our country, for our liberty, just as the people of the 13 Colonies fought in the War of the Revolution."

Senators, I confess that that appeals to me. They called us bandits then. The redcoats of Britain called the colonists bandits. We were outlaws when we were struggling for our liberty, making ready to establish here the greatest and freest government in all the world. Yes; they called us bandits; and now Sandino—brave, heroic Nicaraguan, inspired to fight by the inspiration and example that we furnished him and his soldiers—does not want our soldiers in Nicaragua helping to keep an impostor and usurper in office over them. He has stated that he is willing to die in a struggle to drive them out; that we are invading his country and remaining their against the wishes of the Nicaraguan Congress and the people there.

Who here has said without some modification of his statement that we are justified in being in there now? Practically everyone admits here that we have no business in there. Then how are we going to defend a cause that everybody condemns in one breath, and then turns right around and says, "Well, inasmuch as we are already in there and while it may be a mistake, and we think it is; let us continue to annoy and irritate the natives and murder them and kill some more of our marines while we are there. Let us continue, by force of arms, to work our will in a country where those who are able to put up a fight are out fighting in the field to get us out of their country.

What is the situation down there, Mr. President?

The Senator from South Carolina [Mr. SMITH] has put his finger on the sore spot in this whole thing. Sandino, we are told, was a party to the agreement, that they would lay down their arms, and we would settle this thing in the way Mr. Stimson, the American, wanted it settled; and then we are told that he broke his part of the compact with this Government, and now we are told on top of that that some of the so-called Conservatives are working in concert with Sandino, a Liberal, to carry out that program.

Then, if that is true, as the Senator from South Carolina points out, both sides in part have broken their agreement with us; and yet we are insisting on staying there, and we are having American boys killed down there, and nobody has ever told the Senate and the country how many have been killed in Nicaragua. It is strange, but we can not get that information. Now, why is that?

What else on that point?

Sandino is referred to as a bandit. Is he a bandit? He is being backed by the Congress of his country. Who are we backing? We are backing Diaz, the head of a bastard government. How did Diaz obtain his place? By driving Sacasa out of office at the points of bayonets. He has no right in that office. The people of Nicaragua never elected him. He is an impostor and a usurper. Four-fifths of the people of Nicaragua stood up in protest against him, and when he with force drove Sacasa out the masses of Nicaragua, many of them armed, arose; they were marching to the capital to overthrow this impostor and usurper, and what did they meet? They met the armed forces of the United States, who told them to halt, and said, "We are going to hold Diaz in this office of President."

The question is, Who and what influence got the United States Government to take the side of Diaz?

Diaz would have killed Sacasa if he could have gotten his hands on him. They wanted to kill him; but when he got away and aroused his patriotic followers, they were coming back, as they had a right to do, to drive Diaz out, and would have done it but for the strong and mighty arm of this great Government.

My God! What are we coming to in the United States? Are these boys that we are rearing in these various States going to be taken from their homes and sent off on this imperialistic road? Are they going to give their lives for the purpose of collecting the debts of adventurous speculators in our country and protecting questionable holdings in property wherever they choose to go and invest? When they do it amid hazardous and dangerous conditions, have American boys in uniform got to follow these adventurers all over the earth, wherever they make an investment or make a loan, and wave the flag of the United States and become their collecting agency? They are not going to do it if I can help it.

I am willing to protect the property of American citizens in foreign lands when they go about acquiring it in a legitimate way and are behaving themselves and attending to their business and locate in communities and establish themselves in foreign countries as law-abiding citizens, remaining loyal to America. We will look out for them and protect their property; but these reckless adventurers that are running over the world, these globe-trotters, investing in hazardous situations, who cry out whenever their holdings, big or little, are imperiled, they must show me that they are entitled to such consideration and protection.

Mr. President, many of the nations of the earth have perished out on this same imperialistic road. When the mighty financiers got so big that they went out of their own country to invest in other countries, and had the Army follow them, that is when the country took the fatal step and entered upon the road of imperialism, and then came decay and downfall. Are we ready to enter upon that road? God forbid.

What are we told here? That Sandino is a bandit. Well, let us see what is the true situation in Nacaragua.

Sandino is leading his forces against the Diaz government. Is he pursuing our soldiers? No. What is he doing? He is trying to keep away from them. What are our marines doing? They are pursuing him. Does that look as if we are protecting American property and waiting to hold an election? No, Mr. President; there is no escaping the fact that we are there at the instance of Diaz and his régime which includes Wall Street financiers. We are protecting Diaz. We are fighting the battles of the Diaz government, while every one of his soldiers sits in a place of safety, not one of them in danger, and American boys are being sacrificed in such a miserable cause!

If I were not in the Senate, and a Senator representing me or misrepresenting me as he would be doing should he vote to keep the marines in Nicaragua indefinitely, I would ask him, when he came up for reelection, if he had forgotten me and the others and their sons who were being fed into the maw of death down there in Nacaragua.

I repeat, what is the situation, Senators? Sandino is fighting the Diaz government. Is he alone? No. Who is backing him? The Nicaraguan Congress. That is not a bastard congress. They did not usurp their places. They were elected. What side are they on? They are on Sandino's side. Do we believe in self-government? They look on Diaz as an impostor and a usurper. They recognize Sandino as being engaged in a righteous cause, and the Congress, when the issue was put up to them as to whether they would vote to express themselves favorably to our remaining in Nicaragua to hold this election, voted overwhelmingly against it.

Senators, there is no way of getting away from the fact that we are intruding ourselves upon those people. The only legiti-

mate government that exists in Nicaragua is the Congress of the country, and that Congress is on record opposing our remaining in Nicaragua.

What are you going to do about it? Sandino and the other natives who are fighting the Diaz régime are out in the open. Then, who is against the Congress and Sandino? Diaz is. How long would he last if the armed forces of the United States should be withdrawn? They tell us we are not in a state of war. That seems to be the position taken by the Senator from New Jersey [Mr. EDGE], the Senator from Connecticut [Mr. BINGHAM], and others, that we are not in war. Mr. President, there have been any number of American marines killed, one from my State, a brave boy named Russell, a boy just 21 years old, just standing on the threshold of man's estate, a bright, fine boy. He has gone to his death down there, and while we are waiting for the big imperialistic financiers of Wall Street to tell us when to come out, boys from your States and boys from mine are being killed down there while we are waiting to decide just what will be done.

They tell us we are not in a state of war even if we kill hundreds of their soldiers in battle. I am sorry the Senator from Virginia did not tell the Senate about a little village down there where the men, women, and children were literally murdered and the village wiped off the face of the earth by the field guns and air bombs of the United States marines. Women with babies in their arms fleeing into their mountain fastnesses were blown from the face of the earth. They have not harmed us. They had a right to live.

Why are we doing that—hunting Sandino, going out to where he has fled in his efforts to get away from the American marines? He was not pursuing our Army; he was not engaging them in battle; he was not firing on the flag. He was fleeing from this mighty force, and in pursuing him it seems that they killed everything they could find along the way. Can you justify such brutal conduct in the greatest nation on earth, the only nation whose highest judicial authority has declared it to be a Christian nation? God deliver us from such Christianity.

What are you going to do about it? You say that since we are down there we must remain there. Who is putting that thought in the heads of Members of this body, that since we are down there we must remain there?

Mr. CARAWAY. Mr. President, does the Senator call that a thought or a suggestion?

Mr. HEFLIN. A very feeble suggestion, I would say. But they say we are down there, and we will decide later when we will bring the marines out. Who made the suggestion—following the idea of the Senator from Arkansas—that we will wait and decide later when we will come out? How many more American boys have to be killed before the Senate wakes up?

Mr. SMITH. Mr. President, I tried to get the Senator from Virginia to tell us what would cause us to remain in Nicaragua after the election we are alleged to be in there to bring about shall have been held. Let us suppose the election is held in October, and, according to the judgment of those who will have the right to vote, suppose a fair election has been held, and the proper parties are installed in office, why are we to stay there after that function has been performed? He says we should not name any date, that we should wait until December, which will be two months after the election will be held, or maybe next April. He says it will take a prophet to prophesy. Prophesy what? I want to know, if we are there simply to hold an election, why we should stay there after the compact has been fulfilled.

Mr. HEFLIN. That is beyond me. The Senator is entirely right.

If, after the election is held, the President is duly installed, he will then be the commander in chief of his army and his navy, if he has any; his forces will be free and unfettered, and he can arm and equip them in order to preserve his government. He will have the right to preserve himself and his government. Then what business is it of ours? Must we continue to stay along for a few years, and watch him, to see how well he will do?

Mr. SMITH. According to the Senator from Idaho and the Senator from Virginia each side had ample arms, but they surrendered them, on the understanding that we were to see that a fair election was held. After the election is held, and the officers are installed, as the Senator intimates, then the army and navy, if they have such a thing, anyhow, the military, the fighting forces, will be at the command of the duly elected government, and it will become the duty and responsibility of the president to see that there is a proper observance of the law. It is not our responsibility.

Mr. HEFLIN. Absolutely. If that position were not sound, and the position of the opposition were the sound one, then, if we should ever go into one of these countries hereafter, we would have to stay there for a certain number of years to make sure that those people were capable of self-government, and that they were able to take care of themselves. When did this Government ever commit itself to such a foolish course as that, running its armies around the earth, policing other nations, setting up governments, and keeping troops there to maintain them? It is ridiculous, and the position of the opposition is ridiculous.

Mr. DILL. Mr. President, will the Senator yield?

Mr. HEFLIN. I yield.

Mr. DILL. Is it not a fact that when they had the other election, the Liberals won power, and then as soon as trouble occurred we went in and recognized the existing government in opposition to what the people had voted?

Mr. HEFLIN. That is true. In practically all of the cities that held elections after Diaz overthrew Sacasa, the Liberals won. The tide was rising and coming in strong, and then our Government appeared on the scene to stem the tide and to save the imposter and usurper, Diaz. Senators, there is no question about that.

I have a private report here that I am going to read in a day or two if this thing continues, which shows that one of the Conservatives, a leader, told the Liberals, "You can not drive us from power. We have the Wall Street bankers and White House with us."

Mr. SMITH. Is it not a fact that Diaz is in power in violation of the compact entered into by the five South American States, to the effect that no man should hold office who was the beneficiary of a revolution?

Mr. HEFLIN. That is true. Senators, the more we discuss this the more light we turn in on it, the more untenable is the position of those who oppose the bringing of the American marines out of Nicaragua.

Senators who so solemnly tell us that we are not in a state of war remind me of a case that was up for trial in Alabama, where a witness was put upon the stand and they asked him to tell what occurred. A difficulty had taken place, and serious harm had been done to several human beings, and one man had been killed, and they asked the witness to tell what occurred. He took his seat on the witness stand and proceeded to talk. The prosecuting attorney said, "Just tell the jury, now, what you saw."

"Well," he said, "I was down there in the storehouse at the crossroads, in the back room of the store."

"Tell just what occurred. You were there when the difficulty started?"

"No, sir; I was not there when the difficulty started. I walked in the back room of this store and I saw Pete Brown strike Jimmy Jones over the head with a chair and knock him sprawling on the floor. Jimmy Jones's brother stabbed Brown's brother in the shoulder with a dirk, and then one of the Brown boys' cousins arose and shot Pete Elkins, a relative of the Jones boys, and killed him, and I said to myself, 'By golly, there's going to be a difficulty here and I am going to leave before it starts.'" [Laughter.]

Mr. President, I believe that the facts in that case would impress the average man or woman of ordinary intelligence that the difficulty had really started before that witness left.

And yet he had the same idea about fighting that these Senators have about our fighting in Nicaragua. What is the killing of a few marines, they seem to say. That is not war. What is the killing of patriotic native Nicaraguans? That is not war. What is the blasting and blowing of a Nicaraguan village from the face of the earth, and rending the air with the screams and the wails of dying mothers with their babies in their arms? Is that war? Yes; it is cruel, remorseless, and inexcusable war.

Has the Congress of the United States ever declared war on Nicaragua? No. What does the Constitution say about it? It says that no power but Congress shall declare war. Does that mean that a President can start a war of his own and carry it on, and that Congress has nothing to do with it?

Senators, there was a time in this body when nine-tenths of the Senators would have been standing on their feet demanding that the President come here and give an account of this usurpation of the people's power vested in Congress.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. HEFLIN. I yield.

Mr. McKELLAR. On the question of the claim about what is and what is not war, as I understand it, more than three times as many Americans have been killed in Nicaragua as were killed at the great Battle of New Orleans, one of the greatest fights this country was ever in.

Mr. HEFLIN. Yet they say it is not war. To this day we point with pride to the time Old Hickory and his soldiers with

their squirrel rifles hid behind the cotton bales and whipped Pakenham and his army.

Mr. McKELLAR. And we lost eight men.

Mr. HEFLIN. And we lost eight men. We are killing many times that many marines in Nicaragua. We say that the battle at New Orleans was the decisive battle, the finishing up of the job with Great Britain in the War of 1812. But this thing down there in Nicaragua, Senators would have us believe, is only a May morning zephyr, a mere butterfly parade—not war! What is the killing of American marines and native soldiers of Nicaragua and the blasting of Nicaragua homes and families from the face of the earth?

Senators, the day is coming when the fathers and mothers of this country are going to call to political judgment those who sit in this body and in the other branch of Congress and vote to send our soldiers into foreign countries under every pretense under the sun.

I am going to insist that Congress lay down a program and specifically set out just what the President's powers are in the matter of using independently of Congress the armed forces of the United States.

I would not hamper him in any necessary and legitimate use of them. I want the President to be foot-loose and free, if danger should approach and Congress were not in session, to do the thing necessary to protect American rights and interests until Congress could be convened. I want the President to be at liberty to do what is necessary to protect our country temporarily; but then, just as soon as it is possible for him to do so to take the matter to Congress, because we are the representatives of the people, coming directly from them, and their Constitution provides that no one but Congress shall declare war, and that means that no one but Congress in the true sense shall conduct or carry on a war. War has not been declared on Nicaragua and Congress is not conducting an American war against Nicaragua. It is being conducted by the President, and it is a usurpation of constitutional authority that belongs to Congress.

Senators, those of you who think you want to vote to keep the marines in Nicaragua until after this election should consider this proposition. I have an amendment pending which I am going to offer as soon as the amendment of the Senator from Wisconsin [Mr. BLAINE] is voted on. I am not going to offer it as a substitute for his amendment.

I am going to give the Senate a chance to vote on his amendment as it stands, and then I am going to offer mine as a separate amendment to the bill. They deal somewhat with different subject matters. Mine is a brief amendment. I think Senators can vote for it without showing any desire to embarrass the President. They can assert their own sense of right and justice in the premises as representatives of the people and leave it to the President to ask Congress to consent to his plan if he wants to have the American marines remain in Nicaragua. Here is my amendment:

*Provided*, That none of the appropriations made in this act shall be used to pay any expenses incurred in connection with acts of hostility by United States marines in Nicaragua unless and until the President shall obtain from Congress the consent to keep them there.

What is wrong about that? If the President has a good reason for wanting to keep them there, let him do like President Wilson did when the armed forces of Mexico at Tampico and Vera Cruz arrested a United States citizen who was on an American battleship and who went ashore to get the ship's mail. He was arrested and thrown in prison. They arrested other American citizens. President Wilson came to Congress and asked Congress to sanction his suggestion that he go into those towns in Mexico with armed forces. Congress did it. What is wrong with the suggestion and demand that Mr. Coolidge come here and tell us just why he wants to remain in Nicaragua awhile longer? It is his duty to do it. For months I have stood on the floor of the Senate and said that he ought to get our consent, but he has never come for it. Other Senators have said the same thing, but he has never come to consult us.

Now, the leaders are moving heaven and earth to adjourn Congress by the 25th of May with this big question pending, clearing the decks and getting everything out of the way so that Senators can go home and begin the game of politics again, and these helpless marines, American boys in Nicaragua, bound by the order of the President, have to stay in Nicaragua until the snow flies and until somebody decides that they may all be brought back home. Why not adopt this amendment of mine and say that he can not use these funds unless he comes here and gets our consent to keep the marines in Nicaragua? We are representing the American people. Nobody here speaking for them has said we have any right in Nicaragua. It is simply said that since we are there we ought to stay there.

That is the flimsiest excuse ever made by a man who lays any claim to statesmanship—that we have done wrong in going there; that it was a miserable mistake; that we have no right in there; and yet we ought to stay there and continue to kill American boys until somebody's whim or purpose is satisfied, until we have seen enough bloodshed, until enough soldiers have been killed to shock this Nation so that a cry like a bugle call will sound around the country to assemble Congress and take action to get our boys out of Nicaragua.

Senators, four-fifths of the American people I believe want to bring our boys out of Nicaragua. They are not in favor of this desperate and dangerous imperialistic move. They are not in favor of the reckless adventurers whose only music is the clink of dollars and dimes, who care nothing for the killing of human beings, who are simply after stuffing their purses with their ill-gotten gains. Has Congress reached the point that we are going to let them dictate our course? If I may be permitted to say it, we ought to remain true to the people who sent us here, true to American ideals and true to the Constitution of the United States.

Mr. President, I have here an article from the Chicago Daily News. It is headed "Criminal slaughter of brave Nicaraguan boys."

Mr. BINGHAM. Mr. President, does not the Senator think it particularly appropriate that a protest against the use of rifles and machine guns should come from Chicago?

Mr. WHEELER. I think they ought to send the marines to Chicago instead of sending them to Nicaragua.

Mr. CARAWAY. They want us to settle the Chicago riots for them.

Mr. HEFLIN. The Republican Party leadership or management has become so corrupt in certain places that the high-up grafters and thieves have fallen out among themselves and have gone to killing one another. Something has got to be done to stop that. I trust that that will hold my friend from Connecticut for a while. [Laughter.]

Mr. President, among other things, this article says:

All fair-minded, thinking men, no matter of what race, creed, or color, must agree with Senator HEFLIN in his stand that we should end this needless slaughter of our American boys in Nicaragua.

I shall ask permission to print the entire article, but I want to read just another sentence or two in this connection:

To be sure, we claim we were invited to supervise the coming election in Nicaragua. This may be true of a few Nicaraguan leaders who are willing to sell their country for a mess of American pottage.

Mr. President, I want to say here, that there are some scandalous suggestions about the deals of Mr. Stimson with some of those Liberal leaders in Nicaragua. It is openly rumored around the Capitol that large sums of American money were used to buy off some of those leaders opposed to Diaz and that those offers were coupled with the threat that "you had just as well get this and get out of the way, because if you do not the American Government will crush you." Sandino was the only one who had the grit and the courage finally to stand up and say he was willing to die rather than to submit to such a deal.

Continuing, this article says:

Evidently the brave stand taken by Sandino and his followers has had some influence on those Nicaraguan congressmen, when they bravely voted against our supervision of their coming election. But to what avail? Immediately after this decision of the Nicaraguan Congress, our Government replied by sending another thousand marines to that country. Apparently we have no regard for the wishes of the majority of the people of Nicaragua—we intend to force ourselves upon this weak and much-harrassed country. And to what end? Can we afford to incur the hatred and distrust of other nations by pursuing this policy of "might makes right"? Can we do this and continue to consider ourselves a "Christian" nation?

Mr. President, I ask permission to have the entire article printed in the RECORD at this point.

The PRESIDING OFFICER (Mr. EDGE in the chair). Without objection, it is so ordered.

The article is as follows:

SANDINO AS A HERO—"CRIMINAL SLAUGHTER" OF BRAVE NICARAGUAN BOYS

*To the New York Herald Tribune:*

On March 20 Senator HEFLIN, of Alabama, protested in the Senate against the murder of American boys in Nicaragua and made a demand for the immediate withdrawal of the United States marines from that country. However, as in the case of similar previous protests, objection was made and the question was "thrown over."

All fair-minded, thinking men, no matter of what race, creed, or color, must agree with Senator HEFLIN in his stand that we should end this needless slaughter of our American boys. Yet how much more criminal is the slaughter of Nicaraguan boys by our marines! What are these young Nicaraguans doing other than making a brave effort to defend their country against the forced intervention of the mightiest Nation in the world? Is it such a long time since our Revolutionary days that we have forgotten the meaning of freedom and patriotism?

We call these Nicaraguan patriots "bandits" and "rebels." Rebels to what? To the United States? By what chance of the gods did we become masters of this supposedly independent nation? We even go so far as to call General Augusto Calderon Sandino, that heroic young figure who asks nothing for himself and gives all for his country, a "bandit." As one magazine editor puts it, Sandino is no more a bandit than our President is a bolshevist. If the American marines should kill this young patriot and defender of his country, it will be to the eternal disgrace of our Government.

To be sure, we claim we were invited to supervise the coming election in Nicaragua. This may be true of a few Nicaraguan leaders who were willing to sell their country for a mess of American pottage. But when the question was debated in the Nicaraguan Congress recently it was voted against by a large majority. Evidently the brave stand taken by Sandino and his followers has had some influence on those Nicaraguan Congressmen, when they bravely voted against our supervision of their coming election. But to what avail? Immediately after this decision of the Nicaraguan Congress our Government replied by sending another thousand marines to that country. Apparently we have no regard for the wishes of the majority of the people of Nicaragua—we intend to force ourselves and our power upon this weak and much-harassed country. And to what end? Can we afford to incur the hatred and distrust of other nations by pursuing this policy of "Might makes right"? Can we do this and continue to consider ourselves a "Christian" nation?

JEAN WUNDERLICH.

BROOKLYN, *March 27, 1928.*

Mr. HEFLIN. Mr. President, I want to say this in conclusion:

First, Diaz is not justly or legally the President of Nicaragua. He has no right to hold for a single day the office of President.

Second, Sandino, as a party to the agreement, has broken it, and those of the Liberals who can get arms are following him and objecting to the presence in Nicaragua of American marines.

Third, the Congress of Nicaragua is on the side of Sandino and his followers and has voted against permitting the American forces to remain in Nicaragua and conduct a presidential election in that country.

Fourth, the American marines are a part of the fighting forces of the United States. They act in the name of the United States, and whether we call them soldiers or call that force the United States Army they are carrying the flag, they are killing people in the name of this Government just like other soldiers would do, so there is no difference. We have to all intents and purposes got our Army in Nicaragua. It makes no difference to the Nicaraguan whether he is killed by a marine or by a soldier in the Army. When the Nicaraguan is killed he is just as dead when killed by a marine as he would be if killed by a soldier.

Mr. SMITH. Mr. President, may I ask the Senator a question?

Mr. HEFLIN. I yield to the Senator from South Carolina.

Mr. SMITH. If our forces were not fighting Sandino, it is very evident that the opposition in Nicaragua would be fighting them. Then what would that be called in Nicaragua? If the Conservative forces were fighting the Liberal forces, we would denominate it warfare, would we not?

Mr. HEFLIN. Certainly.

Mr. SMITH. But simply because our forces have taken the place of the Conservative forces, it is not war.

Mr. HEFLIN. The Senator is absolutely correct. Not only that, Mr. President, but, as I said a moment ago, Sandino and his men are not fighting our soldiers or pursuing our soldiers. They are fleeing from our soldiers. They are being pursued by our soldiers. I am about to make an assertion now that no Senator of the opposition will deny—at least, I do not think he will. Our marines are being sent out in the mountain fastnesses of Nicaragua under instructions to pursue and find and kill Sandino. Who can deny that?

The only outstanding and prominent Nicaraguan patriot that had the courage to stand up and die rather than basely submit to the invader who comes with guns and battle blade to hold a usurper in office against the will of four-fifths of the natives said, "I am willing to spill my blood and give my life in defense of the rights of Nicaragua." This Government is following Washington's example with his ragged Continentals when they were fighting for the same principle. We still point with pride to their heroism, their patriotism, their willingness to do and die for those principles of justice and liberty, and yet here we are with our great flag unfurled, with the fighting forces of the greatest Government on earth pursuing this hero of Nicaragua with the avowed purpose of finding him and killing him wherever we find him.

Senators, can we justify that? Have you any right to kill my boy or to kill your boy or our neighbors' boys in the various States in pursuit of such a principle, cowardly and base as it is? I do not believe we have.

Let us vote to adopt at least a portion of the amendment of the Senator from Wisconsin. I am not entirely satisfied with all its provisions, and yet I am for it in the main. Let us provide that the President must come here to Congress and take us into his confidence as the representatives of the people and get our consent before he can proceed further with his strange program and terrible slaughter in Nicaragua and thus carry on still further an unauthorized war which has aready lasted for more than a year.

Let Congress assert itself, be true to itself, true to its oath, true to the people in whose name it speaks by demanding this action on the part of the President of the United States.

Mr. McKELLAR. Mr. President, I shall detain the Senate for only a few minutes this afternoon.

Mr. President, I am opposed to keeping our troops in Nicaragua; I am opposed to the war that is admittedly going on there. I believe that the war that is now being carried on in Nicaragua is not in accordance with our Constitution. I believe it is in direct violation of our Constitution. It is claimed that the President is Commander in Chief of the Army and Navy under the Constitution, and so he is, but the Constitution specifically provides that only Congress has the right to declare war. It gives the President no power to declare war or to engage in war without the direction of Congress.

I want to say at the outset, Mr. President, that the amendment offered by the Senator from Wisconsin [Mr. BLAINE] is not exactly the kind of an amendment that I should like to vote for, nor is the amendment offered by the Senator from Alabama [Mr. HEFLIN] just what I think is proper at this time. I think both amendments go a little too far, and I have prepared an amendment of my own that I believe will more nearly fit the situation. I wish to read it to the Senate; it is very brief:

*Provided*, That no part of the appropriation made in this act shall be used for the purpose of maintaining marines or troops in the Republic of Nicaragua on and after February 1, 1929, unless specifically authorized by the Congress: *And provided further*, That, in the event of an emergency, the President is authorized to land troops temporarily for the protection of lives and property as authorized by international law and by the Monroe doctrine only, in which event the President will report to Congress immediately, if the Congress be then in session, and upon the convening of the Congress, if it be not in session.

Mr. President, I believe that that amendment ought to be satisfactory to every Senator here. Why do I say that? It is because I have listened to or read the speeches made on the other side; to the speech made by the Senator from New Jersey [Mr. EDGE], to the speech delivered by the Senator from Idaho [Mr. BORAH], to the speech delivered by the Senator from Connecticut [Mr. BINGHAM], to the speech delivered by the Senator from Virginia [Mr. SWANSON], and to the other speeches made on the other side, in every one of which it was admitted that a state of war exists in Nicaragua. All, except the Senator from Connecticut, have admitted that they did not believe that we should have gone into Nicaragua or that we should stay there. So it seems to me that there is no reason why every one, with the exception of the Senator from Connecticut, should not vote for the amendment which I have proposed, and in that way settle this question.

Mr. President, much has been said about our having assumed obligations in Nicaragua which we should now fulfill. The amendment suggested by me will permit every supposed obligation to be fulfilled, because the troops will not be ordered out until more than three months after the election which we have assumed to hold in Nicaragua. So it is not a question of fulfilling our obligations. The amendment which I suggest will fulfill every one of the assumed or so-called obligations.

I wish to say that I do not think we should have assumed any obligations down there. Our troops have no business in Nicaragua. It is not our duty to govern Nicaragua; it is not our duty to land troops in Nicaragua. No American property seems ever to have been in jeopardy in Nicaragua; no American lives were in jeopardy in Nicaragua until we ourselves had jeopardized them.

Mr. EDGE. Mr. President, will the Senator from Tennessee yield to me?

Mr. McKELLAR. I shall yield to the Senator in just one moment.

The only way American lives have been in jeopardy in Nicaragua is by reason of our making war on the citizens of Nicaragua. Now I yield to the Senator from New Jersey.

Mr. EDGE. While I was temporarily occupying the chair, as I followed the speech of the Senator from Tennessee, he made a statement that in addressing the Senate a few days ago on this subject the Senator from New Jersey had indicated that in his belief the troops should never have been sent to Nicaragua, or words to that effect.

Mr. McKELLAR. I so understood the Senator from New Jersey. If I did not understand him correctly, will he now say what is his view on the subject?

Mr. EDGE. For that reason I left the chair and took the floor. At considerable length I expressed to the Senate on Friday the conviction that, in my judgment, the sending of marines to Nicaragua was in every way justified, and I read from the report of the State Department—which I shall not attempt to repeat in the Senator's time—reciting, I would say off-hand, 25 or 30 requests, some of them coming from Senators now members of this body, the Senator from Louisiana [Mr. RANSDELL], the former Senator from Kentucky, Mr. Ernst, and others, representing constituents or American citizens who were in business in Nicaragua, requesting that the President protect the lives and property of American citizens there. So far as I am concerned, I do not want to interrupt the Senator, but I want it to be perfectly clear that I believe the President of the United States was in every way justified in sending the marines to Nicaragua, and that it was a great mistake, on the other hand, that the marines were withdrawn from Nicaragua in 1925, which action was followed within two months by revolution.

Mr. McKELLAR. The Senator from New Jersey desires to keep the troops there indefinitely. Is that correct?

Mr. EDGE. So long as the Senator from Tennessee has asked me that question, permit me to answer it. In reply I desire to say that I want to see the marines out of Nicaragua at the earliest possible moment.

Mr. McKELLAR. Why?

Mr. EDGE. But I do not think that the Senate of the United States is in any way qualified arbitrarily to decide 8 or 10 months in advance what that date should be. In the meantime our officers are assisting to organize and train a national guard, which I sincerely hope, as I am sure does every Member of the Senate and every American citizen, that they may take up the work of keeping order in Nicaragua so that we may withdraw our marines. Nothing would be more pleasing to me.

Mr. McKELLAR. Mr. President, a peculiar situation has developed in the Senate. Out of the, I believe, 94 Members of the Senate that we now have, 2 Senators, the Senator from New Jersey [Mr. EDGE] and the Senator from Connecticut [Mr. BINGHAM] justify the sending of the troops to Nicaragua; 2 out of the 94. We have two others, the distinguished Senator from Idaho [Mr. BORAH] and the distinguished Senator from Virginia [Mr. SWANSON], who say that troops ought not to have been sent there, that they ought not to be kept there, that they ought to be brought out, but they want to hold them there just a little while longer. How long do they want to hold them there? Well, just a while longer. It is all wrong for them to be there; it is all wrong for the Government to keep them there; but the situation might be complicated in some way, and so they should like to have the decision on this question go over until December. To-morrow! To-morrow! To-morrow! These Senators ask us to put off the date of withdrawal, but, after all, there are only four Senators, so far as I have heard, who have stood on this floor and have stated that they want this condition to continue. What is the remainder of the Senate going to do? Are they going to sit idly by and cast their votes to uphold a defensive proposition purely? Two Senators, Mr. EDGE and Mr. BINGHAM, boldly take the side that it is all right and that the condition ought to continue, while two other Senators, Mr. BORAH and Mr. SWANSON, say that it is all wrong and it ought not to continue, but these last two are unwilling to fix a time for its discontinuance. What are the rest of us going to do? Are we going to assert our manhood? Are we going to stand by what we think is right, or are we just going to follow blindly the four Senators, two of whom say that they were willing for the United States to go into Nicaragua and are willing to stay there, and the other two who seek to justify our remaining there?

Mr. CARAWAY and Mr. BINGHAM addressed the Chair.

Mr. McKELLAR. The Senator from Arkansas rose first, and I yield now to him. I will yield to the Senator from Connecticut later.

Mr. CARAWAY. The only thing I was preparing to ask the Senator from Tennessee is this: If we are unwilling to trust our judgment to say when the marines shall come out of Nicaragua, and if there is a superior intelligence which we must follow blindly, I am curious to know where we get intelligence enough even to approve what the superior intelligence has done. Until we come to comprehend an act we can not intelligently approve it, can we?

Mr. McKELLAR. I should not think so.

Mr. CARAWAY. And if we can comprehend it, then we can tell what ought to be done, can we not?

Mr. McKELLAR. I have noticed that whenever a lawyer has a bad case he wants to postpone consideration of it. So the four special pleaders, two of whom are open in their pleadings, and the other two, who say that they are all wrong in the position that they take, all want the question to go over.

Mr. CARAWAY. Mr. President——

Mr. McKELLAR. I yield.

Mr. CARAWAY. We are asked, however, to vote that we have not sense enough to know what ought to be done. Is that not correct?

Mr. McKELLAR. That is the substance of it.

Mr. CARAWAY. But we have a guardian, and until he speaks we must not act?

Mr. McKELLAR. That is the substance of it.

Mr. CARAWAY. If that is true, why do we not get off the pay roll?

Mr. McKELLAR. It would be cheaper to do so. I now yield to the Senator from Connecticut.

Mr. BINGHAM. Mr. President, I merely wish to say that, from what little reading of history I have been able to do, I believe that if one of the greatest citizens that ever came from the State of Tennessee or who ever conducted operations in the State of Alabama were here to-day, he would take the position of standing up for American citizens wherever they are. I refer to Andrew Jackson.

Mr. McKELLAR. And so will I, but I do not believe in making war upon a helpless nation, and Andrew Jackson never would have done it in all his life. The weak and helpless always had his protection. When he fought individually, he fought antagonists who were his equals. When he fought nations, he fought nations like Great Britain, France, and Spain, all at that time our full equals. Andrew Jackson never jumped on a cripple or a weakling.

Mr. NORRIS. Mr. President, will the Senator yield;

Mr. McKELLAR. I yield.

Mr. NORRIS. I wish to enter my protest now against the Senator from Connecticut trying to put those who are in favor of this amendment in the attitude of being opposed to the protection of American citizens.

Mr. CARAWAY. That is not involved in the question at all.

Mr. McKELLAR. I will say to the Senator the very amendment I have read and which I intend to propose directs the President to protect the lives and property of American citizens.

Mr. NORRIS. Without regard to the Senator's amendment or any other amendment, whether it be the amendment that is now pending, the one the Senator from Alabama has said he is going to offer, or the one which I have in my desk and which I am going to offer if the proper parliamentary situation presents itself, I want to protest against any insinuation here that those who are in favor of amending the appropriation bill as proposed are enemies of their country, or bolsheviks, or are opposed to government, or opposed to protecting American lives and American rights. There is not any call for that kind of insinuation, and it ought to be beneath any Senator's intention to try to cast such a reflection upon those who are standing for a principle.

Mr. McKELLAR. Mr. President, I hope the Senator will not be too severe on them. Our antagonists are hard pressed, indeed, for any argument on their side of the case.

Mr. CARAWAY. The Senator does not call that an argument, does he?

Mr. McKELLAR. And naturally they are grasping at any straw. Therefore I want to be pleasant and agreeable with them. I do not think they ought to be blamed; they have taken the wrong side of this question, a side that they can not defend from attack, and so in their efforts to try to defend it they are just grasping at any shadow or any straw and attempting to place it before the Senate.

Mr. NORRIS. Their situation is very much like that of a witness before the Federal Trade Commission the other day. The Water Power Trust was sending out instructions to those who were going to defend it in opposition to those who do not agree with it that they ought not to use arguments or attempt to do so, but to try to stigmatize those in opposition as bolsheviks.

Mr. McKELLAR. It is somewhat similar to the statement of the Senator from Connecticut [Mr. BINGHAM] a few mo-

ments ago, when he undertook to show that one of the greatest men this country ever produced, Andrew Jackson, in his judgment, would have taken a different position. Why, that is idle. As I read the history of Andrew Jackson, he never under any circumstances could have been induced to make war on a weak, poor nation like Nicaragua. He was not that kind of a man. He was not that kind of a fighter. He would have scorned to jump on a little, defenseless nation.

Mr. HEFLIN. Mr. President, if the Senator from Tennessee will permit me just one minute, when in his war with the Indians at Horseshoe Bend, I believe——

Mr. McKELLAR. That was one of his greatest fights.

Mr. HEFLIN (continuing). They found one of the little Indian boys roaming wild in the woods, cut off from his people, and some of the Jackson troops wanted to kill him; Jackson shamed them and reproved them, and took that little Indian boy home with him, and reared him in his family.

Mr. McKELLAR. He adopted him.

Mr. HEFLIN. He adopted him. That is the sort of a heart he had.

Mr. McKELLAR. Mr. President, our opponents are hard put to it when they make such suggestions. But I proceed.

I want to say that we did not have any business attempting to regulate elections in Nicaragua. It is none of our business whom the people of Nicaragua select as their President or as their other officials. It is their country; it is not ours. These are their elections, not ours—their fights, not ours.

I did not approve of Mr. Stimson being sent down there to make any such agreement as he made. He ought not to have been sent down there. The agreement he made ought not to have been made; but, as it has been made, out of the abundance of precaution it might be well for us to stay there until such agreements are fulfilled; but as soon as past obligations, either supposed obligations or any other kind of obligations, are fulfilled, we should get out of Nicaragua.

Diaz ought never to have been recognized by our Government as the President of Nicaragua. He was not elected to that place. Another man was elected. He is a usurper. He led a successful revolution, overturned the Government, and took charge of it, and we gave him at least tacit approval, and since that time our Government has given him its open approval. We should never have done that, in my judgment.

In keeping our troops in Nicaragua and making war on Nicaragua, in holding an election in Nicaragua, in holding Diaz in as President of Nicaragua, we are committing a number of offenses.

In the first place, we, a great power, are jumping on a weak power, utterly unable to defend herself against us. We are making war against a friendly power. We are taking the part of one set of revolutionists against another set of revolutionists. We are needlessly destroying the lives of our own marines, and we are unlawfully destroying the lives of our opponents.

We are making war contrary to our own Constitution. We are holding an election down there contrary to right, contrary to justice, contrary to the laws of nations, and regardless of the best interests of the people of Nicaragua, and at the same time regardless of the best interests of the people of the United States. It is a war that no fair-minded man can defend. What financial interests have brought this war about are immaterial and inconsequential; but this Congress ought to stop it, and there is but one way to stop it, and that is to take away from the President the funds with which to prosecute it further.

I regret that there are any supposed, or alleged, obligations. If there were none, I would certainly vote to take our marines out. But since they are there and the election will take place in October, our troops should be taken out by January 1, 1929.

I am not complaining of President Coolidge or of Secretary Kellogg. They are simply following in the footsteps of other Presidents and other Secretaries of State; but this is simply a matter where Congress has the power and the duty. It has the only power to declare war, and its duty is to withdraw our marine forces at the earliest possible moment.

Unless the Congress does it, we are allowing the Executive authority to encroach on our legislative power. But even that question is immaterial beside the big question of what is right for this great Nation to do. We all know that we have no business down there. We all know that we have no business keeping our marines down there. We all know we have no business taking part in revolutions down there. We all know that it is not to the interest of Nicaragua for us to be down there in the position of actual war that we are in; and we all know that it is unjustifiable for a great Nation like the United States to take charge of the domestic troubles of a small country like Nicaragua. Let us get out as soon as possible with honor, and stay out.

I am willing to help Nicaragua in every honorable and proper way; but I am unwilling to impose our rule upon her. We want to be a friend of Nicaragua and of all her people; but I believe the American people are opposed to the present guerrilla warfare that we are carrying on there now. I know that I am, and therefore I am going to vote for these resolutions and amendments as they come up. I am not going to be put in the attitude of condoning for one moment what has been done down there, or what is being done down there, or what will be done down there by us.

If the first amendment that comes up is the one that has been offered by the Senator from Wisconsin [Mr. BLAINE], I expect to vote for it, not because I approve it just as it stands but for the purpose of protesting against this unholy war that is being waged down there. If that amendment is not adopted, and the Senator from Alabama [Mr. HEFLIN] offers his, I am going to vote for that. In other words, while I do not approve of either one of those amendments just as they stand, as I have stated before, such is my interest, such is my feeling about the matter—a feeling that my country has been placed in a wrong position—that I am going to make my protest known by my speech and my votes and in every way that is possible.

The Senator from Virginia [Mr. SWANSON] talks about postponing this matter until next December. He even suggests that we can add it to an appropriation bill next year. Why, it would be just as objectionable as an amendment to an appropriation bill next year as it is this year. Why do we offer it here? Because we know it will become the law if we put it on this bill, and all of us know that no independent resolution will be likely to become the law; and that is why we ought to vote for it now, Senators.

Remember that only four Senators, as I recall, have stood up here either directly or indirectly to uphold the present condition of things down there. Is the Senate going to abdicate its function, and let these four Senators club the other Members of this body into voting for something that they do not want, and that they know the country does not want? The American people, if I know anything about them, demand that we quit this unholy warfare in Nicaragua, and bring our marines out of there as soon as possible.

Mr. DILL. Mr. President, early in this session I submitted a resolution providing for the wiring of the Senate Chamber with electrical apparatus so that the debates in this body might be broadcast to the country. I have been unable to get serious consideration of that resolution up to this time; but at no time since I introduced it have I wished that it might be in operation as I have since this debate on the Nicaraguan amendment began.

I wish the American people could hear the discussion in this body on this subject. I wish they could hear for themselves the way in which those who defend the policy of the administration in Nicaragua refuse to meet the issue in this case. Why, they have discussed every possible subject to get away from the real question that is to be considered. They have said it was not proper to place this amendment on an appropriation bill.

I remind them and you that when the Constitution was written Congress, and Congress alone, was given the power to appropriate money with which to run the Government, including the Army and the Navy. This is the place, and this is the time to stop the use of the armed forces of this country when the actions of the Executive can not be controlled in any other manner. This appropriation bill will not be vetoed. A provision in this appropriation bill prohibiting the use of the marines in Nicaragua will be the law; and that is why Senators are so strongly opposed to the adoption of this amendment.

They say this is not the proper time to limit the action of the administration in Nicaragua. The Senator from Idaho [Mr. BORAH] and the Senator from Virginia [Mr. SWANSON], learned and able as they are, floundered about here as I have never seen them flounder in public addresses when they attacked all the administration had done and then urged that the Senate should accede to it for a little while longer.

The Senator from Virginia to-day said that the administration was wrong when it took the marines into Nicaragua, but having taken them in, he and other members of the Foreign Relations Committee consented that they should stay in. While that was going on, the administration recognized, according to the Senator from Virginia, the wrong President, the wrong government; and when I reminded him of that, he said that was the function of the administration; but he condemned the administration because it proposed to use the armed forces of this country to maintain that government which it had recognized.

Having started that policy, wrong though it was in his judgment, we must "keep the faith," as he said, and go forward. Congress adjourned, and Colonel Stimson, appointed without the

authority of Congress, made an agreement, not approved by Congress, to hold an election, not supported to-day by the Nicaraguan Congress or by a part of the Nicaraguan rebels, and we are told here that it will be "breaking faith" if we do not go through with it!

Then the Senator from Virginia—unfortunately for his argument, as it seemed to me—recalled the history of the Roman Empire. The Roman Senate, he said, would keep the faith of any proconsul, no matter how wrong the agreement of that proconsul might be. Ah, sir; if we have reached the place in the history of this Republic where we will follow in the footsteps of the Roman Empire in keeping faith with agreements that certain officials make that are illegal and wrong, the time has come to awake and put a stop to further agreements of that kind.

Mr. CARAWAY. Mr. President, if we are bound to honor agreements made by officials, whether right or wrong, why did we not let Sinclair keep Teapot Dome? Fall sold it to him, and got the money for it, and he gave it to him, and now we are trying to repudiate the transaction.

Mr. DILL. Yes; and then Sinclair used the money to get out of jail with.

Mr. CARAWAY. But if that argument is sound, what difference is there between the two cases?

Mr. DILL. I do not see any difference, except that this is far worse, because this has resulted in the killing not only of innocent people in a foreign land but of American boys who enlisted in the marines to defend the American flag.

Then the opponents of this amendment have gone to another position. I think it was the Senator from New Jersey [Mr. EDGE] who was talking about supporting the President. When the Congress of the United States has legally declared war, when this country has entered upon war with a foreign nation, then the Senator from New Jersey can well appeal to this body to support the President. None will be more loyal in supporting a President under that condition than I shall.

When the President makes an illegal, void agreement to do a thing which nobody yet has been able on this floor to show he had a right to do, namely, provide for the holding of an election in Nicaragua, it is not the duty of Senators to support the President; it is the duty of Senators here, under their oaths, to stop the President from going further with such illegal agreements and such illegal actions.

The Senator from Connecticut [Mr. BINGHAM] in a university address yesterday attempted to prove that the killing of men in Nicaragua is not war. As I listened to a part of his speech and as I read the rest of it I wondered what he would say to the mothers of some of these young men who died in Nicaragua. I want to remind you that these boys who are dying in Nicaragua are just plain American boys, who have the same right to life, who have the same right to the opportunities of young men that other boys have. When those boys lie dead at the feet of their mothers, I would like for the Senator to say to the mother of any one of them, "This boy was not killed in war." She would say, "What was he doing when he was killed? He was killed down in Nicaragua. What was he doing there if it was not war?" Then the Senator from Connecticut would say: "He was down there to help protect somebody's gold mine that some speculator had invested in. He was down there to help collect claims for American business men who were speculating down there."

I say I would like to have him look in those mothers' faces and tell them that; tell them that was what their boys were dying for. Instead of that he attempts to defend a policy, as though it were a policy important to the future of the world that costs the lives of American boys. If you can kill one boy in a wrong cause, you can kill a million, because one boy's life is as important to him, his friends, his relatives, his parents, as are the lives of a million boys to those who love them.

I protest with all the earnestness I possess against the murdering of these boys in a foreign land without the consent or the authority of Congress.

It is said we went into Nicaragua to protect American lives and American property. When did the protection of American lives or American property require that we should set up a stable government and keep that government in such condition that those who have financial interests there shall continue to profit on the investments they have made? This is not the mere protection of American lives and property. This is an attempt to set up a government that will be stable, and to keep that government stable, so that those who have invested or want to invest may continue to make the profits they hope to make. We are doing this at the cost of American boys' lives, the lives of boys who had as much right to live, who had as much right to expect their legal rights to be respected when they joined the marines as other men. Of course, if their country called them in its own defense, they would serve faithfully and fearlessly. It was never expected, it was never intended, and it is not right that they should be called upon to die in order that a few investors shall be able to continue to profit upon the investments they have made in a land where governments have always been unstable and still are of doubtful stability.

Mr. President, I do not want to take the time of the Senate, but I do want to call attention to the fact that every time Congress permits a President, be he Republican or be he Democrat, to do an unauthorized act in the way of invading a foreign land or using the armed forces of this country in an illegal way it furnishes an excuse for another President hereafter to commit an even greater wrong.

In this debate the fact has been referred to that Mr. Taft, Mr. Roosevelt, and Mr. Wilson all had used the armed forces of the United States abroad without first getting the consent of Congress. Those precedents are used as a defense for this greater wrong that is being committed, and when Congress refuses to take action to stop the committing of the present illegal acts on the part of the United States Government it is only furnishing another precedent for some other President in the future to do even more illegal acts and to commit even greater acts of hostility against foreign countries than have been already committed, and spill more American blood in the protection of property and the collection of foreign claims.

Future Presidents may claim to be justified by the fact that Congress permitted these acts, admittedly illegal and admittedly wrong, to be consummated with its own consent.

In closing I just want to remind the Senate that the power to declare war is a power that should be jealously guarded by Congress. A reference to the history of civilization discloses that wars originally were always declared by the king. A little later in the history of mankind the king's counsellors joined with him in declaring war. In practically every country in Europe to-day wars are declared through the cabinet. The great World War really began because of orders for troop mobilization on the part of the heads of the German and Russian Governments.

Here in America our fathers set up a Constitution and provided that war should be declared only by Congress, but little by little the Executive, having control of foreign affairs, is setting up precedents by committing illegal acts and by performing unauthorized deeds in foreign lands that inevitably lead us into war, until to-day we have in Nicaragua a state of affairs that is admittedly war, and we have men on this floor defending it as a necessary act on the part of the President which should not be even condemned by Members of this body.

I protest against it. I shall vote for every one of these resolutions in the hope that some one of them may pass. I do not approve the wording of all of them, but I shall vote for them, because I want to express my protest against this policy.

Mr. PITTMAN. Mr. President, I have an amendment I want to offer, if it is in order. It is to come at the end of line 9 of the amendment of the Senator from Wisconsin [Mr. BLAINE].

The PRESIDING OFFICER (Mr. STEIWER in the chair). There is an amendment pending to the amendment offered by the Senator from Wisconsin.

Mr. PITTMAN. I ask to have my amendment read, and have it lie on the table.

The PRESIDING OFFICER. The amendment will lie on the table and be printed.

Mr. PITTMAN. I understand there is only one amendment pending; that is the amendment offered by the Senator from Wisconsin [Mr. BLAINE].

The PRESIDING OFFICER. The Senator from Alabama [Mr. HEFLIN] tendered an amendment to the amendment of the Senator from Wisconsin.

Mr. PITTMAN. Very well.

Mr. McKELLAR. Mr. President, I think the Senator from Alabama is going to offer his amendment should the Blaine amendment be not agreed to. Is not that correct?

Mr. HEFLIN. I did agree with several Senators that the Senator from Wisconsin is entitled to have his amendment voted on, and that I would not offer my amendment as a substitute for his, but that we would have a vote on his amendment, and I would immediately offer my amendment to the appropriation bill if his amendment should be defeated.

Mr. PITTMAN. Then my amendment to the amendment would be in order.

The PRESIDING OFFICER. The RECORD shows that the Senator from Alabama offered his amendment to the amendment and asked for a vote on it, and the yeas and nays were ordered upon that question.

Mr. NORRIS. I ask unanimous consent that the order for the yeas and nays be set aside.

Mr. HEFLIN. I hope that will be done.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. PITTMAN. Mr. President, I offer the following amendment, to be inserted at the end of line 9, page 1, of the amendment offered by the Senator from Wisconsin [Mr. BLAINE].

The PRESIDING OFFICER. The clerk will state the amendment.

The Chief Clerk read the amendment, as follows:

*Provided*, That in case of actual physical attacks upon American citizens or their property, or the immediate danger of such attacks at any time, the forces of the United States may be used by the President for strictly protective purposes without the consent of Congress, and appropriations may be used to pay the expenses of such protective action.

Mr. PITTMAN. Mr. President, that language was read by the Senator from Nebraska [Mr. NORRIS] from a statement that was made by Thomas Jefferson. Thomas Jefferson's statement in full on this subject is as follows:

In the case of actual physical attacks upon American citizens or their property, or the immediate danger of such attacks, the forces of the United States may be used for strictly protective purposes without the consent of Congress, which it is manifestly impossible to obtain in such cases. When, however, any attempt is made to take over the control of territory, to use force for the collection of claims due to American citizens, to interfere with the military operations of foreign troops, or, above all, to interfere between two governments, each claiming to be the legal government of the country, war, perhaps only partial war, but still war, is waged, and this can only be constitutionally done under the authority of Congress.

I am offering the amendment for this reason.

Mr. SIMMONS. Mr. President, the Senator is including in his amendment all of those things which Jefferson said might be done?

Mr. PITTMAN. I am including the first part of it, which states the authority of the President without action by Congress.

Mr. SIMMONS. And not the balance.

Mr. PITTMAN. There is no doubt but that under the Constitution the President has certain authority, and whatever authority he has we can not take away from him by congressional action, either directly or indirectly. If we attempt to interfere with the constitutional authority of the President, if we attempt to place a limitation upon the constitutional authority of the President, the whole limitation is void.

I favor the policy stated in the amendment of the Senator from Wisconsin [Mr. BLAINE]. I do not desire, from my statement that I favor that, to have anyone get the idea that I doubt for one moment the constitutional authority of the President of the United States to use our armed forces to protect the lives and property of our own citizens when they are attacked or when they are in immediate danger of attack.

If we do not, while we are establishing a policy, also recognize the constitutional right of the President we may have the whole limitation declared unconstitutional by the Supreme Court. On the other hand, whether they declared that limitation unconstitutional or not, there is not a Senator in this body who seeks to prevent the proper protection of lives of American citizens, wherever they may be. It seems to me it would be totally improper to state a policy here such as is found in this amendment without also reiterating the constitutional authority and duty of the President of the United States in this particular.

I believe in this statement:

None of the appropriations made in this act shall be used to pay any expenses incurred in connection with acts of hostility against a friendly foreign nation, or any belligerent intervention in the affairs of a foreign nation, or any intervention in the domestic affairs of any foreign nation, unless war has been declared by Congress or unless a state of war actually exists under recognized principles of international law.

I do not think there is a member of the Foreign Relations Committee who does not believe that is good policy. I think we all agree with that policy, but, on the other hand, assume that in compliance with the intent of this amendment, on a certain date all of the armed forces were withdrawn from Nicaragua, and suppose one week thereafter some of our citizens were attacked by armed forces; would it not be the duty of the President, without hesitation, without coming to Congress immediately to take the available armed forces he could get to go there and repel that attack? If on the date that the armed forces were to come out authentic news came to the President of the United States that on the next day there was going to be an armed attack against some of our citizens there, would not we want those citizens protected? Of course we would. Unless the amendment carries with it the express pronouncement that while we denounce these acts set forth in paragraph 1 of the resolution of the Senator from Wisconsin, we do not question the constitutional authority of the President, nor do we want to do anything to interfere with that constitutional authority.

I have stated it in language that no one can question; to a great extent in the language of Thomas Jefferson. Strange to say, in that same statement he confirms the statement contained in the very body of the amendment of the Senator from Wisconsin.

I agree to the statement of facts submitted by the chairman of the Committee on Foreign Relations. I agree with the statement of facts submitted by the senior Democratic member of the committee, the Senator from Virginia [Mr. SWANSON]. I agree with them that it would have been far preferable if this matter could have been acted on by the committee in a carefully prepared measure setting out the policy in which Congress believes. As a general thing, I do not approve of this method of attempting hastily to legislate on an appropriation bill by limitation; but the fact is that the legislation is presented, the fact is that the world has been notified that the Congress of the United States is about to act on a policy, the policy is put squarely before us, and the question is, if we vote down this amendment, will not the rest of the world have a right to believe that we, the Congress of the United States, or at least the Senate of the United States, believe in the imperialistic policy that we are charged with throughout the world?

It is the effect of it that must be met now. I believe we could just as well wait until December, as the Senator from Virginia has said, so far as the physical effect of it is concerned. We could act—bring the marines out in January—just as well in December as now. But that is not the question. There are put up to us the questions: Do we favor intervention in the domestic affairs of other countries? Do we favor belligerent intervention in the affairs of other countries? Those questions have got to be answered, and answered now. I could not vote on this question and vote nay, because I favor every policy set out in the amendment. I would not dare attempt to avoid it; but I could not vote for the amendment if it were subject to any construction whatever to the effect that we were attempting to interfere with the constitutional powers of the President to protect our citizens or that we do not believe it is his duty to protect our citizens. For that reason I have offered the amendment to the amendment of the Senator from Wisconsin.

Mr. BORAH. Mr. President, may I ask the Senator offering the original amendment whether it will be agreeable to him to have the date of the original proposition fixed at not earlier than the 1st of January? The new officials should take office the 1st day of January, 1929, and it would seem to me that that would be better—to fix a date later than January 1.

Mr. McKELLAR. The 1st of February would be satisfactory.

Mr. BORAH. It would give the new government an opportunity to get itself established and in control of the machinery of government.

Mr. BLAINE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Wisconsin?

Mr. PITTMAN. I yield.

Mr. BLAINE. The suggestion of the Senator from Idaho, as I understand it, is to advance the date upon which the marines shall leave Nicaragua, on the theory that the inauguration of the President elect of Nicaragua will be on the 1st of January. I think I made myself clear on the proposition. I realize that we are in Nicaragua, and I am not going to discuss that question again. My statement in the course of the debate I desire to stand as I addressed myself to it at that time.

The suggestion of the Senator from Idaho as made is perfectly reasonable, but I would go a little further than that under the circumstances. After the inauguration of the President elect on January 1 I appreciate that there are certain physical obstacles to be overcome, certain movements that must be made to get the marines out of Nicaragua. I have no desire to embarrass the President or the administration. I have no desire to interfere with the orderly process of evacuating the territory of that Republic. I therefore would ask permission to modify the amendment by changing the date from December 25, 1928, to February 1, 1929.

The PRESIDING OFFICER. The Senator has the right to modify his amendment.

Mr. PITTMAN. Does the Senator approve of the amendment I have offered?

Mr. BLAINE. I listened with a great deal of interest to the Senator from Nevada. When my mind was turned to the undertaking of proposing some proper limitation upon the use of the funds to be appropriated by the bill under consideration, I had in mind writing as nearly as possible the declaration made by Thomas Jefferson. So with the view that the modification suggested by the Senator from Nevada is interpreted according to the language, statesmanship, patriotism, and loyalty of Thomas Jefferson to this Republic as operated democratically, and his adherence to policies of democracy that ought to control in the administration of the affairs of this Republic, I want to say that with that suggestion and the interpretation which no doubt will be placed upon it as an interpretation announced in the declaration of Thomas Jefferson, I will accept the amendment offered by the Senator from Nevada.

Mr. JOHNSON. Mr. President, will the Senator yield?

Mr. PITTMAN. Certainly.

Mr. JOHNSON. There are many of us who are very deeply interested in the amendment, although we have had nothing to say concerning it at all—interested from every standpoint. May I ask, because of the very important amendment which has just been presented by the Senator from Nevada, that this matter rest until to-morrow in order that we may consider the original amendment and the amendment now offered, and determine then the course we would like to pursue?

Mr. HEFLIN. Mr. President, I hope that will be done.

Mr. CURTIS. I am going to ask that the amendment, with the changes, be printed to-night so that we may have it before us in the morning.

Mr. BORAH. In order that we may have the question for consideration in the morning, may we have the amendment read now as it will be printed in the morning, so that we may have an opportunity to think about it over night?

The PRESIDING OFFICER. The clerk will read the proposed amendment.

The CHIEF CLERK. The Senator from Wisconsin [Mr. BLAINE] offers an amendment which as modified now reads:

On page 53, after line 17, insert the following:

"*Provided*, That after February 1, 1929, none of the appropriations made in this act shall be used to pay any expenses incurred in connection with acts of hostility against a friendly foreign nation, or any belligerent intervention in the affairs of a foreign nation, or any intervention in the domestic affairs of any foreign nation, unless war has been declared by Congress or unless a state of war actually exists under recognized principles of international law: *Provided*, That in case of actual physical attacks upon American citizens or their property, or the immediate danger of such attacks at any time, the forces of the United States may be used by the President for strictly protective purposes without the consent of Congress, and the appropriations may be used to pay the expenses of such protective action.

"The words, 'acts of hostility,' and the words 'belligerent intervention,' shall include within their meaning the employment of coercion or force in the collection of any pecuniary claim or any claim or right to any grant or concession for or on behalf of any private citizen, copartnership or corporation of the United States against the government of a foreign nation, either upon the initiation of the Government of the United States or upon the invitation of any foreign government existing de jure or de facto."

Mr. BORAH. Mr. President, may I suggest to the Senator from Nevada that it seems to me his amendment ought to read that this provision shall not apply to such instances as he names there, rather than saying that in such instances the President is authorized to do thus and so. It would seem that we were taking the position that the President would not have the authority unless we authorize him to do it. The Senator from Nevada takes the position, and correctly, that he has that authority, and we can not take it away from him. The amendment should read, it seems to me, that this should not apply to instances in which property or lives are threatened or actually assailed, as it now reads, but not making it affirmative authority to do it. The President has that authority under the Constitution and we can not take it away from him.

Mr. PITTMAN. I realize that, and the only reason why I worded it in this way was that it was so much simpler to use the exact language by putting it in that way than to attempt to paraphrase the language. I realize the force of the suggestion made by the Senator from Idaho and by to-morrow morning we will have an opportunity to make such changes as may be necessary or desirable.

Mr. WHEELER. Mr. President, are we to understand that with the amendment of the Senator from Nevada the Senator from Idaho would then favor the amendment?

Mr. BORAH. As I have said, Mr. President, to several Senators who have inquired, I do not see any objection to it at this time, but I should like to have the opportunity to think it over. As I construe the amendment now, it is the Constitution of the United States and international law.

Mr. WHEELER. I should like also to ask the Senator from Virginia [Mr. SWANSON] whether or not he has any objection to the amendment as it is now framed?

Mr. SWANSON. While I think it wiser to wait until December to settle this matter, as I have said, yet if the Senator from Idaho believes the amendment is wise—and he has studied the question more than I have—I shall raise no objection to it, in view of the declaration which it embodies, which seems to me to be in accord with well-established principles.

Mr. BORAH. Mr. President, the appropriation bill is not in my charge and neither is the amendment—I am merely expressing my individual view—but, as I construe the amendment hurriedly, it is an elucidation of the Constitution of the United States and international law with reference to the condition now existing.

Mr. SWANSON. Rather than have debate and worry and delay, if the amendment reiterates the law as it is, while I do not think it is wise to put it on an appropriation bill, I will interpose no objection. I have no desire to fight a thing which is a reiteration of the law as it is.

Mr. EDGE. Mr. President, does the Senator from Idaho believe that even in reiterating known principles it is necessary to limit to an arbitrary date through appropriations the time when the President can use his best judgment in his admitted responsibility of protecting American lives and property in any country in the world?

Mr. BORAH. Mr. President, there is no limit in this amendment, either as to date or authority as to the power of the President to protect American life and property in foreign nations. There is no limit either in time or in language as to that.

Mr. SWANSON. As I understand from the Senator, if this amendment is adopted, it will impose no restriction on the power of the President within international law and his constitutional authority. In view of that, and feeling that there has not been done in Nicaragua exactly what should have been done, I do not see how I could interpose any objection to it, and consequently I accept the amendment.

Mr. EDGE. I ask the Senator from Virginia, following his own line of reasoning, why should there be any particular date when an appropriation shall cease to be available?

Mr. SWANSON. The Senator from Idaho has examined the question more thoroughly than have I. I have some doubt as to whether we ought not to wait until December, but I am willing to have the amendment now suggested adopted and accepted, so far as I am concerned.

Mr. BORAH. There is no limitation as to the power of the President to do those things that he has a right to do. He is not limited in his right to protect life and property and should not be.

Mr. SWANSON. I think the President ought to be restrained from doing illegal things. All this amendment does is to restrain him within the Constitution and to prevent any illegal actions. He has authority now to do what may be necessary to protect American lives and property. The election in Nicaragua, I think, is the most important consideration of all, for, in my opinion, there will not be peace in Nicaragua until there has been an election and the Liberals have been given an honest opportunity to register their choice, as we agreed they should do. I have no objection to restricting a Republican President from the 1st of February until the 4th of March.

Mr. EDGE. I should like to have the Senator's view as to the necessity of naming an arbitrary date. That must mean something. Before that date he can use a certain appropriation for this purpose, while after that date, apparently, he can not do so. Who is to decide?

Mr. BORAH. If the President be consulted, it will be found that he contends that he is not going beyond his constitutional powers. It is his contention and the contention of the administration that he is in Nicaragua protecting life and property; that he is not exercising any unconstitutional power. That is his contention and that is the viewpoint of the administration. So, as a matter of fact, as the amendment is drawn it does not limit the President at all, either in time or authority, as to doing those things which he has the power to do and which the President claims he is doing. There are others who think that he has gone beyond his constitutional authority; but, so far as this amendment is concerned, it would not limit any power that he now has under the Constitution.

Mr. EDGE. But am I not correct in the assertion that it would limit the expenditure of any of the money appropriated for the marines to send them to any foreign country if, in his

judgment, at that time American lives and property were in jeopardy?

Mr. BORAH. No; it would not limit him at all in that respect.

Mr. EDGE. The amendment refers to interfering with the domestic affairs of other countries.

Mr. BORAH. Yes; but it is a well-established principle of international law that the sending of marines into a foreign country for the purpose of protecting life is not intervention; it is not an act of war; it is not interfering with domestic affairs. That is a well-established principle. If the President goes beyond that and commits an act of hostility, if he seeks with the marines to interfere in domestic affairs, he is doing something which he ought not to do without the authority of Congress.

Mr. BRATTON. Mr. President, will the Senator from Idaho yield to me for a moment?

Mr. BORAH. I yield the floor, unless the Senator wants to ask a question.

Mr. BRATTON. The Senator from Idaho has developed a thought that had occurred to me in connection with the amendment which the Senator from Nevada [Mr. PITTMAN] now proposes. If sending marines into Nicaragua for the protection of American citizens is not an act of "hostility against a friendly nation," if it is not "belligerent intervention in the affairs of a foreign nation," and if it is not unlawful "intervention in the domestic affairs of a foreign nation," what force and what vitality would the amendment have? If the marines have been sent there to protect the lives and property of American citizens, as the President had the right to do, then he has not transgressed any of the provisions of the amendment proposed by the Senator from Wisconsin, but he has kept within the law. If that be true, I do not see what is to be accomplished by adopting the amendment proposed by the Senator from Nevada, because it will be said by those who uphold the views entertained by the President that he has not committed any of the acts denounced in the amendment of the Senator from Wisconsin, but that he has kept within his rights, as declared in the amendment proposed by the Senator from Nevada; that is, that he sent the marines there originally and is retaining them there now to protect the lives and property of American nationals, and consequently has not committed any "act of hostility against a friendly foreign nation" or of "belligerent intervention in the affairs of a foreign nation" or of "intervention in the domestic affairs of any foreign nation," but has proceeded squarely within the terms of the amendment proposed by the Senator from Nevada.

Mr. BORAH. Mr. President, of course it is the contention of the administration that it has acted within its authority under the Constitution, but we must take into consideration that the author of the resolution and others think that the President has not done so; that he has committed belligerent acts; that he has interfered with the domestic concerns of the Government of Nicaragua.

Mr. BRATTON. Then, let me ask the Senator from Idaho another question.

Mr. BORAH. I agree with the proposition that the President ought not to have the approval of Congress, either expressed or implied, to commit belligerent acts against a friendly nation and interfere illegally with the domestic affairs of a foreign nation, but we ought to bear in mind that the protection of life and property in a foreign country is not in violation of international law.

Mr. BRATTON. Exactly.

Mr. BORAH. It is expressly sanctioned by international law, and it has been held not to be an act of war because of which a nation could take offense. Therefore it seems to me that under the amendment of the Senator from Nevada the President is authorized to do all that he has a right to do under the Constitution and under international law.

Mr. BRATTON. Let me express my inquiry in this way: Suppose the present conditions continue until this appropriation bill becomes effective, who is going to determine whether the continuance of the marines in Nicaragua does constitute an "act of hostility against a friendly foreign nation," or does constitute "belligerent intervention in the affairs of a foreign nation," to wit, Nicaragua, or does constitute "intervention in the domestic affairs" of that country, or whether his actions and conduct merely constitute activities to protect the lives and property of American nationals? Whether the money can be expended under this appropriation law will depend upon which status obtains. If the President is protecting life and property, the money should rightfully be expended to defray the expenses incurred. If the retention of the marines in Nicaragua constitutes a violation of the prohibitions set forth in the amendment proposed by the Senator from Wisconsin, payment should be withheld. In order that we may avoid doing a vain and useless thing, we should make certain that the money appropriated in this act will not be expended except under circumstances of which we approve.

Mr. BORAH. Mr. President, my objection is——

Mr. HEFLIN. Mr. President, before the Senator from Idaho answers that question, I desire to say that the Senator from New Mexico [Mr. BRATTON] has raised a very interesting question. It is going to lead to a good deal of discussion, and I think we had better let it go over until to-morrow.

Mr. PITTMAN. Mr. President, before that happens, at least let me perfect the amendment in accordance with the suggestion of the Senator from Idaho and the Senator from Wisconsin. As perfected the amendment will read:

*Provided*, That such limitation shall not apply in case of actual physical attacks upon American citizens or their property, or the immediate danger of such attacks at any time; the forces of the United States may be used by the President for strictly protective purposes without the consent of Congress, and appropriations may be used to pay the expenses of such protective action.

Does the Senator from Wisconsin accept the amendment as I have now modified it?

Mr. BLAINE. I accept the amendment as modified.

Mr. CURTIS. I ask unanimous consent that the amendment of the Senator from Nevada [Mr. PITTMAN], as modified, be printed so that we shall have it in its perfected form.

The VICE PRESIDENT. Without objection, it is so ordered.

## THE PROPOSED NICARAGUAN CANAL

Mr. MCKELLAR. Mr. President, I ask unanimous consent to have printed in the RECORD a letter addressed to me by A. Guyot Cameron, of Princeton, N. J., relative to the proposed Nicaraguan canal, and also an article published in the National Financial News of New York City, prepared by Mr. Cameron, entitled "America's opportunity in Nicaragua."

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

PRINCETON, N. J., *April 22, 1928.*

Hon. KENNETH MCKELLAR,
*United States Senate.*

MY DEAR SENATOR MCKELLAR: If before this I have not expressed my great appreciation of your so courteous and immediate letter, this has been by unwillingness, while awaiting the arrival of the CONGRESSIONAL RECORD, containing your speech as to the Nicaragua canal, which you were good enough to send and which arrived yesterday afternoon, to trouble you twice with my thanks.

Permit me to offer my congratulations upon your so able treatment of the fundamentals involved, and urging, in the question of the Nicaragua canal. It is an amazing thing that, in view of the proven protection and profits of the Panama Canal, of the practical solution offered by the Nicaraguan project on its economic side, for the political aspect of Latin-American relations, as you have so ably indicated; and of the value in every way inherent in the Nicaragua canal, for this country and internationally, that ignorance or indifference or antagonistic interests, should obscure or delay construction of the Nicaragua canal.

I am hoping that opportunity may arise, by your reopening of the subject, to further proper conception by the people of the United States of the vital importance of the matter, particularly for ourselves, but not in selfish sense.

You may permit me to inclose a reprint of my articles on this question, which appeared in the National Financial News. This paper was taken over in 1926 by the Magazine of Wall Street. Of my statements Doctor Jenks, then just returned from Nicaragua, wrote to me, among other things: "You have given me considerable information in the articles that I did not have before." And Consul General Toribio Tijerino, of Nicaragua, in a long and very delightful communication, declared: "I have read many articles about Nicaragua published in the United States, but none has been as accurate, nor shows the careful study of the matter as yours."

I have not had the long-desired privilege of seeing Nicaragua, but I have long done what I could toward realization of the canal. This effort has had fairly wide echo in Latin America. I am hopeful that your awakening of public attention to not merely the necessity but the duty of the United States in this great matter, may give the momentum to our patriotic opportunity. I trust that, interested as you are in our Latin-American contacts, the copies of the Financial Forum may have reached you.

With great appreciation, I have the honor to be, Senator,

Very truly yours,

A. GUYOT CAMERON.

[From the National Financial News, New York]

AMERICA'S OPPORTUNITY IN NICARAGUA

By A. Guyot Cameron, foreign affairs editor

Professor Cameron's appointment as foreign affairs editor of the National Financial News means that all Americans who read his articles will get a new vision of conditions abroad. The importance of foreign business to citizens of this country is emphasized by the comment of the New York Evening Post on May 13: "One billion American dollars were sent abroad for investment during 1924. This raises the amount of American holdings in other countries to a total of more than $9,000,000,000; before the war the figure was about $2,000,000,000.

"This is the sense in which the United States, as Secretary Hoover says in the third annual report of the Department of Commerce, 'is now the world's greatest investor.' No other country during the last year increased its foreign holdings by $1,000,000,000; no other country during the last decade has increased its foreign holdings by $7,000,000,000.

"These statistics indicate a vast change in the economic and financial situation of the world. The United States has taken its place securely among the great creditor nations. As time goes on the power that comes from this status will unquestionably increase."

"We need to understand the peoples of South America better. Few of us really know how to judge them. Their countries offer splendid industrial and other opportunities. It is important that when we send men to represent us in South America they shall be the type to understand the people." (Sir Herbert S. Holt.)

---

"European stabilization will bring about a revival in world trade and increased consumption of commodities in which the United States is bound to have its share." (Herbert Hoover.)

---

"There exists in the New World a state as admirably situated as Constantinople, and we must say up to this time as uselessly occupied. We allude to the state of Nicaragua. As Constantinople is the center of the ancient world so is the town of León the center of the new, and if the tongue of land which separates the two lakes from the Pacific Ocean were cut through, she would command by virtue of her central position the entire coast of North and South America. The state of Nicaragua can become, better than Constantinople, the necessary route of the great commerce of the world, and is destined to attain an extraordinary degree of prosperity and grandeur."

The man who wrote that, with balanced judgment and yet with fiery enthusiasm, was Napoleon III. That the splendors of the Second Empire, during which Paris was not only what it has remained—the playground of the world—but the leader in things artistic, in civic expansions, and in many economic matters, fell, does not change the value of political perspective in the emperor. In spite of attack, in a relatively recent book, of Philip Guedalla, the breadth of political view of Napoleon III remains. We may add, he was a tactician, a diplomat, a brave man, and, had the Franco-Prussian war not occurred, he would have accepted the "Liberal Empire," which would have saved his dynasty.

WAS FRANCE RIGHT?

But that is not the point. Was France right as to Panama? It was. And no technical nor financial mistakes alter the tremendous debt due France for Panama inception which eventually hastened United States actions. Was Napoleon right and, is he yet, as to Nicaragua? There can be no question of it with proper conception of the conditions and of the facts.

The mistake of Napoleon was not as to Nicaragua but as to violating the political testament of Cardinal Richelieu in the matter of political conjunction with the House of Austria. It was renewing error as in the case of Marie Antoinette, lovely and vicarious victim of history. It was perpetuating fault by the case of Marie Louise, the second wife of Napoleon I. It was repeating blunder by the backing of Maximilian in Mexico. Richelieu was right. And so was Napoleon III, as have been many others, in the matter of Nicaragua. It makes no difference that his purpose was the extension of the territory of Maximilian to include the boundaries of Nicaragua within the then empire of Mexico.

It is a peculiar coincidence that the area of Nicaragua is 49,200 square miles and that the area of New York State is 49,204 square miles. The latter is already passing into history as the Empire State. The former is the gateway of an economic empire.

Why did the United States build the Panama Canal instead of constructing the Nicaragua route? For two causes, one due to our national psychology, the other, for obvious pecuniary reasons. We are the speed Nation. Panama was apparently a quicker proposition. We are a keen financial Nation. The Yankee bargain appeals to us. Without here discussing why, France was willing to sell to us her Panama concession for the small sum of $40,000,000, giving us a free hand and vast materials, much of which, for many reasons, we could not utilize. And back of both these propositions were the energy and the political foresight of Theodore Roosevelt. Let us imagine the World War without the Panama Canal!

We did this, although after years of engineering reports, Government estimates, and political discussions, not to say partisan ones, the United States had reached the decision for the Nicaragua route. Whatever reasons held good for this choice, after long oppositions and indecisions; whatever forcible arguments were adduced until the final and favorable passing of the Nicaragua canal bill, remain valid until this day, in so far as they are inherently valuable. It is not at all a question as to what interests may or not be pleased with the reopening of the Nicaragua canal matter. It is a question of patriotism and of potential for the United States.

"WE HAVE PANAMA"

We need the Nicaragua canal for the fulfilling of national opportunity and of international duty. We had our lesson—and a World War soon thereafter proved the danger in this—and we even had our fear at the possible control by a foreign power of an all-American isthmian canal. We have no moral right, under a Monroe doctrine cooperation, to play the dog in the manger act and to estop the building of a Nicaraguan canal for which Central America waits, as it has long waited, and which international trade approaches the day of needing. Again, it is not a question of conflict but of commerce and of communications of every sort. It is not a matter merely of military aspect. That phase certainly does exist. But this country must think of economic preparedness in numberless ways. A telegraph or cable company is not insured for its business opportunity without at least duplicate or triplicate lines. A single-track railroad is under constant possibility of interruption of service. "We have Panama." Yes; but that is just the point: What of possible delay or destruction?

The Nicaragua canal remains a paramount issue, largely unknown by this generation, which has forgotten or has never gauged the idea and the importance of the subject. It is paramount by its practicality; by its economic potential, and by its favorable political aspect. But whether a matter of politics or of trade development, the issues connected with a Nicaraguan isthmian canal are as closely linked with this country as they have ever been in times previous to this one.

BATTLE GROUND FOR CENTURIES

It is worth while to consider a few things. What has made Nicaragua for centuries a battle ground? Appreciation of the seal set by nature upon its pivotal world position. Here is, and in simplest form, the topographical key to world oceanic intercommunication. To obtain possession of this key many nations have striven, with or without the permission of their governments. We are apt to blame our political brethren of the Spanish republics to our south for more or less political instabilities. But in Central America almost every one of these may be traced to the struggle, either open or concealed, of powerful nations appreciating that the narrow neck of land near the slim Isthmus of Nicaragua meant a world cross road of the sea and that whether for colonial power or for strategic position or ultimately for trade expansion, Nicaragua was a dominating center, military or material, for world connections.

So even after Nicaragua became Spanish colony there was continual war with England, France, and Holland. Besides this, the pirates and the privateers of these three countries and mixed piratical crews devastated and distressed Nicaragua with frightful detriment to people and to products and to politics. In addition there were the struggles against the Indians, or with them against a common enemy. And terrific internecine and interstate warfare.

There has been no more pathetic situation in economic-political history than the 100 years appeal of the isthmus for interest, cooperation in development, and trade sympathy of the United States toward Nicaragua. Disregarding the surges of anti-American or pro-American feeling that were often the political slogans of the "ins" or the "outs" there has been steady hope that the big brother of the North would see clear the opportunity for him and for the isthmus in the cutting of the waterway that would mean such tremendous help in international relations. An extraordinary gauge of this spirit is seen in the fact that Salvador, even a century ago, asked for annexation to the United States. This was to rescue it from its temporary incorporation in 1822–23, with the other Central American States, into the Mexican Empire of Iturbide.

It is declaring ignorance of United States history to consider our contacts with Nicaragua as something foreign to our policies and to our progress. On the contrary, our relations have long been extremely a matter close and in common. Run over these relations. These relations have been of two kinds, political and engineering.

THE FEDERAL UNION

In 1821 Nicaragua, Guatemala, Honduras, Salvador, and Costa Rica declared their independence of Spain, an independence not acknowledged by Spain until 1850. In 1823 came the Federal Union of the five Central American states, lasting until 1839, and, in spite of seccedings and wars, repeatedly renewed, with undoubted ultimate acceptance by the five states. From 1858 to 1893 Nicaragua enjoyed under extremely able presidents, the longest period of peace known in Central American history. Since 1893 the United States have kept friendly eye upon Nicaraguan complications.

But already in 1825 the Republic of the Centre, considering applications from British and United States citizens for canal concessions, made overtures to the United States through the United States Senate and asked their cooperation in the building of a canal. In 1826 a company of New York capitalists was formed, including De Witt Clinton, and made contracts for canal purposes but did not have enough capital to pursue its plans.

Acquisition of California after 1848 settled future canal construction. In 1850 United States engineers surveyed the Nicaragua route. From 1870 to 1875 repeated United States Navy expeditions considered all projected isthmian routes. In 1876 a United States commission advised that the Nicaragua route possessed greater advantages and offered fewer difficulties than any other route and plan proposed.

CLAYTON-BULWER TREATY

By treaty with New Granada (Colombia) in 1846; with Great Britain in 1850 through the Clayton-Bulwer treaty renewed in 1901; and with Nicaragua in 1867, we had guaranteed the neutrality of either Panama or Nicaragua Canal. In 1884 came the Frelinghuysen-Zavala treaty with Nicaragua by which we would build the canal without cost to Nicaragua, and after its completion the two countries would together own and manage it.

This treaty, receiving in 1885 in the United States Senate 32 votes but with 23 votes against it and thus failing of two-thirds ratification (as had failed a similar treaty in 1848), did not pass, and change of administration hampered its reconsideration. Yet in 1886 the Nicaragua Canal Association was formed privately with concessions in 1887 and 1888 from Nicaragua and Costa Rica, respectively. Under authority of Congress, the Maritime Canal Co. was formed in 1889, and until the panic of 1893 forced it to the wall it spent $4,500,000 in work, which included a railroad of 11 miles back from Greytown (now San Juan del Norte). In 1895 and in 1897 Congress appointed new boards of engineers (the Walker Commission under President McKinley in 1897) to report.

Then came in quick succession the Spanish war in 1898; the revelation of the need of an isthmian canal immediately, but in 1900 the triumph of the Nicaraguan route in the report of the commission for Nicaragua, which declared "the commission is of the opinion that 'the most practicable and feasible route for' an isthmian canal to be 'under the control, management, and ownership of the United States,' is that known as the Nicaragua route."

In January, 1902, the French Panama Co. offered to sell. The Nicaragua Commission reversed its report. Just previously to this the Hepburn bill authorizing the Nicaragua Canal at a cost of $180,000,000 had passed the House of Representatives by a large majority. The Spooner amendment in the Senate allowed presidential purchase of the Panama concession and plant and agreement with Colombia. And thus the Panama Canal was built.

Yet the United States Senate on February 18, 1916, by a vote of 55 to 18, ratified the treaty with Nicaragua, which gave to us perpetual right of way along the San Juan River and Lake Nicaragua and naval bases in Fonseca Bay and at Corn Islands for 99 years, all this for the modest sum of $3,000,000 gold. By the Chamorro-Bryan treaty.

But the work of our so able minister of the fifties, Squier, and of our engineers like Menocal, is far from over. Nicaragua remains as potential as ever. World development calls more loudly for Nicaraguan facilities than previously. This, apart from economic reasons to be seen later. Nature has not changed its obvious physical advantages because of the Spanish war.

FRESH-WATER LAKES

Nicaragua has two great fresh-water lakes. Lake Nicaragua is 92 miles long by 34 wide with an area of 3,000 square miles, a depth at maximum of over 200 feet, a surface above sea level of about 110 feet, the largest fresh-water sheet between Lake Michigan and the South American Lake Titicaca. The continental divide is approximately 160 feet above sea level. Distance across the isthmus in a straight line is 156 miles. Connected by the Tipitapa River with Lake Nicaragua is Lake Managua, 32 miles long and 16 miles wide, with 512 square miles. From Lake Nicaragua flows the San Juan River, navigable 120 of its 140 miles. The distance from the lake to the principal mouth of the San Juan River is 95 miles with an average width of channel of 1,500 feet. A short-cut canal from Lake Nicaragua to Brito on the Pacific side and the canal from Atlantic to Pacific is complete. This would mean, say 100 miles of San Juan River navigation; 70 miles across Lake Nicaragua; and with the Las Lajas and Rio Grande Rivers, 17 miles to Brito, a total of 187 miles from coast to coast. This canal must be a lock canal, a sea-level canal not being feasible, as it could be at Panama.

Time for the construction was estimated at 10 years. Cost was set at $200,540,000. This would be $300,000,000 at present.

Why build the Nicaragua canal? Among other reasons because, while it was calculated that an average vessel could pass through the Panama Canal in 12 hours, but through the Nicaragua canal, by greater distance, 33 hours, yet the distance from New York to San Francisco through the Nicaragua canal would be 377 miles less than by Panama; from New Orleans to San Francisco, 579 miles less, and from Liverpool to San Francisco, 386 miles less. The profits in shortened route need no discussion, even allowing for extra time in canal transit and for increased maintenance of a longer canal route.

THE NICARAGUAN CANAL

Many reasons urge patriotic reconsideration of undeveloped opportunity in the matter of the Nicaraguan canal. Nicaragua has just honored the United States and one of our great international economists, Prof. Jeremiah W. Jenks, by asking him to take part in the revision of the banking laws of Nicaragua. His report to the President of Nicaragua, in which Ralph N. Elliott has collaborated, has just been presented. As part of the future are involved the possibilities of Nicaraguan national conditions to a great degree. By canal across the isthmus! With this would come railway and highway construction and port improvements.

Nicaragua itself must look outside for the financial force to start and continue these great possibilities which affect international conditions to a great degree. By the plans of Professor Jenks much can be done in short time and at comparatively small cost. Reviving past engineering and improving it by present feasibilities these international factors could be and should be set at work. The United States Government, as Professor Jenks points out, must be sounded as to its continued or revivable interest. Shipping companies should equally become interested in the economic factors for them. Nicaragua and Costa Rica by concessions can help their own interests. The Governments of the United States, Costa Rica, and Nicaragua could cooperate, with settlement of mutual rights. Nicaragua could have the port dues and divide these with Costa Rica.

SAN JUAN RIVER

Professor Jenks has also proposed the improvement of the San Juan River. Such improvement would include a port development, to cost $2,000,000, at San Juan del Norte, on the Atlantic coast; draft for 20-foot ocean-going ships (there is a dangerous bar at the Caribbean shore). Our Government, should it ultimately decide upon canal construction, would find two years saved, as these port developments would amply carry on initial canal construction and give communication through the San Juan improvement as well, the Government then taking over the work of the private company that might initiate it.

The river, with the Colorado, whose main mouth belongs to Costa Rica, forms an extremely fertile delta—probably the best banana country in the world. By proper wing dams, the estuaries could be made available for vessels of the "lighter" or the Mississippi River type. Bananas could thus be delivered at 15 to 20 cents less a bunch than off the Atlantic Rio Grande. Clearing of the silt would cost another $2,000,000. Development of the upper San Juan River, with wing dams, control of the rapids and shallows, dredging, and channel for a draft of 5 feet, would cost $1,000,000.

From Granada at the head of Lake Nicaragua to San Juan del Norte (the former Greytown) $5,000,000 would develop, with only one transshipment, the distribution of the products of an extraordinary country. And it would take this small sum—five millions—and only three or four years of time to do a great work and one which would prepare admirably for the future construction of a possible interoceanic canal.

PART II

There are a few striking scenes in all-American history when the man of the west from Europe met the man of the Asian East in the still farther west for friendly pow-wow to have enormous consequences. There is Peter Minuit purchasing for $24 Manhattan Island. There is William Penn under the tree, ratifying treaty and trade with his Indian admirers. And there is Gil Gonzalez de Avila or Davila exploring in 1522, on his trip started in Panama in 1519, the country discovered by Columbus on his fourth and last voyage when he landed December 12, 1502, on the cape which he christened Gracias á Dios—thanks to God—to this day, Davila, received in most friendly fashion by Nicarao or Nicaras or Nicaragua, a powerful chief of the Cholutec tribe, who was baptized into the Roman Catholic Church with his followers, and who gave his name, whether or not be included in it the Spanish word agua, water, to the country of international importance known as Nicaragua.

ECONOMIC NICARAGUA

Economic potential in Nicaragua lies in its exportable values of coffee, sugar, and cacao and its transfer from domestic production to world quantity of its corn production. Corn now means meat. Meat is cattle. Were Nicaragua to develop its corn possibility it would rival our Mississippi Valley as a world corn producer, which, says our Government through the Pan American Union, would result in making "Nicaragua one of the richest agricultural sections in the world." But cattle mean varied by-products. Nicaragua can become a world distributor in these respects. As cattle for export purposes demands steady supply, scientific care, and feeding, there must be "tame" pasture and grain feeding, in other terms, alfalfa and corn. Nicaragua is one of the great natural opportunities, and with low-priced public lands, for cattle raising.

So for sugar. So for cacao. The World War gave permanent and tremendous impetus to the use and the appreciation, especially by the United States, of the dietetic value of chocolate. What man who went

"over there" will ever forget what chocolate and cacao meant! The Tropics have a natural monopoly of cacao production and Nicaragua is a cacao country by physical birthright.

So, again, for ever-growing world demand for bananas. So for coconuts, well called, with the date palm of the East, "one of the two most valuable food trees known to man." So for coffee, representing, for some years past, about one-third the value of Nicaraguan exports. So for cabinet woods, not merely a matter of furniture, but, with airplane development to sweep the skies and the commercial world, the use of mahogany and other woods.

And in addition to corn, cane, cacao, coffee, cabinet woods, many other products and mining. Nicaragua is a country of gold and silver. Of much gold.

CAPITAL AND CANAL

Here, then, is opportunity for the United States. Nicaragua needs money, modern methods, machinery, and men. It is perfectly true that other countries need these also. But other countries do not have the possibility of such an isthmian canal which alone would entail the development of vast resources lying latent.

Question of such a canal, however, must face greatest opposition. What are the main factors in such opposition? The Panama Canal, the railroads of the United States, and perhaps the power of finance. Accepting, as was shown in a previous article, the fact that physical configuration sets a premium upon engineering development of the Nicaraguan canal and that successive generations of United States Government surveys and commissions have emphasized the superiorities of that trade route for a canal, what other obstacles are in the path of proceeding to construction of the Nicaraguan canal?

We have, first, the status of the Panama Canal. If the Panama Canal does not pay and the United States Government, besides the necessary military and naval expenditures thereat, which can not justly be charged to the canal, must provide interest on the bonds of the canal and the vast upkeep, the United States taxpayer must be responsible in taxes for financing the deficit.

But what sane man will question the value of even such a deficit in view of the enormous insurance of speed, of safety, and of commercial possibilities opened to us by construction and control of the Panama Canal? Our Latin-American trade growth because of the canal has already amply repaid our effort for patriotic advantages and for world commercial benefits.

But besides these reasons there is the future. The Panama Canal will some day—not physically but commercially—overflow its banks and prove unable to handle the world trade desiring to pass through it. Then, what? One may multiply locks—and there is always the possibility at enormous expense of a sea-level canal at Panama, as it should be, but the water will be lacking to fill the locks. Let us face the truth and at once.

RAILROAD FEELING

Secondly, there is railroad opposition to be considered. We know the story of the sufferings of the railroads: Ignorant hostile legislation; provincial and picayune pursuit by demagogic politicians; lack of economic conceptions dictating policies antagonistic to the railroads; labor maladjustments; Government war controls and their sequences; disorganized relations of various kinds; vast increase of expenses under every head of charges—and Panama competition. Who could blame the railroads for not desiring additional competitive canal action in a new canal?

Yet the railroads are pushing out to meet a canal, whether they wish it or not. The Southern Pacific Railroad has only 30 miles to go of its great 100-mile link, which will give access of over 1,000 miles, with the National Railways of Mexico, from Los Angeles to Mexico City, a superb span that will bind our wide agricultural Northwest, and, in fact, the whole country, with the renewed development, after revolution, of magnificent Mexico, a construction project well termed by Julius Kruttschnitt: "An epochal event in the relations between this country and its southern neighbors."

What is more, the Government of Mexico, in lately renewing the charter of this extension, authorized the Southern Pacific to construct its own lines through to Mexico City. As, under liberal Mexican law, any operating railroad is entitled to demand the joint use of connecting roads for through traffic, the Southern Pacific for the present will take advantage of this opportunity. Next year will see the opening of the road after an engineering feat of about 15 miles of boring through mountain spurs and table-lands, qualified as "terrifically difficult," and will make practical a broad international and patriotic conception.

So the Missouri Pacific Railway, competing for Mexican trade, goes down through San Antonio and Laredo into an already great business. It is the "Dream of Harriman" and the "Goal of the Goulds" for a transcontinental railroad, turned into an international and an intercontinental railroad.

And when the intercontinental railroad is put through from New York to Buenos Aires the National Railway of Nicaragua will furnish its share of mileage by its route from Corinto to Granada.

VOLCANOES

A further reason advanced against the Nicaragua Canal is the volcanic character of the western section of the country. History has recorded there some tremendous eruptions. One can but admire Nicaragua for setting upon the seal of its country a line of volcanoes of which it need not be ashamed, dominated by the fiery cap of liberty for which the country so long strove. Answer is found in the reports of our Government which did not hesitate to choose Nicaragua for a canal route, volcanoes or not.

COMMUNICATIONS

Nicaraguan development has been hampered by lack of means of communication. Until a few years ago almost literally east was east and west was west and little the twain did meet. For any one from Colon in Panama or Port Limon in Costa Rica to reach Bluefields (named after Blieveldt, the Dutch corsair), it was necessary to travel 1,300–1,400 miles to New Orleans and then to return over the Gulf of Mexico and the Caribbean Sea—five or six days each way—to cover a distance of 275 or 125 miles. Roads were few and in rainy season practically impassable. To add to complications, there was one tariff for the east and another for the west coast, with the discord that this produced.

With a population of less than 700,000, seven-eighths of it Indian in origin and with, therefore, the contributory stability of the Indian, one-third distributed in the cities and two-thirds rural and some 80 per cent in the western part of the country; with a Caribbean coast line of about 300 miles and a Pacific coast of 200 miles; the Nicaraguan frontier with Honduras extending for 300 miles and with Costa Rica for 125 miles, there are only about 600 miles of highways, supplemented by quite extensive river and lake transportation.

The National Railroad of Nicaragua, the Pacific Railway, owned by the Government, runs from Corinto on the Pacific to several cities of the western portion of Nicaragua. It was built in sections, from 1878 to 1903, and has a mileage of 157 miles. Built and operated until 1905 by the Government, then leased to a private syndicate which returned it in 1909; in March, 1912, Messrs. Brown Bros. & Co. and Messrs. J. & W. Seligman & Co. formed the Ferrocarril del Pacifico de Nicaragua, and in October, 1913, purchased for $1,500,000, 51 per cent of the stock and control, the J. G. White Management Corporation being appointed operating manager. In February, 1916, a concession was taken for a line of 22 miles from San Juan del Sur, on the Pacific, to San Jorge, on Lake Nicaragua.

By contract of October 5, 1920, the Republic repurchased the 51 per cent of stock sold, paying the bankers $300,000 in cash and $1,450,000 in Nicaraguan Government treasury notes. At present a contract calling for the creation of a committee of five for the construction and operation of a line to the Atlantic survives but is in abeyance. This road would be 200 miles in length.

A 48-mile railroad, the Wawa Railroad Co., but of 75 miles planned, belonging to the Wawa Commercial Co. and to some mahogany companies, is now owned and operated for 9 miles as a logging railroad by Mr. Fransen, a Belgian. This is on the Atlantic coast. For handling bananas the Cuyamel Fruit Co. since 1921 built a railroad of 8 miles, with 4 miles of spurs. The Bragman's Bluff Lumber Co. in 1923 purchased from the Government 20,000 hectares of public lands at $2 a hectare, with concession for full port developments and railroad for some 40 miles back from the northeastern Atlantic coast. Some 21 miles are now ready. The Nicaraguan Sugar Estates Railroad has built 6 miles of main and 7 of narrow cane-field track to connect with the Pacific Railway in the northwest. To Mr. Prestinary, representing Mr. Keilhauer, has been granted a 99-year concession, with large lands and other advantages, for a road curving from Bragmans Bluff to practically the Honduran frontier, some 110 miles.

A road is projected from San Miguelito, at the eastern end of Lake Nicaragua, 117 miles, to Monkey Point, on the Atlantic. Connection by Lake Nicaragua for 90 miles of water travel will reach Granada, at the western end, the inland terminus of the Pacific Railway.

Finally, a contract was signed in 1920 giving to Rene Keilhauer the contract for construction of a railroad from the Gulf of Fonseca to Chinandega, there to connect with the Pacific Railway. In addition, was granted the right to build a branch north to the Honduran frontier. This would be a link in the Pan American Railway.

There are also some miles of private steam tramways on the west side of Lake Nicaragua.

The Caribbean coast has three harbors: Cape Gracias à Dios, Bluefields, and Greytown (San Juan del Norte). On the Pacific side are the Gulf of Fonseca, Corinto, Brito, and San Juan del Sur. The Bay of Fonseca in extent and in safety has no superior on the Pacific Ocean. With a breadth of 50 miles by a width of 30 miles, with an entrance 18 miles across, with four channels between islands, each deep enough for the largest vessels, a channel extends from its southern point for 50 miles, reaching to about 20 miles from Lake Managua.

With access by the Panama Railroad Steamship Line and the United Fruit Co. through Colon (Cristobal) and Panama City (Balboa) to Pacific Mail Steamship Co. sailing to San Juan del Sur and Corinto;

with similar connections by Dollar Line, Grace Line, Panama Pacific Line, or other steamers at the same Panama port; with vessels of the Pacific Mail Steamship Co. sailing from San Francisco to the same ports of Nicaragua; with the Southern Pacific Steamship Co. (Morgan Line) from New York connecting at New Orleans with steamers of the New Orleans and Bluefields Fruit & Steamship Co., and of the Cuyamel Fruit Co. sailing to Bluefields and Cape Gracias; and with the Pacific Steam Navigation Co. having service from Cristobal to all Central American ports, reaching Nicaragua is facile.

The Government of Nicaragua has developed a wireless system. The United Fruit Radio Co. reaches Managua, the capital, Bluefields, and Cape Gracias à Dios, working with the Western Union Co., its line from New Orleans to Managua taking but one hour, and is well placed for expansion. The All America Cables Co. through double cables to San Juan del Sur covers Nicaraguan connections. Linking of all these activities and completion of outlined plans will mean the development of the great economic power of Nicaragua.

FINANCE

The financial history of Nicaragua touches closely the United States. Whatever exigencies or struggles may have occurred in the finances of Nicaragua in the past, the recent record is remarkable. Nicaragua has the gold standard. On March 20, 1912, it passed an act effective March 24, 1913, under which the gold córdoba—after Hernán de Córdoba, who circumnavigated Lake Nicaragua and in 1524 founded Granada there—of equal weight and fineness with the gold dollar of the United States, is the unit of value. The national bank issues notes which, with all coin, are maintained at par with gold.

New York bankers made recuperation of Nicaragua possible. It was part of that United States and world patriotism which has so helped our moral and pecuniary position of leadership. In 1911 Nicaragua was in arrears on the interest and the sinking charges of its foreign debt. New York adjusted differences between London and Nicaragua, provided for overdue interest and for the payment of 1911 treasury bills and brought about reduction of debt interest rate. There were claims against Nicaragua for $18,000,000. Of these a mixed claims commission in three and a half years eliminated nine-tenths, making $1,800,000 of them to be paid. A national bank owned by the Government and the New York bankers was founded. This was followed in 1915 by affiliation between this bank and the Mercantile Bank of the Americas in New York, and increase of capital.

In September, 1924, the Nicaraguan Government purchased 51 per cent of the stock of the National Bank of Nicaragua, which was owned by the Bank of Central & South America, so that both the national railway and the national bank are at present owned in full by the Nicaraguan Government.

In 1911 Nicaragua had been disappointed in its hope of procuring from the United States a loan of $15,000,000 because the United States Senate had failed to ratify at that time the treaty pending. When, however, this country in 1916 paid the $3,000,000 gold for naval bases in Nicaragua and perpetual canal rights, $1,100,000 of this sum was applied to the interest and the principal of the Nicaraguan foreign debt. Proceeds of a bond sale of $3,800,000 were added to $1,400,000 remaining and were applied to reorganization of the internal debt. Since, in 1911, fifty millions of dollars in irredeemable paper pesos had been converted at 20 pesos to the gold dollar, into córdobas; and since 97 per cent of the creditors had accepted the award of the commission of public credit in the reorganization of the internal debt, the United States bankers had done a wonderful work, led by Messrs. Brown Brothers & Co. and Messrs. J. and W. Seligman & Co. and with collaboration of such banks as the Shawmut National Bank of Boston, Mass., the Hibernia Bank of New Orleans and San Francisco, and other representative institutions.

Whatever changes have occurred in connection with ceasing or continued control (Mercantile Bank of the Americas, Central and South American Bank, Royal Bank of Canada, Guaranty Trust Co.) and with private banking houses as above not at present interested further in the matter, United States banking established a record of amity and of action that will remain in financial history and in political friendship.

Let it pass into history that United States and Nicaragua cooperation performed this miracle during the World War; kept Nicaragua on a gold basis during that whole period, a record of which no other nation can boast in similar fashion; and operated the railroads of Nicaragua with its trade crushed by war conditions.

WHY NICARAGUA?

Of that trade, whether import or export, the United States has about 75 per cent. For Nicaragua has practically no manufactures. There is a moral aspect to such a condition on a basis of mutual relation and friendly appreciation. It is no slight indication of Nicaraguan sentiment that, apart from its religious holidays, Independence Day of the United States, July 4, is the first holiday celebrated annually in Nicaragua and one of the six national or international ones of the whole year.

Long since has the remembrance of the marvelous episode of Byron Cole and his American Phalanx of May, 1855, been forgotten. Nicaragua understands fully the extraordinary anabasis of William Walker and his filibusters. Walker, university man, lawyer, physician, journalist—partly by adventure and partly by attempt to help the slaveholders of the United States and to add new slave States to the Union, increasing his 56 men to 3,000, capturing Granada, organizing a government recognized in 1856 by President Pierce, receiving the sympathetic resolutions of the Democratic National Convention, elected President of Nicaragua by 15,835 votes out of 23,236, repealing the antislavery constitutional provision, fighting all the other Central American States in their coalition financed by Cornelius Vanderbilt, and, after many other vicissitudes, taken prisoner by the British, surrendered by them in 1860 to Honduras and shot.

But Nicaragua has not forgotten the long friendly offices of the United States; our constant opposition to Great Britain in the matter of the unjustly named Mosquito Coast—not so called because of its mosquito population (Spanish, mosquito, a gnat, the diminutive of mosca, a fly), but from its inhabitants, the Misskito Indians, living in that section of Nicaragua called by the English in 1665, "Mahomet's Paradise." We almost fought Great Britain about it in 1848. Our diplomacy helped its final transfer to Nicaragua in 1894. When in the eighties Colombia prepared seizure of Nicaraguan territory, President Cleveland, to prevent hostilities, despatched naval representation. In boundary decision between Nicaragua and Costa Rica the President of the United States was the arbitrator. And so on. Long and interesting are the bibliography and the diplomatic archives of our relations with Nicaragua.

Under President Carlos Solorzano, upright ruler, cultivated man and successful business executive, Nicaragua is headed for prosperity. But advance demands capital. The United States can supply this and assure itself of rich reward. Irrespective of Pacific Ocean political conditions, whether or not we see in these, warnings to be heeded, the Nicaragua canal, which means the development of Nicaragua, presses for construction. It represents coming commercial necessity; engineering insurance; expansion of our trade facilities. And even more than these, cementing of Latin and North American economic and, therefore, political friendships. (Reprinted from May 23 and 30 issues of The National Financial News, 1925.)

SENATE AND COURTS

Mr. COPELAND. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the New York Times of April 22, 1928, entitled "Senate and courts."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SENATE AND COURTS

We have already spoken our mind about the bill which recently passed the Senate to limit the power of Federal judges in the conduct of a trial. It would take from them the right to make even a remark in court about the character and credibility of witnesses or the nature of the evidence. This bill was adopted by the Senate without a record vote and almost without discussion. It has not yet been reported in the House, and it is much to be hoped that it never will be. With the country anxious to see criminal procedure expedited, there can be little general sympathy with a measure certain to result in delay and confusion. Just now everybody is praising the course of Judge Bailey in driving ahead with the Sinclair trial. It is that kind of speedy and efficient justice which the Senate bill would make still rarer than it is.

Not content with this attempted interference with the Federal judiciary, the Senate has before it two other bills which, whatever their motive, can be only mischievous in their effect if they become law. One of them is Senator SHIPSTEAD'S bill to amend the Judicial Code by defining and limiting the jurisdiction of courts sitting in equity. It really aims at the issue of writs of injunction. Such writs are for the protection of property, but the bill proposes that "nothing shall be held to be property unless it is tangible and transferable." Doubtless the aim is to restrict the use of injunction in labor troubles. But the proposal would take from Federal courts the right to issue injunctions in a great range of cases where it appears to be the only adequate remedy at law. It would, for example, make impossible the main resort which persons now have who are threatened with injury by the violation of patent rights, of copyright, and also by infringement of the laws relating to improper use of trade-marks, unfair competition, etc. Even more important matters affecting personal rights, guaranteed by the Constitution, would be removed from the jurisdiction of an equity court, at least in the sense that no temporary injunction could be issued to protect a threatened person.

Still more objectionable is the pending Senate bill to amend the Judicial Code by taking from the Federal courts jurisdiction in a large class of cases which have for years been tried before them. These relate to suits between citizens of the same State with claims under grants by different States, also to suits between citizens of different States, or between citizens of a State and foreign States, citizens or subjects. Competent lawyers who have looked into this proposal by Senator NORRIS regard it as destructive of some of the chief and established features of the Federal jurisprudence. It is no secret, since the

fact was stated in the Senate by Mr. COPELAND, of New York, that the Chief Justice of the Supreme Court regards some of the features of this bill as most undesirable and harmful. A similar verdict has been reached by the leading members of the bar all over the country. Yet the Senate Judiciary Committee did not even hold a hearing on this radical proposal to alter the Federal judicial system. Senator NORRIS explained that he thought no hearings were necessary. He declared that the bill was "purely a question of practice that the lawyers on the Judiciary Committee understand as well as other attorneys." With all due respect, it may be submitted that anyone who reads the list of the Senators who now compose the Judiciary Committee will note a sad falling off from the time when eminent lawyers like Edmunds and Thurman, to mention no more, were its ornament and protection.

Passing all this, the puzzling question is why the Senate, especially the lawyers in the Senate, should seem to countenance this whole series of attacks on the Federal courts. Doubtless some Senators cherish grievances. They may have resented suits that might be called collusive which have been brought in the Federal court. They probably object to certain Federal receiverships which have had unpleasant features. But even if there have been occasional abuses in Federal procedure, that is no reason for cutting so deeply and rashly into court methods and a body of jurisprudence that have commended themselves for years to the people of this country as a whole. The bills mentioned should never in their present form be allowed to pass the Senate. If, unhappily, they do, they ought to be stopped in the House. Failing that, they would surely be found ripe and ready for a presidential veto.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and (at 5 o'clock and 35 minutes p. m.) the Senate took a recess until to-morrow, Tuesday, April 24, 1928, at 12 o'clock meridian.

## NOMINATIONS

*Executive nominations received by the Senate April 23 (legislative day of April 20), 1928*

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY

FIELD ARTILLERY

Capt. Frank Henry Hollingsworth, Infantry, with rank from July 1, 1920.

AIR CORPS

Second Lieut. Edward Fearon Booth, Infantry (detailed in Air Corps), with rank from June 12, 1924.

Second Lieut. Robert Wells Harper, Infantry (detailed in Air Corps), with rank from June 12, 1924.

PROMOTIONS IN THE REGULAR ARMY

*To be colonels*

Lieut. Col. Frederick Sion Young, Infantry, from April 15, 1928.

Lieut. Col. Thomas Samuel Moorman, Infantry, from April 17, 1928.

*To be lieutenant colonels*

Maj. Philip Henry Worcester, Coast Artillery Corps, from April 15, 1928.

Maj. George Veazy Strong, Infantry, from April 17, 1928.

*To be majors*

Capt. Sereno Elmer Brett, Infantry, from April 15, 1928.

Capt. William Dennison Alexander, Field Artillery, from April 17, 1928.

*To be captains*

First Lieut. Timothy Sapia-Bosch, Infantry, from April 15, 1928.

First Lieut. Edward Garrett Cowen, Coast Artillery Corps, from April 17, 1928.

*To be first lieutenants*

Second Lieut. Ralph Christian Bing, Infantry, from April 15, 1928.

Second Lieut. Clinton John Harrold, Cavalry, from April 17, 1928.

REAPPOINTMENT IN THE OFFICERS' RESERVE CORPS OF THE ARMY

GENERAL OFFICER

Brig. Gen. James Sumner Jones, Adjutant General's Department Reserve, to be brigadier general, Adjutant General's Department Reserve, from July 17, 1928.

PROMOTIONS IN THE NAVY

MARINE CORPS

Capt. Hal N. Potter to be a captain in the Marine Corps from the 16th day of June, 1926, to correct the date from which he takes rank as previously nominated and confirmed.

Capt. Oliver T. Francis to be a captain in the Marine Corps from the 22d day of June 1926, to correct the date from which he takes rank as previously nominated and confirmed.

Capt. Edward A. Fellowes to be a captain in the Marine Corps from the 27th day of June, 1926, to correct the date from which he takes rank as previously nominated and confirmed.

Capt. Robert C. Kilmartin, jr., to be a captain in the Marine Corps from the 5th day of July, 1926, to correct the date from which he takes rank as previously nominated and confirmed.

Capt. Edward A. Craig to be a captain in the Marine Corps from the 11th day of July, 1926, to correct the date from which he takes rank as previously nominated and confirmed.

First Lieut. Lester A. Dessez to be a captain in the Marine Corps from the 31st day of March, 1928.

Second Lieut. Shelton C. Zern to be a first lieutenant in the Marine Corps from the 12th day of March, 1928.

Second Lieut. John E. Curry to be a first lieutenant in the Marine Corps from the 16th day of March, 1928.

Second Lieut. Richard M. Cutts, jr., to be a first lieutenant in the Marine Corps from the 25th day of March, 1928.

Second Lieut. Frank D. Weir to be a first lieutenant in the Marine Corps from the 31st day of March, 1928.

## CONFIRMATIONS

*Executive nominations confirmed by the Senate April 23 (legislative day of April 20), 1928*

UNITED STATES COAST GUARD

John W. Malen to be temporary ensign.

APPOINTMENTS, BY TRANSFER, IN THE ARMY

John Merle Weir to be captain, Judge Advocate General's Department.

Samuel Adrian Dickson to be second lieutenant, Field Artillery.

William Ignatius Brady to be first lieutenant, Coast Artillery Corps.

Richard Howell Dean to be second lieutenant, Air Corps.

APPOINTMENTS, BY PROMOTION, IN THE ARMY

*To be colonel*

William Russell Standiford.

*To be lieutenant colonel*

Jay Leland Benedict.

*To be majors*

Emil Watson Leard.
Terrill Eyre Price.
Walter Frank Adams.
William Henry Kasten.

*To be captains*

James Emerson Troupe.
Ward Edwin Becker.
William Wayne Murphey.
Earl Hendry.

*To be first lieutenants*

Leslie Martin Grener.
Joseph Smith.
Kenneth Shearer Sweany.
Joseph Harold Hicks.
Guy Haines Stubbs.

*To be colonel, Dental Corps*

Julien Rex Bernheim.

*To be chaplain with the rank of lieutenant colonel*

Walter Kenyon Lloyd.

POSTMASTERS

ALABAMA

Lansing T. Smith, Anniston.
Dyer B. Crow, Collinsville.
Zula L. Persons, Prichard.
Walter Morgan, Woodward.

ARKANSAS

Lasco A. Callis, Bradford.
Charles N. Ruffin, De Witt.
James D. Lowrie, Elaine.
Julius L. Stephenson, Everton.
Ora L. Jones, Fouke.
John E. Bittinger, Grady.
Eustace A. Davis, Hatfield.
Charlotte A. Proctor, Hazen.
Bessie Bevill, Kensett.
Ralph F. Locke, Lockesburg.

William E. Hill, Norphlet.
William E. Edwards, Rison.
Warren P. Downing, Weiner.
Wilber B. Huchel, Winthrop.

FLORIDA

Alonzo A. McGonegal, Yalaha.

IDAHO

Austin A. Lambert, Hailey.

ILLINOIS

Fred W. Newman, Grand Ridge.
Rose C. Auth, Rankin.
John Van Antwerp, Sparland.

MINNESOTA

Roy A. Smith, Beardsley.
Olaf T. Mork, Madison.
John A. Hilden, Oslo.
Albert J. Anderson, Spicer.
James M. Patterson, West Concord.

NEW YORK

Ward A. Jones, Canajoharie.
Glenn D. Clark, Prattsburg.

NORTH CAROLINA

Christopher C. Snead, Laurel Hill.

NORTH DAKOTA

Marie Siverts, Dodge.
James H. McNicol, Grand Forks.
Thomas G. Kellington, New Rockford.
Gilbert A. Moe, Sheyenne.
Agnes L. Peterson, Washburn.
Andrew M. Hewson, Wimbledon.

PENNSYLVANIA

Harry A. Miller, Rockwood.

WASHINGTON

J. Kirk Carr, Sequim.

WEST VIRGINIA

Michael H. Duncan, Crumpler.
George H. Spencer, Rivesville.

WISCONSIN

Fred D. Wood, Glenhaven.
Elvin E. Strand, Strum.
Herman C. Gralow, Woodville.

WYOMING

Phyllis C. Dodds, Cumberland.
Edna M. Booth, Sunrise.

## HOUSE OF REPRESENTATIVES

### MONDAY, *April 23, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, as we pause and meditate the seriousness and the joy of life are revealed. Oh, what is man in the presence of such infinite majesty? We thank Thee that he is souldestined to live through the eternities, for surely the kingdom of God is within him. We praise Thee for the immortal symphonies which invite us on; for the springtime of hope, which blesses us with the reflection of the unknown world. O Thy love and mercy surround us as we face the nightless dawn! For the memories that make life sweet and for the gentle compulsion that lures us onward we bless Thee. Inspire us this day with a high sense of duty and with a very certain, directive wisdom. In all things help us to work worthily of our origin, calling, and destiny. In the blessed name of Jesus. Amen.

The Journal of the proceedings of Saturday, April 21, 1928, was read and approved.

#### CALL OF THE HOUSE

Mr. LaGUARDIA. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present. Evidently there is no quorum present.

Mr. TILSON. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 69]

| | | | |
|---|---|---|---|
| Andrew | Deal | Kearns | Robsion, Ky. |
| Anthony | Dempsey | Kelly | Rowbottom |
| Beck, Pa. | Douglas, Ariz. | Kendall | Rubey |
| Beedy | Doutrich | Kent | Sears, Fla. |
| Beers | Drane | Kiess | Shreve |
| Begg | Drewry | Kunz | Sirovich |
| Bell | Englebright | Kurtz | Smith |
| Blanton | Estep | Larsen | Somers, N. Y. |
| Boies | Fisher | Leech | Sproul, Kans. |
| Bowles | Fitzgerald, Roy G. | McDuffie | Stobbs |
| Britten | Fitzpatrick | McFadden | Strong, Pa. |
| Burdick | Fort | Magrady | Strother |
| Bushong | Gambrill | Manlove | Sullivan |
| Butler | Glynn | Mead | Sumners, Tex. |
| Campbell | Golder | Menges | Thompson |
| Carew | Goldsborough | Merritt | Thurston |
| Carley | Graham | Monast | Tillman |
| Casey | Griffin | Montague | Tinkham |
| Celler | Harrison | Moore, Ohio | Treadway |
| Chase | Haugen | Morgan | Updike |
| Clarke | Hope | Morin | Vestal |
| Cochran, Pa. | Hudspeth | Newton | Watson |
| Connally, Tex. | Hughes | Norton, N. J. | Weller |
| Cooper, Ohio | Hull, Tenn. | O'Connor, N. Y. | Welsh, Pa. |
| Crail | James | Oldfield | White, Kans. |
| Cullen | Jenkins | Palmer | Wyant |
| Curry | Johnson, Okla. | Palmisano | Yates |
| Dallinger | Johnson, S. Dak. | Quayle, N. Y. | |
| Darrow | Kading | Ransley | |
| Davey | Kahn | Reed, N. Y. | |

The SPEAKER. Three hundred and thirteen Members are present; a quorum.

Mr. TILSON. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

#### SETTLEMENT OF AUSTRIAN INDEBTEDNESS

Mr. HAWLEY, chairman of the Committee on Ways and Means, by direction of that committee, presented a privileged report on House Joint Resolution 247, to authorize the Secretary of the Treasury to cooperate with the other relief creditor governments in making it possible for Austria to float a loan in order to obtain funds for the furtherance of its reconstruction program and to conclude an agreement for the settlement of the indebtedness of Austria to the United States, which was referred to the Committee of the Whole House on the state of the Union and ordered printed.

#### ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 8835. An act to amend section 98 of the Judicial Code, as amended, to provide for terms of court at Bryson City, N. C.;

H. R. 10437. An act granting double pension in all cases to widows and dependents when an officer or enlisted man of the Navy dies from an injury in line of duty as the result of a submarine accident;

H. R. 11404. An act authorizing the Port Huron, Sarnia, Point Edward International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Clair River at or near Port Huron, Mich.; and

H. R. 12441. An act to amend section 2 of an act entitled "An act in reference to writs of error," approved January 31, 1928, Public, No. 10, Seventieth Congress.

The SPEAKER also announced his signature to enrolled bills of the Senate of the following titles:

S. 1736. An act for the relief of Charles Caudwell;

S. 1738. An act for the validation of the acquisition of Canadian properties by the War Department, and for the relief of certain disbursing officers for payments made thereon;

S. 1758. An act for the relief of Fred A. Knauf; and

S. 1771. An act for the relief of Peter S. Kelly.

#### MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, its principal clerk, announced that the Senate had passed a bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 4166. An act to remit estate tax on the estate of John Sealy.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the bill (S. 1181) entitled "An act authorizing an appropriation to be expended under the provisions of section 7 of the act of March 1, 1911, entitled 'An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers,' as amended."

ORDER OF BUSINESS

Mr. LAGUARDIA. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LAGUARDIA. Mr. Speaker, this being the fourth Monday of the month, I desire to inquire whether, under section 876 of the rules of the House, the Committee on the District of Columbia is not entitled to the day as a matter of course?

The SPEAKER. The Chair thinks not. It is merely in order to call up District business.

Mr. LAGUARDIA. Of course, if the chairman of the Committee on the District of Columbia should call up any bills to-day, he is entitled to consideration of his bills, is he not?

The SPEAKER. He would have exactly the same right theoretically that the gentleman from Illinois would have if he desires to call up the flood control bill. It would be in the discretion of the Chair which he would recognize.

Mr. LAGUARDIA. I understand there are several bills pending before the Committee on the District of Columbia which have been reported, and I simply want to point out that the District Committee has its opportunity to-day so that later on they may be estopped from complaining that they have not had their day in court.

FLOOD CONTROL

Mr. REID of Illinois. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes.

The question was taken; and on a division (demanded by Mr. MADDEN) there were—ayes 151, noes 40.

So the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3740, with Mr. LEHLBACH in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of S. 3740, which the Clerk will report by title.

The Clerk read the title of the bill.

Mr. FREAR. Mr. Chairman, I believe I am entitled to recognition.

The CHAIRMAN. The gentleman has 20 minutes remaining.

Mr. FREAR. Mr. Chairman, it has been suggested that I yield a part of my 20 minutes to the distinguished chairman of the Committee on Flood Control. I do not expect to occupy all of my time, but I ask unanimous consent that the gentleman from Illinois be given five minutes after I have concluded, he being entitled to that time by all the rules of the game.

The CHAIRMAN. Does the gentleman mean that he yields five minutes to the gentleman from Illinois out of his time?

Mr. FREAR. No; unless necessary. I ask unanimous consent that after the conclusion of my remarks five minutes be given to the chairman of the Flood Control Committee.

The CHAIRMAN. The gentleman from Wisconsin, under the unanimous-consent agreement made in the House itself, that general debate may be prolonged in committee, asks unanimous consent that the gentleman from Illinois [Mr. REID], chairman of the Committee on Flood Control, be given five minutes. Is there objection?

There was no objection.

Mr. FREAR. Mr. Chairman, I have never halted in a fight because of lack of support and will not do so now, but after allotting time on the request of several Members who did not later claim it, I pause to express regrets because of noticeable absence in debate of those who ordinarily carry the flag.

The President has made a great effort to protect the Government from this $1,000,000,000 drive on the Treasury, made under a sympathetic plea of flood control. He ought to have the active support of every Member, including leaders and laymen, in his effort to secure a good bill. Support here, as well as elsewhere, is now important.

Committee members opposed to the bill appreciate that I have repeatedly urged others to take the leadership against it. My action is at their request and not from any desire of my own. Pursuant to their request, facts have been presented affecting the bill.

Chairman REID, who, like myself, appeared to be sidetracked during negotiations, now seems to have rounded up his battalion. I congratulate him, but trust he will not be permitted to enact the Senate bill into law unless that bill is materially amended by the House. If we desire to make flood relief certain, then a bill should be passed that merits Executive support and can be fairly defended.

Others of the committee who, like myself, have registered their disapproval of the bill are not responsible for this brief expression, because all of them have been loyal in their support. When the record is made it is certain they will have nothing to regret. Later on I may desire to offer a few amendments which, if accepted, I believe will improve the bill.

Now, Mr. Chairman, I am briefly going to try to point out, as best I can, the distinction between the offer that was made in the negotiations and the Jones bill as it was reported to the House.

Before reading of the bill I will use my remaining time to repeat that the Jones Senate flood control bill before us is objectionable because it provides, first, for a political commission, that will ultimately be asked under another bill to take over local levee obligations. Second, it requires the Government to pay $71,000,000 for damages to railways that ask to be protected from floods, in addition to other unlimited damages; and third, it requires the Government to buy everything, including land for levees for protection of life and property, without any local contribution.

Failure of negotiations in flood-control legislation now presents the Senate bill for amendment. This bill passed the Senate practically without any consideration. It appropriates $325,000,000, or only about one-third of the amount required to construct flood-control works under its provisions.

ACTUAL COST OF THE FLOOD CONTROL BILL

The Army Engineers' office estimates the cost at upward of $1,000,000,000, of which possibly $300,000,000 is for flood-way lands—all to be borne by the Federal Government under the terms of the bill. E. E. Blake furnished the President, the press, and Congress with an estimate of possibly $1,800,000,000 cost for the project, of which one item consists of 6,047,000 acres for flood ways to cost $674,000,000. For a number of years Blake has been chairman of a flood-control interstate commission composed of 27 members representing Alabama, Louisiana, Mississippi, Arkansas, Texas, Oklahoma, and other States (p. 335, hearings).

His estimate of flowage damage to be paid by the Government is over 100 per cent that of the Army engineers and the Mississippi River Commission estimate far exceeds amounts quoted on scattered tracts, placed in the record by the gentleman from Louisiana. Estimates of $150 per acre and $75 per acre by witnesses also indicate the character of demands to be made on the Government if it buys flood-way lands or easements. It should be kept in mind that 77 per cent of all lands in the proposed flood ways are owned by 1,000 corporations and large landowners named in the RECORD of April 4. If this evidence is trustworthy, no wilder assault on the Federal Treasury could be predicted. It is only paralleled in character by that feature of the Senate bill which gives to railways $71,000,000 for future alleged damages.

In an effort to secure a compromise agreement, a proposal was submitted to the committee that eliminated some of the worst provisions of the Jones bill. That substitute bill it was believed would meet objections voiced repeatedly by the President in an effort to stop any proposed Treasury raid.

The bill so submitted proposed that the Government would undertake to construct flood-control works along the lines of the Jadwin plan, and that the Government would pay all damages that might accrue through floods under general liabilities fixed by the Constitution.

That means presumably where floods occur possibly on an average once in a decade, those having property largely of cut-over lands in the 4,000,000-acre flood ways will be paid whatever damages may properly be laid against the Government whenever caused by Government levees along such flood ways. It should be remembered these levees are also for the protection of 15,000,000 acres outside of flood ways.

Increased values to the protected land would reach many times the entire cost of the flood-control project to be of local or State benefit. It would mean increased business, increased taxes, and better living conditions generally, subject to any increased flood damage that might occur to the land temporarily covered by water in the flood way. That plan it was believed would meet the rising protest against any effort to secure 4,000,000 acres of land in the flood way at outside prices involving purchase or condemnation of 7,500 properties to be used only in heavy floods, all to be paid for by the General Government.

The Army engineers' flood-control plan in the Jones bill gives higher levees along the river, in addition to $100,000,000 additional river-bank revetment, complete protection to Cairo by the New Madrid spillway, and the same to New Orleans by the Bonnet Carre spillway. In addition to other features the plan proposed to relieve superfloods along the river by means of the

Boeuf and Atchafalaya River bottoms, that for centuries have temporarily cared for the river overflow.

The Jones bill requires the Federal Government to buy or condemn this 4,000,000 acres of land in natural flood ways, now to be restricted by levees. These flood ways will relieve the main river in flood time and the flood-way levees will protect all lands behind the levees. As before stated, under the Jones bill to acquire the 4,000,000 acres of land or flood easements therein suits or purchases must occur between the Government and 7,500 owners, large and small.

The names of 1,000 corporations and large owners, including nonresident land and lumber companies, have been placed in the record. Less than 15 per cent of the 7,500 owners own 77 per cent, or over three-fourths, of the 4,000,000 acres, or about 1 owner to every square mile. Based on the Army engineers' estimates this land may cost $300,000,000, and according to Engineer Blake's figures over $600,000,000 for 6,000,000 acres, his estimate of flowage. That is the Jones bill provision now before us, which also carries $71,000,000 in railway damages and unlimited damages against the Federal Government from sources aside from land and railways.

THE ADMINISTRATION FLOOD CONTROL PROPOSAL

The administration proposal submitted by the Attorney General provides that the Federal Government will build all levees along these two flood ways at Federal expense when rights of way are furnished locally. This condition is the same as with the Mississippi River levee rights of way. Parties in the 4,000,000-acre flood way who may receive special damages from floods will then have their rights of action under the Constitution.

Without legal hairsplitting it means that those now living in the flood way who have lived there in the past, and will continue to do so whether the Government buys the easement or not, will have added protection when the levees are built by moving back of the levees to protected ground until the water subsides. Their hazard if increased in cases will be compensated by damages where the Federal Government is responsible.

Neither plan of purchase or condemnation contemplates removing water from the flood ways, but on the contrary both the Jones bill and the administration proposal is to use these flood ways for safety of the whole valley whenever necessary to do so. Those living in the 6,000 square miles of flood way, about one to the mile, well know they are not protected any more than formerly excepting through lands behind adjacent levees.

All the tears and pleas for safety of the comparatively handful of people living on the cut-over lands in the flood way come from a mistaken understanding of what the flood ways are for or else are offered to confuse the situation. The Government is asked to save lives and property, and if in so doing it must use old flood ways now largely subject to overflow, then it is illogical and absurd to expect the same protection in the flood ways as out. But even so, there can be no difference in safety between an outright purchase of flowage rights or rights to condemnation suits for damages.

Whether the Federal Government buys the land or flood easements or the settlers and 7,500 owners of the 4,000,000 acres are left to their rights to damages, not 1 per cent will remove from the flood ways in either event, and it is immaterial to the remaining 99 per cent which course is taken, although the levees near at hand will give ample protection on protected lands after they are built.

Flood waters in the flood way may not come once in a decade, due to other protective works, and damages against the Government, if so, will not reach one-tenth of 1 per cent of money required to buy land under the Jones bill, land that the Government is to give back to the States for the second time—first under the swamp land act and now under the Jones bill.

A JUG-HANDLED COMPROMISE

Congress is informed through the press that Missouri will never permit local interests to pay for levee rights of way on flood ways, but will agree to a "Missouri compromise," wherein the Government will be permitted to buy such rights of way, buy flood-way lands, and build levees. Then under another $1,000,000,000 flood bill now before the committee a political commission is to be asked to take over outstanding bonded indebtedness reaching many millions of dollars held by St. Louis banks. Frankly, that kind of compromise looks unjust for the remaining 47 States.

All should hesitate to invite a veto, not alone for our own legislative record based on the bill vetoed but for the danger of failure of flood-control legislation. I have no knowledge of the bill's future, but by a ringing veto declaring forcibly the facts in this case the President can tear aside all sentimentality that seeks to float a possible gigantic real-estate project under a cloak of flood control. And in this connection let me say I absolve any Member of Congress from being behind such a project.

The country will support such a veto, and I firmly believe this House will do the same. I make no prediction of the Senate. Without consideration it passed this same bill beyond speed limit, with several presidential booms and other complications involved, so no man can tell what will happen there, but whatever the result let the responsibility for flood control rest with those who demand the bill with this 4,000,000-acre purchase of land without local contribution.

Everybody favors flood control and flood control without delay, but I have presented facts that deserve your careful consideration when amending the bill. [Applause.]

Mr. COX. Will the gentleman yield for a question?

Mr. FREAR. I yield to the gentleman from Georgia.

Mr. COX. The gentleman opposes the bill, for one among many reasons that it provides that the Government shall acquire rights of way. I would like to inquire of the gentleman if he favors the taking or damaging of private property for public use without compensation.

Mr. FREAR. Why, no; certainly not. I believe if this land is damaged beyond what it has been under the original overflowing of these flood ways, the Government should pay for that damage, but I would not pay $75 an acre for the purchase of the land and then wait 10 years for an overflow, because under this substitute provision it will not cost 1 per cent for actual flood damages of what it will to buy the land outright.

Mr. JOHNSON of Texas. Will the gentleman yield for a question there?

Mr. FREAR. Certainly.

Mr. JOHNSON of Texas. Where does the gentleman get his figures that it is going to cost $75 an acre?

Mr. FREAR. The $75 value was given by the witness who appeared before the committee from the New Madrid district. The land in the New Madrid district is figured at $150 an acre. Mr. Blake estimates flowage costs for 6,000,000 acres would be over $600,000,000, as stated.

Mr. JOHNSON of Texas. But the land in Louisiana——

Mr. FREAR. Oh, I know the land in Louisiana is reported at $5 to $10 an acre, according to telegrams read here.

Mr. JOHNSON of Texas. According to the statement the gentleman made the other day, that is the land that was figured at $75 an acre.

Mr. FREAR. Oh, no; I beg the gentleman's pardon. I did not wish to be so understood; not especially for Louisiana lands, but a maximum average for all lands needed for flood ways. Not in Louisiana alone.

Mr. JOHNSON of Texas. I so understood the gentleman.

Mr. ARENTZ. Will the gentleman yield?

Mr. FREAR. Yes.

Mr. ARENTZ. Has the gentleman from Wisconsin gone into the retroactive features of this bill with respect to damages occurring to land from the construction of a levee on one side or the other of the river, and providing that the Government in such cases shall pay damages?

Mr. FREAR. It is not quite that; but I will say to the gentleman that I am sure Chairman REID will agree with me that we have spent many days on that very proposition. [Applause.]

The CHAIRMAN. The time of the gentleman from Wisconsin has expired. The gentleman from Illinois [Mr. REID] is recognized for five minutes. [Applause.]

Mr. REID of Illinois. I want to clear up the situation a little before I start my statement. We have met the representatives of the President, and we have agreed on everything they asked, and I am going to present amendments embodying everything the President asked, with the single exception of agreeing to one thing—and I will never propose an amendment or support any section of this bill which will permit the turning down on innocent people in these so-called flood ways of a torrent three times that of Niagara Falls without first acquiring the rights of way or the flowage rights; and there I stand, and that is the only difference between us to-day. [Applause.]

The last speaker is in error. The Boeuf flood way at the present time is not a flood way. The Atchafalaya flood way is not a flood way. The Birds Point-New Madrid flood way is not a flood way at the present time.

These lands are protected, the same as the lands on the Mississippi River, by the levees on the Mississippi River; and unless the Mississippi levees break, you will have no floods in the Boeuf flood way; you will have no floods in the New Madrid flood way; but they are trying to give you the impression that we are trying to make the Government acquire land that is now a flood way. This is not true, and no one claims it is true. These lands are overflowed because of the breaks on the levees of the Mississippi River proper.

Under the plan now put before you there is a wide departure from the ordinary method of flood control, which was through levees only, and in that case the levees protected the adjacent land. These so-called spillways protect land in other States, perhaps a hundred miles away. Consequently there is no relation by which the people of the State should pay for it or should supply the rights of way. Would you want a ditch to run through your front yard to take care of somebody three or four blocks away? Do you think that would add anything to the value of your land? This is exactly the proposition here.

We are not trying to get the Government to acquire any flood ways that are flood ways now. It would be foolish for us to do so.

We are going to move to strike out the section with respect to the railroads, which is section 4. Everybody has agreed to this.

We have agreed to everything except a single point, and we will never permit this bill to be passed so you can turn down floods on these people and then say to them, "You can go to the courts, under the Constitution, and if you get any damages awarded, then come in and the Congress will consider them in the Committee on Claims."

I consider we have gone as far as we could go and I think any other settlement of the matter would be inhuman.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. REID of Illinois. Certainly; I will be pleased to yield to the gentleman.

Mr. MADDEN. Did the committee agree on the question of the buying of foundations for the dams around the flood ways and providing them without cost to the Government?

Mr. REID of Illinois. What committee?

Mr. MADDEN. And providing the rights of way?

Mr. REID of Illinois. Our committee yielded on the rights of way on the Mississippi River, but why should the people down in Louisiana or the people in Missouri supply rights of way that would damage their lands? They do not want them. The people of Missouri and the people of Louisiana are not asking for these spillways, but you are going to force the spillways on them by the overwhelming power of the Government. The people in Cairo and the people of Illinois are the ones to be protected. The people of Missouri will not and can not buy this land and give it to the Government for the reason that they can only collect money where the land is benefited by the improvement, and the people of Illinois can not go over there and condemn this land, because they have no such authority.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. REID of Illinois. I will.

Mr. LAGUARDIA. What does the gentleman substitute for section 4?

Mr. REID of Illinois. That the Government shall be liable where it diverts the water from the main channel. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 30 seconds.

Mr. REID of Illinois. I yield the floor.

The CHAIRMAN. All the time has expired, and the Clerk will read.

The Clerk read as follows:

*Be it enacted, etc.*, That the project for the flood control of the Mississippi River in its alluvial valley and for its improvement from the Head of Passes to Cape Girardeau, Mo., in accordance with the engineering plan set forth and recommended in the report submitted by the Chief of Engineers to the Secretary of War dated December 1, 1927, and printed in House Document No. 90, Seventieth Congress, first session, is hereby adopted and authorized to be prosecuted under the direction of the Secretary of War and the supervision of the Chief of Engineers: *Provided*, That a board to consist of the Secretary of War, the Chief of Engineers, the president of the Mississippi River Commission, and two civil engineers to be appointed by the President, by and with the advice and consent of the Senate, whose compensation shall be fixed by the President and be paid out of the appropriations made to carry on this project, is hereby created; and such board is authorized and directed to consider the engineering differences between the adopted project and that recommended by the Mississippi River Commission in its special report dated November 28, 1927, and after such study and such further surveys as may be necessary, to determine the action to be taken upon the same, and its decision upon all matters considered by it shall be followed in carrying out the project herein adopted: *Provided further*, That if after considering any controverted problem between the Mississippi River Commission project and the project herein adopted the board shall be of the opinion that a new method should be followed, it shall submit its recommendation thereon to Congress: *Provided further*, That such surveys shall be made between Baton Rouge, La., and Cape Girardeau, Mo., as the board may deem necessary to enable it to ascertain and determine the best method of securing flood relief in addition to levees, before any flood-control works other than levees and revetments are undertaken on that portion of the river: *Provided further*, That all diversion works and outlets constructed under the provisions of this act shall be built in a manner and of a character which will as fully and amply protect the adjacent lands as those protected by levees constructed on the main river: *Provided further*, That pending completion of any flood way, spillway, or diversion channel, the areas within the same shall be given the same degree of protection as is afforded by levees on the west side of the river contiguous to the levee at the head of said flood way. The sum of $325,000,000 is hereby authorized to be appropriated for this purpose.

The Clerk read the following committee amendment:

Page 2, line 7, after the word "engineers," insert the words "chosen from civil life."

The CHAIRMAN. The question is on the committee amendment.

Mr. TILSON. Does the gentleman intend to offer a substitute for this section?

Mr. REID of Illinois. Mr. Chairman, for the information of the House I will send all of the proposed amendments to section 1 to the desk so that they may be read for information:

Page 2, line 5, strike out the words "the Secretary of War."

Page 2, line 6, strike out the word "two" and insert in lieu thereof the word "a."

Page 2, line 7, strike out the word "engineers" and insert in lieu thereof the word "engineer."

Page 2, line 13, strike out the word "that" and insert in lieu thereof the words "the plans."

Page 2, line 16, strike out beginning with the word "determine" through the word "such," in line 24, and insert in lieu thereof the following: "recommend to the President such action as it may deem necessary to be taken in respect of such engineering differences, and the decision of the President upon all recommendations or questions submitted to him by such board shall be followed in carrying out the project herein adopted. The board shall not have any power or authority in respect to such project except as hereinbefore provided. Such project and the changes therein, if any, shall be executed in accordance with the provisions of section 8 of this act. Such."

Page 3, line 5, strike out the word "further."

Page 3, line 8, strike out the first word "as."

Page 3, line 8, strike out the words "as those protected by levees constructed on the main river."

Page 3, line 14, after the word "way," change the period to a comma and insert the following: "but nothing herein shall prevent, postpone, delay, or in anywise interfere with the execution of the project on the east side of the river, including raising, strengthening, and enlarging the levees on the east side of the river."

Mr. MADDEN. Mr. Chairman, I would like to have the Clerk read the section as it would read when amended.

The CHAIRMAN. The entire section?

Mr. MADDEN. The entire section as it would read with the amendments adopted.

The CHAIRMAN. Without objection, the Clerk will read.

Mr. LAGUARDIA. While the Clerk is preparing the section, I ask to be recognized.

The CHAIRMAN. The Chair recognizes the gentleman from New York.

Mr. LAGUARDIA. Mr. Chairman, all the amendments offered by the gentleman from Illinois in all likelihood will not be opposed, but will be adopted by the committee. That indicates the desire on the part of a great majority of the Members of this House to bring about a bill which will afford adequate flood relief to be undertaken by the Federal Government. But when we come to the question which should have no direct bearing on the matter of flood relief, there we find a stubborn resistance. I refer to the sordid desire to dump millions of acres of land on the Federal Government at excessive and exorbitant prices.

Mr. REID of Illinois. Mr. Chairman, I object unless the gentleman confines his remarks to the amendment under consideration.

The CHAIRMAN. The gentleman from New York will proceed in order.

Mr. LAGUARDIA. The amendment under consideration.

Mr. RAMSEYER. Which is the amendment under consideration? Were not those amendments all read for the information of the committee? Were they not all offered as one amendment?

The CHAIRMAN. The amendment under consideration is the committee amendment reported in the bill.

Mr. HUDSON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. If the gentleman from New York [Mr. LAGUARDIA] will yield for that purpose.

Mr. LAGUARDIA. Certainly not. I have only five minutes.

The CHAIRMAN. The gentleman from New York may not be taken from the floor by a parliamentary inquiry.

Mr. LAGUARDIA. Mr. Chairman, I hope that the gentleman from Illinois [Mr. REID] will allow some latitude in discussing the merits of this bill. The amendment offered provides for the board of engineers to carry on this work. What I am seeking to do now in the beginning of the discussion is to emphasize the one point upon which there seems to be a difference of opinion. We are all agreed upon the matter of flood control, of controlling the waters, but we are not agreed upon the matter of purchasing the land, and it would seem that more interest is devoted to the acquisition of this land than there is to the control of the waters. I point out to the gentlemen representing States where land is to be taken that it is not your people, not the natives or residents who have lived down there for years and years, not the owners of the land who have held this land for years; they are not going to benefit, but the speculators who will come from my State and from the State of Illinois, who will go down there to reap the benefits of the scoop, if the present bill be enacted into law in its present form. At this very moment the confidence men of New York and the tinhorns of Chicago are getting together to reap a haul if this bill is enacted in its present form. Anyone who has had any experience knows that when the law is so wide open the inevitable will happen.

Mr. DRIVER. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. DRIVER. According to the statement made by our colleague from Wisconsin [Mr. FREAR], these lands to be dealt with are now owned by Chicago and other interests. Does the gentleman think they are going to permit their lands to get out of their hands into the hands of speculators?

Mr. LAGUARDIA. They have already anticipated what would happen. Apparently, as the gentleman suggests, the evil has already happened. When the gentleman from Illinois [Mr. REID] points out that we should not permit land to be acquired without just compensation, he knows that neither the Federal Government nor a State government can take the property of any citizen without due compensation.

Mr. REID of Illinois. And the gentleman knows that property can be damaged by the Government without paying compensation.

Mr. LAGUARDIA. Oh, there is difference of opinion about that.

Mr. REID of Illinois. And that is what you intend to do here.

Mr. LAGUARDIA. There is no one who contends that property should be taken without compensation. There is no one who contends that property that is damaged by the work of the Government should not be paid for, but we do object to going in and paying an excessive, exorbitant price for 3,700,000 acres of land now already in the hands of speculators or soon to get into their control.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BANKHEAD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BANKHEAD. Are we now considering the amendments which have been read, as offered by the gentleman from Illinois, en bloc, or are we considering the first amendment proposed by him?

The CHAIRMAN. The amendment under consideration at the present time is the committee amendment reported in the bill in line 7 of page 2. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The question now recurs upon the first amendment offered by the gentleman from Illinois [Mr. REID], but pending that the Clerk will report the section as it would read with the various amendments offered by the gentleman from Illinois agreed to.

Mr. RAMSEYER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. RAMSEYER. So that there will be no misunderstanding, are the amendments which were sent up by the chairman of the Flood Control Committee all before the committee at this time, as one amendment, or were they intended to be offered separately, each to be taken up by itself?

The CHAIRMAN. Each amendment will be taken up and voted on separately, but they are all pending at the present time. They will be taken up in their order as they appear, modifying the section.

Mr. TILSON. Mr. Chairman, in view of the fact that all of these amendments taken together accomplish what is desired, I ask unanimous consent that they may be considered en bloc.

The CHAIRMAN. The gentleman from Connecticut asks unanimous consent that the amendments offered by the gentleman from Illinois, chairman of the committee, may be considered en bloc. Is there objection?

Mr. NELSON of Missouri. I object.

Mr. FREAR. The only object, it seems to me, is to have it read in the whole.

Mr. ASWELL. Regular order, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendments as they will read when agreed to.

The Clerk read as follows:

That the project for the flood control of the Mississippi River in its alluvial valley and for its improvement from the Head of Passes to Cape Girardeau, Mo., in accordance with the engineering plan set forth and recommended in the report submitted by the Chief of Engineers to the Secretary of War dated December 1, 1927, and printed in House Document No. 90, Seventieth Congress, first session, is hereby adopted and authorized to be prosecuted under the direction of the Secretary of War and the supervision of the Chief of Engineers: *Provided*, That a board to consist of the Chief of Engineers, the president of the Mississippi River Commission, and a civil engineer chosen from civil life to be appointed by the President by and with the advice and consent of the Senate, whose compensaton shall be fixed by the President and be paid out of the appropriations made to carry on this project, is hereby created; and such board is authorized and directed to consider the engineering differences between the adopted project and the plans recommended by the Mississippi River Commission in its special report dated November 28, 1927, and after such study and such further surveys as may be necessary, to recommend to the President such action as it may deem necessary to be taken in respect of such engineering differences, and the decision of the President upon all recommendations or questions submitted to him by such board shall be followed in carrying out the project herein adopted. The board shall not have any power or authority in respect to such project except as herein before provided. Such project and the changes therein, if any, shall be executed in accordance with the provisions of section 8 of this act. Such surveys shall be made between Baton Rouge, La., and Cape Girardeau, Mo., as the board may deem necessary to enable it to ascertain and determine the best method of securing flood relief in addition to levees, before any flood-control work other than levees and revetments are undertaken on that portion of the river: *Provided*, That all diversion works and outlets constructed under the provisions of this act shall be built in a manner and of a character which will fully and amply protect the adjacent lands: *Provided further*, That pending completion of any flood way, spillway, or diversion channel, the areas within the same shall be given the same degree of protection as is afforded by levees on the west side of the river contiguous to the levee at the head of said flood way; but nothing herein shall prevent, postpone, delay, or in anywise interfere with the execution of the project on the east side of the river, including raising, strengthening, and enlarging the levees on the east side of the river. The sum of $325,000,000 is hereby authorized to be appropriated for this purpose.

The CHAIRMAN. The gentleman from Illinois is recognized for five minutes.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent that I may proceed out of order for 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. The gentleman from Illinois is recognized for 15 minutes, to proceed out of order. [Applause.]

Mr. MADDEN. Mr. Chairman, to begin, I am thoroughly in favor of adequate flood-control legislation. I have devoted as much time to it, perhaps, as any other one man except those who may be living on those waters. I have endeavored in every way within my power to reach not only an amicable, but a just solution of all the problems affected, not only to the people who are afflicted by the disaster which befell them, but to the people of the whole United States.

The amendment offered by my colleague from Illinois [Mr. REID], the chairman of the Committee on Flood Control, is one in the preparation of which I have had a part. I am very happy to see that he and his committee have agreed to the adoption of this amendment, for I think it will have as much to do with insuring efficiency in the administration of the moneys that are to be appropriated as any other one thing that may be done could have.

This amendment provides, if I may be allowed to state it, that there shall be appointed to correlate—if I may put it that way—the problems submitted by the Mississippi River Commission and those submitted by the Army Engineer Corps. The purpose of the selection of the commission provided, consisting of three engineers, one the Chief of Engineers of the Army, one the chairman of the Mississippi River Commission, and the other a civilian engineer from civil life, is to have an agency through

which the story, if I may put it that way, of the various communities may be told, of their needs and their hopes and their fears. The obligation placed upon this commission is to take the recommendation of the Mississippi River Commission and the recommendation of the Chief of Engineers and consider these two together and to work out some plan which will embody a part of each. The commission, as I understand it, is to be given authority to order a resurvey of the river from Baton Rouge down to the Passes, so that in the construction problems affected by the report of the existing two agencies they will have all the facts before them that may be disclosed by these surveys. When they have completed the work of coordination between the two reports, the commission is to go out of existence. But before they go out they are to report to the President of the United States their conclusions, and upon his adoption of these conclusions the project becomes fact, and it will be upon the conclusions of this commission, with the approval of the President of the United States, that the project on which the physical work of flood control on the Mississippi River is to be conducted will proceed.

So far so good. Then we proceed, and if I may be allowed to state it in the way in which the chairman of the committee stated it, when the friends of the President or his agents or his representatives presented these cases for the consideration of the representatives of the people down in the Mississippi Valley and its tributaries, we offered to provide that when the people of New Orleans, who have paramount interest in the work of flood control, and particularly in the Bonnet Carre flood way and spillway, expressed a willingness to relieve the United States Government from damages, the United States itself, at the expense of the people of the United States, and without any expense whatever to the local people along this spillway, and were ready to relieve the United States Government from any damages during the period of construction of the Bonnet Carre spillway, the Government would proceed to build it.

The same thing is true in respect to the New Madrid spillway, except that the paramount interest there was said to lie in southern Illinois and southeastern Missouri. The Committee on Flood Control in its wisdom has decided not to accept that suggestion. The President insists upon the suggestion being legislated into law if it can be legislated into law. He says he has made every compromise which he could understand how he could afford honorably to make. He has surrendered, as I understand it, any demand for local cash contributions. [Applause.] But he insists that the people along the Mississippi River and along the flood ways shall supply at their expense the foundations for the levees which the Government of the United States is ready and willing to construct for the protection of the people along this territory. I understand they have refused as far as the foundations for the levees around the flood ways go. They are willing to accept the President's suggestion to supply the foundations for the dams along the main Mississippi River Channel, but in conversations with these gentlemen who live in these parts through which these flood ways are to be constructed, I am told by them that the total cost of the lands for the foundations of the flood ways—that is, for the foundations of the levees in the flood ways—will cost only $1,000,000. Does anyone here pretend to say that the people of the Southern States through which this vast improvement is to be made at the expense of Illinois, New York, Pennsylvania, Massachusetts, Ohio, and all the other States of the Union, are not willing to raise $1,000,000 in order to cooperate?

Mr. REID of Illinois. Will the gentleman yield?

Mr. MADDEN. I yield to my colleague.

Mr. REID of Illinois. Will the gentleman tell the committee how they can raise it according to law?

Mr. MADDEN. If I were down there and were one of the citizens of the Southern States, I would contribute my part.

Mr. REID of Illinois. The gentleman would take a tin cup and set the Red Cross at work?

Mr. MADDEN. I would go to the bankers of Louisiana, of Arkansas, and of Mississippi. They could well afford to make this contribution of $1,000,000; aye, $5,000,000, in order that they might be the beneficiaries of the richness that is to be created by the expenditure out of the Federal Treasury of the sum that is about to be expended.

I am astonished. But I am afraid it is worse than this. I am afraid there is politics in it somewhere, and I am told that men are running for the Senate on the basis of how much they can deliver to their States without charge. If that is true, it is not right. I am told that in Louisiana candidates are each vying with the other to see how much more they can get from the Government of the United States without contribution by their own people.

Mr. SANDLIN. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. SANDLIN. I would like to state to this House that the gentleman has been misinformed.

Mr. MADDEN. I have not been misinformed. There is politics in it and that has been established by these gentlemen themselves.

Mr. SANDLIN. Will the gentleman permit me to finish my statement?

Mr. MADDEN. Certainly.

Mr. SANDLIN. I will state that there is no senatorial campaign on in the State of Louisiana at this time, and, as a matter of fact, the gentleman, for whom I have great respect, has been entirely misinformed.

Mr. MADDEN. I will be glad to give the names of the people who told me.

Mr. SANDLIN. I would be glad if the gentleman would give them.

Mr. MADDEN. Mr. RILEY WILSON told me that there was politics in it.

Mr. WILSON of Louisiana. I beg the gentleman's pardon. I never made any statement of that kind.

Mr. MADDEN. I understood the gentleman to say that in the conference we had.

Mr. WILSON of Louisiana. I might have said there was some politics on that side, but not on my side.

Mr. MADDEN. I say that if there is politics in it, that is wrong, and politics ought not to be injected into it.

Mr. WILSON of Louisiana. There is no politics in it in Louisiana.

Mr. MADDEN. There may be politics in it on that side but none on this side.

Mr. WILSON of Louisiana. I do not claim there is any politics in it anywhere.

Mr. MADDEN. I know the gentleman does not claim it now, but I claim there is politics in it and I will be able to prove it if it is necessary.

Mr. BYRNS. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. BYRNS. I understand the gentleman says that there is the sum of $1,000,000 involved in this difference between the President and the committee?

Mr. MADDEN. That is as to the foundation for the levees.

Mr. BYRNS. So far as that particular difference is concerned, as the gentleman from Illinois [Mr. REID] has suggested, there is no way in which that money can be legally collected and the gentleman suggests it might be done through contributions. Does not the gentleman think that when you take into consideration the fact that $1,000,000 is a mere bagatelle as compared to the total cost of this improvement that we ought not to risk the failure of the whole proposition upon the chance of collecting the money by contributions?

Mr. MADDEN. I do not think we should risk its failure on the raising of $1,000,000, but I maintain this, that if the people of the South are so interested, as they ought to be, and we are interested with them and for them, that they ought not to stand on the question of their going and getting this $1,000,000 and supplying the foundations for the levees around these flood ways.

For myself I am perfectly willing, although everybody on this side may not agree with me, that the Government should pay for the flowage rights in the flood ways. I am willing we should surrender the tax which might be presumed to be imposed in the cash contributions toward the cost of this great improvement, but I do believe, in all decency and in all good conscience, there ought not to be for a single instant any opposition to the purchase or the acquirement in any way that is necessary of the land around these flood ways upon which are to be built the levees to further protect the life and the property of the people down there. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. WILSON of Louisiana. Mr. Chairman, I ask recognition for five minutes.

Mr. Chairman and gentleman of the committee, I regret very much the statement of my distinguished friend from Illinois relative to any statement that may have been made in relation to politics in connection with this measure.

Of course, when statements went out from Washington and appeared in the public press that this legislation was an effort on the part of the people in the lower valley to unload lands and timber and all that sort of thing upon the United States through the efforts of big corporations, to the extent of about a billion dollars, and this statement was carried in newspapers throughout the country, I did say that that looked like politics

to me, but so far as implying any politics in Louisiana is concerned, no one has any such intention and any statement of that kind is unfounded and has no business here. Everybody here knows that in the press, through statements coming from Members of the House and through statements accredited to the executive departments, it was said that there was such an effort being made, just as you heard my friend the gentleman from Wisconsin [Mr. FREAR] say to-day that there was an effort on the part of the people to unload on the Government $1,000,000,000 of lands in Louisiana, Arkansas, and Missouri.

Mr. FREAR. If the gentleman will pardon me, I never intended to make any such statement. The total cost will be about $1,000,000,000, but that is the whole project.

Mr. WILSON of Louisiana. The gentleman ran his land calculations very close to that amount by taking 4,000,000 acres at $75 an acre——

Mr. FREAR. Oh, no.

Mr. WILSON of Louisiana (continuing). When the statement had been presented here from people in Louisiana and elsewhere, including large corporations in New York and in Chicago, that the lands can be had at $10 an acre.

Mr. MOORE of Virginia. Will the gentleman permit an interruption?

Mr. WILSON of Louisiana. Yes.

Mr. MOORE of Virginia. I live farther from the section in question than our very able and distinguished friend, the gentleman from Illinois [Mr. MADDEN]. I have been wondering how there could be any local politics involved or any southern politics in view of the fact that there is unanimity of sentiment in the Mississippi Valley. It would seem to me impossible that two candidates for the Senate could bring into their contest any question as to this matter.

Mr. WILSON of Louisiana. I do not think there could be, and there are no candidates for the Senate in Louisiana now, although there may be in Mississippi.

My friends, I want now to say a word relative to the proposition discussed by the gentleman from Wisconsin [Mr. FREAR]. There is not a single section where a flood way is proposed in Louisiana, Missouri, or Arkansas but what the people in that section are hoping and praying that when this new survey authorized in this section is made they will be given relief. I was very glad to hear the gentleman from Illinois [Mr. MADDEN] say that when that survey is made they will go down the valley and let the people of the towns and cities come before the board and be heard and present the question anew. I am glad that the gentleman has given the provision that construction. Of course, those of us who are acquainted with the conditions know this is true, and when they go there they will find there is not a man in one of these flood ways but is hoping and praying that some way will be found by which this project may be executed by the Government and the flood way avoided, or that the plans may be adjusted so that they can have equal protection throughout these flood ways. It is the hope that the protective amendments in this section will be effective, and that these flood ways, if it is found necessary to establish them, will afford the greatest degree of protection possible.

But the idea that anyone down there is seeking this opportunity to add a single dollar of additional cost to the Government by bringing these waters through there is unfounded and untrue, and when the board makes this survey, my friends, they will find that charge is not true.

They also make the statement that the proposed flood-way areas are natural flood ways and should have been open all the time.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. WILSON of Louisiana. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. WILSON of Louisiana. If you understand the Mississippi River, you know that the whole alluvial valley is a natural flood way just as much at one place as another; that is, as the valley was built up deposits were made along the banks of the river gradually and the water went over all the way down, but, just because at some place like Cypress Creek in Arkansas it may have been left open there longer than at other places, or the fact that before it was closed 300,000 cubic feet of water went through there, does not justify the statement that this is a natural flood way whereby you can divert 700,000 to 900,000 cubic feet of water without any compensation for the damage it causes. So all that was asked was that if flood ways were found necessary in Missouri, Arkansas, or Louisiana that the property that was taken should be compensated for. And I want to say here that whether it be the property of a railroad or of a farmer, if it is taken for this purpose, just and fair compensation ought to be made, because when these industries were built there they were established in good faith, and were established on account of protection assured by the Government.

So, my friends, I think it is unfortunate that anyone would attempt at this hour of distress to charge that these people are trying to unload practically a billion dollars of property on the Government and are trying to join with Wall Street and the people of Chicago in doing this, when these people are opposed to flood ways if they can be avoided. I think it is unfair to charge them with trying to scoop into the Treasury for the benefit of landowners in Louisiana and in the large cities.

The new surveys ordered in this session will be made by the board and will, I think, give some light on this question that is not even known to-day by the Chief of Engineers of the United States Army.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. WILSON of Louisiana. I will.

Mr. LAGUARDIA. The gentleman has described the land in Louisiana, and it was always my impression that they were just as the gentleman is describing. What value would the gentleman put on those lands per acre?

Mr. WILSON of Louisiana. I put several telegrams in the RECORD the other day from large owners of land in which they put the value at $5 to $10 an acre.

Mr. LAGUARDIA. Does the gentleman know what the average assessed value of those lands is?

Mr. WILSON of Louisiana. I can not say, but a committee of engineers made an investigation and they estimated that the average value is about $23 an acre.

Mr. COX. Will the gentleman yield?

Mr. WILSON of Louisiana. Yes.

Mr. COX. It should not escape attention that all the land the Government wants is along the flood way.

Mr. WILSON of Louisiana. Whatever is necessary to carry out the project.

Mr. COX. It is not contemplated that it shall take any lands except along the flood ways—that which is overflowed.

Mr. WILSON of Louisiana. The whole valley is subject to overflow.

Mr. SCHAFER. Will the gentleman yield?

Mr. WILSON of Louisiana. I will.

Mr. SCHAFER. The gentleman speaks of the telegrams he put in the RECORD that the owners would sell from $5 to $10 an acre. But they reserved the timber and mineral rights, did they not?

Mr. WILSON of Louisiana. Yes.

Mr. SCHAFER. The land has no value except in the timber and mineral rights?

Mr. WILSON of Louisiana. What the Government proposes to do is to acquire flood rights over the land, using the land for flood-control purposes. They do not want the timber or the mineral.

Mr. SCHAFER. No; but the value of the land is for timber and mineral rights?

The CHAIRMAN. The time of the gentleman from Louisiana has again expired.

Mr. WHITTINGTON. Mr. Chairman, I want to say a few words in reply to the gentleman from Illinois who has correctly stated that there is no objection on his part or on the part of those for whom he speaks to the adoption of these amendments now proposed by the chairman of our committee. I could have wished, in so far as I am concerned, that the request of the gentleman from Connecticut had been complied with and that we might treat the amendments en bloc, because I want to remind my friend from New York [Mr. LAGUARDIA] that these amendments have nothing to do with the diversion or flood ways.

Having made that statement I want to say a word about the matter of diversions and flood ways in further reply to the distinguished gentleman from Illinois. I know of no Member of the House who has worked more assiduously or more earnestly and honestly to arrive at a solution of this flood-control problem than the chairman of the Committee on Appropriations. [Applause.] I make the statement that his observations a few moments ago, if written into the pending bill, concede everything that the Flood Control Committee is asking, except the rights of way for levees along spillways, flood ways, and diversions. In other words, if we accept the statement of the chairman of the Committee on Appropriations, and if we can agree on the language to put into the bill whereby the Government will provide for flowage rights or easements

through diversions the only point of difference between the gentleman and our committee is the matter of acquiring the rights of way for levees along diversions and flood ways.

I want to say to the gentleman from Illinois—and mark my words—I speak only for the levee districts in the State of Mississippi, and I have not conferred with the citizens of these districts on the proposition, but speaking for myself I wish that the entire alluvial valley could raise the funds for payment of rights of way for levees along flood ways.

If there is any language that can be put into the bill whereby, as suggested by the distinguished gentleman from Tennessee [Mr. BYRNS], the States of the entire valley—mark my language—could under the laws of the States pay for the rights of way along diversions and flood ways in Louisiana, Arkansas, and Missouri, I would like to see it inserted. [Applause.]

Mr. Chairman and gentlemen of the committee, I would even go further than that; I would like to say to you again that as a matter of compromise we have endeavored to iron out the matters in this bill. If there is any method whereby the States of the entire lower valley may contribute the lands for levees along diversions or provide in the bill that if these rights of way are not so provided, the Government will have the right to provide them and the States to reimburse the Government, I personally would stand for it.

Mr. TILSON. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. Yes.

Mr. TILSON. Does the gentleman intend to offer an amendment that will change the bill to read that way?

Mr. WHITTINGTON. I would be glad to do it, if my conferees would agree to it.

Mr. TILSON. This is very important; it is near the crux of the matter.

Mr. WHITTINGTON. It is, absolutely. If the gentleman from Connecticut will propose an amendment that will be a declaration in this bill whereby the Government will provide for the flowage rights and easements through those diversions, I shall offer an amendment if one could be framed to be binding on the entire alluvial valley to provide the rights of way for levees for diversions.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. WHITTINGTON. Mr. Chairman, I ask unanimous consent to preceed for 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COX. Mr. Chairman, the gentleman is not speaking now for the committee?

Mr. WHITTINGTON. I am speaking for myself.

Mr. TILSON. The gentleman has put up to me a suggestion about a proposed amendment.

Mr. WHITTINGTON. I have not completed my statement along that line. I say to the gentleman from Louisiana [Mr. WILSON], if he will give me his ear for a moment—we are not going to get excited about this matter—but I stand, if all the States can not or will not provide for rights of way for levees along diversions, for the Government to pay for the rights of way for levees on the diversions, the flood ways, and the spillways, and, mark my language, I shall stand here and oppose to the end any legislation that requires the State of Louisiana, the State of Arkansas, or the State of Missouri alone, to pay for the rights of way for the levees on the diversions and the flood ways through those States.

Mr. COX. Does the gentleman propose the creation of a superlevee district?

Mr. WHITTINGTON. I do not.

Mr. WILLIAMSON. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. Yes.

Mr. WILLIAMSON. Is it the intention that the Government shall acquire only the flowage rights and that the title to the land shall remain in private ownership?

Mr. WHITTINGTON. The Government may have the right to do either one of two things. It may acquire the flowage rights or acquire the land in the flood ways and diversions. That is left to the discretion of the Secretary of War, as to which the Government will do. Having said that I oppose the State of Louisiana or the State of Arkansas or the State of Missouri being required to provide for the rights of way for levees for the diversions and for the flood ways through those States, and having said that I shall continue to oppose that burden being borne by the States of Arkansas, Louisiana, and Missouri, unless some way can be arranged whereby all the States in the valley shall share in that expense. I call attention to this significant fact, and I invite the attention of the leaders on the Republican side to this statement: This bill provides for two projects: One the Mississippi River and the other the Sacramento River. I remind you that under the Sacramento project, embraced in this legislation, the Government of the United States is proposing to pay in substance one-third of the cost of the project, including levees on the by-passes and the rights of way for these levees and the flowage rights in by-passes, and the expenses made necessary to the landowners in those by-passes, including changes in railroads—and that is a term that has been hawked about here in this legislation—so that the concrete proposition that confronts us in the flood control of the Mississippi is whether or not the Government of the United States will provide the cost of the rights of way for levees along these diversions, if no plan can be worked out whereby the States in the lower valley can provide for them, or whether this legislation shall fail because you are not willing to provide for levees for diversions estimated to cost $1,000,000. In addition, the Sacramento River is an intrastate stream.

In this particular case these diversions along the Mississippi River are not being made for the benefit of the State of Louisiana, the State of Arkansas, or the State of Missouri, and I put this question to you: If the Government is to pay substantially one-third the cost of the project including rights of way for levees for diversions on the Sacramento River in one State, is it not fair and just for the Government to pay all costs for the rights-of-way levees for diversions and the damages to be done in the States of Louisiana, Arkansas, and Missouri, for the benefit of 31 States of the Union?

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. Yes.

Mr. SNELL. Is not the gentleman mixing up these two propositions? Does the gentleman take the position that we are paying more in the Sacramento Valley than we are willing to pay on the Mississippi proposition?

Mr. WHITTINGTON. I repeat my statement.

Mr. SNELL. The gentleman need not repeat his statement.

Mr. WHITTINGTON. Then I ask the gentleman to repeat his question.

Mr. SNELL. Does the gentleman maintain that we are paying more in the Sacramento Valley than we are willing to pay under our provisions at the present time for the Mississippi flood control?

Mr. WHITTINGTON. If you insist upon the local interests providing for the rights of way for levees on the flood ways and diversions through the States of Missouri, Arkansas, and Louisiana, then you are asking them to provide those rights of way entirely, while under the Sacramento project the Government is contributing one-third of the cost.

Mr. SNELL. I appreciate that, but under the Sacramento project they pay two-thirds of the entire cost.

Mr. WHITTINGTON. Undoubtedly.

Mr. SNELL. And we would be willing to agree with you to-day on any proposition that you can bring in, and pay one-third of that cost. We will even go further than that. We will pay two-thirds of the entire cost. The gentleman makes the statement here that the Government is not willing to do as much by you as we were doing by the Sacramento Valley.

Mr. WHITTINGTON. Instead of leaving that impression, I want to say, as I said in the beginning, you have gone to the extreme limit except as to diversions, but when you come down to the question of a million dollars for rights of way for levees along diversions you should go farther.

Mr. FREAR. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. Yes.

Mr. FREAR. Can you in your report find anywhere that the Government is paying any proportion of the levee expenses of the rights of way or anything else on the Sacramento River except that it contributes one-third? As it is there, it can be applied in any way you choose.

Mr. TILSON. Mr. Chairman, and to be fair about the Sacramento proposition, it should be said that that includes navigation, and that is a very large element, from the head of the Sacramento River down to the ocean.

Mr. WHITTINGTON. I want to say concerning the interests included here, of the appropriation that we ask for $325,000,000 in the pending bill, from $110,000,000 to $150,000,000 goes to navigation. That answers the gentleman from Wisconsin. The proposition does provide that the entire cost of the Sacramento is $51,000,000, of which the United States pays one-third; and I am for it, including rights of way and diversions.

Mr. FREAR. These things are mentioned, of course, in the report?

Mr. WHITTINGTON. Yes; and having made that statement, Mr. Chairman, I want to say——

Mr. WILLIAM E. HULL. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. Yes.

Mr. WILLIAM E. HULL. I want to straighten up some matters that are in my mind. Do I understand you to say that the South would be willing to raise the money to pay for the foundation of the levees along the diversions, provided that it is a million dollars, with the understanding that the Government assumes the flowage rights?

Mr. WHITTINGTON. Yes. As I said, I am speaking for myself, and if there is any way to embrace in this legislation a change in the law respecting the alluvial valley of the Mississippi—and I speak for myself alone—if we can do that, I will stand for it; and I may add, Mr. Chairman, that until somebody can suggest language whereby that will be done and can be done, I am for the bill as we agreed to report it here.

Mr. FULBRIGHT. Mr. Chairman, will the gentleman yield?

Mr. WHITTINGTON. Yes.

Mr. FULBRIGHT. Is the gentleman aware of the fact that the flood way in southeast Missouri is for the section at Cairo, Ill.?

Mr. WHITTINGTON. Yes.

Mr. FULBRIGHT. Does the gentleman say that it is a proper thing for Missouri to pay for the flood way?

Mr. WHITTINGTON. Missouri ought not to pay one cent for it. I am opposed to Missouri paying one cent for it, or for Louisiana or Arkansas paying a cent for the flood way. I think it ought to be done at the expense of the Federal Government.

The gentleman is aware that this matter can not be adjusted without the Federal Government. But if the cost of flood control is assumed by the Government, except the estimated costs of $1,000,000 for rights of way for levees on diversions and flood ways, I would personally like to see all the interests in the alluvial valley agree to assume the amount if the success or failure of this bill depends upon such a provision. At the same time the bill should provide that the Government will pay for and acquire the flowage rights through the diversions and flood ways.

The CHAIRMAN. The time of the gentleman from Mississippi has expired. The question is on agreeing to the first amendment offered by the gentleman from Illinois [Mr. REID], which the Clerk will report.

The Clerk read as follows:

Page 2, line 5, strike out the words "Secretary of War."

Page 2, line 6, strike out the word "two" and insert in lieu thereof the word "a."

Page 2, line 7, strike out the word "engineers" and insert in lieu thereof the word "engineer."

Mr. CRAMTON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CRAMTON. It was my understanding that an agreement was reached whereby these amendments should be voted on en bloc.

The CHAIRMAN. No. It was objected to. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the second amendment.

The Clerk read as follows:

Page 2, line 13, strike out the word "that" and in lieu thereof insert the words "the plans."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the third amendment.

The Clerk read as follows:

Page 2, line 16, strike out, beginning with the word "determine" to the word "such" in line 24, and insert in lieu thereof the following: "Recommend to the President such action as may be deemed necessary to be taken in respect to such engineering differences, and the decision of the President upon all recommendations or questions submitted to him by such board shall be followed in carrying out the project herein adopted. The board shall not have any power or authority in respect of such project except as hereinbefore provided. Such project and the changes therein, if any, shall be executed in accordance with the provisions of section 8 of this act. Such."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the fourth amendment.

The Clerk read as follows:

Page 3, line 5, strike out the word "further."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the fifth amendment.

The Clerk read as follows:

Page 3, in line 8, strike out the first word "as."

Page 3, line 8, strike out the words "as those protected by levees constructed on the main river."

Mr. MACGREGOR. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from New York rise?

Mr. MACGREGOR. Is this the proper place to move to strike out the last word?

The CHAIRMAN. Debate has been closed and the committee is voting on a series of amendments.

Mr. MACGREGOR. I understood that these amendments were to be taken up ad seriatum, and that there was no closing of debate. I simply want to ask the chairman of the committee a question.

Mr. WINGO. Mr. Chairman, I ask unanimous consent that the gentleman may have the privilege of asking the chairman of the committee a question.

The CHAIRMAN. The Chair will recognize the gentleman.

Mr. MACGREGOR. I would like to understand the import of this change. It is provided in the first instance:

That all diversion works and outlets constructed under the provisions of this act shall be built in a manner and of a character which will as fully and amply protect the adjacent lands as those protected by levees constructed on the main river.

Mr. REID of Illinois. The idea is that they do not want to have to build the same standard levees on the spillways as are now on the main river. It is a different construction and for a different purpose.

Mr. MACGREGOR. Does not the proposed language—I do not know whether I am right or wrong—make the Government at least morally liable in the future for all damages occasioned by any floods which take away these levees.

Mr. REID of Illinois. I would be glad to write that in if we could, but nobody has ever suggested that to-day.

Mr. MACGREGOR. You now have the language reading:

That all diversion waters and outlets constructed under the provisions of this act shall be built in a manner and of a character which will fully and amply protect the adjacent lands.

Mr. REID of Illinois. While they are building the spillways. I would be glad to write into the RECORD what the gentleman says.

Mr. MACGREGOR. I certainly would not be favorable to that idea.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the sixth amendment.

The Clerk read as follows:

Page 3, line 14, after the word "way," change the period to a comma and insert the following: "but nothing herein shall prevent, postpone, delay, or in anywise interfere with the execution of the project on the east side of the river, including raising, strengthening, and enlarging the levees on the east side of the river."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SHALLENBERGER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Nebraska offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SHALLENBERGER: On page 3, line 14, after the committee amendment and before the word "the," insert the following: "*Provided further*, That whenever the President shall ascertain from the Secretary of War or other agency that floods on the lower Mississippi can be controlled and prevented by construction of reservoirs for the impounding of waters in the Mississippi River and its tributaries, the construction of such reservoirs is hereby authorized, under the direction and supervision of the Secretary of War and the Chief of Engineers, and the appropriations authorized by this act are hereby made available for such reservoir construction."

Mr. SHALLENBERGER. Mr. Chairman and gentlemen, I do not intend to take the time of the committee but for a moment in order to express my reason for offering this amendment and why I think it important to a proper solution of this great question that it should be adopted. I think it is very clear to those who have studied the reports of the engineers who have been dealing with this matter that the final solution and permanent settlement of the prevention of floods in the Mississippi Valley depends upon the construction of reservoirs and the

impounding of the water in the tributaries and on the upper sources of the stream. Now, the debate we had between members of the Flood Control Committee just a moment ago proved very conclusively to me that the big problem we are now dealing with is the cost of the construction of the spillways and flood ways provided in the bill. I am going to make the statement that the control of floods in the Mississippi Valley, if the plan proposed in the bill is adopted, will not be brought about by the building of levees and walls of earth, but by the building of spillways and flood ways. Unless you store the waters of the tributaries in the upper sources of the river the great expenditure of money is going to be for the building of spillways and flood ways in order to carry off the floods you can not control. If we build reservoirs, we make use of the waters which otherwise run to waste and destruction in the lower valley.

By this amendment, which I have offered, we do not bind the President nor those in control of the operations to any particular plan, but we do include in the plan we are authorizing now a definite declaration that we authorize the expenditure of the money appropriated for any plan which the engineers deem best. I believe it will sooner or later be that of reservoir control.

Mr. REID of Illinois. Will the gentleman yield?

Mr. SHALLENBERGER. Yes.

Mr. REID of Illinois. I was wondering whether the gentleman will not wait and offer his amendment when we get to section 10 where we have a reservoir amendment. It is prepared and will be offered when we reach that section.

Mr. SHALLENBERGER. I believe I prefer to offer it here. Other amendments will be offered at that place, and I thought this was probably the proper place to offer my amendment.

If my amendment is voted down, other amendments may be adopted; but I will say to the chairman, that the people of the upper portions of the river are vitally interested in this matter. Those of us who live in the great northwest region of the Nation, who will have to in part pay for flood control, are also interested. This morning, to show you the intense interest taken in this problem out in the great Northwest, I found on my desk a clipping from a daily paper from the State of Nebraska, from our capital city of Lincoln, and after analyzing fully the importance of this problem and declaring it is a national problem, they wound up with this language. I quote from an editorial in the Lincoln, Nebr., Daily Star:

> Sooner or later the question of constructing dams and reservoirs all over the central western region, to hold back the water which converges in the Mississippi, will have to be taken up and dealt with. Nebraska and her neighboring States are greatly interested in that phase of the problem, which contemplates the use of such diverted waters for irrigation and power purposes. The Federal Government will be expected to aid in constructing the water-storage system, but the States will no doubt be willing to do their part.

So we on the tributaries are ready to do our part in providing sites and paying our share to carry out the storage-reservoir principle.

Mr. McKEOWN. Will the gentleman yield?

Mr. SHALLENBERGER. I yield to the gentleman.

Mr. McKEOWN. If the President should find that the reservoir system is effective, then the Government of the United States would not have to pay all of the cost of the reservoirs because there would be contributions.

Mr. SHALLENBERGER. There would be contributions and, furthermore, we would not have to spend such enormous amounts for spillways. If we stored but one-half of the water on the watershed, then the great problem of spillways would be partly met, the cost of the land that you are going to overflow and the matter of damages under the plan we have here, would be greatly reduced.

I offer you in the valley a plan of salvation and I am giving you a chance to accept it now. [Applause.]

Mr. SIMMONS. Mr. Chairman and gentlemen, I have not taken any part in this debate up to this point, preferring to listen in order that I might find out some things that many of us western men do not know about the South. My colleague from Nebraska, Mr. SHALLENBERGER, has presented to you what a great many people in the United States deem to be a rational, sensible solution of this flood-control matter; and that is, to change the flood waters of the Mississippi Valley from a national liability into a national asset, changing them from a damaging and destroying power to a power for the production of great national wealth through irrigation and the creation of water power and furnishing of water for navigation by the construction of storage reservoirs.

I live in the heart of a great reclamation project that the Congress of the United States authorized and the Government built from the reclamation fund. As a boy I have seen the river that goes by my home town early in the spring out of its banks, sweeping over our bridges, destroying the approaches spring after spring. Now, since this and other projects have been in operation there is the least amount of water in the North Platte River passing through Wyoming and Nebraska in the flood period of any period of the year. The flood waters are held in storage. The greatest amount of water coming down that river is in July and August. What has happened? There has been built up in Wyoming beyond the city of Casper a great reservoir, the Pathfinder. Supplemental reservoirs are being built. These dams can be regulated and the quantity of water held so that they take the flood water year after year and fill this reservoir with it. Then what happens? Throughout all of the summer months that stored water is being spread over 500,000 acres of fertile land. Not only the water that is used for the plant in its life is stored and taken out of the river but that 500,000 acres of irrigated land is itself a great reservoir, storing the water in the soil. That water comes back in the fall months into the river and goes on down the stream, contributing to a regular orderly flow throughout the year.

We western folk believe that by putting this tributary control into the flood-control scheme, and as a part of it the proposition of building reservoirs, of developing lands for irrigation, of developing hydroelectric power for industrial uses, of regulating the flow of water for navigation, is at least a sensible solution in part of this flood problem. If you adopt the amendment that the gentleman from Nebraska [Mr. SHALLENBERGER] offers, it indicates that the Congress is willing to at least try out this plan of control, and it will be an indication, too, to us in that section of the country that you believe in developing our section of the United States as well as protecting your own.

My folk are paying dollar for dollar back into the Federal Treasury; every cent the Government of the United States has spent on this project, and we are controlling your floods in part as we are doing it.

You are asking that you pay not a cent of the cost of your development. Give us, in this amendment, recognition of the thing that we in the tributary States are asking for, and that is a control, in part, of these things, by storage reservoirs furnishing power and water for development. You will change these waters from a thing you people do not want, a damage-doing agency, to a wealth-creating force, and you will be doing the thing that all of us want, and that is making the Missouri and the Mississippi——

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. SIMMONS. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. SIMMONS. You will be contributing materially, likewise, to making the Missouri and the Mississippi navigable streams 12 months in the year, and that is something likewise that we of the Mississippi Valley all want.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. SIMMONS. I yield to my colleague.

Mr. SHALLENBERGER. Will the gentleman also call the attention of the committee to the fact that my amendment is very general in its terms and leaves the final determination of the whole problem to the President and his advisers with respect to the use of this money.

Mr. SIMMONS. Yes; and it does recognize the principle and authorizes the expenditure of the money under such circumstances. The plan is sensible, it is feasible, and it will not cost more than the present plan. It will make these waters develop and not destroy a great section of the United States. [Applause.]

Mr. HOWARD of Nebraska. Mr. Chairman, I rise in support of the amendment. I want in a few words to bring to the attention of the members of this committee who do not live in our great prairie realm the absolute and unquestioned importance and necessity for legislation, which I hope will grow out of the amendment, if adopted, offered by my colleague from Nebraska [Mr. SHALLENBERGER].

Men of the House, let me tell you our story so that you may understand it. We in Nebraska live in a prairie zone. There is no timber in Nebraska, save that which has been planted by the hand of man. There is no coal, there is no mineral of any kind. But out there most of us are Christians, and we are believers in the goodness of God Almighty. He did not give us any coal under the prairies of Nebraska, but He gave us a splendid substitute in the form of two of the most regularly

flowing rivers in all the world that have ever been gauged by any reliable government.

Now, if we could harness the waters of these rivers and set them to the task of generating electric energy and supplying it to the people at a low price, what would it mean to us?

Oh, my friends, those of you who have never lived in a prairie realm, you do not know what it is to be in the clutches of Coal Trust as we do. Suppose that we could get the waters of the rivers harnessed, after having them carried to reservoirs, to be used a part of the time for irrigation and a part of the time for generating electricity. What would it mean to us?

Why, my friends, it would mean the absolute relief of Nebraska from the clutches of Coal Trust, because if we could do this we never would want to buy coal in Nebraska, even if we could get it for a dollar a ton. Why? Because if we could harness these waters and have them generate electrical energy it would be sufficient to heat and light every public and private building in all that prairie realm, turn the wheels of all machinery, and still have enough left to cook all the food for all the people.

Why is it, my friends, that that vast natural asset of ours is not employed and used for the benefit of the people? I do not know. Some say that the reason we are not able to harness the waters in these wonderful rivers in Nebraska is because of the power and machinations of that mysterious thing we call Power Trust. It may be true, I do not know, but, my friends of the House, those of you who know nothing about the situation of our people out in the prairie zone, will you not believe those of us who come from the prairies when we tell you that our fond hope for the harnessing of the rivers can now be best put in the way of ultimate consummation by the adoption of the amendment offered by my friend from Nebraska, Mr. SHALLENBERGER. [Applause.]

Mr. LAGUARDIA. Mr. Chairman, I hope the committee will not treat this amendment lightly, but will give it very serious consideration. The amendment offered by the gentleman from Nebraska [Mr. SHALLENBERGER] brings before the House two distinct schools of thought in the matter of flood control. The one contained in the bill, I might say, is to regulate the defects from nature, while the one suggested in the amendment offered by the gentleman from Nebraska corrects the defects of nature. By the methods in the bill we simply build levees, provide flood ways and spillways, and wait until the flood comes and then permit this flood of water with terrific power to inundate and flood millions of acres of land and cause immense damage. Besides there is always the constant fear of flood in these flood-way areas.

Now, by the amendment offered by the gentleman from Nebraska, instead of waiting for the flood to come and destroy the lives and properties, we collect these waters, harness this power in a series of reservoirs upstream and along the tributaries, so that they may be released in uniform quantity during all seasons, and not only prevent a flood but utilize this tremendous water power for useful purposes, so that instead of being a curse to the Mississippi Valley we can make it a blessing to the people of the valley.

Now, gentlemen, it can not be urged by the committee that they, the committee, are not sympathetic to the method suggested by the gentleman from Nebraska, because in section 12 of the bill now before us they provide for a survey to do the very same thing which the gentleman from Nebraska suggests should be done. In other words, the reservoir plan and the utilization of the water power of the main stream and tributaries is recognized in theory by the committee in section 12, while the amendment offered by the gentleman from Nebraska [Mr. SHALLENBERGER] puts that theory into practice.

In other words, the Committee on Flood Control preaches this system, while the amendment of the gentleman from Nebraska [Mr. SHALLENBERGER] puts into action that which the committee and the bill preaches.

Mr. MADDEN. Would the gentleman from New York do this before he found out how many billions it is going to cost?

Mr. LAGUARDIA. No matter what it costs, instead of purchasing these millions of acres, instead of this water going to waste, you can utilize this water, and if we do not do it to-day and Congress does not do it next year the time will come when our successors will take this matter up and deal with it in the very way suggested by the amendment of the gentleman from Nebraska and wonder why we to-day lacked the vision and foresight in the light of past experience and the advanced stage of engineering of our time.

Mr. WILLIAM E. HULL. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. WILLIAM E. HULL. In this last flood does the gentleman think that these reservoirs would have done any good?

Mr. LAGUARDIA. Oh, all of the water would not be in one reservoir. All of the water of the flood did not come from one tributary. It came from various tributaries.

Mr. RAGON. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. RAGON. If these reservoirs in Oklahoma are as feasible as the good engineers have said they are, you would not have had any flood on the Mississippi if the reservoirs had been there, because water of sufficient quantity fell in that region to make a volume of over 740,000 cubic feet in a hundred miles.

Mr. LAGUARDIA. Exactly. We all know that the water does not come from one source or from one tributary. One tributary may be flooded and not cause a flood in the lower Mississippi. A major flood only happens when conditions are such that there is an undue and abnormally large amount of rainfall in all the sections during the same season, so that all of the tributaries are flooded, which naturally sends down such an abnormal flow as to overflow the lower bed of the main stream.

Mr. RAGON. And I call further attention to this, that even the Army engineers who made this survey, about whom there is some question in respect to their bias or prejudice, have said that you may amply control the Arkansas and the White Rivers and that their waters could have been controlled in the last flood by reservoirs. If you had done that, you would have taken out of the volume of 2,000,000 cubic feet per second on the Mississippi at Natchez 1,200,000 cubic feet contributed by those two rivers.

Mr. LAGUARDIA. Certainly. The committee recognizes the fact, because they have included the idea of a survey in section 12 of the bill. Instead of having a survey on something so elementary, in the name of common sense, you friends of flood control, come to the rescue now and give us a chance to do something constructive, something that is in keeping with the age in which we are living, and provide a scientific method to control this great problem. I hope gentlemen will give this amendment serious consideration and put it in the bill where it belongs.

Mr. McKEOWN. Mr. Chairman, I ask to have read in my time the following discussion of this matter by the Manufacturers' Record, of Baltimore, Md.

The CHAIRMAN. Without objection, the Clerk will read.

The Clerk read as follows:

MANUFACTURERS' RECORD,
*Baltimore, Md., April 19, 1928.*

DEAR SIR: The leading editorial in this week's issue of the Manufacturers' Record, copy of which is inclosed, contains a suggestion of what we believe to be the logical and only feasible solution of the jam into which flood control has been thrown.

General Jadwin has admitted that the plan worked out by the Interstate Commission for control of the Arkansas and Red Rivers is accurate in cost estimates, and that it will prevent floods in those rivers exactly as its proponents say it will. Further, he admits that it will take from 3 to 4 feet off the crest of floods in the Mississippi River below the mouth of the Arkansas. The States of the interstate compact—that is, the States drained by those two rivers—stand ready to contribute 40 or 50 per cent of the cost of the project, leaving about $60,000,000 for the Federal Government to pay.

It seems safe to say that two other large tributaries of the Mississippi—the Ohio and the Missouri—can be proportionately controlled by reservoirs on their many subtributaries. Could this be done—and General Jadwin has admitted that it is possible—the degree of control of the Mississippi resulting from control of these three rivers alone would be:

Below the Missouri (3 to 5 feet), 3 to 5 feet.

Below the Ohio (6 to 8 feet), 9 to 13 feet.

Below the Arkansas (3 to 4 feet), 12 to 17 feet.

General Jadwin has admitted that this much reduction, could it have been secured, would have prevented all danger of damage from the 1927 flood; and he has further admitted that it could be had, though he said the cost would be upward of a billion dollars. But this plan would cost no more than the plan submitted by General Jadwin, now admitted to require an expenditure of somewhere in the neighborhood of $1,500,000,000; it would protect thousands of miles of tributaries, as well as the lower valley, thus eliminating further costly works there; and it would command millions of dollars of local support, leaving only a reasonable portion for the Federal Government to pay.

Why can not the leaders of the Mississippi Valley, the Arkansas and Red River Valleys, the Missouri Valley, the Ohio Valley, and of the other tributaries that desire protection from their local floods, get together and determine to carry this plan through? We believe it could be done.

Very truly yours, MANUFACTURERS' RECORD.

Mr. McKEOWN. Mr. Chairman, the purpose of this legislation is this: If the President of the United States shall find by investigation of his agents and engineers that flood control can be accomplished along the tributaries and the waters that enter the tributaries, and if he further finds that it could be done economically and the money expended be reimbursable to the Government, then it would not be necessary to expend our millions and millions of dollars on the works in the lower Mississippi. Does it not stand to reason that there ought to be two plans before we spend all of our money on the lower reaches of the Mississippi? There is not a single State in the whole 31 along the tributaries that would not make the money in a large measure reimbursable, and the commission would find that it is in a great extent reimbursable. So is it not common sense to give the President two propositions, so that he can use his judgment and save money as well as accomplish the result of flood control? I favor the adoption of this amendment.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. SNELL. Mr. Chairman, I am not opposing this amendment at this time because of the fact that I am opposed to the reservoir scheme of controlling the flood waters on these large rivers. As a matter of fact, I made an extended speech upon that proposition some time ago. I am opposing the proposition at this time because we should not adopt such a scheme without knowing something about it. This is a tremendous proposition, which might go into one or two billions of dollars, and we are asked here to adopt it as a simple amendment, when it means more in fact than all the rest of the bill. It might take all of the money that we are appropriating at this time to make the surveys and lay out these propositions; it might all be expended on the reservoir schemes and not anything on the lower Mississippi Valley, to protect which is the main object of the bill, if it is to be taken out of the funds appropriated at this time. Later on in the bill there is provision for complete surveys to investigate the whole reservoir proposition. I want that to be done, but certainly it would be death to this bill to adopt this amendment at this time and say that without coming back to Congress, without a completed plan, without any definite knowledge of any kind, yet we will authorize these most extensive construction of reservoirs.

Mr. McKEOWN. This provides that the President should do this if he shall find it feasible. It is not positive.

Mr. SNELL. These reservoir projects are definitely authorized by that amendment and, if adopted, we lose control, except such as comes through the Appropriations Committee.

Mr. SHALLENBERGER. If the gentleman will permit me, the amendment simply provides that if the President shall ascertain, from the Secretary of War or any other agency, that the floods on the lower Mississippi can be controlled by these reservoirs, then he will be authorized to build these reservoirs.

Mr. SNELL. Yes; and there is no doubt in my mind that if you spend money enough, of course, you could control the floods in that way; but the amount of money might be so much that it would be out of the question.

Mr. SHALLENBERGER. The President is allowed, under the amendment offered by the committee, to use his judgment as to where every dollar shall be expended under the present plan, and I simply add to it that if in his judgment he wishes to use the money elsewhere he can do so if the judgment of the engineers and his agency is that that is the way to use the money.

Mr. SNELL. It is provided that if they could be controlled in that way they are authorized to do so, but the Lord only knows how much money it would take. We certainly ought to know how much it will be before we adopt such a comprehensive plan.

Mr. WHITTINGTON. Mr. Chairman, will the gentleman yield?

Mr. SNELL. Yes.

Mr. WHITTINGTON. I want to ask the gentleman from New York if under the provisions of the amendment proposed here we will not do two things: First, if it will not prevent investigation and surveys of reservoirs, just the same as the amendment which provides that it shall report to Congress?

Mr. SNELL. It supersedes that.

Mr. WHITTINGTON. This provides that the President or the Secretary of War after investigation shall report on the floods of the lower Mississippi Valley. Such a report has already been made. I read from substance of the report of the Secretary of War on that point furnished to the President:

The reservoir board reports that reservoirs are not economically justifiable in connection with a comprehensive plan for flood control in the Mississippi Valley at the present time. Reservoirs that would give a dependable reduction of flood height of 5.7 feet at Cairo, 6.9 at the mouth of the Arkansas, and 5.4 at the mouth of the Red River are estimated to cost $1,296,000,000. Equivalent protection can be given by levees for $250,000,000. The best reservoir project found, in addition to the reservoirs at the mouths of tributaries, for the flood control in the lower valley is a system of 11 reservoirs on the Arkansas and White Rivers, at an estimated cost of $242,000,000, and these reservoirs would have reduced the floods at Arkansas City by about 8 feet. The probability is that even these reservoirs would require the destruction of fertile lands in the valleys of the Arkansas and the White more valuable than the lands they would protect along the Mississippi River. In addition, the costs of protection would be very much greater for the construction of reservoirs.

I think they ought to be investigated. The Secretary could make that report now. Is it not a fact that these reservoirs could be considered in connection with section 4?

Mr. SNELL. It is fully covered in section 10.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SNELL. Mr. Chairman, may I have five minutes additional?

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. SNELL. Yes.

Mr. CRAMTON. I will ask if it is not a fact that if the Shallenberger amendment should become a part of the law it would give the President the option of following the reservoir plan and dropping the other plan entirely?

Mr. SNELL. Yes. When we agree upon this proposition we have lost our control as far as reservoirs are concerned and perhaps the other.

Mr. SIMMONS. Of course, the Congress will have the right to pass on the amount when we come to the appropriation. You can not irrigate lands and you can not develop water power by surveys. You always tell the western Members, "We will give you a survey." That is what you tell us on river development. Now, the Congress has authorized the survey of these projects, and the United States has paid the cost, and the reports are before Congress, and you know how much power there will be and how much water can be stored. That information is all brought here.

Mr. SNELL. We want it all brought before the House so that the House can discuss it before any work is entered upon.

Mr. SIMMONS. We are asking that we have authority, if the President deems it advisable, to come before the Congress and the Committee on Appropriations and ask for the money.

Mr. SNELL. We want the membership of this House to be given the right to pass upon it, and not leave it entirely to the Appropriations Committee.

Mr. SIMMONS. You have it now.

Mr. LOZIER. Mr. Chairman, will the gentleman yield?

Mr. SNELL. Yes; I yield.

Mr. LOZIER. Is not the logical effect of this amendment, if adopted, to confer upon the President the power of adopting a great national project and policy without first having submitted it to Congress for approval?

Mr. SNELL. Yes. That is something that Congress has never been willing to do heretofore, and I do not think it is willing to do it now.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. SNELL. Yes.

Mr. McKEOWN. Suppose it should be found that the reservoir system would cost the Government less money and be more effective than the levee system on the lower Mississippi River. Should we not have the right to adopt it?

Mr. SNELL. Yes; and furthermore if the board suggested that proposition to Congress, we might immediately adopt it. But do the people of the lower Mississippi Valley want to wait 1 year or 10 years for that? I ask, gentlemen, if they want to wait?

Mr. McKEOWN. But here is the proposition: Does the gentleman want to commit Congress to the expenditure of $300,000,000 or $400,000,000 in the lower Mississippi without giving the President authority to see whether the other plan is feasible or not?

Mr. SNELL. I am perfectly willing to commit this Government to a certain amount to take care of the lower reaches of the Mississippi River at this time without going into a full investigation of the reservoir scheme.

Mr. LaGUARDIA. Will the gentleman yield?

Mr. SNELL. Yes.

Mr. LaGUARDIA. The committee just adopted an amendment offered by the gentleman from Illinois which gives the President the power to select one of two projects. That is the

bill as it is now before us, and with a certain proviso in the bill we have already conferred the power to which the gentleman now objects.

Mr. SNELL. No; that is entirely a different proposition than the one we are now discussing.

Mr. LAGUARDIA. The gentleman has in mind the amendment just adopted by the committee?

Mr. SNELL. No; I do not know just what the gentleman has in mind, but I do know that there is not an amendment in this bill providing for the adoption of the reservoir proposition without submitting it to Congress.

Mr. GIFFORD. Mr. Chairman, before a vote is taken upon this amendment some of us not so intensely interested as they who live in this territory, but interested because of responsibility of the Treasury, should express ourselves. I suggest that all of us have studied the proposition, and I wish to say to the committee that immediately after the flood I looked over the CONGRESSIONAL RECORD and read over again a splendid speech made by the gentleman from Mississippi [Mr. WHITTINGTON] about a year before the flood, in which he insisted that the only feasible method, quoting engineers of the last 100 years, was the levee method and that spillways were not practical. It is now shown that when you build 100 miles of levees at the mouth of the river it is necessary to build the next 100, and so on. We who live on the ocean know that when we protect our beaches that it is absolutely necessary for our neighbor to protect his beach or the waters will undermine his property. We are told by engineering authorities—and I presume the gentleman had this in mind in 1926—that after you build a spillway and experience a few floods the force of the main river is only distributed and is finally only as effective as the original stream. These engineers for 100 years back seem now to be discredited, although we have had many serious floods before. However, after the flood of 1927 our friend from Mississippi [Mr. WHITTINGTON] changes from "levees only" and believes that spillways are now practical, although in the face of his most exhaustive argument of two years ago. They now ask us to waste all of the water and not provide any opportunity of conserving it. I am sympathetic with the gentleman from Nebraska and those who have spoken before him for this form of amendment. We are anxious to do something to conserve those waters. We feel that reservoir control will return something to the Government for the large sums we will spend for flood control. Let the tributaries have a chance to be considered, at least, in the great sum of $325,000,000, which is to be expended. I believe we should give the President and the board some authority with reference to reservoirs, if it is found practical. It may be proven that they can build reservoirs in some localities, which would assist in flood control. We should not provide for the expenditure of all this large sum of money for the building of spillways and flood ways only until the reservoir plan is most carefully considered. I was greatly impressed by this speech of the gentleman from Nebraska [Mr. SEARS], who spoke here so enlighteningly about two weeks ago. I have read this speech several times, and I would plead his cause and those of the semiarid regions for the conservation plan. Do not ask us so violently to spend all of this money on spillways, which Mr. WHITTINGTON claimed were not practical, and engineers assure us that after three or four floods we could dump into the Gulf only the amount of water as was the capacity of the river before such outlets were constructed. [Applause.] [Cries of "Vote!" "Vote!"]

Mr. FREAR. You gentlemen are shouting "Vote!" "Vote!" We have been sitting for five months and listening to evidence with reference to this proposition, and yet you are objecting because we want to have a few minutes in which to learn the truth and pass it around to you.

Mr. Chairman, the engineers made a long examination of the subject of reservoirs. Frankly, I do not believe they know much about reservoirs because of limited time afforded, but they have made a long examination. The engineers had another body examining into the question of diversion, and they also reported. There were five subcommittees among the engineers, and some 200 engineers were engaged in this work. They reported to our committee and stated that a reservoir system would cost in the neighborhood of $1,500,000,000. Now, here is the situation that impressed me more than all else in their report—that it would take a long period to make a complete determination of what the cost was going to be for reservoirs and what the effect would be upon the flood waters of the lower Mississippi. In response to a question I put to them they said that if you could shut off all of the rivers in Nebraska; for instance, cutting off the river completely, the Pathfinder Reservoir and all others, it would not make a difference of over one-sixteenth of an inch at Cairo at that time. Now, frankly, I am not prepared to accept that as being a sufficient answer.

But this is the question that confronts us here just as it did in the committee. It will take a very long period to determine the cost of reservoirs and the influence they will have on the lower Mississippi River. It may be several years, and surely it will be over a year, because there are so many questions that are involved in the provision.

Mr. BLACK of Texas. Will the gentleman yield?

Mr. FREAR. I yield to the gentleman from Texas.

Mr. BLACK of Texas. In view of that situation, does the gentleman think it would be wise at this time to adopt the amendment which has been offered by the gentleman from Nebraska [Mr. SHALLENBERGER]?

Mr. FREAR. I am just coming to that. This is a question of great seriousness, and we all ought to have a fair understanding of it no matter how we may vote.

Mr. JACOBSTEIN. Will the gentleman yield?

Mr. FREAR. In a moment. Let me discuss and explain something that has not been presented to the House. We permitted section 12 to be inserted in the bill. Section 12 requires a complete survey of all of the tributaries to ascertain what effect the reservoir system will have, and included in that is the power question and all these other propositions. The only serious question, to my mind, or the most serious one, is that it will take such a long time before we can give relief to the people down in the lower valley and therefore we ought to do something at this time. It will take the Army engineers about a year to go on and bring the levee grades up to height, in addition to providing the spillway at Bonnet Carre to protect New Orleans and look after the diversion opposite Cairo at New Madrid. This will take possibly several years. Whether or not we will gain anything by holding back the project, in view of the fact that we have to let contracts and take care of the work incident to that, is for the House to determine.

I was a member of the committee at that time, and we felt it was going to mean great delay. There is a large question involved in this reservoir system and I have presented the facts to you just as fairly as I can.

Mr. HASTINGS. Will the gentleman yield?

Mr. FREAR. Yes.

Mr. HASTINGS. Then we have the assurance of the gentleman from Wisconsin to support sections 10 and 12, in substance, when reached.

Mr. FREAR. I do not see any objection——

Mr. HASTINGS. Do we have the assurance of the gentleman from Wisconsin to that effect?

Mr. FREAR. I do not see any objection to that. I think it is important to have a survey. I think we ought to have all the intelligence and all the information we can have furnished by the engineers or by any other authority. If I were going to criticize the amendment at all, it would be because the President on the support of the Secretary of War or any other agency may proceed at once. Just think what a wide proposition you have in this amendment. Nothing like that is proposed in the bill. Here you have a survey which is to be brought back to Congress and we will then ascertain what the merits are.

Mr. JACOBSTEIN. Will the gentleman yield?

Mr. FREAR. I yield to the gentleman from New York.

Mr. JACOBSTEIN. If we adopt this amendment, are we precluded from going ahead any faster on the reservoir system, and if we do construct the reservoir system later on, have we spent money unnecessarily?

Mr. FREAR. Oh, yes; but I am not necessarily worried over that.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. FREAR. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. FREAR. Even if we spend $100,000,000 in a large proposition of this kind it is small when compared with the total amount involved, because in any question of flood control, as suggested by the gentleman from Nebraska, Governor SHALLENBERGER, there is a provision with respect to water power and so many other instrumentalities that are to be developed that we can afford to spend the money. The only thing that disturbs me, I do not want to have the whole project delayed.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. FREAR. Yes.

Mr. SHALLENBERGER. Right in connection with that statement I want to call the gentleman's attention to the fact

that my amendment does not prevent work being started on the lower valley. It simply provides that in the course of construction work, at any time the agencies of the Government which the President relies upon, the Chief of Engineers or any board that he constitutes, shall determine that the project can be benefited by building reservoirs, the President is then authorized to build them.

Mr. FREAR. I understand that, and in any event I am not fearful as to the results; it is only a question of the time involved. That is what I have in mind.

Mr. LAGUARDIA. The attitude of the gentleman from Wisconsin, as reflected by his last statement, stabs me to the quick. The gentleman does not contend that the amendment offered by the gentleman from Nebraska, if adopted, would delay the necessary preliminary work in the lower Mississippi.

Mr. FREAR. If it takes only a year I concede it would not, except so far as letting contracts and advancing the absolutely necessary work you have to proceed with this year. You must remember, however, it is going to take 10 years to complete this project. It is not a question of one year; it is going to take 10 years to finish it, but I do not want needlessly to delay it.

Mr. CROSSER. Mr. Chairman and members of the committee, when one considers the terrible ravages of the Mississippi floods, surely he can not remain indifferent to the subject of flood control. I have long been deeply impressed with the urgent need of providing a remedy for the terrible floods that have caused so much loss of life and property.

Many millions of dollars have been spent in an effort to control the floods in the Mississippi Valley. Most of the work done has been worse than wasted, for it has done much harm instead of good, and has been contrary to all scientific principles. The proper method for the correction of any evil requires that we first determine what is the cause of the trouble and then that we shall endeavor to neutralize or overcome that cause. This has never been done in the case of the flood evil in the Mississippi Valley, nor indeed has it been done anywhere else in the United States. We have spent many millions of dollars to build levees; that is, great embankments alongside of and a little distance back from the natural banks of the river, and the result has been that every flood has been more disastrous than the floods which preceded it.

The theory advanced by the Army engineers to justify the building of levees was that the added force resulting from confining the stream within levees would expend itself on the bottom of the river bed, and would tear up and carry away material from the bottom of the river and so deepen the channel. Mr. Lyman E. Cooley, one of the leading waterway engineers of the United States, when discussing this made the following comment:

> The wish seems to have been father to the thought. * * * Unhappily, the river does not seem to have exercised any wise selective power; in fact, it seems to have discriminated in favor of the banks.

Yes, that is exactly what happens; the river tears away the banks instead of removing material from the bed of the stream.

No effort to control the mighty waters of the Mississippi River, when, uncontrolled, they have reached the lower end of the valley, can be successful. The reason why floods are now greater and more destructive in the lower part of the Mississippi Valley than was the case in the early history of the country is that man has removed many natural obstructions which formerly retarded the flow of the water which fell on the land of the upper Mississippi Valley. When the United States Government came into existence great forests covered the land which surrounded the streams which flow on to form the upper Mississippi River. The leaves of the trees of the forests helped to impede the flow of water which fell in the form of rain or snow. The dead leaves which lay on the ground below the trees further hindered the flow of the water which created the smaller streams, which in turn moved on to form the mighty Mississippi River. When these forests were removed and the lands were devoted to agriculture, or occupied by cities and towns, the water falling upon the ground flowed into the streams with greatly increased rapidity. After a heavy rain or sudden melting of heavy snowfalls the streams of the upper Mississippi Valley rise very quickly and, of course, rush on with great rapidity to empty into the main stream which can not at once accommodate such a great volume of water. No more water goes into the Mississippi River than formerly. The trouble is that it now empties into the river more rapidly.

The Government should, wherever possible, engage in a system of reforestation. This, however, will not alone remedy the evil which now confronts us. We must provide a remedy which can be applied more promptly. That remedy, in my opinion, could be provided by the construction of a sufficient number of reservoirs properly located on the upper tributaries of the Mississippi River. Such a system of reservoirs on the tributaries would enable the Government to not only control the water level in the rivers, but would in reality aid navigation, make possible the irrigation of large tracts of land now practically useless, and would develop water power more than enough to pay the whole cost of building the system of reservoirs.

When it is shown how logical and reasonable is the reservoir plan of controlling floods, those who want to hold to the old idea of levees now say that to be of any use for water power we must have reservoirs full of water, and to be of any use in the control of floods we must have empty reservoirs. Men who make that objection do so because they lack a complete understanding of the proposed reservoir plan. The reservoirs should be large enough to make possible not only the development of water power by the streams when at their average height, but the reservoir walls should be built high enough above the point where water power can be developed, so that there will be plenty of space behind the walls to hold the excess waters resulting from floods. The excess water would be held in the reservoir until it could be allowed to flow out gradually from the reservoirs into the river channels and without danger to any of the country lying below the reservoirs. If great dams were built at suitable locations on all of the tributaries of the Mississippi there would be no difficulty in regulating almost precisely the level of the Mississippi River.

The unanswerable logic of the plan which I have urged should appeal to anyone. To those, however, who are never willing to adopt a proposal on the basis of principle and who must always know before adopting a plan that it has already been in successful operation elsewhere, I might say that Germany, Austria, Russia, France, and Spain have all applied the principle to control floods in certain of their rivers.

What I have said very briefly states the fundamental principles of systematic flood control. Let me say, however, that for the thorough and comprehensive treatment of the subject we should provide for the cooperation of several of the departments of the Government which, because of the duties and functions given them by law, are particularly interested in the subject of the control of waterways.

For that reason, while I was a member of the Flood Control Committee when it was first organized, I introduced on May 2, 1926, a bill for flood control and for the utilization of flood water for constructive and beneficial purposes. The bill proposed the establishment of a national waterways council, to consist of the President of the United States as chairman, the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, and the chairman of a water control board, which was to be appointed by the waterways council, and which was to devote itself exclusively to the subject of water control. The national waterways council was, by the terms of the bill, to cooperate with the States. The enactment of such a bill would have provided for the systematic control of the waterways of the United States. It would have provided for the control of floods and yet would have kept in view the fact that the excess water of floods could be used for irrigation purposes. It would have provided reservoirs for the development of water power, but would also at the same time have considered the advantages and necessity of providing reservoirs not only large enough to provide for the development of water power but large enough to hold as long as necessary the excess water of floods. In a word, the streams of the country under such a council could have been controlled so as to prevent damage and at the same time confer a positive benefit upon the people of the United States. Later, when the flood control bill, reported favorably by a majority of the committee, came before the House for action, I offered a substitute for the committee bill. That substitute embodied the same principles as the bill I had previously introduced, and presented the proposal which I am now again advocating. The plan, however, was not adopted. It was, however, a relatively new idea and, as usually is the case with new ideas, it was rejected. If they have not seen a thing done, or have not read in a book that it has been done, the reason and imagination of many men do not enable them to know that it could be done. We find, therefore, that after having done in 1916 all that the Mississippi River Commission asked Congress to do, the country suffers more from floods than was the case before we did what the commission requested us to do.

Congress relied upon the assurances of the chairman of the House Flood Control Committee, Mr. HUMPHREYS, and the majority of the committee, who said that if we should provide the money that they were asking for the building of levees, the people of the Mississippi Valley would no longer suffer from the ravages of floods. These gentlemen were given the money they requested and yet what has been the result? In the year

1927, the worst flood in the history of the country brought disaster and untold misery upon the people of the Mississippi Valley.

Let us cease the folly of spending hundreds of millions of dollars to build embankments alongside the lower part of the Mississippi River in a vain effort to hold back from the farms and towns the flood water which has accumulated in the upper part of the Mississippi Valley as a result of the junction of the swollen tributary streams. Let us begin to control the cause of the evil by providing at least for the building of a system of reservoirs in which to hold the flood waters accumulating in the upper tributaries. The water can then be released with perfect safety to the territory lying in the lower part of the valley, but it can also be made of value to the people by using it for irrigation purposes and to produce water power. The expense would be only apparently greater for such a plan would eventually produce enough revenue to pay for the cost of constructing the reservoirs and other works. We should not, however, where human life is in danger, haggle about a supposed greater cost. I say supply the proper remedy now and we shall not be asked in the future for millions of dollars to rebuild levees which have been destroyed as we might reasonably have expected that they would be destroyed when such unscientific methods were adopted.

Mr. MADDEN. Will the gentleman yield?

Mr. CROSSER. I will.

Mr. MADDEN. The gentleman referred to the fact that in 1916 he, as one of the members of the minority, made certain proposals. He was a member of the majority then—the Democrats were in control.

Mr. CROSSER. I am not referring to partisan politics. I was not indulging in political twaddle.

Mr. MADDEN. The gentleman stated he was a member of the minority.

Mr. CROSSER. I said that I was in the minority of the Flood Control Committee.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. HASTINGS. Mr. Chairman, I am heartily in favor of this amendment, whether it be added to section 1 of the bill or to sections 10 or 12.

The people of the Nation have been studying the question of reservoir control and are deeply interested in it, and the more it is examined the more, I am sure, they will be in sympathy with it.

This is an additional method of flood control, and we have no doubt of its ultimate adoption.

The importance of this bill has been repeatedly emphasized. It is one of major importance to the entire Nation. The flood of 1927 was a tragedy. While its disastrous results are vividly fixed upon our memories we should enact legislation which will afford protection in so far as it is humanly possible.

I congratulate the Rules Committee in giving the time which has been allowed by this resolution for the consideration of this question. We were assured of liberal time being allowed for the consideration of amendments which are to be proposed.

Those who represent the sections of our country most disastrously affected are appealing to Congress for adequate protection. The people whom they represent have their backs to the wall. They are entitled to have the sympathetic consideration of Congress. I am sure they will have it.

For more than 100 years we have been making appropriations, but they have not been adequate for protection against the more disastrous floods. I concur in the repeated statement that this is a national question.

First. The floods on the lower Mississippi do not originate there. They come from the watersheds which wholly or in part drain 31 States, which in times of floods pour streams with torrential force through the lower Mississippi, resulting in great loss of life and the destruction of property difficult to estimate. We therefore should not look at the question from a local standpoint but should view it as it is, a national question.

Second. It is urged that there must be local contributions and yet it is admitted that this should be waived in those localities where the people are unable to further contribute for the protection of themselves and their property. The hearings disclose that they have already contributed some $292,000,000, and if this is viewed as a national question this is far more than their share of local contribution, and these previous payments should be considered in the enactment of this legislation.

Third. The Mississippi is navigable and under the complete control of the Federal Government.

Fourth. The interests of the various units in the same or different States are antagonistic and neither the people, the drainage districts, counties, or States will voluntarily contribute to the purchase of land for flood-control purposes for the benefit of those inhabiting lower sections. Neither the State of Missouri nor those living in the southeastern counties thereof will bond, tax, or voluntary contribute for the protection of those living below in the northeastern part of the State of Arkansas, yet a break in Missouri is disastrous to the lives and property of the people living below in the State of Arkansas. The same argument applies with equal force to the several counties and drainage districts within the same State.

It is insisted that all property necessary to be condemned for use in the building of levees or spillways in connection with flood control on the lower Mississippi should be paid for by the people locally because the cost would be much less than if the financial burden for this puprose is borne by the Federal Government. Any amendment presented drawn to protect the Government against real-estate speculation and at the same time permit the work to go forward will receive the careful consideration of Congress—no one wants excessive damages paid. As a matter of practice most of these lands will be acquired through agreements and resorts to the courts will only be occasionally taken. Whether this property belongs to the poor man who owns a few acres, or to his more fortunate neighbor, who owns a larger tract, only fair and reasonable compensation should be paid.

We therefore favor the enactment of such legislation as will protect as adequately as possible the people who inhabit the States bordering on the lower Mississippi River. The levees there should be repaired and strengthened and such other improvements made as are recommended by the best engineers of the country.

We repeat that we are viewing this situation in the lower Mississippi from a national standpoint, and comprehensive legislation should be enacted as will insure permanent protection against the recurrence of these great disasters.

It is urged that the cost will be prohibitive. This argument does not appeal to me. I do not want to see a dollar unnecessarily or extravagantly expended. I am for the strictest economy. This legislation should be so carefully prepared as will insure the Government against graft and reduce to a minimum extravagant waste. This can not always be avoided in public work, but we should enact legislation to minimize and safeguard it as much as possible. The work should be placed under competent supervision.

If the people of the Nation are satisfied that they will get 100 cents' worth of benefit out of every dollar expended, they will be satisfied.

I do not believe that we should place the money authorized to be expended in the balance against the human equation of protecting the lives of the people and of preventing the suffering and disaster that befell them along the lower Mississippi in 1927. When we enact legislation, as we will, providing for a comprehensive plan of flood control, we will make only annual appropriations, and Congress must see to it from year to year that the work is not only efficiently done but that all opportunities for graft and extravagance are either eliminated or reduced to a minimum. The greatest care should be taken to protect the Government both in legislation and administration.

We have been making appropriations and enacting legislation for flood protection in a more or less inadequate manner for 100 years. The question now arises: Shall we resort to the levy system or to levees and spillways without the testing of every other method which may be presented for our consideration? We who live in States not immediately adjacent to the Mississippi express our deep sympathy with those who live in the lower reaches of the great valley. The picture presented of the great flood of 1927 is a harrowing one. We say to you that this picture is not complete unless our vision permits us to take a comprehensive view of the entire 31 States from whose watersheds the drainage comes to produce these great disasters. The people of my State are tremendously interested in this important question. One of the great tributaries of the Mississippi, the Arkansas River, is 1,460 miles long. It rises in Colorado and gathers force and volume as it flows through Kansas, Oklahoma, and Arkansas, emptying into the Mississippi. Great disasters occur along this river and its tributaries. Congress has made appropriations for this river since 1832. I live a few miles distant from the Arkansas River, which flows through my district, and have intimate knowledge of the disasters which have occurred in previous years, particularly in 1927, along this river and its main tributaries. These disasters are of more or less annual occurrence. In 1927 we witnessed this mighty river pouring its torrential volume of water with great force toward the Mississippi River, spreading out 5 to 10 miles in width over the richest agricultural land that may be found in the entire Nation, taking its toll of lives, sweeping away homes, destroying crops of incal-

culable value, doing permanent injury to the land itself, undermining and destroying highways, interrupting the commerce of that section of the country by destroying bridges and interfering with the mails. In my home city the train service was so interrupted that mail was not received for almost a week, the first mail being brought in by motor transportation. This picture is not overdrawn, and while we are willing to sympathetically view the picture of the lower Mississippi and to assist in the enactment of legislation that will afford adequate and permanent protection, we appeal to the Representatives of that section, and the entire membership of this House, that we should view the entire picture and enact constructive legislation embodying a comprehensive plan to remedy the situation.

For 75 years the Arkansas River was navigable and is now so recognized by the Government, to the confluence of the Grand and Verdigris Rivers, near Muskogee, Okla. Appropriations have been made for this stream as far north as Wichita, Kans. Shortly after the Civil War railroads were built through that country, which was then sparsely settled. The Arkansas River fell into disuse. The appropriations and improvements were discontinued. The trees were felled along the banks of the river, and these banks were by erosion carried into the bed of the stream, the channel filled and changed, until within the past 25 years little use for navigation purposes has been made of this river. The neglect has been with Congress. We, therefore, who represent States drained by the major tributaries of the Mississippi in turn appeal to the Members of this House and urge the consideration of a comprehensive national plan for flood control.

We are deeply interested, therefore, in the sections which provide for surveys and flood control of the tributaries. Much important data have already been collected through the efforts of the Representatives of these States and the best civil engineers engaged, who have spent a great deal of time in making surveys, assembling data, and making a comprehensive study of the question. The best civil engineers obtainable report that reservoirs can be constructed at a reasonable cost for the impounding of the water when floods are menacing which will sufficiently reduce the volume in the lower Mississippi that, in connection with levees already built, after they are repaired and strengthened, will afford adequate protection to that section. It will also protect the people along these major tributaries from the results of disastrous floods, such as they experience almost annually, culminating in the great flood of 1927. It is estimated that in my State alone we lost from twenty-five to forty million dollars' worth of property. The flooded area in the Arkansas River valley and its tributaries in Oklahoma covered 782,300 acres.

We are therefore deeply interested in those sections of the bill which provide for surveys for the major tributaries of the Mississippi, including the Arkansas River and its tributaries, and authorizing the expenditure of $5,000,000 in addition to the amounts authorized in the river and harbor act of January 21, 1927, and a study of the reservoir system for flood control.

We would prefer to have these surveys made under the direction of the board that is created by section 1 of the bill rather than through the Corps of Engineers. The report of the engineers compels us to reach the conclusion that they are prejudiced in advance against the reservoir plan of flood control. Their report insists that the cost is prohibitive. The best civil engineers whose services have been utilized insist that the cost of the construction of these reservoirs, adequate for flood control, will be reasonable. These civil engineers have spent a great deal of time in collecting data and in the consideration of this important question. The report of the Army engineers, we insist, is upon a superficial examination of the question. We believe, therefore, that the board created by section 1 would give a more unbiased and a more sympathetic consideration to the reservoir plan of flood control.

It is true that section 10 provides that before the reports of the Army engineers are presented to Congress they shall be presented to the board. We feel that the data will be collected and so arranged that it will not be presented in an unprejudiced way to the board. If these surveys were made under the direction of the board so as to insure an open-minded consideration of the reservoir plan, and reports expedited, we would be satisfied with the conclusions that would be reached. We also believe that the cost of the construction of reservoirs on the Arkansas and its major tributaries would not exceed the damage done by the 1927 flood alone.

I have confidence that if section 10, in substance, stays in the bill with the expenditure of $5,000,000 authorized, that the feasibility of the plan of reservoir control will be acknowledged and that reservoirs will ultimately be constructed not only to the great benefit of the flood protection along the lower reaches of the Mississippi River but for the benefit and protection along the Arkansas River and its major tributaries below the sites selected for the reservoirs. That means, of course, protection against disastrous floods in the future. It means incidentally the reclaiming of great bodies of productive land to the farmers for cultivation. It means navigation renewed on the Arkansas River and reduced competitive freight rates. It means the protection of commerce, the Federal highways, and the roads over which the mails are carried. We believe that this will be money wisely expended. In my judgment, it should be regarded as an investment. We should have courage to enact such legislation as will adequately meet the needs of the situation.

It has been suggested on the floor and in the press that legislation, except along certain lines, will be met with Executive disapproval. The responsibility is upon Congress to study this question, to originate and enact legislation that will meet the situation. When passed, the responsibility is transferred to the President. The Flood Control Committee of the House has held hearings upon this bill for three or four months. Every phase has been presented and considered. I am not willing, as a Member of the House, to permit the question of cost to prevent me from supporting a comprehensive plan of flood control provided it is safeguarded against graft and waste reduced to a minimum.

It has been suggested by the chairman of the Committee on Rules [Mr. SNELL] that amendments to the bill are to be presented for the consideration of the House, and it is intimated that these amendments will not only be perfecting amendments but far-reaching in their character. It is also suggested by the dissenting member of the Flood Control Committee [Mr. FREAR] that certain amendments are in course of preparation and will be presented.

In fairness to the House, these amendments should have been printed and offered at the beginning of the debate, so that they might have had the study of Members before they are presented for consideration later on. I will consider each amendment on its merits when presented and vote for those which my best judgment may approve.

I would like to make myself clear upon two points: First, I am in favor of the most rigid economy. I would not vote for a dollar for flood control or any other purpose which was not recommended as necessary, and I want every dollar of that money efficiently expended, and its expenditure safeguarded by legislation enacted by Congress to eliminate graft and to reduce extravagance to a minimum. If under the expenditure authorized by section 10 of this bill the reports, as I believe they will, compel the building of reservoirs, I am sure adequate appropriations by Congress will follow.

Second, I am supporting this bill for flood-control protection, with the assurance that section 10 providing for the survey of the major tributaries of the Mississippi will be retained in the bill. Of course, the argument used in behalf of the Arkansas River and its tributaries applies with equal force to the other major tributaries authorized to be surveyed by section 10 of the bill. We should not take a narrow or sectional view of this legislation. We have a right to expect that this section, in substance, will be retained. Let me warn my fellow Members that if this section is eliminated and no provision is made for a survey and a study of the major tributaries and their contributing streams, I shall be compelled to withhold my approval of this legislation. I can not vote for a bill that discriminates against my State and district. We have a right to expect fair treatment of all sections of the country at the hands of Congress. We do insist, however, that in so much as our people have suffered so greatly that they have a right to have the reservoir plan of flood control examined and carefully studied, which we believe will compel its acceptance.

In criticizing this plan of flood control the report of the engineers in support of the levee system insists that the bed of the lower Mississippi is not raised by the deposit of silt, sand, gravel, and erosion carried into it from the major tributaries, and, therefore, they argue that building up and strengthening the levees will afford adequate protection. This is against the experience of every barefoot boy who has played and fished along the minor streams in every section of our country. They know that after a heavy rain falls silt and sand and gravel form sandbars, filling up and frequently changing the channels of the smaller streams near their source. This is true where the fall is much greater and the current, therefore, stronger than in the lower reaches of the Mississippi where the bed is so level that the momentum of the current presses the water on to the Gulf. It is against the experience of all who have lived along the larger streams where erosion causes the banks to cave in and to fill up the bed of the stream and frequently change its current. If this be true where the fall is greater and the current stronger it must of necessity be true in the lower Mississippi River bed. If the bed of the Mississippi is

raised, of course the height of the protecting levees is correspondingly lessened. We insist, therefore, that with the surveys made as provided in section 10, in which we are so vitally interested, that it will compel the adoption of the reservoir plan of flood control and this in turn will afford flood protection to an area extending in whole or in part over 31 States of the Union. Of course, such a comprehensive plan will necessitate the authorization of a large expenditure of money, but we ought to legislate for the permanent benefit of this wonderfully rich area which produces the agricultural products, not only to sustain the people of this country, but also contributes to the happiness and prosperity of the entire citizenship of the Nation.

Let me remind you, in conclusion, that in the settlement of our foreign obligations we remitted to the people of the European countries in interest the staggering sum of $10,705,000,000. We should not, therefore, hesitate because of its cost to come to the relief and protection of our own citizenship in the enactment of such legislation as will result in permanent benefit to them and to the people of the entire Nation.

If this bill is enacted retaining the provisions in substance as are found in section 10, I am going to vote for it. If that section is eliminated or if combinations are made so as to emasculate the bill, either in the House or in conference, I shall take the course which my best judgment dictates when a vote is finally had in the House either upon the bill, the conference report, or the threatened presidential disapproval.

Finally, I want to insist that this responsibility is upon Congress and that we will not be meeting the expectations of the country if we do not fully assume our part of the responsibility and direct in detail this flood-control legislation.

Mr. REID of Illinois. Mr. Chairman, I ask unanimous consent that all debate upon this section and all amendments thereto be closed in 12 minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that debate upon this section and all amendments thereto close in 12 minutes. Is there objection?

There was no objection.

Mr. SCHAFER. Mr. Chairman, ladies and gentlemen of the House, I made the statement a few days ago that I wanted to support flood-relief legislation and would vote for this bill if certain amendments were included. I believe we should adopt the pending amendment submitted by the distinguished gentleman from Nebraska [Mr. SHALLENBERGER]. It is a step in the right direction, because in the final analysis the levees and spillways are not the real solution of the flood-control problem We have to control the waters in the tributaries if we are to give proper protection to the valley. [Applause.] I know that the great Power Trust in this country does not want the tributaries controlled and reservoirs and dams built where power may be generated, which will come into competition with their business. We should adopt this amendment and send word to the country that this Congress favors sound, complete, and effective flood control and not merely a patchwork plan.

I call attention to another amendment which I shall offer at the proper time. I propose to offer an amendment on page 5, line 12, after the word "pay," to insert:

*Provided*, That in no event shall the compensation paid for property used, taken, damaged, or destroyed exceed the assessed valuation for taxing purposes, plus 100 per cent of such valuation.

I think this is a reasonable amendment which every Member should support, especially those from the valley States who are constantly reminding the country that there is no pork in the pending bill.

Mr. DENISON. Why make it so large?

Mr. SCHAFER. I am making it large so that no Member of the House can vote against it because it is not large enough.

Mr. COX. Does the gentleman think that the provision would be sustained in law? Does he not recognize that it would be unconstitutional?

Mr. SCHAFER. I would rather await the opinion of the highest court of the land in respect to its constitutionality than take that of the distinguished genleman. We have had similar limitations in legislation providing for purchase of property in the District of Columbia. We know that when the Government of the United States is in the market for property that the owners generally demand three, four, and five times the assessed valuation. There was read into the RECORD the other day some telegrams from great lumber and land companies showing that they would sell their land for $10 an acre; but the telegrams indicated that they reserved the minerals and the timber. Those lands are practically valueless after the timber is taken off and the minerals reserved. With the timber on these lands I am frank to state that if we look into the assessment rolls of the various districts, we will find they are not assessed on a value of much more than 50 cents an acre. A dollar or two an acre at the very most. Vote for my amendment when it is offered, and send the word to the country that this Congress is not going to leave the door wide open for any exploiting of the Treasury. [Applause.]

Mr. HOWARD of Oklahoma. Mr. Chairman, I am in full accord with the amendment offered by the gentleman from Nebraska [Mr. SHALLENBERGER]. I have prepared and intended to offer an amendment at the end of section 10, reading as follows:

Line 20, page 10, after the word "section," add: "*Provided further*, That the surveys herein provided for shall be made simultaneously with the flood-control work on the Mississippi River provided for in this act, and if said surveys made on these tributaries shall disclose any flood-control projects which in the judgment of the commission herein provided for would be effective in controlling or assisting in controlling the floods on the Mississippi River, the President is hereby empowered to include such flood-control projects as a part of the work of controlling floods on the Mississippi River, and there is hereby made available for such purpose or purposes any part of the moneys for flood control on the Mississippi River authorized to be appropriated by this act."

When it comes to real flood control in the entire Mississippi Valley, where flood control is needed just as much on one river as the other, this amendment is the most important portion of the entire bill. We who believe in a great and comprehensive plan of flood control believe that the control of the tributaries is the most important part of this work. It is from the tributaries that the waters come that cause the floods on the Mississippi. If there were no floods on the tributaries the people of the lower Mississsippi would not be in peril.

We have believed and still believe that had the Army engineers given due, broad, and scientific study to tributary control through reservoirs that all the controversy that has arisen as to the cost of rights of way for spillways would have been averted, as many, if not all of them would not have been needed, and the sites for reservoirs would have been much cheaper than the rights of way for spillways. We are not yet convinced but if provisions are made, and they are made drastic enough to compel the proper study, that an honest administration of flood-control work will, to a very considerable degree, revert to the reservoir and tributary-control plan.

Why not? Experts who have studied the situation claim, and it is claimed that General Jadwin has admitted, that a reservoir plan on the Arkansas River would have reduced the flood crest of 1927 on the Mississippi from 3 to 4 feet, and those who have made surveys on the Arkansas River maintain that this could have been done for a cost of about $70,000,000 for the Arkansas alone, and would not only have reduced flood control on the Mississippi from 3 to 4 feet, but would have insured flood control on the Arkansas and its tributaries.

This plan on the Arkansas alone would have resulted in lowering the flood crest on the Mississippi from 3 to 4 feet. Experts who have studied the question claim that the same kind and extent of control on the Ohio would have reduced the Mississippi crest from 6 to 8 feet. They also claim that by following the same plan on the Missouri River they would reduce the Missisippi crest from 3 to 5 feet.

Thus we find the situation to be: Were the reservoir and tributary plan followed on these three rivers they would have reduced the flood crest on the Mississippi in any recorded flood from 12 to 20 feet.

It is claimed, and records disclose, that if the flood crest on the Mississippi had been reduced by this amount, or one-half of this amount, all danger and damage on the Mississippi in the flood of 1927 would have been avoided. Then I inquire why not control floods in this way and make flood control on both the Mississippi and its tributaries permanent and economical?

And why should not Congress adopt the amendment just offered, for it would yet open up the way for those in charge of flood control to do it if the facts after this survey justified the findings above? This amendment in no way interferes. It makes no additional appropriation. It can do no damage and merely makes it optional, but it does do this: That should the plan of reservoirs be found feasible or partly feasible, it would avoid any delay in asking Congress for further instructions.

I hope the chairman of the committee and the Congress will see fit to accept this amendment.

Mr. O'CONNELL. Did General Jadwin make the statement the gentleman referred to before the Flood Control Committee, or was it made in some private statement?

Mr. HOWARD of Oklahoma. General Jadwin's report indicates that reservoirs would control the Arkansas River and its tributaries, and my argument is that if they will do it, what

harm can this amendment do? We appropriate no money and increase in no way the cost to the people, but we do give an alternative plan here, if the President and the engineers in charge find that they can save money and control the floods.

Mr. WINTER. The gentleman speaks of an alternative plan. He means an additional plan, does he not?

Mr. HOWARD of Oklahoma. Yes. I can see no harm in this amendment. It may be that these experts, when they get some civil engineers on the job who are not prejudiced against these reservoirs, who are not in the position of the Army engineers of having made an office survey, and when they have made a real scientific survey, will control these floods through reservoirs both on the tributaries and on the Mississippi. Let us adopt this amendment. [Applause.]

Mr. REID of Illinois. Mr. Chairman, I would like to reiterate every good thing that has been said about the reservoir system. I think it is the ideal method of preventing floods on the Mississippi River at some time, because everybody knows that a big flood is nothing but a lot of little floods coming together at the same time.

The introduction of such an amendment is an ideal method of killing this particular piece of legislation, and therefore I hope you will vote down the amendment at this time. My original bill provided for reservoirs in a similar way, and my having it in there was the occasion of commentaries by people appearing before the committee, and was used as an excuse to belittle my bill and for saying it would cost a billion dollars, and thus wipe it off the board so far as concerns the proposition at this time.

Mr. SHALLENBERGER. My amendment is not binding on the President to spend a dollar.

Mr. REID of Illinois. No. But it permits the use of the appropriation on reservoirs and does not provide whether you will give one-tenth or do it for nothing. It is ill-advised at this time, and consequently I hope the amendment will be defeated.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. O'CONNELL. Mr. Chairman, may we have the amendment again reported?

The CHAIRMAN. Without objection, the amendment will be again reported.

The Clerk read as follows:

Amendment offered by Mr. SHALLENBERGER: Page 3, line 14, after the committee amendment and before the word "The," insert the following: "*Provided further,* That whenever the President shall ascertain from the Secretary of War or other agency that floods on the lower Mississippi can be controlled and prevented by construction of reservoirs for the impounding of waters in the Mississippi River and its tributaries, the construction of such reservoirs is hereby authorized, under the direction and supervision of the Secretary of War and the Chief of Engineers, and the appropriations authorized by this act are hereby made available for such reservoir construction."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Nebraska [Mr. SHALLENBERGER].

The question was taken; and on a division (demanded by Mr. SHALLENBERGER) there were—ayes 107, noes 111.

Mr. LaGUARDIA. Tellers, Mr. Chairman.

Tellers were ordered; and the Chairman appointed Mr. REID of Illinois and Mr. SHALLENBERGER to act as tellers.

The committee again divided; and the tellers reported—ayes 107, noes 114.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. MADDEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MADDEN: Page 3, line 15, after the end of section 1, add a new paragraph, as follows:

"All unexpended balances of appropriations heretofore made for prosecuting work of flood control on the Mississippi River in accordance with the provisions of the flood control acts approved March 1, 1917, and March 4, 1923, are hereby made available for expenditure under the provisions of this act except section 13."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois [Mr. MADDEN].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. HASTINGS. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question with reference to the fixing by the President of the salary. I invite attention to the proposed amendment on page 8, beginning with line 12 and ending with line 18. I want to ask the gentleman whether or not that did not provide for the salaries of the commission?

Mr. REID of Illinois. One is for the board and one is for the commission.

The CHAIRMAN. Without objection, the Clerk will correct the spelling of the word "contiguous," on page 3, line 13.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 2. That it is hereby declared to be the sense of Congress that the principle of local contribution toward the cost of flood-control work, which has been incorporated in all previous national legislation on the subject, is sound, as recognizing the special interest of the local population in its own protection, and as a means of preventing inordinate requests for unjustified items of work having no material national interest. As a full compliance with this principle, in view of the great expenditure, estimated at approximately $292,000,000, heretofore made by the local interests in the alluvial valley of the Mississippi River for protection against the floods of that river; in view of the extent of national concern in the control of these floods in the interests of national prosperity, the flow of interstate commerce, and the movement of the United States mails; and in view of the gigantic scale of the project, involving flood waters of a volume and flowing from a drainage area largely outside the States most affected, and far exceeding those of any other river in the United States, no additional local contribution to the project herein adopted is required.

With a committee amendment.

Mr. LaGUARDIA. Mr. Chairman, a point of order.

The CHAIRMAN (Mr. CRAMTON). The gentleman will state it.

Mr. LaGUARDIA. It is not legislation. It is simply a declaration of sentiment and feeling. Otherwise there is no legislation in it. It is like a "whereas" clause in a resolution.

The CHAIRMAN. Unless the gentleman from New York desires to be heard further, the point of order is overruled. The Clerk will report the committee amendment.

The Clerk read as follows:

On page 4, line 9, strike out the word "additional."

The CHAIRMAN. The question is on agreeing to the committee amendment.

Mr. FREAR. Mr. Chairman, what is the committee amendment?

The CHAIRMAN. The Clerk reported the committee amendment. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. LUCE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LUCE: Page 4, line 10, after the word "required," strike out the comma and insert the words: "*Provided,* That in all cases where in execution of the flood-control plan results, in the opinion of the board created in section 1 of this act, in special benefits to any person or persons, or corporations, municipal or private, or public-service corporations, such benefit shall be assessed upon the property benefited and shall constitute a lien thereon, and shall be collected by such proceedings as the Secretary of War may prescribe, which proceedings shall provide for deferred payments to such extent as may be deemed just and reasonable under all the circumstances."

Mr. REID of Illinois. Mr. Chairman, I reserve a point of order against the amendment.

Mr. LUCE. Mr. Chairman, the injection of what may at first blush seem a novel proposal into the consideration of a bill of this sort at this stage does not invite speedy acceptance, I well realize, but possibly later in the journey of the measure the proposal may receive adequate consideration, if that is impossible now. But the suggestion is not wholly novel. In section 4, which we are told will disappear from the bill, there is essentially this proposal but applying only to such lands as might in part be taken. This is the principle of betterments. There is no logical reason why the principle of betterments should apply only to land to be taken in part and not apply to adjacent land, chancing to be outside the limits of the actual construction. It has been in my State for 60 years an accepted principle, one now become a political and social habit, that the unearned increment accruing to private owners of property as a result of public improvement shall be taken by the community to reduce the cost of that improvement.

Mr. DENISON. Will the gentleman yield?

Mr. LUCE. Certainly.

Mr. DENISON. Before the improvement is undertaken in your State, is it not submitted to a vote of the people?

Mr. LUCE. The improvement itself?

Mr. DENISON. Yes.

Mr. LUCE. Oh, by no means.

Mr. DENISON. Does the gentleman maintain that this Government can provide an assessment in one State for an improvement done in another without consulting the people themselves, and that that can be made a lien upon property in another State and their property taken from them if they do not approve it?

Mr. LUCE. I maintain that the practice is constitutional in those of the States that follow it and that it is constitutional for the Federal Government to say that unearned increment shall not accrue to private owners of property as the result of public improvement. That may be presumed to have been the justification for putting it, in part, into section 4.

Mr. BLACK of New York. Will the gentleman yield?

Mr. LUCE. I yield.

Mr. BLACK of New York. Does the gentleman contend that it is constitutional for the Government to levy a direct tax on any real estate?

Mr. LUCE. I do not admit that this is a tax. This is what is known in various States of the country as a special assessment. I am told by an Indiana Member that in his State the benefits that result from drainage undertakings are assessed not only in the case of the bottom lands but also that the assessments go away up into the hill lands, and no man is allowed to benefit unrighteously by the expenditure of public money. The gentleman who told me this thought the same system prevailed in Illinois and in some of the other Western States.

Mr. DENISON. Of course, that system prevails, but before an improvement is undertaken there must be a vote or a petition signed by a certain number of the people whose land is affected. The Government can not undertake an improvement and impose a burden upon property without consulting the people.

Mr. LUCE. I think the gentleman discloses lack of familiarity with the principle as we have applied it in New England to the great benefit of the community and with fair play to all concerned. Now, let me get down to the concrete facts.

Mr. McSWAIN. Will the gentleman yield?

Mr. LUCE. Yes.

Mr. McSWAIN. If the amendment should be enacted into law, I wish to suggest to the gentleman the propriety of requiring that the Secretary of War shall give notice to all parties whose lands may be affected by a lien to show cause why there may not be an assessment made in compensation for betterments, so they may have had their day in court and the question of constitutionality may then not be raised.

Mr. LUCE. The amendment is necessarily brief, for I did not desire to include the whole law of betterment or special assessment, but I was proceeding on the expectation that the Secretary of War, with the advice of the Attorney General, would go ahead in a constitutional and legal manner.

Mr. COX. Will the gentleman yield?

Mr. LUCE. I yield to the gentleman from Georgia.

Mr. COX. Is the gentleman contending that the Federal Government has a revenue-raising power which it can exert as against the States?

Mr. LUCE. I do not concede that this is a revenue-raising power.

Mr. COX. The amendment of the gentleman provides that the principle of benefit assessments shall be exercised.

Mr. LUCE. I do not concede it is an exercise of the taxing power. It is the exercise of the right to take away from those who have not earned it money that would otherwise go into their pockets.

Mr. COX. But certainly the gentleman is not contending that the Federal Government can exercise any such power as against the States.

Mr. LUCE. It is not the exercise of taxing power against the States. This does not require a local contribution or a local levy of any sort. It says to the great lumber company that is going to get a million dollars increase in the value of its land, "You have not earned this $1,000,000, and it should go into the Public Treasury to pay for the cost of the improvements."

Mr. COX. Certainly the gentleman does not contend that the Federal Government can exercise any such power.

Mr. LUCE. I absolutely do so contend. It was put into the fourth section of the bill. Why did the gentlemen who put it in the fourth section permit it to go there if we could not exercise that power?

Mr. COX. The gentleman is entirely in error.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. SHALLENBERGER. Mr. Chairman, I move to strike out the last word. I want to submit a question to the gentleman from Illinois [Mr. MADDEN], if I may have his attention. I would like to ask the gentleman if he can state to the committee just how much additional appropriation we carried in the amendment of the gentleman which appropriates unexpended balances of the past?

Mr. MADDEN. It is just the unexpended balance of the appropriation for flood control which we have been making of $10,000,000 a year. We have now $10,000,000 pending.

Mr. SHALLENBERGER. Can the gentleman state how much money that would add to the $325,000,000?

Mr. MADDEN. I think it would add $10,000,000, or very close to it.

Mr. BANKHEAD. Mr. Chairman, I understand a point of order has been reserved to the amendment.

Mr. REID of Illinois. Mr. Chairman, I withdraw the point of order.

Mr. GARRETT of Tennessee. Mr. Chairman, I renew the point of order. I do not care to discuss it, but I make the point of order it is not germane to the section.

The CHAIRMAN. The Chair will be pleased to hear the gentleman from Massachusetts on the point of order.

Mr. LUCE. Mr. Chairman, the first consideration in the matter of this point of order is that the whole subject is thrown open by the stump speech that makes up 95 per cent of the section. That part of the bill has no place in the law. We regularly strike out preambles. We do not ordinarily put reasons and arguments into our legislation, but when we do try to put them into the law itself we open wide the whole subject with such an academic expression of opinion and such a statement of historical fact as here appears. This sort of thing invites litigation and then controversy every time the statute comes into court. Now, gentlemen, when you opened the door wide you invited every kind and type of amendment. This is the first answer I shall make to the point of order, and it is the case of the King of France going to the French city and the council coming out and apologizing because the mayor did not present himself. They said the first of 10 reasons was that the mayor was dead. This first of the 10 reasons why this section is open to amendment in any particular relating to the whole subject suffices, in my judgment, and there is no need to give the rest.

If it is not to be opened to amendment in this particular, possibly when section 4 is reached the amendment may be renewed and may receive further consideration by the committee.

Mr. NEWTON. Will the gentleman yield there?

Mr. LUCE. Yes.

Mr. NEWTON. I will call the gentleman's attention to lines 19, 20, 21, 22, and 23, and the broad language used there which calls attention to the special interest of the local population. That certainly ought to form some basis for the gentleman's amendment.

Mr. LUCE. And I would add to that pertinent consideration by calling your attention to this other language, adequate as a basis for proposing an amendment of this sort:

As a means of preventing inordinate requests for unjustified items of work having no material national interest.

The demands of certain corporations interested in the lands of this valley might be inferred from the words, "unjustified items of work," and "inordinate requests" might be construed to cover the whole proposition.

The CHAIRMAN (Mr. LEHLBACH). The Chair is ready to rule. The first sentence of section 2 reads as follows:

SEC. 2. That it is hereby declared to be the sense of Congress that the principle of local contribution toward the cost of flood-control work, which has been incorporated in all previous national legislation on the subject, is sound, as recognizing the special interest of the local population in its own protection, and as a means of preventing inordinate requests for unjustified items of work having no material national interest.

After a further recital the section continues that in view of the gigantic scale of the project, and so forth, no additional local contribution to the project herein adopted is required. By committee amendment the word "additional" is eliminated.

The amendment offered by the gentleman from Massachusetts [Mr. LUCE] provides for the assessment of special benefits accruing to any persons, corporations, municipal or private or public service corporations, and provides that the assessment of such benefits upon the property benefited shall constitute a lien thereon. The point of order is that this provision is not germane to the subject matter of section 2. Without going exhaustively into the question, the Chair deems the amendment in furtherance of the declaration of policy in the first part of

the section and hence germane. He therefore overrules the point of order. The question is on the amendment offered by the gentleman from Massachusetts.

The question was taken; and on a division (demanded by Mr. LUCE) there were 87 ayes and 90 noes.

Mr. LUCE. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. LUCE and Mr. REID of Illinois.

The committee again divided; and the tellers reported that there were 110 ayes and 118 noes.

So the amendment was rejected.

Mr. FREAR. Mr. Chairman, I move to amend by striking out of section 2 all after the words "national interest," in line 23.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. FREAR: Page 3, line 23, after the word "interest," strike out the remainder of the section.

Mr. FREAR. Mr. Chairman, I concur in the statement that section 2 is largely a stump speech. This policy of contribution has always been pursued by the Government in regard to flood control. It is pursued in case of the Sacramento proposition in this same bill and it ought, to my mind, to be continued.

The second part of the project is of the same character and I will point it out. It says:

As a full compliance with this principle in view of the great expenditure estimated at approximately $292,000,000 heretofore made by the local interests in the alluvial valley of the Mississippi River for protection against the floods of that river.

That is money spent for levees. During the course of 50 years, or it may be 100 years, of such expenditure it does not state anything with regard to how much they benefited by that expenditure. They may have had in crops and other benefits a hundredfold that amount. I do not know that anyone knows the fact. It seems to me it has no relation and we ought not to prejudice a good principle by that provision. By striking it out it interferes in no way with the other parts of the section.

I do believe, as the gentleman from Massachusetts [Mr. LUCE] declared on the floor, that on every occasion where it can be made, where the Government goes in and puts in money and permits the local States to benefit, those benefits should be charged to them. The fact is that the committee was so strongly in favor of the amendment of the gentleman from Massachusetts that we almost passed it with over 100 votes. I am in favor of contribution.

Mr. BANKHEAD. Would not it put us in a ridiculous attitude for the committee to adopt the gentleman's suggestion—striking out the latter part and leaving in the first part, that we do believe in local contribution?

Mr. FREAR. I am willing to strike it all out.

Mr. RAINEY. Mr. Chairman, the narrow escape the bill had from complete destruction a few minutes ago emphasizes the fact that the friends of this legislation ought to remain on this floor. A proposition socialistic in the extreme, and not dreamed of by any advocates of the single-tax system, narrowly escaped incorporation in the bill. It was only defeated in the committee by seven or eight votes. The speech of the gentleman from Massachusetts introducing the proposition itself was made the vehicle for another insinuation that somewhere in these spillways which are to receive the surplus flood of this river—somewhere there is a lumber company which may profit to the extent of a million dollars by the adoption of this bill with its provision for spillways.

Mr. LAGUARDIA. What is the name of the lumber company?

Mr. RAINEY. There is no such lumber company. The insinuation was that somewhere there is a lumber company which may profit greatly and to the extent suggested by the gentleman from Massachusetts if this bill becomes a law.

I challenge that statement and all similar statements that there are lumber companies in these proposed spillways which will recover enormous sums of money if the plan is adopted. The statement was made early in this debate by the gentleman from Wisconsin [Mr. FREAR] that there are lumber companies, namely, the Tensas Lumber Co., operating in the Cypress Creek spillway, owning 225,000 acres of land, and other great lumber companies were enumerated in that particular indictment of this bill.

Mr. WILSON of Louisiana. Mr. Chairman, if the gentleman will yield, in order to keep the RECORD straight, the Tensas Delta Land Co. is not a lumber company.

Mr. RAINEY. I thank the gentleman for his contribution to the facts. After the publicity had gone out over the country that these companies were to profit and to obtain all the way from $50 to $75 an acre for their land, then the telegrams commenced to come from these companies addressed to the gentleman from Louisiana [Mr. WILSON]. He commenced to put them in the RECORD, and we were surprised to learn that the Tensas Land Co. insisted that its lands, the fee to its land, timber rights, mineral rights, if there are any, everything of value connected with the land, was not worth to exceed $10 per acre, and much of it was not worth to exceed $5 an acre.

Mr. SCHAFER. Those telegrams incorporated in the RECORD do not indicate that $10 an acre included the mineral and timber rights. The telegrams specifically exempted those rights.

Mr. RAINEY. Oh, what the gentleman thinks he knows about flood control would fill a great many volumes, but what the gentleman does know would not fill one.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. RAINEY. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN? Is there objection?

There was no objection.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. RAINEY. Yes.

Mr. SCHAFER. The RECORD will speak for itself as between the accuracy of my statement and the statement of the gentleman from Illinois.

Mr. RAINEY. I yielded only for a question. What does the Government want with coal 60 feet under ground, when it simply wants to run water over the surface of the ground? What does the Government want with timber standing on the ground when it only wants to run water through the timber on the way down to the Gulf? But the gentleman from Wisconsin [Mr. SCHAFER] is continually injecting into this debate, no matter what the facts are, no matter what the companies are willing to take for their land, that they all retain the mineral and timber rights. What in the world does the Government want with coal and the minerals and the timber in order to flow water through the timber and over the land down to the lower part of the river and on to the Gulf?

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. RAINEY. I can not yield for the present. I understand that in this spillway where the Tensas Land Co. operates there are 3,750,000 acres of timberland. The gentleman from Louisiana [Mr. WILSON] has already received telegrams and has placed them in the RECORD, accounting for perhaps 600,000 acres of that land. Those telegrams fix the value of the flowage rights over all of it. Nobody can substantiate the extravagant amounts that the gentleman claims were demanded for this land, $50 and $75 an acre, at the opening of this debate.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. RAINEY. Yes.

Mr. MADDEN. I wonder if my colleague is right when he says that all that they demand of the Government is the cost of the flowage rights. My understanding is, and I may be wrong, that they are demanding that the Government shall buy the title to the land. If that is true, there is quite a difference as to what it will cost.

Mr. RAINEY. If that is true, that would make some difference, but if that is true the title to this land could not be worth over $5 or $10 an acre. It is worth only one-seventh as much as the House has been told it was worth.

Mr. MANSFIELD. And in that case the mineral and timber rights would not be reserved.

Mr. WILSON of Louisiana. The flowage rights would be bought, except such land as may be necessary for the construction of the levees.

Mr. FREAR. Does the gentleman contend that the flowage rights of these 4,000,000 acres can be purchased for $5 to $10 an acre?

Mr. RAINEY. For the land itself. That can be purchased at $10 or $5 an acre. That is what the telegram of the Tensas Co. stated, and this is the largest of these land companies which were subjected to a most vigorous indictment by the gentleman from Wisconsin.

Mr. FREAR. But the testimony in our committee was entirely to the contrary.

Mr. RAINEY. The telegram is of record and that settles it, and that company would be bound by its statement and could not get out of it, and all these other companies have values fixed for them by these numerous telegrams.

Mr. WILLIAM E. HULL. All they want on these flowage rights is an easement.

Mr. RAINEY. Yes.

Mr. WILLIAM E. HULL. And if a man refused to give that easement, they could flow the water over it anyway, could

they not, and then he would have to come to the court for damages?

Mr. RAINEY. I think, perhaps, with the collaboration of States a condemnation proceeding might be brought which might accomplish that.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. RAINEY. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

Mr. REID of Illinois. Mr. Chairman, pending that, I ask unanimous consent that debate upon the pending section and all amendments thereto close in 30 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAINEY. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for five minutes additional. Is there objection?

There was no objection.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. RAINEY. I yield.

Mr. COX. The estimate in relation to flood ways is substantially correct except as to the land included in the New Madrid set-back.

Mr. DRIVER. Mr. Chairman, will the gentleman yield?

Mr. RAINEY. Yes.

Mr. DRIVER. I want to call attention to the fact that the highest estimate on the acreage of the flood ways in Louisiana and Arkansas is 2,150,000 acres, and that of New Madrid 170,000 acres, and not 3,000,000 or 4,000,000 acres.

Mr. RAINEY. Now I want to add just one contribution to the letters and telegrams that have gone into this record from timber-owning companies in these flood ways. The assertion was made that ex-Senator Lorimer, of Illinois, was interested in this proposition, that his company controlled a large amount of timberland in the Cypress Creek spillway, and that his company occupied offices in the same office building as that occupied by the Tensas Land Co., although the name of the building was not stated—the Illinois Merchants National Bank Building. It is true the offices of his company are located in that building. At least 5,000 people have offices in that building; perhaps as many as 10,000 people.

The officials of the Tensas Land Co. have stated that they have not even heard of Mr. Lorimer's company. It has been insisted that Mr. Lorimer's company will profit, and that is the reason for his concern or interest in this legislation.

I know what his concern and interest is. His interest in the problems of the Mississippi River was well understood in this body during the 14 years he has served here and during his entire career. He is here representing the Chicago Flood Control Conference. I have here a letter addressed to me, which I will put in the RECORD, in which he states that his company will give the flowage rights on his land. That ought to cover it. Mr. Chairman, I ask unanimous consent that the letter be read by the Clerk.

Mr. LAGUARDIA. Will the gentleman connect or couple the offer to give the flowage rights for the land with an acceptance of the offer right now?

Mr. RAINEY. Oh, yes. If you want to accept it and will introduce a germane amendment to that effect, I will favor it. I will vote for it.

Mr. Chairman, I ask that the letter be read in my time.

The CHAIRMAN. Without objection, the Clerk will read the letter.

The Clerk read a portion of the letter.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. RAINEY. May I have one minute more in which to finish the reading of the letter?

The CHAIRMAN. Is there objection?

Mr. FREAR. I will have to object, unless I can answer it in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois? Without objection, the Clerk will read.

There was no objection.

The Clerk continued to read the letter.

Mr. FREAR (interrupting the reading). Mr. Chairman, I make a point of order against it. I move that that be stricken from the RECORD.

The CHAIRMAN. The gentleman from Wisconsin makes a point of order against a certain portion of the letter. Has the gentleman any other motion to make?

Mr. FREAR. I move that it be stricken from the RECORD.

The CHAIRMAN. The entire letter?

Mr. FREAR. The entire letter.

Mr. RAINEY. Can the Chair give me an opportunity to be heard on the point of order?

The CHAIRMAN. It must be taken up in the House.

Mr. FREAR. Mr. Chairman, I ask that the words be taken down.

The CHAIRMAN. The gentleman from Wisconsin asks that the words be taken down. The words being written, the Clerk will report them.

The Clerk read the passage in the letter that was objected to.

Mr. RAINEY. Mr. Chairman, may I be heard?

The CHAIRMAN. There can be no business transacted until the committee rises and reports to the House.

Thereupon the committee rose; and the Speaker having resumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, having under consideration the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, reported that by unanimous consent the reading clerk in the committee was proceeding to read a letter into the RECORD in the time of the gentleman from Illinois [Mr. RAINEY], whereupon the gentleman from Wisconsin [Mr. FREAR] made the point of order that the language in the letter was unparliamentary and demanded that the words be taken down, that the words were taken down, and were read by the Clerk.

The SPEAKER. The Clerk will report the words to which exception is made.

The Clerk read the words objected to.

Mr. FREAR. Mr. Speaker, the only reason I moved to strike this from the RECORD—and do so move—is because of other insinuations that occurred before, and I thought there should be an end to them. They have been continually followed in this letter. Of course, I knew nothing about the contents of the letter until it was read. I do not dispute the facts, but I move that the personal allusion to me in the letter be stricken from the RECORD.

Mr. RAINEY. Mr. Speaker, may I have that letter for a minute?

The SPEAKER. Does the gentleman from Wisconsin yield to the gentleman from Illinois?

Mr. FREAR. Surely.

Mr. RAINEY. Mr. Speaker, this letter contains merely statements of fact.

Mr. FREAR. It may be considered as containing statements of fact when it reflects upon me, as it does, but I do not concede that.

Mr. SCHAFER. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state it.

Mr. SCHAFER. The gentleman from Illinois [Mr. RAINEY] is out of order. He stated that the letter contained nothing but statements of fact when it reflects upon the gentleman from Wisconsin [Mr. FREAR]. Therefore, the gentleman is out of order, as his language is unparliamentary.

Mr. LAGUARDIA. Mr. Speaker, I make the point of order that under the rules of the House, when a point of order is made that unparliamentary language has been used and a request is made for the words to be taken down and the matter referred to the House, the offending Member must take his seat and remain seated until the matter is disposed of.

The SPEAKER. The gentleman from Wisconsin has made a motion. He is entitled to an hour and has yielded to the gentleman from Illinois.

Mr. RAINEY. And the gentleman from Illinois is proceeding to occupy as much time as he may need.

Mr. FREAR. I refuse to yield further if that be the attitude of the gentleman from Illinois.

Mr. RAINEY. Mr. Speaker, I have the floor.

The SPEAKER. No. The gentleman from Wisconsin has been recognized by the Chair to offer a motion to strike a letter from the RECORD. The gentleman from Wisconsin has the floor for one hour.

Mr. RAINEY. And has yielded to me.

Mr. FREAR. I refuse to yield further.

The SPEAKER. The gentleman from Wisconsin is within his rights. The gentleman must take his seat. The gentleman from Wisconsin is recognized.

Mr. FREAR. Mr. Speaker, I do not know what the latitude may be in discussing this question. I will say to my distinguished friend from Illinois [Mr. RAINEY] that he and I rarely find any serious question of difference, but I do wish to make this brief statement to the House in reference to Mr. Lorimer and I make it without any exaggeration. I feel the House is entitled to the facts at this time. From the day that we had our first hearing the ex-Senator from Illinois Mr.

Lorimer, has been in constant attendance in our committee, up to and including Saturday last, when he came out——

Mr. BANKHEAD (interposing). Mr. Speaker, I raise a point of order. The gentleman from Wisconsin who now occupies the floor has taken exception to certain language quoted from a letter which was being read from the Clerk's desk. The gentleman, under the rules, is entitled to discuss that offensive language, and explain to the House wherein the language in itself is offensive, but I say that under the rules he is not entitled to go into various statements of fact involved in this whole controversy with Mr. Lorimer. I make the point of order that he should be confined in his remarks to an explanation or a statement with reference to the offensive language.

Mr. FREAR. I am endeavoring to keep within the rules, Mr. Speaker.

The SPEAKER. The Chair thinks the gentleman should proceed to discuss his motion, which is to strike out certain language that is offensive to him.

Mr. FREAR. I wanted to give the basis for it. I have made no statement in regard to Mr. Lorimer, such as he suggests. It was reported to me that he had an office in the same building, in Chicago, that he had lumber interests, as we knew, small though they may be, that this other company had offices in the same building, with 226,000 acres, and he had been in such constant attendance that I had a right, I felt, to make the statement that they were there together.

I did not make any statement beyond that. Although he has been in constant attendance here, I have never charged him with doing anything unfair or dishonest whatever the facts or anything of that kind, but he does make a charge about me, as he says, if I can understand it. I am frank to say that I concede he is a very clever, very shrewd man, the way he has phrased his letter, and I contend it is an unfair insinuation against me. I have tried to conduct this whole flood-control matter fairly with the House and with every Member of it, and this man has sat here in the House on the floor every day, a very unusual proceeding.

Mr. RAMSEYER. Will the gentleman yield?

Mr. FREAR. Yes.

Mr. RAMSEYER. The motion the gentleman has made, as I understood it, goes to the striking of the entire letter from the RECORD?

The words that were taken down in committee constituted the language to which the gentleman objected as being offensive. Why would it not be better to limit the motion to the offensive language?

Mr. FREAR. The gentleman was not listening to the other part of the letter which I passed over and was perfectly willing to let go by until a later and renewed reflection was made upon me, and I felt than the entire letter ought to be striken from the RECORD for the same reason I would vote in the case of any Member of this House if anyone on the outside wrote such a letter about him.

Mr. RAMSEYER. The gentleman does not claim that the entire letter——

Mr. FREAR. Not so far as the facts are concerned, but so far as the personal allusions are concerned.

Mr. RAMSEYER. The gentleman does not claim that the entire letter tends to reflect on him?

Mr. FREAR. Not the entire letter, but the insinuations throughout the letter where he mentions my name.

Mr. BANKHEAD. Will the gentleman from Wisconsin yield?

Mr. FREAR. Certainly.

Mr. BANKHEAD. Did not the gentleman confine his objection to the language which he requested to be taken down and which was read from the Clerk's desk?

Mr. FREAR. No; I said——

Mr. BANKHEAD. Under the rule that is all the gentleman had the right to except to.

Mr. FREAR. The gentleman from Alabama can discuss that later, but the gentleman asked me what I did. In view of the preceding language which led up to this statement, and in view of the constant reiteration regarding myself, I asked that the letter be stricken from the RECORD. If I am not entitled to do that——

Mr. O'CONNOR of New York. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. Does the gentleman from Wisconsin yield for a parliamentary inquiry?

Mr. FREAR. No; not until I have made my statement.

As I have said, based upon that, I made a motion that the letter be stricken from the RECORD. If I am not entitled to make that motion, that is a matter that is subject to a point of order.

Mr. O'CONNOR of New York. Will the gentleman yield for a parliamentary inquiry?

Mr. FREAR. I yield. Is the gentleman addressing me or the Speaker?

Mr. O'CONNOR of New York. I wish to submit a parliamentary inquiry to the Speaker.

The SPEAKER. The gentleman will state his point of order.

Mr. O'CONNOR of New York. Do I understand that the motion before the House is to strike the entire letter or is the motion confined to the taking down of certain words which were read by the Clerk?

The SPEAKER. The motion of the gentleman from Wisconsin, as the Chair understood, was to strike the entire letter from the RECORD.

Mr. O'CONNOR of New York. Mr. Speaker, I do not believe the record before the House would justify that view because I never heard a motion to strike the entire letter from the RECORD. The words were taken down in the committee and reported back to the House, and I understood that was the only motion made.

The SPEAKER. The Chair thinks under the circumstances the gentleman from Wisconsin has the right to make the motion. The Chair has since read the letter and there are a number of sentences in it which convey—well, a rather unpleasant attitude.

Mr. FREAR. Mr. Speaker, it is discursive and abusive.

The SPEAKER (continuing). And the Chair thinks it is for the House to decide whether to support the motion of the gentleman from Wisconsin or not. The Chair thinks the motion is in order, and the House will be called upon to vote whether or not to strike the entire letter from the RECORD.

Mr. LAGUARDIA. Will the gentleman from Wisconsin yield?

Mr. FREAR. I yield to the gentleman from New York.

Mr. LAGUARDIA. Will the gentleman kindly inform the House why it is that in a bill of such national importance this man Lorimer, a former Representative—I refuse to call him Senator—why former Representative Lorimer is so prominent in this measure? Can the gentleman give us that information?

Mr. FREAR. That relates to a fact; and, of course, I am not supposed to dwell on facts here, I am simply expected to speak for myself, I suppose.

Mr. REID of Illinois. Will the gentleman yield so that I may submit a parliamentary inquiry?

Mr. FREAR. I yield to the chairman of the committee.

The SPEAKER. Does the gentleman from Wisconsin yield to the gentleman from Illinois?

Mr. FREAR. I yield to the gentleman from Illinois.

Mr. REID of Illinois. I want to make a point of order, Mr. Speaker, in the time yielded to me. The committee rose for the purpose of acting upon certain objectionable words that were taken down. After this was done we come into the House and find an entirely different situation, because a motion is now being made to strike the entire letter from the RECORD, which is a different purpose from the one which the committee had in mind when it rose. I want to object to any further proceedings other than those for which the committee rose and ask the regular order.

Mr. LEHLBACH. Mr. Speaker, may I address myself to the point of order made by the gentleman from Illinois?

The SPEAKER. Yes; the Chair will be pleased to hear the gentleman.

Mr. LEHLBACH. The Chairman of the Committee of the Whole House on the state of the Union reported that a letter was being read to the committee at the instance of the gentleman from Illinois [Mr. RAINEY]; that a point of order was made that the letter contained objectionable language, and that language was taken down and reported to the committee and reported to the House. Now, it is thoroughly competent for the House, in its discretion, to strike the letter carrying the offensive language from the RECORD.

The SPEAKER. The Chair thinks so.

Mr. REID of Illinois. The point of order I make is that that is not the purpose for which the committee rose.

Mr. LEHLBACH. But the House can do as it pleases about that.

The SPEAKER. The Chair just a moment ago gave it as his opinion that it is for the House itself to decide whether to strike the letter from the RECORD or not. The gentleman from Wisconsin, the Chair thinks, is proceeding in order.

Mr. FREAR. Now, let me take a moment to finish my statement.

The letter as read contained reflections upon me. The gentleman from Georgia [Mr. CRISP] is very fair generally, and if the statement had been made about the gentleman from Georgia [Mr. CRISP], I would have immediately resented it. I passed the matter over for the first two or three insinuations and then when I saw the whole letter was of that character—and I am very sorry the gentleman from Illinois [Mr. RAINEY] insisted on reading it here—I then objected and asked that the whole

letter be stricken from the RECORD, not because of these words alone but because of the words that preceded as well.

Mr. CRISP. Will the gentleman from Wisconsin yield to me for a parliamentary inquiry?

Mr. FREAR. I yield to the gentleman from Georgia.

Mr. CRISP. Mr. Speaker, the gentleman has yielded to me for a parliamentary inquiry of the Chair. I do not care to express any opinion as to this immediate controversy, but I do want to call the Chair's attention to this matter as a precedent and to address a parliamentary inquiry to the Chair after the Chair has thought about the matter a moment.

This whole matter comes before the Chair by reason of the fact that the committee automatically rises to report to the Chair that during the debate unparliamentary words were read. The committee did not rise on motion. The committee rose automatically to report to the Speaker that there had been a violation of the rules as to the decorum of debate.

Now, Mr. Speaker, it seems to me under those conditions the first thing the Speaker must decide is whether or not the words are unparliamentary. If they are, then I grant you that it is in order for the House to take such action as it sees fit to purge the RECORD.

But, Mr. Speaker, think of this: The Committee of the Whole is considering a very important piece of legislation—the flood control bill. Some Member calls another to order for words spoken in debate that are claimed to be unparliamentary. The committee does not rise on a motion, but rises automatically to report to the Speaker. The Speaker has not passed on whether those words are a breach of the rules of debate. What is the practical effect of it? Any gentleman can, by calling another to order, get the committee to rise, get recognition for an hour and discuss a matter that may be perfectly foreign to the bill the committee was considering.

Therefore it seems to me that before this matter can come up the Speaker must decide whether, in his judgment, there has been a breach of the rules in debate. If so, the gentleman is entitled to recognition, and the House can take such action as it sees fit.

Mr. DENISON. Will the gentleman yield?

Mr. CRISP. Yes.

Mr. DENISON. Does not the gentleman think that in this kind of a case the only question before the House as distinguished from the committee is on the words that were taken down?

Mr. CRISP. Unquestionably, the Speaker is not supposed to know what transpired in committee. When the committee rises automatically the Chairman of the Committee of the Whole House on the state of the Union informs the Speaker what has transpired, and then if the Speaker rules that the words were parliamentary the committee would automatically go back into Committee of the Whole House on the state of the Union and consider the bill they were considering when it rose. If the Speaker decides that the words were unparliamentary it is up to the House to take such action as it sees fit.

Mr. RAINEY. Mr. Speaker——

Mr. SCHAFER. Mr. Speaker, I make the point of order that the gentleman from Illinois is out of order.

The SPEAKER. The gentleman is out of order unless the gentleman from Wisconsin yields to him.

Mr. FREAR. I wish to make a statement and do not yield.

The SPEAKER. The Chair is clear in his own mind as to what the situation is. The Chair could not be imputed with ignorance, because the Chair was present and heard the words uttered, and the fact that the Chair recognized the gentleman from Wisconsin carries with it the necessary implication that he regarded the words as not parliamentary. The gentleman from Georgia is right, that the Chair must decide in the first place whether the words taken down are unparliamentary or not. The Chair did not announce in so many words, but the fact that he recognized the gentleman from Wisconsin implied that he regarded the words of an unparliamentary nature and allowed the gentleman to move that they be stricken from the RECORD.

Mr. FREAR. Mr. Speaker, let me say in answer to the gentleman from Georgia that statements were made in the letter that were clearly objectionable but I let them go by expecting there would be an end of it, and then the final objectionable remark came and I made the motion. Suppose the letter, in addition to what it did say—suppose it contained more and more of the same character. Am I obliged in each case to ask that the words be taken down and have the committee refer the matter each time to the House? To avoid that situation I took what I supposed was the proper course and moved that it be stricken from the RECORD. The fact is the Speaker had access to it and knows what it contains.

Mr. GARRETT of Tennessee. Will the gentleman yield to me?

Mr. FREAR. Certainly.

Mr. GARRETT of Tennessee. If the gentleman will yield, I think the matter can be settled in a moment if he will yield to the gentleman from Illinois [Mr. RAINEY].

Mr. FREAR. I will yield.

Mr. RAINEY. Mr. Speaker, I will say that I am sorry that the gentleman from Wisconsin was offended by any statement in the letter. I will simply read that part in which Mr. Lorimer proposes to give the right of way over his land.

Mr. FREAR. Let me supplement that statement by saying that in our Flood Control Committee some such remark was made by Mr. Lorimer—there is no question about that.

Mr. RAINEY. Mr. Speaker, I ask unanimous consent to withdraw the letter.

The SPEAKER. The gentleman from Illinois asks unanimous consent to withdraw the letter. Is there objection?

There was no objection.

Mr. FREAR. Mr. Speaker, I withdraw my motion.

The SPEAKER. The committee will resume its session.

The committee resumed its session.

The CHAIRMAN. The House is again in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 3740, which the Clerk will report by title.

The Clerk read the title of the bill.

Mr. SCHAFER. Mr. Chairman, I move to strike out the last two words.

Mr. RANKIN. Mr. Chairman, a parliamentary inquiry. The gentleman from Illinois [Mr. RAINEY] had the floor when the committee rose.

The CHAIRMAN. The gentleman's time had expired and he asked unanimous consent for sufficient time in which to read the letter. The letter having been withdrawn, the time has expired. The gentleman from Wisconsin is recognized.

Mr. SCHAFER. Mr. Chairman, I shall not take up much of the time of the House at this time, but merely want to reply in part to the statements made by the gentleman from Illinois [Mr. RAINEY]. He was proceeding under debate and called to the attention of the committee that these great lumber companies had sent telegrams offering their property for spillways at sums of from $5 to $10 per acre, and that the offer included the minerals and the timber. In order to keep the RECORD straight I asked him to yield and he did yield. I called his attention to the true facts in the matter, that these offers of the lumber companies of $5 and $10 an acre did not include the mineral rights or the timber. He then told the House that the timber and the mineral rights did not mean anything. Of course, the great natural resources of this Nation may not mean anything to distinguished Democrats, such as Mr. Doheny, who believed the Government had no interest in the oil resources of the country. Perhaps the timber and mineral resources, including coal, do not mean anything to the distinguished gentleman from Illinois [Mr. RAINEY], but they do mean something to me and the American people. In view of the fact that he inferred that I did not understand anything about this flood control bill, I rose for these two minutes to keep the RECORD straight. The RECORD clearly shows that it was necessary to correct the gentlemen from Illinois in order to keep before us the true facts concerning the telegrams of the great land and lumber companies. [Applause.]

Mr. LAGUARDIA. Mr. Chairman, I offer the following amendment to the amendment of the gentleman from Wisconsin, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA to the amendment offered by Mr. FREAR: Page 3, beginning with line 16, strike out all of section 2 down to and including the word "interest" in line 23.

Mr. LAGUARDIA. Mr. Chairman, this would strike out the entire section 2. I think it is apparent to the House that no matter how careful we may be in following the rules of the House, no matter how parliamentary we may be in the choice of the language used in discussing this bill, the American people will know that certain people with an unsavory political past are vitally interested in the land features of this bill. The more we discuss it, the more we go into it, the more the fact will come out that the one proposition on which we are divided is the matter of this land and the machinery whereby the Government will acquire it and have to pay excessive and exorbitant prices for the land. The gentleman from Illinois [Mr. RAINEY], who is always lucid and clear, I can not understand on this occasion. He first takes the floor and points out that there are no lumber companies interested, and then he proceeds to tell that we received telegrams from lumber com-

panies. The gentleman from Louisiana [Mr. WILSON] points out that the land in the lower part of the valley is worth only $5 to $7.50 an acre, and when he is pressed by some of his colleagues he says in another part of his statement that most of the land is highly cultivated.

Mr. WILSON of Louisiana. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. WILSON of Louisiana. I did not make the statement. I simply placed in the RECORD the telegrams from the various companies, the people whose names have been connected with the RECORD and who it was publicly stated were expecting $75 an acre for their land, to show exactly what they asked.

Mr. LAGUARDIA. But the gentleman said that 60 per cent of the land was under cultivation.

Mr. WILSON of Louisiana. I said that in the Boeuf spillway 60 per cent of the land is under cultivation.

Mr. LAGUARDIA. What is that land worth?

Mr. WILSON of Louisiana. No statement has been put into the RECORD as to its value. The question was asked about its assessed value, and I stated that the engineering commission examining it said that the average value of the land in these flood ways was $23 an acre.

Mr. LAGUARDIA. Assessed value?

Mr. WILSON of Louisiana. Actual value. I do not know what the flowage rights would be, but the evidence I put in as to the value of this property was direct from the people who own the property as to what they would take.

Mr. LAGUARDIA. Exactly; and do not you see that by adopting the program such as is contemplated in this bill, with 4,000,000 acres of land to be taken, if necessary, for flood ways and spillways, that we have not even passed the bill before the value of the land has jumped from $5 and $10 an acre to $23 and then to $50 and $75 an acre? There are some gentlemen right now in the gallery waiting for a rise in value.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. COX. Do I understand that the gentleman is contending that if the Government acquires an interest in this land it will have to take it at the exaggerated value placed upon anticipated improvements?

Mr. LAGUARDIA. Oh, no; awards would be made under condemnation.

Mr. COX. I would like to make this statement——

Mr. LAGUARDIA. I can not yield. I am familiar with the law on the question.

Mr. COX. If the gentleman is familiar with the law, what is it?

Mr. LAGUARDIA. It has to go to condemnation and an award must be made; but let me say to the gentleman that in fixing the award it is necessary to take into consideration the assessed value, the market value, the return on the land, the future prospective profits of the land, which, I fear, will take in contemplation the very proposed improvements we here provide.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. COX. Mr. Chairman, I ask unanimous consent to proceed for one minute.

The CHAIRMAN. The time for debate upon this section and all amendments thereto has been fixed by the committee.

Mr. COX. Mr. Chairman, I ask for recognition on the amendment.

Mr. FREAR rose.

The CHAIRMAN. The gentleman from Georgia is recognized.

Mr. FREAR. Mr. Chairman, I have been asking for recognition for some time.

The CHAIRMAN. The Chair is endeavoring to divide the time equally and alternately between the two sides. The gentleman from Georgia is recognized.

Mr. COX. Mr. Chairman, I want to answer the argument that the gentleman from New York [Mr. LAGUARDIA] has just made. It is a repetition of an argument made by other Members of the House during this debate. The argument is, if this bill passes with a provision that the Federal Government shall acquire an interest in lands necessary for rights of way, it will have to take it at a valuation based upon an anticipated public improvement.

I want to say, and particularly for the benefit of the gentleman who has just addressed the House, and who knows the law, that the Supreme Court of the United States in the case of the United States *v.* The Chandler-Dunbar Co. (229 U. S. 55), made this holding:

> One whose property is taken by the Government for improvement of navigation of the river on which it borders is not entitled to the probably advanced value by reason of the contemplated improvement. The value is to be fixed as of the date of the proceedings.

[Applause.]

Mr. FREAR. Mr. Chairman, speaking to the amendment offered by the gentleman from New York [Mr. LAGUARDIA]—he amended the amendment I offered by striking out the section—he calls attention to the fact that my statements were criticized by the gentleman from Illinois [Mr. RAINEY] as to values of land in the flood ways, and by the gentleman from Louisiana [Mr. WILSON] as to the value of land in Louisiana. Now, I have stated what the engineers gave to me as their estimates of values. The gentleman from Louisiana very carefully does not mention the New Madrid flood way, on which the testimony was $75 an acre for cut-over lands. He does not mention the fact that in that proposal it was estimated as high as $150 an acre, nor does he consider, so far as I can ascertain, that a gentleman named Mr. Blake, who was chairman of the flood commissioners, representing Mississippi, Louisiana, Arkansas, and Alabama, estimated that 6,000,000 acres in the different flood ways would cost the Government $600,000,000. Certainly Blake should know. He was aware of all the facts in his estimate. The gentleman from Louisiana is too intelligent not to know that it is far beyond $5 and $10 on the average, and the House is entitled to the information. We do not know. We have not had a survey. Every time we have attempted to get that information we have been referred to the testimony. There were 40 land and lumber corporations whose names I put in the RECORD, land and lumber companies that had large holdings down there in these flood ways. There were over 400 corporations and as many large individual holdings that ran over 3,000,000 acres; 77 per cent belonged to these interests. It is idle to say we do not know anything about it, and that two or three telegrams from Louisiana have been received stating the cost on several parcels would be $5 and $10 an acre. That is not right of the gentleman from Louisiana, a member of the committee, to offer such telegrams in view of the facts you have.

We made a fair statement here and gave the values as shown by the Army engineers and by Mr. Blake. I do not agree with him in $100 an acre, or with the statement of the gentleman from Louisiana that only $23 would be the cost, because that was the assessed value of certain lands. We know that valuation will be doubled if you try to get the land. It seems too late to-day to discuss the values of land. The values have been put in the RECORD. There are 4,000,000 acres concerning which you do not know any more than I do, but these lands have been valued by the engineers at anywhere from $50 to $75 an acre.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes; I will yield to a question, but not to read any statement.

Mr. COX. I want to call attention to the figures given by Mr. Blake, who put the value of $224 on 2,000,000 acres and a value of $50 on the remainder.

Mr. FREAR. He represents Arkansas, Mississippi, Louisiana, and other States affected down there. That is his testimony. He is chairman of their flood commission and I think his judgment ought to have some value at this time. I am not questioning it.

Mr. WILSON of Louisiana. I will say that the gentleman referred to, Mr. Blake, does not represent Louisiana and Mississippi.

Mr. RAINEY rose.

The CHAIRMAN. The gentleman from Illinois has already been recognized. The Chair will not recognize him again until he seeks recognition under a new section.

Mr. BLACK of New York rose.

The CHAIRMAN. The gentleman from New York is recognized.

Mr. BLACK of New York. Mr. Chairman, it is unfortunate that this bill, which is intended to provide for a great piece of constructive work for this country, should for the time being be imperiled by being connected with the name of a man who left here under unpleasant circumstances. It is unfortunate, I say, that his name should be connected with this proposition. It seems to me the House is capable of perfecting this bill by legitimate amendments to section 4, to provide that there shall not be extortionate values charged in these condemnation proceedings.

There is no reason why this, of all bills, should become a vehicle of fraud. This House has intelligence sufficient to perfect the bill. We have had under consideration similar bills from time to time and have been able under similar circum-

stances to protect the Government. There have been times, I admit, when some have succeeded in defrauding the Government; and the cases of Fall and Sinclair as well as Doheny have shown that it is necessary to provide safeguards for the protection of the Government.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York [Mr. LAGUARDIA].

The question was taken; and on a division (demanded by Mr. LAGUARDIA) there were—ayes 37, noes 110.

So the amendment was rejected.

The CHAIRMAN. The question recurs on the amendment offered by the gentleman from Wisconsin.

Mr. FREAR. That takes out the latter part of the section. Mr. Chairman, may we have the amendment again reported?

Mr. REID of Illinois. Mr. Chairman, I demand the regular order.

The CHAIRMAN. The regular order is on agreeing to the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

SEC. 3. Except when authorized by the Secretary of War upon the recommendation of the Chief of Engineers, no money appropriated under authority of this act shall be expended on the construction of any item of the project until local interests have given assurances satisfactory to the Secretary of War that they will (a) maintain all flood-control works after their completion, except controlling and regulating spillway structures, including special relief levees; maintenance includes normally such matters as cutting grass, removal of weeds, local drainage, and minor repairs of main-river levees; (b) agree to accept land turned over to them under the provisions of section 4.

With the following committee amendment:

In line 21, after the word "accept," insert the words "the title to."

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I offer an amendment.

Mr. REID of Illinois. Mr. Chairman, I have sent three amendments to the desk.

The CHAIRMAN. There are three amendments which will be disposed of, amendments which have been heretofore submitted and which the Clerk will report.

The Clerk read as follows:

Page 4, line 15, strike out the words "local interests" and insert in lieu thereof the words "the States or levee districts."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Page 4, line 22, after the figure "4," change the period to a semicolon and insert the following as subparagraph (c):

"(c) Provide without cost to the United States all rights of way for levee foundations and levees on the main stem of the Mississippi River between Girardeau, Miss., and the Head of Passes."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Page 4, line 22, after subparagraph (c), already adopted, add a new paragraph at the end of the section, as follows:

"No liability of any kind shall attach to or rest upon the United States for any damage from or by floods or flood waters at any place."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. MADDEN. Mr. Chairman, I do not think this ought to be in this section of the bill. I do not think it should be attached to this section of the bill.

Mr. FREAR. This has been agreed on.

Mr. MADDEN. We agreed to it, but I do not think it should be made a part of this section.

Mr. GARRETT of Tennessee. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The gentleman from Tennessee offers an amendment to the amendment offered by the gentleman from Illinois, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GARRETT of Tennessee to the amendment offered by the gentleman from Illinois [Mr. REID]: At the end of the amendment insert: "*Provided, however,* That if in carrying out the purposes of this act it shall be found that upon any stretch of the banks of the Mississippi River it is impracticable to construct works for the protection of adjacent lands, and that such adjacent lands will be subject to damage by the execution of the general flood-control plan, it shall be the duty of the board herein provided to cause to be acquired on behalf of the United States Government either the absolute ownership of the lands so subjected to overflow or floodage rights over such lands."

Mr. GARRETT of Tennessee. Mr. Chairman, I am inclined to agree with the gentleman from Illinois [Mr. MADDEN] that the amendment which the gentleman from Illinois [Mr. REID] has proposed more properly would come in another section, but if it is to come now it seems to me that my amendment will have to come in connection with it at this place. I do not want to lose any rights in connection with it.

Mr. MADDEN. If the gentleman will yield, I am in favor of the amendment offered by my colleague, but I propose to strike out section 3 and offer a substitute to section 3, and I do not want to strike out that part of it.

Mr. REID of Illinois. That is the reason we had better get it in.

Mr. MADDEN. No. I will move to strike it out, anyway, if the gentleman wants to do it that way. I do not think it is fair; that is all. I think an amendment should be considered on its merits without any attempt to foreclose the right to have proper consideration of it. It does not matter how much power anybody has, it is just as well to exercise it with justice; and it does not make any difference how many votes you may have on a given proposition, it is well to exercise proper respect for the facts in the case.

Mr. REID of Illinois. Will the gentleman from Illinois yield?

Mr. MADDEN. Yes.

Mr. REID of Illinois. This was submitted at this place by the gentleman's conferees and we put it in at the gentleman's request.

Mr. MADDEN. The gentleman put it in, but it was not put in here at our request.

Mr. REID of Illinois. Yes; the gentleman ought to organize his conferees and know what he wants.

Mr. MADDEN. Now, I do not want to take up the time of the gentleman from Tennessee, but if we are going to consider the amendment which I have offered, and which has been pending, and which was pending before my colleague offered his amendment, we ought to do it before the gentleman's amendment comes along, because then it may be said that I have slept on my rights in offering this amendment here and that I no longer have any right to offer the amendment.

I want to move to strike out section 3, but I do not want to offer to strike out that part of the section, if the amendment is adopted, that the gentleman has just introduced but which has not been acted upon.

Mr. REID of Illinois. The gentleman can include it in his substitute.

The CHAIRMAN. The gentleman from Illinois can offer his amendment in that form.

Mr. MADDEN. Mr. Chairman, I would like to have my amendment read for information now, if I may.

The CHAIRMAN. Without objection, the Clerk will report for the information of the committee the amendment of the gentleman from Illinois.

The Clerk read as follows:

Amendment proposed by Mr. MADDEN: Strike out section 3 and substitute the following:

"SEC. 3. Except when authorized by the Secretary of War, upon the recommendation of the Chief of Engineers, no money appropriated under authority of this act shall be expended on the construction of any item of the project until the States or local interests to be benefited and protected have indicated their desire for Federal assistance by giving assurances satisfactory to the Secretary of War that they will, (a) maintain all flood-control works after their completion, except controlling and regulating spillway structures, including special relief levees; (b) provide without cost to the United States such drainage work as may be necessary and the rights of way for the levees and other structures as and when the same are required. Work on the so-called Bonnet Carre spillway will be undertaken when the city of New Orleans, in recognition of its paramount interest therein, shall have undertaken to hold and save the United States from all damage claims arising out of the construction of the spillway. Work on the so-called New Madrid flood way will be undertaken when interests in southern Illinois and southeastern Missouri, in recognition of their paramount interest therein, shall jointly or severally have entered into a similar undertaking."

Mr. MADDEN. The question is whether this would come before the other amendments that are pending or before the amendment of the gentleman from Tennessee.

The CHAIRMAN. Perfecting amendments are to be disposed of before the amendment involving the striking out of the section is voted on. The question is on the amendment offered by the gentleman from Illinois, the chairman of the committee.

Mr. GARRETT of Tennessee. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Tennessee desire recognition on his amendment?

Mr. GARRETT of Tennessee. I do, Mr. Chairman.

The CHAIRMAN. The gentleman from Tennessee is recognized.

Mr. GARRETT of Tennessee. Mr. Chairman, the situation which exists in Tennessee, I think, has come to be very, very well known to the membership of the House. Bear in mind that the Congress is officially adopting the Jadwin plan so far as the engineering part of that plan is concerned, plus a further consideration of the Mississippi River Commission's plan, with a view to combining the best parts of the two. Neither of these plans in any way promises anything to any part of Tennessee except injury. The only way I can see to meet the situation is in the way I am proposing here and in the language that is offered.

I appreciate, of course, the tremendousness of this problem, but I am sure every Member of the House who understands the situation realizes that we of Tennessee are not here as mendicants in this matter; we are simply here asking to be protected in our rights, and asking that our equities may be respected and worked out.

I very much hope, Mr. Chairman, the amendment may prevail.

Mr. COX. Mr. Chairman, I ask recognition on this amendment.

Mr. Chairman, if I understand the amendment offered by the gentleman from Tennessee, it is simply to take care of a limited territory here and there which is subjected to overflow as a result of the execution of this project; that is, subjecting lands to overflow as a result of the execution of these plans, which have not heretofore been overflowed by the flood waters of the river.

I have in mind, gentlemen—and I beg your attention to this statement—areas along the main river which will be damaged, in all probability, as a result of the execution of the plans, unless some work or works be constructed for the purpose of holding off flood waters. These are certain lands in the State of Tennessee which are limited in area, and lands in Kentucky, particularly the town of Hickman, which will be overflowed and damaged as a direct consequence of the proposed improvement. These areas and others similarly situated along the river should be protected.

Let me say, my colleagues, this amendment is not proposed for the purpose of obligating the Government to make good all damages that may result because of the execution of this project. The statement has been made by Members opposing the bill that they are not opposed to the Government paying or compensating for any land that is taken or that is damaged as a result of the execution of the project, which land would be immune from damage if the work proposed was not done. My friend, the gentleman from New York [Mr. LAGUARDIA], made the statement this morning, in effect, that he was willing that the Government be committed to the proposition of paying the damage that the Government might cause, and this amendment is to put the Government in the position where this can be done, so far as property along the main river is concerned.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. COX. I will.

Mr. LAGUARDIA. Will the gentleman's amendment take care of the actual damage sustained or the prospective damages that might be sustained?

Mr. COX. No; the actual damage. The effect of the amendment is this, that where, in the execution of the Jadwin plan for flood control an area is endangered as the result of the work which it is impracticable to protect by any sort of flood-protective works the Government shall acquire either the absolute title to the land or flooded rights therein.

Mr. WHITTINGTON. Will the gentleman yield?

Mr. COX. Certainly.

Mr. WHITTINGTON. I would like to ask the gentleman from Georgia about what area the Government would have to acquire for flood rights?

Mr. COX. I am not in a position to state to the gentleman what the area in Tennessee might be.

Mr. WHITTINGTON. And elsewhere?

Mr. COX. This would not apply to any territory except that on the main stem of the stream.

Mr. GARRETT of Tennessee. It would apply to Tennessee and the Mississippi situation.

Mr. COX. Yes; and elsewhere along the Mississippi River proper.

Mr. REID of Illinois. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and section close in 15 minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that all debate on the section and amendments close in 15 minutes.

Mr. O'CONNOR of Louisiana. I suggest to the gentleman that he make it 30 minutes.

Mr. REID of Illinois. I will make it 20 minutes.

Mr. LAGUARDIA. Will the gentleman make it apply to the pending amendment only? I have an amendment that I would like to get five minutes on, although I have a suspicion of what is going to happen.

Mr. O'CONNOR of Louisiana. Reserving the right to object, I want to ask the chairman of the committee if that would give any time to my colleague Mr. SPEARING and myself?

Mr. REID of Illinois. I do not know.

Mr. O'CONNOR of Louisiana. Then I object. Members who do not live in this flooded locality can get an hour or an hour and a half, but Members who live in the territory affected, in the valley of the Mississippi River, can not get five minutes; it is ridiculous.

Mr. REID of Illinois. Mr. Chairman, I move that all debate on this section and all amendments thereto close in 30 minutes.

Mr. DENISON. A parliamentary inquiry, Mr. Chairman. Does that apply to amendments that are not yet offered?

The CHAIRMAN. It applies to the section and all amendments.

Mr. WINGO. Mr. Chairman, I offer an amendment to the amendment of the gentleman from Illinois, that all debate on this section and amendments thereto close in 10 minutes.

Mr. SPEARING. And I offer an amendment to the amendment striking out 10 minutes and making it 1 hour.

The CHAIRMAN. That amendment is an amendment to an amendment to an amendment, and therefore not in order. The question is on the amendment offered by the gentleman from Arkansas to the amendment offered by the gentleman from Illinois [Mr. REID.]

The question was taken; and on a division, there were 35 ayes and 87 noes.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the amendment of the gentleman from Illinois to close debate on the section and all amendments thereto in 30 minutes.

The question was taken, and the amendment was rejected.

Mr. MADDEN. Mr. Chairman, I rise to discuss the amendment I have offered.

The CHAIRMAN. The amendment pending should be disposed of before further amendments are offered. The question is on the amendment offered by the gentleman from Tennessee [Mr. GARRETT] to the amendment offered by the gentleman from Illinois, chairman of the committee.

The question was taken; and on a division (demanded by Mr. GARRETT of Tennessee) there were 111 ayes and 79 noes.

So the amendment of Mr. GARRETT of Tennessee to the amendment was agreed to.

The CHAIRMAN. The question recurs on the amendment of the gentleman from Illinois as amended by the amendment of the gentleman from Tennessee.

The question was taken, and the amendment as amended was agreed to.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] offers an amendment, which the Clerk will again report.

The Clerk read as follows:

Amendment by Mr. MADDEN: Strike out section 3 and substitute the following:

"SEC. 3. Except when authorized by the Secretary of War upon the recommendation of the Chief of Engineers, no money appropriated under the authority of this act shall be expended on the construction of any item of the project until the States or local interests to be benefited and protected have indicated their desire for Federal assistance by giving assurances satisfactory to the Secretary of War that they will (a) maintain all flood-control works after their completion, except controlling and regulating spillway structures, including special relief levees, (b) provide without cost to the United States such drainage works as may be necessary, and the rights of way for all levees and other structures as and when the structures are required. Work on the so-called Bonnet Carre spillway will be undertaken when the city of New Orleans, in recognition of its paramount interest therein, shall have undertaken to hold and save the United States from damage claims arising out of the construction of the spillway. Work on the so-called New Madrid flood way will be undertaken when interests in southern Illinois and southeast Missouri, in recognition of their para-

mount interest therein, shall, jointly or severally, have entered into a similar undertaking. No liability of any kind shall attach to or rest upon the United States for any damages from or by floods or flood waters at any place.

Mr. GARRETT of Tennessee. Mr. Chairman, I reserve the point of order for the time being. The point of order is that you can not strike out what the committee has just voted in. I ask the gentleman from Illinois [Mr. MADDEN] if he is not willing to attach the amendment which I offered along with the Reid amendment, which he has attached to his amendment.

Mr. MADDEN. Yes; I will put that in.

Mr. GARRETT of Tennessee. Then, Mr. Chairman, it is not necessary, if we have that distinct understanding, for me to insist upon the point of order. I would like the amendment to be reported as it will read. That is, the latter part of it.

Mr. GARNER of Texas. Have the substitute reported as it will read finally.

Mr. QUIN. I think it is a good idea to let it be corrected before the gentleman from Illinois [Mr. MADDEN] starts his argument, and have it read into the RECORD.

Mr. MADDEN. I am perfectly happy to have that done.

Mr. QUIN. We do not want to lose this amendment. It is vital to us.

The CHAIRMAN. The Chair desires to propound an inquiry to the gentleman from Illinois. Does the gentleman from Illinois desire to ask unanimous consent to append the Reid amendment as amended by the gentleman from Tennessee to his pending amendment?

Mr. MADDEN. I am willing to do that. That is the only way that I can get my amendment before the House.

Mr. TILSON. The gentleman means only the Garrett amendment.

Mr. MADDEN. Yes.

Mr. GARRETT of Tennessee. The Reid amendment as amended by the Garrett amendment.

Mr. MADDEN. The Reid amendment is a part of my proposed amendment now.

Mr. GARRETT of Tennessee. The gentleman from Illinois has included as a part of his amendment the amendment that is offered by the gentleman from Illinois, which was adopted by the committee, but there was also adopted by the committee an amendment to that amendment offered by myself, and I understand now that the gentleman from Illinois is willing to include both of them.

Mr. MADDEN. Yes—not that I am for the amendment of the gentleman from Tennessee—but because I am in a sense forced to do that.

The CHAIRMAN. The Clerk will again report the amendment as modified by the unanimous-consent request of the gentleman from Illinois.

Mr. REID of Illinois. Mr. Chairman, so that no rights may be lost, I reserve the point of order as to the amendment.

The CHAIRMAN. The Chair is ready to dispose of any point of order that may be made, overruling the point of order. It is quite in order to strike out a section that has been amended and insert new language.

Mr. GARRETT of Tennessee. Mr. Chairman, if the gentleman from Illinois will yield, there is some confusion as to the parliamentary situation. In order that it may be perfectly clear, although the gentleman from Illinois is putting in the amendment offered by myself——

Mr. MADDEN. I am not going to argue against it.

Mr. GARRETT of Tennessee. The voting down of the amendment that is proposed by the gentleman from Illinois [Mr. MADDEN] would not in any way affect the status of the Reid amendment as amended by myself.

Mr. MADDEN. That is true. I agree with that.

The CHAIRMAN. The Reid amendment as modified by the gentleman from Tennessee is now incorporated in section 3, and if section 3 is not stricken out, it remains in the bill.

Mr. MADDEN. Of course, that is good notice that they are to vote against my amendment.

The CHAIRMAN. The gentleman from Illinois is recognized.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Chairman, the United States in the course of the construction of this flood-control work from Cape Girardeau down, proposes, among other things, to build the New Madrid spillway on the southeast corner of Missouri, in which southern Illinois and southeastern Missouri have a paramount interest.

The United States also proposes to build the spillway at Bonnet Carre, La., in which the city of New Orleans has a paramount interest. The United States proposes to build these spillways and pay for them out of the Treasury of the United States. The United States is not calling on any of the local communities to contribute toward the cost of the construction of these spillways, but the United States is asking that the city of New Orleans, on the one hand, and southern Illinois and southeastern Missouri, on the other, should save the United States Government harmless from any damages that may accrue as the result of the construction, and particularly during the period of construction, of these two necessary works in connection with flood control.

I think everybody who has given any consideration to this question will agree that these two spillways are essential to the success of the project, and I think the people of southern Illinois and the people of southeastern Missouri and the people of New Orleans, if they tell the truth, will agree that they have a paramount interest in the construction of these two spillways for which the United States proposes to pay.

Mr. FULBRIGHT. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. I can not yield now. I have been waiting all the afternoon to get a chance to say a word upon this important subject, and I do not want to have any extraneous matter injected into what I am saying on it.

They all say that these spillways are essential, but they will all say that they ought not to be called upon to contribute to the cost, or even be called upon to assume a contingent liability in connection with any damage that might occur as the result of the assumption of the responsibility on the part of the United States to do the work and pay the bill.

It is the most extraordinary thing I have ever listened to. It is the most presumptuous thing that I have ever seen set forth. It is an assertion by various communities of the United States having a paramount interest in a great problem that they under no circumstances must be called upon to pay a dollar of the cost. Impudence, I would say; unjust beyond reason.

What would be the responsibility of these communities in this connection? It could not amount to much. Then why does not the United States pay it, if that is true? Because the United States is going to pay the cost of the construction. In God's name, is there any community anywhere within the confines of the United States that is willing to contribute a dollar for its own protection in connection with one of the greatest works ever undertaken?

Oh, it will not do to say that the gentleman is parsimonious; oh, no; that will not do. It must be said that I am only dealing in justice. I want to say to you gentlemen, I suppose it makes no difference to you what my vote may be, but I propose to vote against the bill, no matter how many good things there are in it, unless you put this in it. [Applause.]

That is where I stand. The President of the United States has done everything in his power to show his interest in this problem. He has been earnest, tireless, honest, industrious, in his endeavor to work out a project for flood control that ought to meet the honest judgment of every man, woman, and child in the United States. [Applause.]

Oh, it is true; you have the power. You do the voting. You pass the laws. The President has the power to veto them if he will. That is his responsibility, and your responsibility is to say whether you will pass the bill over his veto after he has written it.

Now, I make no threats and make no promises. I speak for myself only. I am interested in you, in your future, in your development. I came to the front last summer, in violation of every law of the land, to help you when all others ran away from it. Everybody ran away. Everybody refused to assume the responsibility of meeting the situation. I assumed the responsibility. [Applause.]

It is true it was not my money, but I said to the Comptroller General of the United States that sometimes it was more important to meet a great emergency than it was to obey the law; and as this was a great emergency at that time, I met it, and I met it when everybody else refused.

I think you are making a mistake in refusing to cooperate with the President, who has been and is the friend of this great project. He has been working for it in season and out of season. You can pass the bill, I have no doubt; but you can not pass it over the President's veto. [Applause.] I am sure of that.

Why do you want to take a chance? Why do you not do the thing that ought to be done in all conscience? Why do you not do the thing that justice demands, and which reason tells you ought to be done? Why do you want to take the chance of losing the whole thing by a veto when by the expenditure of a million dollars you can furnish the foundation for the levees or the flood ways and assume the liability, which may not amount

to anything, to relieve the United States of damage claims while it is constructing at its own expense, without a dollar of expenditure on your part, the Bonnet Carre and the Madrid spillways? [Applause.]

Mr. QUIN rose.

The CHAIRMAN (Mr. NEWTON). The Chair recognizes the gentleman from Mississippi.

Mr. QUIN. Mr. Chairman, I want to say that I appreciate the kindness of the gentleman from Illinois [Mr. MADDEN] in agreeing to accept the Garrett amendment onto his amendment, and that if the Madden amendment is adopted the Garrett amendment is accepted and part of it, and if the Madden amendment is defeated the Garrett amendment stands as part of the flood-control bill.

Mr. MADDEN. That is not included in my effort.

Mr. QUIN. You are not trying to kill the Garrett amendment?

Mr. MADDEN. No, sir.

Mr. QUIN. A parliamentary situation forces it upon you. However, I thank the gentleman from Illinois in behalf of the people I represent for what the gentleman did in their behalf when they were suffering from overflow last summer, but I can not agree with him on this amendment that he has offered, which is taking the vitals out of this bill.

The gentleman from Illinois says he wants to help us, but if he is going to help us by taking the heart out of the bill, that kind of help is worse than no help at all. [Applause.] I trust the Members of this House can see the real purport of the gentleman's amendment. The real purport of his amendment is smooth and it cuts deep. Do not let any man pretend not to understand that if he votes for the Madden amendment he is killing this bill. For the people of the Mississippi Valley the much-sought aid will be gone. Mr. MADDEN understands that.

Mr. MADDEN. If I thought that was the case, I would not do it. I am sure that it is necessary to have these spillways, and all the Government is asking is that the two communities will guarantee the United States against losses by reason of damages.

Mr. WHITTINGTON. Will the gentleman from Mississippi permit me to ask the gentleman from Illinois a question?

Mr. QUIN. I will.

Mr. WHITTINGTON. I should like to ask the gentleman from Illinois if it is not a fact that the language "and other structures as and when the same are required" in your amendment would require the States of Missouri, Louisiana, and Arkansas to furnish the flowage rights through the diversion, and in answering me I call the gentleman's attention to the fact that the original Jadwin plan bill, introduced in the Senate of the United States by Senator JONES, of Washington, on December 13, contains the identical language, to wit, "rights of way for all structures as and when required"?

Mr. MADDEN. It would not. It would not require them to furnish the flowage rights.

Mr. WHITTINGTON. Is there any objection to striking out the words "and structures," because it has been the opinion of every lawyer on our committee that those words require the construction of the flowage rights?

Mr. MADDEN. If it passes, let that question go to conference, where they will have time to study the problem.

Mr. WHITTINGTON. My question is: Does not that include the flowage rights?

Mr. MADDEN. It includes the construction of these spillways, it includes the supplying of the flowage rights, or the taking of the chance of the cost of that being assumed by the Government of the United States, as it does of the Atchafalaya.

Mr. WHITTINGTON. It has been the opinion of every lawyer that that would require the local interests to pay for the flowage rights.

Mr. QUIN. And that is what they are not able to do. The people have reached a stage of bankruptcy in that distressed and overflowed country, and I trust that the gentleman from the State of Illinois does not want an impoverished people to be further burdened and their lands assessed for levee taxation up to more than they can stand. Under the amendment offered by the gentleman the result would be to confiscate the property of these poor citizens who are not able to assist further in bearing any more expense. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. NELSON of Missouri. Mr. Chairman and gentlemen of the committee, I want, if I may, to have your attention while I say just a few words about the southeast Missouri proposition. As a member of the committee and as one who has given considerable thought to it, I hope I can make the situation plain.

I have no direct personal interest in this because of the district I serve. It is in the central part of the State, 100 miles from this point. If you will take the map of southeast Missouri and look at Birds Point, on the Mississippi River, and drop down a distance of 72 miles to New Madrid, you will find it is proposed to make a flood way there varying in width from 5 to 10 miles and amounting to about 200,000 acres, as I now recall the figures. The present river-front levee would be cut down 5 feet, while 5 miles back of this another levee would be built, and between these the flood would flow to a depth of from 10 to 20 feet when the spillways were in operation or the lowered front levee failed at any point. Missouri wants no such flood way, yet it is proposed. For the protection of Missouri? No; for the protection of Cairo, across the river; and, according to the amendment which has been offered, Missouri and Illinois shall agree as to the cost and meet the cost.

Mr. FULBRIGHT. Will the gentleman yield?

Mr. NELSON of Missouri. Yes.

Mr. FULBRIGHT. I will ask the gentleman if it is not a fact that the damages sustained by southeast Missouri under the Jadwin plan would exceed the benefits derived from this project?

Mr. NELSON of Missouri. Unquestionably so, as brought out in the hearings. May I say to you, gentlemen, that three counties principally make up this territory, and the drainage and levee districts in those three counties have already voted $52,000,000 in bonds, and $31,000,000 of that amount remains unpaid to-day? The people of these districts virtually are bankrupt.

In one county, out of 10 banks only 3 remain. If you write the proposed amendment into this bill you have taken the heart out of it and made it impossible to protect the territory below.

In answer to the insinuation, to the unwarranted suggestion, that "if Missourians would tell the truth" we would acknowledge the fairness of the proposition, or something to that effect. I reply that Missourians do tell the truth, and they tell you that night will be day, that black will be white, that east will be west, and that joy will be sorrow when Missouri and Illinois agree to pay for something they do not want. This is the situation.

I come to you to plead for a square deal for the people of my State. The Governor of Missouri, who is not of my party, has truthfully written that Missouri will never agree to such a transaction. The attorney general of my State, who is not of my party, is very properly on record to the same effect.

Finally, may I say, gentlemen of the committee, that after all there is a bigger issue before this body than flood control. It has to do with the integrity of the legislative branch of this Government. Section 1, Article I of the Constitution reads:

> All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Speaking only for myself, I resent the nature of many of the attacks made on this measure. I resent the fact that the President of the United States has intimated that if we do not do certain things in advance he will veto this bill. [Applause.]

I call upon you, as the Representatives of the people, to come out and once more say to the country that there is a Congress and that we are going to do our duty irrespective of the fact that the White House has sent here a mandate to the effect that if we do not do so-and-so there will be no flood control. [Applause.]

Mr. MOORE of Virginia. May I interrupt the gentleman?

Mr. NELSON of Missouri. I yield to the gentleman.

Mr. MOORE of Virginia. The amendment of the gentleman from Illinois provides that these two localities which he describes shall stand the cost of the construction of such drainage works as may be necessary. The gentleman is a member of the committee in charge of the bill; what would that include, if the gentleman can tell us briefly?

Mr. NELSON of Missouri. As to Missouri, I may say, in brief, it would include, as I stated, this flood way of some 200,000 acres. According to the testimony that has been offered as to the value of the land, if I remember correctly, General Jadwin indicated it would be some two and a half or three million dollars. It was testified when the bill was under discussion the other day that it might approach $20,000,000.

Do you think it is possible, gentleman, for a community that is already broke to put up $20,000,000?

We want Cairo protected, my colleagues, but it is not necessary for Missouri to pay for the protection across the river. My plea is for fair play and for a bill that somehow we can get through. You can not expect Missouri to pay for something she does not want and does not need. [Applause.]

Mr. DENISON. Mr. Chairman and gentlemen, I have not had an opportunity to say anything on this bill since we began reading the bill for amendment, and I do not expect to have very much more to say. I represent the only district in Illinois that is directly affected by this bill, and I want to discuss this particular amendment, because it is of very vital importance to the district I represent. I therefore ask unanimous consent that I may proceed for 15 minutes.

The CHAIRMAN (Mr. NEWTON). The gentleman from Illinois asks unanimous consent to proceed for 15 minutes. Is there objection?

There was no objection.

Mr. DENISON. Gentlemen, I appreciate this privilege very much.

I have not come before this House very often asking anything that would directly benefit the people I represent. I have devoted a great deal of my time in the last few years in trying to serve the other Members of the House. I am now appealing to the other Members to help me and those I represent. Since I came to this Chamber about 14 years ago, I have held out the hope to the people of Cairo and the surrounding part of southern Illinois that sooner or later Congress would pass national flood relief legislation that would give them some hope and bring substantial relief to them. Now at last comes the opportunity to fulfill that promise and to help them realize that hope, but here is an amendment presented by my colleague, Mr. MADDEN, which would blot out completely all hope so far as that part of Illinois is concerned that is directly interested in the bill.

I represent the lower counties of Illinois, including Cairo. Gentlemen, if you can see this map, you will notice that Cairo is located at the extreme southern end of Illinois, and up north some 20 or 30 miles is the city of Cape Girardeau, Mo.

In its natural condition there was a natural diversion of the flood waters of the Mississippi River just south of Cape Girardeau down through a bayou and on south into the St. Francis River. That was the way the floods went when this country around here [indicating] was in a natural condition.

My colleague from Illinois has spoken at length, and with some feeling about the justice of this matter. I am now presenting a question of justice which I am sure will appeal to every Member of this House. Down here between Birds Point and New Madrid, where it is proposed to build this flood way, in a state of nature the flood waters of the Mississippi River spread out all over this part of Missouri and cut across here and entered the Mississippi River down near New Madrid; that is, in the early days before there were levees constructed to any extent, the flood waters of the Mississippi River that were not diverted through the bayou south of Cape Girardeau and allowed to flow down through here [indicating], and thence on down the St. Francis into the Mississippi River, were allowed to spread out over a natural reservoir in southeastern Missouri.

At that time Cairo, Ill., began the construction of levees and protected herself fully; and I want to say that Cairo and the drainage district north of Cairo have built their levees entirely with their own money. Only one contribution has ever been made by the Federal Government and that was after the flood of 1912, when the Federal Government, by special act, contributed a certain amount to match a similar amount contributed through the Legislature of Illinois. Outside of that the people of Cairo and southern Illinois have built their own levees, 60 feet high, around Cairo, without any contribution from the Federal Government at all. Why did we have to build our levees so high? A few years ago in order to reclaim this land down through here in Missouri [indicating], a large levee district was formed in Missouri and Arkansas, and they built a levee across the mouth of this natural diversion channel south of Cape Girardeau. That reclaimed a lot of valuable farming lands in Missouri and Arkansas, to be sure, but at the same time it diverted an immense amount of flood waters from their natural channels and sent them on down upon Cairo and the surrounding communities in Illinois.

The flood waters were thus confined and rushed down the river to Cairo. Cairo was not responsible. That was done by the people of Missouri and Arkansas. Meantime the people of Missouri, in order to reclaim and protect more overflowed farm lands, organized other levee districts and constructed levees all along the natural banks of the river from Cape Girardeau, north of Cairo, to New Madrid, 60 miles south of Cairo. Those levees in Missouri cut out the natural reservoir and compelled the confining of all floods in the main channel of the river. That had the effect of throwing back the water onto Cairo, Ill. Cairo is not responsible for that condition. But Cairo and all southern Illinois is suffering and is constantly threatened by the artificial condition that has been brought about by the reclamation improvements in another State.

Gentlemen, Cairo can not live unless something is done to relieve the people of that part of our State from the constant menace that is hanging over them by reason of the levee improvements over in the State of Missouri.

I assume that the people of Missouri had a legal right to make those improvements. They were trying to reclaim very fertile farming lands. But Cairo is trying to protect herself from destruction. Cairo is trying to save her homes, her great industries, and the lives of her people. I do not expect Missouri to pay for flood works to protect southern Illinois. I do not see how you can make her do it. The people over in Missouri had a right to build their levees. They were not only permitted by the Federal Government to build them where they did, but the Federal Government helped build them.

On the other hand, it would be the greatest injustice to Cairo to make her pay for relief from the conditions that have been brought upon her by the people of Missouri. I am sure everyone can see the injustice of that. That would be the effect of the amendment offered by the gentleman from Illinois [Mr. MADDEN].

Mr. COX. Will the gentleman yield?

Mr. DENISON. Certainly.

Mr. COX. Will not the gentleman concede that only the Federal Government is responsible?

Mr. DENISON. That illustrates the situation exactly. Gentlemen, there can be no relief to southern Illinois except by the Federal Government. If you adopt the amendment offered by my colleague from Illinois [Mr. MADDEN] you destroy this bill as far as southern Illinois is concerned, because the people of southern Illinois have taxed themselves until now they are practically bankrupt. Merchants and manufacturers have been going bankrupt. They can not stand any assessment for flood works in Missouri, and you might just as well not pass this bill if you put this amendment into it.

Mr. MADDEN. Will the gentleman yield?

Mr. DENISON. Yes.

Mr. MADDEN. I think my colleague does not understand the question.

Mr. DENISON. Oh, yes; I do.

Mr. MADDEN. Nobody is asking Cairo or southern Illinois or southeastern Missouri to pay a single cent of the cost of building the Bonnet Carre or the New Madrid spillway. All that is being asked is that these two elements of our citizenship composed of the people around southern Illinois and the people of southeastern Missouri shall accept a contingent liability—without the expenditure of a dollar—for damages that may be imposed on the United States during the period of construction of these two spillways. That is all, nobody is asking your people to pay for this.

Mr. DENISON. Contingent liability to whom?

Mr. MADDEN. You accept the responsibility for answering to the Government of the United States against any cost for damage to property owners.

Mr. DENISON. It would mean millions of dollars to be paid by southern Illinois and southeastern Missouri, and you might as well defeat the bill as far as southern Illinois is concerned. The people of Cairo or southern Illinois can not pay it, and I would rather that the House would rise up and strike out the enacting clause of the bill than to put that amendment into it. [Applause.]

I want to say, too, that after the President fully understands this situation, I do not believe he is going to veto the bill if the proposed amendment is not in it.

Mr. DRIVER. Will the gentleman yield?

Mr. DENISON. Yes.

Mr. DRIVER. I want to call the gentleman's attention to this amendment. It says, "No liability of any kind shall attach or rest on the United States for any damages from or by flood or flood waters at any place."

Mr. DENISON. That would mean an assessment of millions of dollars upon an impoverished people that are absolutely unable to pay it. Who would you assess it on? The amendment says on the "interests of southern Illinois." What interests? There is no practical way to carry such a proposal into effect, and if there was the people could not pay it. Why defeat some of the main purposes of the bill by putting such a provision in it?

Mr. WHITTINGTON. Has not the Supreme Court of the United States decided time and time again that no legal liability rested on the Government by the construction of levees?

Mr. DENISON. I think that has been held.

Mr. COX. And is it not true that if the State of Illinois and the State of Missouri were to enter into an agreement to

pay damages they would be assuming a liability where none now exists?

Mr. DENISON. That is true, but there is no more hope or possibility of the people of southern Illinois and of Missouri reaching an agreement on this thing than there is, as the gentleman from Missouri [Mr. NELSON] said, of mixing oil and water. No one would know how to apportion the damages or the costs, nor against whom to assess them. The whole thing is purely visionary. It is impractical, and it is impossible if it were practicable.

Mr. IRWIN. Mr. Chairman, will the gentleman yield?

Mr. DENISON. Yes.

Mr. IRWIN. The language of the amendment of the gentleman from Illinois [Mr. MADDEN] speaks of southern Illinois and southeastern Missouri. What does that mean? How much territory is taken in in those two States? The amendment does not qualify by stating so many counties or such and such parts, but simply says southeastern Missouri and southern Illinois. That is a pretty big territory. Just how much does the amendment take in?

Mr. DENISON. Nobody knows. It is wholly impracticable.

Mr. WILLIAM E. HULL. And is it not true that the constitution of the State of Illinois, so far as the State is concerned, would prevent it from spending any money in Missouri?

Mr. DENISON. Yes. It could not be done unless it were done voluntarily.

Mr. WILLIAM E. HULL. And if this were to be agreed to it would mean that they would have to pay for all of that land in that section where the spillway is.

Mr. DENISON. It would.

Mr. WILLIAM E. HULL. That would be the damages.

Mr. DENISON. If this amendment is to be adopted, it means that there will be no flood protection for southern Illinois and southeastern Missouri, because it is impossible of fulfillment so far as southern Illinois is concerned.

Mr. JACOBSTEIN. And is not that the real point here, that you could not have any flood-control project unless you have an agreement there—the whole thing would be stopped right at the start?

Mr. DENISON. Yes; entirely.

Mr. COX. In other words, flood control is conditioned upon cooperation?

Mr. DENISON. Yes.

Mr. COX. That is upon a voluntary assumption of these burdens on the part of southern Illinois and southeast Missouri, which the people of that territory consider to be unjust and inequitable.

Mr. DENISON. Absolutely. The people of southern Illinois have lived for years and years under a threatened wall of water. Whenever the water gets up as high as it did last spring it begins to seep under the levees, and so Cairo can not stand any higher levees. There is only one thing that will save southern Illinois and Cairo, and that is to lower the flood level by the construction of some kind of a diversion channel or flood way on the other side, or by setting back the levees. The people of Missouri ought not to have to stand that expense, and the people of southern Illinois not only ought not to have to stand the expense but they could not do so. I hope the Members of the House will not condemn the good people of the city of Cairo and the surrounding country in my State to this continued menace to their property, their homes, and even their lives, and to the loss of all hope, by the approval of this amendment to the bill.

The CHAIRMAN. The time of the gentleman from Illinois has expired. The question is on the amendment offered by the gentleman from Illinois [Mr. MADDEN].

Mr. SPEARING. Mr. Chairman and gentlemen, in considering the pending amendment it must be borne in mind that the plan proposed to be adopted in the bill under consideration is for one whole and complete plan, each part thereof being an integral and necessary unit of the whole plan. Included in the plan is a spillway known as the Bonnet Carre spillway, opening, of course, at the river and emptying into Lake Pontchartrain, in the rear of New Orleans. The spillway itself is a short distance, approximately 25 or 30 miles, above the city of New Orleans, and, as I have already indicated, it is one of the outlets to take care of and discharge surplus water when the Mississippi River is in flood.

The amendment calls for the same requirements as to what is known as the New Madrid flood way, which is located in the southeastern part of Missouri and covers an area opposite to Cairo, Ill., and, of course, on the opposite side of the Mississippi River. It, too, is an integral part of the flood-control plan recommended by the Chief of Engineers, which plan, as I have already indicated, is proposed in the pending bill.

You have heard from the gentleman from Illinois [Mr. DENISON] who has just taken his seat that it is impossible for the citizens of the section covered by the New Madrid flood way to comply with the requirements and demands of the pending amendment. If, therefore, the people affected by the New Madrid flood way can not and do not comply with the requirements of the pending amendment so far as it affects the New Madrid flood way, and if the city of New Orleans can not and does not comply with the requirements of the amendment as to the Bonnet Carre spillway, neither will be constructed, and therefore the whole plan would necessarily fail—because, I repeat, the New Madrid flood way and the Bonnet Carre spillway are necessary parts of the one whole and complete plan.

Mark the language of the pending amendment, which, so far as the Bonnet Carre spillway and the city of New Orleans are concerned, is as follows:

> Work on the so-called Bonnet Carre spillway will be undertaken when the city of New Orleans, in recognition of its paramount interest therein, shall have undertaken to hold and save the United States from all damage claims arising out of the construction of the spillway.

The same burdens are placed upon "interests in southern Illinois and southeast Missouri" so far as the New Madrid flood way is concerned.

The provision of the amendment is an affirmative, pregnant with a negative. In other words, the amendment is tantamount to declaring that the Bonnet Carre spillway will not be constructed unless nor until the city of New Orleans "shall have undertaken to hold and save the United States from all damage claims arising out of the construction of the spillway," and in the other instance the same is true of the New Madrid flood way. Therefore, unless the city of New Orleans and the interests in southern Illinois and southeast Missouri assume the burdens proposed to be put upon them and pay the claims for damages, the Government will not undertake to construct either the New Madrid flood way or the Bonnet Carre spillway.

Mr. MADDEN. Of course not.

Mr. SPEARING. And you have the statement from the gentleman from Illinois [Mr. DENISON] that his people can not bear this burden. Therefore, if the city of New Orleans does not assume to pay the claims for damages and you adopt the amendment, the Congress is declaring in advance that neither the New Madrid flood way nor the Bonnet Carre spillway will be constructed.

Mr. MADDEN. Do not you all say that you do not want it—that the people are opposed to it? And if they are opposed to it, why do you want to force it on them?

Mr. SPEARING. No; we have never said that at all. We do want the Bonnet Carre spillway and we want the New Madrid flood way, and also the Tensas flood way, and the Atchafalaya flood way; but we want all of them so as to obtain and secure the relief from destructive floods which the Chief of Engineers assures will be accomplished by constructing all of the projects and not merely by constructing two of them, viz, the Tensas and Atchafalaya flood ways and omitting the New Madrid flood way and the Bonnet Carre spillway. To omit those two projects would manifestly destroy the completeness of the flood-relief plan and would at the next flood bring disaster to the people in the alluvial valley equal to, if not greater than, the damage to life and property wrought by the high water of 1927. It is not logical to put in the bill a provision which in advance destroys the effectiveness of the plan which the bill itself proposes to adopt, and which we are assured by competent authority will secure relief to the flood-stricken areas. Moreover, what good reason is there for singling out two particular sections to bear this extra burden which is not attempted to be placed upon the other sections? The omission of the other sections from the burdens carried in the amendment is to concede that they are unreasonable and improper because if it is right to place this extra burden upon the people of southern Illinois and southeast Missouri as to the New Madrid flood way and upon the city of New Orleans as to the Bonnet Carre spillway, then a like burden could, with propriety, be placed upon the people affected, or that might be benefited by the other two flood ways.

Surely the fact that New Orleans is a large and prosperous city and may indirectly be benefited by the Bonnet Carre spillway is no justification whatever for attempting to mulct that city out of funds for the benefit of private interests, because the provisions against which complaint is not in any manner advantageous or beneficial to the Government, as I shall presently show. No good reason has been even suggested, nor can it be, why this extra burden should be placed upon the communities that might be affected or benefited by either the New Madrid flood way or the Bonnet Carre spillway. If flood control is a

national obligation, as it undoubtedly is and is conceded by everyone, the obligation should be borne by the Government, irrespective of locality and of a possible local benefit. If it is right to discharge a burden, as undoubtedly it is, then that burden should be discharged in favor of all people alike and not withheld because perchance it is possible that the proper discharge of the obligation may benefit some person or persons, or some community which is supposed to be more advantageously situated financially than other communities. Flood control is not a charity. It is an obligation and duty which the Nation owes to the people affected by the overflow of the banks of the Mississippi River or by breaks in the levees. Relief should not be withheld because one person or one community might be better off financially than another. Relief should not be doled out as a charity, but it should be granted in the discharge of an obligation recognized by everyone as resting upon the National Government. If the principle that a community which may be benefited by a public work is to defray a part of the expense or is to pay all of the damages be followed in other public works, the more populous and wealthy citizens, including the home city of the proposer of this amendment, would be required to make large contributions. Of course, no one advocates such an absurdity and yet we have it seriously contended here that because the city of New Orleans may be benefited by the Bonnet Carre spillway it should obligate itself to pay claims for damages for which the Government itself is not liable. The fact of the matter is the Atchafalaya flood way is of more importance and will be more beneficial to the city of New Orleans than will be the Bonnet Carre spillway.

In other words, the city of New Orleans will have greater security from damage if the Atchafalaya flood way be constructed and the Bonnet Carre spillway omitted than if the Bonnet Carre spillway be constructed and the Atchafalaya flood way omitted. The reason is that the Atchafalaya flood way will discharge a vastly greater amount of water than will the Bonnet Carre spillway, and thus by means of the Atchafalaya flood way New Orleans will be relieved of that great bank of water which would otherwise pass in front of it. In comparison with the amount of water which it is proposed to discharge through the Atchafalaya flood way the Bonnet Carre spillway sinks into insignificance.

Mr. SNELL. Mr. Chairman, will the gentleman yield for a question?

Mr. SPEARING. Certainly.

Mr. SNELL. I have been told that formerly the city of New Orleans was willing to build the Bonnet Carre spillway, provided the Federal Government would allow them to do it. It is said they are willing to do that on account of their own protection.

Mr. SPEARING. I have never heard of it.

Mr. O'CONNOR of Louisiana. I suggest to my colleague that he ask the gentleman who made that statement.

Mr. SNELL. I understand a statement came to the War Department to that effect.

Mr. SPEARING. I will say that to my knowledge there was a crevasse at Bonnet Carre a number of years ago and New Orleans was endeavoring all the time to have it closed up, and it was finally closed.

As a matter of fact, except for certain physical conditions resulting from an opening in the levee below New Orleans, that city would much prefer to have a spillway between that city and the Gulf than to have one above the city of New Orleans, as will be the Bonnet Carre spillway. The water, through a spillway below New Orleans, flows directly in the Gulf and can not under any circumstances reach or affect any portion of the city of New Orleans. On the other hand, the water through the Bonnet Carre spillway will be discharged into Lake Pontchartrain, upon which the city of New Orleans borders in the rear. The effect of the water being discharged into that lake through Bonnet Carre spillway may raise the level of that lake, and in the event of high tide in that lake, as sometimes happens, the water may flood that portion of the city of New Orleans bordering on Lake Pontchartrain. By reason of the possibilities just mentioned, it may be necessary for the city of New Orleans to build levees or embankments along the shores of Lake Pontchartrain in order to protect that portion of the city from the overflow resulting from the water of the spillway flowing into the lake at high tide.

Bear in mind that in an amendment offered by the chairman of the committee [Mr. REID of Illinois], as well as in the amendment offered by the gentleman from Illinois [Mr. MADDEN], it is provided that—

no liability of any kind shall attach to or rest upon the United States for any damages from or by floods or flood waters at any place.

While it is wise to insert that provision in the bill, it is not necessary, because the Supreme Court of the United States has decided, as you have heard reiterated many times during the discussion of this bill, that the Government is not liable for any of these damages. It is apparent therefore that the provision that the city of New Orleans shall undertake to hold and save the United States free from damage claims is not for the benefit or to the interest of the Government because both by judicial decisions and by the text of the bill the Government is relieved from, and is not responsible for, those damages. It necessarily results that the only persons, corporations, or institutions that could be benefited by requiring the city of New Orleans to assume the payment of such damaged claims are the persons, whether individuals or corporations, that may be damaged. Note that the language is to hold the Government "from all damage claims arising out of the construction of the spillway." Observe that there is no restriction limiting the "damage claims" to those for which the Government may be liable, but is generally for "damage claims arising out of the construction of the spillway." Those who prepared the amendment were careful to clothe it with every possible provision to make the city of New Orleans legally liable to third persons; that is, persons other than the Federal Government. Thus they took pains to include the requirement that a consideration should be expressed, namely, the "paramount interest" of New Orleans in the spillway; and, as I have already said, they enlarged the obligation so as to include all damage claims arising out of the construction of the spillway, not merely those against the Government or for which the Government might be liable. In effect the requirement is that the city of New Orleans, in order to obtain what is conceived to be protection from floods, must assume obligations and liabilities to third persons for which the Government is not liable. Under such conditions and obligations the city of New Orleans would legally be liable to such third persons even though the Government would not be. No good reason has been urged why this condition and result should be insisted upon.

Let us for a moment consider the persons or corporations which would be benefited as a result of the proposed amendment, if adopted. The Bonnet Carre spillway will traverse a narrow neck or strip of land about 7 or 8 miles wide between the Mississippi River and Lake Pontchartrain. In that area, however, are three major railroads as well as other interests and property which will be damaged. Necessarily there will be damage to those railroads and other interests and property, so that if the provision I am now discussing is put in the bill it will inure to their benefit and not the benefit of the Government, because, as we have already seen, the Government will not only not owe them anything or be liable to them for any damages, but will be free from obligation or liability under the decision of the Supreme Court to which reference has frequently been made and under the provisions of the bill exempting the Government from liability. Congress should not be so solicitous of the interests of private concerns, of institutions, or even individuals, as to legislate in their favor and against communities already stricken by disaster for which they were in no manner responsible but which, though a long series of years and at excessive outlay of cash, they have endeavored to prevent.

New Orleans has never been unmindful of its obligations, nor the city or its citizens slow in the expenditure of funds for the protection of itself and the neighboring territory from overflow and its effects. As the flood of 1927 was about to reach its height it seemed possible that the river might overflow its banks at New Orleans and that a break might occur below Baton Rouge, which would have caused great damage and suffering and possibly loss of life. In that extremity the city authorities arranged for the opening of an artificial crevasse below the city, and the city assumed the entire cost, damage, and expense, including reimbursing the persons who were damaged as a result of the crevasse. While it is true one of the purposes of creating that crevasse was to prevent the water from overflowing the banks in front of the city—there was no danger of a break in the levees then—it is perfectly clear that the opening referred to relieved the pressure elsewhere and probably prevented a break in the levee at some other point, so that while New Orleans was benefited by the break, so also were other communities.

The prevention of another break saved immense damage not only to physical property but to general economic and commercial conditions, because it must be remembered that an overflow not only causes physical damages, human distress and suffering, and frequently loss of life, but upsets and disarranges the economic, financial, and commercial conditions, and ultimately affects the manufacturing, wholesale, and financial centers. It is, of course, manifest that when the purchasing

power of a large class of people is materially diminished, if not destroyed, as was the case in the flood of 1927, their inability to make purchases of useful as well as necessary articles affects the retailer, the jobber, the wholesaler, and the manufacturer, each in his turn, and has an effect upon the general economic and financial situation. Louisiana was more injuriously affected than was any other State, and it is now suffering more than is any other State. In addition to that it must be borne in mind that of the three flood ways or diversion channels two of them—namely, the Tensas flood way and the Atchafalaya flood way—are in Louisiana, as is also the Bonnet Carre spillway. Much of the land in those sections will be destroyed for all practical purposes and will necessarily be withdrawn from taxation, thus reducing the revenue of the State and the purchasing power of the people for all time. In addition to the loss and damage just referred to, it is proposed by the amendment under discussion, and to which we are objecting, to place an additional burden upon the city of New Orleans for no apparent reason than that it seems to be conceived that the city might be forced and compelled, as a matter of self-protection, if not preservation, to yield to the unjust and unfair demands suggested by the amendment. This inequity should not be permitted.

As I have just said, and I again urge, the placing upon the city of New Orleans of the tax and burden and cost and expense proposed by the amendment would be inequitable, unfair, and unjust. I do not believe that the fair-minded men of this House will support the amendment. [Applause and cries of "Vote!"]

Mr. O'CONNOR of Louisiana rose.

Mr. REID of Illinois. Mr. Chairman, I ask unanimous consent that the debate on this section and all amendments thereto be now closed.

Mr. O'CONNOR of Louisiana. I would like to have five minutes.

Mr. REID of Illinois. I ask unanimous consent that all debate on this section and all amendments thereto close in five minutes.

Mr. LAGUARDIA. I object, Mr. Chairman.

Mr. REID of Illinois. Mr. Chairman, I move that all debate on this section and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Illinois moves that all debate on this section and amendments thereto close in five minutes. The question is on agreeing to that motion.

The motion was agreed to.

The CHAIRMAN. The debate closes in five minutes. The Chair recognizes the gentleman from Louisiana [Mr. O'CONNOR].

Mr. O'CONNOR of Louisiana. Mr. Chairman and gentlemen of the committee, as I said a few days ago, I have been fighting the good fight for flood relief since I came to Congress. I have seen many converts made during the last few years, and I think to-day we are nearing the goal for which we have fought for so many years down in the lower reaches of the river in Louisiana.

We want the Madden amendment voted down, for the excellent reasons given by the gentleman from Illinois [Mr. DENISON] and by my colleague from Louisiana [Mr. SPEARING]. I do not violate any confidence when I tell you that I know Mr. MADDEN himself was not pressing a few days ago for that amendment with reference to the Bonnet Carre spillway at New Orleans. He did not think it necessary to the policy to be pursued; and I believe the Republican leader, the gentleman from Connecticut [Mr. TILSON] was in accord with that. I do not violate any confidence or the ethics when I say to you that the President of the United States told my colleague [Mr. SPEARING] and myself this morning that that proposition, as it applies to New Orleans and as it is written in the Madden amendment, was entirely new to him. Mr. MADDEN, you ask for the truth. "Ye shall know the truth, and the truth shall make you free." Why should New Orleans, at the end of the river, take 10,000 cubic feet of water extracted from Lake Michigan by Chicago and 10,000 additional cubic feet of filth and sewage and drainage and pay for it for the benefit of the hygienic and sanitary welfare of Chicago?

The gentleman from Illinois knows that this statement is true. The greatest inland city of the world to protect herself from typhoid that would destroy her uses water from the lake and with her own enormous wastage as the result of stockyard and domestic use, creates power down the Chicago River out of which her sanitary district makes tremendous money and he has the audacity to ask New Orleans to pay for taking care of that water after it has served his city's purpose and she has made money out of it. Why should we be compelled to stand the burden of the drainage of every acre of ground in the great Mississippi Valley and take care of the sewage and drainage of the rapid development of civilization called the "cities" all around and on both sides of the great river? Substantially, if not literally, we ask for bread, and you give us a stone. We ask for a fish, and you give us a serpent. And the gentleman talks about "justice" on the floor of this House in regard to that amendment as it is applicable to New Orleans! It is the very last word of injustice.

Through and by his amendment New Orleans would be forced for all practical purposes to assume the payment of all damages resulting from the construction of the Bonnet Carre spillway.

I join with my friend [Mr. DENISON] in asking you to vote that amendment down overwhelmingly. [Applause.] Listen to this statement made in behalf of a city that has borne the heat and burden of the day. Listen to the last city on the banks of the Mississippi that has to watch with aching eyes yearly when the snows begin to melt between the Rockies and the Alleghenies and from above the Canadian border down through the mightiest, the most stupendous, valley in the world, as upon that melting and the rains that fall in the great rain sheds depends whether we shall sleep or remain awake "until danger's troubled night is o'er." Listen to the voice of the city that has already assumed the obligation of paying for all the damages in connection with the spectacular cutting of the levee at Caernarvon, and which may cost us millions.

In the estimates of cost of the Bonnet Carre spillway submitted by General Jadwin and by the Mississippi River Commission, there is a difference of $3,300,000 which covers the cost of right of way, the cost of rearrangement of railroads crossing the spillway, the relocation of the highways, and so forth, these items being included in the Mississippi River Commission's estimate and excluded in General Jadwin's estimate.

It is now represented as fair to require the city of New Orleans to assume this amount of $3,300,000 for the alleged reason that the spillway is for its particular benefit.

The city of New Orleans has 26 miles of levee on the Mississippi River. These levees have been built entirely at the expense of the city of New Orleans. Not one nickel of United States money was expended either in the construction or the upkeep of these levees. If a spillway is built at Bonnet Carre, these 26 miles of levees, in common with 250 to 300 miles of levee in other levee districts on both sides of the river, from Baton Rouge above New Orleans to Point a la Hache below, will participate in the benefits derived from a lowering of the flood height in that stretch of the river.

But in the consideration of the proposed assessment of $3,300,000 against New Orleans in connection with this spillway, let it not be overlooked that there are considerable expenditures that must be assumed by the city of New Orleans as a consequence of this proposed spillway.

There are three drainage canals, two navigation canals, and one natural stream, the Bayou St. John, all of which connect the built-up area of the city with Lake Pontchartrain in the rear. The Bonnet Carre spillway will discharge into Lake Pontchartrain about 250,000 cubic feet per second, or equivalent to the discharge of Niagara Falls.

While the effect of this discharge will not be to raise the lake more than a few feet—probably less than 3 feet—it is possible that there may be a storm tide occurring simultaneously with the high lake stage due to the spillway discharge and, to provide against such a contingency, there will be needed a material improvement of the rear protection-levee system. New Orleans gets the benefit of reduced flood stages on the front at the cost of increased flood stages in the rear.

The New Orleans levee board has an estimate recently prepared as to what would be the cost of this work, and this estimate is between four and five millions of dollars, no part of which it was contemplated to ask the United States Government to pay. Nor is it contemplated to ask the Government to assume any part of the cost of raising the levees along the commercial front of the city, comprising work that will involve, perhaps, $2,000,000, because it is not desirable to introduce complications in the matter of jurisdiction of our wharves and docks, as would naturally follow if the Government paid any part of the levee raising along that part of the river.

I join with my friend, Mr. DENISON, I repeat, in asking you to emphatically indorse his protest by voting down overwhelmingly the Madden amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MADDEN].

The question was taken; and on a division (demanded by Mr. MADDEN) there were—ayes 73, noes 142.

So the amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: On page 4, line 15, strike out the words "local interests," and insert in lieu thereof "the several States within the Mississippi flood area," and on line 21, after "(b)," strike out the balance of the line and all of line 22 and insert in lieu thereof, "without cost to the United States provide necessary drainage works and rights of way or easements for structures, spillways, and flood ways as and when required, and will hold safe the United States from all damages or claims resulting from such work: *Provided*, That each of the said several States within the Mississippi flood area shall contribute for the acquisition of land, easements, and rights of way as herein provided in proportion to the acreage within its boundary benefited by the flood-relief plan herein provided: *And provided further*, That the United States will reimburse each of the said several States one-third of the amount expended by it for the acquisition of said land, rights of way, and easements."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

The question was taken, and the amendment was rejected.

Mr. RAINEY. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Illinois rise?

Mr. RAINEY. For the purpose of propounding a unanimous-consent request.

The CHAIRMAN. The gentleman is recognized for the purpose of propounding a unanimous-consent request.

Mr. RAINEY. Mr. Chairman, with reference to the letter about which there was a controversy a while ago, I have stricken out all references to Mr. FREAR. I have submitted the letter to him, and I ask unanimous consent to print the letter as amended.

Mr. SCHAFER. Mr. Chairman, reserving the right to object, does the gentleman know how many acres of land Mr. Lorimer owns down in the valley?

Mr. RAINEY. Yes.

Mr. SCHAFER. About how many?

Mr. RAINEY. He owns in fee 800 acres; and his company has timber rights, I think, on 15,000 acres.

Mr. LAGUARDIA. Will the gentleman make that request to-morrow morning? The committee is about to rise.

Mr. RAINEY. I am not going to take up any time.

Mr. LAGUARDIA. Has the gentleman from Wisconsin [Mr. FREAR] seen the letter?

Mr. RAINEY. Yes; I submitted it to him.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois:

There was no objection.

The letter referred to is as follows:

WASHINGTON, D. C., *April 19, 1928.*

Hon. HENRY T. RAINEY,

*House of Representatives, Washington, D. C.*

MY DEAR MR. RAINEY: * * * When I was before the Flood Control Committee of the House the chairman inquired of me who I was representing, and I made it clear on that occasion that I represented no interest aside from the Chicago Flood Control Conference, and that I was there in behalf of that organization and at the request of its executive committee, of which I am a member.

The fact is that during the past 36 years I have not been in the employ of any person, firm, or corporation other than corporations controlled by myself and members of my immediate family; and I am not now nor have I ever been employed by the Tensas Delta Land Co. or any other interest. It is common knowledge that I am here in behalf of the Chicago Flood Control Conference. * * * I am not paid for this service; but, to the contrary, I am here at my own expense, which I pay out of my own funds.

I have no personal interest to promote or conserve in connection with the pending legislation. The only land in the Delta in which I have an interest is owned by the lumber company bearing my name, and is situated in the proposed Boeuf flood way. The land itself is not of much value, and our timber rights will not be benefited or injured by the water. Our company will donate the flowage rights over our land in event the flood way should be constructed; I so stated before the committee.

* * * * * * *

You know how you and Congressman MADDEN and myself have labored in season and out of season during the past 25 years for the control and improvement of the Mississippi River; and you know that our only purpose has been to promote a great public improvement of paramount interest to the whole country; and now that the time is at hand when the Federal Government is about to take over the control and regulation of this great highway of commerce, * * * I take the liberty to request you, as a matter of simple justice, to read this statement into the RECORD during the consideration of the flood-control legislation in the House.

Very respectfully, WM. LORIMER.

The Clerk read as follows:

SEC. 4. Just compensation shall be paid by the United States for all property used, taken, damaged, or destroyed in carrying out the flood-control plan provided for herein, including all property located within the area of the spillways, flood ways, or diversion channels herein provided, and the rights of way thereover, and the flowage rights thereon, and also including all expenditures by persons, corporations, and public-service corporations made necessary to adjust or conform their property, or to relocate same because of the spillways, flood ways, or diversion channels herein provided: *Provided*, That in all cases where the execution of the flood-control plan results in benefits to any person, or persons, or corporations, municipal or private, such benefits shall be taken into consideration by way of reducing the amount of compensation to be paid.

The Secretary of War may cause proceedings to be instituted for the acquirement by condemnation of any lands, easements, or rights of way needed in carrying out this project, the said proceedings to be instituted in the United States district court for the district in which the land, easement, or right of way is located. In all such proceedings the court, for the purpose of ascertaining the value of the property and assessing the compensation to be paid, shall appoint three commissioners, whose award, when confirmed by the court, shall be final. When the owner of any land, easement, or right of way shall fix a price for the same which, in the opinion of the Secretary of War, is reasonable, he may purchase the same at such price; and the Secretary of War is also authorized to accept donations of lands, easements, and rights of way required for this project. The provisions of sections 5 and 6 of the river and harbor act of July 18, 1918, are hereby made applicable to the acquisition of lands, easements, or rights of way needed for works of flood control: *Provided*, That any land acquired under the provisions of this section shall be turned over without cost to the ownership of States or local interests.

With the following committee amendments:

On page 5, in line 9, after the word "in," insert the word "special"; and in line 10, after the word "private," insert the words "or public service corporations."

The CHAIRMAN. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

In line 15, after the word "way," insert the words "which, in the opinion of the Secretary of War, are."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 6, line 7, after the word "that," insert the words "the title to."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 6, line 8, after the word "section," insert the words "and used in connection with the works authorized by this act."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

In line 10 strike out the words "ownership of."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

In line 11, after the word "interests," insert the words "which shall retain the same for the purposes specified in this act."

The committee amendment was agreed to.

Mr. REID of Illinois. Mr. Chairman, I have certain other amendments to this section and other sections of the bill which I ask unanimous consent to have printed in the RECORD.

The CHAIRMAN. Without objection, the amendments indicated by the gentleman from Illinois will be printed in the RECORD.

There was no objection.

The amendments referred to are as follows:

SECTION 4

Page 4, strike out all of the first paragraph, beginning with the word "Just," in line 23, down to and including the word "paid," in line 12, on page 5, and insert in lieu thereof the following paragraph:

"The United States shall provide lands for rights of way over which destructive flood waters will pass by reason of the diversion from the main channel of the Mississippi River, and for levees along such diversions, flood ways, and spillways, and any lands, easements, flowage rights, or rights of way necessary to control and regulate such diversion."

Page 6, line 10, strike out the words "local interests" and insert in lieu thereof the words "levee districts."

SECTION 6

Page 6, line 22, strike out the words "In an emergency, funds" and insert in lieu thereof the word "Funds."

Page 6, line 23, after the word "of," insert the words "section 1 of."

Page 7, line 1, after the word "project," change the semicolon to a comma, strike out the rest of the section, and insert in lieu thereof the following: "including levee work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on the outlets and tributaries of the Mississippi River between Rock Island and Head of Passes, in so far as such outlets or tributaries are affected by the backwaters of the Mississippi: *Provided*, That for such work on tributaries the States or levee districts shall provide rights of way without cost to the United States, contribute 33⅓ per cent of the cost of the works, and maintain them after completion: *And provided further*, That not more than $10,000,000 of the sums authorized in section 1 of this act shall be expended under the provisions of this section."

Page 7, after the amendment proposed to be inserted at the end of section 6, add a new paragraph, as follows:

"In an emergency, funds appropriated under authority of section 1 of this act may be expended for the maintenance of any levee when it is demonstrated to the satisfaction of the Secretary of War that the levee can not be adequately maintained by the State or levee district."

SECTION 8

Page 8, line 15, after the word "officer," insert the words "of the United States Army or other branch of the Government."

SECTION 9

Page 9, line 16, strike out the word "section" and insert in lieu thereof the words "sections 13, 14, 16, and."

Page 9, line 17, after the word "to," insert the words "all lands, waters, easements, and other property and rights acquired or constructed under the provisions of."

SECTION 10

Page 9, line 21, after the figures "1927," insert the word "and."

Page 10, line 9, after the word "tributaries," change the colon to a semicolon and insert the following: "and the reports thereon, in addition to the surveys provided by said House Document 308, Sixty-ninth Congress, first session, shall include the effect on the subject of further flood control of the lower Mississippi River to be attained through the control of the flood waters in the drainage basins of the tributaries by the establishment of a reservoir system; the benefits that will accrue to navigation and agriculture from the prevention of erosion and siltage entering the stream; a determination of the capacity of the soils of the district to receive and hold waters from such reservoirs; the prospective income from the disposal of reservoired waters; the extent to which reservoired waters may be made available for public and private uses; and inquiry as to the return flow of waters placed in the soils from reservoirs; and as to their stabilizing effect on stream flow as a means of preventing erosion, siltage, and improving navigation."

Page 10, line 15, after the word "authorized," insert the words "in section 1 of this act."

SECTION 11

Page 11, line 22, after the word "act" strike out the words "the commission is authorized to build same," and insert in lieu thereof the words "and by the President, the same shall be built."

SECTION 12

Strike out all of section 12 on pages 11, 12, 13, and 14.

SECTION 13

Page 14, line 3, strike out the figure "13" and insert in lieu thereof the figure "12."

SECTION 14

Page 14, line 5, strike out the figure "14" and insert in lieu thereof the figure "13."

Mr. REID of Illinois. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. TILSON, Speaker pro tempore, having assumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, and had come to no resolution thereon.

PENSIONS

Mr. ELLIOTT. Mr. Speaker, I submit, for printing, conference report on the bill (S. 2900) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2900) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendments numbered 7, 15, 16, with the following change: On page 11, strike out the lines 18 to 21, inclusive. On amendments numbered 18, 21, 24, 36, 41, 44 the House agreed with the following change: On page 23, line 10, after the name "Weaver," insert the word "former." On amendments numbered 53, 58, 64, 65, 67, 68, 71, 74, 80, 81, 82, 93 the House agreed with the following change: Strike out "$30" and insert "$20." On amendments numbered 94, 99, 106, 117, 126 the House receded.

That the Senate recede from its disagreement to the House amendments numbered 1, 2, 2½, 3, 4, 5, 6, 8, 9, 10, 11, 12, 13, 14, 17, 19, 20, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39, 40, 42, 43, 44½, 45, 46, 47, 48, 49, 50, 50½, 51, 52, 54, 55, 56, 57, 59, 60, 61, 62, 63, 66, 69, 70, 72, 73, 75, 76, 77, 78, 79, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 95, 96, 97, 98, 100, 101, 102, 103, 104, 105, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 118, 119, 120, 121, 122, 123, 124, 125, 127, 128 with the following changes: On page 156 of the engrossed bill, line 20, strike out "$30" and insert "$20." On page 180 of the engrossed bill, strike out the following language: "The name of Allie Crabb, widow of Mark M. Crabb, late of Company H, Seventy-eighth Regiment Volunteer Infantry, and pay her a pension at the rate of $30 per month"; and the House agreed to the same.

W. T. FITZGERALD,
RICHARD N. ELLIOTT,
MELL G. UNDERWOOD,
*Managers on the part of the House.*
PETER NORBECK,
LYNN J. FRAZIER,
*Managers on the part of the Senate.*

STATEMENT

The managers on the part of the House on Senate bill 2900 state by the way of explanation that 1,028 House bills were included in said bill. The committee on conference carefully examined into the merits of each individual case over which any difference of opinion existed, and mutually agreed to restore all bills of a meritorious character. The Senate bill contained the names of 343 beneficiaries and the House disagreed with the Senate on 58 items and made 87 corrections as amendments. Of the 58 items disagreed to the Senate asked that 33 of them be restored and the House conferees agreed to restore 32, in one of which the rate was reduced from $30 to $20 a month. The Senate agreed on the other 113 House amendments. Of the 1,028 House bills the Senate took exception to only 25 of them, and agreed to the retention of 24 of the exceptions. In one case the rate was reduced from $30 to $20 a month, the House receding in one case only. Therefore, the House lost but one bill of the total number included as an amendment to the Senate bill.

W. T. FITZGERALD,
RICHARD N. ELLIOTT,
MELL G. UNDERWOOD,
*Managers on the part of the House.*

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to—

To Mr. BOHN (at the request of Mr. MAPES), indefinitely, on account of illness.

To Mr. DOUGLAS of Arizona (at the request of Mr. LANHAM), for to-day, on account of illness.

To Mr. WURZBACH, for three weeks, on account of important business.

THE JOHN SEALY HOSPITAL

Mr. BRIGGS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD and include an explanatory

statement with reference to a bill introduced by me, H. R. 13217, such explanatory statement having been prepared by counsel for the foundation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BRIGGS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

*To the Honorable Senators and Members of the House of Representatives of the United States:*

In connection with our petition for relief of the estate of John Sealy from the payment of Federal estate taxes, we present the following:

HISTORY OF THE JOHN SEALY HOSPITAL, A DEPARTMENT OF THE MEDICAL BRANCH OF THE UNIVERSITY OF TEXAS

GALVESTON, *December 24, 1926.*

At an election held for that purpose on the first Tuesday of September, 1881, the voters of the State located the main university at Austin and the medical branch or department at Galveston.

On May 12, 1887, Mrs. Rebecca Sealy, executrix and wife of Mr. John Sealy, who died August 29, 1884, and Mr. George Sealy, a brother, and executor, addressed a letter to the city council of Galveston, from which we quote:

"Gentlemen: The executors of the late Mr. Sealy, in order to carry into effect his legacy toward an establishment of usefulness or charity in Galveston, to be of the most service, have concluded to tender to your honorable body the sum of $50,000, to be used in the erection of a building for a medical hospital, on grounds to be furnished by the city. * * *

"The only condition placed upon the donation is that so long as the hospital remains under the administration of the city it should be rendered more useful to the indigent sick of the city, under the regulations deemed best by you for that object. Should the medical department of the Texas State University be practically established at Galveston, as the State constitution requires, and should you deem it proper to transfer the same to the university for its benefit, you have the consent of the executors to such action as your wisdom shall dictate."

The city, by an ordinance approved September 6, 1887, accepted the donation.

By an act approved May 17, 1888 (acts of 1888, p. 20), the Legislature of Texas appropriated $50,000 for use in the construction of buildings for the medical branch of the University at Galveston, from which act we quote:

*"Provided,* That the said city of Galveston shall donate to the University of Texas block No. 668 in said city to be used for the medical branch of said institution; and

*Provided further,* That the executors of the estate of John Sealy, deceased, shall agree to construct on said block, at a cost of not less than $50,000, a medical hospital, which, when completed, is to be donated to the medical branch of the University of Texas, and to be under the control of the board of regents of said university."

By a deed dated July 30, 1889, recorded in Book 72, p. 268, the city conveyed to the State of Texas block 668 for the benefit of the University of Texas, and to be used for and in connection with the medical branch.

Block 668 has been used only for hospital purposes, the State having acquired other land upon which the medical department buildings were constructed.

From 1888 to 1891 the estate of Mr. Sealy expended in the construction of the hospital $69,126.36. The Mr. John Sealy hereinafter mentioned is the son of Mr. John Sealy, whose estate constructed the original hospital. Mr. John Sealy and his sister, Mrs. R. Waverley Smith, expended the following amounts in repairs of the hospital:

| | |
|---|---|
| 1898 | $10,499.47 |
| 1899 | 11,886.56 |
| 1900 | 5,584.74 |
| 1901 | 3,836.27 |

In 1915 Mr. Sealy and his sister constructed the women's hospital at a cost of $125,000. They executed a deed of gift to the board of regents of the University of Texas, dated May 31, 1915, recorded in book 285, page 413, of the women's hospital, located on property owned by the State. On December 4, 1911, the county of Galveston executed a lease to the board of regents of the University of Texas demising to the regents for 99 years all of the land acquired by the county for sea-wall purposes north and northwestward of the line of Avenue B, for a rental of $10 per annum, such land to be used solely for hospital purposes in connection with the John Sealy Hospital. By a deed dated December 23, 1911, recorded in book 253, page 517, Mr. John Sealy conveyed to the State of Texas for hospital purposes in connection with the John Sealy Hospital all of lots 1, 12, 14, and 13 in block 667, excepting so much thereof as had been conveyed to the county for sea-wall purposes. That property was acquired by Mr. Sealy at a cost of $3,600.

In 1916 Mr. Sealy expended in remodeling and refurnishing the main hospital $270,000. Since May, 1913, the John Sealy Hospital and its accessories have been operated under a lease contract between the regents of the university and the city of Galveston dated May 9, 1913, recorded in book 266, page 55, which expires May 9, 1938 (which succeeded the lease contract dated October 7, 1889), under the terms of which the university furnishes the medical staff of the hospital and the city is required to make yearly adequate appropriations for the care of the indigent sick of the city in the hospital and for the maintenance, support, and operation of the hospital. Under such contract the hospital is managed by a board of five persons, two appointed by the regents, two by the city, and the fifth chosen by the four. The appropriation made by the city each year, when added to receipts of pay patients, was insufficient to pay the operating expenses of the hospital and the deficiency each year was paid by Mr. Sealy. The amounts expended by him for such purpose from 1914 to 1925 aggregated $206,000.

The Sealy & Smith Foundation for the John Sealy Hospital was chartered under the laws of Texas as a charitable corporation March 10, 1922 (see Appendix A). Prior to his death, which occurred on February 19, 1926, Mr. Sealy, including the cost of lots 1, 2, 3, 4, 11, 12, and 13 in block 608, and lot 1 in block 607, which he conveyed to the Sealy & Smith Foundation, donated to the foundation in property and securities $271,463.11. Mrs. R. Waverley Smith purchased lots 2, 3, 4, 5, 6, 14, and the west one-half of lot 12, in block 607, at a cost of $22,066.50, and conveyed the same to the foundation. The total of the contributions made by the Sealy and Smith family prior to Mr. Sealy's death is $999,063.01.

The Rebecca Sealy Nurses' Home was constructed by the board of regents on the hospital grounds in 1914–15, at a cost of $92,250, and furnished by the city at a cost of $4,000.

By an act approved February 28, 1915 (acts of 1915, p. 32), the State accepted the gift by the Public Health Association of the Walter Colquitt Memorial Children's Hospital, also known as the Children's Ward of the John Sealy Hospital, on the premises of the University of Texas, Galveston, the same to the State hospital for crippled and deformed children and to be under the control and management of the board of regents of the university, and said board was authorized to lease the same to the city in the same manner as the John Sealy Hospital buildings. It was further provided that the legislature should make suitable provision in the general appropriation bill, or otherwise, to pay for the proper care of children afflicted with surgical tuberculosis. Such children's hospital was constructed by the Public Health Association at the expense of $15,000.

In 1910 the board of regents constructed the isolation hospital for the treatment of contagious diseases at a cost of $18,000. The colored hospital was constructed in 1901, with $18,500 donated by the New York Chamber of Commerce, supplemented by $3,000 from the funds of the general relief committee of 1900.

The will of John Sealy (Appendix B), after making specific bequests to relatives and friends, aggregating $220,000, leaves one-half of his residuary estate immediately to the Sealy & Smith Foundation for the John Sealy Hospital and provides that the foundation shall expend so much of the income from such half of the estate as its board of directors shall deem appropriate or necessary for the support, maintenance, operation, and repair of or additions to the John Sealy Hospital, or for the construction of additional buildings to be operated in connection therewith. See Appendix B, tenth clause of will. The will (11th par.), in connection with the codicil (4th par.), bequeaths the other half of the residuary estate to trustees, who are to pay over the income therefrom to four persons named in the will, after the death of which four persons such one-half of the residuary estate goes to the foundation for the same purposes as described in paragraph 10 of the will.

The codicil (3d par.) provides that all inheritance and estate taxes shall be paid out of the half of the residuary estate which is immediately bequeathed to the foundation for the benefit of the hospital, so that any inheritance legacy or estate taxes that may be paid will to that extent diminish that part of the estate which under the will goes immediately to the foundation. Mr. Sealy's estate was appraised by the appraisers appointed by the probate court of Galveston County at $10,055,565.43. The New York tax authorities, where transfer tax was paid, increased the valuation of the oil stock of the estate above the value placed thereon by the Galveston appraisers $1,898,624.49, which amount, added to the Galveston appraisement of the estate, would make a valuation of $11,954,189.92.

The Legislature of Texas, by an act approved October 1, 1926 (see Appendix C), released the Sealy & Smith Foundation and the other legatees, and the estate of Mr. Sealy from the payment of legacy or inheritance taxes estimated at $700,000, upon a condition that $700,000 of the assets of the foundation shall be subject to joint control of the board of regents and of the foundation.

Assuming that in addition to the specific bequests the half of the residuary estate, the income from which is to be paid to the individuals or to an individual until the death of four persons named in the will,

is subject to the Federal estate tax, the amount of such tax has been estimated at $600,000, upon which there will be a credit of $139,850.48, the amount of the transfer tax paid the State of New York. However, there is some question about the constitutionality of such transfer tax, which may be tested in the courts.

In addition to the ordinary functions of a hospital, the John Sealy Hospital is used for clinical instruction by the medical department of the university, without which a medical school can not be successfully conducted. The hospital also maintains a school for training nurses.

The hospital conducts an out-patient department for the treatment of those who do not require accommodation in the hospital, where indigents are treated without charge. The poor are treated in the hospital without charge. A charge is made only against those well able to pay who require special accommodations. Generally speaking, while the hospital is owned by the State, it is conducted as any other charity hospital.

It was stated by the president of the university that this bequest of Mr. Sealy would make the medical college and the hospital one of the largest medical centers in the United States. Any money expended on the hospital and any additions made thereto from the income of Mr. Sealy's estate left to the foundation will become the property of the State, as the hospital, as above stated, is owned by the State.

It was the earnest wish of Mr. Sealy that the bulk of his estate might go to the hospital without depletion by the payment of taxes of this nature.

Respectfully submitted.

J. W. TERRY.
BALLINGER MILLS.
JOHN L. DARROUZET.

---

APPENDIX A

CHARTER OF THE SEALY & SMITH FOUNDATION FOR THE JOHN SEALY HOSPITAL

STATE OF TEXAS,
*County of Galveston:*

*Know all men by these presents:*

That we, Jennie Sealy Smith, John Sealy, and R. Waverley Smith, all citizens of Galveston, Galveston County, Tex., under and by virtue of the laws of this State, do hereby voluntarily associate ourselves together for the purpose of forming a private corporation under the terms and conditions hereinafter set out, as follows:

1. The name of this corporation is the Sealy & Smith Foundation for the John Sealy Hospital.

2. The purpose for which it is formed is the support of a charitable undertaking in the city and county of Galveston, State of Texas, for the construction, remodeling, enlarging, equipping, and furnishing of the John Sealy Hospital and other hospital building or buildings in the city of Galveston, Tex., in connection with the John Sealy Hospital in said city and the endowment thereof, for the use of the people of said city of Galveston and providing them with the necessary medical care and attention therein.

3. The place where the business of the corporation is to be transacted is at Galveston, Galveston County, Tex.

4. The term for which it is to exist is 50 years.

5. The board of directors shall be seven, and the names and post-office addresses of those selected for the first year are as follows:

Mrs. Jennie Sealy Smith, Galveston, Galveston County, Tex.; John Sealy, Galveston, Galveston County, Tex.; R. Waverley Smith, Galveston, Galveston County, Tex.; Charles S. Peek, Galveston, Galveston County, Tex.; Dr. Edward Randall, Galveston, Galveston County, Tex.; Fred W. Catterall, Galveston, Galveston County, Tex.; E. O. Cone, Galveston, Galveston County, Tex.

6. This corporation, being organized as a charitable undertaking, has no capital stock, and the estimated value of the goods, chattels, lands, rights, and credits owned by the corporation is undetermined, as it is formed for the purpose of receiving contributions in the future to the charities mentioned, and as yet has no property.

In testimony whereof we hereunto sign our names this 1st day of March, A. D. 1922.

JENNIE SEALY SMITH.
JOHN SEALY.
R. WAVERLEY SMITH.

---

STATE OF TEXAS,
*County of Galveston, ss:*

Before me, the undersigned authority, this day personally appeared Jennie Sealy Smith, John Sealy, and R. Waverly Smith, known to me to be the persons whose names are subscribed to the foregoing instrument, and each of them acknowledged to me that she and he, respectively, had executed the same for the purposes and consideration therein expressed.

In testimony whereof I hereby subscribe my name and affix the seal of my office this the 8th day of March, A. D. 1922.

[SEAL.] C. O. NEWBROUGH,
*Notary Public in and for Galveston County, Tex.*

Filed in the office of the secretary of state this 10th day of March, A. D. 1922.

S. L. STAPLES,
*Secretary of State.*

---

THE STATE OF TEXAS,
DEPARTMENT OF STATE.

I, S. L. Staples, secretary of state of the State of Texas, do hereby certify that the foregoing is a true and correct copy of charter of the Sealy & Smith Foundation for the John Sealy Hospital, with the indorsement thereon, as now appears of record in this department.

In testimony whereof I have hereunto signed by name officially and caused to be impressed hereon the seal of State at my office in the city of Austin the 11th day of March, A. D. 1922.

[SEAL.] S. L. STAPLES,
*Secretary of State.*

---

BY-LAWS OF THE SEALY & SMITH FOUNDATION FOR THE JOHN SEALY HOSPITAL

ARTICLE I

*Purposes and authority of the foundation*

This foundation is authorized by its charter to receive any money or property, real or personal, turned over to it by gift, devise, or descent; to hold, manage, and control; to invest and reinvest or exchange the same; to receive title to real estate and make conveyances thereof in its corporate name; and to use and expend such property, or the income thereof, in such manner as may be directed by the donor, or if received by it without specific direction from the donor, then within the discretion of its board of directors and as may be by them determined, both as to the time and manner, for the construction of new buildings or for remodeling, enlarging, equipping, and furnishing existing buildings of the John Sealy Hospital and other hospital building or buildings in the city of Galveston, Tex., in connection with the John Sealy Hospital in said city, and for the endowment or support thereof, in such amounts as may be determined by its board of directors, for the use of the people of said city of Galveston and for providing them with the necessary medical care and attention in said hospital buildings.

---

APPENDIX B

WILL

The STATE OF TEXAS,
*County of Galveston:*

I, John Sealy, of the city and county of Galveston, State of Texas, being of sound and disposing mind and memory, do make, publish, and declare this my last will and testament, hereby revoking and annulling any and all other wills by me at any time heretofore made.

First. I nominate, constitute, and appoint Jennie Sealy Smith, R. Waverley Smith, and Charles S. Peck, all of the city and county of Galveston, Tex., independent executrix and executors, respectively, of this my will and of my estate, and I hereby expressly direct and provide that no bond or other security shall be required of them, or either of them, as such executrix or executors, and that no action shall be had or taken in the probate court, or any other court, with reference to the settlement of my estate, except to probate and record this will and to file an inventory, appraisement, and list of claims of my estate.

I direct that the said Charles S. Peek, in his capacity as my said executor, shall receive the sum of $10,000 per annum during the time he acts as my said executor, beginning with the date of my death and continuing until my estate is finally distributed and closed under the provisions of this will.

Wherever the words "executor" or "executors" are hereinafter used, they shall be construed to mean my said executrix or executor, or my said executrix and my said executors, as the case may be.

In the event of the death, resignation, refusal, failure, or inability of any or either of them to act as such executor, then the survivor or survivors, or he or they who act as such executor or executors, shall have full power and authority as such executor or executors the same as if all of them had qualified and acted; it being my intention that if one or more of said persons named as my executors shall die, resign, refuse, fail, or for any reason be unable to act as such, then the other or others of said persons shall have and exercise all the powers as such executors that could have been exercised by all of them had they all qualified and acted as such executors.

My said executors shall have full title, right, power, and authority to make any transfer, sale, and conveyance of all or any part of the estate and property left by me, from time to time, and at any time, as in their judgment shall seem best, and generally until final distribution of my estate, to have and exercise unlimited and general control and charge of my estate and effects in the same manner that I could do if living.

Second. It is my express will, desire, and intention that my executors shall have full power and authority to carry out all the provisions of this will and to administer, distribute, and finally close my estate without the exercise of any jurisdiction over it or them by the probate

court, or any other court, and without the intervention or action of any kind whatsoever of any court in any matter relating to my estate or of the settlement thereof.

Third. I give, devise, and bequeath to my sister, Jennie Sealy Smith, all of my interest in our home, being lots Nos. 12, 13, and 14, in block No. 262, in the city and county of Galveston, State of Texas, and all improvements thereon, and all of the contents of the said home.

Fourth. I give, devise, and bequeath to my aunt, Mary D. Maitland, widow of Thomas J. Maitland, the sum of $10,000. In the event of the death of my said aunt, Mary D. Maitland, before my own death, then I give, devise, and bequeath said sum of $10,000, that would otherwise have gone to said Mary D. Maitland, to my cousin, Mary S. Babcock, the daughter of my said aunt. In event of the death of both my said aunt and my said cousin before my own death, then if my said cousin leaves surviving her a child or children of her own, then I give, devise, and bequeath to such child or children, if more than one, share and share alike, as shall be living at the time of my death, said sum of $10,000 that would otherwise have gone to either my said aunt or my said cousin. But if both my said aunt and my said cousin die before my own death and if there be not living at the time of my death any surviving child of my said cousin, then said sum of $10,000 that would otherwise have gone either to my said aunt or my said cousin, or to such child or children of my said cousin, shall revert to, fall into, and become a part of my residuary estate and as such shall be disposed of in accordance with the provisions of this will.

Fifth. I give, devise, and bequeath to my cousin, Etta R. Jackson, wife of Thomas W. Jackson, of Hollidaysburg, Pa., the sum of $10,000. In the event of her death before my own death the said sum of $10,000 shall revert to, fall into, and become a part of my residuary estate and as such shall be disposed of in accordance with the provisions of this will.

Sixth. I give, devise, and bequeath the sum of $10,000 to each of my following-named cousins, to wit: To Margaret Sealy Burton, of Galveston, Tex., $10,000; to Ella Sealy Newell, of Greenwich, Conn., $10,000; to Caroline Sealy Livermore, of San Francisco, Calif., $10,000; to Rebecca Sealy Mallory, of Greenwich, Conn., $10,000; to George S. Ewalt, of Galveston, Tex., $10,000. I give, devise, and bequeath to my cousin, George Sealy, of Galveston, Tex., $50,000; making in all to my said six cousins $100,000. In event of the death of any of said legatees named in this paragraph before my own death, then the legacy or legacies that would otherwise have gone to such deceased legatee or legatees, under the provisions of this paragraph, shall revert to, fall into, and become a part of my residuary estate, and as such shall be disposed of in accordance with the provisions of this will.

Seventh. I give, devise, and bequeath the sum of $10,000 (being in all $50,000) to each of my following-named friends, all of Galveston County, Tex., to wit: To H. O. Stein, $10,000; to J. J. Davis, $10,000; to E. D. Cavin, $10,000; to Ballinger Mills, $10,000; and to M. H. Royston, $10,000.

I give, devise, and bequeath to John Sealy Peek, of Galveston, Tex., $5,000; I give, devise, and bequeath to John Sealy Livermore, of San Francisco, Calif., $5,000.

In event of the death of any of the legatees named in this clause seventh before my own death, then the legacy or legacies that would have otherwise gone to such deceased legatee or legatees, under the provisions of this paragraph, shall revert to, fall into, and become a part of my residuary estate, and as such shall be disposed of in accordance with the provisions of this will.

Eighth. I give, devise, and bequeath to my executors, as trustees, the sum of $50,000, in trust, for the following purpose, to wit: My said executors shall pay over and distribute said sum to and among my friends, all the employees of the firm of Hutchings, Sealy & Co., or of whatever firm, if any, shall at the time of my death be the successor in business of Hutchings, Sealy & Co., as shall be in the service of said Hutchings, Sealy & Co., or such successor firm, at the date of my death, constituting the entire office force of said Hutchings, Sealy & Co., or such successor firm at said date, such payment to and distribution among them to be made pro rata in proportion to the amount of compensation at said date received by them respectively as such employees.

Ninth. I direct that all of the legacies and bequests provided for in clauses third, fourth, fifth, sixth, seventh, and eighth of this will shall be paid to the legatees therein named in full, without any deduction for any Federal estate tax, or State inheritance tax on said legacies, or any of them, and any and all estate inheritance or legacy taxes which may be payable by reason of said legacies, or any of them, shall be paid out of my residuary estate. My executors may pay over and deliver the said legacies and bequests either in money or in securities which in their judgment are of the value of the legacies and bequests to which said legatees are severally entitled under the terms of said clauses.

Tenth. After the payment of all the legacies and bequests provided for by the preceding paragraphs of this will, I give, devise, and bequeath one-half of all the rest, residue, and remainder of my estate, property, and effects of whatsoever character, kind, nature, or description, real, personal, or mixed, in possession or in action, and wheresoever situated, which may be owned or possessed by me, or to which I may be entitled, to the Sealy & Smith Foundation for the John Sealy Hospital, a charitable corporation duly incorporated under the laws of the State of Texas, in trust, for the purpose that said corporation shall take charge and possession of the bequest made by this paragraph and shall invest and reinvest the same and collect and gather in the interest, income, and revenue thereon accruing or therefrom arising, and shall use, discharge, and expend such interest, income, or revenue, or so much thereof as said corporation through its board of directors shall deem appropriate or necessary for the support, maintenance, operation, and repair of or additions to the John Sealy Hospital located in the city of Galveston, Tex., or for the construction of additional buildings to be operated in connection therewith.

Eleventh. After the payment of all of the legacies and bequests provided for by clauses third, fourth, fifth, sixth, seventh, and eighth of this will, I give, devise, and bequeath one-half of all of the rest, residue and remainder of my estate, property, and effects, of whatsoever character, kind, nature, or description, real, personal, or mixed, in possession or in action, and wheresoever situated, which may be owned or possessed by me, or to which I may be entitled, to Jennie Sealy Smith, R. Waverley Smith, and Charles S. Peek, as trustees, upon the following trusts, terms, and conditions, to wit:

(a) The said trustee shall take charge and possession of the bequest made by this paragraph, and shall during the terms of this trust, as hereinafter limited, invest and reinvest the same and collect and gather in the interest, income, and revenue thereon accruing, or therefrom arising, and shall have full power to make any sales or conveyances of said property, or of any reinvestments thereof.

(b) The said trustees shall pay over or deliver at such periods as they may deem best, not longer than annually, one-half of the net interest, income, and revenue arising from the property bequeathed to them in trust by clause eleventh of this will to my sister, Jennie Sealy Smith, during her life time. At the death of my said sister, Jennie Sealy Smith, the trust created as to her by this paragraph of this clause eleventh of this will shall cease and determine, and the said trustees shall thereupon pay over, convey, and deliver one-half in value of the entire property bequeathed to them in trust by this clause eleventh of this will to the Sealy & Smith Foundation for the John Sealy Hospital in trust for all the uses and purposes and under all the terms and conditions specified and set out in clause tenth of this will. In the event the said Jennie Sealy Smith shall predecease me I direct that the said one-half of the trust property bequeathed to said trustees by clause eleventh of this will shall be turned over and delivered to said the Sealy & Smith Foundation for the John Sealy Hospital at the same time, in the same manner, and subject to the same trusts and provisions as the legacy or bequest made by clause tenth of this will.

(c) The said trustees shall pay over or deliver at such periods as they may deem best, not longer than annually, one-sixth of the net interest, income, and revenue arising from the property bequeathed to them in trust by this clause eleventh of this will to my brother-in-law, R. Waverley Smith, during his lifetime. At the death of my said brother-in-law, R. Waverley Smith, the trust created as to him by this paragraph of this clause eleventh of this will shall cease and determine, and the said trustees shall thereupon pay over, convey, and deliver one-sixth in value of the entire property bequeathed to them in trust by this clause eleventh of this will to the Sealy & Smith Foundation for the John Sealy Hospital in trust for all the uses and purposes and under all the terms and conditions specified and set out in clause tenth of this will. In the event the said R. Waverley Smith shall predecease me I direct that the said one-sixth of the trust property bequeathed to said trustees by clause eleventh of this will shall be turned over and delivered to said the Sealy & Smith Foundation for the John Sealy Hospital at the same time, in the same manner, and subject to the same trusts and provisions as the legacy or bequest made by clause tenth of this will.

(d) The said trustees shall pay over or deliver at such periods as they may deem best, not longer than annually, one-sixth of the net interest, income, and revenue arising from the property bequeathed to them in trust by this clause eleventh of this will to my cousin, Anna D. Terry, during her lifetime. At the death of my said cousin, Anna D. Terry, the trust as to her created by this paragraph of this clause eleventh of this will shall cease and determine, and the said trustees shall thereupon pay over, convey, and deliver one-sixth in value of the entire property bequeathed to them in trust by this clause eleventh of this will to the Sealy & Smith Foundation for the John Sealy Hospital in trust for all the uses and purposes and under all the terms and conditions specified and set out in clause tenth of this will. In the event the said Anna D. Terry shall predecease me I direct that the said one-sixth of the trust property bequeathed to said trustees by clause eleventh of this will shall be turned over and delivered to said the Sealy & Smith Foundation for the John Sealy Hospital at the same time, in the same manner, and subject to the same trusts and provisions as the legacy or bequest made by clause tenth of this will.

(e) The said trustees shall pay over or deliver at such periods as they may deem best, not longer than annually, one-sixth of the net interest, income, and revenue arising from the property bequeathed to them in trust by this clause eleventh of this will to my cousin, Rebecca

Sealy Terry, during her lifetime. At the death of my said cousin, Rebecca Sealy Terry, the trust created by this paragraph of this clause eleventh of this will shall cease and determine as to her, and the said trustees shall thereupon pay over, convey, and deliver one-sixth in value of the entire property bequeathed to them in trust by this clause eleventh of this will to the Sealy & Smith Foundation for the John Sealy Hospital in trust for all the uses and purposes and under all the terms and conditions specified and set out in clause tenth of this will. In the event the said Rebecca Sealy Terry shall predecease me I direct that the said one-sixth of the trust property bequeathed to said trustees by clause eleventh of this will shall be turned over and delivered to said the Sealy & Smith Foundation for the John Sealy Hospital at the same time, in the same manner, and subject to the same trusts and provisions as the legacy or bequest made by clause tenth of this will.

(f) Whenever any portion of the property devised to the said trustees by this clause eleventh of this will is to be turned over, conveyed, or delivered to said the Sealy & Smith Foundation for the John Sealy Hospital under the terms hereof, the trustees above named shall have full power to designate and determine what portion or portions of the trust property shall constitute the share then to be turned over, conveyed, or delivered to said the Sealy & Smith Foundation for the John Sealy Hospital, and what portion shall remain in the trust hereby created until its final termination, and to execute instruments of partition thereof.

(g) Upon the death of the last survivor of Jennie Sealy Smith, R. Waverley Smith, Anna D. Terry, and Rebecca Sealy Terry, the trust created by this clause eleventh of this will shall wholly cease and determine and all of the then existing trust property which shall not have theretofore been delivered to the said the Sealy & Smith Foundation for the John Sealy Hospital shall be then turned over and delivered to it to be held and used by it for the purposes hereinabove set out.

(h) No bond or other security shall be required of said trustees, or any of them, in connection with the said trust property, or its administration.

(i) All powers herein given to the said trustees shall vest in and may be exercised by the survivor or survivors thereof.

(j) In the event of the death of any of the three trustees hereinabove named in this clause of this will, prior to the final termination of this trust, or in the event of the death of any two of said trustees, the surviving trustees or trustee, as the case may be, shall have the right to join another trustee or trustees, either individual or corporate, with said survivor or survivors so as to keep the total number of trustees acting at three, by a written instrument of appointment acknowledged in accordance with the laws of Texas so as to entitle it to registration, and upon the execution of any such instrument of appointment by the surviving trustee or trustees, as the case may be, and its registration in the deed records of Galveston County, Tex., the trustee or trustees thereby appointed shall succeed to all of the powers of the then deceased trustee or trustees, and any and all acts in furtherance of the purposes of this trust done by such successor trustee or trustees so appointed shall be as effective and binding as if done by the trustees herein expressly named, whose place or places they take. Such power of appointment shall exist whenever by death, resignation, or otherwise, there are not three trustees administering the trust.

(k) After my estate is fully administered by my executors and the trust provided for by this clause eleventh of this will is established, the compensation provided for Charles S. Peek for acting as executor in clause first of this will shall cease, but he shall thereafter, until the final termination of said trust, receive out of the income from the said trust property, as his compensation for acting as such trustee, compensation at the rate of $10,000 per year as long as the whole of the property devised by this clause eleventh of this will shall remain in the hands of said trustees under the provisions hereof, such compensation to be diminished proportionately as and when the trust shall end as to any portion of the trust property by the delivery of same to the Sealy & Smith Foundation for the John Sealy Hospital under the terms of this clause.

Twelfth. All the legacies and bequests provided for in this will shall be paid out of my estate by my executors as soon after my death as may be convenient and suitable to the affairs of my estate, as to which time my said executors shall judge, and for the purpose of providing for the payment of said legacies and bequests as well as for any and all other purposes provided for by this will, my said executors are expressly authorized and empowered to transfer, sell, and convey any and every part of my estate necessary therefor as in their judgment may seem best.

Thirteenth. It is my desire and intention and I hereby expressly direct and provide that all the provisions and stipulations of the contract or articles of partnership of the firm of Hutchings, Sealy & Co., or any successor in business of said firm that may be in existence at the date of my death, relating to the continuance of said partnership and its business after the death of any one of the partners thereof, or relating to any other matters whatsoever, shall be in all respects carried out, observed, and performed by my said executors and said surviving partners, and I expressly authorize and empower my said executors to make all necessary arrangements and agreements and do and perform all necessary acts and things according to their own judgment and discretion, providing for the continuance and carrying on of the business of such partnership, or successor partnership, after the death of any of the partners thereof and with respect to the interest and rights of my estate therein, and the continuance and continued carrying on of the business thereof, in accordance with the terms and provisions of such articles of partnership or partnership contract.

Fourteenth. The unlimited and general control, charge, management, and disposition of my estate and property is confided to the wisdom, judgment, and discretion of my executors, or such of them as shall survive and act under the terms of this will, with full trust and confidence in their good faith and in their acting for the best interest of my estate and legatees and devisees, and my said executors shall have full time and discretion as to the time and manner of winding up my estate and making distribution thereof and with respect to investments and reinvestments during the administration thereof, and no demand shall be made or enforced against them for distribution or partition until the proper and judicious period shall, in accordance with their good judgment, have elapsed.

Fifteenth. My executors are hereby given full power and authority to make final partition and distribution of my estate to the parties respectively entitled thereto without the action, judgment, or decree of any court whatsoever, and in the meantime to invest, reinvest, and change investments of my estate and any and every part thereof.

In testimony whereof I hereunto subscribe my name at Galveston, Tex., this 24th day of March, 1922, in the presence of C. W. Branch and C. J. Ogilvy, who subscribe their names hereto as attesting witnesses in my presence and at my request, and in the presence of each other.

JNO. SEALY.

Here, now, on this the 24th day of March, 1922, the said John Sealy, the testator, subscribed his name to the foregoing instrument and published and declared the same to be his last will and testament, all in my presence, and we at the same time and at his request and in his presence, and in the presence of each other, hereto subscribe our names as attesting witnesses on this the said —— day of March, 1922.

C. W. BRANCH
C. J. OGILVY.

CODICIL

The STATE OF TEXAS,
*County of Galveston:*

I, John Sealy, of the city and county of Galveston, State of Texas, being of sound and disposing mind and memory, do make, publish, and declare this first codicil to my last will and testament, which bears date the 24th day of March, 1922.

1. I direct and provide that as long as my three executors named in clause first of said will shall act as such executors, any act done by any two of them, including the sale and conveyance of real estate, shall be valid and binding.

I direct and provide that whenever and as long as there are three trustees under clause eleventh of said will, the act of any two of them, including the sale or conveyance of real estate, shall be valid and binding.

2. I hereby cancel and annul so much of the ninth clause of said will as reads as follows:

"I direct that all of the legacies and bequests provided for in clauses third, fourth, fifth, sixth, seventh, and eighth of this will shall be paid to the legatees therein named in full, without any deduction for any Federal estate tax or State inheritance tax on said legacies, or any of them, and any and all estate inheritance or legacy taxes which may be payable by reason of said legacies, or any of them, shall be paid out of my residuary estate."

3. I hereby add to said will and make a part thereof the following clause, to be numbered sixteenth, to wit:

Sixteenth. I direct that the entire Federal estate tax on my estate and all State inheritance taxes on all bequests, legacies, and devises, whether specific or residuary, made by my said will shall be paid by my executors out of and shall be charged against and deducted from the bequest, legacy, and devise made by clause tenth of said will, it being my intention that all of such taxes upon my entire estate and upon all of the legacies and bequests made by my said will shall be paid out of the bequest and devise of one-half of my residuary estate made by said clause to the Sealy and Smith Foundation for the John Sealy Hospital, and that the bequests made by the third, fourth, fifth, sixth, seventh, and eighth clauses of my said will and the bequest and devise of one-half of my residuary estate made by the eleventh clause of my said will shall be paid in full and not have charged against them, or any of them, any amount for any such taxes.

4. I hereby cancel and annul all and so much of the eleventh clause of my said will and those portions of said clause in which it is provided that on the death of the respective life tenants of the bequests and devises thereby made the share of each one of them, as he or she dies, shall be turned over and delivered to the Sealy and Smith Foundation for the John Sealy Hospital free from any control of the trustees therein named, and in lieu thereof I hereby direct and provide that the trustees provided for by the eleventh clause of my said will shall keep the entire bequest and devise made by said eleventh clause of said will together until the death of the last survivor of Jennie Sealy Smith, R. Waverley Smith, Anna D. Terry, and Rebecca Sealy Terry, and that upon the death or successive deaths of each of them the share in the income from said trust property which would have been paid to the one so deceased shall be divided among the survivors of them equally, share and share alike, until the final termination of the trust provided for by said eleventh clause of said will by the death of the last survivor of them, upon which event the entire corpus of the then trust property shall be turned over and delivered to the Sealy and Smith Foundation for the John Sealy Hospital in the same manner and subject to the same trusts and provisions as the legacy and bequest made by clause tenth of said will.

In testimony whereof I hereunto subscribe my name at Galveston, Tex., this 10th day of July 1924, in the presence of C. W. Branch and C. J. Ogilvy, who subscribe their names hereto as attesting witnesses to this first codicil to my will, in my presence and at my request and in the presence of each other.

JNO. SEALY.

Here, now, on this the 10th day of July, 1924, the said John Sealy, the testator, subscribed his name to the foregoing instrument and published and declared the same to be the first codicil to his last will and testament, all in our presence, and we at the same time and at his request, and in his presence and in the presence of each other hereto subscribe our names as attesting witnesses.

C. W. BRANCH.
C. J. OGILVY.

APPENDIX C

An act (S. B. No. 271) to relieve the Sealy and Smith Foundation for the John Sealy Hospital, the estate of John Sealy, deceased, formerly of Galveston, Tex., and the legatees in and under his will, from the payment of taxes provided in chapter 5, title 122, Revised Statutes of Texas, generally known as inheritance taxes, and to provide that the city of Galveston shall not thereby be relieved from any obligation under a certain lease of John Sealy Hospital, executed by the board of regents of the University of Texas with the said city, dated the 9th day of May, 1913, and declaring an emergency

*Be it enacted by the Legislature of the State of Texas:*

SECTION 1. That the Sealy and Smith Foundation for the John Sealy Hospital, a charitable corporation, incorporated under the laws of this State for the construction, remodeling, enlarging, equipping, and furnishing of the John Sealy Hospital, the property of the State used for clinical purposes of the medical department of the State university, and other hospital building or buildings in the city of Galveston in connection with the John Sealy Hospital and the endowment thereof, for the use of the people of said city of Galveston, by providing them with the necessary medical care and attention therein, the legatees under the will of the estate of John Sealy, deceased, and each of them, be, and are hereby, relieved and released from payment of taxes provided for in chapter 5, title 122, Revised Statutes of Texas, generally known as inheritance taxes, and the State comptroller and the tax collector of Galveston County are hereby ordered and directed not to collect or attempt to collect such tax or taxes, which taxes if not so hereby released would be payable out of the part of his estate devised and bequeathed by said Sealy to said foundation; and provided, however, that the city of Galveston shall not thereby be released from any obligation in or under a certain lease of said John Sealy Hospital executed by the board of regents of the University of Texas with said city, dated the 9th day of May, 1913.

SEC. 2. Section 1 hereof shall become void unless the Sealy and Smith Foundation for the John Sealy Hospital shall within six months after the passage of this act enter into an agreement with the board of regents of the University of Texas, a copy whereof certified as a correct copy by the president of the University of Texas shall be filed with the secretary of state, whereby the Sealy and Smith Foundation for the John Sealy Hospital shall agree with said board of regents to segregate and set apart property, or the proceeds thereof, or cash, or partly property and partly cash, to be agreed to by and between said foundation and the said regents of a value equal to $700,000, the estimated amount of taxes released by section 1 hereof and by which said foundation shall agree to keep such property separate from its other assets or property and to use the income therefrom under the direction and with the approval of said regents for said John Sealy Hospital, or any additions thereto or buildings to be used in connection therewith, or for any of the purposes specified in the will of said John Sealy. The sum hereby remitted shall perpetually be under the joint control of the board of regents of the University of Texas, and the Sealy and Smith Foundation to invest and reinvest the proceeds.

SEC. 3. The shortness of this special session and the importance of this act to the people of the State creates an emergency and an imperative public necessity exists which requires that the constitutional rule providing that bills shall be read on three several days be suspended, and said rule is hereby suspended and that this act take effect and be in force from and after its passage, and it is so enacted.

(Signed) BARRY MILLER,
*President of the Senate.*
(Signed) LEE SATTERWHITE,
*Speaker of the House of Representatives.*

Received in the executive office this 1st day of October, A. D. 1926, at 11 o'clock and 30 minutes a. m.

(Signed) LENA W. GUIN,
*Assistant Secretary to the Governor.*

I hereby certify that senate bill 271 passed the senate finally by two-thids vote of 24 yeas and no nays on September 27, 1926, and that the senate concurred in house amendment on October 1, 1926, by a vote of 23 yeas and no nays.

(Signed) W. V. HOWETTON,
*Secretary of the Senate.*

I hereby certify that senate bill 271 passed the house of representatives with amendment on September 30, 1926, by the following vote: Yeas 75 and nays 28.

(Signed) C. L. PHINNEY,
*Chief Clerk of the House of Representatives.*

(In script by the governor.)
Approved October 1, 1926.

MIRIAM A. FERGUSON,
*Governor of Texas.*

EXTENSION OF REMARKS

Mr. HASTINGS. Mr. Speaker, does the permission given a few days ago to revise and extend remarks on this bill apply to the remarks made to-day? If not, I want to get permission to revise and extend the remarks I made to-day.

The SPEAKER pro tempore. The Chair understands there was general leave to revise and extend given to all who speak on this bill, and that would include the gentleman.

Mr. LOWREY. Mr. Speaker, does that include those who do not get the floor to speak on the bill?

The SPEAKER pro tempore. The Chair understands the leave was general for five legislative days.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled a bill of the following title, when the Speaker signed the same:

H. R. 11020. An act validating certain applications for and entries of public lands.

The SPEAKER also announced his signature to enrolled bills of the Senate of the following titles:

S. 205. An act to authorize the Secretary of the Treasury to pay the claim of Mary Clerkin;

S. 463. An act for the relief of David J. Williams;

S. 484. An act for the relief of Joe W. Williams;

S. 802. An act for the relief of Frank Hanley;

S. 1377. An act for the relief of Lieut. Robert Stanley Robertson, jr., United States Navy;

S. 1428. An act for the relief of R. Bluestein;

S. 1848. An act for the relief of Frank Dixon;

S. 2008. An act for the relief of the parents of Wyman Henry Beckstead;

S. 2442. An act for the relief of Lieut. Henry C. Weber, Medical Corps, United States Navy;

S. 2926. An act for the relief of the Old Dominion Land Co.;

S. 3366. An act to authorize a per capita payment to the Shoshone and Arapahoe Indians of Wyoming from funds held in trust for them by the United States;

S. 3506. An act for the relief of the owners of the British steamship *Larchgrove;* and

S. 3507. An act for the relief of the Eagle Transport Co. (Ltd.) and the West of England Steamship Owners' Protection & Indemnity Association (Ltd.).

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills of the House of the following titles:

H. R. 8835. An act to amend section 98 of the Judicial Code, as amended, to provide for terms of court at Bryson City, N. C.;

H. R. 10437. An act granting double pension in all cases to widows and dependents when an officer or enlisted man of the Navy dies from an injury in line of duty as the result of a submarine accident;

H. R. 11404. An act authorizing the Port Huron, Sarnia, Point Edward International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Clair River at or near Port Huron, Mich.; and

H. R. 12441. An act to amend section 2 of an act entitled "An act in reference to writs of error," approved January 31, 1928, Public, No. 10, Seventieth Congress.

ADJOURNMENT

Mr. REID of Illinois. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 26 minutes p. m.) the House adjourned until to-morrow, Tuesday, April 24, 1928, at 12 o'clock noon.

## COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Tuesday, April 24, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON THE LIBRARY

(10.30 a. m.)

To create the Mount Rushmore national memorial commission and defining its purpose and powers (H. R. 12521).

COMMITTEE ON WAYS AND MEANS

(11 a. m.)

To remit estate tax on the estate of John Sealy (H. R. 13217).

COMMITTEE ON THE DISTRICT OF COLUMBIA—SUBCOMMITTEE ON PARKS AND PLAYGROUNDS

(7.30 p. m.)

To provide for the acquisition of certain land in the District of Columbia and the establishment and operation of a municipal airport thereon (H. R. 7220).

To provide for the acquisition, improvement, equipment, management, operation, maintenance, and disposition of a civil air field and any appurtenances, inclusive of repairs, lighting, and communication systems, and all structures of any kind deemed necessary and useful in connection therewith (H. R. 8300 and 8299).

MILITARY AFFAIRS COMMITTEE

(10.30 a. m.)

A meeting to consider bill before the committee concerning promotion and retirement.

NAVAL AFFAIRS COMMITTEE

(10.30 a. m.)

A meeting before a subcommittee on the Naval Affairs Committee to consider the private bills on the calendar.

COMMITTEE ON EXPENDITURES IN THE EXECUTIVE DEPARTMENTS

(10.30 a. m.)

To provide for the transfer to the Department of the Interior of the public-works functions of the Federal Government (H. R. 8127).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10.30 a. m.)

A bill to provide for a five-year construction and maintenance program for the United States Bureau of Fisheries (H. R. 13151).

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

(10 a. m.)

To amend the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act," approved June 3, 1924 (H. R. 10710).

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

459. A communication from the President of the United States, transmitting supplemental estimates of appropriations for the Post Office Department for the fiscal year 1928, $50,000, and for the fiscal year 1929, $1,750,000; in all, $1,800,000 (H. Doc. No. 238); to the Committee on Appropriations and ordered to be printed.

460. A letter from the Secretary of the Navy, transmitting proposed draft of a bill to authorize an increase in the limit of cost of alterations and repairs to certain naval vessels; to the Committee on Naval Affairs.

461. A letter from the Secretary of the Navy, transmitting draft of a proposed bill to authorize an increase in the limit of cost of one fleet submarine; to the Committee on Naval Affairs.

462. A communication from the President of the United States, transmitting supplemental estimate of appropriations for the Department of Labor, Bureau of Labor Statistics, and the United States Employment Service for the fiscal year ending June 30, 1929, amounting to $120,000 (H. Doc. No. 239); to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII.

Mr. HAWLEY: Committee on Ways and Means. H. J. Res. 247. A joint resolution to authorize the Secretary of the Treasury to cooperate with the other relief creditor governments in making it possible for Austria to float a loan in order to obtain funds for the furtherance of its reconstruction program, and to conclude an agreement for the settlement of the indebtedness of Austria to the United States; without amendment (Rept. No. 1364). Referred to the Committee of the Whole House on the state of the Union.

Mr. WASON: Joint Committee on the Disposition of Useless Executive Papers. A report on the disposition of useless papers in the United States Civil Service Commission (Rept. No. 1365). Ordered to be printed.

Mr. WHITE of Maine: Committee on the Merchant Marine and Fisheries. S. 3437. An act to provide for the conservation of fish, and for other purposes; with amendment (Rept. No. 1366). Referred to the Committee of the Whole House on the state of the Union.

Mr. VESTAL: Committee on Patents. H. R. 13109. A bill to protect trade-marks used in commerce, to authorize the registration of such trade-marks, and for other purposes; without amendment (Rept. No. 1368). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAWLEY: Committee on Ways and Means. H. R. 12733. A bill to authorize the refund of certain taxes on distilled spirits; without amendment (Rept. No. 1369). Referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. IRWIN: Committee on Claims. H. R. 7552. A bill for the relief of Bertina Sand; with amendment (Rept. No. 1367). Referred to the Committee of the Whole House.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. EDWARDS: A bill (H. R. 13267) authorizing the South Carolina and the Georgia State Highway Departments to construct, maintain, and operate a toll bridge across the Savannah River at or near Burtons Ferry near Sylvania, Ga.; to the Committee on Interstate and Foreign Commerce.

By Mr. PEERY: A bill (H. R. 13268) to establish a fish-hatching and fish-cultural station in the State of Virginia; to the Committee on the Merchant Marine and Fisheries.

By Mr. ASWELL: A bill (H. R. 13269) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce; to the Committee on Agriculture.

By Mr. McLEOD: A bill (H. R. 13270) authorizing the appointment as warrant officers certain noncommissioned officers of the United States Army; to the Committee on Military Affairs.

By Mr. MORIN: A bill (H. R. 13271) to authorize the removal of the Aqueduct Bridge crossing the Potomac River from Georgetown, D. C., to Rosslyn, Va.; to the Committee on Military Affairs.

By Mr. HAWLEY: A bill (H. R. 13272) authorizing the adjustment of the boundaries of the Siuslaw National Forest, in the State of Oregon, and for other purposes; to the Committee on the Public Lands.

By Mr. McDUFFIE: A bill (H. R. 13273) to relinquish the title of the United States to land in the claim of Seth Dean,

situate in the county of Washington, State of Alabama; to the Committee on the Public Lands.

Also, a bill (H. R. 13274) authorizing the Chamber of Commerce of Jackson, Ala., its successors and assigns, to construct, maintain, and operate a bridge across the Tombigbee River at or near Jackson, Ala.; to the Committee on Interstate and Foreign Commerce.

By Mr. TATGENHORST: A bill (H. R. 13275) to regulate the practice before any board, commission, commissioner, officer, employee, or bureau of the United States by members admitted to the bar of the Supreme Court who are in good standing; to the Committee on the Judiciary.

By Mr. DRIVER: A bill (H. R. 13276) to amend section 3 of an act approved June 15, 1926, granting consent of Congress for the construction of a bridge across White River at or near Augusta, Ark.; to the Committee on Interstate and Foreign Commerce.

By Mr. McSWAIN: A bill (H. R. 13277) to provide for a study of the need for a new uniform for the enlisted men of the Army; to the Committee on Military Affairs.

By Mr. BERGER: Joint resolution (H. J. Res. 281) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. SWEET: Joint resolution (H. J. Res. 282) directing the Tariff Commission to conduct investigations under the flexible provision of the tariff act of 1922 concerning various agricultural products and providing funds therefor; to the Committee on Ways and Means.

By Mr. TAYLOR of Colorado: Joint resolution (H. J. Res. 283) to change the name of the Gatun Locks, Dam, Spillway, and Lake; and the Pedro Miguel Locks, Dam, Spillway, and Lake; and also the Miraflores Locks, Dam, Spillway, and Lake, in the Panama Canal, and for other purposes; to the Committee on Interstate and Foreign Commerce.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDRESEN: A bill (H. R. 13278) for the relief of Martin Anderson; to the Committee on Claims.

By Mr. BLAND: A bill (H. R. 13279) granting a pension to Miranda Ford; to the Committee on Invalid Pensions.

By Mr. DENISON: A bill (H. R. 13280) granting an increase of pension to Dulcina Jones; to the Committee on Invalid Pensions.

By Mr. W. T. FITZGERALD: A bill (H. R. 13281) granting a pension to Kate Forrester; to the Committee on Pensions.

By Mr. HOGG: A bill (H. R. 13282) granting a pension to Mary M. Vore; to the Committee on Invalid Pensions.

By Mr. HOUSTON of Delaware: A bill (H. R. 13283) granting an increase of pension to Mary E. Hazzard; to the Committee on Invalid Pensions.

By Mr. KINCHELOE: A bill (H. R. 13284) granting an increase of pension to Martha Huff; to the Committee on Invalid Pensions.

By Mr. LaGUARDIA: A bill (H. R. 13285) for the relief of E. Stewart Ferrand; to the Committee on Claims.

By Mr. RAMSEYER: A bill (H. R. 13286) granting an increase of pension to Margaret Maneor; to the Committee on Invalid Pensions.

By Mr. ROMJUE: A bill (H. R. 13287) granting an increase of pension to Catherine Hays; to the Committee on Invalid Pensions.

By Mr. SCHNEIDER: A bill (H. R. 13288) to authorize a cash award to William T. Flood for beneficial suggestions resulting in improvement in naval material; to the Committee on Naval Affairs.

By Mr. TILLMAN: A bill (H. R. 13289) granting an increase of pension to Emily E. Morley; to the Committee on Invalid Pensions.

By Mr. UNDERWOOD: A bill (H. R. 13290) granting a pension to Deliah D. Kirkpatrick; to the Committee on Invalid Pensions.

By Mr. PALMISANO: Joint resolution (H. J. Res. 284) to authorize an appropriation to pay claims of parents of deceased and injured children killed and injured by an Army airplane landing in Patterson Park, Baltimore, Md., on or about August 14, 1919, and for other purposes; to the Committee on Military Affairs.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7114. Petition of city council, city of Philadelphia, Pa., requesting favorable consideration to the amendment cited to the proposed revenue bill (H. R. 1); to the Committee on Ways and Means.

7115. By Mr. BOHN: Petition of citizens of Munising, Mich., who believe in maintenance of the national-origins plan of determining immigration quotas; to the Committee on Immigration and Naturalization.

7116. By Mr. BURTON: Resolution of the Palmer-Roberts Post of the American Legion, composed of ex-service men from Willoughby, Mentor, Wickliffe, and Irtland, Ohio, favoring the Capper-Johnson universal draft bill; to the Committee on Military Affairs.

7117. Also, resolution of Sub. Court Broadway, No. 1252, Independent Order of Foresters, Cleveland, Ohio, at a meeting of April 3, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7118. Also, resolution of Court Zaboy, No. 14, Foresters of America, Cleveland, Ohio, at a meeting held April 6, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7119. Also, resolution of Local No. 550, American Federation of Musicians, Cleveland, Ohio, at a meeting held April 8, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7120. Also, resolution of Court Fremont, Independent Order of Foresters, Cleveland, Ohio, at a meeting held April 5, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7121. Also, resolution of Past Commanders' Association, Knights of Malta, Cleveland, Ohio, at a meeting held March 29, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7122. Also, resolution of Court Lakewood, No. 4898, Independent Order of Foresters, Cleveland, Ohio, at a meeting held in April, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7123. Also, resolution of Hiawatha Council, No. 123, Daughters of America, Cleveland, Ohio, at a meeting held April 11, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7124. Also, resolution of Lake Shore Lodge, No. 6, Cleveland, Ohio, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7125. Also, resolution of Cleveland Commandery, No. 547, Knights of Malta, Cleveland, Ohio, at a meeting held April 3, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7126. Also, resolution of Criterion Tent No. 224, Maccabees, Cleveland Ohio, at a meeting held April 3, 1928, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7127. By Mr. BOYLAN: Resolution adopted by board of visitors, State Camp for Veterans, relative to the proposed transfer of the State Camp for Veterans to the United States Government; to the Committee on World War Veterans' Legislation.

7128. Also, petition of Merchants' Association of New York, favoring the Lehlbach bill (H. R. 10644); to the Committee on the Civil Service.

7129. Also, petition of Muscle Shoals committee of the Illinois Farmers' Institute, protesting against the Government control of Muscle Shoals; to the Committee on Military Affairs.

7130. By Mr. CARLEY: Petition of The Grasselli Chemical Co. of New York, protesting against the Wyant bill (H. R. 8127) to transfer control of rivers and harbors to the Interior Department; to the Committee on Rivers and Harbors.

7131. By Mr. CULLEN: Resolution by Metal Trades Council, of Brooklyn, N. Y., indorsing House bill 12032; to the Committee on Naval Affairs.

7132. By Mr. FREEMAN: Petition of J. Rechel, and others, of Willimantic, Conn., protesting against compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

7133. Also, petition of Harry L. Brodley and others, of Stafford, Conn., advocating the passage of the National Tribune's Civil War pension bill; to the Committee on Invalid Pensions.

7134. Also, petition of Clarence H. Barlow and others, urging the support of House bill 9035, to establish a uniform rule of naturalization; to the Committee on Immigration and Naturalization.

7135. Also, petition of Lillian Amidon and others, of Eagleville, Conn., urging the support of House bill 9035, to establish a uniform rule of naturalization; to the Committee on Immigration and Naturalization.

7136. By Mr. GARBER: Petition of W. H. Hudson, room 106, customhouse, New York City, in support of the Bacharach bill (H. R. 10644); to the Committee on Ways and Means.

7137. Also, petition of Charles W. Briles, director vocational education, Oklahoma City, Okla., in support of House bill 12241, vocational education bill; to the Committee on Education.

7138. Also, petition of American Association of Engineers, Oklahoma City, Okla., by the secretary, R. F. Danner, in support of House bill 6518; to the Committee on the Civil Service.

7139. By Mr. GREEN: Petition of 13 citizens of Fernandina, Fla., advocating passage of bill for relief of Civil War veterans and widows of veterans; to the Committee on Invalid Pensions.

7140. By Mr. HALE: Petition from 54 citizens of Atkinson, N. H., urging the passage of legislation providing for increase of pensions for Civil War veterans and widows of veterans; to the Committee on Invalid Pensions.

7141. By Mr. HUDSPETH: Petition of Council of Catholic Women, of El Paso, against enactment of Curtis-Reed bill; to the Committee on Education.

7142. By Mr. KERR: Petition from Charlotte chapters, Reserve Officers' Association of the United States, and the American Legion Auxiliary, Hornet Nest Unit, both of Charlotte, N. C., indorsing the Capper-Johnson bill; to the Committee on Military Affairs.

7143. By Mr. KVALE: Petition of several residents of Minneapolis, Minn., urging passage of House bill 11998, dog exemption bill; to the Committee on the Judiciary.

7144. Also, petition of Clifford Anderson, Montevideo, Minn., urging passage of House bill 11998, dog exemption bill; to the Committee on the Judiciary.

7145. By Mr. LINDSAY: Petition of Polish Army Veterans' Association of America, Chicago, Ill., urging passage of House bill 8273, referring to an amendment of the act to admit to the United States and to extend naturalization privileges to alien veterans of the World War; to the Committee on Immigration and Naturalization.

7146. Also, petition of Surfmen's Mutual Benefit Association, Elizabeth City, N. C., urging support of House bill 12032, providing for readjustment of pay of warrant officers in the Navy and Coast Guard; to the Committee on Naval Affairs.

7147. Also, petition of the Grasselli Chemical Co., New York City, protesting against the passage of House bill 8127, which seeks to transfer from the War Department to the Department of the Interior the control of harbors and rivers and the jurisdiction over navigable waters; to the Committee on Military Affairs.

7148. By Mr. O'CONNELL: Petition of the Mailers Union No. 6, International Typographical Union, New York City, favoring the passage of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7149. Also, petition of the Allied Printing Trades Council of Greater New York, favoring the passage of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7150. Also, petition of L. P. Spach, chairman flood relief, American Legion, favoring the passage of the Jones flood relief bill; to the Committee on Flood Control.

7151. Also, petition of the Bindery Women's Union, Local No. 43, International Brotherhood of Bookbinders, of New York and vicinity, favoring the passage of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7152. Also, petition of the United States Customs Inspectors Association, port of New York, favoring the passage of the Lehlbach retirement bill (H. R. 25); to the Committee on the Civil Service.

7153. Also, petition of the Grasselli Chemical Co., New York City, protesting against the passage of the Wyant bill (H. R. 8127) for the transfer from the War Department to the Department of the Interior the control of rivers and harbors and the jurisdiction over navigable waters; to the Committee on Expenditures in the Executive Departments.

7154. Also, petition of the Surfmen's Mutual Benefit Association, Elizabeth City, N. C., favoring the passage of the Britten bill (H. R. 12032) to readjust the pay of warrant officers in the Navy and Coast Guard; to the Committee on Naval Affairs.

7155. By Mr. O'CONNOR of New York: Resolutions adopted at conference of trade-union officers of Greater New York, indorsing House bill 89; to the Committee on the Post Office and Post Roads.

7156. Also, resolutions adopted at conference of trade-union officers of Greater New York, indorsing the Dale-Lehlbach retirement bill; to the Committee on the Civil Service.

7157. By Mr. PEAVEY: Petition of the members of the Webster Commercial Club, of Webster, Wis., favoring the authorization of the construction of a bridge across the St. Croix River between the Counties of Burnett, Wis., and Pine, Minn.; to the Committee on Interstate and Foreign Commerce.

7158. By Mr. QUAYLE: Petition of Edwin Gould, of New York City, appealing for liberal treatment of budget of the Virgin Islands; to the Committee on Appropriations.

7159. Also, petition of the Grasselli Chemical Co., of New York City, protesting against the passage of the Wyant bill (H. R. 8127); to the Committee on Rivers and Harbors.

7160. Also, petition of Surfmens Mutual Benefit Association, of Elizabeth, N. C., urging the passage of House bill 12032 to readjust the pay of warrant officers in the Navy and Coast Guard; to the Committee on Naval Affairs.

7161. Also, petition of the State Camp for Veterans, of the State of New York, protesting against the passage of House bill 12204, providing for the transfer of the State Camp for Veterans at Bath, N. Y., to the Veteran's Bureau; to the Committee on World War Veteran's Legislation.

7162. Also, petition of the National Fertilizer Association, Washington, D. C., with reference to Muscle Shoals bill; to the Committee on Military Affairs.

7163. Also, petition of the Western Fruit Jobbers Association of America, Chicago, Ill., with reference to Mexican immigration restrictions; to the Committee on Immigration and Naturalization.

7164. By Mr. RAMSEYER: Petition of Elm Grove Woman's Christian Temperance Union, Oskaloosa, Iowa, urging passage of the Sproul bill (H. R. 11410) to amend the national prohibition act; to the Committee on the Judiciary.

7165. Also, petition of citizens of Brooklyn, Iowa, urging that immediate steps be taken to bring to a vote a Civil War pension bill; to the Commitee on Invalid Pensions.

7166. By Mr. SINCLAIR: Letters from V. M. Antonius and Arthur Kateley, Crosby, N. Dak., and from Judge John H. Lewis, Minot, N. Dak., protesting against the Oddie bill; to the Committee on the Post Office and Post Roads.

7167. By Mr. SWEET: Petition of J. C. Rasbach, of Canastota, N. Y., favoring the Sproul bill (H. R. 11410) to amend the national prohibition act; to the Committee on the Judiciary.

7168. By Mr. WINTER: Resolutions re House bill 9956, from V. E. Farmer, commander, Engstrom-Duncan Post, No. 22, the American Legion, Rawlins, Wyo., and C. L. Carter, president the Lions Club, Sheridan, Wyo.; to the Committee on Irrigation and Reclamation.

## SENATE

### TUESDAY, *April 24, 1928*

*(Legislative day of Friday, April 20, 1928)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

#### MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 205. An act to authorize the Secretary of the Treasury to pay the claim of Mary Clerkin;

S. 463. An act for the relief of David J. Williams;

S. 484. An act for the relief of Joe W. Williams;

S. 802. An act for the relief of Frank Hanley;

S. 1377. An act for the relief of Lieut. Robert Stanley Robertson, jr., United States Navy;

S. 1428. An act for the relief of R. Bluestein;

S. 1848. An act for the relief of Frank Dixon;

S. 2008. An act for the relief of the parents of Wyman Henry Beckstead;

S. 2442. An act for the relief of Lieut. Henry C. Weber, Medical Corps, United States Navy;

S. 2926. An act for the relief of the Old Dominion Land Co.;

S. 3366. An act to authorize a per capita payment to the Shoshone and Arapahoe Indians of Wyoming from funds held in trust for them by the United States;

S. 3506. An act for the relief of the owners of the British steamship *Larchgrove;*

S. 3507. An act for the relief of the Eagle Transport Co. (Ltd.) and the West of England Steamship Owners' Protection & Indemnity Association (Ltd.); and

H. R. 11020. An act validating certain applications for and entries of public lands.

SUPPLEMENTAL ESTIMATE FOR LEGISLATIVE ESTABLISHMENT—SENATE (S. DOC. NO. 88)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the legislative establishment, United States Senate, fiscal year 1929, in the sum of $7,496, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

NAVAL APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12286) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1929, and for other purposes, the pending question being on the amendment of Mr. BLAINE, as modified.

Mr. BORAH obtained the floor.

Mr. CURTIS. Mr. President, will the Senator yield to me that I may suggest the absence of a quorum?

Mr. BORAH. I yield.

Mr. CURTIS. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Dill | Kendrick | Reed, Mo. |
| Barkley | Edge | Keyes | Robinson, Ind. |
| Bayard | Edwards | King | Sackett |
| Bingham | Fletcher | La Follette | Schall |
| Black | Frazier | Locher | Sheppard |
| Blaine | Gerry | McKellar | Shortridge |
| Blease | Glass | McLean | Simmons |
| Borah | Goff | McMaster | Smith |
| Bratton | Gooding | McNary | Smoot |
| Brookhart | Gould | Mayfield | Stephens |
| Broussard | Greene | Metcalf | Swanson |
| Bruce | Hale | Moses | Thomas |
| Capper | Harris | Norbeck | Tydings |
| Caraway | Harrison | Norris | Tyson |
| Copeland | Hawes | Nye | Walsh, Mass. |
| Couzens | Hayden | Oddie | Walsh, Mont. |
| Curtis | Heflin | Overman | Warren |
| Cutting | Howell | Phipps | Waterman |
| Dale | Johnson | Pittman | Wheeler |
| Deneen | Jones | Ransdell | |

Mr. LA FOLLETTE. I desire to announce that the Senator from Minnesota [Mr. SCHALL] and the senior Senator from Iowa [Mr. STECK] are engaged in the Committee on Post Offices and Post Roads.

Mr. JONES. I was requested to announce that the junior Senator from New York [Mr. WAGNER] is engaged in the Committee on Public Lands and Surveys.

Mr. CARAWAY. I wish to announce that my colleague the senior Senator from Arkansas [Mr. ROBINSON] is still detained from the Senate by reason of illness.

The VICE PRESIDENT. Seventy-nine Senators having answered to their names, a quorum is present. The Senator from Idaho is entitled to the floor.

Mr. EDWARDS. Mr. President, will the Senator from Idaho yield to me for a brief statement?

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from New Jersey?

Mr. BORAH. I yield.

NEW JERSEY DELEGATES TO DEMOCRATIC NATIONAL CONVENTION

Mr. EDWARDS. Mr. President, I rise to a point of personal privilege.

On Thursday of last week the senior Senator from Alabama [Mr. HEFLIN] hurled certain charges in the face of New Jersey Democracy, which I feel should be answered.

The Senator from Alabama said:

But, Mr. President, a strange political campaign is on—political tricks of the trade that Mark Hanna in his palmiest days never thought of are being employed by the Smith forces. In my judgment a large corruption fund is back of Al Smith in this campaign. His leaders are quietly moving around and quietly and strangely slipping over delegates in States where the rank and file of the party in those States stand against him usually 8 out of every 10 votes. How are they reaching and influencing these delegate manipulators? How are they getting them? Listen to this from the Trenton Evening Times:

"Hague ties up delegates by agreeing to pay bills. Expense may be $100,000, but mayor assumes it in exchange for Smith votes. All go free to the convention.

"In exchange for a written pledge to stand by Gov. Al Smith for President to the bitter end, Mayor Frank Hague, of Jersey City, has agreed to defray all traveling and hotel expenses for the New Jersey delegates to the Democratic National Convention at Houston, Tex., in June. The list is to include not only delegates and alternates but wives and friends to the number of approximately 75. The party may go by special train or by boat, and a conservative estimate of the cost will be from $75,000 to $100,000.

"There is naturally some interest as to how Hague, whose salary is only $10,000 a year, will be able to foot such a bill. Whether the signing by the delegates of a written pledge to take orders from Hague at Houston in return for having their bills all paid is in violation of the corrupt practice act is another matter for speculation. The corrupt practice act contemplates that the only money that can be expended in the interest of a candidate must be spent by the officially named manager for such candidate."

Senators, are you learning any politics from this bold and brazen eastern escapade? Hague is not Smith's manager. That is, he has not been designated as such publicly. It seems that anybody they can reach in the East is attending to this thing. A few people are gotten in a room. Delegates and their families are gathered up; a State is traded off and hog tied. They sign on the dotted line. They pledge themselves to vote for Smith to the bitter end if so much money is put up, and so forth, expenses, hotel bills, taken on a trip to Houston, and stand ready to come at the beck and call of the mayor, Mr. Hague, for Al Smith.

I want Governor Smith's henchmen summoned to bring down Mayor Hague and ask him where he got this money; ask him who authorized him to expend $100,000 for one delegation to a national convention; ask them why they are violating the corrupt practices act, if they are violating it. Let us be the judges of that; and ask them what they are doing, and let us decide whether or not they are violating it.

The above is taken from the CONGRESSIONAL RECORD of April 19.

Mr. President, the remarks of the senior Senator from Alabama [Mr. HEFLIN] are untrue from beginning to end, and if the Senator had wished to be fair in the premises he could have easily ascertained the falsity of the statement before it was made on the floor of this Chamber.

In this connection, I send to the desk a telegram received from Mr. Joseph J. Collins, secretary to Mayor Hague, and ask that it be read by the clerk.

The VICE PRESIDENT. The clerk will read, as requested.

The Chief Clerk read as follows:

JERSEY CITY, N. J., *April 19, 1928.*

EDWARD I. EDWARDS,

*United States Senate, Washington, D. C.:*

Your wire received. The following statement was issued by Mayor Hague when Newark News published story about expenses New Jersey delegation on April 9:

"These stories in the Newark Evening News published this afternoon, which purport to say that delegates from New Jersey to the Democratic National Convention were promised their expenses to Houston and return if they pledged themselves to vote for Governor Smith for the Democratic nomination for President, are not alone ridiculous but untrue. The list of delegates which has been filed is representative of the best among the citizenship of New Jersey. Every delegate should and will resent this absurd imputation. The prospective delegates who attended the luncheon at the Biltmore Hotel last week were unanimous, so far as sentiment was concerned, in declaring for Governor Smith's candidacy. No delegate from New Jersey needs or desires any financial guaranty to vote for Governor Smith's nomination, and their opinion of a choice for the Presidency certainly can not be purchased with a railroad ticket."

JOSEPH J. COLLINS, *Secretary.*

Mr. EDWARDS. Mr. President, my name is on the list of delegates at large which has been filed for representation of the State of New Jersey at the Houston convention in June, and inasmuch as I am not opposed, I presume I shall be elected and I shall probably attend the convention. I attended the luncheon at the Biltmore Hotel, New York, mentioned by Mr. Collins in the telegram just read, and I can assure the Senator from Alabama and the Senate that there was no suggestion of any kind made to pay any expenses of any delegate. There is no one mentioned as a probable member of the delegation from the State of New Jersey to the Democratic National Convention who would allow such a suggestion to be made. Each and every member of the New Jersey delegation is able and willing and desirous to go to the convention and will pay his or her own way without financial assistance from either Mayor Hague or Governor Smith. There is no man in the State of New Jersey who has ever paid my fare anywhere and there never will be; nor will they ever change my opinion when I am once set, and I get that way very frequently.

I have no objection to the senior Senator from Alabama opposing with all his might and main the presidential aspirations of Gov. Alfred E. Smith. He has just as much right to oppose Governor Smith's candidacy as I have to encourage and indorse it, but let him be fair and just in his opposition; let him at least tell the truth.

Charges made by the Alabama Senator against the New Jersey delegation were somewhat similar to those made against the delegation recently chosen in the State of Iowa. The honest Democrats of Iowa repudiated the charges flung at them

by the Alabama Senator, and in the name of the State of New Jersey I now do likewise.

Let me repeat that the unfair and libelous charges hurled at Mayor Frank Hague and the Democrats of New Jersey by the Alabama Senator are untrue and I herewith challenge Senator HEFLIN to substantiate them, either in whole or in part.

Mr. HEFLIN. Mr. President, will the Senator from Idaho yield to me?

Mr. BORAH. I did not know there was dynamite in this matter when I yielded. I understood that there was to be something in the nature of a personal statement. I am going to take only a few moments.

Mr. HEFLIN. I think the Senator should yield to me for just four or five minutes. I will not take more time.

Mr. BORAH. Very well; I yield to the Senator from Alabama.

Mr. HEFLIN. Mr. President, I am glad to have had the statement from the distinguished Senator from New Jersey [Mr. EDWARDS]. I am glad to know that nobody is going to pay his expenses. I have never said that anybody was going to pay his expenses to the convention at Houston. I can not quite understand how he gets so excited and stirred over an article which I read in the Senate from a newspaper published in his own State. The Senator should go to the newspaper that published the statement. I took the statement from the public press. The statement set out that Mayor Hague was going to pay the expenses of the New Jersey delegation and take them and their families to Houston and that it would cost probably $100,000. What a delightful picnic occasion such a trip would be!

The Senator from New Jersey takes offense at what I have said. I have not vouched for the truthfulness of the statement of the New Jersey newspaper. I simply read the statement. It is strange that the newspaper publishing the statement would do so if it were not true. It is hard to believe that this newspaper man would just hatch it out of his own imagination.

So far as the Senator from New Jersey himself is concerned, I accept his statement that they are not going to pay his expenses, but, unless he has conferred with each of the other delegates, I do not see how he knows exactly what sort of arrangements have been made with them.

The tactics of the Al Smith régime deserve the condemnation of all honest Democrats. There are a few leaders of the Democratic Party who do not believe that money is being corruptly used and very lavishly used by the Smith crowd. I do. I think the most secretive and corrupt campaign from the standpoint of the use of money is going on now in behalf of Governor Smith. I think there are earmarks of it in North Carolina, a Southern State. Bought-up weekly and daily newspapers in the various States are throttling and stifling the vehicles that carry information to the people. They are swamping candidates with the enormous amount of money that they are using. Senators have never seen such a situation in the Democratic Party in all their lifetimes—one man by the use of his corrupt machine—Tammany—with the vast amount of money they have got back of them, some coming from abroad and some contributed by the whisky interests in the United States, endeavoring to obtain the Democratic nomination, and other Democratic candidates are fearing to come out and run for the Presidency in the face of such dark-lantern tactics. I condemn those tactics. I want to see a resolution passed by the Senate calling the agents of the various presidential candidates before it in order to interrogate them.

Let me read to Senators a letter from California, where this dangerous, corrupt, and contemptible work is going on. The letter is addressed to myself, and reads as follows:

DEAR MR. HEFLIN: Inclosed find a clipping from a newspaper of an ad of Al Smith as a candidate for President. These ads have been running in the papers most of the month of March. Who is putting up the money for all this advertising? If they are running all over the United States, it will take millions of dollars. Is the Pope putting it up? He gets more money from the United States every year than from all Europe combined. The Republican Catholics all around the San Francisco district have registered this year as Democrats in order to vote for Smith at the primary election May 1. Are the Democrats of the United States going to swallow Smith and the Roman Papacy? Smith is too big a bigot to send his children to the public schools. The Pope has control of Mexico, Central and South America. If he gets hold of the United States he will own all of America. Then we will be like some of the other republics; when one cutthroat lays down the torch of revolution another cutthroat will take it up.

This clipping is from the Mercury Herald, San Jose. Every paper in the United States is afraid of the Irish Catholics. That gives them a wonderful pull in this country. Well, good luck to you.

Yours truly,

G. D. CUMMINGS.

Here [exhibiting] is the advertisement, Senators, appearing in all the newspapers of California for a month or more. It takes a lot of money to carry advertisements such as that. I repeat the question propounded to me by the writer of the letter: "Who is putting up all this money?" And I reserve the right, I want to say to the Senator from New Jersey, to read what I please to read in the Senate from newspapers, and I am responsible for reading them in the Senate and commenting on them as I see fit. That is a Senator's privilege.

## NAVAL APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12286) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1929, and for other purposes, the pending question being on the amendment of Mr. BLAINE, as modified.

Mr. McKELLAR. Mr. President, will the Senator from Idaho yield to me for a moment?

Mr. BORAH. I yield.

Mr. McKELLAR. Mr. President, I understand that the naval appropriation bill is going over until to-morrow. I wish to offer the amendment which I presented on yesterday as a substitute for the so-called Blaine amendment and have it pending. I ask that that may be done.

The VICE PRESIDENT. The amendment in the nature of a substitute will be printed and lie on the table.

Mr. BORAH. Mr. President, since adjournment last evening I have given what consideration I could in point of time to the amendment which was proposed at the close of the session. The amendment to the amendment proposed by the Senator from Nevada [Mr. PITTMAN] reads as follows:

*Provided*, That such limitation shall not apply in the case of actual physical attacks upon American citizens or their property, or the immediate danger of such attacks, at any time when the forces of the United States may be used by the President for strictly protective purposes without the consent of Congress, and appropriations may be used to pay the expenses of such protective action.

There are two matters to which I desire to call the attention of the Senate. In the first place, I find that we have a number of treaties, and I have been unable to determine for myself what effect this proposed amendment will have upon the obligations which we have assumed under those treaties. We have a treaty with Haiti which authorizes and, in fact, in which we agree to assist in creating and maintaining a constabulary in Haiti and in keeping order for the purpose of enabling the Haitian Government to go forward with a certain program which is outlined in the treaty. There are now about 700 marines in Haiti; they are there under the treaty; it can not be said that they are there purely for the purpose of protecting citizens against threatened attack. I am unable to say at this time just how we could avoid affecting the treaty by this amendment.

We also have a protocol with China by which we keep certain marines in Tientsin and other places under the protocol growing out of the Boxer rebellion.

We have a treaty with Panama under which we are authorized to use our troops for the purpose of maintaining order.

We also have a treaty with Cuba under which, under certain conditions, we are permitted to use our armed forces in Cuba.

I desire, Mr. President, time to examine these treaties in the light of this amendment. My opinion at the present time is that the amendment would conflict with our obligations under the treaties.

There is another matter to which I desire to call the attention of the Senate; and that is, I particularly desire to ask the Senator from Nevada what would be the effect of this amendment with reference to the President using forces for the purpose of protecting life and property. Would it be necessary, under the amendment, to have the approval of the Comptroller General before making use of troops?

Mr. PITTMAN. Mr. President, I take it that this whole amendment—the original amendment and the amendment that was offered by me yesterday—means nothing more or less than a resolution would have meant if reported by the Foreign Relations Committee and adopted by this body.

Mr. BORAH. That is what I understood the Senator to contend.

Mr. PITTMAN. It was necessary, as a piece of legislative strategy, to put the resolution in the form of a limitation on the appropriation. Otherwise, it would have been subject to a point of order. All that the amendment I have offered attempts to express is the constitutional authority of the President of the United States.

As I have stated before, it is perfectly evident that if anyone attempted to interfere with the constitutional authority of the President of the United States either by withholding money that was appropriated or in any other way the act would be contrary to the Constitution and void. I do not think the Comptroller General, Mr. McCarl, would attempt to pass on the constitutional authority of the President; but if he should attempt to pass on the constitutional authority of the President, I do not think there is any question but that he would admit that it is within the power of the President to use the armed forces to repel an attack or to prepare to repel an attack.

In other words, I do not believe that the appropriation has anything on earth to do with this subject. I do not think there will ever be any action with regard to any appropriation. I think this amendment is simply a statement of the policy of the United States Senate, just exactly as if it had come in the form of a resolution from the Foreign Relations Committee.

It says in the first part of this amendment, as presented by the Senator from Wisconsin [Mr. BLAINE], in effect, that it is the sense of the Senate of the United States that the President has not any right to use the armed forces of this country for belligerent intervention in the affairs of a foreign nation. There is no doubt, to my mind, that he has not any right to do that. The amendment further states that he has not any right to use our armed forces in any intervention in the domestic affairs of any foreign nation. I think that is good policy.

As to the treaty proposition, however, is the taking of troops into a country by virtue of a treaty an intervention? It may be or it may not be. The word "intervention" has a meaning. When there is an agreement to bring troops into a country under a treaty I do not think it constitutes an intervention; but as to the amendment, I will say that I had no purpose or intent to have it affect treaties. I simply desired this amendment not only to express the sense of the Senate as to what we thought the President had no constitutional authority to do without the action of Congress but also frankly in the same expression to admit what constitutional authority he has. In other words, it would be bad policy to pass a resolution saying that in our opinion he had no right to use our armed forces to interfere in the domestic affairs of another country; that he had no right to intervene belligerently; that he had no right to commit a hostile act against a friendly country and stop there. That is the expression of the Senate as to what he should not do; and then we state in the very next proviso that he has the constitutional authority to use our armed forces to repel attack against our citizens or a threatened attack anywhere. Here is what we admit to be his authority. There is what we deny to be his authority.

As a matter of fact, there are but two practical remedies against the President of the United States. One is impeachment for willful violation of his constitutional authority. The other is by defeat at the hands of the electorate of the country. To my mind, it is perfectly useless to talk about any minor officer of this country attempting to prevent the President of the United States from doing whatever he determines to do. If the President of the United States thought he was carrying out his constitutional authority, and Comptroller General McCarl or any one other officer should attempt to interfere, the President would probably remove him. It will be remembered that the Supreme Court has held that Congress can not deprive the President of the power of removing one of his appointees.

Mr. BORAH. I do not agree with that. If the Congress of the United States should really delegate to the Comptroller General the authority to pass upon a particular appropriation, it would be the duty of the Comptroller General to follow out the law; and it would be a high-handed proceeding upon the part of the President to dismiss an officer for obeying the law of the land.

Mr. WHEELER. Mr. President, will the Senator yield for a question?

Mr. BORAH. Yes.

Mr. WHEELER. Does not the Comptroller General have that power at the present time; and, as a matter of fact, should he not disapprove of the allowance of money where it is in violation of the President's constitutional power?

Mr. BORAH. What I am interested in now is whether under this amendment the Comptroller General would pass upon the question of whether the troops were being used to protect life and property or whether the President would be the judge. I do not desire to substitute the Comptroller General's judgment for that of the President's.

Mr. PITTMAN. Just one other observation, and that is this: I think the Comptroller General to-day has the right to refuse to approve of the use of any money that he believes is being used contrary to the Constitution of the United States. That is what this matter deals with.

As to the treaty situation, it may be that the amendment as originally presented by the Senator from Wisconsin [Mr. BLAINE] might bear on acts under our treaties. I do not believe that the amendment offered by me has any effect on that question at all. It deals with an entirely different one; and it is for the Senator or some one else to consider whether or not any additional amendment should be offered.

Mr. FLETCHER. Mr. President, I should like to direct the Senator's attention to this provision in the amendment, which seems to me somewhat ambiguous and somewhat involved:

> None of the appropriations made in this act shall be used to pay any expenses incurred in connection with * * * any intervention in the domestic affairs of any foreign nation.

That may be a perfectly friendly intervention, an invited intervention; it may be in pursuance of a treaty; and yet, under this amendment, none of the money appropriated by the bill could be used to pay for intervention in pursuance of a treaty in Haiti, or in Panama, or in China, and so forth.

Mr. BORAH. I am quite clear that there are certain provisions of these treaties which would be contravened by this amendment. It may be that the amendment can be reformed so as not to interfere with these treaties, but I desire myself to examine that question in the light of the treaties.

Mr. CURTIS. Mr. President, if the request of the Senator from Idaho is granted, I understand that the Senator from Wyoming [Mr. WARREN] desires to proceed with the legislative appropriation bill; and I give notice that after that, if the afternoon is not consumed, I shall ask unanimous consent to proceed with unobjected bills on the calendar.

Mr. DILL. I should like to have about five minutes.

Mr. CURTIS. Will the Senator let us take up the legislative bill?

Mr. DILL. I am perfectly willing to have that done if I can obtain the floor before a speech is made on some other subject. I shall take only about five minutes. I want to insert some matters in the RECORD and comment briefly on them.

Mr. NORRIS. Mr. President, I desire to offer a substitute for the amendment to the naval appropriation bill on the Nicaraguan question offered by the Senator from Wisconsin [Mr. BLAINE]. I ask that it be printed and lie on the table.

Mr. ASHURST. Let it be read.

Mr. NORRIS. Several Senators have requested that the amendment be read, so I make that request.

The PRESIDING OFFICER (Mr. MCNARY in the chair). The clerk will read the amendment.

The CHIEF CLERK. As a substitute for the modified amendment of the Senator from Wisconsin [Mr. BLAINE], on page 53, after line 17, insert:

> By Mr. NORRIS as a substitute for Mr. BLAINE'S modified amendment: "*Provided*, That after February 1, 1929, none of the appropriations made in this act shall be used in Nicaragua to pay any expenses incurred in connection with acts of hostility against that nation, or any belligerent intervention in the affairs of that nation, or any intervention in the domestic affairs of that nation, unless war has been declared by Congress: *Provided*, That such limitation shall not apply in the case of actual physical attacks upon American citizens or their property, or the immediate danger of such attacks, at any time when the forces of the United States may be used by the President for strictly protective purposes without the consent of Congress, and appropriations may be used to pay the expenses of such protective action.
>
> "The words 'acts of hostility,' and the words 'belligerent intervention,' shall include within their meaning the employment of coercion or force in the collection of any pecuniary claim or any claim or right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against the Government of Nicaragua, either upon the initiation of the Government of the United States, or upon the invitation of any official or other person claiming to be an official of Nicaragua."

The VICE PRESIDENT. The amendment will lie on the table and be printed. Is there objection to the request of the Senator from Idaho to postpone the further consideration of the naval appropriation bill until to-morrow? The Chair hears none, and it is so ordered.

APPROPRIATIONS FOR LEGISLATIVE BRANCH

Mr. WARREN. Mr. President, I understand that the naval bill is to be laid aside temporarily.

The VICE PRESIDENT. By unanimous consent, the naval appropriation bill has been temporarily laid aside until to-morrow.

Mr. WARREN. I wish to call up House bill 12875, the legislative appropriation bill.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 12875) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1929, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. WARREN. I ask unanimous consent that the formal reading of the bill may be dispensed with, and that it may be read for amendment, the amendments of the committee to be first considered.

The VICE PRESIDENT. Without objection, it is so ordered.

INTERSTATE COMMERCE COMMISSIONER JOHN J. ESCH

Mr. DILL. Mr. President, a few weeks ago the Senate refused to confirm the nomination of Commissioner Esch, of the Interstate Commerce Commission. He has continued to serve in face of the fact that confirmation was refused. I was interested, for my own information, in learning by what authority he continues to serve as a member of the Interstate Commerce Commission and draw his pay.

I found, on investigation, that his right to serve was based upon the provisions of the Constitution, supported by two decisions. One was the decision of the Attorney General in 1830, bearing on this subject, when J. McPherson Berrien was Attorney General of the United States. Under the Constitution, owing to the fact that the President gave Mr. Esch an appointment during the holiday recess, he is permitted to serve until the end of the session of Congress. I have tried to learn whether or not an appointment made following the adjournment of Congress, would be legal.

I understand that it would be like any other appointment made when Congress is not in session, namely, that he might serve, but he could not draw his pay. I ask, therefore, to have inserted in the RECORD the opinion of the Attorney General delivered April 16, 1830, and following that the opinion of the Comptroller General of the United States, delivered May 7, 1915. Those two decisions seem to be the only decisions on this question.

The PRESIDING OFFICER (Mr. MCNARY in the chair.) Is there objection?

There being no objection, the opinions were ordered to be printed in the RECORD, as follows:

[From opinions of Attorneys General, United States, 1791 to 1838; Executive Document No. 55, House of Representatives, Thirty-first Congress, second session, pp. 701–703]

COMMISSIONS GRANTED DURING RECESS OF SENATE

A commission issued by the President during a recess of the Senate continues until the end of the next session of Congress, unless sooner determined by the President, even though the individual commissioned shall have been meanwhile nominated to the Senate, and the nomination rejected.

The acceptance of a new commission, after confirmation by the Senate of an appointment made during a recess, is a supersedeas of that granted on the original appointment.

ATTORNEY GENERAL'S OFFICE,
*April 16, 1830.*

SIR: I have the honor to acknowledge the receipt of your communication of yesterday, asking my opinion—

Whether the rejection by the Senate of the nomination of Mr. Isaac Hill to the office of Second Comptroller of the Treasury has vacated the commission granted on the Executive appointment to that office, made during the late recess of the Senate?

Or whether a commission, issued under an executive appointment, continues until the end of the succeeding session of Congress or until another commission shall be issued on a nomination approved by the Senate?

Mr. Hill was appointed, during the last recess of the Senate, to fill a vacancy occurring during the recess. That appointment was made in pursuance of the third clause of the second section of the Constitution, which declares that "the President shall have power to fill all vacancies that may happen during the recess of the Senate by granting commissions which shall expire at the end of their next session." The commission issued to Mr. Hill was, I presume, in conformity with these provisions. It was then a grant of the office to the end of the next session of Congress succeeding its date, subject intermediately, as all such offices are, to the pleasure of the President.

Under the preceding clause of the same section of the Constitution the President is authorized to nominate, and, by and with the advice and consent of the Senate, to appoint all officers of the United States whose appointments are not otherwise provided for in the Constitution, and which shall be established by law, with a provision, which is inapplicable to the present inquiry, that Congress may vest the appointment of such inferior officers as they may think proper in the President alone, in the courts of law, or in the heads of departments.

In the exercise of the power thus conferred upon the President, Mr. Isaac Hill was, during the present session of Congress, nominated by him to the Senate, and the nomination has been rejected by that body. I apprehend that the commission granted to Mr. Hill, in the recess, remains untouched by this nomination, and the rejection of it.

The limitation, which is affixed to it by the Constitution, is the end of the present session of Congress, unless it be sooner determined by the pleasure of the President. To this the decision of the Supreme Court in the case of the United States *v.* Kirkpatrick has superadded another limitation. That court has, in that case, decided that the acceptance of a commission, issued after the confirmation by the Senate of an Executive appointment made during the recess, on a nomination to that body of the same individual, is a virtual superseding and surrender of the commission granted on the original appointment; so that, by force of that decision, if Mr. Hill's nomination had been confirmed, and a new commission had issued under an appointment made in conformity to the advice and consent of the Senate, after the acceptance by him of such new commission, that which he originally held would have been virtually superseded and would not have continued until the end of the present session of Congress; but this would be the result of the concurring acts of the President and the officer: Of the former, in the new appointment consequent to the advice and consent of the Senate; of the latter, in the acceptance of the commission issued under such new appointment.

In the case under consideration, whether the commission of Mr. Hill shall continue until the end of the present session of Congress, or be sooner determined, seems to me to depend on the pleasure of the President. He certainly has the power, by and with the advice and consent of the Senate, to determine it by a new appointment, to take effect immediately. But this power is derived from his right of removal. If he abstains from the exercise of that power—if he delays the nomination until the last day of the session, or nominates immediately, specifying that the appointment is to take effect at the end of the present session—in either case Mr. Hill's commission, undetermined by any act of the Executive will, is left to expire, by its own constitutional limitation, at the end of the present session of Congress.

The following proceedings, which have been adverted to among others, seem to conform to this view of the subject:

On the 5th of March, 1799, Mr. Adams, then President, appointed Eugene Brenan an inspector of the revenue; on the 4th of the following December he nominated that individual to the Senate for the same office; on the 10th of that month the nomination was rejected by that body; and on the 12th of the same month he made a new nomination in the following terms: "I nominate Julius Nicolls, jr., of South Carolina, to be inspector of survey No. 3 in that State in place of Eugene Brenan, whose commission will expire at the end of the present session of the Senate"; and on the 13th the Senate advised and consented to that nomination.

On the 17th January, 1814, Mr. Madison nominated to the Senate as principal assessor for the twenty-eight collection district of New York, Homer R. Phelps, who had been appointed to that office during the recess. On the 24th of that month the nomination was rejected by the Senate, and on the 31st the President nominated sundry assessors, and, among the rest, "Asahel E. Paine for the twenty-eight collection district of New York, in room of Homer R. Phelps," which nomination was confirmed on the 2d of February.

In the first of these cases, Mr. Adams left the officer to enjoy the benefit of the commission granted during the recess, until the end of the then current session of Congress, although his commission was rejected in the early part of that session. In the second, Mr. Madison, conforming to the opinion of the Senate as expressed in their vote of rejection, determined the Executive appointment by appointing a new officer in the room of the person so appointed.

In the first, the President forbore to exercise the power of removal, but left the Executive commission, granted during the recess, to expire by its own limitation. The Executive commission granted in the second case was determined by the exercise of that power.

Upon the whole, I am of opinion that the commission granted during the recess to Mr. Hill will continue until the end of the present session of Congress, unless it be sooner determined by his resignation or by the pleasure of the President.

JN. MACPHERSON BERRIEN.

The PRESIDENT OF THE UNITED STATES.

---

[From Decisions of the Comptroller of the Treasury, July, 1914, June, 1915, XXI, pp. 789–791]

COMPENSATION OF RECESS APPOINTEES TO OFFICE

Rejection by the Senate of the nomination to the office of United States attorney of a person who had received from the President a recess commission to fill up a vacancy in the said office does not ter-

minate the incumbency under the recess appointment, and the recess appointee is entitled to the salary of the office until his incumbency is terminated by the expiration of the Senate's session or otherwise.

DECISION BY COMPTROLLER DOWNEY, MAY 7, 1915

The Auditor for the State and Other Departments submits for approval, disapproval, or modification his decision of May 4, 1915, as follows:

"This office has before it for settlement a voucher in the account of H. L. Fassett, United States marshal for the western district of New York, for the quarter ended December 31, 1914, representing a payment made by the said marshal to John D. Lynn, United States attorney for the aforesaid district, for salary from December 3 to December 31, 1914, in the sum of $350.

"The facts in the case are: On December 1, 1914, the Senate not being in session, the President, under authority of the Constitution (Art. II, sec. 2, clause 3), appointed John D. Lynn to be United States attorney for the western district of New York, to fill a vacancy occurring during the recess of the Senate caused by the severance from the attorneyship of the prior incumbent. Mr. Lynn took the prescribed oath of office on December 2, 1914, and entered on duty on December 3, 1914, thereby and thereafter becoming the legal incumbent of the office and lawfully entitled to the compensation of the office under this appointment and until this appointment terminated according to law. The Senate convened on December 7, 1914. While the Senate was in session the President nominated Mr. Lynn to the aforesaid attorneyship (Constitution, Art. II, sec. 2, clause 2). On December 14, 1914, the said nomination of Mr. Lynn was rejected by the Senate.

"The question is, What effect did the rejection of the nomination of Mr. Lynn have upon his tenure of office under his recess appointment, and is he entitled to be allowed the full amount of his salary on this voucher or only from December 3 to December 14, 1914, the date of rejection?

"As far as within the knowledge of this office this question has not received judicial attention.

"The Constitution provides:

"'* * * and he (the President) shall nominate, and, by and with the advice and consent of the Senate, shall appoint ambassadors * * * and all other officers of the United States whose appointments are not herein otherwise provided for and which shall be established by law; * * *.' (Art. II, sec. 2, clause 2.)

"'The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions which shall expire at the end of their next session.' (Art. II, sec. 2, clause 3.)

"At the time the nomination was made Mr. Lynn was the legal incumbent of the attorneyship, and his commission was a valid and subsisting one; his tenure of office would continue until the close of the next session of the Senate unless terminated by the acceptance of a commission issued under an appointment with the advice and censent of the Senate. See United States v. Kirkpatrick (9 Wheat. 720).

"If the nomination by the President under clause 2, section 2, Article II of the Constitution had been made to the Senate of some other person for the aforesaid position and had been rejected by the Senate, it seems clear that such action of the Senate would not affect or disturb the commission, tenure, or compensation of Mr. Lynn under his appointment made according to the provisions of clause 3, Article II, section 2 of the Constitution, and that he [Mr. Lynn] would be in the same status as before the rejection of the other person.

"It therefore appears equally clear that the rejection by the Senate of Mr. Lynn's nomination to the full term of office did not terminate his temporary recess appointment, and that he was left in full legal possession of the attorneyship and entitled to the lawful compensation of the office under his recess appointment until the end of the session of the Senate on March 4, 1915.

"This conclusion is supported by the opinion of the Attorney General, as follows:

"'A commission issued by the President during a recess of the Senate continues until the end of the next session of Congress unless sooner determined by the President, even though the individual commissioned shall have been meanwhile nominated to the Senate and the nomination rejected.' (2 Op. 336, April 16, 1830.)

"The United States court for the aforesaid district appointed Mr. Lynn to perform the duties of the office of United States attorney on March 5, 1915, under the provisions of the act of June 24, 1898 (30 Stat. 487), upon the expiration on March 4, 1915, by constitutional limitation, of Mr. Lynn's temporary or recess appointment, and he has been since, and is now, continuously performing the duties of the attorneyship under this appointment.

"I am of the opinion, and so decide, that Mr. Lynn is entitled to the amount of $350 salary represented by the voucher, and that Marshal Fassett is entitled to receive credit for the payment."

This decision is approved.

The paragraph relating to the appointment given to Mr. Lynn by the court has no bearing on the question decided by the auditor. No ruling as to Mr. Lynn's right to compensation under the appointment has been submitted by the auditor, and the approval of his decision carries no inference as to the proper decision of the question of payment involved in the said appointment. The decision otherwise is limited to the facts of this case.

Mr. DILL. When I first began to consider this subject, I had in mind the introduction of some legislation that would prohibit any appointee of the President serving in office and drawing pay after the Senate had refused to confirm him, but an examination of these opinions convinces me that no legislation would be constitutional that attempted to do that; that that can be done only by a constitutional amendment. I therefore do not care to take any more time of the Senate.

Mr. PITTMAN. Mr. President, will the Senator yield?

Mr. DILL. I yield.

Mr. PITTMAN. I understand that the decisions and opinions the Senator is submitting deal with the right of the President to give a temporary appointment during a session of Congress to a former appointee who was not confirmed by the Senate.

Mr. DILL. It is a very peculiar situation. The President may make a recess appointment under the Constitution that will continue until the end of the next session of Congress. If he made it while Congress was in session, it would not continue beyond the refusal of the Senate to make confirmation. But, taking advantage of the holiday recess, the President gave Mr. Esch a new appointment, he having been appointed previous to the recess, and the Senate having failed to act upon his nomination. So, taking advantage of the recess, the President gave Mr. Esch a recess appointment. Under the provision of the Constitution referred to in these decisions, he is permitted to hold his office until the end of this session of Congress, even though the Senate refuses to confirm him.

Mr. PITTMAN. Outside of what might be the technical construction, has the Senator no opinion with regard to the propriety of the President of the United States deliberately attempting to keep some one in office through technicalities who has been rejected by the Senate of the United States?

Mr. DILL. I have an opinion, which I had not intended to express, not only of the President but of any appointee who would continue to serve even if the President asked him to after the Senate had refused to confirm him. It is in violation of the intent and spirit of the Constitution giving the Senate power to confirm appointees of the President. He who violates the spirit of the Constitution is not fit to enforce laws made under that Constitution.

Mr. PITTMAN. That is exactly the expression I wanted, because I have the same opinion.

Mr. DILL. As I said, I had intended to introduce legislation that would make such a thing impossible, but after an examination of these provisions of the Constitution I am satisfied that the only way this could be prevented in the future would be by amending the Constitution of the United States.

Mr. PITTMAN. Of course, there are measures that are still constitutional against the President of the United States if he has violated the Constitution.

Mr. DILL. I do not think he and his appointee have violated the Constitution. I think they have violated the spirit of it by defying the will and power of the Senate.

Mr. PITTMAN. The Senator thinks he has violated the spirit of it?

Mr. DILL. Yes.

Mr. PITTMAN. There are so many of those things heaping up it would make no difference to add a few more.

Mr. McKELLAR. Mr. President, I do not know whether the appropriation bill providing for the Interstate Commerce Commission has actually passed or not, but we could put an amendment on the appropriation bill providing that no part of the fund appropriated should be paid to an official under the circumstances mentioned by the Senator. If we should do that, Mr. Esch would have to serve without pay, and he would not serve long that way.

Mr. DILL. I think this appointee probably would continue to serve.

PETITIONS AND MEMORIALS

Mr. KENDRICK. I present a resolution adopted by Travis Snow Post, No. 5, of Sheridan, Wyo., in favor of the immigration bill known as the Box bill. I ask that the resolution may be printed in the RECORD and referred to the Committee on Immigration.

There being no objection, the resolution was ordered to be printed in the RECORD and referred to the Committee on Immigration, as follows:

Resolution

Whereas a bill has been introduced in the House of Representatives known as the Box bill, being H. R. 6465, the purport and intent of

which is to place immigration from countries therein designated on a quota basis such as is applied to other countries; and

Whereas the undersigned being residents of a territory which will be adversely affected by the passage of this bill from the viewpoint of the employer, the sugar and other industries employing Mexican labor; and

Whereas we have made a thorough study and given the matter and the consequences of the passage of the bill due consideration; and

Whereas from such study and consideration we have unanimously come to the conclusion that said bill should be passed for the following reasons, among others, viz:

A. Continued unrestricted immigration of people from the countries above referred to, prolific as they are, except perhaps the Dominion of Canada, will result in cheap labor, lowering the standards of living, will populate and people the western and southwestern portions of the United States with a class which is largely undesirable.

B. The inherent racial color and temperament of the people from Mexico and other southern countries of Indian extraction make it impossible to assimilate them as a part of the citizenry of this country or to transform them into citizens by amalgamation by our so-called melting pot; moreover, an intermarriage with these people will result in a mongrel race.

C. The people referred to as undesirable are of a low moral and intellectual make-up and continue to so remain wherever found.

D. The inevitable result of unrestricted immigration will create a condition and situation such as now exists in our Southern States; in that where the South has now a negro problem the West and Southwest will have its Mexican problem. It is apparent that the impelling motives of the beet industry, truck industry, and other industries seeking cheap labor are willing, as is evidenced by the opposition made to the passage of the bill, to barter away the heritage of our children and our children's children for a mess of pottage. Those testifying before the committee on immigration who opposed the passage of the Box bill, consciously or unconsciously, frankly admitted that their opposition was for mercenary motives only. The present high standards of living enjoyed by the laboring class in this country was obtained only by fighting for and receiving a reasonable wage.

E. That the indorsement previously made by the Lions Club of Torrington, Wyo., of which club one of the undersigned is president, did not express the sentiment of Torrington and community, and the vote of the question was passed by a bare majority of two votes, and those voting in favor of the resolution passed by the Lions Club were practically without exception directly or indirectly associated with the Holly Sugar Corporation, one of the great employers of the Mexican laborers in this country.

F. The further unrestricted immigration of Mexicans in particular should be vigorously opposed, since they live in slovenly settlements and under the most unsanitary conditions, having a tendency to vice and to spread disease and constitute the largest portion of our law violators even though they are but a small minority: Be it therefore

*Resolved*, That the Travis Snow Post, No. 5, of the American Legion, Department of Wyoming, unanimously go on record as indorsing wholeheartedly the proposed amendment to our immigration law known as the Box bill; be it further

*Resolved*, That a copy of this resolution be forwarded to the State department of the American Legion with the request that a copy of said resolution be forwarded to our Representatives in Congress, and that they be respectfully requested and urged to withdraw further opposition to said bill and that they work for its early passage.

Unanimously adopted this 15th day of March, A. D. 1928.

TRAVIS SNOW POST, NO. 5.
J. M. WENSHALL,
C. W. PERCY,
T. C. FITZGERALD,
*Resolutions Committee.*

Mr. JONES presented a petition numerously signed by sundry citizens of Seattle, Wash., praying for the passage of legislation providing for a 10 per cent pay differential for postal night workers, which was referred to the Committee on Post Offices and Post Roads.

He also presented a resolution adopted by Division No. 1, Ancient Order of Hibernians in America, of Pierce County, Wash., protesting against the passage of legislation creating a Federal Department of Education, which was referred to the Committee on Education and Labor.

He also presented a memorial of sundry citizens of Seattle, Wash., remonstrating against the adoption of the proposed naval building program, which was referred to the Committee on Naval Affairs.

Mr. BINGHAM presented resolutions adopted by employees of the New London Ship and Engine Co., the Electric Boat Co., and the Vanadian Metals Co., all of New London, Conn., protesting against the passage of legislation favoring ship or engine construction in Government plants, which were ordered to lie on the table.

He also presented a resolution adopted by the convention of the Connecticut State Dental Association, favoring the passage of Senate bill 3356, to provide for the coordination of the public-health activities of the Government, which was ordered to lie on the table.

He also presented resolutions adopted by the New England Tobacco Growers' Association, favoring the amendment of House bill 9195, to amend sections 2804 and 3402 of the Revised Statutes, by striking out the clause relating to the importation of cigars, which were referred to the Committee on Finance.

He also presented letters in the nature of petitions from Governor Jonathan Trumbull Chapter, of Lebanon, Ruth Hart Chapter and Susan Carrington Clarke Chapter, both of Meriden, all of the Daughters of the American Revolution, in the State of Connecticut, praying for the retention of the national-origins quota provision in the immigration law, which were referred to the Committee on Immigration.

He also presented letters and papers in the nature of petitions from the Bunker Hill Literary Club and Sunday Noon Club of the Second Congregational Church, both of Waterbury, and sundry citizens of Norwich, South Norwalk, Westport, and Weathersfield, all in the State of Connecticut, praying for the adoption of the so-called Gillett resolution, being the resolution (S. Res. 139) suggesting a further exchange of views relative to the World Court, which were referred to the Committee on Foreign Relations.

## REPORTS OF COMMITTEES

Mr. CARAWAY, from the Committee on Agriculture and Forestry, to which was referred the joint resolution (S. J. Res. 114) authorizing assessments by levee, drainage, and road districts upon unreserved public lands in the St. Francis levee district, State of Arkansas, reported it without amendment and submitted a report (No. 876) thereon.

He also, from the Committee on Claims, to which was referred the bill (H. R. 5981) for the relief of Clarence Cleghorn, reported it without amendment and submitted a report (No. 877) thereon.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (S. 363) for the relief of Louise M. Cambouri, reported it with amendments and submitted a report (No. 878) thereon.

He also, from the Committee on the District of Columbia, to which was referred the bill (S. 1749) providing for the development of hydroelectric energy at Great Falls for the benefit of the United States Government and the District of Columbia, reported it with an amendment and submitted a report (No. 879) thereon.

Mr. BAYARD, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 456) to carry out the findings of the Court of Claims in the case of Edward I. Gallagher, of New York, administrator of the estate of Charles Gallagher, deceased (Rept. No. 880); and

A bill (S. 1769) for the relief of the legal representative of the estate of Haller Nutt, deceased (Rept. No. 881).

Mr. TYDINGS, from the Committee on Naval Affairs, to which was referred the bill (S. 1633) for the relief of Edward A. Blair, reported it without amendment and submitted a report (No. 882) thereon.

Mr. WATERMAN, from the Committee on Patents, to which was referred the bill (H. R. 6104) to amend sections 57 and 61 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909, reported it with an amendment and submitted a report (No. 883) thereon.

## ENROLLED BILLS PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that this day that committee presented to the President of the United States the following enrolled bills:

S. 205. An act to authorize the Secretary of the Treasury to pay the claim of Mary Clerkin;

S. 463. An act for the relief of David J. Williams;

S. 484. An act for the relief of Joe W. Williams;

S. 802. An act for the relief of Frank Hanley;

S. 1377. An act for the relief of Lieut. Robert Stanley Robertson, jr., United States Navy;

S. 1428. An act for the relief of R. Bluestein;

S. 1848. An act for the relief of Frank Dixon;

S. 2008. An act for the relief of the parents of Wyman Henry Beckstead;

S. 2442. An act for the relief of Lieut. Henry C. Weber, Medical Corps, United States Navy;

S. 2926. An act for the relief of the Old Dominion Land Co.;

S. 3366. An act to authorize a per capita payment to the Shoshone and Arapahoe Indians of Wyoming from funds held in trust for them by the United States;

S. 3506. An act for the relief of the owners of the British steamship *Larchgrove;* and

S. 3507. An act for the relief of the Eagle Transport Co. (Ltd.) and the West of England Steamship Owners' Protection & Indemnity Association (Ltd.).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ASHURST:

A bill (S. 4198) to provide hospitalization for Leroy Wilbur Abbott; to the Committee on Military Affairs.

By Mr. WHEELER:

A bill (S. 4199) for the relief of certain Indians employed by General Nelson A. Miles in the campaign against Chief Joseph; to the Committee on Indian Affairs.

By Mr. McKELLAR:

A bill (S. 4200) granting an increase of pension to Capt. C. M. Park (with an accompanying paper); to the Committee on Pensions.

By Mr. DENEEN:

A bill (S. 4201) granting a pension to Rosalie Thomas Draper; to the Committee on Pensions.

By Mr. BLAINE:

A bill (S. 4202) to amend sections 21 and 24 of the act of October 15, 1914 (secs. 386 and 389 of title 28 of the Code of Laws of the United States of America), relating to trial by jury in cases of indirect criminal contempts; to the Committee on the Judiciary.

By Mr. HAWES:

A bill (S. 4203) authorizing J. H. Haley, his successors and assigns (or his heirs, legal representatives, and assigns) to construct, maintain, and operate a bridge across the Missouri River at or near a point where Olive Street Road, St. Louis County, Mo., if extended west would intersect the Missouri River; to the Committee on Commerce.

By Mr. REED of Missouri:

A bill (S. 4204) granting an increase of pension to Margaret Louise Maloy (with accompanying papers); to the Committee on Pensions.

FLOOD PROTECTION ON WHITE RIVER, ARK.

Mr. CARAWAY. Mr. President, the country is well acquainted with the deplorable situation that last year overtook the people living in the lower Mississippi Valley, and along the tributaries of the Mississippi, owing to an unprecedented flood. It exhausted the resources of all the improvement districts that had been created for the purpose of building levees along those streams.

In our State, levee and drainage districts are created under the law, and raise their resources by betterment taxes assessed against the lands included in the districts. In order to fight the flood and try to rebuild the levees last year, the people exhausted the last dollar of taxable wealth that was available to these various districts. In addition to losing many, many millions of dollars, and much of their land lying out because they could not repair the levees in time to place the lands in cultivation, they sustained other heavy losses.

The levees were just patched. It was obvious to everyone that they were not sufficiently strong to withstand another heavy rise.

The White River, one of the large tributaries of the Arkansas River, is at flood. It threatens to sweep away these temporary levees and overflow hundreds of thousands of acres of land on which crops have been planted, and in most instances are up and have been cultivated somewhat.

The Mississippi River Commission, whose jurisdiction extends up these streams for purposes of aiding in the maintaining of levees, is without any funds to aid in this approaching fight. I took up the question also with the War Department, and it has no available funds. Both the commission and the War Department have furnished engineers to the levee districts where the levees are threatened with destruction by this flood, but neither of those districts, as I said a minute ago, has any resources. They not only have no money, but they have no credit. They exhausted both in their fight last year. It is now too late, should their crops be destroyed, for the people to make a crop this year.

For these reasons I introduce a joint resolution asking that the War Department may be given $50,000 to help maintain the levees and protect these thousands of acres of land and the farmers down there from an overflow that is so threatening that the office of the Chief of Engineers, that if they had the resources, if they had the money, it was believed it would be possible to save the levees and prevent this disaster, but unless they may have the resources, and have them immediately, there is no chance to save these levees and protect these thousands of people against having what little they have left destroyed.

To-morrow I shall seek to have the joint resolution passed, so as to extend to these people the credit that will make it possible to save their homes.

The joint resolution (S. J. Res. 135) making an emergency appropriation for flood protection on White River, Ark., was read twice by its title and referred to the Committee on Appropriations.

TERMINATION OF HAITIAN TREATY

Mr. KING. Mr. President, I would not introduce the joint resolution which I am about to offer at this time except for the statement made by the chairman of the Committee on Foreign Relations a few moments ago, in which he indicated that a treaty exists between the United States and Haiti which, as I interpreted his remarks, obligates the United States to maintain marines or other military forces in Haiti.

In my opinion there is no treaty between the United States and Haiti. It is the opinion of some that the treaty which was negotiated in May, 1916, and which was forced upon Haiti by military arms, never had any validity, but that if it did have validity it no longer exists, having expired 10 years after its ratification.

There was an attempt to renew the treaty of May, 1916, by another treaty or convention. This so-called treaty was never submitted to or ratified by the Senate of the United States and, so far as I am advised, never was brought to the attention of the Senate by the State Department; nor was it ratified by any person or body authorized to speak for the Haitian people. The treaty negotiated in 1915 was to expire in 10 years. Within a few months after it was negotiated an attempt was made to extend its provisions for a further period of 10 years. There was no reason to prolong the life of the treaty, and no sufficient grounds were assigned for such attempt. An agreement was signed by Mr. Borno and Mr. Bailly-Blanchard which it is contended by the State Department is a treaty and prolongs the treaty of 1915 for an additional 10 years.

This latter so-called treaty reads as follows:

*1917*

ADDITIONAL ACT EXTENDING THE DURATION OF THE TREATY OF SEPTEMBER 16, 1915, WITH RESPECT TO THE FINANCES, ECONOMIC DEVELOPMENT, AND TRANQUILITY OF HAITI. SIGNED AT PORT-AU-PRINCE MARCH 28, 1917

(Treaty Series No. 623–A)

ARTICLES

1. Extends life of 1915 convention to 20 years.

2. Approval of parties.

The Republic of Haiti having recognized as urgent the necessity of a loan for a term of more than ten years destined for the amelioration of its financial and economic situation, considering from now this necessity as a specific reason susceptible of giving to the Convention of September 16, 1915, a duration of twenty years and desiring in consequence to exercise the right which it holds from Article XVI of this Convention;

And the United States of America, conforming itself to Article first of the said Convention and assuring its good offices for the full accomplishment of its aims and objects,

Have decided to conclude an additional act to this Convention, with a view to facilitating a prompt realization of the loan and to offer to the capitalists the serious guarantee which they claim of an uninterrupted stability indispensable to the development of the wealth of the Republic of Haiti;

And have been appointed as Plenipotentiaries.

By the President of the United States of America,

Mr. Arthur Bailly-Blanchard, Envoy Extraordinary and Minister Plenipotentiaries of the United States of America,

By the President of the Republic of Haiti,

Mr. Louis Borno, Secretary of State of Foreign Affairs and Public Worship,

Who having exhibited to each other their respective full powers found to be in good and true form, have agreed as follows:

Article 1. The two High Contracting Parties declare to admit the urgent necessity for a loan for a period of more than ten years for the benefit of the Republic of Haiti as one of the specific reasons indicated in Article XVI of the convention of September 16, 1915, and agree to fix at twenty years the life of the said Convention.

Article 2. The present act shall be approved by the High Contracting Parties in conformity with their respective established procedures and the approvals thereof shall be exchanged in the city of Port-au-Prince as soon as may be possible.

Signed and sealed in duplicate in the English and French language, at Port-au-Prince, Haiti, the 28th day of March, 1917.

[SEAL.] A. BAILLY-BLANCHARD.
[SEAL.] LOUIS BORNO.

Senators will observe that this agreement assigns as a reason for its attempt to extend the life of the treaty of 1915 that a loan was necessary to "ameliorate the finances and economic situation in Haiti and that the capitalists require the serious guaranty of an interrupted stability indispensible to the development of the wealth of the Republic of Haiti."

The question of military occupation by the United States or the necessity for the United States to assume a dictatorship over Haiti is not now raised. It is apparent that an effort was to be made to require Haiti to negotiate a foreign loan and that those from whom the money was to be obtained were asking or demanding that the United States retain its military control over Haiti for 20 years. Haiti did not need the intervention of the United States. She had for more than a hundred years maintained herself as an independent and sovereign State, and had discharged her obligations to foreign countries. After forcing the treaty of 1915 upon the Haitian people the United States proceeded to direct that a $40,000,000 bond issue be authorized. The total debts of Haiti, foreign and domestic, when the United States assumed military control, were less than $16,000,000. My recollection is that bonds have been sold under the direction of the United States to the extent of $26,000,000. Under the so-called treaty which expired, and under the so-called treaty signed by Borno and Bailly-Blanchard, the United States selected Dartiguenave as President, and thereafter Borno as his successor. Our marines acting under authority of the United States expelled the legislative bodies of Haiti's national legislature, and our Government has since then prevented the operation of the Haitian constitution or the election of members of the national legislature. The United States is in Haiti with marines and military forces. There is no justification in my opinion for the course which we are pursuing in Haiti and for the maintenance of American marines upon Haitian soil. There is no treaty calling for this course. However, because of the contention of the executive department of the Government, that there is a treaty which obligates the United States to control Haiti and her people, and to maintain military forces in Haiti for that purpose, I am submitting a joint resolution, although, as indicated, I do not concede the existence of such a treaty or that the United States is obligated in any way to govern Haiti or the Haitian people or to protect loans which may have been made by the Haitian Government before the United States forcibly took possession of Haiti, or which have been made since the United States has controlled the Haitian Government.

Mr. President, I ask that the following resolution be read at the desk and printed and that it lie on the table. In view of the statement made by the Senator from Idaho [Mr. BORAH] it will be pertinent in the discussion to-morrow to inquire as to what obligations rest upon the United States to govern Haiti and to keep marines upon Haitian soil.

The joint resolution (S. J. Res. 136) for the termination of the alleged treaty between the United States and Haiti was read the first time by its title, the second time at length, and ordered to lie on the table, as follows:

Whereas a treaty forced upon Haiti by the military forces of the United States was entered into between the United States and Haiti and was signed at Port au Prince on September 16, 1915, and ratifications were exchanged at Washington on May 3, 1916, and on the said same day said treaty was proclaimed; and

Whereas by its terms said treaty was to remain in full force for 10 years from the day of the exchange of ratifications, and also for another term of 10 years if for "specific reasons presented by either of the high contracting parties the purpose of the treaty has not been fully accomplished"; and

Whereas without any specific or other sufficient reason an attempt was made on the 28th day of March, 1917, to extend said treaty for a further period of 10 years, and Arthur Bailey-Blanchard and Louis Borno made an agreement which each signed and which attempted to fix the life of said treaty at 20 years; and

Whereas said agreement signed by said Bailey-Blanchard and said Borno was not presented to the Senate of the United States or ratified by it, or by the Haitian Government or any part thereof authorized to ratify treaties; and

Whereas said treaty, ratifications of which were exchanged on the said May 3, 1916, has expired, but it is claimed by the executive department of the United States that it is still in force; and

Whereas said treaty is no longer responsive in various respects to the political principles of the United States, or to the principles of justice and international comity which should govern the relations of the United States and Haiti and other countries; and

Whereas said treaty is not responsive to the political principles and commercial needs of Haiti and the Haitian people: Therefore be it

*Resolved, etc.*, That said treaty, if it has any validity, or exists for any purpose, or at all, together with all the terms thereof, is hereby terminated.

### AMENDMENT TO BOULDER DAM BILL

Mr. BRATTON. Mr. President, I ask leave to present a proposed amendment to Senate bill 728, being the so-called Boulder Dam bill, and ask that it may be printed, also published in the RECORD, and lie on the table.

There being no objection, the amendment was ordered to lie on the table, to be printed, and to be published in the RECORD, as follows:

On page 5, strike out all of lines 1 to 18, both inclusive, and insert in lieu thereof the following:

"SEC. 4. (a) This act shall not take effect and no authority shall be exercised hereunder unless and until (1) the States of California, Colorado, Nevada, New Mexico, Utah, Arizona, and Wyoming shall have ratified the Colorado River compact mentioned in section 12 hereof and the President, by public proclamation, shall have so declared, or (2) if after one year from the date of the passage of this act the said States shall fail to ratify the said compact; then if six States, including the State of California, shall ratify said compact and shall consent to waive the provisions of the first paragraph of Article II of said compact, which makes the same binding and obligatory only when approved by each of the seven States mentioned in said section 12, and shall have approved said compact without conditions, save that of such six States' approval and the President, by public proclamation, shall have so declared: *Provided, however*, That if ratification should be upon a six-State basis, then California shall agree in the ratifying act that the aggregate annual consumptive use in California of waters of the Colorado River shall never exceed 4,200,000 acre-feet and that the use by California of the excess or surplus waters unallocated by the Colorado River compact shall never exceed annually one-half of such excess or surplus waters, such use always to be subject to the terms of the Colorado River compact."

### INVESTIGATION OF NAVAL OIL LEASES

Mr. FLETCHER. Mr. President, I ask unanimous consent to have inserted in the RECORD two short editorials from the Philadelphia Record.

The PRESIDING OFFICER (Mr. BLEASE in the chair). Without objection, it is so ordered.

The matter referred to is here printed, as follows:

[From the Philadelphia Record of April 10, 1928]

#### MR. SINCLAIR AND HIS PATRIOTIC OIL BONDS

A lawyer for the defense in a criminal case is expected—it may even be said that he is obligated—to give to his client's acts the most favorable interpretation possible. Neither professional ethics nor public policy forbids his attributing to the defendant irrelevant virtues and associating indictable actions with the most altruistic motives.

But in his opening address to the jury the other day one of Sinclair's attorneys indulged in an oratorical flourish which must have put a serious strain upon the solemnity of the court. Everyone in the audience, from the judge to the tipstaff at the door, was perfectly acquainted with the unsavory history of the Liberty bonds purchased by the fake Continental Oil Co. and divided among the participants in that odious deal, and with the fact that from his share Sinclair sent $233,000 to Fall, from whom he received the fraudulent Teapot Dome lease.

Naturally the lawyer emphasized the defense plea that this was a payment for a one-third share in Fall's ranch. But he was not satisfied with exhibiting the transaction as a lily of business legitimacy; he undertook to gild it as an incident of public service. "Yes," he said impressively, "Mr. Sinclair had Liberty bonds; he had invested large amounts in Liberty bonds, as every patriotic man at that time had done."

This closes the contest, we think, for the most precious bit of Pecksniffery to be uttered during the calendar year 1928.

---

[From the Philadelphia Record of April 23, 1928]

#### TWO OTHER VERDICTS ON THE FALL-SINCLAIR DEAL

From the beginning of the oil-lease scandal there have been in process two trials—first, of the participants in a corrupt conspiracy, and second, of the system of law created to prevent and punish such offenses. Fall and Doheny, and now Sinclair, have been acquitted; and thereby the administration of criminal justice has been convicted of inefficiency, of inadequacy, of impotence to deal with flagrant wrongdoing.

Ordinarily a verdict such as that just rendered would forbid so disheartening a conclusion. The finding of the jurors would have to be accepted as a defensible, though totally unconvincing, interpretation of the evidence. But fortunately there have been irrefutable judgments of an exactly contrary nature upon the same facts. The public which cynically notes the freeing of Sinclair is perfectly aware that the very

acts condoned by the jury have been unhesitatingly condemned by the highest tribunals.

Of the Teapot Dome lease secretly given by Fall to Sinclair and of the payment of $233,000 to the Cabinet officer by the oil man, the Federal Circuit Court of Appeals at St. Louis unanimously declared:

"If a Government official engaged in making contracts for the Government receives pecuniary favors from one with whom such contracts are made, a fraud is committed on the Government. The entire transaction is tainted with favoritism, collusion, and corruption. A trail of deceit, falsehood, subterfuge, bad faith, and corruption runs through the transactions surrounding this lease. The lease and contract were produced by fraud and corruption, and they should be canceled."

This sweeping decree was contested before the Supreme Court of the United States. But, uncompromisingly and unanimously, that tribunal branded Fall's procedure as that of "a faithless public official," the culmination of a conspiracy with Sinclair "to circumvent the law and defeat public policy," and ruled that "the leases and agreement were made fraudulently, by means of collusion and conspiracy between them."

These judgments were so manifestly sound and authoritative that under them restitution of the diverted property was enforced. They are not erased and will not be forgotten because the eccentricities of the law forbade their presentation to the jury and thus enabled that body to perceive innocence where the courts had found unanswerable evidences of criminality.

## AFFAIRS IN NICARAGUA

Mr. EDGE. Mr. President, yesterday the question was asked several times whether Sandino was operating at the present time and whether any Americans had been under attack or their property occupied or confiscated.

I ask unanimous consent to have printed in the RECORD an article from this morning's New York Herald-Tribune, which states that according to information received in the last few days seven prisoners, among who were Americans, have been taken recently by Sandino.

The PRESIDING OFFICER (Mr. BLEASE in the chair). Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is here printed, as follows:

THREE AMERICAN MINES SEIZED BY SANDINO—BANDIT REAPPEARS IN PISPIS RIVER DISTRICT TO CAPTURE GOLD WORKINGS EN ROUTE TO NORTHEAST COAST—NEW YORKER AMONG SEVEN PRISONERS TAKEN—EDEN, BONANZA, AND LA LUZ MINES, LATTER WORTH MILLIONS, IN CONTROL OF REBELS

By Charles Eyton-Jones

(By cable to the Herald Tribune. Copyright, 1928, New York Tribune, Inc.)

MANAGUA, NICARAGUA, April 23.—Gen. Augustino Sandino has reappeared in the Pispis River mining district about 75 miles northeast of Puerto Cabezas, and has taken possession of the Eden mine of the Tonopah interests, of Philadelphia, and the Bonanza mine, also belonging to American interests, according to confirmed reports reaching Managua from Puerto Cabezas. Another mine, the La Luz y Los Angeles, situated to the south and owned by Americans, also is mentioned in the dispatches, but it is not clear whether the rebel leader captured that also.

Sandino had not been heard from for several weeks, although the marines had searched the northern district of Esteli, Ocotal, Jinotega, and Matagalpa with infantry and airplane patrols. The situation is serious, considering the proximity of the rainy season, which would make it impossible to transfer American forces from their present positions to the new zone of operations.

Gen. Frank McCoy, commander of the United States marines, and Dana G. Munro, first secretary of the American Legation, have postponed their trip to Rivas San Juan del Sur because of the news received to-day.

### BELIEVED HEADING FOR COAST

MANAGUA, NICARAGUA, April 23.—Marine brigade headquarters tonight were convinced that Augustino Sandino with the remnant of his followers is heading for the Atlantic coast of Nicaragua. They took this attitude when a radiogram came from W. J. Crampton, collector of customs at Puerto Cabezas, also known as Brangmans Bluff, on the northeast coast of the country. The message said that two mines near the headwaters of the Pispis River were robbed by rebels a few days ago.

Mr. Crampton also stated that two Americans employed at the mines have been taken prisoner, according to unconfirmed rumors that had reached him.

The district around the Pispis River is north of the rich La Luz y Los Angeles mine, which was reported raided in advices received at New York via wireless to New Orleans. Sandino would find this mining property on his direct line of march if he has taken an overland route from the mountainous jungle in which he is believed to have been hiding hitherto.

### TURNS FORCES TOWARD RIVER

The Marine authorities, however, are inclined to believe rather that Sandino headed through the Pispis district with the idea of reaching the headwaters of the Waspuc River. This good-sized stream flows northeastward and joins the River Coco 150 miles inland from the mouth of the latter stream at Cape Gracias, on the northeast coast.

There are numerous mines in that region; but while their gold deposits are known to be rich, the ore is low grade, and the cost of working them has caused all except a few to be shut down. The Eden mine of the Tonopah Mining Co. is in that category.

Other well-known mines about the headwaters of the Pispis are the Bonanza, the Lone Star, the Constancia, and the Concardia. All of these are believed to be American owned.

### MINE COMPANY TELLS OF RAID

Augustino Sandino's insurrectionary forces raided an American-owned gold mine in the district of Prinzapolca, Nicaragua, on April 12, capturing three Americans, a British mine superintendent, and a Norwegian, together with supplies worth more than $25,000, it was announced here yesterday by J. Gilmore Fletcher, president of the La Luz & Los Angeles Mining Co., 511 Fifth Avenue, which owns the property.

The Americans captured were George B. Marshall, 48 years old, assistant superintendent of the mine, only son of Mrs. H. M. Marshall, of 442 East One hundred and thirty-sixth Street, a teacher in public school 91, Manhattan; L. B. Milbery, of Woodsville, N. H.; and Roy Burley, whose home was not known by Mr. Fletcher.

### TAKE 100 NICARAGUANS

The other prisoners are Harry J. Amphlett, superintendent, a British subject, whose last known address in the United States was 1702 St. Paul Street, Baltimore, and Peder Peterson, 58 years old, a Norwegian, who has a sister, Mrs. Elsie Bensen, living at 440 Ninth Street, Brooklyn. One hundred Nicaraguans employed at the mine also are understood to have been held by Sandino.

The first report of the raid reached Mr. Fletcher, who is a brother of Henry P. Fletcher, ambassador to Rome, on Saturday, April 21. He said the message was probably sent out by courier at the time of the attack, carried six days through the wilderness to Puerto Cabezas, and radioed from there to the United States by an agent of the Standard Fruit & Steamship Co., named Martin. It read:

"On 12th Sandino raided La Luz (name of the mine), taking all gold, money, merchandise, and animals. Also Marshall and all employees prisoners."

### CALLS ON STATE DEPARTMENT

Mr. Fletcher immediately communicated with the State Department, asking that marines be sent to rescue the prisoners, if possible, but withheld the news from the public until the receipt of a confirmatory telegram yesterday from the Bluefield Mercantile Co., Bluefields. The telegram read in part:

"April 7, forces of Sandino have taken possession of mine. Have taken prisoner Amphlett."

This last message was taken by Mr. Fletcher to indicate that Sandino had returned to the mine following the raid on April 12 and was forcing the superintendent and his American assistants to operate the property, which he said produces about $30,000 worth of gold monthly.

### ESTIMATED LOSS AT $100,000

"From the meager information I have," Mr. Fletcher said, "the losses from looting of movable property will run anywhere from $25,000 to $100,000. There was $10,000 worth of food in the commissary, 75 head of oxen used for taking in supplies and sending out gold bullion, the bullion on hand, a pay roll of $5,000, dynamite, and other stores. Even under ideal conditions it will take three months to put the mine in operation again."

Mr. Fletcher declared that if the steel-pipe line, recently installed at a cost of $150,000, and the mill plant were destroyed the company's loss would run from $3,000,000 to $10,000,000 and the owners would face ruin. The mine is owned by three Fletcher brothers—J. Gilmore, G. Frederick, and D. Watson Fletcher—and a brother-in-law Joseph Riter.

### NO TROUBLE WAS EXPECTED

That the raid was entirely unexpected only added to the bitterness with which the owners received the news of damage to the mine, into which they have put their capital for the last 10 years. La Luz and the Prinzapolica district are far in the northeast of the zone in which Sandino has heretofore confined his operations. Not the slightest preparation for defense has been made at the mine, Mr. Fletcher said, and no trouble was anticipated.

"We are not in politics down there," he continued, "and we have nothing to do with Wall Street. I don't know what I'll do if anything happens to our men. They are a lot of fine fellows. I guess that's what comes of investing one's money in foreign countries."

Mr. Fletcher scouted reports that the men were kidnapped for ransom. "They were captured," he said, "and the raid was apparently in reprisal for the activities of the marines. I don't anticipate that they will be harmed. There's nothing to gain by that."

IN COUNTRY MANY YEARS

All the foreigners reported captured had passed many years in Central America and speak Spanish fluently. Marshall, who was graduated as a mining engineer at the University of Michigan in 1907, passed 12 years in Costa Rica, where his wife is now. He started work at the mine on December 1 last on a two-year contract, after having visited with his mother here from June to November.

Mrs. Marshall said she received a letter from him two weeks ago, in which he reported everything quiet, and said he received more news of what was happening in Nicaragua from the American papers which reached him than from local sources.

Peterson has passed 38 years in Nicaragua, over 20 of them at the mine, Mrs. Benson said. He has a Spanish wife and two or three children with him at the time of the raid, she believed. He came to this country from Norway at 18, took out his first citizenship papers, and left for Nicaragua before becoming naturalized.

PETERSON HERE SIX YEARS AGO

Mrs. Bensen recalled that when her brother visited her in New York six years ago he remarked that "they were always fighting down there." He was used to it, Mrs. Bensen said, and she did not believe that he would come to any harm. She heard from him last month, his letter stating that he had just returned from a prospecting trip in the mountains and had a touch of fever.

Burley, who is about 45 years old, has been prospecting and working at the mine alternately for nearly 10 years, Mr. Fletcher said. Milbery has a wife at Woodsville, N. H. He is about 60 years old. Amphlett's brother, J. Roy Amphlett, of 3418 Guilford Terrace, Baltimore, Md., is chief assayer of the Baltimore Copper Co.

SENATORS WALSH AND WHEELER, OF MONTANA

Mr. BRATTON. Mr. President, there was recently published in the Butte Miner, a newspaper of Montana, a letter from Mr. Ralph E. Williams, of Philipsburg, Mont., to Mr. Charles R. Leonard, of Butte, Mont., in which the Nicaraguan situation and many other subjects are discussed. I ask that the letter may be inserted in the RECORD.

There being no objection, the letter was ordered to be inserted in the RECORD, as follows:

[From the Butte (Mont.) Miner, Sunday, April 15, 1928]

THE LEONARD LETTER

PHILIPSBURG, MONT., *March 26, 1928.*

CHARLES R. LEONARD, *Butte, Mont.*

DEAR SIR: I have read with considerable interest your letter addressed to the editor of the Butte Miner, which letter was published in full in yesterday's issue of said paper; and may I say, without being considered presumptuous, that it is my opinion that former Governor Lowden is fortunate in having such an able champion in this State.

However, it was not with the purpose in mind of discussing the former governor's candidacy or qualifications that I decided to write to you; but rather to direct your attention to certain statements contained in your letter which, to my mind, are open to question.

May I say, before proceeding to the consideration of your statements, that I am not in any way attempting to take issue with you? Indeed, such a thing is furthest from my mind. I am not equipped mentally or otherwise to join issue with you on a discussion of political questions, but what I am going to set forth in this communication is the result of reflection by the writer on certain statements contained in your letter.

You made the assertion in your letter that the Republican Party is the "party of protection," and you also ask the question as to whether such party should also be protectionists for farmers of the West as well as for the manufacturing interests of the East.

USUAL PROTECTION URGED

In answer to your question, I will say that, to my mind, the farmer should receive an amount of protection equal to that which is given the manufacturer; but I do not particularly like the inference which arises as a result of reading your statement that the Republican Party is the party of protection. To my mind this savors of an effort to create the impression in the reader's mind that the Democratic Party are advocates of free trade and no protection. If such be the case, it is then a misleading statement or my conclusions are incorrect.

It is my information that both major political parties, formerly as far apart as the two poles on the matter of the tariff, do not harbor such a vast difference of opinion as was formerly the case. I believe I am making a true statement when I say that the only difference of opinion between the legislative Members of both parties is as to what lines and industries should be protected by a high tariff and what lines and industries have become so well established that they do not now require such high protection which, ultimately, is paid by the American consuming public. In other words, the difference of opinion, to my mind, seems to be only an equitable adjustment of the present tariff schedules, resulting in the raising of some and the lowering of others. It is my belief that the Democrats, as a party, favor protection of all industries in this country which are in need of such protection; but that they do not believe the American people should be called upon to assist certain interests to increase their already superabundant profits when such concerns are able, financially and otherwise, to compete with foreign manufacturers of like commodities.

FARM RELIEF

As to farm relief, I will ask you who it is that opposes the most strenuously all efforts to obtain legislative relief for the farmer? Is it not those Members of our lawmaking body who come from the great industrial centers of the country? Are they not adherents to the Republican political faith? Do not a considerable number of the Democratic Members of Congress represent agricultural districts? Have they not most consistently during the past four years supported farm relief legislation? If the answer to this last question is yes, then I ask you: Is it not the policy of the Democratic Members of Congress to advocate and work for an equal degree of protection for all industries in need of such protection? Does not the record of the Republican Party reveal them as being advocates for protection of a "favored few"?

The main difference of opinion, as I see it, between the two parties is not that of "protection," but rather it is that of determining to whom and to what industries such protection is due.

Then I direct your attention to your statements in which you urge the election of Republican representatives to Congress from Montana, in lieu of two Democratic Members who are there at present and who, presumably, will again be candidates to succeed themselves. You state that we need Members who will concern themselves more with the needs of this State, rather than Members who are devoting considerable time to international affairs at the expense of our State's best interests.

In discussing this matter I wish to state that I am writing to you in the hope that you will, for the moment, forget your political affiliation, and that you will consider this as a citizen and not as a member of the Republican Party. Let us put aside all partisan feeling and consider your statements solely as citizens. Let us consider this question with the view in mind of learning, if we may, what is best for the country.

TO DEFENSE OF WHEELER

There is no doubt in my mind but what your statement, in part, is directed against the activities of the Hon. B. K. WHEELER, one of our Senators from this State. So far as I know Mr. WHEELER has not neglected the interests of the Nation generally. An indefatigable worker on the committee of the United States Senate which conducted the investigation into the manner of conducting the business of the Attorney General's office, he has rendered service to this State and to our Nation, for which we are unable to justly and commensurately compensate him. Balked and hindered at every turn by not only the Attorney General, Harry M. Daugherty, but also by the Department of Justice—which department is supposed to be charged with the prevention of crime and the securing of evidence of the commission of crimes—Mr. WHEELER doggedly, and with great perseverance, kept on with his task until, ultimately, he revealed a state of affairs in high governmental circles which showed that influential men of the Nation, as well as Cabinet Officers, were engaged in the task of corrupting, debauching, and despoiling our Government for the purpose of self-enrichment.

I make these statements after having read a printed transcript of the testimony adduced during the hearing which I mentioned in the foregoing paragraph. I base these statements not upon newspaper reports but upon the testimony I just referred to.

You may say that Senator WHEELER is not solely responsible for the revelations which have been made; but I direct your attention to this fact: Senator WHEELER was the principal prosecutor (if that be the correct term to use), and was the person upon whom, more than upon any other single member of the committee, the duty devolved of obtaining witnesses and running down clues. It is principally due to his untiring efforts that such exposé was made. Should he not be commended and compensated so far as it is possible for us to do so?

PRAISE GIVEN SENATOR

Should we lend our active aid to those who were instrumental in the attempt to corrupt the debauch our Government by failing to recognize the inestimable value of the services rendered by Senator WHEELER and by failing to return him to the United States Senate, should he desire to be so returned?

Would it not give Harry M. Daugherty et al. considerable satisfaction to know that the electors of the State of Montana failed to indorse the good work done by Senator WHEELER by refusing to return him to the office he now occupies?

It is my belief that the very principles of good government were undermined, and for a time threatened, by those in power; and that we should do everything in our power to assist in returning to office those persons who so diligently labored to expose the rottenness which existed in governmental circles. To do this would, to my mind, be serving notice upon all persons having ulterior motives and designs that the American people are awake to their responsibilities and that grafters and corrupters had better beware.

Now, as to the inference that our estimable Senator has unduly concerned himself with international affairs to the prejudice of our State. In this connection, I would like very much to ask you in what way Montana's interests have been neglected. I have no information which leads me to believe that Montana has been in any way injured or slighted by our present representatives in Congress. But let us assume for a moment that it is so. Then I ask you: Is it a matter of no concern to the citizens of Montana that foreign affairs are, indeed, demanding, in the name of constitutional law and justice, the attention of Congress?

NICARAGUA REFERRED TO

Is it a matter of no moment to the people of the State of Montana that the "strong, silent man in the White House" is at present engaged in conducting a war in Nicaragua in direct contravention to the Constitution of the United States, which provides: "Congress shall have the power to declare war, * * *?

Is the present White House incumbent not now busily engaged in carrying on aggressive warfare in Nicaragua without war having been declared by Congress? Daily press dispatches reveal to us that our marines are engaged in actively seeking Sandino and his warriors, and not that they (the marines) are engaged solely in protecting property.

Do you not recall a news dispatch appearing in local papers recently to the effect that the main legislative body in Nicaragua had failed to pass, by a considerable majority, a resolution requesting the supervision of the national election by the United States marines?

Do you not also recall that, subsequently, a news dispatch was printed stating that President Diaz had, by proclamation, called upon the United States marines to supervise the election to be held in that country?

Is not the inference and conclusion we draw from such dispatches this, viz: That the President of Nicaragua, like our own President, refuses to abide by the provisions and the mandates of their constitution; but, instead, in the interests of a favored few, he violates every principle of democracy by issuing a proclamation which is in direct contravention to the wishes of his constituents and, as a means of coercion, uses the presence of our marines to enforce such proclamation?

Judging from this distance I would say that Mussolini has nothing on Diaz in regard to bringing people to accept his decrees; but the anomalous part of it all is that the United States, supposed to be the most humanitarian of all nations—and engaged in aiding the oppressed—is an accessory, by the act of its President, in the perpetration of such outrages.

COULD USE MARINES IN AMERICA

Why does not President Coolidge request Congress to authorize him to use the marines in Nicaragua? Is it not because he is well aware that such authorization would not be granted? Therefore he takes it upon himself to do what he knows Congress would not do; and because of his prestige and political power, he "gets away with it."

We hear quite a lot of "buncombe" from the "standpatters" of the principles of the Monroe doctrine being involved in this Nicaragua matter. Is it a violation of the Monroe doctrine to permit people in foreign countries to rule themselves in accordance with their own views; or should we send the marines down there to show them how they should establish and operate their Government? It might be pertinent to remark at this time that we could use the marines to a good advantage here in our own country during some of our elections.

Another excuse offered by supporters of the administration is that we are "protecting American interests" in Nicaragua. Undoubtedly we are; but, I ask you, is it the interests of the American people in general or just those of a chosen few? Are the lives of the young men of this country less to be considered than the dollars of a few persons who already have more than enough to do them for their natural lives?

But these latter questions are entirely beside the matter now under discussion. The thing mainly to be considered at this time is the fact that our President, head of the greatest and most liberal—politically—democracy, is now usurping to himself powers which, by the fundamental law of the Nation, have been delegated to Congress.

Should our representatives sit supinely by and raise no voice in protest of this flagrant violation of our Constitution? How can the rank and file of the country be asked to obey the mandates of the Constitution and abide by its provisions when the chief law-enforcement officer of the Nation, openly and with impunity, violates it?

REGRETTABLE THING

It seems to me a regrettable thing indeed that there seems to be only two classes of persons in this country in the minds of a considerable number of our citizens, viz, conservatives and radicals. It seems to have reached the point where if a person speaks what he deems to be the truth about any matter of importance—and in so doing he tramps upon the toes of influential persons as a "radical." In fact, as a result of influence exerted in the proper places, through the press and otherwise, it seems that we are headed toward the giving up of our right to freely express ourselves on matters of public concern in order that we may keep ourselves "in right" with the powers that be.

But to get back to the original question, viz: Whether this Nicaragua matter is one which concerns the people of Montana.

We know it to be a well-established fact that all conflagrations from little fires grow. Who knows but what the guerilla warfare being conducted in Nicaragua to-day will be the fire which, in turn, will start the conflagration? In this connection let me remind you that the recent World War was originally started by two nations of minor importance from the viewpoint of world affairs.

Would you care to have your son called upon to take up arms in the service of his country when such a contingency could be avoided by demanding that the President of the United States abide by the provisions of the Constitution, the document which he has sworn to uphold and defend?

This, then, is why I am of the opinion that international affairs are of particular moment to the people of the State of Montana. Conditions have changed to such an extent since the inception of this country as a nation that we are now more or less concerned with what takes place in foreign affairs; especially is this so when matters concerning the United States are involved.

Therefore when our representatives endeavor to right wrongs or to denounce them it would seem to me that they are acting for the best interests of all of us and that we should not permit our partisan feeling to influence us in the selecting of our representatives.

MONTANA ABLY REPRESENTED

Senator WALSH and Senator WHEELER have labored arduously and diligently in the interests of the Nation as a whole, and I state with all sincerity that it is my opinion that Montana has never been so ably represented in Congress as it is at the present time. In spite of the innumerable obstacles placed in their paths, in spite of the efforts made by the crooks and debauchers in high governmental circles and influential places to besmirch the reputations of our representatives, they pressed onward with their tasks.

That they were successful can not be controverted at this time; and, to my mind, partisanship should be forgotten should they aspire to any further political office. It seems to be only fitting and proper that we should do everything in our power to see that these men are afforded the opportunity of continuing the good work which they have commenced; and that we should demonstrate to all the world our pride in their achievements by electing them to any office to which they aspire and for which they are qualified.

In the past the slogan seems to have been: "My party; right or wrong, my party." I submit that such a slogan is not in keeping with the principles of good government. History has shown us that persons seeking to enrich themselves at the expense of the Government have never been respecters of politics. Republicans and Democrats all look alike to them; the only matter of concern to them being the control of those in power. They will donate as quickly to one party as to another if they think they can advance their interests by so doing.

Therefore, in order to successfully cope with this unpatriotic and un-American element we should adopt similar tactics. If we have a man aspiring to an office who has rendered faithful service to the Nation we should forget our "politics" temporarily and return him to office as citizens and not as Republicans or Democrats. By doing this we will be encouraging our representatives to do further and better work; we shall be showing them that we appreciate their efforts and that they have not labored in vain. Indeed, we shall be doing as all successful operations and business concerns of the country are doing, viz: Rewarding merit by promotion or by continued employment.

Would it not only be fitting and proper for the people of the State of Montana to openly and unqualifiedly indorse the candidacy of Senator WALSH for the presidency, in view of his distinguished service rendered in the past, such indorsement to be made by Republicans and Democrats alike?

Would it not only be fitting and proper that the Republicans and Democrats of the State of Montana show proper appreciation for services rendered, by requesting Senator WHEELER to run as a candidate to succeed himself in the United States Senate, and to reward such service by having his candidacy unopposed by a member of either political party?

Such an indorsement and recognition of services rendered would, to my mind, be serving notice upon the people of this country that Montanans are deeply appreciative of the fact that their Senators have rendered signal service to the Nation as a whole. It would also tend to show that when matters of good government are involved, partisan feelings are submerged and that Montana citizens wholeheartedly and unqualifiedly indorse the good work of their representatives. It would mean an added incentive to all others who later aspire to similar positions to do all in their power to assist in the proper operation of our Government and to the proper protection of its interests.

In closing, permit me to say again that it is not my purpose to take issue with what you said in your letter; but, instead, I am simply setting forth some thoughts that came to the mind of the writer after reading your published letter. If I am in error in my conclusions I shall appreciate having that fact pointed out to me.

It seems to me that we should reward good and faithful service so far as it is within our power to do so. To do this might mean that

some of us would have to vote for candidates who are members of the political party opposed to ours; but in doing so we would be voting the "man" instead of the "party," and I respectfully submit that once such a practice is established we shall have a far better class of public servants than is now the average case. Corporations reward faithful and meritorious service, so why should not the American people do likewise?

Trusting that I have not bored you with this long communication, I am,

RALPH E. WILLIAMS.

PHILIPSBURG, MONT.

NATIONAL INSTITUTE OF HEALTH

Mr. RANSDELL. Mr. President, I desire to make an announcement. There will be a very interesting meeting of the subcommittee of the Senate Committee on Commerce at 2 o'clock this afternoon, at which some pictures will be exhibited which have been loaned by the Rockefeller Institute by my request to be used in connection with the hearings on my bill (S. 3391) to create a national institute of health. They are a combination of the high-power microscope with the motion-picture machine. These pictures show the life growth of the unit cell, disease-producing bacteria and their fights with each other, cell destruction in diseases, such as cancer, and illustrations of hookworms, live nerves, flow of the blood through the veins, and so forth.

This hearing is on the bill to create and establish a national institute of health. Hearings are now being held by the committee, and if any of the Senators can come up to the committee room at 2 o'clock I think they will be very much interested and instructed by these perfectly marvelous pictures which were prepared under Dr. Alexis Carrell, of the Rockefeller Institute.

FARM RELIEF—GEORGE N. PEEK

Mr. NORBECK. Mr. President, I have a letter from George N. Peek relating to the controversy about which we have heard considerable in the past. I ask that it may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD.

NORTH CENTRAL STATES AGRICULTURAL CONFERENCE,
EXECUTIVE COMMITTEE OF TWENTY-TWO,
*Washington, D. C., April 21, 1928.*

Hon. PETER NORBECK,
*United States Senate, Washington, D. C.*

DEAR SENATOR NORBECK: I have read in the CONGRESSIONAL RECORD this morning the address in the Senate yesterday of Senator SACKETT, of Kentucky. Senator SACKETT refers to my statement, which you placed in the CONGRESSIONAL RECORD on April 5. I refer to the concluding paragraph in that statement:

"If Mr. Hoover takes exception to my statements or attempts to refute them, I invite him to join with me now in a request to Congress to make such an investigation as I suggested in 1925, broadening it to include an investigation of statements herein contained. From the report of such an investigation the public can form an accurate opinion as to 'his record as a friend of the American farmer,' and the wisdom of his 'long-view' policies."

I now repeat that invitation.

Senator SACKETT refers to the activities in 1919 of the industrial board of the Department of Commerce, of which I was chairman.

A pamphlet, History of the Industrial Board, which sets forth the record of the activities of that board is in the Congressional Library. This pamphlet is the historical refutation of many of the charges in connection with the industrial board, which Senator SACKETT makes, including his reference to the statement of the then Secretary of the Treasury, Mr. GLASS.

Senator SACKETT says it was the after-armistice difficulties with Mr. Hoover that won my enmity toward him. This is not an accurate statement. It was Mr. Hoover's attempt in 1924 and 1925 to ride over the dead body of Secretary Wallace and his continued opposition to the plan of farm leaders, although barren of constructive proposals himself that finally convinced me of his unscrupulous character, although I had misgivings about him before.

Senator SACKETT says, "Mr. Hoover has been Secretary of Commerce not Secretary of Agriculture." I assert that Mr. Hoover influenced the appointment of Secretary Jardine, and as a condition precedent to Mr. Jardine's appointment it was understood that Dr. H. C. Taylor, Chief of the Bureau of Agricultural Economics, and Charles J. Brand, consulting specialist in marketing, who with Secretary Wallace had favored the McNary-Haugen bill, should be removed from the department. This program was followed and these gentlemen were forced out of the department shortly after the appointment of Secretary Jardine and the adjournment of Congress in the spring of 1925, and Mr. Hoover directly and indirectly has continued to influence the activities of the Department of Agriculture.

If Mr. Hoover will join with me in the request referred to for a congressional committee to investigate the accuracy of the charges against him, the public can form an intelligent opinion from the report of such an investigation of "his record as a friend of the American farmer" and "the wisdom of his long-view policies." Such an opinion can not be secured by the hurling of adjectives and epithets between the parties to the controversy. The public wants the truth.

Sincerely yours,

GEORGE N. PEEK.

THE PROHIBITION QUESTION

Mr. BRUCE. Mr. President, ever since I have been a member of this body I have from year to year presented to it police statistics showing that during the preceding 12 months there had been an increase in arrests for drunkenness. I have done that first of all because Washington in that respect is but typical of the other great cities of the country, as is demonstrated by the reports for some years past of the Moderation League, which evidences the fact that every year there is an increase in arrests for drunkenness, not only in the city of Washington, but in upwards of 500 American cities and towns. The last report of the Moderation League was published only two or three months ago.

I have had another reason for bringing to the attention of this body those police statistics. Here in the Capital of the Nation where Congress sits, where the supreme judicial tribunal of the land sits, where the President resides in the great White House whose whiteness has never been sullied in the history of the American people except during the administration of President Harding, here, if anywhere, surely prohibition should be enforceable. If it is not enforceable here where, as I have said, all the insignia of the Federal authority are found, and where the Anti-Saloon League maintains its legislative lobby, and the Methodist Board of Temperance and Morals its headquarters, where can it be enforced?

Mr. TYDINGS. Mr. President, will my colleague yield for just a brief observation?

The PRESIDING OFFICER (Mr. BLEASE in the chair). Does the senior Senator from Maryland yield to his colleague?

Mr. BRUCE. Certainly.

Mr. TYDINGS. I would like to remind the Senator that when the Army and Navy football game was played in Baltimore three or four years ago it was estimated that there were 82,000 people present. When the game was over, by actual count more than 1,000 half-pint liquor flasks were picked up in the stadium. That would be one for every 82 people, to say nothing of the silver flasks which evidently were carried on the person both to and from the game.

In line with the Senator's remarks, the people who attended that game were Members of Congress, of the Army and the Navy, and State and governmental officials from all over the land. Notwithstanding that type of citizenship, 1 out of every 82 persons had a liquor flask that was left on the ground in the stadium after the game.

Mr. HEFLIN. That shows that the law can be enforced.

Mr. BRUCE. That shows that it can not be enforced.

Mr. TYDINGS. It shows that the people came from every State in the Union, were representative of the citizenship of the country, and that apparently the prohibition law is not enforced in any State.

Mr. BRUCE. I called attention the other day to the last official report of the governor's constabulary in the State of South Carolina, which states that during the year covered by the report 1 still had been broken up by that force for every 2,400 inhabitants of the State. And it should be borne in mind that the report does not include stills broken up by the prohibition unit or the county police of South Carolina. Of course, conditions in South Carolina do not differ from conditions that prevail elsewhere in the United States.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Idaho?

Mr. BRUCE. Certainly.

Mr. BORAH. I take it the Senator thinks there is no remedy for this except to repeal the eighteenth amendment?

Mr. BRUCE. The remedy I have always suggested is first an interim remedy; that is to say, the modification of the Volstead Act that would allow the people of the country to have the use of a wholesale nonintoxicating beer, and, secondly, a permanent remedy; that is to say, the amendment of the eighteenth amendment in such a manner as to legalize the use of spiritous and fermented liquors under some system of government supervision and local option established by Congress akin to that which has worked with such extraordinary success in the Province of Quebec and in other great populous communities.

Mr. BORAH. Does the Senator know of anyone who is advocating the repeal of the eighteenth amendment?

Mr. BRUCE. Advocating it? Did not the Senator see that only yesterday the Association Against the Prohibition Amendment was reorganized with a directorate composed of some of the most distinguished citizens of the United States, and that it placed in the very forefront of its program the total repeal—not the amendment, as I have been urging in this body, but the total appeal—of the eighteenth amendment?

Mr. BORAH. That is composed of a few individuals, but there is no political party in favor of it, is there?

Mr. BRUCE. No! But surely the Senator, with his knowledge of the cowardice of many politicians, both Republican and Democratic, would not make any point of that. He himself, naturally enough, with his resolution of character, has complained repeatedly of the miserable time-saving, temporizing, pusillanimous, and craven spirit in which the great issue of prohibition is approached by both parties in this country. Have I answered the Senator?

Mr. BLACK. Mr. President, will the Senator from Maryland yield to me?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Alabama?

Mr. BRUCE. I yield.

Mr. BLACK. I understood from the Senator that he drew the inference that not only the increase of drunkenness here in the city of Washington but the failure of the enforcement authorities showed that the law could not be enforced anywhere else.

Mr. BRUCE. I draw that inference in part from the course of administrative experience in Washington and in part from the same source in other great cities of the United States.

Mr. BLACK. May I suggest to the Senator that recent events do not indicate that the city of Washington is entitled to any crown of glory for its enforcement of the law against stealing from the Government.

Mr. BRUCE. And neither is any other city in the Union entitled to any such crown.

Mr. BLACK. Then, should the laws against stealing be repealed?

Mr. BRUCE. Take the great city of Baltimore, the city in which I live, a city where the crimes commission, that which was appointed only a few years ago, has testified that law, so far as the general criminal law is concerned, is enforced very satisfactorily; take that great city, for illustration, and ask how far the Federal Government has been able to enforce the Volstead Act there. There, too, arrests for drunkenness have mounted up since the enactment of the Volstead Act, and that notwithstanding the fact that we have Federal judges in that city who conscientiously do all in their power to enforce the act, and notwithstanding the fact that almost every few months, it would almost seem, the prohibition administrator for the State of Maryland organizes a special raid for the purpose of checking violations of the Volstead Act.

Mr. TYDINGS. Mr. President, will my colleague yield to me?

Mr. BRUCE. I yield.

Mr. TYDINGS. It seems to me, in all honesty, that it is about time we should admit that the prohibition law can not be enforced, and one of the reasons why it can not be enforced is that if Christ Himself were on earth to-day, even He would be put in jail for turning water into wine.

Mr. BRUCE. Mr. President, in the city of Baltimore, notwithstanding the punitive agencies of the law that are forever in operation, the attempts of the Government at the extermination of the bootlegger remind me of nothing so much as the irrepressibility of the human beard. Each morning we take up a razor, run it over our faces, and shave them clean; but the next morning out the beard has come again, exactly as if its luxuriance had never been checked.

I have done everything that I could to secure the enforcement of the Volstead Act in the city of Baltimore. It was primarily through my agency that another Federal judgeship was recently created for the purpose of effectively enforcing that act in the State of Maryland.

Mr. WALSH of Massachusetts. Mr. President, will the Senator from Maryland yield to me for a moment?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Massachusetts?

Mr. BRUCE. Yes.

Mr. WALSH of Massachusetts. I happen to know personally and intimately the prohibition enforcement officer in Baltimore. He is from my State—Massachusetts. He was a most excellent officer in the World War and achieved a great record as a fine disciplinarian and a very able man. I think the State of Maryland, therefore, has in that officer an enforcement official who is unsurpassed among all in the country.

Mr. BRUCE. Mr. President, I am glad that the Senator from Massachusetts has mentioned Mr. Herbert. He has been untiring some people think—I do not say that I share their views—to the point of little less than indefensible tyranny in his efforts to enforce the Volstead Act in Maryland, and yet nothing could be vainer than those efforts. Not only did I, with the aid of the Maryland Representatives in the House, have another Federal judgeship created for the State of Maryland with special reference to the enforcement of the Volstead Act, but despite the fact that the Federal judge who was then on the bench in Maryland had been stern, as some thought, almost to the point of extreme rigor in enforcing that act, I was among those who asked the President of the United States to elevate him to a still higher judicial position.

We all hear from time to time a great deal of inane, idle talk about the duty to enforce prohibition. Let me say, that honorable, public spirited men of all kinds, whether prohibitionists or otherwise, are entirely agreed as respects that. I should have a supreme contempt for any President of the United States, for any member of the Supreme Court, for any Federal judge, for any minister of the Federal law who did not, so long as the Volstead Act was on the statute books and the eighteen amendment in force heed all the obligations of his oath impartially to enforce the Federal laws without any discrimination between them.

But, as I have stated, in spite of the two Federal judges in the city of Baltimore, in spite of the efficient and energetic prohibition administrator to whom the Senator from Massachusetts has referred, despite the fidelity to duty of Federal officials generally connected with the Federal court in the State of Maryland, the attempt of the Federal Government to enforce the Volstead Act in Maryland has been futile so far as the extinguishment of widespread bootlegging is concerned.

I recall the time when it was said in the city of Baltimore, "The State of Maryland may not be able to enforce all its laws; the city of Baltimore may not be able to enforce all its ordinances; but Uncle Sam always enforces his laws." Ah, not within the limits of the State of Maryland or of any other State in the Union to-day can any such vaunt as that be truthfully uttered. It would perish in the very process of formation upon the lips of any veracious individual familiar with the practical workings of the Volstead Act throughout the United States.

Of course, now that a presidential election is coming on, more than one circumspect friend of mine has said to me, "You have kept this fight up for four or five years; now that you are face to face with another senatorial contest, do you not think that it would be prudent to 'soft pedal' or 'pussy foot' a little just now?"

I will do nothing of the sort. What care I for my paltry political fortunes; what care I whether I am reelected to this body or not, in comparison with the intense strength of conviction, the inextinguishable enthusiasm with which I have committed myself to the great cause of personal liberty, inspired by the tyranny of the Volstead Act and the eighteenth amendment? I am inflexibly opposed to both. I have no use for the cub; I have still less use for its dam; and, however brief may be the unexpired time before the end of my life, I trust that my existence will last long enough to enable me to see repealed by an indignant popular reaction in this country, the constitutional and statutory provisions relating to prohibition, which have been nothing but the fruitful parents of odious oppression, official corruption, widespread lawlessness, and bloodshed.

I do not care what the presidential conventions may do, but I do know that magnetic as Alfred E. Smith is, able as he is, endowed with administrative genius as he is, deservedly popular as he is because of his honorable and fruitful career as governor, he would not to-day be sweeping over this country like a fire in a broom-straw field, but for the fact that hundreds of thousands and millions of people in the United States believe that if he shall be elected President of the United States he will, while enforcing prohibition faithfully so long as it shall be in force, do everything in his power, everything that his powerful office would afford him an opportunity to do, to bring to a close the most atrocious invasion of personal liberty in the history of the United States, except that which was made when the guaranties of human slavery were inserted in the Federal Constitution.

(At this point Mr. BRUCE yielded to Mr. EDGE, who asked and obtained leave to have printed in the RECORD an article with reference to affairs in Nicaragua.)

Mr. BRUCE. The Senator from New Jersey has been silent so long in relation to prohibition that I had hoped that possibly his insertion had some bearing upon that subject; but it seems that it has not.

Mr. WALSH of Massachusetts. A national election is coming.

Mr. BRUCE. I do not know what effect that may have on a regular Republican, under existing circumstances. I trust that no reverse process of conversion is setting in among my antiprohibitionist comrades.

Now, getting back to the police statistics in relation to the city of Washington to which I have referred, let me bring them specifically to the attention of the Senate.

Arrests for drunkenness in the city of Washington from 1920, the first year after the passage of the Volstead Act, to March 31, 1928, were as follows:

| | Arrests for drunkenness |
|---|---|
| 1920 | 5,415 |
| 1921 | 6,375 |
| 1922 | 8,368 |
| 1923 | 8,128 |
| 1924 | 10,354 |
| 1925 | 11,160 |
| 1926 | 12,907 |
| 1927 | 13,375 |

And for the period from July 1, 1927, to March 31, 1928, the arrests for drunkenness were 10,340, which, at the same rate of monthly increase, would for the entire period of 12 months amount to 14,774.

Mr. TYDINGS. In Washington?

Mr. BRUCE. In the city of Washington.

Mr. TYDINGS. The Capital of the Nation?

Mr. BRUCE. Yes! The Capital of the Nation; an increase of drunkenness mounting up from 5,415 arrests for drunkenness in 1920 to 13,375 in the year 1927.

Mr. TYDINGS. If the Senator will permit me to make the observation, a hasty computation shows that would be about 45 for each day of the year, counting Sundays.

Mr. BRUCE. Oh, I will say to the Senator from Maryland that the rate of increase now is worse, though his imagination might well stand appalled at the idea that it could be.

In the Washington Evening Star of yesterday appeared this report, which I will ask to have inserted in the RECORD:

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRUCE (reading):

Sixty-four arrests on charges of sale, possession, and transportation of intoxicants were reported [in Washington] during the 48 hours which ended at 8 o'clock this morning.

Think of that! Sixty-four arrests for violations of the Volstead Act in 48 hours! And that not at Christmas either.

Mr. TYDINGS. Mr. President, will the Senator allow another interruption?

Mr. BRUCE. I will do so with pleasure.

Mr. TYDINGS. If there were that many detected, I was just wondering how many cases had gone undetected of persons who violated this very excellent law.

Mr. BRUCE. The Senator can form some idea of that when I remind him that General Andrews testified two years ago before the subcommittee of the Senate Judiciary Committee that the Prohibition Unit succeeded in seizing only 1 out of every 10 commercial stills. It is needless to say that a commercial still can not secrete itself, can not hide itself, as an individual can; but if we multiplied 64 by only 10, that would be 640 violations of the Volstead Act during a period of 48 hours.

Then the report goes on:

The seizures included 348 quarts of whisky, 152 quarts of brandy, 84 quarts of alcohol, 23 quarts of gin, 326 bottles of beer, 2,000 gallons of mash, and one still.

That is the bag in 48 hours.

Then the report continues—I will ask the Senator from Maryland to listen to this, though there is such entire community of sympathy and belief between us that I do not know why I should especially call his attention to these other figures.

One hundred and forty-four persons were arrested for intoxication during the two-day period.

Think of that!

Mr. TYDINGS. In Washington, the Capital of the Nation?

Mr. BRUCE. In Washington. One hundred and forty-four persons were arrested for intoxication during the two-day period! Now, at that rate maintained for 12 months, the number of arrests for drunkenness in Washington, as I figure it hastily, would be no less than 26,208 persons.

Mr. TYDINGS. Will the Senator permit another interruption?

Mr. BRUCE. Yes.

Mr. TYDINGS. How would the 14,000 annual arrests for drunkenness in the District now compare with the number of arrests for drunkenness prior to the passage of the present law?

Mr. BRUCE. All I know about that is that, as I recollect, Major Hesse, the chief of police of Washington, stated a few days ago that during the last 13 or 16 years, as I recollect—I think it is 13 or 16 years; anyhow, it is a period that overlaps the period that has elapsed since the passage of the Volstead Act—while there had been an increase in the population of Washington of only 40 per cent, there had been an increase in arrests for drunkenness of 168 per cent.

The idea of this convention down at Houston, or of that convention out at Kansas City, attempting to bring forward issues that nobody is thinking about in the place of an issue that everybody is thinking about is one that my mind rejects with derision.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. BRUCE. Yes; I yield.

Mr. TYDINGS. I should like to observe that many people who are in favor of prohibition think that God is with them; that it is godly and Christianlike to put poison in alcohol, and to go into the lives of people who mind their own business and do not offend public morals, to regulate them in all degrees.

To prove God is not with these people, because the philosophy of prohibition seems to be thought to be bottomed on the Bible, I have gone through it from Genesis to Revelations and have taken out all the verses—not many of them—dealing with wine, and I ask unanimous consent to insert them in the RECORD at the conclusion of the Senator's address.

Mr. BRUCE. I hope the Senator will cull out right now from that collection some typical ones and read them to the Senate.

Mr. TYDINGS. I do not want to take the time; but if anyone objects to it, I shall have to read them individually here at this time.

Mr. SMOOT. Mr. President, I am not going to object to the Senator's putting them in; but I did want to compliment him on the fact that he has read the Bible, if he got those quotations out of it.

Mr. TYDINGS. I thank the Senator from Utah; and I will say to him that if others would read the Bible and understand it, the Senator from Maryland who is now speaking, who has yielded me his time, would not have to make the effort he is making to get the philosophy of Christ sowed into the hearts of the American people.

The PRESIDING OFFICER. Without objection, the request of the Senator from Maryland will be granted.

(The matter referred to appears at the end of Mr. BRUCE'S remarks.)

Mr. BRUCE. In view of the superior familiarity with the Bible that the Senator from Utah [Mr. SMOOT] seems to claim, I can not but recall a colloquy that I once heard in court in Baltimore City between ex-Governor William Pinkney Whyte, who was twice a Member of this body, and a bright, clever, rattle-brained lawyer named Stockett Matthews.

The governor was not only a man of very great ability but of very upright character. He was supposed, however, by the wicked to be just a little too conscious, perhaps, of his righteousness. On the occasion to which I refer, Matthews in his address to the jury said that Governor Whyte had, in his address to the jury, spoken as if he had been just converted. Then Governor Whyte, instead of laughing off his observation—perhaps he did not have the same sense of humor that the Senator from Utah has—interrupted with the solemn, reproachful observation, "I was converted long ago." "Well," replied Matthews unabashed, "then all I have to say, governor, is that you have not brought forth fruits meet for repentance."

So I say to the Senator from Utah, if he intended to claim for himself an extraordinary degree of familiarity with the Bible.

I could not help listening to the Senator from Alabama [Mr. HEFLIN] this morning when he spoke of the enormous sums of money that are being expended on behalf of Governor Smith at the present time, sums of money, I venture to say, as fabulous as the stores of gold that were supposed in legendary times to be guarded by the mythical griffon.

In an address before the Institute of Public Affairs at the University of Virginia last year on the eighteenth amendment I made this statement, which is completely borne out by the testimony elicited by the Reed investigated committee:

All the inner workings of the Anti-Saloon League have not yet been completely exposed by the Reed Senate committee; for, when it was

sitting, Wayne B. Wheeler was successful in preventing the names of some of the pecuniary contributors to the activities of the league from being divulged. But the records of the league have, for the first time, been laid sufficiently bare to enable us fully to understand just how the adoption of the eighteenth amendment was brought about. It is enough to say that, while that event is largely attributable to just resentment against the abuses of the old saloon, and is partially attributable also to the overstrained feelings kindled by the World War, it is to a very great extent ascribable to the lavish use of money by the league.

The Reed committee elicited the fact that during the period from 1920 to 1925 the league expended no less than $13,655,313.72; and from its official records, which came into the possession of the committee, it would appear that the amounts previously collected and disbursed by the league from 1883 to 1918 aggregated $50,000,000, making a grand total, exclusive of amounts expended by the league in the years 1919 and 1926, of no less than $63,655,313.72.

Just think of the Senator from Alabama [Mr. HEFLIN] allowing himself to speak of large, and I believe totally imaginary, sums spent by the class of persons that he chose to denominate "wets," when here we have evidence of the Anti-Saloon League of the United States expending in all the sum of no less than sixty-three and odd million dollars in attempts to browbeat and to bully candidates for office and to impose its will upon the people of the United States in the place of the legislative will of their chosen representatives.

I rejoice, however, to say that what used to come into the coffers of the Anti-Saloon League in streams, now, to all appearances, comes in only in driblets. The people of the United States are finding out what a harsh tyrant it is, what an unprincipled and unconscionable a politician it is, what an unscrupulous disburser of money it is, what a menace it is to everything that constitutes the essentials of American liberty and self-government and orderly legislative procedure.

The last contributor of any moment to its till, a contributor whom it seems to have accepted with the same degree of satisfaction that it might have accepted a contribution from a decent man, was Kresge, the department-store proprietor, who was proved only a few days later to have recently been involved in at least two lewd intrigues with abandoned women.

To show how discredited the Anti-Saloon League has become, over in Baltimore the other day, when some of the citizens of that community, most of whom were prohibitionists, proceeded to hold a law-enforcement meeting, they were careful to let the whole State of Maryland know that the Anti-Saloon League was to have nothing to do with the meeting. We have at least gotten far enough along the road of reformatory progress to have brought that intriguing and unconscionable association into popular disrepute, that association which once, in the plenitude of its power, had the insolence to propose nothing less than impeachment of the President of the United States.

I do not want to see any return to the old saloon. God forbid! Nobody, no matter what may be the future fortunes of the eighteenth amendment or the Volstead Act, will ever see that. Social revolutions rarely go backward.

Much as I abominate prohibition, in my relations to it I have never lost sight of my primary duty as a citizen, recognizing the fact that, so long as the Volstead Act is on the statute books, an honest effort should be made to enforce it. I say this although if there is anything that I loathe more than drunkenness it is prohibition, and I loathe that more because it is not only the fertile mother of drunkenness but of abuses worse than the abuses bred by drunkenness.

What I would prefer to see—and I speak for myself personally only—would be, not the total repeal of the eighteenth amendment, though I am prepared to acquiesce in that if necessary, but the amendment of that amendment so as to legalize the use of liquor of every kind under some mixed system of regulation made up partly of Government supervision and partly of local option established by Congress. If we adopted such a system, no one could say that we were going back to the old saloon or even that we were going back to 48 different systems of regulation in 48 different States. The Government would have no motive to sell liquor to a minor, or to a drunken man who already had far too much, or to commit any of the offenses so common in the day of the old saloon. In other words, if the regulation of liquor were brought under the supervision of the Government, its sale would not be subject to any of the selfish private motives which lead private traffickers in liquor to do things that law or public opinion condemns.

Such a system as I have sketched has been established in the Province of Quebec, and there it is working like a charm. I receive the reports of the liquor commission of the Province of Quebec every year. Its reports show that, unlike the situation in Washington and every other great city in our land, in the city of Montreal drunkenness is steadily declining from year to year. In the last six years it has been cut down there one-half; and, moreover, those reports show that the ideal of Thomas Jefferson is in that Province being steadily realized; that is to say, the ideal which contemplates the substitution of wine and mild malt beverages for ardent spirits.

If I am correctly informed, so satisfactory has that system proved in the Province of Quebec that none of its territorial divisions have asked, since the Quebec liquor act went into effect, for the opportunity to exercise the privilege of local option.

Under the system that I have sketched any city or any county in the United States could by the vote of a majority of its voters release itself from Government supervision and establish prohibition within its limits.

The trend of liquor reform at the present time is not back to the old saloon. There is no reform to be found there; we all agree upon that. The trend is forward, to the same enlightened system of Government supervision which has been established in British Columbia, in Alberta, in Saskatchewan, in Manitoba, in Ontario, in Quebec, in New Brunswick, and every Canadian Province except the little water-girt Province of Prince Edward Island and the seabound Province of Nova Scotia, where the people can obtain all they desire to drink so easily by way of the sea that it makes no difference to them whether prohibition is or is not sought to be enforced within their limits.

Mind you, in every single one of those Canadian Provinces now under Government supervision prohibition was tried, faithfully tried, and in every one of them it was abandoned.

Indeed, this is true of every other country in the whole world where the experiment of prohibition has been entered upon, except Finland, Nova Scotia, Prince Edward Island, and the United States of America, as witness Russia, Sweden, and Norway, to say nothing more. And at this very moment a resolute, popular agitation is under way in Finland calling for the revocation of its prohibitory legislation. Even in Prince Edward Island and Nova Scotia the condition of the public mind with reference to prohibition is, to say the least, very restless. If the words "Thou art weighed in the balance and found wanting" were ever written upon any walls, it is upon the gloomy and tyrannical walls of prohibition.

I say to all the antiprohibitionists throughout the country, "Gird up your loins, present a stern and resolute face to the foe. Everything is going our way. If national conventions shall prove faithless to their obligations, the voters will not fail to rebuke them in due time."

I desire to recall, as I have more than once done before, an observation made by John Randolph of Roanoke many years ago when slavery was in force in the United States and politicians and national conventions were trying to temporize with the rising demand for its abolition. Said Randolph:

> It is idle to talk about suppressing the slavery issue. You might as well talk about covering up an earthquake with a carpet.

That is as true of prohibition to-day as it was of slavery then.

If my old historic party could only rise to the level of its great opportunity it would, when it meets at Houston, declare unequivocally in favor of two of the noblest and most inspiring things that men have ever struggled and died for.

It would unequivocally declare, in resonant tones that would reverberate from one end of our land to the other, for personal liberty and sectarian tolerance. Rarely in the history of any party in our country was any such opportunity ever offered as is offered now to the Democratic Party to take its stand upon the exalted levels of those two great immortal, unextinguishable principles. We should bring to an end these irritating, corrupting restrictions in the matter of drink.

Why say to me that the use of liquor tends to abuse? Yes; it tends to abuse whether prohibition is or is not written into the law, but so do all the propensities of our nature tend. There is not a corporeal appetite of ours of which that is not true. As I have so often said, God did not fill our veins with vinegar but with red blood corpuscles. He intended that we should derive all the pleasure that is to be derived from the gratification of our bodily senses as well as from the gratification of our moral and intellectual impulses. He only asks of us that we gratify these moderately and within the bounds of the laws that he has prescribed for our conduct. It was never His intent to condemn us to mere ascetic or puritannical lives. It was His purpose to allow us all the innocent pleasure in every form of which this "pleasing anxious being" of ours admits.

I do not care whether prohibition does or does not prohibit. If it prohibits, which it does not, then I say it is based upon a totally visionary system of ethics and a totally false philosophy of conduct. If it does not prohibit always it produces the same mildewed harvest of lawlessness, of official corruption, and of crime.

I have gotten far away from the Washington police statistics with which I began my remarks. Sometimes it is pretty difficult to chain one's thoughts and even more difficult to chain one's strongest sentiments down to statistics. But after all, the two most completely unanswerable charges in the indictment of prohibition by the antiprohibitionists are found in the constant manner in which arrests for drunkenness in the United States have mounted year by year since the enactment of the Volstead Act, and in the fact that since then deaths from alcoholism in the United States have also from year to year steadily increased.

My attention was called a few days ago, in reading one of the Baltimore newspapers, to the fact that in one of the years preceding the enactment of the Volstead law there were only four deaths from alcoholism in the city of Baltimore. Last year there were 122.

Mr. TYDINGS. Mr. President, will my colleague yield?

Mr. BRUCE. Certainly.

Mr. TYDINGS. In line with what I said a moment ago, that is just another expression of the error man is making when he tries to substitute his plan for God's plan.

Mr. BRUCE. Absolutely so.

Mr. CARAWAY. Mr. President, I did not know we were going to settle any of God's plans in the Senate.

Mr. BRUCE. No; God forbid!

Mr. CARAWAY. I think He has forbidden it, and so the two Senators from Maryland could well leave any of God's plans out of the discussion of prohibition.

Mr. BRUCE. Not at all!

Mr. CARAWAY. We know that every man has a right to express his own opinion and to entertain it.

Mr. TYDINGS. We have not that right.

Mr. BRUCE. The Senator from Arkansas is denying it to us now.

Mr. CARAWAY. Well, Mr. President——

Mr. BRUCE. Just a moment, please.

Mr. CARAWAY. Does not the Senator yield to me?

Mr. BRUCE. If the Senator wants to interrupt me to ask a question, certainly, but if the Senator wants to declare that I am a profane, sacrilegious, godless Senator, of course I——

Mr. CARAWAY. The Senator takes exception?

Mr. BRUCE. Naturally I would not feel disposed to yield for that purpose. [Laughter.]

Mr. CARAWAY. That was farthest from my mind. But I have never yet been quite able to agree that that thing which has caused more sorrow, has filled more jails, has put more men on the scaffold, has made more women widows and more children beggars in the street was an instrumentality of God to work out a righteous cause. I have never yet been able to understand why any gentleman, who knows that he himself ought to stay sober and does it, insists that everybody else ought to get drunk. With all due deference to my friend—and there is certainly no one I admire more—I just can not agree with him in that particular theory, because he is the finest example of sobriety and propriety of high intelligence and all those things for which we admire the gentleman, but he seems to resent that the rest of us want to be just like him and stay sober.

Mr. BRUCE. No; the Senator is mistaken——

Mr. CARAWAY. In which statement?

Mr. BRUCE. Of course, I do not mean in the respects in which he has spoken of me in a manner so delightful.

Mr. CARAWAY. I mean everything I said about the Senator. I have for the Senator the most genuine regard, and yet I dissent from his position on this question with all the emphasis of my nature.

Mr. BRUCE. I know it.

Mr. CARAWAY. I do not want the Senator to think that I am being critical.

Mr. BRUCE. Not at all. I often say—how often have I said it?—when somebody takes exception to the fact that the Senator is a little sarcastic, that he has a witty, sarcastic tongue, but has also one of the purest and most affectionate hearts in the world. Everyone who knows him as well as I do knows that this is true.

The Senator should not take a mere modificationist like myself, just an ordinary temperate individual, as an illustration of what is best to be found in point of character in the antiprohibitionist ranks. He might well take some individual who has never touched a drop of liquor in his life. Three or four of the most inflexible, the most inveterate enemies of prohibition whom I know in the world are men between whose lips not one single drop of spirits has ever passed. I read into the RECORD only last Friday a crude poem written by an individual whose lines, when they were laid in my hands, were accompanied by a letter in which the author stated that he had never in his life touched a drop of intoxicating liquor or taken a smoke or a chew of tobacco. He had never done any of those things, but in the bosom of that true man, as upon the surface of a holy altar, lived the pure flame of personal liberty and all that personal liberty signifies to the human spirit.

I will now say to my colleague from Maryland that if he wishes to interrupt me I will be glad to have him do so.

Mr. TYDINGS. Mr. President, I merely wanted to make an observation to show how prohibition legislation has departed from the spirit of religion. Whatever our individual faith may be, we all recognize that the Bible, the word of God, sets up 10 commandments, among them being "Thou shalt not kill." Some time ago Mr. Forbes, the former head of the Veterans' Bureau, was sent to the Atlanta Penitentiary for the misuse of a tremendous sum of money. Following that Mr. Miller has gone there for a like offense. Each of those men went to the penitentiary for only two years, but when it comes to the crime of taking a drink the Congress of the United States has gone on record as approving the punishment of death for a man who drinks illegal liquor. That illustrates the departure that the Senate and House of Representatives have made from the real philosophy of real religion as applied to prohibition in comparison with other crimes. I do not see how any man can say that we have followed the philosophy of God when we go to the extent of killing people because they take a drink of liquor, and no real Christian will go that far.

Mr. BRUCE. Mr. President, the junior Senator from Maryland was not here when on one occasion in response to a direct challenge from me a fanatical Member of this body, whose name I do not see fit to mention, on my asking him whether he was in favor of capital punishment for a violation of the Volstead Act promptly replied, "I am." Now, what are we to do with a brainpan like that?

You all remember, of course, the individual in Michigan, who under some kind of Baumes Act is now in prison for life for a violation of a prohibition statute. I am glad that the junior Senator from Maryland made the reference that he did to the Deity, who is the Father of all our virtues and infirmities, who made us what we are, and clothed us with our warm integument of pulsating flesh, and made our bodies the seat of the delightful, joyous appetites and sensations which create us human beings rather than disembodied spirits. If I think that there is innocent pleasure, within proper limits, to be found in a glass of wine, it is my Maker and not another who has implanted in me the propensity which leads me to believe that. All He asks is that I do not abuse it. He asks of me that as He asks of me that I lead a chaste life in my social relationships, that I avoid gluttony, and that I keep down all the unruly impulses of appetite or passion in my nature.

My colleague from the State of Maryland has inserted into the CONGRESSIONAL RECORD what God, through lips that He lit with hallowed fire, has said about drink. Nowhere, in my judgment—and I say it with the utmost measure of reverence—is the wisdom of the Creator more strikingly manifested than in His attitude toward drink, as evidence in the Scriptures. Yes, He tells us that "wine is a mocker and strong drink raging," and so they are when indulged to excess. He warns us that we must ever be upon our guard against them; but in the Scriptures there is no final word that denies to us the use of wine. Some thought that it was a reproach to our Savior that He came into the world eating and drinking. Neither He nor His Father thought so. Over and over again in the Scriptures are to be found reflections and sentiments expressive of the innocent, legitimate pleasure than is derivable from the moderate and reasonable use of wine.

Indeed, in one place the Scriptures make the vine ask whether it should leave its wine which cheereth God and man. And in another place they speak of the wine that maketh glad the heart of man. And in still another place they break out: "A man hath no better thing under the sun than to eat, and to drink, and to be merry." My colleague from Maryland was quite right when he said that the use of wine, within proper restrictions, is a thing that receives the divine approval itself. In one breath God admonishes us that we must be moderate in the gratification of our appetites, and in another He lets us know that when we are so there is no reason why that gratification should be withheld from us.

My friend—and he is my friend, my dear friend—the Senator from Arkansas [Mr. CARAWAY] spoke about drink as if it were associated with the only physical propensity of ours that ever works moral shipwreck; but because a very small percentage of human society, not so much from the strength of drink as from their own weakness, can not drink except excessively, is that any reason why I who have drunk wine for years, without ever drinking more at the most than a glass or so of it, should

not continue to enjoy the innocent pleasure that I have found in it? Are we to renounce the primal tie between man and woman, which is the source of some of the purest, tenderest, and most exalted of human emotions, because at times illicit love leads to misery and moral disaster and even to dusty death? The fundamental vice in prohibition consists in the fact that it is a violent infraction of nature, and such infractions of nature never fail to breed back to lawlessness and vice.

This thing of treating man as if he were nothing better than the bondsman of harsh disciplinary statutes, instead of the normal being that he is, is a thing that never fails to be condemned by human experience.

I have perhaps said too much; but this may be the only opportunity that I shall have to say anything on the subject of prohibition before the presidential candidates of the two great national parties shall be selected.

What I have said at least voices my profoundest convictions.

The matter submitted by Mr. TYDINGS is as follows:

GENESIS

*Chapter 9*

20. And Noah began to be an husbandman, and he planted a vineyard:

21. And he drank of the wine and was drunken; and he was uncovered within his tent.

*Chapter 19*

32. Come, let us make our father drink wine, and we will lie with him, that we may preserve seed of our father.

33. And they made their father drink wine that night; and the firstborn went in, and lay with her father; and he perceived not when she lay down, nor when she arose.

34. And it came to pass on the morrow, that the firstborn said unto the younger, Behold, I lay yesternight with my father: let us make him drink wine this night also; and go thou in, and lie with him, that we may preserve seed of our father.

35. And they made their father drink wine that night also: and the younger arose, and lay with him; and he perceived not when she lay down, nor when she arose.

*Chapter 27*

25. And he said, Bring it near to me, and I will eat of my son's venison, that my soul may bless thee. And he brought it near to him, and he did eat: and he brought him wine, and he drank.

28. Therefore God give thee of the dew of heaven, and the fatness of the earth, and plenty of corn and wine.

LEVITICUS

*Chapter 10*

9. Do not drink wine nor strong drink, thou, nor thy sons with thee, when ye go into the tabernacle of the congregation, lest ye die: it shall be a statute for ever throughout your generations.

*Chapter 23*

13. And the meat offering thereof shall be two tenth deals of fine flour mingled with oil, an offering made by fire unto the Lord for a sweet savour: and the drink offering thereof shall be of wine, the fourth part of an hin.

NUMBERS

*Chapter 6*

3. He shall separate himself from wine and strong drink, and shall drink no vinegar of wine, or vinegar of strong drink, neither shall he drink any liquor of grapes, nor eat moist grapes, or dried.

20. And the priest shall wave them for a wave offering before the Lord: this is holy for the priest, with the wave breast and heave shoulder: and after that the Nazarite may drink wine.

*Chapter 15*

5. And the fourth part of an hin of wine for a drink offering shalt thou prepare with the burnt offering or sacrifice, for one lamb.

7. And for a drink offering thou shalt offer the third part of an hin of wine, for a sweet savour unto the Lord.

10. And thou shalt bring for a drink offering half an hin of wine, for an offering made by fire, of a sweet savour unto the Lord.

*Chapter 28*

14. And their drink offerings shall be half an hin of wine unto a bullock, and the third part of an hin unto a ram, and a fourth part of an hin unto a lamb: this is the burnt offering of every month throughout the months of the year.

DEUTERONOMY

*Chapter 7*

13. And he will love thee, and bless thee, and multiply thee: he will also bless the fruit of thy womb, and the fruit of thy land, thy corn, and thy wine, and thine oil, the increase of thy kine, and the flocks of thy sheep, in the land which he sware unto thy fathers to give thee.

*Chapter 11*

14. That I will give you the rain of your land in his due season, the first rain and the latter rain, that thou mayest gather in thy corn, and thy wine, and thine oil.

*Chapter 12*

17. Thou mayest not eat within thy gates the tithe of thy corn, or of thy wine, or of thy oil, or the firstlings of thy herds or of thy flock, nor any of thy vows which thou vowest, nor thy freewill offerings, or heave offering of thine hand:

*Chapter 14*

23. And thou shalt eat before the Lord thy God, in the place which he shall choose to place his name there, the tithe of thy corn, of thy wine, and of thine oil, and the firstlings of thy herds and of thy flocks; that thou mayest learn to fear the Lord thy God always.

26. And thou shalt bestow that money for whatsoever thy soul lusteth after, for oxen, or for sheep, or for wine, or for strong drink, or for whatsoever thy soul desireth: and thou shalt eat there before the Lord thy God, and thou shalt rejoice, thou, and thine household.

*Chapter 15*

14. Thou shalt furnish him liberally out of thy flock, and out of thy floor, and out of thy winepress: of that wherewith the Lord thy God hath blessed thee thou shalt give unto him.

*Chapter 16*

13. Thou shalt observe the feast of tabernacles seven days, after that thou hast gathered in thy corn and thy wine:

*Chapter 18*

4. The firstfruit also of thy corn, of thy wine, and of thine oil, and the first of the fleece of thy sheep, shalt thou give him.

*Chapter 28*

39. Thou shalt plant vineyards, and dress them, but shalt neither drink of the wine, nor gather the grapes; for the worms shall eat them.

51. And he shall eat the fruit of thy cattle, and the fruit of thy land, until thou be destroyed: which also shall not leave thee either corn, wine, or oil, or the increase of thy kine, or flocks of thy sheep, until he have destroyed thee.

*Chapter 29*

6. Ye have not eaten bread, neither have ye drunk wine or strong drink: that ye might know that I am the Lord your God.

*Chapter 32*

14. Butter of kine, and milk of sheep, with fat of lambs, and rams of the breed of Bashan, and goats, with the fat of kidneys of wheat; and thou didst drink the pure blood of the grape.

33. Their wine is the poison of dragons, and the cruel venom of asps.

38. Which did eat the fat of their sacrifices, and drank the wine of their drink offerings? let them rise up and help you, and be your protection.

*Chapter 33*

28. Israel then shall dwell in safety alone: the fountain of Jacob shall be upon a land of corn and wine; also his heavens shall drop down dew.

JOSHUA

*Chapter 9*

13. And these bottles of wine, which we filled, were new; and, behold, they be rent: and these our garments and our shoes are become old by reason of the very long journey.

JUDGES

*Chapter 9*

13. And the vine said unto them, Should I leave my wine, which cheereth God and man, and go to be promoted over the trees?

27. And they went out into the fields, and gathered their vineyards, and trode the grapes, and made merry, and went into the house of their god, and did eat and drink, and cursed Abimelech.

*Chapter 13*

4. Now therefore beware, I pray thee, and drink not wine nor strong drink, and eat not any unclean thing:

7. But he said unto me, Behold, thou shalt conceive, and bear a son; and now drink no wine nor strong drink, neither eat any unclean thing; for the child shall be a Nazarite to God from the womb to the day of his death.

14. She may not eat of anything that cometh of the vine, neither let her drink wine or strong drink, nor eat any unclean thing: all that I commanded her let her observe.

*Chapter 19*

19. Yet there is both straw and provender for our asses; and there is bread and wine also for me, and for thy handmaid, and for the young man which is with thy servants: there is no want of anything.

RUTH

*Chapter 3*

7. And when Boaz had eaten and drunk, and his heart was merry, he went to lie down at the end of the heap of corn: and she came softly, and uncovered his feet, and laid her down.

I SAMUEL

*Chapter 1*

14. And Eli said unto her, How long wilt thou be drunken? Put away thy wine from thee.

15. And Hannah answered and said, No, my lord, I am a woman of a sorrowful spirit; I have drunk neither wine nor strong drink, but have poured out my soul before the Lord.

24. And when she had weaned him, she took him up with her, with three bullocks, and one ephah of flour, and a bottle of wine, and brought him unto the house of the Lord in Shiloh: and the child was young.

*Chapter 10*

3. Then thou shalt go forward from thence, and thou shalt come to the plain of Tabor, and there shall meet thee three men going up to God to Bethel, one carrying three kids, and another carrying three loaves of bread, and another carrying a bottle of wine:

*Chapter 16*

20. And Jesse took an ass laden with bread, and a bottle of wine, and a kid, and sent them by David his son unto Saul.

*Chapter 25*

18. Then Abigail made haste, and took two hundred loaves, and two bottles of wine, and five sheep ready dressed, and five measures of parched corn, and an hundred clusters of raisins, and two hundred cakes of figs, and laid them on asses.

36. And Abigail came to Nabal; and, behold, he held a feast in his house, like the feast of a king; and Nabal's heart was merry within him, for he was very drunken; wherefore she told him nothing, less or more, until the morning light.

37. But it came to pass in the morning, when the wine was gone out of Nabal, and his wife had told him these things, that his heart died within him, and he became as a stone.

II SAMUEL

*Chapter 6*

19. And he dealt among all the people, even among the whole multitude of Israel, as well to the women as men, to every one a cake of bread, and a good piece of flesh, and a flagon of wine. So all the people departed every one to his house.

*Chapter 11*

13. And when David had called him, he did eat and drink before him; and he made him drunk: and at even he went out to lie on his bed with the servants of his lord, but went not down to his house.

*Chapter 13*

28. Now Absalom had commanded his servants, saying, Mark ye now when Amnon's heart is merry with wine, and when I say unto you, Smite Amnon then kill him, fear not: have not I commanded you? be courageous, and be valiant.

*Chapter 16*

1. And when David was a little past the top of the hill, behold, Ziba the servant of Mephibosheth met him, with a couple of asses saddled, and upon them two hundred loaves of bread, and an hundred bunches of raisins, and an hundred of summer fruits, and a bottle of wine.

2. And the king said unto Ziba, What meanest thou by these? And Ziba said, The asses be for the king's household to ride on; and the bread and summer fruit for the young men to eat; and the wine, that such as be faint in the wilderness may drink.

I KINGS

*Chapter 4*

20. Judah and Israel were many, as the sand which is by the sea in multitude, eating and drinking, and making merry.

II KINGS

*Chapter 18*

32. Until I come and take you away to a land like your own land, a land of corn and wine, a land of bread and vineyards, a land of oil olive and of honey, that ye may live and not die: and hearken not unto Hezekiah, when he persuadeth you, saying, The Lord will deliver us.

I CHRONICLES

*Chapter 9*

29. Some of them also were appointed to oversee the vessels, and all the instruments of the sanctuary, and the fine flour, and the wine and the oil, and the frankincense, and the spices.

*Chapter 12*

39. And there they were with David three days, eating and drinking: for their brethren had prepared for them.

40. Moreover they that were nigh them, even unto Issachar and Zebulun and Baphtali, brought bread on asses, and on oxen, and meat, meal, cakes of figs, and bunches of raisins, and wine, and oil, and oxen, and sheep abundantly: for there was joy in Israel.

*Chapter 16*

3. And he dealt to every one of Israel, both man and woman, to every one a loaf of bread and a good piece of flesh, and a flagon of wine.

*Chapter 27*

27. And over the vineyards was Shimei and Ramathite: over the increase of the vineyards for the wine cellars was Zabdi the Shiphmite:

II CHRONICLES

*Chapter 2*

10. And, behold, I will give to thy servants, the hewers that cut timber, twenty thousand measures of beaten wheat, and twenty thousand measures of barley, and twenty thousand baths of wine, and twenty thousand baths of oil.

15. Now therefore the wheat, and the barley, the oil, and the wine, which my lord hath spoken of, let him send unto his servants:

*Chapter 11*

11. And he fortified the strong holds, and put captains in them, and store of victual, and of oil and wine.

*Chapter 31*

5. And as soon as the commandment came abroad, the children of Israel brought in abundance the first fruits of corn, wine, and oil, and honey, and of all the increase of the field; and the tithe of all things brought they in abundantly.

*Chapter 32*

28. Storehouses also for the increase of corn, and wine, and oil; and stalls for all manner of beasts, and cotes for flocks.

EZRA

*Chapter 6*

9. And that which they have need of, both young bullocks, and rams, and lambs, for the burnt offerings of the God of Heaven, wheat, salt, wine, and oil, according to the appointment of the priests which are at Jerusalem, let it be given them day by day without fail:

*Chapter 7*

22. Unto an hundred talents of silver, and to an hundred measures of wheat, and to an hundred baths of wine, and to an hundred baths of oil, and salt without prescribing how much.

NEHEMIAH

*Chapter 2*

1. And it came to pass in the month Nisan, in the twentieth year of Artaxerxes the king, that wine was before him: and I took up the wine, and gave it unto the king; Now I had not been beforetime sad in his presence.

*Chapter 5*

11. Restore, I pray you, to them, even this day, their lands, their vineyards, their oliveyards, and their houses, also the hundredth part of the money, and of the corn, the wine, and the oil, that ye exact of them.

15. But the former governors that had been before me were chargeable unto the people, and had taken of them bread and wine, beside forty shekels of silver; yea, even their servants bare rule over the people: but so did not I, because of the fear of God.

18. Now that which was prepared for me daily was one ox and six choice sheep; also fowls were prepared for me, and once in ten days store of all sorts of wine: yet for all this required not I the bread of the governor, because the bondage was heavy upon this people.

*Chapter 10*

37. And that we should bring the first fruits of our dough, and our offerings, and the fruit of all manner of trees, of wine and of oil, unto the priests, to the chambers of the house of our God; and the tithes of our ground unto the Levites, that the same Levites might have the tithes in all the cities of our tillage.

39. For the children of Israel and the children of Levi shall bring the offering of the corn, of the new wine, and the oil, unto the chambers, where are the vessels of the sanctuary, and the priests that minister, and the porters, and the singers: and we will not forsake the house of our God.

*Chapter 13*

5. And he had prepared for him a great chamber, where aforetime they laid the meat offerings, the frankincense, and the vessels, and the tithes of the corn, the new wine, and the oil, which was commanded to be given to the Levites, and the singers, and the porters; and the offerings of the priests.

12. Then brought all Judah the tithe of the corn and the new wine and the oil unto the treasuries.

15. In those days saw I in Judah some treading wine presses on the sabbath, and bringing in sheaves, and lading asses; as also wine, grapes, and figs, and all manner of burdens, which they brought into Jerusalem on the Sabbath day; and I testified against them in the day wherein they sold victuals.

ESTHER

*Chapter 1*

7. And they gave them drink in vessels of gold (the vessels being diverse one from another), and royal wine in abundance, according to the state of the king.

10. On the seventh day, when the heart of the king was merry with wine, he commanded Mehuman, Biztha, Harbona, Bigtha, and Abagtha, Zethar and Carcas, the seven chamberlains that served in the presence of Ahasuerus the king.

*Chapter 5*

6. And the king said unto Esther at the banquet of wine, What is thy petition? and it shall be granted thee: and with is thy request? even to the half of the kingdom it shall be performed.

*Chapter 7*

2. And the king said again unto Esther on the second day at the banquet of wine, What is thy petition, Queen Esther? and it shall be granted thee: and what is thy request? and it shall be performed, even to the half of the kingdom.

7. And the king arising from the banquet of wine in his wrath went into the palace garden: and Haman stood up to make request for his life to Esther the queen; for he saw that there was evil determined against him by the king.

8. Then the king returned out of the palace garden into the place of the banquet of wine; and Haman was fallen upon the bed whereon Esther was. Then said the king, Will he force the queen also before me in the house? As the word went out of the king's mouth, they covered Haman's face.

JOB

*Chapter 1*

13. And there was a day when his sons and daughters were eating and drinking wine in their eldest brother's house.

18. While he was yet speaking, there came also another, and said, Thy sons and thy daughters were eating and drinking wine in their eldest brother's house:

*Chapter 32*

19. Behold my belly is as wine which hath no vent; it is ready to burst like new bottles.

PSALMS

*Chapter 4*

7. Thou hast put gladness in my heart, more than in the time that their corn and their wine increased.

*Chapter 60*

3. Thou hast shewed thy people hard things: thou hast made us to drink the wine of astonishment.

*Chapter 75*

8. For in the hand of the Lord there is a cup, and the wine is red; it is full of mixture; and he poureth out of the same: but the dregs thereof, all the wicked of the earth shall wring them out, and drink them.

*Chapter 78*

65. Then the Lord awaked as one out of sleep, and like a mighty man that shouteth by reason of wine.

*Chapter 104*

15. And wine that maketh glad the heart of man, and oil to make his face to shine, and bread which strengtheneth man's heart.

PROVERBS

*Chapter 3*

10. So shall thy barns be filled with plenty, and thy presses shall burst out with new wine.

*Chapter 4*

17. For they that eat the bread of wickedness, and drink the wine of violence.

*Chapter 9*

2. She hath killed her beasts; she hath mingled her wine; she hath also furnished her table.

5. Come, eat of my bread, and drink of the wine which I have mingled.

*Chapter 20*

1. Wine is a mocker, strong drink is raging: and whosoever is deceived thereby is not wise.

*Chapter 21*

17. He that loveth pleasure shall be a poor man: he that loveth wine and oil shall not be rich.

*Chapter 23*

20. Be not among winebibbers; among riotous eaters of flesh.

30. They that tarry long at the wine; they that go to seek mixed wine.

31. Look not thou upon the wine when it is red, when it giveth his colour in the cup, when it moveth itself aright.

*Chapter 31*

4. It is not for kings, O Lemuel, it is not for kings to drink wine; nor for princes strong drink.

6. Give strong drink unto him that is ready to perish, and wine unto those that be of heavy hearts.

7. Let him drink, and forget his poverty, and remember his misery no more.

ECCLESIASTES

*Chapter 2*

3. I sought in mine heart to give myself unto wine, yet acquainting mine heart with wisdom; and to lay hold on folly, till I might see what was that good for the sons of men, which they should do under the heaven all the days of their life.

24. There is nothing better for a man, than that he should eat and drink, and that he should make his soul enjoy good in his labour. This also I saw, that it was from the hand of God.

*Chapter 8*

15. Then I commended mirth, because a man hath no better thing under the sun, than to eat, and to drink, and to be merry: for that shall abide with him of his labour the days of his life, which God giveth him under the sun.

*Chapter 9*

7. Go thy way, eat thy bread with joy, and drink thy wine with a merry heart; for God now accepteth thy works.

*Chapter 10*

19. A feast is made for laughter, and wine maketh merry: but money answereth all things:

SONG OF SOLOMON

*Chapter 1*

2. Let him kiss me with the kisses of his mouth: for thy love is better than wine.

4. Draw me, we will run after thee: the king hath brought me into his chambers: we will be glad and rejoice in thee, we will remember thy love more than wine: the upright love thee.

*Chapter 4*

10. How fair is thy love, my sister, my spouse! how much better is thy love than wine! and the smell of thine ointments than all spices!

*Chapter 5*

1. I am come into my garden my sister, my spouse: I have gathered my myrrh with my spice; I have eaten my honeycomb with my honey; I have drunk my wine with my mild: eat, O friends; drink, yea, drink abundantly, O beloved.

*Chapter 7*

9. And the roof of thy mouth like the best wine for my beloved, that goeth down sweetly, causing the lips of those that are asleep to speak.

*Chapter 8*

2. I would lead thee, and bring thee into my mother's house, who would instruct me: I would cause thee to drink of spiced wine of the juice of my pomegranate.

ISAIAH

*Chapter 1*

22. Thy silver is become dross, thy wine mixed with water.

*Chapter 5*

11. Woe unto them that rise up early in the morning, that they may follow strong drink; that continue until night, till wine inflame them!

12. And the harp, and the viol, the tabret, and pipe, and wine, are in their feasts: but they regard not the work of the Lord, neither consider the operation of his hands.

22. Woe unto them that are mighty to drink wine, and men of strength to mingle strong drink:

*Chapter 16*

10. And the gladness is taken away, and joy out of the plentiful field; and in the vineyards there shall be no singing, neither shall there be shouting: the treaders shall tread out no wine in their presses; I have made their vintage shouting to cease.

*Chapter 24*

7. The new wine mourneth, the vine languisheth, all the merryhearted do sigh.

9. They shall not drink wine with a song; strong drink shall be bitter to them that drink it.

11. There is a crying for wine in the streets; all joy is darkened, the mirth of the land is gone.

*Chapter 25*

6. And in this mountain shall the Lord of hosts make unto all people a feast of fat things, a feast of wines on the lees well refined.

*Chapter 27*

2. In that day sing ye unto her, A vineyard of red wine.

*Chapter 28*

1. Woe to the crown of pride, to the drunkards of Ephraim, whose glorious beauty is a fading flower, which are on the head of the fat valleys of them that are overcome with wine!

7. But they also have erred through wine, and through strong drink are out of the way; the priest and the prophet have erred through strong drink, they are swallowed up of wine, they are out of the way through strong drink; they err in vision, they stumble in judgment.

*Chapter 29*

9. Stay yourselves, and wonder: cry ye out, and cry: they are drunken, but not with wine; they stagger, but not with strong drink.

*Chapter 36*

17. Until I come and take you away to a land like your own land, a land of corn and wine, a land of bread and vineyards.

*Chapter 49*

26. And I will feed them that oppress thee with their own flesh; and they shall be drunken with their own blood, as with sweet wine: and all flesh shall know that I the Lord am thy Saviour and thy Redeemer, the mighty One of Jacob.

*Chapter 51*

21. Therefore hear now this, thou afflicted, and drunken, but not with wine:

*Chapter 55*

1. Ho, every one that thirsteth, come ye to the waters, and he that hath no money; come ye, buy, and eat; yea, come, buy wine and milk without money and without price.

*Chapter 56*

12. Come ye, say they, I will fetch wine, and we will fill ourselves with strong drink; and to-morrow shall be as this day, and much more abundant.

*Chapter 62*

8. The Lord hath sworn by his right hand, and by the arm of his strength, Surely I will no more give thy corn to be meat for thine enemies; and the sons of the strangers shall not drink thy wine, for the which thou hast laboured:

*Chapter 65*

8. Thus saith the Lord, As the new wine is found in the cluster, and one saith, Destroy it not, for a blessing is in it: so will I do for my servants sakes, that I may not destroy them all.

JEREMIAH

*Chapter 13*

12. Therefore thou shalt speak unto them this word: Thou saith the Lord God of Israel, Every bottle shall be filled with wine: and they shall say unto thee, Do we not certainly know that every bottle shall be filled with wine?

*Chapter 23*

9. Mine heart within me is broken because of the prophets; all my bones shake; I am like a drunken man, and like a man whom wine hath overcome, because of the Lord, and because of the words of his holiness.

*Chapter 25*

15. For thus saith the Lord God of Israel unto me; Take the wine cup of this fury at my hand, and cause all the nations, to whom I send thee, to drink it.

*Chapter 31*

12. Therefore they shall come and sing in the height of Zion, and shall flow together to the goodness of the Lord, for wheat, and for wine, and for oil, and for the young of the flock and of the herd: and their soul shall be as a watered garden; and they shall not sorrow any more at all.

*Chapter 35*

2. Go unto the house of the Rechabites, and speak unto them, and bring them into the house of the Lord, into one of the chambers, and give them wine to drink.

5. And I set before the sons of the house of the Rechabites pots full of wine, and cups, and I said unto them, Drink ye wine.

6. But they said, We will drink no wine: For Jonadab the son of Rechab our father commanded us, saying, Ye shall drink no wine, neither ye, nor your sons for ever:

8. Thus have we obeyed the voice of Jonadab the son of Rechab our father in all that he hath charged us, to drink no wine all our days, we, our wives, our sons, nor our daughters;

14. The words of Jonadab the son of Rechab, that he commanded his sons not to drink wine, are performed; for unto this day they drink none, but obey their father's commandment: notwithstanding I have spoken unto you, rising early and speaking; but ye harkened not unto me.

*Chapter 40*

10. As for me, behold, I will dwell at Mizpah, to serve the Chaldeans, which will come unto us: but ye, gather ye wine, and summer fruits, and oil, and put them in your vessels, and dwell in your cities that ye have taken.

12. Even all the Jews returned out of all places whither they were driven, and came to the land of Judah, to Gedaliah unto Mizpah, and gathered wine and summer fruits very much.

*Chapter 48*

33. And the joy and gladness is taken from the plentiful field, and from the land of Moab; and I have caused wine to fail from the wine-presses: none shall tread with shouting; their shouting shall be no shouting.

*Chapter 51*

7. Babylon hath been a golden cup in the Lord's hand, that made all the earth drunken: the nations have drunken of her wine; therefore the nations are mad.

LAMENTATIONS

*Chapter 2*

12. They say to their mothers, Where is corn and wine? when they swooned as the wounded in the streets of the city, when their soul was poured out into their mothers' bosom.

EZEKIEL

*Chapter 27*

18. Damascus was thy merchant in the multitude of the wares of thy making, for the multitude of all riches; in the wine of Helbon, and white wool.

*Chapter 44*

21. Neither shall any priest drink wine, when they enter into the innercourt.

DANIEL

*Chapter 1*

5. And the king appointed them a daily provision of the king's meat, and of the wine which he drank: so nourishing them three years, that at the end thereof they might stand before the king.

8. But Daniel purposed in his heart that he would not defile himself with the portion of the king's meat, nor with the wine which he drank: therefore he requested of the prince of the eunuchs that he might not defile himself.

16. Thus Melzar took away the portion of their meat, and the wine that they should drink; and gave them pulse.

*Chapter 5*

1. Belshazzar the king made a great feast to a thousand of his lords, and drank wine before the thousand.

2. Belshazzar, whiles he tasted the wine, commanded to bring the golden and silver vessels which his father Nebuchadnezzar had taken out of the temple which was in Jerusalem; that the king, and his princes, his wives, and his concubines, might drink therein.

4. They drank wine, and praised the gods of gold, and of silver, of brass, of iron, of wood, and of stone.

23. But hast lifted up thyself against the Lord of heaven; and they have brought the vessels of his house before thee, and thou, and thy lords, thy wives, and thy concubines, have drunk wine in them; and thou hast praised the gods of silver, and gold, of brass, iron, wood, and stone, which see not, nor hear, nor know; and the God in whose hand thy breath is, and whose are all thy ways, hast thou not glorified:

*Chapter 10*

3. I ate no pleasant bread, neither came flesh nor wine in my mouth, neither did I anoint myself at all, till three whole weeks were fulfilled.

HOSEA

*Chapter 2*

8. For she did not know that I gave her corn, and wine, and oil, and multiplied her silver and gold, which they prepared for Baal.

9. Therefore, will I return, and take away my corn in the time thereof, and my wine in the season thereof, and will recover my wool and my flax given to cover her nakedness.

22. And the earth shall hear the corn, and the wine, and the oil; and they shall hear Jezreel.

*Chapter 3*

1. Then said the Lord unto me, Go yet, love a woman beloved of her friend, yet an adulteress, according to the love of the Lord toward the children of Israel, who look to other gods, and love flagrons of wine.

*Chapter 4*

11. Whoredom and wine and new wine take away the heart.

*Chapter 7*

5. In the day of our king the prices have made him sick with bottles of wine; he stretched out his hand with scorners.

14. And they have not cried unto me with their heart, when they howled upon their beds; they assemble themselves for corn and wine, and they rebel against me.

*Chapter 9*

2. The floor and the winepress shall not feed them, and the new wine shall fail in her.

4. They shall not offer wine offerings to the Lord, neither shall they be pleasing unto him: their sacrifices shall be unto them as the bread of mourners; all that eat thereof shall be polluted: for their bread for their soul shall not come into the house of the Lord.

*Chapter 14*

7. They that dwell under his shadow shall return; they shall revive as the corn, and grow as the vine: the scent thereof shall be as the wine of Lebanon.

JOEL

*Chapter 1*

5. Awake, ye drunkards, and weep; and howl, all ye drinkers of wine, because of the new wine: for it is cut off from your mouth.

10. The field is wasted, the land mourneth; for the corn is wasted: the new wine is dried up, the oil languisheth.

*Chapter 2*

19. Yea, the Lord will answer and say unto his people, Behold, I will send you corn, and wine, and oil, and ye shall be satisfied therewith: and I will no more make you a reproach among the heathen:

24. And the floors shall be full of wheat, and the fats shall overflow with wine and oil.

*Chapter 3*

3. And they have cast lots of my people; and have given a boy for an harlot, and sold a girl for wine, that they might drink.

18. And it shall come to pass in that day, that the mountains shall drop down new wine, and the hills shall flow with milk, and all the rivers of Judah shall flow with waters, and a fountain shall come forth of the house of the Lord, and shall water the valley of Shittim.

AMOS

*Chapter 2*

8. And they lay themselves down upon clothes laid to pledge by every altar, and they drink the wine of the condemned in the house of their god.

12. But ye gave the Nazarites wine to drink; and commanded the prophets, saying, Prophecy not.

*Chapter 5*

11. Forasmuch therefore as your treading is upon the poor, and ye take from him burdens of wheat: ye have built houses of hewn stone, but ye shall not dwell in them; ye have planted pleasant vineyards, but ye shall not drink wine of them.

*Chapter 6*

6. That drink wine in bowls, and anoint themselves with the chief ointments: but they are not grieved for the affliction of Joseph.

*Chapter 9*

13. Behold, the days come, saith the Lord, that the plowman shall overtake the reaper, and the treader of grapes him that soweth seed; sweet wine, and all the hills shall melt.

14. And I will bring again the captivity of my people of Israel, and they shall build the waste cities, and inhabit them; and they shall plant vineyards, and drink the wine thereof; they shall also make gardens, and eat the fruit of them.

MICAH

*Chapter 2*

11. If a man walking in the spirit and falsehood do lie, saying, I will prophesy unto thee of wine and of strong drink; he shall even be the prophet of this people.

*Chapter 6*

15. Thou shalt sow, but thou shalt not reap; thou shalt tread the olives, but thou shalt not anoint thee with oil; and sweet wine, but shall not drink wine.

HABAKKUK

*Chapter 2*

5. Yea also, because he transgresseth by wine, he is a proud man, neither keepeth at home, who enlargeth his desire as hell, and is as death, and cannot be satisfied, but gathereth unto him all nations, and heapeth unto him all people.

15. Woe unto him that giveth his neighbor drink, that puttest thy bottle to him, and makest him drunken also, that thou mayest look on their nakedness!

ZEPHANIAH

*Chapter 1*

13. Therefore their goods shall become a booty, and their houses a desolation: they shall also build houses, but not inhabit them; and they shall plant vineyards, but not drink the wine thereof.

HAGGAI

*Chapter 1*

And I called for a drought upon the land, and upon the mountains, and upon the corn, and upon the new wine, and upon the oil, and upon that which the ground bringeth forth, and upon men, and upon cattle, and upon all the labour of the hands.

ZECHARIAH

*Chapter 9*

15. The Lord of hosts shall defend them; and they shall devour, and subdue with sling stones; and they shall drink, and make a noise as through wine; and they shall be filled like bowls, and as the corners of the altar.

17. For how great is his goodness, and how great is his beauty: corn shall make the young men cheerful, and new wine the maids.

*Chapter 10*

7. And they of Ephraim shall be like a mighty man, and their heart shall rejoice as through wine: yea, their children shall see it, and be glad; their heart shall rejoice in the Lord.

MATTHEW

*Chapter 9*

17. Neither do men put new wine into old bottles: else the bottles break, and the wine runneth out, and the bottles perish; but they put new wine into new bottles, and both are preserved.

*Chapter 11*

19. The Son of man came eating and drinking, and they say, Behold a man gluttonous, and a winebibber, a friend of publicans and sinners. But wisdom is justified of her children.

*Chapter 26*

29. But I say unto you, I will not drink henceforth of this fruit of the vine, until that day when I drink it new with you in my Father's kingdom.

MARK

*Chapter 2*

22. And no man putteth new wine into old bottles: else the new wine doth burst the bottles, and the wine is spilled, and the bottles will be marred: but new wine must be put into new bottles.

*Chapter 14*

25. Verily I say unto you, I will drink no more of the fruit of the vine, until that day that I drink it new in the kingdom of God.

*Chapter 15*

23. And they gave him to drink wine mingled with myrrh: but he received it not.

LUKE

*Chapter 1*

15. For he shall be great in the sight of the Lord, and shall drink neither wine nor strong drink; and he shall be filled with the Holy Ghost, even from his mother's womb.

*Chapter 5*

37. And no man putteth new wine into old bottles; else the new wine will burst the bottles, and be spilled, and the bottles shall perish.

38. But new wine must be put into new bottles; and both are preserved.

39. No man also having drunk old wine straightway desireth new: for he saith, The old is better.

*Chapter 7*

33. For John the Baptist came neither eating bread nor drinking wine; and ye say, He hath a devil.

34. The Son of man is come eating and drinking; and ye say, Behold a gluttonous man, and a winebibber a friend of publicans and sinners!

*Chapter 10*

34. And went to him, and bound up his wounds, pouring in oil and wine, and set him on his own beast, and brought him to an inn, and took care of him.

*Chapter 22*

18. For I say unto you, I will not drink of the fruit of the wine, until the kingdom of God shall come.

JOHN

*Chapter 2*

3. And when they wanted wine, the mother of Jesus saith unto him, They have no wine.

9. When the ruler of the feast had tasted the water that was made wine, and knew not whence it was: (but the servants which drew the water knew;) the governor of the feast called the bridegroom,

10. And saith unto him, Every man at the beginning doth set forth good wine; and when men have well drunk, then that which is worse: but thou hast kept the good wine until now.

*Chapter 4*

46. So Jesus came again into Cana of Galilee where he made the water wine. And there was a certain nobleman whose son was sick at Capernaum.

ACTS

*Chapter 2*

13. Others mocking said, These men are full of new wine.

ROMANS

*Chapter 14*

21. It is good neither to eat flesh, nor to drink wine, nor any thing whereby thy brother stumbleth, or is offended, or is made weak.

EPHESIANS

*Chapter 5*

18. And be not drunk with wine, wherein is excess; but be filled with the Spirit;

I TIMOTHY

*Chapter 3*

3. Not given to wine, no striker, not greedy of filthy lucre; but patient, not a brawler, not covetous;

8. Likewise must the deacons be grave, not doubletongued, not given to much wine, not greedy of filthy lucre;

*Chapter 5*

23. Drink no longer water, but use a little wine for thy stomach's sake and thine often infirmities.

TITUS

*Chapter 1*

7. For a bishop must be blameless, as the steward of God; not self-willed, not soon angry, not given to wine, no striker, not given to filthy lucre;

*Chapter 2*

3. The aged woman likewise, that they be in behaviour as becometh holiness, not false accusers, not given to much wine, teachers of good things;

I PETER

*Chapter 4*

3. For the time past of our life may suffice as to have wrought the will of the Gentiles, when we walked in lasciviousness, lusts, excess of wine, revellings, banquetings, and abominable idolatries:

REVELATION

*Chapter 6*

6. And I heard a voice in the midst of the four beasts say, A measure of wheat for a penny, and three measures of barley for a penny; and see thou hurt not the oil and the wine.

*Chapter 14*

8. And there followed another angel, saying, Babylon is fallen, is fallen, that great city, because she made all nations drink of the wine of the wrath of her fornication.

10. The same shall drink of the wine of the wrath of God, which is poured out without mixture into the cup of his indignation; and he shall be tormented with fire and brimstone in the presence of the holy angels, and in the presence of the Lamb:

19. And the angel thrust in his sickle into the earth, and gathered the vine of the earth, and cast it into the great winepress of the wrath of God.

20. And the winepress was trodden without the city, and blood came out of the winepress, even unto the horse bridles, by the space of a thousand and six hundred furlongs.

*Chapter 16*

19. And the great city was divided into three parts, and the cities of the nations fell: and great Babylon came in remembrance before God, to give unto her the cup of the wine of the fierceness of his wrath.

*Chapter 17*

2. With whom the kings of the earth have committed fornication, and the inhabitants of the earth have been made drunk with the wine of her fornication.

*Chapter 18*

3. For all nations have drunk of the wine of the wrath of her fornication, and the kings of the earth have committed fornication with her, and the merchants of the earth are waxed rich through the abundance of her delicacies.

13. And cinnamon, and odours, and ointments, and frankincense, and wine, and oil, and fine flour, and wheat, and chariots, and salves, and souls of men.

*Chapter 19*

15. And out of his mouth goeth a sharp sword, that with it he should smite the nations: and he shall rule them with a rod of iron: and he treadeth the winepress of the fierceness and wrath of Almighty God.

Mr. SHEPPARD. Mr. President, the Senator from Maryland [Mr. BRUCE] has repeated all the old arguments against prohibition—arguments which were repudiated by the American people when they adopted prohibition; first, when they adopted it in more than a majority of the States, and then when they made it a part of the American Constitution.

The practical question before us is this: Is the enforcement work of prohibition officials in the United States effective?

Take the figures for the last fiscal year, the year ending June 30, 1927, as given us by the National Commissioner of Prohibition, Dr. J. M. Doran. He tells us in his annual report that prohibition agents made 64,986 arrests during the year ending June 30, 1927, and seized 7,139 automobiles, valued at $3,529,296.70, and 353 boats, valued at $316,323; that as a result of the work of such agents 51,945 prohibition cases against individuals were handled in the Federal courts; that 36,546 persons were convicted, of which number 11,818 received jail sentences; that the courts imposed sentences aggregating 4,477 years and fines amounting to $5,775,225.48. I have not the figures for State prosecutions and convictions.

It may fairly be said that a law is being enforced if the great majority of the people obey it and if a great majority of the indictments and captures of its violators result in convictions.

Prohibition in the United States fulfills both these conditions. The fact that arrests for drunkenness have increased does not mean that drunkenness is increasing. It is a well-known fact that some decades ago, before the last great movement for prohibition began—the movement beginning with its adoption first by precincts and counties, and then by States, and then by the Nation as a whole—drinking was practically universal and drunkenness in various stages quite general. Comparatively few arrests were made for drunkenness, and those only in instances where intoxication was very pronounced.

Again, Mr. President, it is unfair to take the year 1920 as a basis of comparison and calculation in estimating whether there has been an increase in drunkenness under national prohibition. In the year 1920—the year in whose beginning nation-wide prohibition was adopted—the lawless liquor element was not organized to meet the new situation. The supplies purchased in anticipation of a long dry spell had not been exhausted. The methods of redistilling denatured alcohol had not been devised. Conditions then were radically different from what they are to-day. Naturally there was a lull in the activity of the liquor traffic, and naturally there was an abnormal falling off in consumption of liquor during 1920. The liquor traffic was in a stage of transition between a lawful status and an unlawful status. Naturally it required something like the entire compass of a year to adapt itself to the new conditions and to begin another career of law violation, exemplifying the same lawless spirit that had always characterized it in the past.

Much ado has been made over the number of dismissals of officials from the Federal Prohibition Service since nation-wide prohibition began, in an effort to demonstrate what some persons have been pleased to term "widespread corruption among these prohibition officials." What are the facts?

Approximately 15,000 different persons were employed in the Federal prohibition service from the beginning of national prohibition in 1920 to October 1, 1927.

Of these 15,000 prohibition officials, 29 were dismissed in that period of nearly seven years for false statements on application for appointment, or less than one-fifth of 1 per cent.

Of these 15,000 prohibition officials, 158 were dismissed in that period of nearly seven years for extortion, bribery, or soliciting money, or a little more than 1 per cent.

Of these 15,000 prohibition officials, 90 were dismissed in that period of nearly seven years for falsification of expense accounts, or a little more than one-half of 1 per cent.

Of these 15,000 prohibition officials, 81 were dismissed in that period of nearly seven years for collusion and conspiracy, including conspiracy to violate the national prohibition act, to extort bribes from violators, to defraud the United States Government, and so forth, or a little more than one-half of 1 per cent.

Of these 15,000 prohibition officials, 61 were dismissed in that period of nearly seven years for illegal disposition of liquor and other property, or a little less than one-half of 1 per cent.

Of these 15,000 prohibition officials, 6 were dismissed in that period of nearly seven years for embezzlement, or about one-twenty-fifth of 1 per cent.

Of these 15,000 prohibition officials, 101 were dismissed in that period of nearly seven years for causes listed in the records of the Prohibition Unit under "dereliction of duty," such causes as failure to report violations of the national prohibition act, leaving guard duty without permission, and so forth, or about two-thirds of 1 per cent.

Of these 15,000 prohibition officials, 8 were dismissed in that period of nearly seven years for robbery of warehouses, or about one-eighteenth of 1 per cent.

Of these 15,000 prohibition officials, 300 were dismissed in that period of nearly seven years for intoxication and misconduct, the latter term covering immorality, assault, arrest for speeding, gambling, fighting, creating disturbance, and so forth, or 2 per cent.

Of these 15,000 prohibition officials, 8 were dismissed in that period of nearly seven years for violation of the national prohibition act, or about one-eighteenth of 1 per cent.

Of these 15,000 prohibition officials, 17 were dismissed in that period of nearly seven years for disclosing confidential information, or a little more than one-eighth of 1 per cent.

Of these 15,000 prohibition officials, 196 were dismissed in that period of nearly seven years for unsatisfactory service and insubordination, or about 1½ per cent.

Of these 15,000 prohibition officials, 8 were dismissed in that period of nearly seven years for acceptance of gratuities, or about one-eighteenth of 1 per cent.

Twenty-two were dismissed for submission of false reports, or a little less than one-sixth of 1 per cent.

Thirteen were dismissed for theft, or a little less than one-tenth of 1 per cent.

Six were dismissed for contempt of court, or about one twenty-fifth of 1 per cent.

Nine were dismissed for assault, or a little more than one-sixteenth of 1 per cent.

Five were dismissed for perjury or subornation of perjury, or one-thirtieth of 1 per cent.

Five were dismissed for political activity, or one-thirtieth of 1 per cent.

Seven were dismissed in that period for misuse of firearms, or about one twenty-first of 1 per cent.

One was dismissed for failure to file income-tax returns, or one one-hundred-and-fiftieth of 1 per cent.

Three were dismissed for former criminal record, or one-fiftieth of 1 per cent.

One was dismissed for false pretenses—that is, issuing worthless checks—or one one-hundred-and-fiftieth of 1 per cent.

I have taken these figures, except the percentages, from the records of the Prohibition Unit. The percentages represent my own calculations.

These figures do not include the narcotic division but apply only to prohibition workers. They show a total number of dismissals for all causes among the prohibition forces of 1,135 out of about 15,000 employees through a period of seven years, or about 8 per cent, an average of but little more than 1 per cent a year.

So the charges of wholesale corruption and crime among prohibition officials are not borne out by these figures.

From January 16, 1920, the date on which nation-wide prohibition began, to December 1, 1927, national prohibition officers made more than 400,000 arrests of violators of prohibition laws, many of them criminals of the most dangerous character. The antiprohibitionists have told us much about the murderous tendencies of the prohibition-enforcement officials. In clashes between the prohibition officials and criminals about 125 persons whom they were attempting to arrest have been killed during these seven years, and about 50 prohibition officials have been killed. Of those death cases brought about by some action of the prohibition officials, 74 presented facts so clearly exonerating the officers that no prosecution was made; and yet a magazine article in the East has been based upon the contention that among these prohibition officials were many murderers!

In 29 of these cases there were trials and acquittals of the prohibition officials.

In two cases both parties to the encounter were killed.

One case was dismissed on account of the death of the defendant.

In five cases there were convictions of the officers involved. One of those convictions was on an indictment for second-degree murder and resulted in a sentence of three years in the penitentiary. Another was for manslaughter on the part of an officer in Massachusetts, the governor commuting the sentence after part of it had been served.

Another was for assault and battery, presumably with intent to murder, resulting in a sentence of six months to three years in the penitentiary. The case was appealed with what result I do not know. The fourth conviction was for involuntary manslaughter, resulting in a fine of $100 and costs. An appeal was taken, with the result as yet undetermined. The fifth conviction was on a plea of guilty to a charge of involuntary manslaughter, and the sentence was for one year to life. It did not involve the prohibition act. It grew out of the death of a person whose car was struck by a car driven by the prohibition official.

Ten cases were pending in the courts on December 1, 1927, and the outcome is not yet known. In one of these a trial and acquittal have occurred since that time.

In seven cases the Prohibition Unit has no record as to disposition. One of these grew out of the deaths of two persons in a launch which collided with a launch driven by a prohibition official. In a few of these cases more than one official took part.

Considering the more than 400,000 arrests by prohibition enforcement officials of the outlaws who make or vend illicit liquor, many of them desperate, vicious, murderous to the last degree, it is remarkable that there have been so comparatively few fatalities. Especially is this true when it is recalled that these criminals have killed nearly 50 prohibition officials while the latter were endeavoring to enforce the prohibition laws.

The figures I have given do not include the narcotic enforcement officers.

The Senator from Maryland sends a message from the Senate Chamber to the wets throughout the United States. He tells them to be of good cheer, that everything is going their way.

Mr. President, everything goes the antiprohibition way between election days. Everything goes the prohibition way on election days. With such a condition prohibitionists are entirely contented.

They tell us of references in the Bible to intoxicating liquor. There is a clear distinction observable throughout that Sacred Book between fermented and unfermented drinks. The former it unsparingly condemns. The Bible itself finds one of its strongest foundations in the Ten Commandments, most of which are prohibitions, beginning with the prohibitory words "Thou shalt not." When God said, "Thou shalt not kill" He said also in effect, contemplating the various forms of the destruction of man by man, "Thou shalt not tolerate a traffic in a poison which kills."

## PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed the following acts and joint resolution:

On April 21, 1928:

S. 2752. An act to amend section 80 of the Judicial Code to create a new judicial district in the State of Indiana, and for other purposes.

On April 23, 1928:

S. 754. An act for the relief of certain Porto Rican taxpayers;

S. 2858. An act to authorize the use of certain public lands by the town of Parco, Wyo., for a public aviation field;

S. 3194. An act to establish the Bear River migratory-bird refuge;

S. 3224. An act to extend the provisions of the forest exchange act, approved March 20, 1922 (42 Stat. 465), to the Crater National Forest, in the State of Oregon;

S. 3225. An act to enlarge the boundaries of the Crater National Forest; and

S. J. Res. 72. Joint resolution to grant permission for the erection of a memorial statue of Cardinal Gibbons.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes; requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. DICKINSON of Iowa, Mr. WASON, Mr. SUMMERS of Washington, Mr. BUCHANAN, and Mr. SANDLIN were appointed managers on the part of the House at the conference.

## AGRICULTURAL DEPARTMENT APPROPRIATIONS

Mr. McNARY. I ask the Chair to lay before the Senate the action of the House of Representatives on the agricultural appropriation bill.

The PRESIDING OFFICER (Mr. BLEASE in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. McNARY. I move that the Senate insist on its amendments, agree to the conference asked by the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. McNARY, Mr. JONES, Mr. KEYES, Mr. OVERMAN, and Mr. HARRIS conferees on the part of the Senate.

CONSTRUCTION OF VESSELS BY TRANSOCEANIC CORPORATION (S. DOC. NO. 87)

The PRESIDING OFFICER laid before the Senate a communication from the chairman of the United States Shipping Board, transmitting, in response to Senate Resolution 125 of January 27, 1928 (submitted by Mr. BINGHAM), a report relative to the proposal of the Transoceanic Corporation in connection with the construction of fast passenger vessels, which was referred to the Committee on Commerce and ordered to be printed with illustrations.

ONA HARRINGTON

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 2126) to provide for compensation for Ona Harrington for injuries received in an airplane accident, which was, on page 1, line 5, after the word "appropriated," to insert "and in full settlement against the Government."

Mr. DENEEN. I move that the Senate concur in the House amendment.

The motion was agreed to.

APPROPRIATIONS FOR LEGISLATIVE BRANCH

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12875) making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1929, and for other purposes.

The PRESIDING OFFICER. The clerk will read the bill for action on the amendments of the committee.

The Chief Clerk proceeded to read the bill.

The first amendment of the Committee on Appropriations was, under the subhead "Office of the Vice President," on page 2, line 5, after the figures "$4,200," to strike out "assistant"; and in the same line, after the figures "$2,080," to insert "assistant," so as to read:

Salaries: Secretary to the Vice President, $4,200; clerk, $2,080; assistant clerk, $1,940; assistant clerk, $1,830; in all, $10,050.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Secretary," on page 2, line 16, after the words "Journal clerk," to strike out "$4,200" and insert "$4,500"; in the same line, after the figures "$3,150," to insert "chief bookkeeper, $3,000"; in line 18, after the words "printing clerk," to strike out "$3,000" and insert "$3,150"; in line 19, after the words "file clerk," to strike out "chief bookkeeper"; in line 24, after the figures "$1,770," to strike out "assistant keeper of stationery, $2,360" and insert "two assistant keepers of stationery, at $1,800 each"; on page 3, line 2, after the words "assistant in library" to strike out "$1,520" and insert "$1,800"; in line 3, after the word "laborers," to strike out "four" and insert "one, $1,350, three"; in the same line, after the word "each," to strike out "two at $1,010 each" and insert "one, $1,010"; and in line 5, after the words "in all," to strike out "$102,620" and insert "$103,910," so as to make the paragraph read:

Salaries: Secretary of the Senate, including compensation as disbursing officer of salaries of Senators and of contingent fund of the Senate, $6,500; assistant secretary, Henry M. Rose, $4,500; chief clerk, who shall perform the duties of reading clerk, $5,500; financial clerk, $5,000; principal clerk, $3,420; assistant financial clerk, $4,200; minute and Journal clerk, $4,500; legislative clerk, $3,150; chief bookkeeper, $3,000; librarian, $3,000; enrolling clerk, $3,150; printing clerk, $3,150; executive clerk, $2,890; file clerk, and assistant Journal clerk, at $2,880 each; first assistant librarian, and keeper of stationery, $2,780 each; assistant librarian, $2,150; skilled laborer, $1,520; clerks—three at $2,880 each, one at $2,590, one at $2,460, one at $2,100, one at $1,800, one at $1,770; two assistant keepers of stationery, at $1,800 each; assistant in stationery room, $1,520; messenger in library, $1,310; special officer, $2,150; assistant in library, $1,800; laborers—one at $1,350, three at $1,140 each, one at $1,010, one in stationery room at $1,440; in all, $103,910.

Mr. WARREN. Mr. President, I send to the desk an amendment to the amendment.

The PRESIDING OFFICER. The clerk will read.

The CHIEF CLERK. On page 2, line 23, in the items for clerks in the office of the Secretary of the Senate, strike out "one at $2,100" and insert "two at $2,100 each."

The amendment to the amendment was agreed to.

Mr. WARREN. I ask the Senate to reject the first amendment of the committee, on page 3, line 3.

The PRESIDING OFFICER. Without objection, the amendment is disagreed to.

Mr. WARREN. I move to strike out "four" and insert in lieu thereof "two at $1,350 each, two."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, under the subhead "Committee employees," on page 3, line 25, after the words "assistant clerk," to strike out "$2,570" and insert "$2,750," so as to read:

Claims: Clerk, $3,300; assistant clerk, $2,750; assistant clerk, $2,360; two assistant clerks, at $1,830 each.

The amendment was agreed to.

The next amendment was, on page 4, line 17, after the word "at," to strike out "$2,360" and insert "$3,000," so as to read:

Finance: * * * two experts (one for the majority and one for the minority) at $3,000 each.

The amendment was agreed to.

The next amendment was, on page 5, line 5, after the words "assistant clerk," to strike out "$1,940" and insert "$2,150," so as to read:

Irrigation and reclamation: Clerk, $3,300; assistant clerk, $2,150; assistant clerk, $1,830; additional clerk, $1,520.

The amendment was agreed to.

The next amendment was, on page 5, line 13, after the figures "$2,590," to insert "assistant clerk, $2,400"; and in line 14, after the figures "$1,940," to strike out "three" and insert "two," so as to read:

Military Affairs: Clerk, $3,300; assistant clerk, $2,590; assistant clerk, $2,400; additional clerk, $1,940; two assistant clerks, at $1,830 each.

The amendment was agreed to.

The next amendment was, on page 6, line 16, after the words "assistant clerk," where it occurs the first time, to strike out "$1,940" and insert "$2,150," so as to read:

Territories and Insular Possessions: Clerk, $3,300; assistant clerk, $2,150; assistant clerk, $1,830; additional clerk, $1,520.

The amendment was agreed to.

The next amendment was, on page 6, line 17, to change the total appropriation for clerks and messengers to Senate committees from $380,940 to $383,390.

The amendment was agreed to.

Mr. KING. Mr. President, I want to ask the Senator from Wyoming a question. I see on pages 3, 4, 5, and 6 a large number of increases in the number of clerks. In view of the fact that we shall soon adjourn and Congress will not be in session until next December, and that when it meets then it will continue in session only until the 4th of the following March, I was wondering what the necessity was for this large increase in the number of clerks.

Mr. WARREN. There have been some changes back and forth, but the total increase in the bill is less, I think, than $8,000.

Mr. CURTIS. There is no increase in the number of clerks.

Mr. WARREN. One or two are taken out of those provided for in resolutions, but it makes no difference in the amount.

Mr. CURTIS. Clerks who have heretofore been authorized in resolution, who have been paid out of the contingent fund, have been placed in the bill.

Mr. KING. May I say to the Senator that a number of the clerks provided for in resolutions were only temporary, and it was understood that they were for some temporary purpose?

Mr. WARREN. There are some of those left. The ones to whom I have alluded are those put on temporarily to take others' places, and they are wanted permanently, so we put them in the bill rather than have them taken care of in resolutions.

The next amendment was, under the subhead "Office of Sergeant at Arms and Doorkeeper," on page 7, line 7, after the figures "$6,500" to strike out "Assistant Doorkeeper, $4,200; Acting Assistant Doorkeeper, $4,200," and insert "two Assistant Sergeants at Arms, at $4,500 each," so as to read:

Salaries: Sergeant at Arms and Doorkeeper, $6,500; two Assistant Sergeants at Arms, at $4,500 each.

The amendment was agreed to.

The next amendment was, on page 7, at the end of line 12, to change the compensation of the messenger at the card door from $2,400 to $2,580.

The amendment was agreed to.

Mr. WARREN. Mr. President, I send to the desk an amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 7, line 15, strike out "$3,600" and insert in lieu thereof $4,000."

The amendment was agreed to.

The next amendment was, on page 7, line 20, to change the compensation of the laborer in charge of private passage from $1,340 to $1,440.

The amendment was agreed to.

The next amendment was, on page 7, at the end of line 23, to change the compensation of the chief telephone operator, from $2,040 to $2,160.

The amendment was agreed to.

Mr. CURTIS. Mr. President, I offer the following amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 8, line 3, strike out "$1,240" and insert in lieu thereof "$1,500."

The amendment was agreed to.

The next amendment was, on page 8, at the end of line 6, to change the total appropriation for the office of Sergeant at Arms and Doorkeeper from $206,245.30 to $209,155.30.

The amendment was agreed to.

Mr. WARREN. I offer another amendment.

The PRESIDING OFFICER. The Senator from Wyoming offers an amendment, which the clerk will state.

The CHIEF CLERK. On page 8, line 13, strike out "eight" and insert in lieu thereof "seven."

The amendment was agreed to.

The next amendment was, under the subhead "Folding room," on page 8, line 16, after the word "foreman," to strike out "$1,940" and insert "$2,160"; in the same line, after the word "assistant," to strike out "$1,730" and insert "$1,940"; and at the end of line 18 to strike out "$22,340" and insert "$22,770," so as to read:

Salaries: Foreman, $2,160; assistant, $1,940; clerk, $1,520; folders—7 at $1,310 each, 7 at $1,140 each; in all, $22,770.

The amendment was agreed to.

Mr. WARREN. Mr. President, I offer a committee amendment which was overlooked.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 9, line 3, strike out "$10,000" and insert in lieu thereof "$13,000."

The amendment was agreed to.

The next amendment was, on page 9, line 5, to increase the appropriation for driving, maintenance, and operation of an automobile for the Vice President from $3,500 to $4,000.

The amendment was agreed to.

The next amendment was, on page 9, at the end of line 24, to strike out "$150,000" and insert "$250,000," so as to read:

For expenses of inquiries and investigations ordered by the Senate, including compensation to stenographers of committees, at such rate as may be fixed by the Committee to Audit and Control the Contingent Expenses of the Senate, but not exceeding 25 cents per hundred words, $250,000.

The amendment was agreed to.

The next amendment was, on page 10, line 2, to change the item for reporting the debates and proceedings of the Senate from "$50,844" to "$55,340."

The amendment was agreed to.

The next amendment was, on page 10, at the end of line 9, to strike out "$35,000" and insert "$40,000," so as to read:

For repairs, improvements, equipment, and supplies for Senate kitchens and restaurants, Capitol Building and Senate Office Building, including personal and other services, to be expended from the contingent fund of the Senate, under the supervision of the Committee on Rules, United States Senate, $40,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Architect of the Capitol," on page 23, line 3, after the word "Capitol," to strike out "$6,000" and insert "$7,500"; and at the end of line 8 to strike out "$31,052.80" and insert "$32,552.80," so as to read:

Salaries: Architect of the Capitol, $7,500; chief clerk, $3,150; civil engineer, $2,770; two clerks, at $1,840 each; compensation to disbursing clerk, $1,000; laborers—one at $1,104, two at $1,010 each, two at $950 each; forewoman of charwomen, $760; 21 charwomen, at $412.80 each; in all, $32,552.80.

The amendment was agreed to.

The next amendment was, under the subhead "Capitol Buildings and Grounds," on page 23, after line 21, to insert:

Senate wing reconstruction: To rearrange and reconstruct the Senate wing of the Capitol in accordance with the report of the Architect of the Capitol contained in Senate Document No. 161, Sixty-eighth Congress, second session, with such alterations as the Senate Committee on Rules may from time to time approve, to be immediately available and to remain available until June 30, 1930, $500,000, to be expended by the Architect of the Capitol, under the direction and supervision of the said Committee on Rules.

Mr. KING. Mr. President, I would like to ask whether that plan has been fully approved, whether it has been adopted, or whether this is just an authorization of an appropriation which will be provided for later?

Mr. WARREN. Of course, the committee had before it the plans a month or two ago. They have been discussed, not only for a month or two but for a long time. Of course, this is a rather unusual item, because it is a large amount, and there is nobody to whom we may send it for indorsement except the Senate itself. So nothing has been done toward getting an estimate from the Budget Bureau for this.

Mr. KING. Mr. President, I do not like to object to this appropriation, but I confess I have some misgivings as to this plan and about having it adopted. I am sure very few Senators have given any consideration to the matter, or any consideration to the cost. Undoubtedly there were some reasons impelling the committee to make the recommendation, but for myself I do not feel liking voting for it with the limited information which is now available.

Mr. COPELAND. Mr. President, I can well share the feelings of the Senator from Utah, except for the fact that this has been very well considered. Let me review the history.

In the Sixty-eighth Congress I presented a resolution asking for an examination of the Senate Chamber and the drawing of plans with reference to a more livable place. That resolution was adopted in the Sixty-eighth Congress, and Carrere & Hastings, the architects who drew the plans for the Senate Office Building and House Office Building and who have drawn the plans for various changes in the Capitol Building, famous architects, drew plans.

Those plans were submitted to various architects to see how much it would cost to carry them out. Mr. Hastings came before the committee, and I have before me a report of the extensive hearing held when Mr. Hastings and other architects appeared. It was demonstrated to the satisfaction of the committee that this work could be done, according to the statement of Mr. Hastings, for $450,000. To be on the safe side we adopted a round figure of $500,000. The work is to be carried out under the direction of the Committee on Rules.

What is to be accomplished? In 12 years 36 Senafors have died in office, and most of the men who have died have been Senators who have spent much of their time in this Chamber. There is no Senator here to-day who spends more time in the Chamber attending to his duties than does the Senator from Utah. Unfortunately, the very men who spend most of their time here are the ones most likely to suffer because of physical conditions which are existent.

The plan provides for carrying this Chamber out to the north wall of the Capitol. It will be interesting to the Senator from Utah and other Senators who have not studied it to know that that was the original plan. The Chamber was originally to have gone to the north wall. The contracts were let and the foundations were in and when the building was completed to this story, a change was decided upon, and it was determined to make a thermos bottle out of the Chamber instead of a livable place. The present plan will make a semicircular chamber, and at the north wall there will be no galleries provided for in the plan, but there will be three noble windows, which will reach from the floor to the ceiling, 20 feet wide. There will be 60 feet of glass reaching from the floor to the ceiling, looking out to the north sky.

Mr. President, I hope the amendment will be adopted and the work done. Since I have been a Member of this body I have been sorry I am a doctor. I can not help appraising the health of the men in this Chamber. I have prophesied to myself almost without failure the deaths that would occur. It saddens me now when I look into the faces of men here to see how health is melting from them and, with each session of the Senate, how they break down physically.

I say to my friend from Utah and to every other Senator that there is no more important thing that can be done than

to change this impossible place into a livable place. We have gone far enough in our investigations to know that we have a sensible plan. Mr. Hastings has consulted with many of the great architects of the country, and we are told that when this plan is modified we will have the finest legislative chamber in the world from the artistic and architectural standpoint and also from the standpoint of health.

I do not think I need to say more. I have bothered Senators collectively and individually about this matter ever since I have been in the Senate. Here we have it before us. We have it in our hands to convert this Chamber into a livable place. The press representatives in the press gallery now have 2,100 square feet in their quarters. Under the new plan they will have nearly 3,000 square feet. They will be brought into a livable place, too. All the galleries will be enlarged. There will be more gallery space than we have at the present time, and every part of the Chamber will be a place of health promotion and not one of health detraction as it is at present.

Mr. President, I hope the amendment will be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment of the Committee on Appropriations was, on page 25, line 15, under "Senate Office Building," to strike out "$87,854" and insert in lieu thereof "$89,854."

The amendment was agreed to.

The PRESIDING OFFICER. This concludes the formal committee amendments.

The reading of the bill was concluded.

Mr. WARREN. Mr. President, I send to the desk the following amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 24, line 19, after the word "Capitol," insert "without compliance with sections 3707 and 3744 of the Revised Statutes of the United States."

The amendment was agreed to.

Mr. WARREN. I ask unanimous consent that the clerks at the desk be authorized to correct the totals in the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOSES. Mr. President, I offer the following amendment, which I send to the desk.

Mr. WARREN. It is a committee amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 33, line 25, after the word "pay," insert the following:

And hereafter said leave shall be at the current rate for the regular position at the time leave is granted.

Mr. KING. Mr. President, will the Senator please explain the purpose of the amendment?

Mr. MOSES. It is in order to do away with the great variety of accounting that has to be made for the annual leave of employees of the Government Printing Office because of differing rates at which they are paid, whether night work or during the rush work of the CONGRESSIONAL RECORD when Congress is in session. This is to provide a salaried annual leave basis which shall be considered on the same basis as that of other employees.

Mr. KING. Is it a committee amendment?

Mr. MOSES. Yes; and also the next amendment which I am about to offer.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from New Hampshire.

The amendment was agreed to.

Mr. MOSES. I send to the desk another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 37, line 9, insert the following:

Section 91, chapter 5, title 20 of the Code of Laws of the United States is hereby amended so as to include and apply to the Government Printing Office.

Mr. MOSES. This amendment provides simply that the laboratory of research and experiment of the Government Printing Office shall be made available for the manufactures of paper envelopes and other printing material on exactly the same terms as laboratories and bureaus of research in the other departments of the Government, so that prospective bidders for materials supplied by the Government Printing Office shall have an opportunity to have their materials tested at the laboratory of the Printing Office itself and a report thereon when they submit their bids. It will involve no expense whatever.

Mr. KING. It will not result in a duplication of activities?

Mr. MOSES. No. On the contrary, it will undoubtedly very greatly simplify the work of bidding for materials supplied by the Government Printing Office.

The amendment was agreed to.

Mr. OVERMAN. Mr. President, we have increased the salaries of quite a number of employees, but nowhere have the doorkeepers been taken care of. I send to the desk an amendment to increase the salaries of five doorkeepers, and I hope the Senate will adopt the amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 7, line 11, strike out "$2,150" and insert in lieu thereof "$2,400."

Mr. WARREN. Mr. President, before proceeding further I think I ought to say that we have sent to the desk as committee amendments certain authorizations covering certain matters which have been offered, in order to avoid any possible question as to whether they were or were not in order. Those amendments have been agreed to in the regular order.

The time has come when miscellaneous amendments may be offered. I want it understood, so far as the committee is concerned, that it believes it is doing justice in the amendments which have been presented, especially as to salaries. Of course, we have employees in this Chamber and connected with the Senate in whom we have great confidence and employees whom we love. At various times they get various ideas about what they should have in the matter of increased salaries. It is hard for a Senator to resist the appeals of Senate employees, especially those who may come from his home town, community, or State. But somewhere, some time, somebody has to try to arrange for these things in an orderly way, so that we may be just to all and unjust to none.

There are some points which come up involving the expense of carrying on the business of the Senate outside; but I am speaking now with reference to the salaries of Senate employees in and about the Chamber. Of course, the chairman of the Appropriations Committee is in the hands of the Senate. Anyone who serves on the Committee on Appropriations is likewise in the hands of the Senate. But if each one, without taking into consideration others, undertakes to bring about salary increases indiscriminately, we can readily appreciate what resulting turmoil might and probably would follow. All that the chairman of the committee can do is to state what he believes is proper as decided upon by the full committee. He can only state to the Senate the decisions of the committee, whether right or wrong, and the Senate must settle these questions for itself.

Mr. OVERMAN. Mr. President, I am a member of the Committee on Appropriations. Time and again I have seen increases made here for some favorites and yet all the while these poor fellows are sitting at our doors, year in and year out, drawing very modest salaries. I have sat here this evening and noticed increases made of $4,000, $3,600, $3,300. This amendment of mine involves an increase totaling only about $1,500, and I think it is only just that the Senate should agree to it. These men need the increase and ought to have it.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. WARREN. Mr. President, I must object to such procedure in this instance. Let us have a vote.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Deneen | Kendrick | Ransdell |
| Barkley | Dill | Keyes | Reed, Mo. |
| Bayard | Edge | King | Robinson, Ind. |
| Bingham | Edwards | La Follette | Sackett |
| Black | Fletcher | Locher | Schall |
| Blaine | Frazier | McKellar | Sheppard |
| Blease | Gerry | McLean | Shortridge |
| Bratton | Glass | McMaster | Simmons |
| Brookhart | Gould | McNary | Smith |
| Broussard | Greene | Mayfield | Stephens |
| Bruce | Hale | Metcalf | Swanson |
| Capper | Harris | Moses | Thomas |
| Caraway | Harrison | Norbeck | Tydings |
| Copeland | Hawes | Norris | Tyson |
| Couzens | Hayden | Oddie | Warren |
| Curtis | Heflin | Overman | Waterman |
| Cutting | Johnson | Phipps | Wheeler |
| Dale | Jones | Pittman | |

Mr. JONES. I desire to announce that the Senator from Idaho [Mr. GOODING] and the Senator from West Virginia [Mr. GOFF] are detained on official business in committee.

Mr. NORRIS. I desire to announce that the Senator from North Dakota [Mr. NYE], the senior Senator from Montana [Mr. WALSH], and the junior Senator from New York [Mr. WAGNER] are engaged in official business of the Senate before the Committee on Public Lands.

The PRESIDING OFFICER. Seventy-one Senators having answered to their names, a quorum is present. The question is on the amendment offered by the Senator from North Carolina

[Mr. OVERMAN]. [Putting the question.] The noes seem to have it.

Mr. HARRISON. Mr. President, I understood that that amendment had been adopted before the call was made for a quorum.

Mr. OVERMAN. I also thought the amendment had been adopted.

The PRESIDING OFFICER. The Senator from Wyoming [Mr. WARREN] called for a quorum.

Mr. HARRIS. I ask that the question may be again put.

Mr. BLAINE. I ask for a division.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 7, line 11, it is proposed to strike out "$2,150" and in lieu thereof to insert "$2,400," so as to read:

Five (acting as assistant doorkeepers, including one for minority) at $2,400 each.

The question being put, on a division the amendment was agreed to.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole, and is still open to amendment.

Mr. COPELAND. I send forward an amendment to be inserted after line 19, on page 24.

The PRESIDING OFFICER. The amendment proposed by the Senator from New York will be stated.

The CHIEF CLERK. On page 24, after line 19, it is proposed to insert:

without compliance with sections 3709 and 3744 of the Revised Statutes of the United States: *Provided*, That in carrying out the reconstruction and ventilation of the Senate Chamber and House of Representatives, the Architect of the Capitol is authorized, within the appropriation herein made, to enter into such contracts in the open market, to make such expenditures (including expenditures for furniture, material, supplies, equipment, accessories, advertising, travel, and subsistence) and to employ such professional and other assistants without regard to the provisions of section 35 of the public buildings omnibus act, approved June 25, 1910, as amended, as may be approved by such committee.

The PRESIDING OFFICER. The question is on the adoption of the amendment.

The amendment was agreed to.

Mr. PHIPPS. Mr. President, I send to the desk an amendment which I have had heretofore printed. It will be noted that as now submitted I have eliminated two or three words in the original text of the amendment.

The PRESIDING OFFICER. The amendment proposed by the Senator from Colorado will be stated.

The CHIEF CLERK. On page 21, after line 24, it is proposed to insert:

REIMBURSEMENT FOR EXPENSES OF TRAVEL OF CERTAIN CLERKS

That the Secretary of the Senate and the Clerk of the House of Representatives are authorized and directed to reimburse from the contingent funds of the Senate and of the House, respectively, until otherwise provided for, to one clerk or to one assistant clerk to each Senator and/or Representative, or to one clerk or assistant clerk to each committee of the Senate and to each committee of the House, such amounts as may be necessarily paid by said clerk or assistant clerk for railroad fare, Pullman charges, and similar minor expenses of travel, from Washington, D. C., to the place of residence in the State of the Senator or Representative by whom employed, at the time such trip is made, and return therefrom; said reimbursement being hereby expressly limited to one round trip for each regular, extra, or special session of Congress or of the Senate or House, to and from said place of residence, for not to exceed one said clerk or assistant clerk, by the most direct route of travel, such reimbursement to be claimed on vouchers certified by the respective Senators or Representatives employing said clerk or assistant clerk and approved by the chairman, respectively, of the Committee to Audit and Control the Contingent Expenses of the Senate and/or the Committee on Accounts of the House, that such travel has been actually performed and the expense therefor actually incurred.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

THE CALENDAR

Mr. CURTIS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of unobjected bills on the calendar, beginning where we left off at the last call of the calendar, and that the debate be limited to five minutes under Rule VIII.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the first bill in order on the calendar.

PATENTS TO GOVERNMENT OFFICERS AND EMPLOYEES

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 6103) to amend an act entitled "An act making appropriations for the sundry civil expenses of the Government for the fiscal year ending June 30, 1884," and for other purposes, which was read, as follows:

*Be it enacted, etc.*, That so much of chapter 143 of the act of Congress approved March 3, 1883 (22 Stat. L. 625), as relates to issue of patents without payment of any fee be, and the same is hereby, amended to read as follows:

"The Commissioner of Patents is authorized to grant, subject to existing law, to any officer, enlisted man, or employee of the Government, except officers and employees of the Patent Office, a patent for any invention of the classes mentioned in section 4886 of the Revised Statutes, without the payment of any fee when the head of the department or independent bureau certifies such invention is used or liable to be used in the public interest: *Provided*, That the applicant in his application shall state that the invention described therein, if patented, may be manufactured and used by or for the Government for governmental purposes without the payment to him of any royalty thereon, which stipulation shall be included in the patent."

Mr. LA FOLLETTE. Mr. President, I ask that the Senator from Rhode Island [Mr. METCALF], who reported the bill, make a brief explanation of its provisions.

Mr. METCALF. Mr. President, this bill simply proposes to allow any officer or employee of the Government to take out a patent without cost, providing he allows the Government to use it. If passed, it would clarify the old law which was enacted in 1883. The passage of the bill is asked for particularly by the Army, and most of the patents which will be covered by it will be used either in the Navy or in the Army.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LEASING OF PUBLIC LANDS FOR AVIATION FIELDS

The bill (S. 3744) to authorize the leasing of public lands for the use of public aviation fields was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior is authorized, in his discretion and under such regulations as he may prescribe, to lease for use as a public airport any contiguous public lands, unreserved and unappropriated, not to exceed 640 acres in area, subject to valid rights in such lands under the public land laws.

SEC. 2. Any lease under this act shall be for a period not to exceed 20 years, subject to renewal for like periods upon agreement of the Secretary of the Interior and the lessee. Any such lease shall be subject to the following conditions:

(a) That an annual rental of such sum as the Secretary of the Interior may fix for the use of the lands shall be paid to the United States.

(b) That the lessee shall maintain the lands in such condition, and provide for the furnishing of such facilities, service, fuel, and other supplies, as are necessary to make the lands available for public use as an airport of a rating which may be prescribed by the Secretary of Commerce.

(c) That the lessee shall make reasonable regulations to govern the use of the airport, but such regulations shall take effect only upon approval by the Secretary of Commerce.

(d) That all departments and agencies of the United States operating aircraft (1) shall have free and unrestricted use of the airport, and (2) with the approval of the Secretary of the Interior, shall have the right to erect and install therein such structures and improvements as the heads of such departments and agencies deem advisable, including facilities for maintaining supplies of fuel, oil, and other materials for operating aircraft.

(e) That whenever the President may deem it necessary for military purposes, the Secretary of War may assume full control of the airport.

SEC. 3. With the consent of the lessee, the Secretary of the Interior is authorized to cancel any lease of public lands for use as public aviation fields or airports, made under law in force upon the date of the approval of this act, and to lease such lands to the lessee upon the conditions prescribed by this act.

SEC. 4. The Secretary of the Interior is hereby authorized, in his discretion and under such rules as he may prescribe, to grant permission for the establishment of beacon lights and other air-navigation facilities, except terminal airports, upon tracts of unreserved and unappropriated public lands of the United States of appropriate size, and may withdraw the lands for such purposes.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PROPOSED NICARAGUAN CANAL

The joint resolution (S. J. Res. 117) authorizing an investigation and survey for a Nicaraguan canal was announced as next in order.

Mr. JOHNSON. I ask that the joint resolution go over.

Mr. EDGE. Mr. President, will the Senator withhold his objection for a moment. I should like to say a few words.

Mr. JOHNSON. I withhold the objection.

Mr. EDGE. Mr. President, I do not intend actually to press the consideration of this measure at this time, because the Senator from Tennessee [Mr. McKELLAR] has proposed an amendment to it; but I wish to call the attention of the Senate to the importance of this measure. It will only take me a few moments to do so.

I consider this joint resolution a very important measure. As its title indicates, it merely provides for a survey for the purpose of ascertaining whether it is practicable as a business proposition to construct a Nicaraguan canal as provided by treaty between the United States and Nicaragua, under which treaty we paid to Nicaragua $3,000,000, as I recall.

The joint resolution also provides that the Army engineers shall make the survey. There is no commission whatever authorized or appointed under the joint resolution, but all the work is to be in the hands of the Army engineers, who shall also ascertain the practicability of enlarging or of increasing the facilities of the Panama Canal.

I am merely taking this time to draw attention to the measure because we all realize that the facilities of the existing canal at Panama are being taxed more and more, and a new canal should be constructed in order to meet the demands of commerce and shipping a few years hence. All reports from the Canal Zone indicate that the facilities of the Panama Canal are rapidly reaching the point of the maximum of its capacity to handle the traffic.

The Senator from Tennessee [Mr. McKELLAR] a few days ago made an address to the Senate in which he advocated the immediate construction of the Nicaraguan canal. I feel that we should have a survey because of the fact that we have not had one for 27 years. In 1901 a survey was made both of the proposed Nicaraguan canal and the Panama Canal, and while, as I recall, the engineers really recommended the construction of the Nicaraguan canal, Congress later decided to construct the canal at Panama, which was done.

It requires from 15 to 20, or perhaps 25 years, to construct a canal of this magnitude. If the Congress will authorize such a survey as is proposed, we will, of course, obviously be that much nearer to securing the information necessary for a decision. I do hope that the joint resolution may soon be passed. It provides for an appropriation of $250,000, which I propose, when the joint resolution shall be considered, to cut down to $150,000, so as to bring the survey up to date, and likewise give Congress the benefit of the advice of the engineers as to the practicability of increasing the Panama Canal. Then it will be in the hands of Congress to decide what, if anything, shall be done.

Mr. JOHNSON. I inquire if the Budget has approved the proposed expenditure.

Mr. EDGE. I may say, in answer to the Senator from California, that the expenditure has been estimated for by the Budget, and has received the absolute and unqualified approval of the Secretary of War, the Secretary of the Navy, and the Secretary of State.

Mr. JOHNSON. Mr. President, I do not want to be in a position of opposition either to the joint resolution which has been presented by the Senator from New Jersey or to the amendment proposed by the Senator from Tennessee, but being very much interested in the Panama Canal and very much interested in an interoceanic canal through Nicaragua, I think that now is a most inappropriate time within the limit of five minutes to decide upon digging a canal across Nicaragua, and I——

Mr. McKELLAR. I hope the Senator will withhold his objection for a moment. I agree with the Senator; I think more time should be allowed than we now have for the consideration of the subject, but I merely wish to call the attention of the Senate to the reasons for the two amendments I have offered.

The PRESIDING OFFICER. Does the Senator from California withhold his objection?

Mr. JOHNSON. I withhold it in order that the Senator from Tennessee may speak.

Mr. McKELLAR. I am not going to take more than a couple of minutes at the outside.

Mr. President, there are several preliminaries that must be carried out before any canal may be dug. I imagine that a new survey is necessary. We already have a perfect survey of the ground, but it was made some time ago; so I see no reason why there should not be another survey, and I think one is necessary. However, we entered into a treaty with Nicaragua under which we have the general right to build a canal through Nicaragua. In that treaty itself it is provided that the President before any steps looking to carrying out the project shall be taken must give notice to the Nicaraguan Government of a desire to construct the canal; and of course that preliminary ought to be taken care of at the same time the survey is made.

Mr. CARAWAY. Mr. President——

Mr. McKELLAR. I yield to the Senator from Arkansas.

Mr. CARAWAY. Is there any intention of exercising our right within a reasonable time of digging a canal down there?

Mr. McKELLAR. I should think so.

Mr. CARAWAY. What gives the Senator the impression that that right is going to be exercised? Is there any substantial movement to that end on foot?

Mr. McKELLAR. It is very substantial in view of the fact that the Panama Canal in, say, six years will not be able to afford passage to the ships that will be applying to go through it.

Mr. CARAWAY. That is merely a question of necessity. Is there any real movement on foot that we should now undertake to spend a quarter of a million dollars for a survey?

Mr. McKELLAR. I think the test is whether or not these amendments shall be accepted, because if there is any intention of carrying out the project, manifestly the amendments should be adopted, for they provide for the preliminary work, just such work as is called for by a survey.

Mr. CARAWAY. Mr. President, let me ask the Senator a question. If we are going to dig a canal, why not authorize the construction of the canal? Then the surveys would be ordered.

Mr. McKELLAR. I have provided for that in the bill that I have introduced.

Mr. LA FOLLETTE. Mr. President, I call for the regular order.

The PRESIDING OFFICER. The bill will be passed over.

Mr. EDGE. Mr. President, I recognize the fact that this bill can not be discussed under the five-minute rule. I simply wish to give notice that I shall request the committee on order of business to give consideration to placing this bill on their calendar, so that it can be considered in a proper way.

The PRESIDING OFFICER. The Secretary will state the next bill on the calendar.

Mr. McKELLAR subsequently said: Mr. President, when the joint resolution about the Nicaraguan canal was up a few moments ago, I thought I had offered the amendment. The clerk tells me that I did not do so. I ask unanimous consent that it may be offered and be pending.

The PRESIDING OFFICER. Without objection, it is so ordered.

OHIO RIVER BRIDGE AT OR NEAR SHAWNEETOWN, ILL.

The bill (H. R. 7184) authorizing J. L. Rowan, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Shawneetown, Ill., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. JONES. Mr. President, I do not know whether it makes any difference or not, but the calendar states that this bill is reported by the Senator from Vermont [Mr. DALE] with an amendment.

The PRESIDING OFFICER. There is not any amendment in the bill.

Mr. JONES. Very well. I just took that statement from the calendar.

BILLS PASSED OVER

The bill (S. 3837) authorizing the West Kentucky Bridge & Transportation Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Henderson, Ky., was announced as next in order.

Mr. SACKETT. Mr. President, I should like to ask that that bill go over. There are two bills of that character pending, and the author of this bill is not here.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 2097) to provide for the protection of municipal watersheds within the national forests was announced as next in order.

Mr. KING. Mr. President, the able Senator from South Dakota [Mr. NORBECK] is here. This is his bill. It is a very important measure, and I am very much in sympathy with it;

but there is one provision in it that I think is a rather dangerous one, giving too much authority to the President and the Secretary of the Interior to blanket public domain within the forest reserves.

If the Senator will consent that this bill may be passed over—I have not heard of the bill until to-day—until the next calendar day, I shall be very happy to talk to him about it in the meantime, because I am very much in sympathy with the purposes of the bill.

The PRESIDING OFFICER. The bill will be passed over.

LANDS IN FLORIDA

The bill (H. R. 4378) to authorize the Secretary of the Interior to dispose by sale of certain public land in the State of Florida was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands and Surveys with amendments, on page 1, line 6, after the word "being," to strike out "part of"; in the same line, after the word "numbered," to strike out "1, 2, and 3" and insert "5, 6, 7, and 8"; in line 7, after the figures "32," to strike out "west half northwest quarter and lot No. 1, section 33"; in line 8, after the word "numbered," to strike out "1" and insert "4"; and in line 10, after the words "survey of," to strike out "1847" and insert "1924," so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to convey by patent to Alma Laird 127.11 acres, said land being lots Nos. 5, 6, 7, and 8, section 32, and lot No. 4 in section 31, all being in township 2 south, range 17 west of the Tallahassee meridian, according to Government survey of 1924, upon payment by said Alma Laird to the United States of a reasonable appraised value within six months after passage of this act.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILL AND JOINT RESOLUTION PASSED OVER

The bill (S. 3458) to create the reserve division of the War Department, and for other purposes, was announced as next in order.

Mr. LA FOLLETTE. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The joint resolution (S. J. Res. 116) to amend section 10 of the act entitled "An act to establish the upper Mississippi River wild life and fish refuge," approved June 7, 1924, was announced as next in order.

Mr. KING. Mr. President, may I ask the Senator from Oregon [Mr. McNARY] whether, if a narrower limitation were placed upon the joint resolution, it would not be effective? My understanding when we passed the bill a few years ago was that all the lands that were desired for the Mississippi Game Refuge could be acquired for from $1 to $5 an acre. I do not want to object to it if there is a chance of getting the land for $5 an acre; and in view of the promises which were made I should be glad to see the limitation placed in the bill.

Mr. NORBECK. Mr. President, that matter has been carefully considered in the committees, and there has been a great deal of debate on it in the House. I think the facts are well known; but I call the attention of the Senator to the fact that there is a House bill on the Calendar that should be taken up, instead of the Senate bill; and I suggest that we pass over the Senate bill for the time being.

Mr. KING. I hope the Senator will understand that whatever the committee agrees should be done will be acceptable to me.

The PRESIDING OFFICER. The bill will be passed over.

THE LATE NELLIE RICHARDS

The bill (H. R. 7722) authorizing the health officer of the District of Columbia to issue a permit for the opening of the grave containing the remains of the late Nellie Richards was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 1624) to authorize the payment of additional compensation to the assistants to the engineer commissioner of the District of Columbia was announced as next in order.

Mr. KING. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1625) to fix the salaries of the members of the Board of Commissioners of the District of Columbia was announced as next in order.

Mr. KING. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

GORGAS MEMORIAL LABORATORY

The bill (H. R. 8128) to authorize a permanent annual appropriation for the maintenance and operation of the Gorgas Memorial Laboratory was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE LATE REGINALD ETHELBERT MYRIE

The bill (H. R. 9569) authorizing the payment of an indemnity to the British Government on account of the death of Reginald Ethelbert Myrie, alleged to have been killed in the Panama Canal Zone on February 5, 1921, by a United States Army motor truck was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REV. F. NORTH

The bill (H. R. 12179) to provide for the reimbursement of the Government of Great Britain on account of certain sums expended by the British chaplain in Moscow, the Rev. F. North, for the relief of American nationals in Russia in 1920 was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE LATE CHANG LIN AND TONG HUAN YAH

The joint resolution (H. J. Res. 145) to provide for the payment of an indemnity to the Chinese Government for the death of Chang Lin and Tong Huan Yah, alleged to have been killed by members of the armed forces of the United States, was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE LATE JUAN SORIANO

The joint resolution (H. J. Res. 146) to provide for the payment of an indemnity to the Dominican Republic for the death of Juan Soriano, who was killed by the landing of an airplane belonging to the United States Marine Corps, was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE LATE MAX D. KIRJASSOFF

The joint resolution (H. J. Res. 147) for the relief of the estate of the late Max D. Kirjassoff was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DEPENDENTS OF THE LATE EDWIN TUCKER

The joint resolution (H. J. Res. 148) to provide for the payment of an indemnity to the British Government to compensate the dependents of Edwin Tucker, a British subject, alleged to have been killed by a United States Army ambulance in Colon, Panama, was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WILLIAM WISEMAN

The joint resolution (H. J. Res. 149) to authorize an appropriation for the compensation of William Wiseman was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

AREND KAMP AND FRANCIS GORT

The joint resolution (H. J. Res. 150) to provide for the payment of an indemnity to the Government of the Netherlands for compensation for personal injuries sustained by two Netherlands subjects, Arend Kamp and Francis Gort, while the U. S. S. *Canibas* was loading on May 1, 1919, at Rotterdam, was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SUN JUI-CHIN

The joint resolution (H. J. Res. 151) to provide for payment of the claim of the Government of China for compensation of Sun Jui-chin for injuries resulting from an assault on him by a private in the United States Marine Corps was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

INTERNATIONAL CONGRESS OF ENTOMOLOGY

The joint resolution (H. J. Res. 152) authorizing and requesting the President to extend invitations to foreign governments to be represented by delegates at the International Congress of Entomology to be held in the United States in 1928 was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

AMERICAN INTERNATIONAL INSTITUTE FOR THE PROTECTION OF CHILDHOOD

The joint resolution (H. J. Res. 230) to provide for the membership of the United States in the American International Institute for the Protection of Childhood was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CONFERENCE OF CONCILIATION AND ARBITRATION

The joint resolution (H. J. Res. 262) requesting the President to extend to the Republics of America an invitation to attend a Conference of Conciliation and Arbitration to be held at Washington during 1928 or 1929 was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MISSOULA NATIONAL FOREST, MONT.

The bill (H. R. 126) to add certain lands to the Missoula National Forest, Mont., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands and Surveys with an amendment, at the end of the bill to insert a new section, as follows:

SEC. 2. The Secretary of the Interior is hereby authorized to consider and allow applications affecting any lands described in this act which were filed prior to April 1, 1926, under the stock-raising homestead act of December 29, 1916 (39 Stat. 862).

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

ROSEBUD SIOUX INDIANS, SOUTH DAKOTA

The bill (S. 3438) authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized to withdraw from the Treasury of the United States so much of the tribal funds on deposit therein to the credit of the Rosebud Indians of South Dakota, as may be required to make a $10 per capita payment to the recognized members of the tribe, and to pay or distribute the same under such rules and regulations as he may prescribe.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SIOUX TRIBE OF INDIANS

The bill (H. R. 6862) authorizing and directing the Secretary of the Interior to investigate, hear, and determine the claims of individual members of the Sioux Tribe of Indians against tribal funds or against the United States was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CROW RESERVATION, MONT.

The bill (H. R. 11478) to amend an act to allot lands to children on the Crow Reservation, Mont., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 12286) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1929, and for other purposes, was announced as next in order.

The PRESIDING OFFICER. This bill is the unfinished business, and will be passed over.

LEAVE TO EMPLOYEES OF INDIAN SERVICE

The bill (H. R. 11629) to amend the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with an amendment, on page 1, line 9, after the word "hereafter" to strike out "employees" and insert "teachers," so as to make the bill read:

*Be it enacted, etc.*, That the proviso of the act approved August 24, 1912 (37 Stat. L. 519, U. S. Code, title 25, sec. 275), as amended by the act approved August 24, 1922 (42 Stat. L. 829, U. S. Code, title 25, sec. 275), be, and the same is hereby, amended so that the proviso shall read: "*Provided*, That hereafter teachers of the Indian schools and physicians of the Indian Service may be allowed, in addition to annual leave, educational leave not to exceed 30 days per calendar year, or 60 days in every alternate year, for attendance at educational gatherings, conventions, institutions, or training schools, if the interest of the service require, and under such regulations as the Secretary of the Interior may prescribe, and no additional salary or expense on account of this leave of absence shall be incurred."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

AMENDMENT OF TRANSPORTATION ACT OF 1920

The bill (S. 3723) to amend and reenact subdivision (a) of section 209 of the transportation act, 1920, was announced as next in order.

Mr. KING. Mr. President, I should like to have some explanation regarding this bill.

The PRESIDING OFFICER. In the absence of the author of the bill, it will be passed over.

Mr. KING subsequently said: The Senator from Maryland [Mr. BRUCE] was absent a moment ago when I asked for an explanation in regard to Senate bill 3723, of which he is the author, as I understand.

Mr. BRUCE. I hope that bill will be taken up for consideration.

The PRESIDING OFFICER. Without objection, the Senate will return to Order of Business 820, Senate bill 3723, the Senator from Maryland having returned to the Chamber.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That subdivision (a) of section 209 of the transportation act, 1920, be, and the same is hereby, amended and reenacted so as to read as follows:

"(a) When used in this section—

"The term 'carrier' means (1) a carrier by railroad or partly by railroad and partly by water, whose railroad or system of transportation is under Federal control at the time Federal control terminates, or which has heretofore engaged as a common carrier in general transportation and competed for traffic, or connected, with a railroad at any time under Federal control; and (2) a carrier by water not controlled by any railroad company, or a sleeping-car company, whose system of transportation is under Federal control at the time Federal control terminates, but does not include a street or interurban electric railway not under Federal control at the time Federal control terminates, which has as its principal source of operating revenue urban, suburban, or interurban passenger traffic or sale of power, heat, and light, or both;

"The term 'guaranty period' means the six months beginning March 1, 1920;

"The term 'test period' means the three years ending June 30, 1917; and

"The term 'railway operating income' and other references to accounts of carriers by railroad shall, in the case of a carrier by water not controlled by any railroad company, or of a sleeping-car company, be construed as indicating the appropriate corresponding accounts in the accounting system prescribed by the commission."

SEC. 2. That this act shall be effective from and after February 28, 1920: *Provided*, That the passage of this amendatory act shall in no wise affect any rights or benefits conferred by said subdivision (a) in

said original section 209, nor shall the language used herein be construed to exclude any beneficiary embraced within the terms of said original act.

Mr. KING. Reserving the right to object, I shall be glad to hear an explanation from the Senator.

Mr. BRUCE. Mr. President, during the World War the Government, as we all know, took over each and every system of transportation, consisting of railroads and "owned" or "controlled" systems of coastwise and inland transportation engaged in general transportation. Among the transportation lines that it took over were the lines of the Merchants & Miners' Transportation Co. That company had some 14 ships, 3 tugs, 48 barges, and certain valuable buildings and wharves. Its ships plied between Baltimore and Providence and Boston and also between Baltimore and Savannah and Jacksonville. It was not, however, a transportation line within the literal meaning of section 209 of the Federal transportation act of 1920, which prolonged Federal-control rates for the benefit of carriers for a period of six months by the "guaranty-clause" provisions contained in that act and defined the term "carrier" as meaning a carrier by railroad or partly by railroad and partly by water. In other words, the Merchants & Miners' Transportation Co. was an independent line and unaffiliated with any railroad. Nevertheless, it was taken over by the Government, and when the time came for the relinquishment of Government control it refused to accept relinquishment, although by agreement with the Government it resumed the possession of its property, with the stipulation that it was without prejudice to any of its rights in the premises. Afterwards it filed its claim for compensation under the Federal control act, and the board of referees appointed by the Interstate Commerce Commission found that it was under Federal control until March 1, 1920, and that the attempted relinquishment by the Government was without legal effect. All carriers embraced within section 209 of the transportation act being given the opportunity to file with the Interstate Commerce Commission on or before March 15, 1920, a written statement declaring that they accepted the guaranty provisions of that act, the Merchants & Miners' Transportation Co. filed such a statement. It is to obtain the amount to which it is morally entitled under the guaranty that the pending bill was introduced into the Senate at the instance of the Merchants & Miners' Transportation Co. Manifestly, the failure to include independent steamship lines in section 209 of the transportation act of 1920 was a mere inadvertence, and under the circumstances the Merchants & Miners' Transportation Co. is as justly entitled to the benefits of the "guaranty clause" provided for by World War legislation as if it, when taken over, had been a carrier partly by railroad and partly by water. I trust, therefore, that the bill will be passed.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. FLETCHER. Mr. President, I infer that it was simply an inadvertence in the language used in the act of 1920 that this line was not included.

Mr. BRUCE. That is it—nothing but an inadvertence.

Mr. FLETCHER. The report so shows.

Mr. BRUCE. That is right.

Mr. FLETCHER. The report says:

> We have limited the effect of the amendment to the one independent water carrier inadvertently excluded. Justice and equity require the enactment of this law to correct the manifest discrimination against this independent water line.

This bill, therefore, is brought in to correct a mere inadvertence.

Mr. BRUCE. And, of course, the letter of the chairman of the Interstate Commerce Commission, Mr. Clark——

The PRESIDING OFFICER. The time of the Senator has expired.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 1945) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes, approved July 11, 1916, and for other purposes, was announced as next in order.

Mr. JONES. At the request of the Senator from Connecticut [Mr. BINGHAM], I ask that that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 3554) to authorize the National Academy of Sciences to investigate the means and methods for affording Federal aid in discovering a cure for cancer, and for other purposes, was announced as next in order.

Mr. CURTIS. At the request of the Senator from Utah [Mr. SMOOT], I ask that that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

AMENDMENT OF UPPER MISSISSIPPI RIVER WILD LIFE AND FISH REFUGE ACT

The joint resolution (H. J. Res. 200) to amend section 10 of the act entitled "An act to establish the upper Mississippi River wild life and fish refuge," approved June 7, 1924, was considered as in Committee of the Whole.

Mr. McNARY. I move that the House joint resolution be substituted for the Senate joint resolution and that the Senate joint resolution be indefinitely postponed.

The PRESIDING OFFICER. Without objection, that order will be made.

Mr. BLAINE. After the substitution of the House joint resolution is made, I ask that the joint resolution go over for the time being.

The PRESIDING OFFICER. Under objection, the joint resolution will be passed over.

CLAIMS OF INDIANS OF WASHINGTON

The bill (S. 1480) authorizing certain Indian tribes and bands, or any of them, residing in the State of Washington, to present their claims to the Court of Claims, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That jurisdiction is hereby conferred on the Court of Claims, with the right to appeal to the Supreme Court of the United States by either party, as in other cases, notwithstanding the lapse of time or statutes of limitation, to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims of the Lower Spokane and the Lower Pend O'Reille or Lower Calispell Tribes or Bands of the State of Washington, or any of said tribes or bands, against the United States arising under or growing out of the original Indian title, claim, or rights of the said Indian tribes and bands, or any of said tribes or bands (with whom no treaty has been made), in, to, or upon the whole or any part of the lands and their appurtenances claimed by said Lower Spokane Tribe or Band of Indians, in the State of Washington, and embraced within the following general descriptions, to wit:

Commencing in the State of Washington on the east and west Government survey township line between townships 24 and 25 north at a point whose longitude is 119° 10′ west; thence east along said township line to the first draw leading and draining into Hawk Creek in Lincoln County, Wash.; thence down the center of said draw to said Hawk Creek and down the center of said Hawk Creek to its conflux with the Columbia River; thence up and along the south and east bank of the Columbia River to the north bank of the Spokane River at its conflux with the Columbia River, which said boundary lines separate the lands of said Lower Spokane Tribe or Band of Indians from those, the several so-called Colville and Okanogan Tribes or Bands of Indians; thence easterly up and along the north bank of the said Spokane River to a north and south line whose longitude is 118° west; thence south along said line to its intersection with the 47th parallel of latitude; thence west along said 47th parallel to a line whose longitude is 119° 10′ west; thence north on said line to the point of beginning, which two latter lines of boundary separate the lands of the said Lower Spokane Tribe or Band of Indians from the lands of the confederated Yakima Indians as defined by the treaty between the United States and said Yakima Indians concluded at Camp Stevens, Walla Walla Valley, Washington Territory, June 9, 1855 (12 U. S. Stat. L. 951, 956); lands in the States of Idaho, Montana, and Washington, claimed by said Lower Calispell or Lower Pend O'Reille Indian Tribe or Band of Indians and embraced within the following description, to wit:

Commencing at a point in the State of Idaho at the 49th parallel latitude on the divide between the waters of the Flat Bow or Kootenai River and those of the Clark Fork River and its tributaries; thence southerly and southeasterly along said summit of the divide, known as the Cabinet Mountain, to the headwaters of Thompsons River in Sanders County, Mont.; thence southerly along the divide between Thompsons River and the tributaries of the Flathead River to the town of Plains, Mont., and continuing southwesterly on a line drawn through St. Regis, Mont., to the summit of the Calispell or Coeur d'Alene Range of the Bitter Root Mountains (which said boundaries separate the original habitat and lands of said Lower Calispell or Lower Pend O'Reille Indians from those of the Cooteney, Upper Pend O'Reille, and Flathead Tribes or Bands of Indians as defined by the treaty between the United States and said last-named tribes or bands of Indians, executed July 16, 1855) (12 Stat. L. 975–979); thence northwesterly along the summit of said Calispell or Coeur d'Alene Range and the divide between the waters of the said Clark Fork and those of the Coeur d'Alene River, and along said course extend to and across the Spokane Plains and continuing in a general northwesterly direction to the divide separating the waters of said Clark Fork River from the Spokane River and its tributaries to the main ridge of the Calispell Mountains in the State of Washington; and thence in a northerly direction, along the summit of

main ridge of said Calispell Mountains, and said course extending to the international boundary line between the Province of British Columbia and the State of Washington; then east along said international boundary line to the point of beginning, which last-named boundaries separate the original habitat and land of said Lower Calispell or Lower Pend O'Reille Indians from those of the Coeur d'Alene, Spokane, Colville, and Lake Tribes or Bands of Indians; which said lands or rights therein or thereto are claimed to have been taken away from said Indian tribes and bands, or some of them, by the United States, recovery therefor in no event to exceed $1.25 per acre; together with all other claims of said tribes or bands of Indians, or any of said tribes or bands, arising under or growing out of fishing rights and privileges held and enjoyed by said tribes and bands, or any of them, in the waters of the Columbia River and its tributaries; or arising or growing out of hunting rights and privileges held and enjoyed by said tribes and bands, or any of them, in common with other Indians in the "common hunting grounds" east of the Rocky Mountains as reserved by and described in the treaty with Blackfoot Indians, October 17, 1855 (11 Stat. L. 657–662), and which are claimed to have been taken away from said tribes and bands, or any of them, by the United States without any treaty or agreement with such Indian claimants therefor and without compensation to them.

SEC. 2. Any and all claims against the United States within the purview of this act shall be forever barred unless suit or suits be instituted or petition, subject to amendment, be filed as herein provided in the Court of Claims within five years from the date of the approval of this act, and such suit or suits shall make the said Lower Spokane and Lower Calispell or Lower Pend O'Reille Indian Tribes or Bands of Washington, or any of said tribes or bands, party or parties plaintiff and the United States party defendant. The petition shall be verified by the attorney or attorneys employed to prosecute such claim or claims under contract with the Indians approved in accordance with existing law; and said contract shall be executed in their behalf by a committee or committees selected by said Indians as provided by existing law. Official letters, papers, documents and records, maps, or certified copies thereof may be used in evidence, and the departments of the Government shall give access to the attorney or attorneys of said Indians to such treaties, papers, maps, correspondence, or reports as they may require in the prosecution of any suit or suits instituted under this act.

SEC. 3. In said suit or suits the court shall also hear, examine, consider, and adjudicate any claims which the United States may have against the said Indian tribes and bands, or any of them, but any payment or payments which have been made by the United States upon any such claim or claims shall not operate as an estoppel, but may be pleaded as an offset in such suit or suits, as may gratuities, if any, paid to or expended for said Indian tribes and bands or any of them.

SEC. 4. Any other tribes or bands of Indians the court may deem necessary to a final determination of any suit or suits brought hereunder may be joined therein as the court may order: *Provided*, That upon final determination of such suit or suits the Court of Claims shall have jurisdiction to fix and determine a reasonable fee, not to exceed 10 per cent of the recovery, by any one of said tribes or bands, and in no event to exceed the sum of $25,000 for any one of said tribes or bands of Indians, together with all necessary and proper expenses incurred in the preparation and prosecution of such suit or suits to be paid to the attorney or attorneys employed as herein provided by the said tribes or bands of Indians, or any of said tribes or bands, and the same shall be included in the decree, and shall be paid out of any sum or sums adjudged to be due said tribes or bands, or any of them, and the balance of such sum or sums shall be placed in the Treasury of the United States, where it shall draw interest at the rate of 4 per cent per annum.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF TRANSPORTATION ACT, 1920

Mr. BRUCE. Mr. President, I ask unanimous consent that the vote by which Senate bill 3723 was passed be reconsidered.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the vote by which the bill was ordered to a third reading and was passed is reconsidered.

Mr. BRUCE. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 2, line 9, after the word "both," to insert a colon and "*Provided*, That the claim or claims of any carrier to which the benefits of this section are hereby for the first time made available shall be filed with the commission within 60 days from the date of the approval of this amendment, and shall be allowed and paid as otherwise provided in this act, notwithstanding the provisions of any prior statute or administrative rule, or ruling, of limitation."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DETAIL OF ROAD ENGINEERS TO LATIN-AMERICAN REPUBLICS

The bill (S. 1718) to authorize the President to detail engineers of the Bureau of Public Roads of the Department of Agriculture to assist the governments of the Latin-American Republics in highway matters was announced as next in order.

Mr. KING. Mr. President, may I inquire of the Senator from Nevada whether the committee considered all the implications of this bill? I recall that a number of years ago a proposition was made that the engineers of the Reclamation Service be made available for corporations or individuals who owned land privately and desired to reclaim or improve their land. After consideration, it was deemed unwise to pass such legislation, for the reason that a considerable number of the staff would undoubtedly be obtained by private persons—they would pay for them, of course—and it would necessarily increase the number of officials, the personnel, of the Reclamation Service. When they are gotten on the roll, under the civil service, it is difficult to get them off the roll again.

If the President of the United States may detail engineers of the road department to go to Panama, or to the Argentine, or to Brazil, to help build roads there, obviously additional engineers will have to be employed in the road department at home. Those persons who go get additional compensation, they have longevity rating, they are under the civil service, and, though I do not use the term offensively, you are "padding" the rolls, getting more employees upon the rolls in order to help other countries.

I am perfectly willing to help other countries, but I am unwilling to increase the personnel of our Government in order to furnish employees to other countries. If they are cut off the rolls to go to other countries and take their chances, and then take their chances of being reemployed, I have no objection. It does seem to me that the bill in its present form is a little too broad, and in order that we may consider it in all of its implications I ask the Senator to let it go over.

Mr. ODDIE. Mr. President, I will ask the Senator from Utah to withhold his objection for just a moment.

I call the attention of the Senator to the fact that the wording of this provision is identical with that of the provision of the existing law giving authority to the President to detail officers of the Army, Navy, and Marine Corps to assist the Latin-American Republics in military and naval matters. There is a very great demand for this bill, because unless it is passed the road-building program in the Western Hemisphere will be materialy retarded. The road organizations of the country would like to see this legislation passed.

The Bureau of Public Roads has approved it, the Department of Agriculture has approved it, and the Budget has reported that it is not in conflict with the President's policy.

Mr. KING. I have no doubt on earth that the departments would not fail to approve such legislation as this, because it adds to the personnel. I know that the object back of it is entirely meritorious, but I am looking to the future. It would increase the personnel. They would be given longevity rating, they would get retirement pay, and we would be multiplying the expenses of the Government. It does seem to me that we ought to give this further consideration, and I ask that it go over temporarily.

Mr. ODDIE. In answer to the Senator's last statement I will say that the object of the bill is very meritorious. It is bigger than any question such as the Senator from Utah has raised. I will be pleased if he will withdraw his objection.

The PRESIDING OFFICER. Does the Senator withdraw his objection?

Mr. KING. No.

The PRESIDING OFFICER. The bill will be passed over.

RURAL POST ROADS

The bill (S. 3674) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That for the purposes of carrying out the provisions of the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the construction and maintenance of the main roads through unappropriated or unreserved public lands, nontaxable Indian lands, or other Federal reservations; by the Bureau of Public Roads if on Fed-

eral reservations, and by the respective State highway departments, under agreement with the Secretary of Agriculture, if on any other part of the Federal-aid highway system or on the United States numbered system of highways: *Provided*, That in the allocation of any such funds authorized to be appropriated under this act or any subsequent act, preference shall be given to those projects which are located on the Federal-aid highway system or on the United States numbered system of highways, as the same are now, or may hereafter be designated:

The sum of $3,500,000 for the fiscal year ending June 30, 1929;

The sum of $3,500,000 for the fiscal year ending June 30, 1930;

The sum of $3,500,000 for the fiscal year ending June 30, 1931: *Provided*, That the sums hereby authorized shall be in addition to any other sums authorized or appropriated for roads, and shall be allocated to the States having more than 5 per cent of their area in lands hereinabove referred to, and said sums shall be apportioned among said States in the proportion that said lands in each of said States is to the total area of said lands in the States eligible under the provisions of this act, and no contribution from the States shall be required in the expenditure thereof.

SEC. 2. All acts or parts of acts in any way inconsistent with the provisions of this act are hereby repealed, and this act shall take effect on its passage.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

W. H. TALBERT

The bill (S. 1645) for reimbursement of W. H. Talbert was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay W. H. Talbert, out of any money in the Treasury not otherwise appropriated, as reimbursement, the sum of $135 for money expended for repair of automobile wrecked in service of the Indian Department in transporting Indian children from one school to another.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ROADS AT THE PRESIDIO, SAN FRANCISCO, CALIF.

The bill (H. R. 9047) to authorize appropriations for the construction of roads at the Presidio of San Francisco, Calif., was considered as in Committee of the Whole.

Mr. KING. Mr. President, I would like to ask the Senator from California whether in the appropriation bill which was passed a few weeks ago, carrying several hundred millions for the Army, there was not an appropriation made for these roads in the Presidio?

Mr. JOHNSON. No. This is $47,000 asked by the War Department and absolutely essential for the roads in the Presidio at San Francisco.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PHILIPPINE CONSTABULARY SERVICE

The bill (S. 3463) to recognize commissioned service in the Philippine Constabulary in determining rights of officers of the Regular Army was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That in determining the pay period and rights of retirement in the case of officers of the Regular Army, active duty performed as an officer of the Philippine Constabulary shall be credited to the same extent as service under a Regular Army commission or other active duty recognized under the provisions of section 127a of the national defense act of June 3, 1916, as amended by the act of June 4, 1920.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

WILLIAM M. SHERMAN

The bill (S. 162) to change the military record of William M. Sherman was considered as in Committee of the Whole. The bill had been reported by the Committee on Military Affairs with an amendment on page 1. The committee proposes, on page 1, to strike out all after the enacting clause and to insert the following:

That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, or their dependents, William M. Sherman, who served as a private of Troop A, Eighth Regiment United States Cavalry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said organization on the 7th day of March, 1901: *Provided*, That no bounty, pension, pay, or other emoluments shall accrue prior to the passage of this act.

Mr. KING. Mr. President, I would like to have an explanation of this from the Senator from Florida.

Mr. FLETCHER. Mr. President, this man enlisted and deserted shortly after he enlisted; he was court-martialed and dishonorably discharged. He enlisted twice after that and was honorably discharged both times. He was granted a pardon for his first dishonorable discharge for desertion. He was pardoned by the President, but that does not correct the record, and this is to correct the record. He enlisted twice after the first discharge, and both times his record was marked good. Having been pardoned for the first offense by the President, the committee felt that he was entitled to this relief. I think it is a meritorious case.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of William M. Sherman."

ACOMA PUEBLO INDIANS

The bill (H. R. 11479) to reserve certain lands on the public domain in Valencia County, N. Mex., for the use and benefit of the Acoma Pueblo Indians was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

J. C. PEIXOTTO

The bill (S. 1433) for the relief of J. C. Peixotto was announced as next in order.

Mr. KING. Let that be passed over.

The PRESIDING OFFICER. The bill will be passed over.

GILPIN CONSTRUCTION CO.

The bill (S. 1530) for the relief of Gilpin Construction Co. was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Navy be, and is hereby, authorized and directed to pay to Gilpin Construction Co., of Astoria, Oreg., $112,990.32, out of any money in the Treasury not otherwise appropriated, and in full settlement of any and all claims against the United States arising out of and/or in connection with Navy Department Bureau of Yards and Docks contract No. 4615, dated February 17, 1923, for the furnishing of all labor and materials and the construction of four timber piers, one timber bulkhead, two brush bulkheads, a railroad track, and for the dredging of the channel and turning basin at the Navy submarine and destroyer base at Astoria, Oreg., and as compensation for any and all services, labor, and materials furnished thereunder or extra thereto.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CLAIMS OF HOMESTEAD SETTLERS, MINNESOTA

The bill (H. R. 8487) to adjudicate the claims of homestead settlers on the drained Mud Lake bottom, in the State of Minnesota, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

A. ROY KNABENSHUE

The bill (S. 3809) conferring jurisdiction upon the Court of Claims of the United States or the district courts of the United States to hear, adjudicate, and enter judgment on the claim of Roy A. Knabenshue against the United States for the use or manufacture of an invention of Roy A. Knabenshue, covered by Letters Patent No. 858875, issued by the Patent Office of the United States under date of July 2, 1907, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, line 7, to strike out "Roy A." and insert in lieu thereof "A. Roy," so as to make the bill read:

*Be it enacted, etc.*, That jurisdiction is hereby conferred upon the Court of Claims and/or the district court of the United States, notwithstanding the lapse of time or the statute of limitations, to hear, examine, adjudicate, and render judgment of the claim of A. Roy Knabenshue, for the use and manufacture by or for the United States without license of the owner thereof or lawful right and infringement thereof of patent described in or covered by Letters Patent No. 858875, issued

by the Patent Office of the United States on the 2d day of July, 1907. From any decision in any suit prosecuted under the authority of this act an appeal may be taken by either party as is provided for by law in other cases.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill conferring jurisdiction upon the Court of Claims of the United States or the district courts of the United States to hear, adjudicate, and enter judgment on the claim of A. Roy Knabenshue against the United States for the use or manufacture of an invention of A. Roy Knabenshue, covered by Letters Patent No. 858875, issued by the Patent Office of the United States under date of July 2, 1907."

### ILLINOIS, NORTH DAKOTA, WEST VIRGINIA, MINNESOTA, INDIANA, TEXAS, AND ARKANSAS BRIDGE BILLS

The following bridge bills were severally considered as in Committee of the Whole, reported to the Senate without amendment, ordered to a third reading, read the third time, and passed:

H. R. 9485. An act authorizing Roy Clippinger, Ulys Pyle, Edgar Leathers, Groves K. Flescher, Carmen Flescher, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Wabash River at or near McGregors Ferry in White County, Ill.;

H. R. 11212. An act authorizing Paul Leupp, his heirs, legal representatives, or assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Stanton, N. Dak.;

H. R. 11265. An act authorizing the Cabin Creek Kanawha Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near Cabin Creek, W. Va.;

H. R. 11266. An act authorizing the St. Albans Nitro Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Kanawha River at or near St. Albans, Kanawha County, W. Va.;

H. R. 11267. An act granting the consent of Congress to the board of county commissioners of Itasca County, Minn., to construct, maintain, and operate a free highway bridge across the Mississippi River at or near the road between the villages of Cohasset and Deer River, Minn.;

H. R. 11356. An act authorizing the State of Indiana to construct, maintain, and operate a toll bridge across the Ohio River at or near Rockport, Ind.;

H. R. 11473. An act granting the consent of Congress to the States of North Dakota and Minnesota to construct, maintain, and operate a bridge across the Red River of the North at Fargo, N. Dak.;

H. R. 11578. An act authorizing the B & P Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande River at or near Weslaco, Tex.; and

H. R. 11583. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across the White River at or near Cotter, Ark.

### WHITE RIVER BRIDGE, ARKANSAS

Mr. CARAWAY. Mr. President, in regard to the bill last passed by the Senate, House bill 11583, a bill for this very purpose passed the Senate some days ago. As it went to the House, it possibly differs slightly from this bill, but this one was passed in the House and came to the Senate, and I have no objection to the bill having been passed in this form.

I ask unanimous consent that the Senate bill for the construction of this bridge, which passed the Senate a few days ago, be recalled from the House, because I do not want to have two bills enacted for the same purpose.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

### MISSOURI RIVER BRIDGE, MONTANA

The bill (H. R. 11625) granting the consent of Congress to the State of Montana, Valley County, Mont., and Garfield County, Mont., or to any or either of them, jointly or severally, to construct, maintain, and operate a bridge across the Missouri River at or near Glasgow, Mont., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### MISSISSIPPI RIVER BRIDGE

The bill (S. 3862) authorizing J. T. Burnett, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Tiptonville, Tenn., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments, on page 1, to strike out line 9 and down to and including the word "Missouri," in line 10, and to insert in lieu thereof the words "at or near Tiptonville, Tenn." and a comma; and on page 3, line 17, to strike out the word "deprecation" and insert in lieu thereof the word "depreciation," so as to make the bill read:

*Be it enacted, etc.,* That in order to facilitate interstate commerce, improve the postal service, and provide for military and other purposes, J. T. Burnett, his heirs, legal representatives, and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River, at a point suitable to the interests of navigation, at or near Tiptonville, Tenn., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon J. T. Burnett, his heirs, legal representatives, and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said J. T. Burnett, his heirs, legal representatives, and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of Tennessee, the State of Missouri, any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches and any interest in any real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 15 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost as soon as possible under reasonable charges, but within a period of not to exceed 15 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been provided, such bridge shall thereafter be maintained and operated free of tolls or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

SEC. 6. J. T. Burnett, his heirs, legal representatives, and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War and with the Highway Departments of the States of Tennessee and Missouri, a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property therefor, and the

actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, and at an time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said J. T. Burnett, his heirs, legal representatives, and assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to J. T. Burnett, his heirs, legal representatives, and assigns, and any corporation to which, or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill authorizing J. T. Burnett, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Tiptonville, Tenn."

### CLAIMS AGAINST THE DISTRICT OF COLUMBIA

The bill (S. 3581) authorizing the Commissioners of the District of Columbia to settle claims and suits against the District of Columbia, was announced as next in order.

The bill had been reported by the Committee on the District of Columbia with amendments, on page 1, line 4, to strike out the words "and directed;" and on page 2, to strike out lines 6 to 12 and to insert a new section, as follows:

SEC. 2. No proceeding to cancel a tax assessment, or to recover taxes paid, shall be brought after one year from the date of the decision of a court of last resort holding void the law under which the tax was levied or paid.

So as to make the bill read:

*Be it enacted, etc.,* That the Commissioners of the District of Columbia be, and they hereby are, empowered to settle, in their discretion, claims and suits, either at law or in equity, against the District of Columbia whenever the cause of action—

(a) Arises out of the negligence or wrongful act, either of commission or omission, of any officer or employee of the District of Columbia for whose negligence or acts the District of Columbia is prima facie liable to respond in damages.

(b) Arises out of the existence of facts and circumstances which place the claim or suit within the doctrines and principles of law decided by the courts of the District of Columbia or by the Supreme Court of the United States to be controlling in the District of Columbia.

SEC. 2. No proceeding to cancel a tax assessment, or to recover taxes paid, shall be brought after one year from the date of the decision of a court of last resort holding void the law under which the tax was levied or paid.

SEC. 3. No settlement of any claim or cause of action herein authorized to be made by the Commissioners of the District of Columbia shall in any event exceed the sum of $5,000, and all settlements entered into by the Commissioners of the District of Columbia acting under the terms and provisions of this act shall be presented to the Congress, together with a brief statement of the nature of the claim or suit, the amount claimed, and the amount of the settlement, with a summary of the evidence and circumstances under which the settlement was made. Appropriations for the payment of such settlements are hereby authorized, payment thereof to be made in the same manner as are other expenditures for the District of Columbia.

SEC. 4. This act shall take effect from and after its passage, but nothing herein contained shall be construed as prohibiting the Commissioners of the District of Columbia from proceeding according to the terms and provisions hereof to settle any claim or suit pending at the time of the enactment hereof, irrespective of the date of presentation of the claim to the Commissioners of the District of Columbia or the date of the filing of the suit.

The amendments were agreed to.

Mr. BLAINE. Mr. President, I do not ask that this bill go over permanently, but I would like to have it go over temporarily.

The PRESIDING OFFICER. The bill will be passed over.

### CAPT. WILL H. GORDON

The bill (S. 2821) for the relief of Capt. Will H. Gordon was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.,* That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Capt. Will H. Gordon, of Plattsburg Barracks, N. Y., the sum of $472, in full compensation for stoppage against pay of said Capt. Will H. Gordon, covering the loss of 20 pistols for which he was held pecuniarily responsible in accordance with investigation and recommendation of the inspector general.

Mr. KING. Mr. President, I would like to have an explanation from the Senator from Alabama.

Mr. BLACK. Mr. President, this man was a captain in the Army who left his station under orders of his superior officer. He was instructed exactly how his property should be safeguarded. Those instructions were carried out. He caused the doors to be locked and barred, but a burglary occurred while he was gone under instruction from his superior officer. A guard had been left in the camp.

The burglar obtained some pistols worth about $470. Those pistols were charged up to Captain Gordon. The board examined and went into the facts, and held, as I believe, correctly, from the evidence, that the captain had done everything possible that a man could do to safeguard the property. However, the survey went up to an officer, I believe, in Washington, who, without giving any reason in the world that I can find, in the record or elsewhere, set aside the finding of the board of survey and charged this loss to the officer.

Under all the facts and the evidence, the man had taken every precaution which any officer could or should have taken. I therefore did not think, and the committee did not think, he should be charged with this $470.

Mr. KING. Under the Army Regulations, as I understand them, he would have had the right to carry the matter to the Secretary of War. It seems to me it is rather a dangerous precedent for Congress, in the face of an adverse recommendation before the highest tribunal, so to speak, has been reached, to ignore the decision and take it out of the hands of the War Department. If the matter had gone to the ultimate source of authority and they had affirmed the decision and the committee still felt that an injustice had been done, then it seems to me the appeal to Congress would have been more persuasive and more valid.

Mr. BLACK. We did not go completely into the question of appeal. Whether he could have gone any further or not I do not know. I do not think that the Government should be put to any more expense with reference to this charge, which should not have been made against this officer. He did everything he could do. He guarded, he even nailed up the windows and locked the doors, and after he had done that his commanding officer came around to inspect and held that the place was properly guarded. Under those circumstances I can not see any reason or justification, and neither could the committee, in charging the officer with something which was completely beyond his control.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

### CLAIMS AGAINST THE DISTRICT OF COLUMBIA

Mr. BLAINE. Mr. President, Calendar No. 848 was passed over temporarily. I ask unanimous consent that we may recur to it.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate resumed consideration of the bill (S. 3581) authorizing the Commissioners of the District of Columbia to settle claims and suits against the District of Columbia, which had been reported from the Committee on the District of Columbia with amendments, which had been agreed to.

Mr. BLAINE. I ask that the bill be put upon its passage.

Mr. KING. I desire to offer a further amendment. On page 2, line 5, strike out "$5,000" and insert "$3,000."

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 2, line 20, strike out "$5,000" and insert in lieu thereof "$3,000," so as to make the bill read:

*Be it enacted, etc.,* That the Commissioners of the District of Columbia be, and they hereby are, empowered to settle, in their discretion,

claims and suits, either at law or in equity, against the District of Columbia whenever the cause of action—

(a) Arises out of the negligence or wrongful act, either of commission or omission, of any officer or employee of the District of Columbia for whose negligence or acts the District of Columbia is prima facie liable to respond in damages.

(b) Arises out of the existence of facts and circumstances which place the claim or suit within the doctrines and principles of law decided by the courts of the District of Columbia or by the Supreme Court of the United States to be controlling in the District of Columbia.

SEC. 2. No proceeding to cancel a tax assessment, or to recover taxes paid, shall be brought after one year from the date of the decision of a court of last resort holding void the law under which the tax was levied or paid.

SEC. 3. No settlement of any claim or cause of action herein authorized to be made by the Commissioners of the District of Columbia shall in any event exceed the sum of $3,000 and all settlements entered into by the Commissioners of the District of Columbia acting under the terms and provisions of this act shall be presented to the Congress, together with a brief statement of the nature of the claim or suit, the amount claimed, and the amount of the settlement, with a summary of the evidence and circumstances under which the settlement was made. Appropriations for the payment of such settlements are hereby authorized, payment thereof to be made in the same manner as are other expenditures for the District of Columbia.

SEC. 4. This act shall take effect from and after its passage, but nothing herein contained shall be construed as prohibiting the Commissioners of the District of Columbia from proceeding according to the terms and provisions hereof to settle any claim or suit pending at the time of the enactment hereof, irrespective of the date of presentation of the claim to the Commissioners of the District of Columbia or the date of the filing of the suit.

Mr. KING. I would like to see how this would operate for a year or two, and then if we desire to increase the limit so that the commissioners may settle for larger amounts, Congress can very quickly act. In the settlement of War Department cases the limit is $500. I am unwilling, of course, to fix so low a limit. I suggest $3,000 be inserted instead of $5,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from Utah.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 1294) to suppress unfair and fraudulent practices in the marketing of perishable agricultural commodities in interstate and foreign commerce was announced as next in order.

Mr. COPELAND. Mr. President, I am objecting to the immediate consideration of the bill, because I have not yet firmly established in the minds of Senators how certain people feel about its provisions. Some complaints have come to me about it. I have had some correspondence with gentlemen who are interested in it. I ask that it go over to-day and the next time the calendar is called I shall attempt to elucidate how my people feel about it.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1762) granting consent to the city and county of San Francisco, State of California, its successors and assigns, to construct, maintain, and operate a bridge across the Bay of San Francisco from Rincon Hill to a point near the South Mole of San Antonio Estuary, in the county of Alameda, in said State, was announced as next in order.

Mr. METCALF. Over.

The PRESIDING OFFICER. The bill will be passed over.

PUBLIC MARKET, DISTRICT OF COLUMBIA

The joint resolution (S. J. Res. 50) providing that the Secretary of Agriculture be directed to give notice that on and after January 1, 1929, the Government will cease to maintain a public market on Pennsylvania Avenue between Seventh and Ninth Streets NW., was considered as in Committee of the Whole and was read, as follows:

*Resolved, etc.*, That the Secretary of Agriculture be, and he is hereby, directed to give notice that on and after January 1, 1929, the Government will cease to maintain a public market on Pennsylvania Avenue between Seventh and Ninth Streets NW. The land now occupied by the Center Market shall, after the date above specified, be available for the construction thereon of public buildings of the Government.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SURVEY OF OYSTER BEDS, FLORIDA

The bill (S. 1458) providing for a survey of the natural oyster beds in the waters within the State of Florida was considered as in Committee of the Whole. The bill had been reported from the Committee on Commerce with an amendment, to strike out all after the enacting clause and insert the following:

That the Secretary of Commerce be, and he is hereby, directed to have made a survey of the natural oyster beds and barren bottoms contiguous thereto in waters within the State of Florida, and to conduct investigations and experiments for the purpose of increasing oyster production therein, and to make and publish reports of the results of such surveys and investigations. That for such purpose the Coast and Geodetic Survey and the Bureau of Fisheries be, and are hereby, directed to expend, under the direction of the Secretary of Commerce, a sum not exceeding $25,000, which said sum is hereby authorized to be appropriated for the purpose of said investigation, including employment of personnel at the seat of government and elsewhere, rental of office and laboratory quarters, purchase or hire and/or operation and maintenance of boats and floating equipment, and purchase of scientific apparatus and supplies as may be necessary for the carrying out of this act.

Mr. EDGE. Mr. President, may I ask the Senator from Florida a question?

Mr. FLETCHER. Certainly.

Mr. EDGE. Is this a matter entirely within Federal jurisdiction? We are interested in similar conditions in New Jersey, and I am asking for information.

Mr. FLETCHER. These waters are entirely within the jurisdiction of the Federal Government. This is the exact amendment that was submitted by the Commissioner of the Bureau of Fisheries. Instead of an original bill, we have reported it as an amendment by inserting the entire proposition which he recommended.

Mr. EDGE. What does it provide? Does it provide for the investigation of waters that have not heretofore been planted with oyster seed?

Mr. FLETCHER. Yes; and a survey in cooperation with the Bureau of Fisheries in ascertaining the location of the beds. It is quite an important industry.

Mr. EDGE. I realize the importance of the industry and I am simply asking for information, thinking it might be useful in my section of the country.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 391) to regulate the use of the Capitol Building and Grounds was announced as next in order.

Mr. DILL. Over.

The PRESIDING OFFICER. The bill will be passed over.

BRIDGE ACROSS LAKE CHAMPLAIN, N. Y.

The bill (H. R. 10643) authorizing the Gulf Coast Properties (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across Lake Champlain at or near Rouses Point, N. Y., was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That in order to facilitate interestate commerce, improve the Postal Service, and provide for military and other purposes, the Gulf Coast Properties (Inc.), its successors and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across Lake Champlain at a point suitable to the interests of navigation, between a point at or near Rouses Point, N. Y., and a point at or near Windmill Point, Vt., or near Alburg, Vt., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act: *Provided*, That such bridge shall not be so located as to interfere with the landings and the cable used for the operation of the existing ferry between Rouses Point and Alburg.

SEC. 2. There is hereby conferred upon Gulf Coast Properties (Inc.), its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the pro-

ceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said Gulf Coast Properties (Inc.), its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of New York, the State of Vermont, any public agency or political subdivision of either of such States within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interests in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall at any time be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

SEC. 6. The Gulf Coast Properties (Inc.), its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War and with the Highway Departments of the States of New York and Vermont a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said Gulf Coast Properties (Inc.), its successors and assigns, shall make available all of its records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to Gulf Coast Properties (Inc.), its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. COPELAND subsequently said: Mr. President, I ask unanimous consent to return to Calendar No. 855. It seems that my colleague the junior Senator from New York [Mr. WAGNER], who is engaged in an important committee meeting and can not be here this afternoon, desires to have the bill passed over. I was not advised of that until just at this moment. I ask that we may return to the bill, that the votes by which it was ordered to a third reading and passed may be reconsidered, and the bill be returned to the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DALE. Mr. President, may I ask what was the request of the Senator from New York?

The PRESIDING OFFICER. The Senator from New York asks that House bill 10643 be restored to the calendar.

Mr. DALE. I would like to have the Senator explain the purpose of his request.

Mr. COPELAND. I have just this minute been advised that my colleague the junior Senator from New York [Mr. WAGNER] desires to be here when the bill is considered. He is engaged in an important committee hearing this afternoon and can not be present. Out of courtesy to him I have asked that we return to the bill and have it put back on the calendar. Personally I have no objection at all, but my colleague is interested for some reason and the only courteous thing I could see is to have it returned to the calendar in order that he may be present when it is considered.

Mr. DALE. On the other hand, Vermont people are very much interested in getting the bill through. Only this afternoon word was sent to me from the other House that they are anxious to get the bill through. I do not like to be put in the position of consenting to have it put back on the calendar.

Mr. COPELAND. Let me ask the Presiding Officer a question: How long would I have to bring the bill back if it should stand now as passed?

The PRESIDING OFFICER. Two calendar days after today.

Mr. COPELAND. I think I shall have to move to reconsider——

Mr. DALE. The Senator from New York does not need to move to reconsider, because, of course, I will grant his request; but I hope it will not be delayed much longer.

Mr. COPELAND. I am assured that my colleague will be here to-morrow, and at some time during the day I shall be glad to join with the Senator from Vermont in asking for its immediate consideration. There will be no delay so far as I am concerned.

Mr. DALE. Very well.

The PRESIDING OFFICER. Without objection, the votes by which the bill was ordered to a third reading and passed are reconsidered, and the bill will be restored to its place on the calendar.

### BILL PASSED OVER

The bill (S. 3919) awarding a gold medal to Lincoln Ellsworth was announced as next in order.

Mr. COPELAND. Mr. President, the Senator from Connecticut [Mr. BINGHAM] is interested in the bill. I would not care to have it passed in his absence. Therefore I ask that it go over without prejudice.

The PRESIDING OFFICER. The bill will be passed over.

### PENSIONS AND INCREASE OF PENSIONS

The bill (H. R. 10159) granting pensions and increase of pensions to widows and former widows of certain soldiers, sailors, and marines of the Civil War, and for other purposes, was announced as next in order.

Mr. KING. Mr. President, will the Senator let the bill go over until the next time the calendar is called?

Mr. NORBECK. Yes. This is a general pension increase for widows. The Senator from Utah has asked that this go over because he has not had an opportunity to examine it. I think that is a perfectly reasonable request. But the Senator from Utah asked that same thing two or three weeks ago with reference to another bill on the calendar. I ask that the other bill be taken up at this time. It is a small bill and provides specific pensions for the Regular Establishment, involving about 300 men and small increases.

Mr. KING. I have no objection.

The PRESIDING OFFICER. On objection, House bill 10159 will be passed over. Is there objection to the request of the Senator from South Dakota for the present consideration of Calendar 738?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 10141) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, which had been reported from the Committee on Pensions with amendments.

Mr. KING. Mr. President, may I ask the Senator from South Dakota if the provisions in the bill change in any way existing

law which limits the pensionable status to widows who have been married since 1905?

Mr. NORBECK. No; there is no change in that particular.

Mr. WALSH of Massachusetts. Mr. President, may I inquire if this is the bill which increases the pensions of widows from $30 to $50?

Mr. NORBECK. That is the bill which the Senator from Utah has asked to have passed over, and it has gone over.

Mr. WALSH of Massachusetts. It does not change the age limit and provide for pensions for widows married since 1905?

Mr. NORBECK. It does not change the marriage date; no. The Senator from Utah has asked that that bill go over and we are now considering House bill 10141.

Mr. WALSH of Massachusetts. I favor this bill and urge favorable action during the present session. There is general approval of this increase to widows throughout the country. Many widows in destitute circumstances will be greatly benefited by this increase.

Mr. DILL. Mr. President, may I say that in the meantime I hope the Senator from Utah will investigate the bill which was passed over, because a great many of the widows will not be here much longer to have what is to be allowed them.

Mr. NORBECK. I fully agree with the Senator.

The PRESIDING OFFICER. The first amendment of the Committee on Pensions will be stated.

The first amendment of the Committee on Pensions was, on page 2, after line 2, to strike out:

The name of William Q. Cooper, late of Fifth Battery, Iowa Volunteer Light Artillery, war with Spain, and pay him a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 2, after line 5, to strike out:

The name of Ernest W. Raper, late of Company H, Seventh Regiment Ohio Volunteer Infantry, war with Spain, and pay him a pension at the rate of $6 per month.

The amendment was agreed to.

The next amendment was, on page 3, after line 2, to strike out:

The name of Daniel B. Jones, late of band, Sixth Regiment United States Cavalry, war with Spain, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 3, after line 6, to strike out:

The name of Paulinus G. Huhn, late of Company M, Thirteenth Regiment Minnesota Volunteer Infantry, war with Spain, and pay him a pension at the rate of $72 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 3, after line 22, to strike out:

The name of Vonny A. McClaren, late of Battery C, Ninth Regiment United States Field Artillery, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 4, after line 9, to strike out:

The name of Mary Elseser, former widow of Valentine Steil, late of Battery C, First Regiment United States Artillery, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 4, after line 13, to strike out:

The name of Emma R. Walters, widow of Charles R. Walters, late of Company D, Second Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 6, after line 18, to strike out:

The name of Charles W. Paul, late of Company I, Eighth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $72 per month in lieu of that he is now receiving: *Provided*, That the increased rate shall not be paid to him for any period he is an inmate of a State or National soldiers' home.

The amendment was agreed to.

The next amendment was, on page 7, line 15, after the words "rate of," to strike out "$25" and insert "$20," so as to read:

The name of Sarah E. Bascomb, widow of Herbert C. Bascomb, late of Company B, Nineteenth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 8, after line 10, to strike out:

The name of Charles Sabins, late of Sixth Battery, Iowa Volunteer Light Artillery, war with Spain, and pay him a pension at the rate of $15 per month.

The amendment was agreed to.

The next amendment was, on page 12, after line 22, to strike out:

The name of Olympia T. Meena, widow of Stratios Meena, late of the United States Navy, Regular Establishment, and pay her a pension at the rate of $20 per month, with $6 per month additional on account of the sailor's children under 16 years of age, in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 16, after line 15, to strike out:

The name of Charles W. Anderson, late of Company H, Signal Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $90 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 17, after line 10, to strike out:

The name of Elsie M. Hayes, widow of Perley B. Hayes, late of Troop C, Second Regiment Rhode Island National Guard Cavalry, border defense, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 18, line 9, after the words "rate of," to strike out "$12" and insert "$20," so as to read:

The name of Rutherford B. H. Blazer, late of Company G, First Regiment Ohio Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 19, line 23, after the words "rate of," to strike out "$75" and insert "$50," so as to read:

The name of Kate Coffee McDougal, widow of Charles J. McDougal, late commander, United States Navy, Regular Establishment, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 20, line 20, after the words "rate of," to strike out "$6" and insert "$12," so as to read:

The name of Harry H. Davis, late of Company K, Third Regiment Missouri Volunteer Infantry, and Signal Corps, United States Army, war with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 21, after line 13, to strike out:

The name of John E. Quinn, late of Company B, First Regiment Nevada Volunteer Infantry, war with Spain, and pay him a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 21, after line 16, to strike out:

The name of John Prater, late of Company K, Nineteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 22, after line 22, to strike out:

The name of Edith L. Quick, widow of John Henry Quick, late of the United States Marine Corps, war with Spain, and pay her a pension at the rate of $50 per month in lieu of the compensation that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 23, after line 21, to insert:

The name of James W. Ashby, late of Troop I, Twelfth Regiment United States Cavalry, and pay him a pension at the rate of $6 per month.

The name of Arthur E. Wilcox, late of Company K, Forty-first Regiment United States Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The name of Nicholas Muccino, late of One hundred and sixty-seventh Company, United States Coast Artillery Corps, and pay him a pension at the rate of $8 per month.

The name of Max Blank, late of Company B, Sixteenth Regiment United States Infantry, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Patrick Flynn, late of the United States Navy, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Katie M. Gale, widow of John N. Gale, late of Company C, Third Regiment United States Infantry, and pay her a pension at the rate of $12 per month.

The name of Christopher S. Alvord, late of Company D, Fourth Regiment United States Infantry, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Forrest W. Luro, dependent and helpless son of Henry W. Luro, late of Company A, First Regiment Maine Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Maud D. Davis, widow of Armory H. Davis, late of the United States Navy, and pay her a pension at the rate of $20 per month.

The name of John B. Crowell, late of Company G, Third Regiment New York Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of James Corcoran, alias John Lee, late of Battery F, Second Regiment United States Artillery, and pay him a pension at the rate of $6 per month.

The name of Stephen Crotty, late of Battery I, Second Regiment United States Artillery, and pay him a pension at the rate of $20 per month.

The name of Edwin Duner, late of the United States Navy, and pay him a pension at the rate of $10 per month.

The name of William H. Comerford, late of the United States Navy, and pay him a pension at the rate of $12 per month.

The name of John Donahue, late of the United States Navy, and pay him a pension at the rate of $6 per month.

The name of Ellen H. Sharp, widow of Frederick D. Sharp, late of Company E, Twentieth Regiment United States Infantry, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The name of Irvin O. Carson, late of Troop I, Fifth Regiment United States Cavalry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Marion Thacker, late of Troop K, Fourth Regiment United States Cavalry, and pay him a pension at the rate of $10 per month in lieu of that he is now receiving.

The name of Mary E. Dalgarn, widow of Francis E. Dalgarn, late of Company B, Fourth Regiment United States Infantry, and pay her a pension at the rate of $12 per month.

The name of Thomas Kinney, late of Company E, First Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Louis N. White, late of Troop F, Seventh Regiment United States Cavalry, and pay him a pension at the rate of $6 per month.

The name of John F. Conrad, late of Company B, First Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Jennie Springsted, widow of George E. Springsted, late of General Service, United States Army, and pay her a pension at the rate of $12 per month.

The name of Emilio Du Bois, late of the Ninety-first Observation Squadron, Air Service, United States Army, and pay him a pension at the rate of $6 per month.

The name of Royce E. Marshall, late of Battery B, First Artillery Indiana National Guard, and pay him a pension at the rate of $10 per month.

The name of Grace E. Avery, widow of Lieut. Commander Frank Brewster Avery, United States Navy, and pay her a pension at the rate of $30 per month.

The name of Daniel F. Shaser, late of Captain Packwood's Washington Volunteers, Nez Perce outbreak, and pay him a pension at the rate of $30 per month.

The name of Mary Larson, widow of John Larson, late of the United States Navy, and pay her a pension at the rate of $12 per month.

The name of Arthur S. Pattison, late of the United States Navy, and pay him a pension at the rate of $20 per month.

The name of Sarah M. Brown, mother of Evert L. Brown, late of the Coast Artillery, school detachment, United States Army, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Abe Erlich, late of Company I, Third Regiment United States Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Teresita Weitz, widow of Charles C. Weitz, alias Conroy C. Sexton, late of the United States Marine Corps, and Company E, Nineteenth United States Infantry, and pay her a pension at the rate of $12 per month, and $6 for each minor child until they attain the age of 16 years.

The name of Catarino Armijo, late of Company A, First Regiment New Mexico National Guard Infantry, and pay him a pension at the rate of $12 per month.

The name of John Mosley, late first lieutenant Company A, Barbour County (Kans.) State Militia, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving, to commence February 17, 1927.

The name of Mary Isabel Lockard, dependent mother of Addison E. Stainbrook, late of Company E, Forty-fourth Regiment United States Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of William A. Lipscomb, late of Company C, Fortieth Regiment United States Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The name of Aaron Schollars, teamster, Quartermaster Department, and pay him a pension at the rate of $20 per month.

The name of William S. Randall, late of Capt. D. B. Randall's Company B, Second Regiment Idaho Volunteers, and pay him a pension at the rate of $20 per month.

The name of William L. Curry, late scout in the United States Army, Nez Perce Indian war, and pay him a pension at the rate of $30 per month.

The name of George W. Peck, late of Company F, Capt. H. J. Maxon's company, Third Regiment Idaho Volunteer Infantry, and pay him a pension at the rate of $30 per month.

The name of Andrew J. Stewart, late of the Quartermaster Department as civilian employee against Indians, and pay him a pension at the rate of $30 per month.

The name of Evelyn Fjeldsted, helpless daughter of James P. Fjeldsted, alias Jans Fieldsted, late of Capt. C. Madsen's company, Utah Militia Infantry, Black Hawk war, and pay her a pension at the rate of $20 per month.

The name of Frank H. Winter, late of Company B, First Battalion Nevada Infantry, and pay him a pension at the rate of $20 per month.

The name of Joseph J. Ivie, late of Capt. Henry McArthur's company, Utah Volunteers, and pay him a pension at the rate of $20 per month.

The name of William J. Williams, late of Companies K and G, Third Regiment United States Infantry, and pay him a pension at the rate of $12 per month.

The name of Alice Baker, widow of Norvel H. Baker, late first lieutenant Troop E, Second Regiment United States Volunteer Cavalry, and pay her a pension at the rate of $30 per month.

The name of Ross A. Hetrick, late of Battery C, Fifty-fifth United States Coast Artillery, and pay him a pension at the rate of $17 per month.

The name of Seth Seaton Ward, cadet of West Point Military Academy, and pay him a pension at the rate of $30 per month.

The name of Margaret Fondersmith, widow of James Fondersmith, late of Companies H and C, Eighteenth Regiment United States Infantry, and pay her a pension at the rate of $12 per month.

The name of Fred Erton, late of Company B, Twenty-ninth Regiment United States Infantry, and pay him a pension at the rate of $24 per month.

The name of Nannie M. Hixson, dependent mother of Virgil C. Hixson, late of Company C, Twentieth Regiment United States Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Joseph Baker, who served as Indian scout, United States Army, and pay him a pension at the rate of $50 per month.

The name of William Lentz, late of Company E, One hundred and fifty-eighth Regiment Indiana Infantry, and Company M, Nineteenth United States Infantry, and pay him a pension at the rate of $12 per month.

The name of Elma W. Brett, widow of Brig. Gen. Lloyd M. Brett, late of the United States Army, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Jirah I. Allen, late a scout in the United States Army, Indian war, and pay him a pension at the rate of $20 per month.

The name of Ella M. Beckett, contract nurse, Medical Department, United States Army, during the Spanish-American War, and pay her a pension at the rate of $30 per month.

The name of Joseph J. Johnson, late of Company B, Thirty-third Regiment United States Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Effie I. Disney, widow of William Disney, late of the United States Navy, and pay her a pension at the rate of $30 per month.

The name of Anna M. Sherman, former widow of Ira C. Mansfield, alias James Greer, late of Troop G, Sixth United States Cavalry, and pay her a pension at the rate of $30 per month.

The name of Albert A. Hill, United States Navy, and pay him a pension at the rate of $12 per month.

The name of George M. Parker, late of Tenth Company, United States Signal Corps, and pay him a pension at the rate of $20 per month.

The name of Alice B. Gordon, widow of Thomas E. Gordon, alias Edwin T. Gordon, late of the United States Navy, and pay her a pension at the rate of $12 per month.

The name of Glenn Wisely, late of Company G, Third Regiment United States Infantry, and pay him a pension at the rate of $10 per month.

The name of Ida B. Davis, dependent mother of Jesse W. Davis, late of Troop A, Twelfth Regiment United States Cavalry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of John L. Baxter, late a scout with the United States Army, Bannock Indian war, and pay him a pension at the rate of $20 per month, to commence March 4, 1927.

The name of Harrison H. Bradford, late of Company H, First Regiment Louisiana Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Frank H. Wilson, alias Henry Wencel, late of the United States Navy, and pay him a pension at the rate of $17 per month.

The name of Richard L. Gaffney, late of Company K, First Regiment Ohio Volunteer Infantry, war with Spain, and pay him a pension at the rate of $12 per month.

The name of Fred W. Fox, late of Company H, Fourth Regiment United States Infantry, and pay him a pension at the rate of $20 per month.

The name of Reuben J. Reals, late of Company F, First Battalion Wyoming Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of George Cuts-Half, late of Troop L, Third Regiment United States Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Margaret P. Long, dependent mother of Willie Long, late of Troop A, Sixth Regiment United States Cavalry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Adam H. Kramer, late of the United States Navy, and pay him a pension at the rate of $20 per month.

The name of George Frye, alias Walter Davison, late of the United States Marine Corps, and pay him a pension at the rate of $12 per month.

The name of Charles H. Sills, late of the Hospital Corps, United States Army, and pay him a pension at the rate of $24 per month.

The name of Thomas Miller, alias James W. Huston, late of the United States Navy, and pay him a pension at the rate of $12 per month.

The name of Nora Ownby, widow of Robert Ownby, late of Capt. J. F. Blank's Company F, First Regiment New Mexico Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Gustave C. Barth, late of the United States Navy, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Bessie B. H. Cotten, widow of Lyman A. Cotten, late captain United States Navy, for the restoration of the minor, John H. Cotten, named to the roll, from February 17, 1927, and pay her an additional pension at the rate of $4 per month.

The name of Sherman Detwiler, late of Troop G, First United States Volunteer Cavalry, and pay him a pension at the rate of $20 per month.

The name of Chesley K. Sims, late of Capt. W. H. Biggerstaff's company, Payette Guards, Idaho Volunteers, and pay him a pension at the rate of $20 per month.

The name of Charles A. McComb, late of Company G, Twentieth Regiment United States Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Nelson E. Bucknam, alias Nelson Buckman, late of the United States Navy, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Horace V. Andrews, late of Company C, Tenth Regiment United States Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of William C. Milliner, late of Company H, Fourteenth Regiment United States Infantry, and pay him a pension at the rate of $12 per month.

The name of Marion M. Gray, widow of Hawthorne C. Gray, late a captain attached to the Air Corps, United States Army, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving: *Provided*, That in the event of the death or remarriage of said Marion M. Gray, the names of William Hawthorne Gray, Richard M. Gray, and Gordon J. Gray, minor children of said Hawthorne C. Gray and Marion M. Gray, shall be placed on the pension roll at the same rates as provided including the widow's rate from and after the date of the death or remarriage of said Marion M. Gray, and until they severally shall arrive at the age of 16 years.

The name of Emma L. Meyer, widow of Henry O. Meyer, late of Company K, First Regiment Washington Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Samuel Dorman, for service rendered in Indian wars in Meeker County, Minn., and pay him a pension at the rate of $20 per month.

The name of Adeline E. Myrick, widow of Frank C. Myrick, late scout under General Sibley during the Indian outbreak in the year 1862, and pay her a pension at the rate of $30 per month.

The name of Anne C. H. Howze, widow of Robert L. Howze, late major general, United States Army, and pay her a pension at the rate of $75 per month in lieu of that she is now receiving.

The name of Sanford S. Martin, late of the United States Navy, and pay him a pension at the rate of $12 per month.

The name of William S. Contell, late of Hospital Corps, United States Army, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Frank Schwartz, late of Company H, Third Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $20 per month.

The name of Catherine Shea, dependent mother of Jeremiah Shea, late of Company D, Fifteenth Regiment United States Infantry, and pay her a pension at the rate of $20 per month.

The name of Andrew Brown, late of Company H, Seventh Regiment United States Infantry, and Company G, Fourth Regiment United States Infantry, and pay him a pension at the rate of $12 per month.

The name of George Kinley, dependent minor child of Roy Kindley, now known as Kinley, late of Company I, Fifth Regiment United States Infantry, and pay him a pension at the rate of $12 per month until he attains the age of 16 years.

The name of Mary W. Osterhaus, widow of Rear Admiral Hugo Osterhaus, late of the United States Navy, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Charles L. Heintze, late of Company G, First Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Edward R. Baker, late of Company B, First Battery, United States Engineers, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of John Shuler, late of One hundred and first Company, United States Coast Artillery, and pay him a pension at the rate of $12 per month.

The name of Atison L. Southard, late of Company L, Seventeenth Regiment United States Infantry, and pay him a pension at the rate of $20 per month.

The name of Ursula S. G. Cleaver, widow of Samuel R. Cleaver, late of Company G, Thirty-fourth Regiment United States Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of Mary R. Dickman, widow of Joseph T. Dickman, late major general, United States Army, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Sarah E. Kiplinger, widow of John Kiplinger, late of Company D, Sixth Regiment United States Infantry, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The name of Jacob J. King, late of Company H, Second Regiment North Carolina Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Alfred Barker, late of Company K, Eighteenth Regiment United States Volunteer Infantry, and pay him a pension at the rate of $17 per month.

The name of David Fisher, late of Company A, Second Regiment United States Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The name of Wilbur B. Swafford, late of Company E, Fifty-second Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $30 per month.

The name of Mary E. Bennett, widow of Frank M. Bennett, late a captain, United States Navy, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Christina K. Earle, widow of Harvey R. Earle, alias Harvey C. Whitney, late of Company K, Twenty-first Regiment United States Infantry, and pay her a pension at the rate of $12 per month.

The name of Humphrey J. Roberts, late of Company F, Twentieth Regiment Minnesota Home Guard Militia, and pay him a pension at the rate of $20 per month.

The name of Joseph Gilley, late of Company F, Twentieth Regiment Minnesota Home Guard Militia, and pay him a pension at the rate of $20 per month.

The name of James D. Price, late of Company F, Twentieth Regiment Minnesota Home Guard Militia, and pay him a pension at the rate of $20 per month.

The name of Bascom Prater, late of Company E, Second Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $8 per month.

The name of George W. King, late of Troop D, Fifteenth Regiment United States Cavalry, and One hundred and third Company, Coast Artillery Corps, and pay him a pension at the rate of $10 per month.

The name of Jane Barry, dependent mother of Joseph E. Barry, late of Troop D, First Regiment Ohio Volunteer Cavalry, and pay her a pension at the rate of $20 per month.

The name of Elizabeth Swormstedt, widow of Calvin C. Swormstedt, alias James E. Stanley, late of One hundred and twenty-fourth Company, United States Coast Artillery, and pay her a pension at the rate of $12 per month, and $2 per month for each minor child until they attain the age of 16 years.

The name of William J. Carter, late of Company D, First Regiment South Carolina Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of James T. Carl, late of Capt. Cyrus M. Ricker's Company A, Barbour County (Kans.) State Militia, and pay him a pension at the rate of $20 per month.

The name of Neal Whaley, late of Company E, Thirteenth Regiment United States Infantry, and pay him a pension at the rate of $6 per month.

The name of Pearl McKinley, widow of Russell A. McKinley, late of Troop C, Second Regiment United States Cavalry, and pay her a pension at the rate of $30 per month and $6 per month each for two minor children until they attain the age of 16 years.

The name of Edward L. Schmiedemann, late of Company B, First Regiment Nebraska National Guard Infantry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Gustav Wulff, late of Company D, Twelfth Regiment United States Infantry, and pay him a pension at the rate of $17 per month.

The name of Milous Day, late of Company D, First Regiment of Capital Guards, Kentucky Infantry, and pay him a pension at the rate of $50 per month.

The name of Samuel H. Anderson, late an employee of the Quartermaster Department in the Yellowstone expedition, and pay him a pension at the rate of $20 per month.

The name of Antoine Claymore, late a scout in the Government military service under the command of David S. Stanley, in 1872, and pay him a pension at the rate of $20 per month.

The name of George R. Odle, late of Capt. D. B. Randall's company, Idaho Volunteers, Nez Perce Indian War, and pay him a pension at the rate of $20 per month.

The name of Herman Martin, late of Nineteenth Company, Coast Artillery Corps; One hundred and seventieth Company, Coast Artillery Corps; and Company D, Eighteenth Regiment United States Infantry, and pay him a pension at the rate of $12 per month.

The name of Catherine Foly, mother of Michael J. Hoy, late of the United States Navy, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Daisy Jinks, widow of Richard Jinks, late of Company I, Sixth United States Infantry, and Company D, Sixteenth Regiment United States Infantry, and pay her a pension at the rate of $20 per month.

The name of Mary Two-Eagle, widow of Two-Eagle, late of Company D, Indian Scouts, United States Army, and pay her a pension at the rate of $30 per month.

The name of Green L. Collins, late of Company A, First Regiment Georgia Volunteer Infantry, and pay him a pension at the rate of $30 per month.

The name of Patrick Staton, late of Company D, Third Regiment United States Infantry, and pay him a pension at the rate of $17 per month.

The name of John J. Hughes, late of Company M, Eleventh Regiment United States Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The name of William Franklin DeSpain, late of Capt. Emmet Wilson's company, Oregon Volunteers, Bannock war, 1878, and pay him a pension at the rate of $20 per month.

The name of James W. Allen, late of Capt. F. C. Sells's company, Oregon Volunteers, in 1878, and pay him a pension at the rate of $20 per month.

The name of Julia Fuller, remarried widow of Mathias Connors, late of Troop M, Fifth Regiment United States Cavalry, and pay her a pension at the rate of $12 per month.

The name of Luna E. W. Allen, widow of Heber H. Allen, late of Company H, One hundred and sixty-first Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of James L. Huston, late of Troop I, Seventh Regiment United States Cavalry, and pay him a pension at the rate of $12 per month.

The name of Francis H. Kearney, late of Capt. Emmert Wilson's company, Second Regiment Oregon Volunteers, Bannock war, 1878, and pay him a pension at the rate of $20 per month.

The name of Charles A. Packwood, late of Captain Painter's company, Washington Volunteers, Bannock war, 1878, and pay him a pension at the rate of $20 per month.

The name of Hubert L. Bassett, late of Capt. Narcissus A. Connoyer's company, Oregon Volunteers, Bannock war, 1878, and pay him a pension at the rate of $20 per month.

The name of Sarah R. Bates, widow of Joseph W. Bates, late of Capt. F. C. Sells's company, Oregon Volunteer Infantry, Bannock war, 1878, and pay her a pension at the rate of $20 per month.

The name of Charles E. Finch, late of Capt. Emmet Wilson's company, Oregon Volunteers, Bannock war, 1878, and pay him a pension at the rate of $20 per month.

The name of Sarah Kimball, dependent mother of John W. Froman, late of Company D, Second Regiment United States Infantry, and pay her a pension at the rate of $20 per month.

The name of Marie B. Granger, widow of Ralph S. Granger, late colonel United States Army, retired, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Patrick M. Shea, late of the United States Marine Corps, war with Spain, and pay him a pension at the rate of $20 per month.

The name of Wallace Barkman, dependent father of Ralph Barkman, ordinary seaman, United States Navy, killed by explosion on United States ship *Charleston,* and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Lowell T. Newlon, late of Battery A, First Regiment Illinois Light Artillery, and pay him a pension at the rate of $20 per month.

The name of Herbert A. Maloney, late of Company B, First Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Lowell A. Chamberlin, late of Troop B, First Regiment United States Volunteer Cavalry, war with Spain, and pay him a pension at the rate of $30 per month.

The name of Rosanna Sanders, dependent mother of Henry Sanders, late of Company K, Eighteenth Regiment United States Infantry, and pay her a pension at the rate of $20 per month.

Mr. WALSH of Massachusetts. Mr. President, will the Senator state how many pensioners are affected by the bill?

Mr. NORBECK. It carries about 300 men. These are not Civil War pensions.

Mr. WALSH of Massachusetts. Is it one of the omnibus bills, so called?

Mr. NORBECK. Yes; one of the small ones. It covers the Regular Establishment and Spanish War. The Civil War pensions are not covered in this bill.

Mr. WALSH of Massachusetts. I hope it will pass.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

### AMENDMENT OF SEAMEN'S ACT

The bill (S. 2945) relating to the payment of advanced wages and allotments in respect of seamen on foreign vessels and making further provision for carrying out the purposes of the seamen's act, approved March 4, 1915, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.,* That the first paragraph of paragraph (e) of section 10 of the act entitled "An act to remove certain burdens on the American merchant marine and encourage the American foreign-carrying trade, and for other purposes," approved June 26, 1884, as amended, is further amended, to read as follows:

"(e) This section shall apply to payments of advance wages and allotments, in respect of seamen on foreign vessels, whether made within or without the United States or territory subject to the jurisdiction thereof, as well as to payments of advance wages and allotments in respect of seamen upon vessels of the United States; except that no criminal penalty under this section shall be imposed for a violation of this section in respect of a seaman upon a foreign vessel if such violation occurs outside the United States and territory subject to the jurisdiction thereof. The courts of the United States shall be open to seamen for suits for payment of wages, irrespective of whether the wages were earned upon a vessel of the United States or a foreign vessel, or within or without the United States or territory subject to the jurisdiction thereof, and in any such suit the provisions of this section shall be applicable. Any master, owner, consignee, or agent of any foreign vessel who violates the provisions of this section within the United States or territory subject to the jurisdiction thereof shall be liable to the same penalty to which the master, owner, or agent of a vessel of the United States would be liable for a similar violation."

Mr. KING. Mr. President, may I have an explanation of the bill? I make the request because I have received a letter from a seaman who thought it was not quite broad enough. I am not familiar with the matter.

Mr. LA FOLLETTE. Mr. President, the bill has been very carefully considered by the committee, may I say to the Senator from Utah. It is merely designed to make effective the equalization features of the so-called La Follette Seamen's Act, which have been frustrated by the decisions of the Supreme Court, which have not made the payment of advanced wages made by foreign vessels outside of territorial waters of the United States illegal in the deduction of the advanced wages of seamen. Therefore, when seamen enter the ports of the United States they do not have sufficient money coming to them to enable them to take advantage of the right to quit the vessel at a safe harbor.

The La Follette Act attempted to make that possible in order to equalize the wages between American shipping and foreign shipping. After the decision of the Supreme Court another attempt was made in the Jones Act to meet the decision, but apparently it did not satisfy the Supreme Court of the United States in being sufficiently specific. Therefore, after careful consideration, the committee reported this bill in a further attempt to make this specific equalization in the La Follette Act workable and thereby tend to equalize the wages as between foreign shipping and shipping flying the flag of the United States.

Mr. KING. May I inquire of the Senator whether Mr. Furuseth has approved of the bill?

Mr. LA FOLLETTE. So far as I know, Mr. Furuseth is in favor of the passage of this bill; in fact, I know that he is.

Mr. KING. Then, so am I.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC HEALTH SERVICE

The bill (H. R. 11026) to provide for the coordination of the public-health activities of the Government, and for other purposes, was announced as next in order.

Mr. KING. Let that bill go over.

Mr. JONES. Mr. President, I hope the junior Senator from Utah will not ask to have that bill go over. It has been very carefully considered by the House of Representatives, by the House committee, and has also been very carefully considered by the Committee on Commerce of the Senate; also by physicians and by the Senator's colleague the senior Senator from Utah [Mr. SMOOT]. The amendments that have been made by the Senate committee are entirely satisfactory to the Senator's colleague. His colleague has told me that he would like to have the bill passed. I therefore hope the junior Senator from Utah will withdraw his objection to the consideration of the bill. I think its passage would be in the interest of economy, efficiency, and for the benefit of the service.

Mr. KING. Mr. President, I should like to make an inquiry of the Senator from Washington. Recalling the several bills that were brought to our attention a number of years ago dealing with the Public Health Service, and which sought, of course, to add to the personnel and to increase the salaries, does this bill propose to enlarge the personnel and to make any increase in compensation?

Mr. JONES. There are some increases, but, on the whole, my understanding of the bill is that there is no substantial, if any, increase in compensation and practically there is no increase in the number of employees.

I wish to say that those are some of the questions that the Senator's colleague looked into very carefully, and his colleague told me that with the amendments which are now proposed to the bill he was entirely satisfied with the bill and would like to see it passed.

Mr. FLETCHER. Mr. President, may I say that the bill will promote cooperation in the service, which will make for efficiency.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Commerce with amendments.

The first amendment was, in section 2, page 2, line 7, after the words "Hygienic Laboratory," to insert "in the District of Columbia"; and in line 9, after the word "facilities," to insert the word "therein," so as to read:

(b) The Secretary of the Treasury is authorized to establish such additional divisions in the Hygienic Laboratory in the District of Columbia as he deems necessary to provide agencies for the solution of public-health problems, and facilities therein for the coordination of research by public health and pharmaceutical officials and scientists and for demonstrations of sanitary methods and appliances.

The amendment was agreed to.

The next was in section 4, page 3, line 20, after the word "date," to insert "but no service shall be counted since that date except active commissioned service: *Provided*, That under the provisions of section 4 (a) (2), not more than 110 appointments shall be made, not more than 6 appointments shall be in grades above that of surgeon, and no appointment shall be in a grade above that of medical director," so as to read:

(2) Any sanitary engineer, medical, dental, or other scientific officer, or pharmacist engaged on comparable duties, in the Public Health Service upon the date of passage of this act, except commissioned officers of the regular corps, after examination by a board of officers convened by the Surgeon General of the Public Health Service, and upon the recommendation of such board and the Surgeon General, may be appointed to any grade specified by such board and approved by the Surgeon General, having due regard to the salary received by such officer at the time of such appointment; and in computing longevity pay and pay period the service of any officer appointed under the provisions of this paragraph who was in the Public Health Service on June 30, 1922, shall be counted in the same manner as provided for regular commissioned officers in the Public Health Service on that date, but no service shall be counted since that date except active commissioned service: *Provided*, That under the provisions of section 4 (a) (2), not more than 110 appointments shall be made, not more than 6 appointments shall be in grades above that of surgeon, and no appointment shall be in a grade above that of medical director.

The amendment was agreed to.

The next amendment was, on page 4, line 13, after the words "Surgeon General," to insert the following proviso:

*Provided*, That not more than three such appointments shall be made under the provisions of section 4 (a) (3) in any one fiscal year.

The amendment was agreed to.

The next amendment was, on page 4, after line 15, to insert:

(4) Any person commissioned in the regular corps of the Public Health Service under the provisions of this act of an age greater than 45 years, if placed on waiting orders for disability incurred in line of duty, shall receive pay at the rate of 4 per cent of active pay for each complete year of service in the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, or Public Health Service, the total to be not more than 75 per cent.

The amendment was agreed to.

The next amendment was, on page 4, line 25, after the word "shall," to strike out the words "designate the grades of" and to insert the words "prescribe appropriate titles for," so as to read:

(b) The Surgeon General of the Public Health Service shall prescribe appropriate titles for commissioned officers of the Public Health Service other than medical officers, corresponding to the grades of medical officers.

The amendment was agreed to.

The next amendment was, on page 5, line 4, after the word "officers," to insert "of the regular corps"; in line 5, after the word "Service," to strike out the words "shall be promoted"; in line 6, after the word "examination," to insert the words "under regulations approved by the President, shall be promoted" and to strike out the words "as now provided by law for commissioned medical officers of the Public Health Service"; and in line 10, after the word "except," to strike out the words "that for" and to insert the word "that," so as to read:

(c) Hereafter commissioned officers of the regular corps of the Public Health Service, after examination under regulations approved by the President, shall be promoted according to the same length of service as officers of corresponding grades of the Medical Corps of the Army; except that—

The amendment was agreed to.

The next amendment was, on page 5, at the beginning of line 11, to insert "(1) For," so as to make the clause read:

(1) For purposes of future promotion any person whose original appointment in the regular corps is in a grade above that of assistant surgeon shall be considered as having had on the date of appointment service equal to that of the junior officer of the grade to which appointed.

The amendment was agreed to.

The next amendment was, on page 5, after line 15, to insert:

(2) Pharmacists shall not be promoted above the grade of passed assistant surgeon.

The amendment was agreed to.

The next amendment was, on page 5, at the beginning of line 18, to insert "(d)"; in line 21, after the word "and," to strike out "if selected from the commissioned officers of the regular corps," so as to read:

(d) The Surgeon General of the Public Health Service shall hereafter be entitled to the same pay and allowances as the Surgeon General of the Army; and he shall, upon the expiration of his commission,

if not reappointed as Surgeon General, revert to the grade and number in the regular corps that he would have occupied had he not served as Surgeon General.

The amendment was agreed to.

The next amendment was, on page 5, line 25, after the words "Surgeon General," to insert the following proviso:

*Provided*, That the term of service of the Surgeon General of the Public Health Service shall be for four years unless sooner relieved and returned to the grade and number in the regular corps that he occupied previous to his appointment as Surgeon General: *And provided further*, That no person who has served for a period of eight years either before or after the passage of this act shall be eligible for reappointment as Surgeon General.

The amendment was agreed to.

The next amendment was on page 6, at the beginning of line 9, to strike out (d) and insert (e).

The amendment was agreed to.

The next amendment was on page 6, line 12, at the beginning of the line, to strike out (e) and insert (f).

The amendment was agreed to.

The next amendment was on page 6, after line 14, to insert:

(g) The term "scientific officers" as used in this act shall not be held to include clerical or administrative personnel.

The amendment was agreed to.

The next amendment was in section 6, page 6, at the end of line 25, to strike out the article "a" and insert "one"; on page 7, line 1, after the word "superintendent," to insert the words "one assistant superintendent, and such chief nurses"; and in line 2, after the word "and," to strike out the words "such other," so as to make the section read:

SEC. 6. There is hereby established in the Public Health Service, a nurse corps, which shall consist of one superintendent, one assistant superintendent, and such chief nurses and nurses as the Secretary of the Treasury may deem necessary. The members of the nurse corps shall be entitled to receive the same pay and allowances as members of the Nurse Corps of the Army.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

### INTER-AMERICAN HIGHWAY ON WESTERN HEMISPHERE

The Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. J. Res. 259) authorizing assistance in the construction of an inter-American highway on the Western Hemisphere, which was read, as follows:

Whereas the Sixth International Conference of American States, at Habana, Cuba, resolved as follows:

"To recommend to the Pan American Congress of Highways, which will meet at Rio de Janeiro in July of the present year, the consideration and adoption of agreements that will be conducive to the construction of a longitudinal communication highway to traverse the continent, taking into consideration and deciding all questions relative to studies, route, branch connections, technical and economical cooperation of the different countries, and other matters included in the determination of this problem.

"The Pan American Union is intrusted with the compilation of information and the preparation of projects which will serve to give effect to this resolution, submitting this material in due time to the Pan American Congress of Highways."

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That the Government of the United States should manifest the utmost interest in the purposes of the aforesaid resolution, and that in order to promote the speedy realization of these purposes and objects the President is requested to direct the several agencies of the Government, and they are hereby authorized, to lend such cooperation and assistance as may be feasible and appropriate with a view to having the matter thoroughly considered by the approaching conference; and he is further requested to advise Congress of any conclusions reached and any action which may be suggested by the conference.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

### EXPANSION OF PUBLIC WORKS DURING UNEMPLOYMENT

The bill (S. 2475) to create a prosperity reserve and to stabilize industry and employment by the expansion of public works during periods of unemployment and industrial depression was announced as next in order.

Mr. KING. Let that bill go over.

Mr. JONES. Mr. President, I hope the Senator from Utah will look into that bill quite carefully. It is a very important bill and I think it is a rather desirable one.

Mr. KING. I shall be very glad to look into the bill.

Mr. JONES. I will say to the Senator from Utah that the understanding of the committee is that when the bill shall be considered we shall ask the Senate to disagree to the amendments which have been proposed.

Mr. WALSH of Massachusetts. Mr. President, is not this the bill in which many people are interested who are seeking some relief for the unemployment situation?

Mr. JONES. It is a bill to prevent unemployment conditions or to alleviate them if they shall threaten.

Mr. WALSH of Massachusetts. It is proposed to do so by the expansion of public works during periods of unemployment and industrial depression by carrying forward the Government building program?

Mr. JONES. Yes.

Mr. WALSH of Massachusetts. I have received a large number of letters favoring the bill, and from the examination I have been able to give the measure it seems to me to be sound legislation. I hope the Senator from Washington will press the measure. It is, in my opinion, a constructive measure, generally supported by students of the important problem of relieving the hardships and economic losses caused by unemployment.

Mr. JONES. I shall try to do so. As I have stated, I think it is a very important measure, and I hope that when we call the calendar next time we may be able to secure its passage.

Mr. COPELAND. Mr. President, I am sure, since the bill provides merely for carrying forward building projects which are already in view, that it will be possible to pass it. If we are facing a serious unemployment situation in this country, and if there are projects which we want to put into operation at some time soon, it would seem the part of good sense to do that work now. I hope the Senate will very shortly take action upon the bill.

Mr. WALSH of Massachusetts. I ask unanimous consent to have certain letters approving this measure which I have received printed in the RECORD. They also will help to confirm what I have heretofore asserted about the seriousness of the present unemployment situation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The letters are as follows:

BOSTON TYPOGRAPHICAL UNION, NO. 13,
*Boston, Mass., March 9, 1928.*

Hon. DAVID I. WALSH,
*United States Senate, Washington, D. C.*

DEAR SIR: Official and unofficial surveys of unemployment in this country tend to show existence of a deplorable condition among the workers. Modern civilization has failed to equalize the burdens men must bear but trade unions and other agencies have helped to alleviate some of these burdens. The greatest curse of modern industry is unemployment. During these acute times this organization is of the opinion that the Government of this great Republic should use every endeavor to mitigate the lot of the unemployed.

The Jones bill, S. 2475, is now before your honorable body. This bill would help to stabilize industry and give immediate help to the unemployed. Experience gained by its administration would help to solve the unemployment problem.

You are respectfully requested to give this bill your immediate and careful consideration, to the end that this needful legislation may be enacted as early as possible.

Respectfully yours,

JOHN O. BATTIS, *Secretary-Treasurer.*

---

KENDALL MILL, INC.,
*Boston, Mass., March 10, 1928.*

Hon. DAVID I. WALSH,
*United States Senate, Washington, D. C.*

DEAR SIR: Unemployment is becoming sufficiently widespread at the present time to cause a good deal of hardship and suffering. In my opinion a helpful measure toward stabilizing industry and employment is provided in the Jones bill, S. 2475, authorizing the appropriation of an additional $150,000,000 as a "prosperity reserve" to increase public construction at times when private industry is slack. My purpose in writing to you at this time is to put before you my approval of this bill and to urge your support of it.

Very truly yours,

HENRY P. KENDALL.

THE MEMORIAL HOSPITAL,
*Worcester, Mass., March 8, 1928.*

DAVID I. WALSH,
*Senator from Massachusetts,*
*Washington, D. C.*

MY DEAR SENATOR: As administrator of a hospital of over 200 beds serving chiefly the poor and middle classes I am finding much unemployment at present.

Anything you can do to speed the adoption of Senate bill 2475 for "prosperity reserve" would be much appreciated by me and others who are obliged to extend credit to these persons now out of work. To me this is a most important measure.

Thanking you for anything you may do, I am,

Very truly yours,

LUCIA L. JAQUITH.

---

BAY STATE MILLING CO.,
*Boston, Mass., March 5, 1928.*

Hon. DAVID I. WALSH,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR WALSH: The problem of unemployment is becoming so acute, the possibility of its becoming still more serious, and the prospect of early noteworthy improvement so improbable that Federal legislation such as proposed by the Jones bill, S. 2475, is deserving of early passage and enactment.

The country appears to be confronted by a problem that will be difficult to solve for a long period, as it would seem to rest mainly upon the operation of high-speed, mass production, which has been the guiding principle of American industry in nearly all lines since the World War.

This has resulted in a very great dislocation of labor, because the production per man employed has increased far beyond domestic consumptive capacity, or our ability to sell abroad.

As you know, here in New England the situation is further complicated by the changes in feminine fashion, the enormously reduced use of textiles for women's apparel, the reduced wear and tear of shoes owing to the greatly increased use of the automobile, and now the fad of young men going hatless is rapidly increasing.

The result is the highest percentage of unemployment known for many years.

But for the restriction of immigration during the past several years the situation to-day would be perilous. As it is, it will take a long time to make such readjustment of employment as will bring about a normal opportunity for the wage earner.

For this reason, I trust that the above bill will meet with your hearty support.

Yours very truly,

BERNARD J. ROTHWELL.

---

BROOKLINE, MASS., *March 8, 1928.*

Senator DAVID I. WALSH,
*Senate Office Building, Washington, D. C.*

MY DEAR SIR: As you well know, there is a terrible amount of unemployment now prevalent in the country. I understand that a bill authorizing an appropriation of an additional $150,000,000 as a "prosperity reserve" to increase public construction at times such as these is about to be reported in Congress. May I urge your support of the same?

Very truly yours,

ELIZABETH G. EVANS.

---

BOSTON, MASS., *March 5, 1928.*

Senator DAVID I. WALSH,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR WALSH: Mr. Filene has asked me to write you that he believes the long-range planning of public works is very desirable and that he would urge the early adoption of the Jones bill (S. 2475) for a "prosperity reserve" to help stabilize industry and employment.

Sincerely yours,

JOHNSON HEYWOOD.

---

BOSTON, MASS., *March 13, 1928.*

Senator DAVID I. WALSH,
*Washington, D. C.*

DEAR MR. WALSH: I strongly urge you to support the early adoption of the Jones bill, S. 2475, for a "prosperity reserve" to help stabilize industry and employment.

Yours sincerely,

ALICE P. TAPLEY.

---

NEWTON, MASS., *March 5, 1928.*

Senator DAVID WALSH.

DEAR SIR: I write to urge your favorable consideration of the Jones bill, S. 2475, providing for public construction during times of unemployment—in my view a crucially important measure.

Truly yours,

MARY W. CALKINS.

---

WINCHESTER, MASS., *March 9, 1928.*

Senator DAVID I. WALSH.

DEAR SIR: In this time of widespread unemployment I am writing to urge you to support the Jones bill, S. 2475, to help stabilize industry and employment.

Yours truly,

NATALIE JEWETT.

---

NEWBURYPORT, MASS., *March 15, 1928.*

Hon. DAVID I. WALSH,
*United States Senate.*

DEAR SENATOR WALSH: I was very glad indeed to read that your unemployment resolution had been passed, and I am now writing to say that the American Association of Labor Legislation is asking its members to urge their Senators to work for the adoption of Senate bill 2475—the Jones bill—which I understand provides for an appropriation of $150,000,000 as a prosperity reserve to increase public construction when industry is slack. This seems a modest sum to spend in keeping families together, to keep them housed and fed, when we can so glibly talk of spending much more on warships to destroy lives! I have seen so much of the anguish caused by unemployment that this effort to prepare to meet it, at least in part, appeals to me as a statesmanlike move, and I sincerely hope the bill will have your support.

Yours sincerely,

ANNE WITHINGTON.

---

MOUNT HOLYOKE COLLEGE,
OFFICE OF THE PRESIDENT,
*South Hadley, Mass., March 6, 1928.*

Senator DAVID I. WALSH,
*Washington, D. C.*

MY DEAR SENATOR WALSH: The Jones bill, S. 2475, for a "proposed reserve" to help stabilize industry and employment I hope appeals to you as a wise measure of relief.

Believe me,

Very sincerely yours,

MARY E. WOOLLEY.

Mr. JONES. I hope when the calendar shall be next called we may be able to act on this bill.

## REGISTRATION OF MAIL MATTER

The bill (H. R. 11279) authorizing the Postmaster General to establish a uniform system of registration of mail matter, and for other purposes, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That section 3927 of the Revised Statutes of the United States (sec. 384, title 39, U. S. C.), as amended by section 209 of the act of February 28, 1925 (43 Stat. L. 1058), be, and the same is hereby, amended further to read as follows:

"Mail matter shall be registered on the application of the party posting the same, and the fees chargeable therefor, in addition to the regular postage, shall be, in all cases, prepaid as follows:

"For registry indemnity not exceeding $50, 15 cents.

"For registry indemnity exceeding $50 and not exceeding $100, 20 cents.

"For registry indemnity exceeding $100 and not exceeding $200, 30 cents.

"For registry indemnity exceeding $200 and not exceeding $300, 40 cents.

"For registry indemnity exceeding $300 and not exceeding $400, 50 cents.

"For registry indemnity exceeding $400 and not exceeding $500, 60 cents.

"For registry indemnity exceeding $500 and not exceeding $600, 70 cents.

"For registry indemnity exceeding $600 and not exceeding $700, 80 cents.

"For registry indemnity exceeding $700 and not exceeding $800, 90 cents.

"For registry indemnity exceeding $800 and not exceeding $1,000, $1.

"All such fees shall be accounted for in such manner as the Postmaster General shall direct."

SEC. 2. That the provision of section 3 of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1885, and for other purposes," approved July 5, 1884 (23 Stat. L. 158, sec. 321, title 39, U. S.

C.), with respect to the registration and official matter of the executive departments, is hereby amended by adding the following paragraph, as follows:

"*Provided further,* That any official domestic letter or parcel to be registered by any executive department or bureau thereof, or independent Government institution, located at Washington, D. C., or by the Public Printer, which requires registration may be registered without the payment of any registry fee."

SEC. 3. The act of February 27, 1897 (ch. 340, 29 Stat. L. 599), providing limited indemnity for loss of registered mail matter, and the act of March 3, 1903 (32 Stat. L. 1174, sec. 381, title 39, U. S. C.), fixing such indemnity at not exceeding $100, and that portion of the act of March 4, 1911 (36 Stat. L. 1337, sec. 383, title 39, U. S. C.), making appropriations for the service of the Post Office Department and for other purposes, and providing indemnity for the loss of third and fourth class domestic registered matter, are amended to read as follows:

"For the greater security of valuable mail matter the Postmaster General may establish a uniform system of registration, and as a part of such system he may provide rules under which the senders or owners of any registered matter shall be indemnified for loss, rifling, or damage thereof in the mails, the indemnity to be paid out of the postal revenues, but in no case to exceed $1,000 for any one registered piece, or the actual value thereof when that is less than $1,000, and for which no other compensation or reimbursement to the loser has been made, the amount of such indemnity to be fixed by the Postmaster General."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

KATIE CASSIDAY

The bill (H. R. 4126) authorizing the Secretary of the Interior to issue a patent to Katie Cassiday for a certain tract of land was considered as in Committee of the Whole. It directs the Secretary of the Interior to issue a patent to Katie Cassiday for Great Falls desert-land entry 054131, embracing lots 3 and 6, and the southeast quarter northwest quarter section 7, township 26 north, range 43 east, principal meridian.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CROP PREDICTIONS

The bill (S. 3845) to prohibit predictions with respect to cotton or grain prices in any report, bulletin, or other publication issued by any department or other establishment in the executive branch of the Government, was announced as next in order.

Mr. METCALF. I ask that that bill go over.

Mr. HEFLIN. I ask that the amendments reported by the committee may be stated.

The PRESIDING OFFICER. The Chair understood the Senator from Rhode Island to ask that the bill go over.

Mr. HEFLIN. Mr. President, I hope that that request will be withdrawn. The bill has been reported by the committee with amendments, and I do not think there will be any objection to it.

Mr. METCALF. I have not had an opportunity to study the bill as I should like to do, and I prefer that it should go over at this time.

Mr. SMITH. Mr. President, I should like to state in this connection that this bill is very simple. It merely prohibits a practice by the Department of Agriculture which has proven very disastrous. All the bill does is to prohibit price forecasting in reference to certain standard agricultural commodities, and it is my opinion that it is a bill that should be passed at the very earliest moment for the protection of those who produce our crops.

Mr. HEFLIN. Mr. President, I should like to say further to the Senator from Rhode Island that we provided in the agricultural appropriation bill that crop price predictions should not be made any longer, and during the debate it was suggested to me by other Senators that legislation ought to be enacted providing a penalty for violating that provision. So this bill is in keeping with the suggestion that was made during the course of the debate when the agricultural appropriation bill was under consideration. I prepared this bill in order to provide a penalty for doing that which the law as now written in the agricultural appropriation bill prohibits, and I hope the Senator will withdraw his objection.

Mr. METCALF. I will have to object to the bill at the present time, but later, after I have had an opportunity to study it further, I may have no objection to it.

The PRESIDING OFFICER. The bill will be passed over.

Mr. DILL. Mr. President, before the bill goes over I note that the amendment proposes to strike out all reference to grain. I think that this bill ought to apply to grain. I do not believe predictions as to prices ought to be made regarding grain any more than with regard to cotton.

Mr. HEFLIN. Mr. President, I will say to the Senator from Washington that I agreed to strike out grain because some of the Senators from the grain-growing States felt that they should like to have grain out for the present, at least, until they could investigate the situation and see just what sort of predictions are being made regarding grain. For that reason, I was willing that the provision in regard to grain should come out of the bill at this time. After the Senators interested have studied the question they can offer a bill applying to grain exactly like this or in such form as they desire, and I will cheerfully support it.

Mr. DILL. I happen to represent a grain-growing State myself, and I, for one, do not see any reason why reference to the forecasting of grain prices should be left out of the bill.

The PRESIDING OFFICER. The clerk will state the next bill on the calendar.

Mr. SMITH. Mr. President, before the next bill shall be called, I wish to state that, in view of what has been disclosed by an investigation that has been conducted in reference to this question, I think the Senator from Rhode Island and every other Senator on this floor will readily agree that not only should we pass legislation of this kind but that we should attach to it a penalty that will deter any officer or employee in any of the Government departments from attempting to forecast the prices of agricultural commodities. I think when the Senator reads the evidence which has been gathered and realizes what that evidence means, he will withdraw any possible objection and have no desire to study the bill further.

The PRESIDING OFFICER. Under objection of the Senator from Rhode Island, the bill will be passed over.

ERADICATION OF EUROPEAN CORN BORER

The bill (H. R. 12632) to provide for the eradication or control of the European corn borer was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.,* That to enable the Secretary of Agriculture to apply such methods of eradication or control of the European corn borer over such area or areas as in his judgment may be necessary, including the employment of persons and means in the District of Columbia and elsewhere and all other necessary expenses, the sum of $7,000,000 is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, to be expended in cooperation with such authorities of the States concerned, organizations, or individuals as the Secretary may deem necessary to accomplish such purposes: *Provided,* That no part of the appropriation herein authorized shall be expended for the purchase of new machinery unless the Secretary of Agriculture deems such expenditure necessary by reason of an emergency, and in such case an amount not to exceed 1 per cent may be so expended: *Provided further,* That an amount not to exceed 9 per cent of the appropriation herein authorized may be expended for the employment of persons and means in the District of Columbia and elsewhere and all other necessary expenses other than necessary expenses for farm clean-up incidental to such eradication or control: *Provided further,* That in the discretion of the Secretary of Agriculture no expenditure shall be made hereunder until the States wherein the European corn borer exists shall have provided necessary regulatory legislation and until a sum or sums adequate to State cooperation shall have been appropriated, subscribed, or contributed by States, county, or local authorities or individuals or organizations: *Provided further,* That expenditures from the appropriation herein authorized for any necessary farm clean-up incidental to such eradication or control shall include only such as are, in the judgment of the Secretary of Agriculture, additional to those normal and usual in farm operations, and shall not exceed 90 per cent: *Provided further,* That no part of the appropriation herein authorized shall be used to pay the cost or value of corn or other farm crops or other property injured or destroyed: *And provided further,* That the Secretary of Agriculture may receive, and shall cover into the Treasury as miscellaneous receipts, any and all moneys authorized by the law of any State to be paid to the United States out of amounts assessed against and collected from any owner of premises who refuses or neglects to carry out State-control requirements when such moneys represent expenditures made on such premises by the United States under the provisions of this act.

Mr. DILL. Mr. President, I thought we had been appropriating for the eradication of the corn borer.

Mr. KING. We appropriated $10,000,000 for that purpose last year.

Mr. McNARY. Mr. President, the assumption is quite correct. Last year, in order to meet an emergency on account of the rapid spread of the destructive European corn borer, Congress passed an appropriation of $10,000,000, all of which, save about $1,000,000, has been expended in order to carry forward this very excellent and necessary work.

This bill was passed by the House carrying an appropriation of $7,000,000; it is now here for consideration. The purpose is to control and stop the invasion of this worm into the South and West and other portions of the country which are now free of it.

Mr. DILL. I may say to the Senator that there has been no such trouble in my State, but I happen to know something about the activities of the representatives of the Department of Agriculture in other States where I visited during the past summer. I know that there was serious objection to the way this whole matter was handled. I am not going to object to this bill, but I think the Department of Agriculture should use more care than it did last year in going into regions where the corn borer has never appeared, where the farmers have never asked that representatives of the department be sent, and where they were looked upon as a nuisance; in fact, where they were driven out by shotguns in certain sections.

Mr. COPELAND. Mr. President, I think it is always true that quarantine measures are disagreeable; yet, after all, while I know nothing about the corn borer, I realize that sometimes it has even been necessary to employ shotguns to enforce a quarantine.

Mr. DILL. In the case to which I referred the shotguns were used to drive the agents away.

Mr. COPELAND. There are always objections to methods which must be employed to enforce quarantines, but that is the way we are going to preserve our crops and our flocks. In my section of the country we used to have large numbers of chestnut trees. On my farm I had 130 such trees, some of them 3 feet in diameter. They have now all gone, having been destroyed by disease brought in from Europe. If we are to save our plants and shrubs and trees and crops, we have got to do it by effective quarantine methods. So, while I know nothing about this measure, I can quite understand its importance.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ENFORCEMENT OF PLANT QUARANTINE ACT

The bill (H. R. 484) to amend section 10 of the plant quarantine act approved August 20, 1912, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That section 10 of the plant quarantine act, approved August 20, 1912 (37 Stat. L. 315), as amended by the act of March 4, 1917 (39 Stat. L. 1165), be, and the same is hereby, amended by adding at the end thereof the following:

"That any employee of the Department of Agriculture, authorized by the Secretary of Agriculture to enforce the provisions of this act and furnished with and wearing a suitable badge for identification, who has probable cause to believe that any person coming into the United States, or any vehicle, receptacle, boat, ship, or vessel, coming from any country or countries or moving interstate, possesses, carries, or contains any nursery stock, plants, plant products, or other articles the entry or movement of which in interstate or foreign commerce is prohibited or restricted by the provisions of this act, or by any quarantine or order of the Secretary of Agriculture issued or promulgated pursuant thereto, shall have power to stop and, without warrant, to inspect, search, and examine such person, vehicle, receptacle, boat, ship, or vessel, and to seize, destroy, or otherwise dispose of such nursery stock, plants, plant products, or other articles found to be moving or to have been moved in interstate commerce or to have been brought into the United States in violation of this act or of such quarantine or order."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MAJESTIC HOTEL AND LIEUT. R. T. CRONAU

The bill (H. R. 4068) for the relief of the Majestic Hotel, Lake Charles, La., and of Lieut. R. T. Cronau, United States Army, was considered as in Committee of the Whole. It directs the Comptroller General of the United States to allow from the appropriation for general expenses of the Bureau of Agricultural Economics, Department of Agriculture, for the fiscal year 1925, $226.55, due the Majestic Hotel, Lake Charles, La., for lodging and subsistence of Lieut. R. T. Cronau and Staff Sergt. W. O. Womack, United States Army, during their assignment in September and October, 1924, to make aerial photographs of areas of rice fields in connection with crop estimates by the Bureau of Agricultural Economics of the Department of Agriculture; and to allow to Lieut. R. T. Cronau reimbursement of amounts expended by him for subsistence and travel of himself and Staff Sergt. W. O. Womack in proceeding by air in connection with such assignment to and from Kelly Field, Tex., to Lake Charles, La.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 11074) to promote the agriculture of the United States by expanding in the foreign field the service now rendered by the United States Department of Agriculture in acquiring and diffusing useful information regarding agriculture, and for other purposes, was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 6685) to regulate the employment of minors within the District of Columbia was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

Mr. COPELAND. Mr. President, I hope the Senator who made the objection will permit the bill to be considered on its merits.

Mr. KING. I have no objection to its being considered when we have time to offer amendments. I ask that it go over now.

The PRESIDING OFFICER. The bill will be passed over.

ROLETTE COUNTY, N. DAK.

The bill (S. 2042) for the relief of Rolette County, N. Dak., was considered as in Committee of the Whole. It directs the Secretary of the Treasury to pay to the county of Rolette, State of North Dakota, $16,102.29, as reimbursement for expenses incurred by such county in caring for indigent Indians from July 1, 1926, to October 7, 1927, inclusive.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

INDIAN SCHOOL, TURTLE MOUNTAIN INDIAN RESERVATION, N. DAK.

The bill (S. 3501) to provide for the construction of a boarding school for Indian children at Belcourt, in the Turtle Mountain Indian Reservation, State of North Dakota, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior is authorized and directed to provide for the construction and equipment, at a cost not to exceed $230,425, of a school plant at Belcourt, in the Turtle Mountain Indian Reservation, State of North Dakota, to be used as a boarding school for Indian children. Such school plant shall comprise all buildings and equipment necessary properly to house and care for 150 children.

SEC. 2. There is hereby authorized to be appropriated the sum of $230,425, or so much thereof as may be necessary, to carry out the provisions of this act.

Mr. KING. Mr. President, I note that this bill authorizes an appropriation of $230,425. Is that to be reimbursable?

Mr. FRAZIER. No; it is not. These Indians have no funds out of which it can be made reimbursable. In this Turtle Mountain Indian Reservation there are two hundred and thirty and some Indian children of school age who are not in school, because no school is provided for them.

Mr. KING. To what tribe do they belong?

Mr. FRAZIER. They are a mixture—partly Sioux and partly mixed bloods.

Mr. KING. Have they no reservation of their own?

Mr. FRAZIER. They have a reservation consisting of two congressional townships, 6 by 12 miles. There are about 1,600 wards of the Government, and about 1,800 patent-in-fee Indians.

Mr. KING. Have there been no school facilities afforded in the past by the Government for any of these children?

Mr. FRAZIER. They have sent some of them to other schools around—one down at Bismarck, one at Wahpeton, and one at Minnewaukan, N. Dak., and some of them outside the State—but there has been no provision for schools in the State to take care of them. There are not school facilities to take care of them. Some of these Indian children attend day schools, district schools, but there are not enough of those to take care of them.

Mr. KING. The Senator knows that I am very much interested in the preservation and civilization and welfare of the Indians; and in view of the fact that a resolution has recently been passed creating a committee to make full investigation in regard to Indian matters and the best methods of civilizing, improving, and caring for the Indians, I was wondering whether it might not be wise, before making any large appropriations, to await the report of that committee.

Mr. LA FOLLETTE. Mr. President, will the Senator from North Dakota yield?

Mr. FRAZIER. I yield.

Mr. LA FOLLETTE. May I say to the Senator from Utah that the committee held a hearing upon this measure. We had before us the district attorney of Rolette County, and the committee went into the details of the situation very carefully;

and this really is somewhat of an emergency situation. These are patent-in-fee Indians, largely, and since 1913 the county have been burdened with relief work, which they have carried on very magnificently and very generously; but they have practically reached the limit of their resources, and the result is that no further school facilities can be provided. There are over 250 children of school age who have not any provision whatsoever for educational facilities; and the committee felt that it was the duty of the Government to step in and relieve this situation, and provide school facilities for these children.

Mr. CARAWAY. May I ask the Senator from North Dakota what provision has been made for maintaining the school after the building is constructed?

Mr. FRAZIER. This will include equipment. Of course, that would have to come through the Indian Office. I do not think there is any question about that part of it.

Mr. CARAWAY. Where would the Indian Office get the funds?

Mr. FRAZIER. Out of the direct appropriation of Indian money carried in the Indian appropriation bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BRIDGE ACROSS PERDIDO BAY, FLA. AND ALA.

The bill (S. 3990) granting the consent of Congress to the boards of county commissioners of the counties of Escambia, Fla., and Baldwin, Ala., their successors and assigns, to construct, maintain, and operate, or to cause to be constructed, maintained, and operated, under franchises granted by them, a toll bridge across Perdido Bay, in the States of Florida and Alabama, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments, on page 2, line 3, after the word "operate," to strike out "or to cause to be constructed, maintained, and operated, under franchises granted by them"; in line 5, after the word "Bay," to insert "at a point suitable to the interests of navigation"; in line 7, before the word "Point," to strike out "Innerarity" and insert "Inerarity"; in line 9, before the word "Act" where it first occurs, to insert "provisions of the"; in line 17, after the word "conveyed," to strike out "or to whom the franchise to construct, maintain, or operate said bridge may be granted by said boards of commissioners"; in line 20, after the word "acquire," to strike out "such rights or such franchise" and insert "the same"; in line 22, after the words "the same as," to strike out "freely" and insert "fully"; and in line 23, after the word "conferred," to strike out "hereby" and insert "herein," so as to make the bill read:

*Be it enacted, etc.*, That in order to promote interstate commerce, improve the Postal Service, and provide for military and other purposes the consent of Congress is hereby granted to the boards of county commissioners of the counties of Escambia, Fla., and Baldwin, Ala., their successors and assigns, to construct, maintain, and operate a toll bridge across Perdido Bay, at a point suitable to the interests of navigation, extending from a point at or near Inerarity Point, in Escambia County, Fla., to a point on the mainland in Baldwin County, Ala., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to sell, assign, transfer, convey, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to the said boards of county commissioners, their successors and assigns, and any corporation to which or person to whom such rights, powers, and privileges may be sold, assigned, transferred, or conveyed, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such person or corporation.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting the consent of Congress to the boards of county commissioners of the counties of Escambia, Fla., and Baldwin, Ala., their successors and assigns, to construct, maintain, and operate a toll bridge across Perdido Bay in the States of Florida and Alabama."

BILL PASSED OVER

The bill (S. 4013) authorizing the Henderson-Ohio River Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Henderson, Ky., was announced as next in order.

Mr. SACKETT. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

OLD FEDERAL BUILDING, DULUTH, MINN.

The bill (S. 2340) to transfer to the city of Duluth, Minn., the old Federal building, together with the site thereof, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That upon completion of the new Federal building authorized to be erected under the provisions of the act of March 2, 1907, in the city of Duluth, Minn., the Secretary of the Treasury is hereby authorized to transfer to the city of Duluth, Minn., the old Federal building, together with the site thereof, at such price and on such terms as he deems to be reasonable, and to convey such property to the city of Duluth by the usual quitclaim deed and deposit the proceeds of such sale in the Treasury of the United States as a miscellaneous receipt.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CITY OF DULUTH, MINN.

The joint resolution (S. J. Res. 119) granting an easement to the city of Duluth, Minn., was considered as in Committee of the Whole and was read, as follows:

*Resolved, etc.*, That in carrying into effect existing legislation providing for the granting of an easement to the city of Duluth, Minn., for the use of lots 81 and 83, in block 20, in exchange for the conveyance to the United States in fee simple of lots 86 and 88 in such block 20, as an addition to the new Federal building site in said city, the Secretary of the Treasury is hereby authorized, in his discretion, to accept a title to said lots 86 and 88, in block 20, subject to the reservation of all iron ore and other valuable minerals in and upon said land, with the right to explore for, mine and remove the same, required by section 638 of the General Statutes of Minnesota of 1923.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CARL J. REID DUSSOME

The bill (S. 2076) authorizing the enrollment of Carl J. Reid Dussome as a Kiowa Indian and directing issuance of trust patents to him to certain lands of the Kiowa Indian Reservation, Okla., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with amendments, on page 1, line 4, after the word "directed," to strike out "to enroll Carl J. Reid Dussome, intermarried in the Kiowa Tribe of Indians, who was regularly adopted by the tribal council of aforesaid tribe previous to June 1, 1909, and"; and on page 2, line 4, after the word "*Provided*," to strike out "That this shall be in lieu of an allotment: *Provided further*, That this enrollment and allotment shall be made only upon the express condition that the said Carl J. Reid Dussome shall relinquish all the rights and privileges which he acquired by reason of his enrollment as a member of the Chippewa or Sioux Tribes of Indians" and to insert "That this shall be in lieu of all claims to any allotment of land or money settlement in lieu of an allotment," so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to issue a patent containing the usual restrictions against alienation inserted in other trust patents to Indians on the Kiowa Reservation, covering the northwest quarter section 23, township 6, range 16 west, Indian meridian, known as the Rainy Mountain school reserve, in Kiowa County, Okla., to the said Carl J. Reid Dussome, who has heretofore received no allotment of land from any source: *Provided*, That this shall be in lieu of all claims to any allotment of land or money settlement in lieu of an allotment.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill authorizing the allotment of Carl J. Reid Dussome as a Kiowa Indian, and directing issuance of trust patent to him to certain lands of the Kiowa Indian Reservation, Okla."

COMPENSATION FOR INJURY TO EMPLOYEES IN THE DISTRICT OF COLUMBIA

The bill (S. 3565) to provide compensation for disability or death resulting from injury to employees in certain employments in the District of Columbia, and for other purposes, was considered as in Committee of the Whole.

The bill had been reported from the Committee on the District of Columbia with amendments, on page 1, line 8, after the word "Columbia," to insert "irrespective of the place where the injury or death occurs"; and on page 2, line 7, after the word "commerce," to strike out "and" and insert "or," so as to make the bill read:

*Be it enacted, etc.*, That the provisions of the act entitled "longshoremen's and harbor workers' compensation act," approved March 4, 1927, including all amendments that may hereafter be made thereto, shall apply in respect to the injury or death of an employee of an employer carrying on any employment in the District of Columbia, irrespective of the place where the injury or death occurs; except that in applying such provisions the term "employer" shall be held to mean every person carrying on any employment in the District of Columbia, and the term "employee" shall be held to mean every employee of any such person.

SEC. 2. This act shall not apply in respect to the injury or death of (1) a master or member of a crew of any vessel; (2) an employee of a common carrier by railroad when engaged in interstate or foreign commerce or commerce solely within the District of Columbia; (3) an employee subject to the provisions of the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, as amended; and (4) an employee engaged in agriculture, domestic service, or any employment that is casual and not in the usual course of the trade, business, occupation, or profession of the employer.

SEC. 3. This act shall take effect July 1, 1928.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

LANDS IN OREGON FOR INDIAN USE

The bill (S. 4036) to authorize the Secretary of War to transfer the control of certain land in Oregon to the Secretary of the Interior was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Secretary of War be, and he is hereby, authorized to transfer to the control of the Secretary of the Interior, for the use and benefit of certain Indians now using and occupying the land as a fishing-camp site, an irregular-shaped tract of land covering approximately 8.23 acres, comprising that portion of the lands of the United States located in lots 1 and 2, section 20, township 2 north, range 15 east, Willamette meridian, Oregon, originally acquired as a right of way for a projected boat railway in connection with the improvements of The Dalles-Celilo section of the Columbia River.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LANDS IN CALIFORNIA FOR INDIAN USE

The bill (S. 3503) to authorize the Secretary of the Interior to purchase certain lots in the city of Needles, San Bernardino County, Calif., for Indian use, and authorizing an appropriation of funds therefor was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized to purchase a certain tract of land, embracing 337 lots, within an area identified as the Denair addition to the city of Needles, Calif.: *Provided*, That the said lots when purchased shall be made available as home sites for homeless Indians residing in the city of Needles, Calif., and such other Indians as the Secretary of the Interior may see fit to settle thereon, the title when acquired to be taken in the name of the United States: *Provided further*, That the sum of $8,425 is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, to be used in the purchase of the lots herein referred to.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes, was announced as next in order.

Mr. KING. Mr. President, does the Senator from New Hampshire expect to take that bill up and pass it under the five-minute rule?

Mr. MOSES. I should like to, but I have an opinion that there are many Senators who will want to discuss it for a greater length of time than five minutes.

Mr. KING. That is my understanding. I think the Senator had better let it go over until other Senators are here.

Mr. MOSES. In view of the persuasive manner in which the Senator from Utah speaks to the Senator from New Hampshire, the latter feels that he must yield to the Senator from Utah.

The PRESIDING OFFICER. The bill will be passed over.

Mr. McKELLAR. Mr. President, may I say to the Senator from Utah that this is substantially the same bill that was passed by the Senate overwhelmingly at the last session. There is nothing new about it.

Mr. MOSES. No, Mr. President.

Mr. McKELLAR. Well, is it substantially the same.

Mr. MOSES. Oh, no.

Mr. FLETCHER. The Senator from Tennessee has amendments to it.

Mr. McKELLAR. They have been included in the bill.

Mr. MOSES. No; we did not get to the bill in the last Congress. I will say to the Senator from Tennessee that we never got to it. The sentiment of the Senate was for it overwhelmingly. I think that is conclusive. But what happened? Was the bill objected to?

Mr. McNARY. Let it go over.

The PRESIDING OFFICER. The bill will be passed over.

Mr. MOSES. Mr. President, I should like to ask the junior Senator from Utah if it is possible to come to some agreement as to a time when we may take up this bill and consider it. It is a most important measure. It deals with a subject matter which has been before Congress now for nearly five years, upon which nothing but makeshift legislation was had. I think that the interests involved in the measure, and the great number of people who are affected by it, should lead the Senate to give it consideration.

Mr. KING. I agree entirely with the Senator, and I shall be glad to have that done if we can get time to-morrow, or at the earliest possible moment.

Mr. McNARY. I call for the regular order.

Mr. McKELLAR. Could we not take it up in the morning hour to-morrow, if we adjourn?

Mr. MOSES. Then I give notice that at the first opportunity during the morning hour I shall move to take up this bill.

Mr. KING. The Senator will find no objection on my part.

The PRESIDING OFFICER. The bill will be passed over.

ALLEY IN SQUARE 1083, DISTRICT OF COLUMBIA

The bill (S. 3771) vacating the alley between lots 16 and 17, square 1083, District of Columbia, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted etc.*, That the Commissioners of the District of Columbia be, and they are hereby, authorized to close, vacate, and abandon so much of the 15-foot public alley in square 1083 as lies between lots 16 and 17; same to revert in equal proportions to the abutting lots.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ST. FRANCIS DE SALES CHURCH

The bill (S. 3903) to provide for the reinterment of bodies now interred in the grounds of St. Francis de Sales Church in the District of Columbia was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That Michael J. Curley, Roman Catholic Archbishop of Baltimore, a corporation sole under the laws of the State of Maryland, be, and he is hereby, authorized and empowered, under such regulations as the Commissioners of the District of Columbia may prescribe, to transfer the bodies interred in the grounds of the St. Francis de Sales Church in the District of Columbia, known as parcel 155/1, to some other suitable cemetery, or cemeteries, within the District of Columbia. Further interments in such grounds shall be prohibited from and after the passage of this act; and the proprietors thereof are authorized to use the same for any legal purposes they may deem proper, subject to such proceedings in eminent domain as may have been or shall hereafter be taken.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REARRANGEMENT AND RECONSTRUCTION OF SENATE WING OF CAPITOL

The bill (S. 814) to rearrange and reconstruct the Senate wing of the Capitol was announced as next in order.

Mr. METCALF. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

Mr. COPELAND. Mr. President, what happened to Senate bill 814?

The PRESIDING OFFICER. Objection was made, and the bill was passed over.

Mr. COPELAND. I hope nobody objected to that bill. That is what we have just put in the legislative appropriation bill.

The PRESIDING OFFICER. Some Senator very distinctly objected. The Chair does not know who it was.

Mr. METCALF. Mr. President, I objected to the consideration of that bill. I should like to see the plans.

The PRESIDING OFFICER. The Senator from Rhode Island objected, and the bill went over.

Mr. METCALF. I think putting large windows in the north end of the Senate wing will spoil the outside looks of the building. I think the matter ought to be studied from an architectural point of view.

Mr. MOSES. Mr. President, has the Senator had an opportunity to study the document which has been published dealing with that subject?

Mr. METCALF. I happened to see it last year. I do not know whether any changes have been made since then or not.

Mr. MOSES. I do not understand that there have been any changes in the essential features of the plans. The Senator from New York is much more familiar with the plans than I am.

Mr. COPELAND. The plans are exactly the same, I may say to the Senator from Rhode Island.

Mr. MOSES. The money has already been appropriated for it.

Mr. COPELAND. I am very anxious to have the bill passed, so that if by any chance anything should happen to the appropriation bill in the House, this bill will have become the law.

Mr. METCALF. Let it go over to-day.

The PRESIDING OFFICER. The bill will be passed over, under objection.

### INDIANS RESIDING IN STATE OF OREGON

The bill (S. 2139) conferring jurisdiction upon the Court of Claims to hear and determine claims of certain bands or tribes of Indians residing in the State of Oregon was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That jurisdiction is hereby conferred upon the Court of Claims to hear and determine any claims, whether legal or equitable, which may be had against the United States by the following Indian tribes, namely: The Alsea, Siletz, Tillamook, Coquill, Tootootney, Coos Bay, Umpqua, Siuslaw, Calapuya, Clackamas, Cow Creek, Lackmiut, Marys River, Molala, Nestucca, Rogue River, Santiam, Shasta, Tumwater, Wapato, Yamhill, Chinook, and other bands or tribes of Indians known as the Grand Ronde Indians, residing west of the Cascade Mountains in the State of Oregon. If it is found that any sum of money is rightfully owing from the United States to any of the above-mentioned Indian tribes, the court shall render final judgment therefor against the United States and in favor of the proper Indian tribe or tribes, and either party shall have the right of appeal to the Supreme Court of the United States in the manner provided in sections 242 and 243 of the Judicial Code.

The Court of Claims shall advance the cause or causes upon its dockets for hearing, and shall have jurisdiction notwithstanding lapse of time or statute of limitations. The suit or suits instituted hereunder shall be presented by petition of any such Indian tribe or tribes as plaintiff against the United States as defendant, and the petition may be verified by the attorney or attorneys employed by such Indian tribe or tribes upon information and belief as to the facts therein alleged, and no other verification shall be necessary.

The attorney or attorneys for such Indian tribes shall be paid such fee as the Court of Claims may find reasonable, the same to be approved by the Secretary of the Interior, but in no case shall the fee decreed by the Court of Claims be in excess of the amount stipulated in the contract of employment, nor amount to more than 10 per cent of the recovery, if any, to which any such Indian tribes shall be entitled. The sum or sums recovered for such Indian tribes shall be disbursed under the supervision of the Secretary of the Interior to the parties entitled thereto in the manner prescribed by the Court of Claims.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

### CHIPPEWA INDIANS OF MINNESOTA

The bill (H. R. 10360) to confer additional jurisdiction upon the Court of Claims under an act entitled "An act authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims," approved May 14, 1926, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with amendments, on page 2, line 6, after the word "funds," to strike out "or other property"; and in line 8, after the word "Minnesota," to insert "and if the court shall so determine and said funds are found inadequate, then the unsatisfied portion of said judgment shall be paid by the United States, but in no event shall any part of the land of the Red Lake Reservation be used in any way in payment thereof," so as to make the bill read:

*Be it enacted, etc.*, That in case No. H-76 heretofore filed in the Court of Claims under and in pursuance of an act of Congress entitled "An act authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims," approved May 14, 1926 (44 Stat. L. 555), wherein the Chippewa Indians of Minnesota are parties plaintiff and the United States is party defendant, if the Court of Claims shall determine that the said Chippewa Indians are entitled to recover a judgment against the United States upon the cause of action therein set forth, the said court shall further determine whether such judgment, or any part thereof, shall be paid by the United States out of funds held by the United States in trust for the Red Lake Band of Chippewa Indians of Minnesota, and if the court shall so determine and said funds are found inadequate, then the unsatisfied portion of said judgment shall be paid by the United States, but in no event shall any part of the land of the Red Lake Reservation be used in any way in payment thereof, and the said Red Lake Band of Chippewa Indians is hereby authorized, on the approval of this act, to appear in said suit by their attorneys employed in accordance with the provisions of existing law, and defend their rights in the matter.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

### MAKAH RESERVATION, WASH.

The bill (S. 2538) for the construction of a road across the Makah Reservation to Neah Bay, Wash., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with an amendment, on page 1, line 11, after the words "sum of," to strike out "$50,000" and insert "$30,000," so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Interior, in his administration of Indian Affairs, is hereby authorized to survey and build a road, inclusive of the necessary bridges, from the Sekiu River westerly to Neah Bay in the Makah Indian Reservation, to connect the Neah Bay Indian Agency with the trunk highway of Clallam County, Wash., a distance of approximately 5 miles in length, and there is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated, the sum of $30,000.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

### ERADICATION OF PINK BOLLWORM

The joint resolution (S. J. Res. 129) to provide for eradication of pink bollworm and authorizing an appropriation therefor was considered as in Committee of the Whole.

The joint resolution had been reported from the Committee on Agriculture and Forestry with amendments:

The first amendment was, on page 3, line 14, after the word "*Provided*," to insert "That no part of the funds herein authorized to be appropriated shall be available for compensation in connection with the establishment of a noncotton zone in any county unless and until the live pink bollworm is found within such county or within a radius of 5 miles thereof: *Provided further*," so as to read:

Whereas a very serious emergency has arisen by reason of an outbreak of the pink bollworm involving some seven counties in the western extension of cotton in Texas which threatens one of the primary industries of the Nation and demands immediate action; and

Whereas there are only two possible means of meeting this situation, one by regulating the movement of cotton and cottonseed from the newly infested counties with the idea of preventing long-distance spread through the agency of such products, and the other to declare and enforce noncotton zones as to such areas with the idea of the immediate eradication of the pest, with the object of saving the cotton crop of the Nation from general invasion and future enormous annual losses; and

Whereas regulation does not eradicate nor does it prevent spread except as to districts so completely isolated from other cotton as to eliminate the possibility of the natural spread of the pest, and, therefore, the regulation of these new areas in contact with continuous cotton cultivation will necessarily permit the natural and probably very wide spread of this pest yearly, and will amount, therefore, to giving up the battle to save Texas and the rest of the Cotton Belt from general and probably wide invasion by the pink bollworm, accompanied by annual and greatly increasing costs of such regulation; and

Whereas the only known means of eradication is by the establishment of noncotton zones for one or two years—a method which has a long record of successes, but which may become impossible as to such west Texas areas on account of natural spread and mounting costs if postponed; and

Whereas the losses due to such ones must fall primarily and heavily upon a small group of farmers, and inasmuch as these losses are in the interest of the cotton crop of the Nation, compensation of such farmers for actual and necessary losses due to the enforced nonproduction of cotton would seem to be fully warranted; and

Whereas the cost of the establishment of such noncotton zones in these new areas will be necessarily very large on account of the considerable cotton acreage involved—some 360,000 acres—costs which are in the interest of the entire Cotton Belt; and

Whereas the State of Texas has now no funds available for such compensation of farmers and its legislature is not now in session and will not normally come in session for another year, and, further, the securing of such funds by the State would involve new legislation and new taxation very unlikely to be obtained in view of the amount involved, and the fact, as indicated, that such expenditure would be for the protection of the entire Cotton Belt: Therefore be it

*Resolved, etc.*, That when any State shall have enacted legislation and taken measures, including the establishment and enforcement of noncotton zones, adequate, in the opinion of the Secretary of Agriculture, to eradicate the pink bollworm in any area thereof actually infested, or threatened, by such pest, the said Secretary, under regulations to be prescribed by him, is authorized to pay, out of $5,000,000 hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, to be expended in cooperation with the proper authorities of the State concerned in compensating any farmer for his actual and necessary loss due to the enforced nonproduction of cotton within said zones: *Provided*, That no part of the funds herein authorized to be appropriated shall be available for compensation in connection with the establishment of a noncotton zone in any county unless and until the live pink bollworm is found within such county or within a radius of 5 miles thereof: *Provided further*, That such loss as to noncotton zones established by the State of Texas shall be determined as provided in existing statutes of that State, and similarly by similar statutes which may later be provided by other States concerned, and that in estimating such loss due account shall be taken of the value of other crops which may be produced on said land, so that the loss shall not exceed the difference in return to the farmer from cotton over such other crops: *Provided further*, That such determination of actual and necessary loss shall be subject to the review and approval of the Secretary of Agriculture: *And provided further*, That no reimbursement shall be made with respect to any farmer who has not complied in good faith with all of the quarantine and control regulations prescribed by said Secretary of Agriculture and such State relative to the pink bollworm.

The amendment was agreed to.

Mr. KING. Mr. President, I should like the Senator from Louisiana [Mr. RANSDELL] to explain just how far this bill will go. I am told that the purpose is to go to individuals who have cotton fields and pay them for not farming. Not satisfied with making an appropriation to exterminate the boll weevil or pink bollworm, or whatever the pest may be, the plan is to pay farmers whatever may be determined upon by the Government agent a certain amount per acre for not farming. I should like to know to what extent they are going and whether our policy is to pay every person who may not farm because of some pest.

I know that in my State many of the lands have been nonproductive because of the white fly that destroys our beet crop. Thousands of acres of the finest alfalfa were destroyed by the weevil. Are we going to go to farmers and tell them, "If you will not farm, we will pay you for it. We will pay you so much an acre for your alfalfa land and so much for your cotton land and so much for your apple orchards, where you cease to produce"?

I am perfectly willing to make appropriations for the extermination of the pest; but it is a novel proposition that we must pay people for not farming.

Mr. RANSDELL. Mr. President, I thank the Senator for stating that he is willing to pay for exterminating the pest. That is exactly what we propose to do, Mr. President and Senators.

The Agricultural Department has determined, after a very elaborate study, that the only way in which this pest, the pink bollworm, can be exterminated, is to cease planting cotton in the affected area for about two years. Sometimes they kill them in one year; sometimes they are obliged to carry on the fight for two years. I have never heard of it being done more than two years. You just stop planting the crop that is affected, in the affected area, for that length of time, and all the worms die, all the eggs die, and the insect is put out of business absolutely.

That is not an experiment, I will say to the Senate, because some years ago we had a small outbreak of the same insect in southeastern Texas and southwestern Louisiana, and this method of fighting it was tried, and tried successfully. That was in 1917, 1918, and 1919, the insect was destroyed; the Government has been watching it with great care ever since, and there has been no return of it.

What has happened in other countries? In India, in Egypt, in parts of Africa, in Brazil, in Mexico, everywhere else on earth except so far as the scientists are able to find in this limited portion of the United States, in Texas and Louisiana, the insect has continued to grow and grow, and has destroyed enormous values of property. In Egypt the crop is damaged at least one-fourth every year. In Brazil the crop is damaged to the extent of $27,000,000 a year, and Brazil is not one of the great cotton-growing countries of the world. The destruction of this pest is almost incalculable, and all the scientists agree you can absolutely eradicate it, not check it, but eradicate it, by pursuing this method. I hope there will be no objection, and that the joint resolution will pass.

Mr. JONES. Under the measure is the Government to pay the man for not putting in his crop?

Mr. RANSDELL. Yes.

Mr. JONES. How do they determine whom to pay?

Mr. RANSDELL. The farmers stop planting a crop of cotton in the particular area for a limited time, and the Government department, in cooperation with the State departments, determines what the loss to the individual has been on account of shutting him off, preventing him from planting the crop during that time. He is allowed to plant anything else, and he is expected to make all he can out of the ground, but if the crop he does plant produces less than the crop he would have been willing to plant and would have planted, in cotton, then he is paid the difference. It is only for this one year.

Mr. JONES. Do they try to find out whether he has been industrious or not?

Mr. RANSDELL. I think they do the best they can.

Mr. JONES. It is a very peculiar procedure, I may state.

Mr. KING. Mr. President, may I ask the Senator, if this is so destructive, why would the man want to plant, and if he did plant, if it is so destructive as the Senator indicates, he would raise nothing, so his damage would be less; yet you propose to pay him for the profits which he would have made. How are you going to determine that he would have a profit, when you say that if he planted he would not reap, because of the destructive characteristics of this pest?

Mr. RANSDELL. I did not say he would not have reaped profits. I say that the insect grows, and in a very few years it practically destroys everything, but for the first year or two it is not very destructive. Yet it has to be stopped. If it is not stopped, the lint is carried, and the insect spreads over the entire area of the country where the plant grows.

Mr. BRUCE. Mr. President, has this measure received the approval of the Secretary of Agriculture?

Mr. RANSDELL. The absolute, unqualified approval of the Secretary of Agriculture, and of the Committee on Agriculture. The chairman of the committee is in the Chamber. The joint resolution is unanimously reported upon by the Secretary of Agriculture and by the committee.

Mr. BRUCE. Then it has my approval.

The PRESIDING OFFICER. The question is on agreeing to the second amendment, which will be stated.

The CHIEF CLERK. On page 4, to add at the end of the bill the following:

*And provided further*, That the appropriation herein authorized shall be available only for compensation for the crop of 1928, unless the State in which any noncotton zone is established shall thereafter appropriate and pay a sum in each year equal to the amount expended in such State by the United States under this authorization.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

## LONGSHOREMEN'S COMPENSATION ACT

The bill (H. R. 12320) to amend the longshoremen's and harbor workers' compensation act was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CHRISTINE BRENZINGER

The bill (H. R. 5297) for the relief of Christine Brenzinger was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, after line 10, to insert a new section, as follows:

SEC. 2. That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys on account of services rendered or advances made in connection with said claim. Any person or persons violating the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

ANTON ANDERSON

The bill (H. R. 2654) for the relief of Anton Anderson was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THOMAS HUGGINS

The bill (H. R. 2657) for the relief of Thomas Huggins was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, after line 9, to insert a new section, as follows:

SEC. 2. That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys on account of services rendered or advances made in connection with said claim. Any person or persons violating the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

RELIEF OF THE STATE OF FLORIDA

The bill (S. 3917) for the relief of the State of Florida, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That notwithstanding the provisions of section 3646, as amended, of the Revised Statutes of the United States, the disbursing clerk of the Department of Agriculture is authorized and directed to issue, without the requirement of an indemnity bond, a duplicate of original check numbered 1567677, drawn August 22, 1927, in favor of "State treasurer of Florida" for $11,789.53 and lost, stolen, or miscarried in the mails.

Mr. CARAWAY. Mr. President, I would like to ask the Senator from Florida a question. A bill of like character passed for the relief of North Carolina, and it seems to get no consideration in the House. A House bill for the relief of North Carolina is now pending in the Senate Committee on the Judiciary. I think it is the purpose of the Committee on the Judiciary, if I do not misinterpret its purpose, to amend that bill and to put on it provisions for all the States that are entitled to this relief. Would the Senator rather have his bill passed, or would he rather have it put on that bill?

Mr. FLETCHER. I would rather have this passed, and then we can deal with the omnibus bill a little later.

Mr. CARAWAY. I have no objection.

Mr. FLETCHER. The Senator understands that this is to relieve the State of paying a premium on an indemnity bond where a check was lost.

Mr. CARAWAY. I beg the Senator's pardon. I thought it was another bill.

Mr. FLETCHER. I think this is a different matter.

Mr. CARAWAY. Yes; this is a different matter.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DR. JOHN MACK

The bill (H. R. 6367) authorizing the redemption by the United States Treasury of 20 war-savings stamps (series of 1918) now held by Dr. John Mack, of Omaha, Nebr., was announced as next in order.

The PRESIDING OFFICER. The adverse report on the bill is agreed to, and the bill will be indefinitely postponed.

BILL PASSED OVER

The bill (S. 3089) to increase the efficiency of the Military Establishment, and for other purposes, was announced as next in order.

SEVERAL SENATORS Over.

The PRESIDING OFFICER. The bill will be passed over.

WILLIAM H. CHAMBLISS

The bill (S. 2274) for the relief of William H. Chambliss, was announced as next in order.

Mr. KING. I find no report with this bill. I am informed that it has not been received from the Printing Office. Let the bill go over until we get the report.

The PRESIDING OFFICER. The bill will be passed over.

HOME FOR AGED AND INFIRM, DISTRICT OF COLUMBIA

The bill (S. 4170) to authorize plans for a hospital at the Home for Aged and Infirm in the District of Columbia, and for other purposes, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Commissioners of the District of Columbia are authorized and directed to have the municipal architect prepare plans, specifications, and estimates for a suitable infirmary and hospital for the Home for Aged and Infirm.

SEC. 2. That for such purpose there is hereby authorized to be appropriated the sum of $1,000, or such portion thereof as may be necessary.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

WOMAN'S BUREAU, METROPOLITAN POLICE DEPARTMENT, DISTRICT OF COLUMBIA

The bill (S. 4174) to establish a woman's bureau in the Metropolitan Police Department of the District of Columbia, and for other purposes, was announced as next in order.

Mr. KING. Let that go over. I want to file a minority report.

The PRESIDING OFFICER. The bill will be passed over.

JOINT-STOCK LAND BANKS

The bill (S. 4039) to exempt joint-stock land banks from the provisions of section 8 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended, was announced as next in order.

Mr. KING. Let that go over.

Mr. SACKETT. Mr. President, will not the Senator withhold his objection a moment?

Mr. KING. I withhold the objection.

Mr. SACKETT. I want to explain the bill. This is an amendment designed by the Federal Reserve Board in order to exempt directorships of joint-stock land banks from the prohibition of the Clayton Act, because they are like mutual-savings banks; they do not loan money except on land, and there can be no restriction of credit. The governors of the board have been before the committee, and the committee was unanimous in asking that this bill go through. It simply removes one of the difficulties that have come up since the Clayton Act was passed and for which there seems to be no particular reason. There is no objection to a director serving on the board of a national bank and a joint-stock land bank. It is really a better thing to have them do so.

Mr. KING. This relates merely to a director serving on the boards of both?

Mr. SACKETT. Absolutely, and to nothing else. It simply puts them in the class of mutual-savings banks.

Mr. KING. I have no objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Banking and Currency with amendments, on page 1, line 6, to strike out the words "found in title 15, chapter 1, section 19, United States Code," and to insert on line 8 "(U. S. C., title 15, ch. 1, sec. 19)," so as to make the bill read:

*Be it enacted, etc.*, That the first proviso of the second paragraph of section 8 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended (U. S. C., title 15, ch. 1, sec. 19), is amended to read as follows:

"*Provided*, That nothing in this section shall apply to mutual-savings banks not having a capital stock represented by shares, to joint-stock land banks organized under the provisions of the Federal farm

loan act, or to other banking institutions which do no commercial banking business."

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

GOV. ALFRED E. SMITH

Mr. OVERMAN. Mr. President, I hold in my hand an article from the Atlanta Journal complimentary to my colleague, and also one appearing in the Winston-Salem Morning Journal relative to campaign activities in North Carolina. I ask to have both printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Atlanta (Ga.) Journal]

SENATOR SIMMONS SPEAKS THE MIND OF THE SOUTH

So distinguished a Democrat and so wise a statesman as Senator SIMMONS, of North Carolina, would command a wide hearing on any public issue upon which he saw fit to speak, but especially on one of such moment as his party's nomination of a presidential candidate. He is known for practical insight as well as for staunch convictions, and in his thought on questions of broad consequence he runs true to the mind of the South as a whole as well as to that of his native State. Moreover, he is a national figure, a veteran in the councils of American Democrary, a Senator to whose views all regions listen with respect. Nationally significant, therefore, is his declaration that in his judgment Governor Smith, of New York, will not be nominated for the Presidency and would not be elected even if named. Vigorously denying a report that he was no longer opposed to that candidate, but regarded his nomination at Houston as "inevitable," Senator SIMMONS issues this emphatic statement:

"My convictions upon the subject are so profound that I know of no circumstances under which I would change my attitude toward the candidacy of Mr. Smith. Early in this campaign I made public a statement in which I declared my opposition to Mr. Smith and stated I was opposed to him because I believed his nomination would be unfortunate for the party in the country at large, and especially dangerous to Democratic harmony and supremacy in the South. I have not changed my views. I am as much opposed to Mr. Smith as I have ever been. Indeed, later developments have strengthened my conviction that his nomination would be disastrous to the Democratic Party. The intimation that I thought that the nomination of Mr. Smith certain is also utterly erroneous. On the contrary, I do not believe either that Mr. Smith will be nominated or that he could or would be elected if nominated."

This, we say, is significant nationally because it voices the belief prevailing in that part of the country which is the oldest, the staunchest, and in many respects the most important stronghold of the Democratic Party. The South as a whole subscribes heartily to Senator SIMMONS's view and honors him for the vigor with which he avows it. Not unmindful of the services the New York Governor has rendered his own Commonwealth and freely crediting him with the qualities he there has displayed, the rank and file of southern Democrats think, nevertheless, that his nomination for the Presidency of the United States would be extremely ill advised. Nor can this judgment be changed or discounted by propaganda of the eastern press nor by schemes of organized interests who are bent upon breaking down the eighteenth amendment and bringing back the evils which prevailed prior to national prohibition. Southern Democrats are not to be deceived by the ballyhoo of personal press agents and the puppet enthusiasm of hand-picked delegates any more than they are to be stampeded out of their convictions by this or that political flurry 60 days before the Houston convention. They have noted well what Senator SIMMONS points out, that if Governor Smith should be conceded every one of the delegates thus far credited to him he still would have little more than one-third of the number necessary to nominate. A camel might go through the eye of a needle by divesting himself of all impediments, including his hump; but there are certain alliances which never will go through the Houston convention, not if southern Democracy can save the day.

---

[The following is from Winston-Salem Morning Journal of April 23, 1928. The Raleigh News and Observer, Josephus Daniels's paper, also printed an exposé of this Smith plan yesterday]

COPY OF FORMULA EXPOSES MACHINE WORKING IN NORTH CAROLINA—JOHN DAWSON LEADER FOR TAMMANY; "BOB" EDWARDS, OF WAYNE, WAS "CAUTIOUS AND SAGACIOUS" CONTACT MAN; THEY MOVED UP PRECINCT MEETINGS; GUM-SHOE PROGRAM UPSET BY PREMATURE BRAGGING OF LEADERS ABOUT STRENGTH IN STATE

By John A. Livingstone, from the Journal's Washington Bureau

WASHINGTON, April 22.—Carefully laid plans to capture the North Carolina delegation for Gov. Al Smith were formulated in Tammany Hall and sent down for the guidance of the selected group of politicians who have charge of the campaign.

When this selected group met in Raleigh shortly before the meeting of the State Democratic executive committee in March, they had this chart before them and the plans as outlined have been put into operation. These plans call for an organization along these lines:

1. A cautious and sagacious man informed in State politics to visit each congressional district to confer with two men from such district.

2. Selection of three appropriate county leaders in each county in their district by those two district leaders.

3. These three county leaders are to arrange to have their friends present at the precinct meetings to see that the proper men are selected for the county conventions.

4. With the personnel of the country conventions the next step, of course, is the carefully arranged selection of Smith delegates to the State convention.

5. The two district men are to call a conference with at least one from each county in their district to agree upon the delegates to the national convention.

Former Sheriff "Bob" Edwards, of Wayne County, has been the contact man for the Smith headquarters in Raleigh, but in accordance with the carefully veiled plans the leaders in the Smith campaign did not remove the cloak of secrecy until after the Presidential candidate arrived in the State. He is well qualified for the rôle of "cautious, experienced, and sagacious man informed in State politics."

Even while some of the leaders in the Smith campaign were loudly proclaiming from the housetops that they recognized there was no chance to send a Smith delegation to Houston, these carefully veiled plans were being put into operation in the State.

These plans for capturing the State are evidently the same that have been used effectively in other States.

The plans outlined were upon the assumption that the precinct meetings would be held in April, but decision to postpone the convention in June made changes necessary only as to time. In every other respect the organization plan is as good for one month as another.

In only one respect was there threat of upsetting these plans. That was State Chairman Brummitt's idea of having the precinct meetings on the same day as the June primary. That would have put a bombshell into the Smith camp by upsetting the mudsill of the organization plan. Therefore it was incumbent upon Smith leaders to get that changed.

Under the leadership of former State Chairman John Dawson they succeeded in getting the precinct meetings moved up a week, which would give a better opportunity to capture the precinct meetings through lack of interest on the part of opponents.

Some enthusiastic Smith leader in the State could not keep the good news from Tammany Hall, and the word was sent that the State could be swung to Smith. The news was published in the New York World. In more conservative Tammany Hall circles, North Carolina has been put down as a doubtful State.

Perusal of the Tammany plans for capturing the State reveal that indifference of opponents certainly would open the way for capture of both county, district, and State conventions.

The remarkable feature of this organization plan is the lack of any indication anywhere that it is a Smith plan. There is not even the semblance of allusion to Smith, New York, or anything else to indicate its purpose. It accounts for the gum-shoe campaign carried on in North Carolina for months.

Nothing is to be left to chance though, as every feature of it fits in with every other feature. It represents the quintessence of political organization wisdom. The most striking feature of it is that it is designed solely to be carried out by local talent. Nothing is left to chance, but it is simplified to the extent that few mistakes could be made.

It is the simplicity of art. It is the boiled-down experience of years of successful political organization work by Tammany Hall.

Memorandum of the Smith organization plan for North Carolina, as outlined by Tammany Hall and put into operation in the State, follows:

"1. A cautious and experienced and sagacious man informed in State politics should be obtained to go to each congressional district in the State as early as possible and there confer with two men from such congressional district. These two men should meet the man so visiting the congressional district, and, in the first conference, there should be no one present except the three unless after the conference begins the three should agree on calling one or more particular persons.

"2. These two conferees from each congressional district must be men well informed upon the politics of their district and who are prepared to receive and understand the information and suggestions to be given them by the visitor covering the State. The visitor will suggest to the district men as follows:

"That the two district men immediately select from each county in their district three appropriate county leaders who are prepared to act with discretion and to act quickly, and then that the two district men will confer as quickly as possible with these three county men, each conference to be limited to the two district men and the three county men from one county; that is, only the five in this conference, it being

the purpose that the two district men will hold separate conference for each county in their district at such time and place as may be selected by the two district men, and not necessarily in the county under consideration.

"3. After three men from each county are thus thoroughly informed as to their duties and efforts they shall at once arrange to have their friends present at each precinct meeting, meeting apt to be in April, and these friends at each precinct meeting shall choose the proper delegates to the county convention apt to be one week after the precinct meeting.

"4. With the personnel of the county conventions carefully arranged and chosen as hereinbefore indicated proper delegates can be selected to go from each county to the State convention, and it must be made certain that such delegates will actually attend the State convention.

"5. Immediately following the county conventions the two district men, as hereinbefore mentioned, should call a meeting of at least one man from each county in their district, and together they should, if possible, agree upon the delegates which their district will choose to go to the national convention, so that in the district caucus at Raleigh, which is usually held at 10 o'clock on the day of the State convention, there will be no confusion or difficulty about naming the delegates agreed upon to the national convention.

"The putting into actual effect of the above-mentioned plan depends in the main upon the following:

"(a) That the man to visit the 10 congressional districts and confer with the two district men shall be the man for the place.

"(b) That the two district men shall be not only the proper men to handle their district, but shall also be men who will agree to give a little time to this work and see that it is carried out.

"(c) The two district men must stay constantly in touch with the three county men in their district and see that the three county men organize the precinct meetings and send the proper delegates to the county conventions.

"(d) The country conventions must choose proper delegates to the State convention.

"(e) There must be an understanding as far as possible by each county as to who will be chosen delegates from the State convention to the national convention. This can be carried out as suggested in paragraph 5."

### IN DEFENSE OF PIFFLE

Mr. COPELAND. Mr. President, I hold in my hand a short article from the pen of my friend, Bruno Lessing, in the April 23, 1928, issue of the New York American. This is on a very important subject, "In defense of piffle," and I ask unanimous consent that it may be printed in the body of the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article referred to is as follows:

SOMETHING TO THINK ABOUT

By Bruno Lessing

IN DEFENSE OF PIFFLE

Senator WALSH of Montana publicly rebuked Senator ROBINSON of Indiana for having indulged in loose talk.

"The whole thing," said the gentleman from Montana, "seems to me of such character that it might be described in the language of the street as 'piffle.'"

Isn't it rather cruel to thrust such a good and honest word as "piffle" out into the street? True, it was once a homeless wanderer. But Rudyard Kipling took it to his bosom and, even in the supplement of Webster's Dictionary, you find it admitted to good society and respectable homes.

Piffle now wears good clothes, a wrist watch, and spats, goes to most of the plays and belongs to many clubs.

Senator WALSH'S reflections upon the ancestry of Piffle were rather ungracious. It was also a breach of senatorial courtesy. Piffle is one of the oldest Members of the United States Senate. He has always been popular, both with Democrats and Republicans.

Whenever a Senator makes a speech merely for home consumption Piffle stands at his side and coaches him. He has even been known to climb on a Senator's back and whisper the whole speech into his ear. And once in a while he edits the whole CONGRESSIONAL RECORD.

In the realm of society he is so popular that few of the select circles could get along without him. He is the principal speaker at every public banquet and usually helps the other speakers to prepare their speeches.

The younger generation adore him. He attends all their games and gatherings and plays a prominent part in them. Even in the secret and sacred meetings of lovers he is often present—a welcome companion.

Married couples love to have him for dinner because he supplies most of the conversation.

But friend Piffle's activities extend far beyond those social fields. He plays frequently a leading part in what we commonly call "world movements." He is the president and in some cases the whole board of directors of many organizations and associations of men and women who, with the kindest hearts and the best intentions, have undertaken to change human nature.

He plays a great part in the literature of to-day. In fact, he writes a great deal of it himself. He has directed many moving pictures and written all the titles.

It would take far greater space than is at this writer's command to do justice to the part which Piffle plays in our modern life. But the writer's purpose is accomplished if Senator WALSH will admit the error of his attitude. He will be satisfied if the Senator will get up in the Senate and say:

"I regret that I did injustice to Piffle. That estimable gentleman who inspired the speech of my colleague from Indiana is not a denizen of the streets but moves in the highest society." (Copyright, 1928, King Features Syndicate (Inc.).)

### GOV. ALFRED E. SMITH—LETTER OF HON. ROBERT L. OWEN

Mr. BLACK. I ask unanimous consent to have printed in the RECORD an article appearing in the Winston-Salem (N. C.) Journal, containing a letter from former Senator Robert L. Owen to Senator SIMMONS, of North Carolina.

The PRESIDING OFFICER. Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OWEN BACKING SENATOR SIMMONS—OKLAHOMA SENATOR TELLS TAR HEEL TO KEEP UP GOOD FIGHT—TAMMANY HISTORY—RECALLS TREACHERIES OF NEW YORK POLITICIANS

In a ringing letter of commendation Senator Robert L. Owen, of Oklahoma, for 18 years a Member of the United States Senate, takes his stand by the side of Senator SIMMONS in the fight against Al Smith and Tammany Hall. The Journal last night received from Senator Owen a copy of letter he has written to Senator SIMMONS. His letter follows:

WASHINGTON, D. C., *April 21, 1928.*

Hon. F. M. SIMMONS,
*New Bern, N. C.*

MY DEAR SENATOR SIMMONS: The public press announces that Governor Smith, of New York, is visiting North Carolina and that his visit is at once followed by an assault on your leadership in that State.

You and Senator OVERMAN are the oldest Democratic United States Senators and the only ones who were in the Senate when I entered it in 1907. For 18 years, side by side, I fought with you in the Senate of the United States for the welfare of the country and the honor of the Democracy. I know your courage, your knowledge, your wisdom, your attachment to the Democracy, and it is painful to me to see you assailed because you have warned the Democracy against the nomination of Governor Smith.

As I organized the Democratic Party in Indian Territory in 1892, was its first Democratic national committeeman, was its first United States Senator, was three times elected to the Senate, and was twice supported by my State for the presidential nomination, I trust my Democracy will not be questioned when I join you and defend your position in opposing the nomination of Governor Smith and defend you against the assaults of those who now support the candidate of Tammany.

I can not possibly forget that it was Tammany who fought Samuel J. Tilden, a great, brave, and honest Democrat; yet he was nominated and received a majority popular vote, the views of Tammany to the contrary notwithstanding. Indeed, except he had been opposed to Tammany's machine rule and system of commercialized politics and the Tammany leaders who represented everything else but Jeffersonian Democracy, Tilden could not have received the confidence of the country nor the popular vote.

It should be remembered, my dear Senator, that the Tammany tiger fought that great Democrat, Grover Clevelend, "tooth and nail," yet that very fact established Grover Cleveland in the confidence of America and made the country love him for the enemies he had made, and he was three times nominated by the Democratic Party; three times he received the popular vote; and twice he was elected President of the United States.

It will be remembered that it was Tammany's warriors who assisted Mark Hanna to defeat the great Democrat, William J. Bryan, every time he was nominated by the Democratic Party. Three times Bryan was opposed by Tammany men who claimed to be Democrats but still, in spite of Tammany's opposition, Bryan was greatly beloved by the progressive Democracy of America.

When the great Democrat, Woodrow Wilson, was a candidate, Tammany Hall fought him, and the leaders of Tammany were hostile to Wilson during his administration, yet Woodrow Wilson was twice nominated and twice elected in spite of the opposition and lack of fidelity of the forces governed by the Tammany group.

No man who has thoughtfully studied the records of the election returns of 1920 and 1924 need have any doubt that it was the forces affiliated with Tammany that betrayed James M. Cox and John W. Davis, the Democratic nominees for the Presidency, or that Tammany elected Alfred E. Smith as Governor of New York in 1924 as a consequence of such bipartisan intrigue, as is well known to informed men.

Who was it behind the "Al and Cal" or "Cal and Al" campaign against John W. Davis if it was not the bipartisan machine forces of Tammany and Coolidge leaders?

And who is it now that is so lavishly financing the campaign of Governor Smith in the 48 States? Can there be any doubt that it must be the plutocratic associates with whom the Tammany warriors have heretofore affiliated and collaborated? Were not these the same forces substantially who opposed Tilden and Cleveland and Bryan and Cox and Davis?

Did not the representatives of Tammany in the Congress of the United States support Joe Cannon, the mouthpiece of plutocracy, when he was deposed by Democrats and progressive Republicans from his position as czar of the House of Representatives?

Has Tammany really reformed in its organized machine rule methods of commercialized politics? Have they really discontinued their practices which have enriched such men as Tweed and Croker and Murphy? It is possible that the disciples of Thomas Jefferson, of Tilden and Cleveland and Bryan and Wilson will follow the leadership of Tammany and put Tammany in the White House.

Does Tammany imagine that by organizing 48 States by Tammany methods and alert intrigue, by Johnny-on-the-spot methods at precinct caucuses and selecting in advance and secretly key men in 2,500 counties and financing the national campaign and controlling State conventions by such processes, while the people, the trusting people, are inattentive and preoccupied, that it can nominate and seize the Presidency of the United States?

It seems obvious that since 1920 a determined group have been steadily advancing the nomination of Governor Smith, writing books and magazine articles, filling the press with propaganda. It is entirely clear that these processes can make and have made a substantial impression on the plastic minds of many who are like Will Rogers in that "all they know is what they see in the papers." This is sufficient to catch the band-wagon group and the camp followers who are looking for political provender. But it is not enough to overcome in America the profound opposition to Tammany and its methods of organized, commercialized politics. It is not enough to satisfy the country who recognize in Tammany the most highly organized political foe to the national policy of prohibition. It is not enough to satisfy the country with the nullification of the eighteenth amendment by Tammany under the leadership of Gov. Alfred E. Smith, who having sworn to support the Constitution, permits the wholesale, flagrant violation of this law in thousands of speak-easies available to every American who visits New York and who with his own eyes can see this national scandal.

I have no wish to speak in disparagement or to speak lightly of the charming personality of Governor Smith as painted by the New York press, but I am of opinion that Governor Smith is not a person, but that he is an institution representing Tammany and the New York plutocracy affiliated with Tammany in this high enterprise of leading the national Democracy.

Governor Smith is a sachem of Tammany Hall, the most powerful man in the governing group of 13 sachems. He has been in the service of Tammany since his youth, which has developed him, advanced him, and now is trying to make the country believe that he is qualified to lead the unselfish sons of Jeffersonian Democracy.

With Governor Smith and Mr. Coolidge, or an adequate substitute for Mr. Coolidge as the nominee, the American people will face a situation where it matters but little to the plutocracy who is elected, and the demoralization of the Democratic Party will be complete.

Tammany's constituency is as America's great port very naturally overwhelmingly of foreign origin, with foreign ideals, more or less, favoring wide-open immigration, favoring the repeal of the eighteenth amendment, and its nullification until repealed, supporting boss rule, accepting its charities and its employment, and Governor Smith is doubtless their choice and represents their views, but North Carolina and Oklahoma and the American people west of the State of New York, certainly, are opposed to opening the gates any wider to foreign immigration, are opposed to the repeal of the eighteenth amendment, are opposed to boss rule, and are opposed to Tammany leadership.

America is not bankrupt for Jeffersonian leadership, but true Jeffersonian Democrats are not disposed to use Tammany methods in procuring a nomination for the Presidency. North Carolina has Governor McLean, a splendid upstanding Democrat, and worthy of the post of honor, it has the former great Secretary of the Navy, Josephus Daniels, who is worthy and well qualified, Georgia has a splendid man in Senator GEORGE, Tennessee has one of the ablest men in America in CORDELL HULL, Mississippi has the gallant Senator HARRISON, Indiana has a worthy candidate in Woollen, Ohio has the popular Donahay, with his high character and great worth, Texas has its splendid young Governor, Dan Moody, Arkansas has the able, experienced, and worthy Senator ROBINSON, Democratic leader of the United States Senate, Colorado has Huston Thompson, a particularly fine man, seven years on the Federal Trade Commission, California has McAdoo, with his great experience and splendid intellect, and many other States have men worthy to be offered to the national Democracy as leaders of Jeffersonian Democracy.

The real question before America to-day is whether the voice of the plutocracy or the voice of 50 men who happen to be handling billions of property in the conduct of national enterprises shall have control over and smother and extinguish the high principles of Jeffersonian Democracy.

Regardless of possible party stupidity the American Democracy which thinks in terms of the good of all the people, of the good of the rich and the poor—of the good of the very rich and of the very poor—of the learned and the unlearned—which thinks in terms of human brotherhood, free from all malice and full of benevolence, will survive.

If Tammany by intrigue succeeds in seizing the leadership of the Democratic Party it is my opinion that there will emerge from the wreck a Jeffersonian party which will neither ask nor give quarter to the invisible government of a few powerful men which now sits enthroned behind the ostensible Government in Washington.

The gigantic wealth of America owes its existence to the freedom, the opportunities, and the protection of an enlightened and benevolent democracy. The overwhelming majority of the people in America believe in the doctrines of Jefferson and in the Golden Rule, in equal rights to all and special privileges to none, and do not believe in the Hamilton doctrine of organized selfishness which seeks and uses the powers of government for private profit.

With affectionate regard, I am, very faithfully yours,

ROBERT L. OWEN.

### EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

### RECESS

Mr. CURTIS. I move that the Senate take a recess until noon to-morrow.

The motion was agreed to; and (at 5 o'clock p. m.) the Senate took a recess until to-morrow, Wednesday, April 25, 1928, at 12 o'clock meridian.

---

## NOMINATIONS

*Executive nominations received by the Senate April 24 (legislative day of April 20), 1928*

### TREASURER OF THE UNITED STATES

H. Theodore Tate, of Tennessee, to be Treasurer of the United States in place of Frank White, resigned.

### SURVEYOR OF CUSTOMS

John H. Cunningham, of Westminster, Md., to be surveyor of customs in customs collection district No. 13, with headquarters at Baltimore, Md. (Reappointment.)

### COLLECTOR OF CUSTOMS

Manuel B. Otero, of Albuquerque, N. Mex., to be collector of customs for customs collection district No. 24, with headquarters at El Paso, Tex., in place of Thomas P. Gable, whose term of office will expire June 30, 1928.

### ATTORNEY GENERAL OF PORTO RICO

James R. Beverley, of Texas, to be attorney general of Porto Rico.

### PROMOTIONS IN THE NAVY

Lieut. Herbert B. Knowles to be a lieutenant commander in the Navy from the 25th day of August, 1927.

Lieut. Stanwix G. Mayfield, jr., to be a lieutenant commander in the Navy from the 27th day of November, 1927.

The following-named lieutenants (junior grade) to be lieutenants in the Navy from the 3d day of June, 1927:

Clement R. Baume.
Henry T. Wray.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 5th day of June, 1927:

Louis D. Sharp, jr.
Charles M. E. Hoffman.
Edward P. Creehan.

Passed Asst. Surg. Frederick W. Muller to be a surgeon in the Navy, with the rank of lieutenant commander, from the 2d day of June, 1927.

The following-named pay clerks to be chief pay clerks in the Navy, to rank with but after ensign, from the 3d day of December, 1927:

| | |
|---|---|
| Charles G. Crumbaker, jr. | John K. Chisholm. |
| Arthur L. Sullivan. | Stanley B. McCune. |
| Henry L. Greenough. | Chastine A. Murray. |

## POSTMASTERS

### ARKANSAS

John W. Reed to be postmaster at Plumerville, Ark., in place of J. W. Reed. Incumbent's commission expires April 26, 1928.

Roy Hill to be postmaster at Strong, Ark., in place of J. W. Honeycut. Incumbent's commission expired December 19, 1927.

### DELAWARE

William H. Evans to be postmaster at Newark, Del., in place of W. H. Evans. Incumbent's commission expires April 26, 1928.

### FLORIDA

James A. Zipperer to be postmaster at Madison, Fla., in place of J. A. Zipperer. Incumbent's commission expires April 26, 1928.

### GEORGIA

Vera H. Cummings to be postmaster at Warthen, Ga., in place of T. W. Cobb, deceased.

### ILLINOIS

Louis A. Luetgert to be postmaster at Elmhurst, Ill., in place of L. A. Luetgert. Incumbent's commission expired January 10, 1927.

William R. Fletcher to be postmaster at Joliet, Ill., in place of H. H. Bolton. Incumbent's commission expired December 19, 1925.

Harold E. Ward to be postmaster at Sterling, Ill., in place of H. H. Ward. Incumbent's commission expires April 26, 1928.

Ira D. Lakin to be postmaster at Vandalia, Ill., in place of Harry Mabry, deceased.

### INDIANA

Harley O. Poor to be postmaster at Etna Green, Ind., in place of W. A. Hatfield, resigned.

### IOWA

Claude M. Sullivan to be postmaster at Cherokee, Iowa, in place of C. M. Sullivan. Incumbent's commission expires April 28, 1928.

Orpha M. Bloomer to be postmaster at Havelock, Iowa, in place of O. M. Bloomer. Incumbent's commission expires April 28, 1928.

Wilbert W. Clover to be postmaster at Lohrville, Iowa, in place of W. W. Clover. Incumbent's commission expires April 28, 1928.

Loys E. Couch to be postmaster at Newell, Iowa, in place of L. E. Couch. Incumbent's commission expires April 26, 1928.

### KANSAS

Myron Johnson to be postmaster at Oakley, Kans., in place of Myron Johnson. Incumbent's commission expires April 25, 1928.

### KENTUCKY

James A. Hargan to be postmaster at Camp Knox, Ky., in place of J. A. Hargan. Incumbent's commission expired January 17, 1928.

Sam H. Fisher to be postmaster at McRoberts, Ky., in place of S. H. Fisher. Incumbent's commission expired March 1, 1928.

Edward B. Ray to be postmaster at Canmer, Ky. Office became presidential July 1, 1927.

### MAINE

Ralph A. Bessey to be postmaster at Canton, Me., in place of D. A. Bisbee, removed.

### MINNESOTA

Albert J. Schroeder to be postmaster at Holdingford, Minn., in place of A. J. Schroeder. Incumbent's commission expired December 19, 1927.

### MISSISSIPPI

John B. Going to be postmaster at Calhoun City, Miss., in place of J. J. Hiller, deceased.

### MISSOURI

John M. Mathes to be postmaster at Aurora, Mo., in place of M. B. Gardner. Incumbent's commission expired January 17, 1926.

Charles F. McKay to be postmaster at Knox City, Mo., in place of C. F. McKay. Incumbent's commission expired January 28, 1928.

Edward F. Walden to be postmaster at Morehouse, Mo., in place of E. F. Walden. Incumbent's commission expired January 14, 1928.

Frank L. Mertsheimer to be postmaster at Pleasant Hill, Mo., in place of J. F. Hooley. Incumbent's commission expired January 15, 1928.

### NEBRASKA

Milton R. Cox to be postmaster at Arapahoe, Nebr., in place of M. R. Cox. Incumbent's commission expires April 25, 1928.

Arvid S. Samuelson to be postmaster at Axtell, Nebr., in place of A. S. Samuelson. Incumbent's commission expires April 25, 1928.

Walter G. Mangold to be postmaster at Bennington, Nebr., in place of W. G. Mangold. Incumbent's commission expires April 28, 1928.

Robert J. Boyd to be postmaster at Trenton, Nebr., in place of R. J. Boyd. Incumbent's commission expired April 3, 1928.

### NEW HAMPSHIRE

Fred W. Smith to be postmaster at North Woodstock, N. H., in place of F. W. Smith. Incumbent's commission expired January 30, 1927.

### NEW JERSEY

Raymond Johnson to be postmaster at Riverside, N. J., in place of L. C. Pine. Incumbent's commission expired January 31, 1928.

G. Raymond Beck to be postmaster at Roebling, N. J., in place of G. R. Beck. Incumbent's commission expires April 25, 1928.

Alfred T. Kent to be postmaster at Summit, N. J., in place of A. T. Kent. Incumbent's commission expired April 15, 1928.

William M. Matthews to be postmaster at Berlin, N. J., in place of F. D. Matteson, deceased.

### NORTH CAROLINA

Annie L. Stanton to be postmaster at Stantonburg, N. C., in place of A. L. Stanton. Incumbent's commission expires April 28, 1928.

### OHIO

Michael J. Meek to be postmaster at McDonald, Ohio, in place of M. J. Meek. Incumbent's commission expires April 28, 1928.

Harry L. McClarran to be postmaster at Wooster, Ohio, in place of H. L. McClarran. Incumbent's commission expires April 25, 1928.

### PENNSYLVANIA

Gertrude Klinefelter to be postmaster at Jonestown, Pa., in place of Gertrude Klinefelter. Incumbent's commission expires April 26, 1928.

Albert A. Campbell to be postmaster at Zelienople, Pa., in place of V. F. Eichholtz. Incumbent's commission expired January 22, 1928.

### SOUTH DAKOTA

Floyd Twamley to be postmaster at Alexandria, S. Dak., in place of Floyd Twamley. Incumbent's commission expires April 26, 1928.

Philip S. Feldmeyer to be postmaster at Garden City, S. Dak., in place of P. S. Feldmeyer. Incumbent's commission expired August 30, 1926.

Clarence Mork to be postmaster at Pierpont, S. Dak., in place of Clarence Mork. Incumbent's commission expired November 22, 1925.

John W. Rydell to be postmaster at Rosholt, S. Dak., in place of J. W. Rydell. Incumbent's commission expired December 18, 1927.

Carl O. Steen to be postmaster at Veblen, S. Dak., in place of C. O. Steen. Incumbent's commission expired April 21, 1928.

### TENNESSEE

James F. Toney, jr., to be postmaster at Erwin, Tenn., in place of J. F. Toney, jr. Incumbent's commission expired April 22, 1928.

Alice L. Needham to be postmaster at Trimble, Tenn., in place of A. L. Needham. Incumbent's commission expired April 22, 1928.

### TEXAS

Sol D. Smith to be postmaster at Granbury, Tex., in place of S. D. Smith. Incumbent's commission expires April 28, 1928.

Olive Raoul to be postmaster at Gustine, Tex., in place of Olive Raoul. Incumbent's commission expired April 3, 1928.

Daniel B. Gilmore to be postmaster at McGregor, Tex., in place of D. B. Gilmore. Incumbent's commission expired February 8, 1927.

Duane B. Scarborough to be postmaster at Oakwood, Tex., in place of D. B. Scarborough. Incumbent's commission expires April 28, 1928.

Thomas B. Higgins to be postmaster at Reagan, Tex., in place of T. B. Higgins. Incumbent's commission expires April 28, 1928.

Jesse L. Holcomb to be postmaster at Seminary Hill, Tex., in place of H. L. Cullender. Incumbent's commission expired December 19, 1927.

Clarence V. McMahan to be postmaster at Waco, Tex., in place of C. V. McMahan. Incumbent's commission expires April 28, 1928.

Homer H. Turner to be postmaster at Rockdale, Tex., in place of E. I. Wade, deceased.

Alice Pipes to be postmaster at White Deer, Tex., in place of Harry Wheeler, resigned.

UTAH

Edward J. Young, jr., to be postmaster at Vernal, Utah, in place of E. J. Young, jr. Incumbent's commission expired April 15, 1928.

VIRGINIA

Elroy Shelor to be postmaster at Meadows of Dan, Va., in place of Elroy Shelor. Incumbent's commission expired February 8, 1928.

Hansbrough Hannah to be postmaster at Natural Bridge, Va. Office became presidential July 1, 1927.

Richard F. Hicks to be postmaster at Schuyler, Va., in place of A. E. Coppe, resigned.

WISCONSIN

George L. Harrington to be postmaster at Elkhorn, Wis., in place of S. C. Goff. Incumbent's commission expired January 7, 1928.

## CONFIRMATIONS

*Executive nominations confirmed by the Senate April 24 (legislative day of April 20), 1928*

SURVEYOR OF CUSTOMS

John H. Cunningham to be surveyor of customs, district No. 13, Baltimore, Md.

POSTMASTERS

CALIFORNIA

Curtis C. Maltman, El Monte.
Harry H. Chapman, Hornbrook.
Mary S. Rutherford, Truckee.

COLORADO

Charles E. Baer, Steamboat Springs.

KANSAS

Anna Smith, Moundridge.

MASSACHUSETTS

John R. Walsh, Topsfield.

MISSISSIPPI

James C. Ellis, Bucatunna.

MISSOURI

Henry P. Hughes, Everton.

NEBRASKA

Charles McCray, Merriman.

WISCONSIN

Ernest P. G. Schlerf, Oshkosh.

# HOUSE OF REPRESENTATIVES

## TUESDAY, *April 24, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Holy Spirit, faithful guide, in the quiet of these moments may our relationship be solemnized. The language of our breath is "Holy, holy, holy!" Forbid that we should ever take Thy name in vain, the only name in heaven and earth. Clothe us with the garment of strength without the sense of toil and with the spirit of service without the sense of hardship. Dwell in all our hearts, so there shall be a union of might and weakness, of day and night, and then our human frailties shall be blessed with power divine. Lift up our whole country and strengthen it in peace and concord. O sun of righteousness, arise with healing in Thy beams, for there are so many waiting for Thy touch. When the day closes, turn weariness into relaxation and give the blessing of rest. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate disagrees to the amendment of the House of Representatives to the bill (S. 1648) entitled "An act for the relief of Oliver C. Macey and Marguerite Macey," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HOWELL, Mr. NYE, and Mr. BAYARD to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3808. An act to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was presented to the House of Representatives by Mr. Latta, one of his secretaries, who also announced that on the following dates the President approved and signed bills and a joint resolution of the House of the following titles:

On April 11, 1928:

H. R. 328. An act to relieve the Territory of Alaska from the necessity of filing bonds or security in legal proceedings in which such Territory is interested;

H. R. 343. An act to amend section 128, subdivision (b), paragraph 1, of the Judicial Code as amended February 13, 1925, relating to appeals from district courts;

H. R. 359. An act authorizing the presentation of the iron gates in West Executive Avenue between the grounds of the State, War, and Navy Building and the White House to the Ohio State Archæological and Historical Society for the memorial gateways into the Spiegel Grove State Park;

H. R. 5075. An act for the relief of W. J. Bryson;

H. R. 5923. An act for the relief of the Sanitarium Co., of Portland, Oreg.;

H. R. 6993. An act authorizing the Secretary of the Interior to sell and patent certain lands in Louisiana and Mississippi;

H. R. 7463. An act amending an act entitled "An act authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims";

H. R. 8725. An act to amend section 224 of the Judicial Code; and

H. R. 10483. An act to revise the boundary of a portion of the Hawaii National Park on the island of Hawaii in the Territory of Hawaii.

On April 12, 1928:

H. R. 333. An act authorizing the sale of certain lands near Seward, Alaska, for use in connection with the Jesse Lee Home;

H. R. 465. An act to authorize the city of Oklahoma City, Okla., to sell certain public squares situated therein;

H. R. 1997. An act for the relief of Clifford J. Turner;

H. R. 4125. An act for the relief of Holger M. Trandum; and

H. R. 11579. An act relating to investigation of new uses of cotton;

On April 13, 1928:

H. R. 3315. An act for the relief of Charles A. Black, alias Angus Black;

H. R. 5545. An act granting certain lands to the State of California;

H. R. 8499. An act for the relief of Arthur C. Lueder;

H. R. 9118. An act for the relief of William C. Braasch; and

H. R. 10563. An act extending the provisions of the recreational act of June 14, 1926 (44 Stat. L. 741), to former Oregon & California Railroad and Coos Bay Wagon Road grant lands in the State of Oregon.

On April 16, 1928:

H. R. 405. An act providing for horticultural experiment and demonstration work in the southern Great Plains area;

H. R. 5590. An act to authorize appropriations for construction of culverts and trestles in connection with the camp railroad at Camp McClellan, Ala.;

H. R. 5817. An act to provide for the paving of the Government road extending from St. Elmo, Tenn., to Rossville, Ga.; and

H. R. 9829. An act to extend the provisions of the act of Congress approved March 20, 1922, entitled "An act to consolidate national forest lands."

On April 18, 1928:

H. R. 10884. An act to amend the act entitled "An act to carry into effect provisions of the convention between the United States and Great Britain to regulate the level of Lake of the Woods, concluded on the 24th day of February, 1925," approved May 22, 1926.

On April 19, 1928:

H. R. 4702. An act for the relief of Benjamin S. McHenry, alias Henry Benjamin;

H. R. 7191. An act to authorize the Secretary of Commerce to convey certain land in Cook County, Ill., to the Chicago & West-

ern Indiana Railroad Co., its successors or assigns, under certain conditions;

H. R. 7908. An act to authorize the granting of leave to veterans of the Spanish-American War to attend the annual convention of the United Spanish War Veterans and auxiliary in Habana, Cuba, in 1928; and

H. R. 10540. An act to credit retired commissioned officers of the Coast Guard with active duty during the World War performed since retirement.

On April 20, 1928:

H. R. 3510. An act to authorize the President, by and with the advice and consent of the Senate, to appoint Capt. George E. Kraul a captain of Infantry, with rank from July 1, 1920;

H. R. 5687. An act authorizing and directing the Secretary of the Interior to sell certain public lands to the Cabazon Water Co., issue patent therefor, and for other purposes;

H. R. 5721. An act authorizing J. C. Norris, as mayor of the city of Augusta, Ky., his successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at Augusta, Ky.;

H. R. 6360. An act for the relief of Edward S. Lathrop;

H. R. 8650. An act for the relief of C. S. Winans;

H. R. 10564. An act to authorize the Secretary of War to grant and convey to the county of Warren a perpetual easement for public highway purposes over and upon a portion of the Vicksburg National Military Park, in the State of Mississippi;

H. R. 10932. An act for the relief of the widows of certain Foreign Service officers; and

H. J. Res. 118. Joint resolution authorizing the Secretary of War to award a duplicate Congressional Medal of Honor to Lieut. Col. William J. Sperry.

On April 21, 1928:

H. R. 242. An act to amend section 90 of the national defense act, as amended, so as to authorize employment of additional civilian caretakers for National Guard organizations, under certain circumstances, in lieu of enlisted caretakers heretofore authorized;

H. R. 350. An act to extend the time for completing the construction of a bridge across the Delaware River near Trenton, N. J.;

H. R. 475. An act to permit taxation of lands of homestead and desert-land entrymen under the reclamation act;

H. R. 1530. An act for the relief of William F. Wheeler;

H. R. 1970. An act for the relief of Dennis W. Scott;

H. R. 2294. An act for the relief George H. Gilbert;

H. R. 6431. An act for the relief of Lewis H. Easterly;

H. R. 7011. An act to detach Okfuskee County from the northern judicial district of the State of Oklahoma and attach the same to the eastern judicial district of said State;

H. R. 8309. An act to amend an act entitled "An act to prohibit the unauthorized wearing, manufacture, or sale of medals and badges awarded by the War Department," approved February 24, 1923;

H. R. 8915. An act to provide for the detention of fugitives apprehended in the District of Columbia;

H. R. 8983. An act for the relief of William G. Beaty, deceased;

H. R. 9365. An act to legalize a bridge across the St. Francis River at Marked Tree, in the county of Poinsett, Ark.;

H. R. 9483. An act to provide for the acquisition of rights of way through the lands of the Pueblo Indians of New Mexico; and

H. R. 9830. An act authorizing the Great Falls Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Potomac River at or near the Great Falls.

On April 23, 1928:

H. R. 431. An act to authorize the payment of certain taxes to Okanogan County, in the State of Washington, and for other purposes;

H. R. 852. An act authorizing the issuance of a certain patent;

H. R. 1588. An act for the relief of Louis H. Harmon;

H. R. 6990. An act to authorize appropriations for construction at the Pacific Branch, Soldiers' Home, Los Angeles County, Calif., and for other purposes;

H. R. 7223. An act to add certain lands to the Gunnison National Forest, Colo.;

H. R. 7518. An act for the relief of the Farmers National Bank of Danville, Ky.;

H. R. 8651. An act for the relief of Lynn W. Franklin;

H. R. 8724. An act granting certain lands to the city of Mendon, Utah, to protect the watershed of the water-supply system of said city;

H. R. 8733. An act granting certain lands to the city of Bountiful, Utah, to protect the watershed of the water-supply system of said city;

H. R. 8734. An act granting certain lands to the city of Centerville, Utah, to protect the watershed of the water-supply system of said city;

H. R. 9902. An act for the relief of James A. DeLoach;

H. R. 11203. An act granting the consent of Congress to the counties to Telfair and Coffee to construct, maintain, and operate a free highway bridge across the Ocmulgee River at or near the present Jacksonville ferry in Telfair and Coffee Counties, Ga.;

H. R. 11762. An act to authorize an appropriation to complete construction at Fort Wadsworth, N. Y.; and

H. R. 11887. An act authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Nebraska City, Nebr.

On April 24, 1928:

H. R. 11404. An act authorizing the Port Huron, Sarnia, Point Edward International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Clair River at or near Port Huron, Mich.

### FLOOD CONTROL

Mr. MADDEN. Mr. Speaker, I ask unanimous consent that I may proceed for not more than five minutes.

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for five minutes. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Speaker and gentlemen, yesterday afternoon I introduced an amendment to the flood control bill which provided that when southern Illinois and southeastern Missouri and New Orleans assumed the responsibility of relieving the Government of any damages by reason of the work of construction which the Government was about to enter upon, then the work would proceed under the bill which we are considering. The House rejected this amendment.

Since then I have talked with the President, who says he will not insist upon the conditions laid down in the amendment which I proposed to the committee, and therefore I want to state to the House, in all good conscience, I have no valid reason that I know of for voting against the bill, and I propose to vote for it. [Applause.]

### DEPARTMENT OF AGRICULTURE APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes, with Senate amendments, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. Is there objection to the request of the gentleman from Iowa? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. DICKINSON of Iowa, WASON, SUMMERS of Washington, BUCHANAN, and SANDLIN.

### ADDRESS OF HON. J. WILL TAYLOR, OF TENNESSEE

Mr. BROWNING. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a speech delivered over the radio last evening here in Washington by my colleague, the gentleman from Tennessee, Hon. J. WILL TAYLOR, on the subject of immigration.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. BROWNING. Mr. Speaker, under leave granted me to extend my remarks I submit the speech delivered on last evening, April 23, over station WTFF, of Washington, by my colleague, Hon. J. WILL TAYLOR, Member of Congress from the second Tennessee district. Mr. TAYLOR is ranking majority member of the Immigration Committee of the House, and has been on that committee for 10 years. He has made a thorough, intelligent, and devoted study of this all-important American question. His position is sound and patriotic.

The address is as follows:

### IMMIGRATION

My friends of the air, at the outset please permit me to acknowledge my appreciation to my good friend and former colleague, Hon. Charles I. Stengle, of New York, for the high privilege of speaking to you who may be listening in this evening on a subject to which I have devoted a large part of my legislative career, and a subject which is of vital importance to every man, woman, and child in America as well as to their posterity—the subject of foreign immigration. During the past 10 years as a member of the Immigration Committee of the House of Representatives I have had a rare opportunity to study this great problem first hand, as well as the privilege to participate in the efforts that have been made during that period to solve it.

In my judgment the proposition that confronts every citizen, and particularly every man in public life, is how the course of to-day's events can be the better molded to insure the peace and perpetuity of this great country and the marvelously designed republican form of government which has contributed so much to the happiness, comfort, and prosperity of us all. Every patriotic American wants to do what he can to help keep the Stars and Stripes aloft, to maintain unsullied the honor and integrity of the Nation with its wonderful institutions, and above all to preserve our country in material and spiritual health to the end that the benefits and blessings of free government may be transmitted in undiminished vigor to generations to come.

The dominant question is how can we best preserve and perpetuate this America of ours?

There are a number of things that we can do, but as I contemplate the panorama of social and economic problems which even to-day after many years of consideration remain unsolved; and as I recall the various policies of government which have challenged discussion throughout our history, I become more and more convinced that the keystone of American perpetuity—the most signal and important single achievement of American statesmanship in recent years are those legislative enactments providing for restriction and selection in the immigration of aliens.

When our country was young, when farms were exchanged for a hunting knife or a flint-rock rifle, when our natural resources called to the world for development, it was natural that we should welcome people from all corners of the earth to come and help us build a new nation. At that time we could not with practicality impose conditions or qualifications on those who were disposed to cast their lot among us. But now the situation has changed. To-day we have no free lands to allot. We have no surplus of natural resources for development. We have no under-manned industries. These United States which counted only a few millions of hardy pioneers along the Atlantic seaboard now number 115,000,000 souls scattered from coast to coast, from the Arctic Circle to the islands of the seas. Our lands have been occupied. Hamlets have become villages, towns have grown into cities, and our great metropolitan centers now number their inhabitants by the millions. The problem of to-day is to find room and occupation, housing facilities, food, clothing, entertainment, equipment, education, and transportation for this teeming, busy population.

With this tremendous growth in numbers have come changes in every industry known to the genius and ingenuity of man. A century ago the steam engine began to displace the power of hand and horse, water and wind. The steam engine still has its function, but only in the past generation we have noted the development of the internal-combustion engine and the electric motor. To-day the employment of electricity is rapidly superseding man power and transforming automatically the lives of the people. It would be presumptuous for me to recount to you the myriad articles that are made by electricity or the part that electric power plays in industry.

What is the significance of this marvelous growth of machine power, and what will be its consequences?

For one thing, of course, it means comforts and luxuries for all of us such as our sires and our grandsires in their wildest vagaries never dreamed. But in another aspect, it means the most momentous readjustments and transformations in the lives of all who labor. Machinery has taken the place of human hands in every avenue of industry. We are told that in the great steel mills there are mechanical devices to-day which do the work for which it was formerly necessary to employ as many as 200 men. Machines do not eat. They wear no apparel. They do not require homes, or household goods, rest and recreation, or doctors, or movie shows. They produce but they do not consume, and from that source springs one of our greatest difficulties.

This is the social and economic condition which your representatives in Congress began to sense nearly a generation ago. As a matter of fact, at the very beginning of our Government and intermittently since there has from time to time arisen complaint against the admission of foreign people. But it was only toward the close of the nineteenth century, when foreigners began to come to our shores at the rate of nearly a half million a year, and when modern machinery began to make itself felt in industry that the necessity for some protection to the working people of the United States became apparent and imperative.

From 1890 to 1900 more than three and one-half million aliens were landed on our shores, and from 1901 to 1910 the total alien influx was approximately nine millions. In 1914, and again in 1917, President Wilson vetoed new exclusion bills, each containing a "literacy test" and the hordes from abroad continued to jam our ports demanding admittance. Of course, during the great World War immigration from continental Europe was necessarily greatly curtailed; but at the close of the struggle, due to chaotic conditions in Europe, the tide of immigration to America was renewed with increased volume and momentum.

The great steamship companies of the world began to vie with each other in commercial rivalry to see which could deliver the greatest number from abroad regardless of their qualifications for American citizenship. It soon became obvious to everybody that unless something was done to arrest this terrible tide that America would soon become the dumping ground and the melting pot for the offcast of all Europe. Under the leadership of the late Representative John L. Burnett, of Alabama, then chairman of the Committee on Immigration of the House, we had already passed the act of 1917, which undertook to bar the indigent, the criminal, the insane, the diseased, the illiterate, and the anarchistic classes, but this would not begin to stem the tide. The temporary quota law of 1921 was thereupon enacted, but it proved to be a mere stop-gap. It was imperfect from an administrative standpoint, contained many exceptions and exemptions, and was susceptible to all sorts of easy evasions. The inevitable result was that within two years following its enactment the tide of immigration began to mount again. In the year before it became effective the gross admissions exceeded 800,000. In the first year of its operation they were reduced to 300,000. The second year they crossed the half million mark, and in the third year they went over 700,000.

Patriotic organizations throughout the country many of which for years previous had been agitating this question became still more active and insistent, and more tenaciously besieged and besought Congress to take some drastic step to save America from this great menace. Conspicuous among those organizations was the Junior Order United American Mechanics. In a speech delivered in the House of Representatives on April 8, 1924, I took occasion to call public attention to the magnificent work performed by this splendid order in awakening the public conscience of America to the dangers of unrestricted foreign immigration. I said then, and I repeat to-night, that for the patriotic and unselfish service which this stalwart organization has rendered to the cause of Americanism it has earned and will deserve, and undoubtedly will receive the everlasting gratitude of the American people. Largely as result of this agitation the 1921 temporary quota was perfected by the enactment of what is now known as the Johnson-Reed Immigration Act, which became effective July 1, 1924. This act is based upon a 2 per cent quota of the foreign-born population of the United States, according to the census of 1890, and admits of an aggregate quota of only 164,667. It possesses a sentimental appeal, inasmuch as the largest quotas are from the countries of northern and western Europe, from which most of our ancestors came.

While taking a just pride in the progress that has been made in the solution of our immigration question, those directly responsible therefor admit that the good work has not yet been finished. They expect, however, to continue the fight until Old Glory and our free institutions are amply safeguarded against any baleful influence from abroad.

I should feel indeed derelict in my duty if, in passing, I did not pay just tribute to the Republican Congress which passed the immigration act of 1924, to the leaders, Representative ALBERT JOHNSON, of Washington, and Senator DAVID REED, of Pennsylvania, who sponsored it, and to our great President, Calvin Coolidge, who made it a law by his signature.

In conclusion, my friends of the air, I submit that our immigration legislation was born largely of the spirit of that celebrated poem written by Aldrich, which, in my judgment, is most apropos at this time:

"O Liberty, white goddess, is it well
To leave the gates ungarded? On thy breast
Fold sorrow's children; soothe the hearts of fate.
Lift the downtrodden, but with hand of steel
Stay those who to thy sacred portals come
To waste the gifts of freedom. Have a care
Lest from thy brow the clustered stars be torn
And trampled in the dust. For so of old
The thronging Goth and vandal trampled Rome,
And where the temples of the Cæsars stood
The lean wolf, unmolested, made her lair."

## EQUALIZATION FEES

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD on the subject of equalization fees.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LANKFORD. Mr. Speaker, I reintroduced in the House to-day the McNary farm relief bill as it passed the Senate, with proposed changes as to the equalization fee, so that in case of tobacco no fee could be levied on the sale or transportation of leaf tobacco, but, if at all, only on the sale or transportation of cigarettes, cigars, and smoking tobacco, and as to livestock and grain so as not to be on the transportation except "in wholesale or carload lots by common carrier for delivery in interstate commerce."

My new bill would also repeal all Federal taxes or licenses now of force on tobacco in all forms whatsoever.

I am reintroducing the Senate bill with these changes, not because I favor the Senate bill in its entirety, but in order to suggest these amendments in an effort to make less offensive and burdensome the greatly criticized equalization fee as to tobacco, livestock, and grain.

The equalization fee in the provisions of the Senate bill as to other commodities is in splendid shape, if there is to be any equalization fee at all.

I seek to repeal all other taxes on tobaccos in any form. If this is done I am confident there will never be need for an equalization fee in behalf of the farmers greater than is now actually levied on tobaccos as a tax for general purposes. I purposely left chewing tobacco out of the list on which an equalization fee might be levied, as this form of tobacco has been taxed ever since the Civil War, and in all fairness should now be relieved of all tax burdens.

PRESENTATION OF MEMORIALS AND RESOLUTIONS

Mr. SEARS of Nebraska. Mr. Speaker, I ask unanimous consent to present about 50 memorials and resolutions from chambers of commerce of various cities in Nebraska in reference to flood control and the conserving of the waters of certain rivers near their source.

The SPEAKER. The gentleman does not need the consent of the House to present the resolutions.

WILLAMETTE AND COLUMBIA RIVER CHANNEL PROJECT

Mr. KORELL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the Columbia River Channel and to include therein some quotations from the hearings before the committee considering the project.

The SPEAKER. The gentleman from Oregon asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. KORELL. Mr. Speaker and Members of the House, it is frequently stated that the demands for transportation facilities are regulated largely, if not entirely, by the productive capacity of the farms, factories, forests, and mines of the various communities and sections of the United States. Whenever local production exceeds the immediate consumptive needs of a particular community or section there is a necessity for the quick exportation of the excess in order to avoid the curtailment of production, financial depression, unemployment, and all the disastrous consequences that inevitably follow in the wake of these highly undesirable conditions.

It appears idle to add to this statement any mention of the fact that a shortage in local production must be made up by importing sufficient of the deficient commodities to take care of local consumptive needs. Accordingly, if the cost of exportation should become so high that it will prevent local producers from competing successfully in distant and foreign markets local production will be retarded as effectively as if the excess production could not be moved at all. On the other hand, when the cost of importation becomes unreasonable local purchases decline and the trade of distant communities and sections falls off. Obviously, therefore, every extra charge that is added to the cost of transportation is a serious and actual menace to both producer and consumer. Moreover, freight rates have a direct bearing upon the cost of living in the United States and are reflected in the general prosperity and welfare of our country. In view of the ever present and vitally important need of having adequate transportation facilities everywhere in the United States to meet the reasonable and varying requirements of the different communities and sections of the country, I believe that a few words, at this time and in this connection, about the Willamette and Columbia River channel project, which has been recommended by the Board of Army Engineers and received the approval of the House Committee on Rivers and Harbors will be timely and appropriate. Before commenting upon the details of this particular project however, I will ask for your indulgence to a few brief remarks about the importance of river and harbor work generally throughout the United States.

On account of the broad expanse of our country, the great distance between its various communities and sections and the vast oceans which lie on either side and between us and the great foreign markets of the world, the problem of establishing and maintaining adequate transportation facilities throughout the United States to handle our domestic and foreign commerce has taken on a national aspect and has made the subject of transportation a great and absorbing national problem. It is a public matter of paramount interest to the American people, and one that has received, and must continue to receive, the most careful attention and study by Congress. I am delighted to see the interest that has been manifested by the present session in several of the most important phases of transportation, particularly in the acquisition and maintenance of an adequate merchant marine.

Much progress has been made to date in the development of various methods of transportation by land, air, and water. In the lifetime of many now living the continent on which we live has been spanned with hoops of steel rails over which the commerce of the Nation moves daily with speed and reasonable economy. During recent years hard-surface roads have been constructed in practically every State in the Union. Good intrastate market roads are to be found almost everywhere. The Government is now engaged in building a wonderful network of main highways to connect up with the principal State and county roads all over the United States. Again, at the present time several Government departments are occupied with the work of laying out and establishing air-mail routes. Passenger, mail, and express are now being carried from city to city on the wings of the wind. Lindbergh and other daring aviators have opened the eyes of America to the possibilities of aerial transportation. Both land and air transportation have been liberally encouraged and generously supported by Congress. Before the combined progress of rail, motor, and airplane transportation the distances on our continent are being rapidly reduced and time greatly conserved.

Notwithstanding the unprecedented progress of rail, motor, and airplane transportation methods which are steadily bringing the remote communities and sections of our wonderful country into closer, more intimate, and cordial relations with each other there are certain inherent limitations in each of these methods which make for the establishment of minimum charges below which freight rates can not drop and savings can not be effected on the cost of transportation. It is also impossible to handle our rapidly growing foreign commerce by any one of these methods. The lowest freight rates must be attained and the maximum savings in the cost of transportation effected through the further development and enlargement of our water-borne commerce. Ships have been and will continue to be the only practical means by which we can carry our exports abroad. These considerations account for the renewed interest in shipping and river and harbor development work. They are also the explanation of the agitation for an American merchant marine during recent sessions of Congress.

Since the construction of the Panama Canal and particularly since the conclusion of the World War, the opportunity for greater reductions in freight rates through the further development and increase of our water-borne commerce has become more and more apparent to the American people. The idea of increasing our national prosperity through saving on the cost of transportation is now generally accepted and may at this time be said to be definitely established. The extent of the development that has already been made in our intercoastal trade through the Panama Canal has been remarkable. To meet the constantly increasing demands that are being made upon them, the steamship lines engaged in carrying this class of commerce are racing at this very minute with each other in an effort to build larger and faster ships. On the other hand the great maritime nations of the world are seeking to capture our foreign trade with speedier and larger vessels which foreign-labor conditions and lower construction costs have so far enabled them to build abroad more rapidly and economically than American capital has been able to build them in the United States. One of the committees of this House recently conducted extended hearings to determine the most satisfactory way to overcome this disparity and to assist in establishing and maintaining an adequate merchant marine flying the American flag. The results of the committee's study and conclusions are now before the House in the form of a well drafted and constructive bill. Incidentally I am glad to see the press of the country give the favorable notices that it has to this very meritorious piece of legislation.

As a consequence of the tremendous savings that are being effected through the rapid growth and expansion of our water-borne commerce, both coastwise and foreign, reflected in the race that is now going on between intercoastal and foreign steamship owners to construct larger and faster vessels, many of our major seaports require deeper and wider channels to accommodate the tonnage that is clearing from them. There is a need to standardize the channel dimensions of all our major seaports so that the larger size ships may enter and clear from them without unreasonable delay or excessive costs. This need is somewhat analogous to that which existed a few years ago for standardizing the rails and rolling-stock equipment of our various railroads. It will not avail the ship operators of either

the Atlantic and Gulf States to build larger and faster vessels to meet the increasing demands of our intercoastal trade if their ships when built will not be able to enter the Pacific coast seaports. The same thing is true with regard to ships of the Pacific ports sailing for Atlantic and Gulf ports. Manifestly this necessity requires a certain uniformity in the width and depth of river channels leading to and from the seaports.

One of the major Pacific coast ports that has experienced large increases to its tonnage by the development of intercoastal shipping and the extension of our foreign trade, principally with the Orient, is the port of Portland, situated on the Columbia River about 100 miles inland from the Pacific Ocean and serving a territory of approximately 259,000 square miles, with about 4,500,000 people. Like many other major seaports the commerce of this particular port has outgrown its present channel dimensions considerably, and there is an imperative need for deepening and widening its channel. I, therefore, take this occasion to bring to your attention an extended statement that I recently made before the Rivers and Harbors Committee of the House, urging the committee's adoption of the recommendation of the Board of Army Engineers for the immediate improvement of the Willamette and Columbia River Channel from Portland to the Pacific Ocean.

The statement is quite comprehensive, and I appreciate the opportunity that has been accorded me of being able to extend it in the RECORD to supplement and accompany my present remarks on the subject under discussion. For convenience I have inserted several tables to which references were made in the course of making my statement. I have also made one or two corrections of figures. I trust that you will favor me by reading this statement at your leisure and that the merits of the Willamette and Columbia River project will commend it to your favorable consideration when the rivers and harbors bill shall come before you for your vote. I also appreciate your indulgence of my remarks at this time.

The statement is as follows:

STATEMENT OF HON. FRANKLIN F. KORELL, REPRESENTATIVE IN CONGRESS FROM THE STATE OF OREGON

The CHAIRMAN. Mr. KORELL, some of the members have not been there, and if you will take the pointer and show the committee what part of these two rivers are to be improved, and on what terms under this report, then we will start off with our basis.

* * * * * * *

The CHAIRMAN. Take your own method and your own way, but, as it seems to me, the things that the committee will be interested in are these: First, do the vessels which will carry your traffic need 35 feet; second, is your commerce dense enough so that you need additional width; and, third, are your banks being stabilized there so that your maintenance charges are likely to be lessened, and will this improvement help to stabilize the banks by the excavation of the material and placing it in the form of these dikes which they have been using for stabilizing there?

Mr. KORELL. I will touch on all those matters as I proceed. I will mention some other matters as I go along, so that the record may be complete should anyone wish to inquire about facts that may not appear in the committee's report.

PORTLAND—A RIVER PORT

The port of Portland is situated at the confluence of the Willamette and Columbia Rivers. It is as I have just pointed out to you—a little over 100 miles inland from the Pacific Ocean. It occupies a geographical position somewhat analogous to such major ports as Hamburg, which is 80 miles from the mouth of the Elbe; London, which is 60 miles up the Thames from the North Sea; New Orleans, which is 90 miles above the junction of the Mississippi with the Gulf of Mexico, and Philadelphia, which is 90 miles from the point where the waters of the Delaware River and Bay merge with the waters of the Atlantic Ocean. It is the only fresh-water harbor on the Pacific coast. A list of famous river ports would not be complete unless it includes such ports as Liverpool on the Mersey, Glasgow on the Clyde, Buenos Aires on the Plata, Shanghai on the Yangtze, Havre on the Seine, and Rotterdam on the Rhine. New York on the Hudson is perhaps the most famous of all river ports. The history of all these great shipping centers shows that their elevation as ports is due to the fact that they are at the head of ship navigation on rivers that drain great basins. Judging from comparisons, there is no reason why Portland should not become the equal and even exceed the shipping of many of these important ports. It possesses all of their natural advantages. The mouth of the Columbia River is 610 miles north of San Francisco Harbor and 160 miles south of the Straits of Juan de Fuca.

The port of Portland is reached at the present time by the Willamette and Columbia River Channels, which the Government assists in maintaining 30 feet deep and 300 feet wide. It is for the purpose of urging your adoption of the recommendation of the Board of Army Engineers for the improvement, or perhaps I might more properly state, the completion of plans for the deepening and widening of these two channels that the Oregon delegation has requested and obtained the privilege of appearing before you this morning. Before I proceed further I want to express our thanks for your favor in indulging us with the courtesy of an early hearing. I am confident that you will give our project your very careful consideration and that such consideration can not do otherwise than commend it to you.

RECOMMENDATION OF ARMY ENGINEERS

Briefly summarized, the recommendation of the Board of Army Engineers, approved by the War Department, is that the present channels of the Willamette and Columbia Rivers should be deepened to a depth of 35 feet and widened to a depth of 500 feet for their entire length. The recommendation is accompanied by a report, signed by Maj. Gen. Edgar Jadwin, Chief of Army Engineers. I have a copy of this report at hand and will read a few excerpts from it:

"A large and important commerce has developed on the Columbia and lower Willamette Rivers, due in great measure to the efforts of Portland and the expenditure by that locality of some $25,000,000 on channel improvement and on construction of terminal facilities.

"The extent of this cooperation demonstrates the belief of the people of Portland in the future of their port and indicates the energy and earnestness with which they may be expected to work in the future for further growth and expansion of business."

Mr. MCDUFFIE. You say you spent $25,000,000 on channel improvement and terminals. What percentage was spent for the channel improvement?

Mr. KORELL. Approximately $10,000,000 for channel improvement work, and approximately $15,000,000 for harbor improvement facilities. The figures furnished to me by the ports engineer are as follows:

| | |
|---|---|
| On river entrance | $475,000.00 |
| Dredging and similar work | 10,510,912.35 |
| For other purposes incidental to above | 5,166,333.53 |
| Public docks | 10,000,000.00 |
| Total | 26,152,245.88 |

The Government expenditures are:

| | |
|---|---|
| Amount expended on all projects to June 30, 1927, after deducting receipts from sales, etc., amounting to $81,025.24: | |
| New work | $3,550,332.97 |
| Maintenance | 6,232,629.49 |
| Net total expended | 9,782,962.46 |
| Total appropriations and contributions to June 30, 1927 | 10,223,343.06 |

The CHAIRMAN. They have, as you will remember, Congressman MCDUFFIE, what was two years ago the largest dredge in the world, as I understood.

Mr. KORELL. That is a fact.

The CHAIRMAN. That worked just below Portland.

Mr. KORELL (reading):

"The utilization which is being made of existing channels is shown by the size of vessels now entering the port. The number drawing 28 feet and over was 196 in 1926, while in 1924 it was only 72."

The CHAIRMAN. How many of these were oil tankers and how many carriers of other cargo?

Mr. KORELL. I think practically all of those were carriers of cargo other than oil tankers, but the engineer, General Deakyne, is here, and if he doesn't have the figures you have asked for I can present them to the committee later on. I don't have the exact number now.

LARGE VESSELS CLEAR PORT

The CHAIRMAN. What percentage of the commerce, which I understand to be 7,000,000 tons, was carried in vessels above 28-foot draft, and what percentage in vessels of less draft?

Mr. KORELL. I do not carry those figures in my mind.

* * * * * * *

The CHAIRMAN. Here is the statement in the annual report, part 2, page 855:

*Trips and drafts of vessels*

OCEAN GOING

| Draft (feet) | Inbound— | | | | Outbound— | | | |
|---|---|---|---|---|---|---|---|---|
| | Steamers | Motor vessels | Sailing | Barges | Steamers | Motor vessels | Sailing | Barges |
| 31 to 32 | | | | | 2 | | | |
| 30 to 31 | 1 | | | | 5 | | | |
| 29 to 30 | 3 | 2 | | | 14 | 1 | | |
| 28 to 29 | 39 | 6 | | | 24 | 3 | | |
| 27 to 28 | 34 | 2 | | | 54 | 6 | | |
| 26 to 27 | 45 | 7 | | | 73 | 9 | | |
| 25 to 26 | 34 | 11 | | | 80 | 13 | 1 | |
| 20 to 25 | 294 | 60 | | 4 | 510 | 77 | 2 | |
| 15 to 20 | 888 | 65 | 6 | | 674 | 48 | 5 | 3 |
| 10 to 15 | 238 | 17 | 2 | | 143 | 12 | | 1 |
| Total | 1,576 | 170 | 8 | 4 | 1,579 | 169 | 8 | 4 |

Mr. McDUFFIE. That is for the year 1926. Then, according to that statement, they do not have a vessel drawing over 32 feet.

The CHAIRMAN. There was no vessel above 31 feet inbound, and only two vessels outbound.

Mr. CARTER. How much water is there now?

The CHAIRMAN. Thirty feet.

Mr. CARTER. Then how could you expect them to have vessels over 30-foot draft?

The CHAIRMAN. This only has a bearing, Congressman CARTER, on the question asked, which is whether the vessels, not alone those that are there now, but those that come in, would need that added depth.

Mr. MORGAN. I assume there is a very heavy current on the river and it silts very rapidly.

The CHAIRMAN. The river silts very rapidly. It is very difficult of maintenance.

Mr. HOUSTON. Mr. Chairman, have you any data as to the vessels drawing over 32 feet operating in and out of the Pacific ports?

The CHAIRMAN. Yes; I think we can get that very easily. All we have to do is to look at San Francisco and Los Angeles.

Mr. McDUFFIE. There were five vessels that draw over 30 feet, and two, 31 feet to 32 feet. They have an 8-foot tide at the mouth and about 3 feet at Portland.

Mr. CARTER. And a 30-foot channel would give them only 33 feet. Of course that is a very difficult channel, with 33 feet of water. It is difficult to navigate, drawing 32 feet.

Mr. KORELL. I have the exact figures, taken from the report of the Chief of Engineers of the United States Army for 1927. It shows a total of 469 of the larger-sized vessels entering and clearing from the port.

The CHAIRMAN. What page?

Mr. KORELL. Page 1673.

The CHAIRMAN. Of volume 2?

Mr. KORELL. Of volume 1. They were divided as follows: Eight vessels of 30 feet to 32 feet; 20 vessels 29 to 30 feet; 168 vessels of 27 feet to 29 feet; 273 vessels of 25 feet to 27 feet.

The CHAIRMAN. Now, this is pretty important, and which you do not state: "About 65 per cent of the total commerce moved in vessels which require the full project depth." I think that statement on pages 1672 and 1673 shows the situation. I don't know exactly how to reconcile that, however, with the statement at the top of page 855, General Deakyne.

Mr. McDUFFIE. Mr. Chairman, that probably would depend upon the construction of the language there, "using the full project depth." What in their opinion would be a vessel using the full project depth?

Mr. CARTER. A vessel drawing 30 feet or more.

Mr. MORGAN. Well, it does not because the river silts pretty badly there.

General DEAKYNE. They have had floods up there, and when the water comes down it silts so badly that the full depth is not available until a little dredging is done.

The CHAIRMAN. That is not what I am calling attention to. I can not reconcile the two statements, the one at page 855 of volume 2, which purports to give the trips and depth and draft of vessels and which would show almost no vessels of the larger size, and a statement at pages 1672–1673 of volume 1, which shows that practically all of the commerce was carried in vessels of the deeper draft. How do you reconcile those two?

General DEAKYNE. On page 855 it shows seven vessels outbound drawing between 30 and 32 feet. That compares with eight vessels on page 1673. One inbound would make the eight.

The CHAIRMAN. Well, it may be that those will add up to that. They don't seem to, though.

General DEAKYNE. Then, you have 5 inbound and 15 outbound from 29 feet to 30 feet, and that adds up 20, which is the same as is given on page 1673.

Mr. McDUFFIE. General, what makes the difference in the number between the inbound and the outbound vessels? Of course, the inbound went out. They probably didn't stay there.

The CHAIRMAN. Wouldn't it mean this: Aren't there other ports, and isn't that it? Aren't there other ports on these two rivers besides Portland? There is another port up there on the Williamette, isn't there?

General DEAKYNE. Well, there is Vancouver, but it doesn't have a deep channel.

The CHAIRMAN. I thought those vessels might clear from another port than Portland.

Mr. HAWLEY. A great many clear at St. Helens and Longview, which are below Portland about 25 and 35 miles.

Mr. MORGAN. These grain elevators are down below, aren't they?

Mr. HAWLEY. St. Helens and Longview are lumber shipping ports?

The CHAIRMAN. Would that be included in the Portland statistics, these lumber ports and St. Helens, or are they above?

General DEAKYNE. On the next page is a report on the Williamette River ports other than Portland.

The CHAIRMAN. Well, I think we have clarified it pretty well.

Mr. McDUFFIE. What is the population of Portland?

Mr. KORELL. About 354,000, according to local estimate; not the official census.

Mr. McDUFFIE. Have you got a large shipbuilding industry there?

Mr. KORELL. There has been——

Mr. McDUFFIE. I note you have two very large dry docks, one 10,000 and the other 15,000.

Mr. KORELL. There has been a very considerable amount of shipbuilding there; and, in fact, there is some shipbuilding going on there now. The Government recently let a contract for the construction of three lighthouse vessels, and then there are a number of plants that are making parts—boilers and other equipment for vessels.

Mr. McDUFFIE. Are these shipbuilding plants employed most of the time?

Mr. KORELL. They have been active until recently, but I believe that these three Government vessels are the only ones upon which new construction work is being done at the present time.

The CHAIRMAN. Are they commercial or naval vessels?

Mr. KORELL. They are lighthouse vessels.

Mr. HOUSTON. You have trebled your population, haven't you, in 25 years?

Mr. KORELL. The city is growing by leaps and bounds.

Mr. HOUSTON. My recollection is that about 25 years ago the population was about 90,000 inhabitants.

Mr. McDUFFIE. The shipbuilding business is about on its last legs all over the country.

The CHAIRMAN. What we have in mind is, if this project is acted on favorably it comes before the House, and the natural inquiry on the part of Members is going to be just exactly what I have directed your attention to, to show this added depth is necessary on account of the kind of vessels which will come if you have it, and, second, that the added width is necessary on account either of the density of traffic or because of conditions peculiar to the stream which you can describe. Those two things are your issues?

MAINTENANCE OF ENLARGED CHANNEL

Mr. KORELL. I will take up both of them as I proceed. I was reading from the report of General Deakyne when the interrogations started, and I will continue reading just one or two further excerpts from the report:

"The total traffic in ocean carriers in 1926 was more than 1,000,000 tons greater than in 1925, the increase being wholly in the foreign trade.

"From a study of the advantages of a channel of greater depth than that now provided, the district engineer estimates that about $400,000 per annum might be saved in transportation charges."

The CHAIRMAN. Right there, how much will the added maintenance cost be over the present depth? You ought to have the two together, and then you will show what that means in net results.

Mr. KORELL. It is $365,000, including the carrying charges. Three hundred and ten thousand dollars is the actual annual maintenance charge.

The CHAIRMAN. About the interest charge. The difference between the estimated savings and the maintenance charge is how much?

Mr. KORELL. The project, as I will show a little later on, will amortize itself at the rate of about $245,000 a year.

The excerpts I have just quoted from the report of General Jadwin are pertinent. They are in themselves a strong argument for your favorable consideration of the board's recommendation. However, in view of the importance of the project that is before you to the people of Portland and of Oregon and of the Northwest, I would like to say a few words in amplification of the statements of General Jadwin before I attempt to confine myself strictly to the specific questions mentioned by the chairman. First, I want to stress the fact that the producing territory served by the port of Portland is now and for some time past has been supplying a tonnage that entitles it to a better channel to the Pacific Ocean than the present Willamette and Columbia River channels. In other words, I want to emphasize the proposition that we are not asking that the future be unduly anticipated, but merely that the existing needs be reasonably met.

PRODUCING AREA AND PORT FACILITIES

The Columbia River, which forms the boundary between the States of Oregon and Washington, extends its tributaries into the States of Idaho, Montana, and British Columbia. It is the only estuary that pierces the great mountain barriers, separating the inland empire, an area of approximately 259,000 square miles lying east of the mountains from the Pacific Ocean. It is navigable for approximately 300 miles above the city of Portland. The Snake River, its eastern tributary, is navigable for a distance of at least an additional 100 miles. The population of the Columbia River Basin is conservatively estimated to be 4,281,816 people.

The CHAIRMAN. Do you state in your statement how much, if any, commerce comes from east of Portland and through the Snake River or the Columbia or the Willamette? Have you any figures on that?

Mr. KORELL. Practically all the tonnage comes from the territory east of the Willamette River except the lumber, and that clears from the port of Portland. The logs are rafted up the river and cut up

by Portland sawmills. The Willamette River drains the area south of the Columbia.

The CHAIRMAN. In other words, the statement that these streams extend beyond the mountain barrier is important if you have any commerce, and it should be connected up with that?

Mr. KORELL. Yes, sir; I have some figures of the extent of that commerce, and will quote them in a few moments.

The Willamette River, the southern tributary of the Columbia, flows through the world's richest agricultural section. It pours its waters into the Columbia about 99 miles from the sea. The mean range of tide at this point is 2½ feet. That at the mouth of the Columbia is 7½ feet. The city of Portland is the natural gateway of outlet for the products of the Columbia River Basin area. Commerce moves to it from all parts of the inland empire, down the river or on rails, which follow water-level grades.

The port of Portland, which handles all of the commerce moving to the city of Portland, contains 29 miles of harbor frontage. It has 6½ miles of dock, four large municipal terminals completely equipped with the most modern facilities for handling tonnage; also, four powerful dredges, two floating dry docks, a turning basin, and repair plants. There are several shipbuilding yards on the Willamette River. One of these recently received, as I stated in answer to a question a few minutes ago, a contract for the construction of three Government vessels. Fifty-six coastwise and oceanic steamer lines and six railways carry the rapidly growing commerce of the port to all points in the United States and the world's foreign markets.

Mr. MCDUFFIE. Did you say there were 56 steamship lines?

Mr. KORELL. Yes, 56 steamship lines. I can give you the names if you wish them.

Mr. MCDUFFIE. You need not mind about that. It seemed quite a large number.

Mr. KORELL. In addition to its various other activities, the port of Portland operates a municipal towage service and a traffic bureau. These activities have been of inestimable value in fostering the growth of the city's water-borne commerce.

TONNAGE OF PORT

Some idea of the volume and nature of the shipping now being done by the port of Portland may be gained by the citation of some recent figures compiled by the port's engineer and the Portland Chamber of Commerce; $277,568,000 was spent for cargoes leaving the port in 1927; $14,000,000 was spent during the same period for services to ships; 1,687 vessels cleared the port in 1927. I have already given you the number and dimensions of the vessels drawing over 25 feet. The volume of tonnage for 1925 was 5,235,882 tons. For 1926 it was 6,310,459 tons, a gain of over 100,000 tons. The tonnage for 1927, while not at hand, was in excess of all previous years. More wheat was shipped during the eight months of the fiscal year than was shipped during the entire year preceding it. Figures just issued by the Department of Commerce show that the exports of merchandise from Oregon during July, August, and September of 1927, had an aggregate value of $27,249,901. The corresponding period for 1926 was $23,378,876, a difference of $3,846,025. The latest figures (U. S. Shipping Board report D. S. No. 296) put the State in twelfth place as an exporter.

*Comparative statement of Portland's water-borne commerce for the calendar years of 1925 and 1926 as noted in volume 2, page 857, Report of the Chief of Engineers, United States Army, 1927*

| Foreign | Tons | Value |
|---|---|---|
| 1925 | | |
| Inbound | 122,126 | $14,125,085 |
| Outbound | 814,568 | 31,851,530 |
| Domestic | 3,085,319 | 195,575,414 |
| Internal river | 3,748,805 | 49,746,558 |
| Total | 7,770,818 | 291,298,587 |
| 1926 | | |
| Inbound | 124,615 | 12,973,297 |
| Outbound | 1,661,940 | 72,379,842 |
| Domestic | 3,047,559 | 196,987,517 |
| Internal river | 3,244,459 | 47,647,763 |
| Total | 8,078,553 | 329,988,419 |

Portland produces more of the products that it transports than any other port in the United States. This means the world. One-third of all the standing timber in the United States is in the State of Oregon, of which the city of Portland is the outstanding center. The United States is the owner of a very considerable portion of the standing timber. Sixteen per cent of all the grain in the United States is grown in the Northwest. Pulpwood, mohair, flax, fruits, and vegetables are other products produced in large quantities for many basic industries. The agricultural products of the Columbia River Basin are valued at approximately $700,000,000 a year. Over 58 per cent of all these products are shipped by boat via the port of Portland.

Great as the figures I have cited may appear, they are small compared to what they will be when the millions of acres of land in the inland empire area now being brought under cultivation by the United States are made productive by irrigation. As the Columbia Basin is settled and developed the products of its mines and forests and farms will grow into a steadily increasing volume of traffic of exports through the port of Portland and down the Willamette and Columbia Rivers to the Pacific Ocean.

PRESENT CHANNEL INADEQUATE FOR EXPANDING COMMERCE

While the commerce of the port of Portland has been steadily increasing, faster and larger ships have been entering and clearing from it. As the size and speed of the ships have increased the need of a deeper and wider channel has grown. The present 30-foot channel, with its width of 300 feet, is not adequate to accommodate vessels entering and clearing the port drawing 28 feet and over. In this connection, I again call your attention to the fact that the report of General Jadwin states that vessels of this character have increased from 72 in 1924 to 196 in 1926. It appears idle to say to the committee that there must be sufficient clearance under the keels of these larger ships to assure their safe passage to and from the port of Portland, that allowance should be made for their clearing the rocks, snags, and sinker logs, which are washed along the river bottoms by winter and summer freshets. Twenty-eight feet is the limit that can venture into a 30-foot channel. Even vessels of this draft must move cautiously. Due consideration must also be given to their squat or the water depression of the two rivers. (With reference to squat, the *President* type of boats used by the Dollar Steamship Co., having a 32-foot draft, develop a squat of 2 feet and 9 inches at 10 knots. An additional 2 feet is required for effective control in steering those vessels.) I assume that the committee is aware that it is a fact that ships have a deeper draft when moving through fresh water than when moving through salt water. Again, a width of 300 feet does not permit of reasonable steerage speed for vessels drawing 28 feet and over. Ships can not pass with safety in such narrow limits. This is especially true in the Willamette and Columbia Rivers, where large log rafts are encountered almost daily. I have taken the following table of project channel dimensions of various harbors from the report of the Chief of Engineers, United States Army, 1925:

*Project channel dimensions, various harbors*

[From report of Chief of Engineers, United States Army, 1925]

| | Project depth | Width |
|---|---|---|
| | *Feet* | *Feet* |
| Boston, Mass | 35–40 | 900–1,500 |
| New York: | | |
| Ambrose Channel | 40 | 2,000 |
| Bay Ridge-Red Hook | 40 | 1,200 |
| Bayside-Sidney | 30 | 1,000 |
| East River to navy yard | 40 | 1,000 |
| East River above navy yard | 35 | 550–1,600 |
| Hudson River, Ellis Island to Hoboken | 40 | 800 |
| New Haven, Conn | 20 | 400–1,200 |
| Bridgeport, Conn | 22 | 500–1,500 |
| Philadelphia, Delaware River, and Bay | 35 | 800–1,200 |
| Baltimore, Chesapeake Bay and Patapsco River | 35 | 600–1,000 |
| Norfolk, Va.: | | |
| Hampton Roads to Elizabeth River | 40 | 750 |
| Up Elizabeth River 12 miles | 40 | 450 |
| Newport News, Va., Hampton Roads up James River | 35 | 600 |
| Charleston, S. C., bay and river channel | 40 | 1,000 |
| Savannah, Ga., Savannah River, etc | 30 | 500 |
| Jacksonville, Fla., St. Johns River | 30 | 300–600 |
| Mobile, Ala., Mobile River, etc | 30 | 300–450 |
| New Orleans, La., Southwest Pass, Mississippi River | 35 | 1,000 |
| San Diego, Calif | 35 | 570 |
| | 35 | 900 |
| Los Angeles: | | |
| Outer Harbor | 35 | 1,200 |
| Inner Harbor | 35 | 1,000 |
| San Francisco, bar channel only | 40 | 2,000 |
| Tacoma, city waterway | 29 | 500 |
| Seattle Harbor, east and west waterways | 34 | 750 |

The CHAIRMAN. Which direction are these log rafts moving? Where are they moving from?

Mr. KORELL. Some move up to the city of Portland to be cut up into lumber in sawmills located there; some move from places along the Columbia River, where logs are shot down various chutes or discharged from logging trains into the river and made up into rafts, and then taken out the mouth of the Columbia and towed by boats to other ports.

The CHAIRMAN. What I am trying to develop is this: Whether these log rafts are encountered for the entire distance that it is proposed to deepen to 35 feet or not?

Mr. KORELL. That is a fact; they are encountered not only in the Columbia but in the Willamette River.

The CHAIRMAN. And is that all lumber country? Is that all lumber country, the entire length of this river, so that they are liable to have these rafts come down into the river?

Mr. KORELL. Yes, sir.

The CHAIRMAN. On both sides?

Mr. KORELL. On both sides, and that is also true, as I have stated, to an extent in the Willamette River. (There are 395,000,000,000 feet of

standing timber in Oregon and 282,000,000,000 of standing timber in Washington.)

To maintain the Willamette and Columbia River channels at their present insufficient depth and width will be to exclude the more modern as well as the faster and larger ships from entering and clearing from the port of Portland. This will mean slowing up the movement of traffic and increased freight rates. If the present channel dimensions remain, the producers of the Columbia River Basin will be compelled to stand an unjust burden. As stated by General Jadwin in his report to Congress, about $609,000 a year can be saved if the channel is deepened and widened. If this amount can be saved, is it just or fair to compel the producers to continue paying it?

The CHAIRMAN. Just a minute. Those are not the figures you have given us?

Mr. KORELL. Those are the figures given in General Jadwin's report.

The CHAIRMAN. That is gross, isn't it? That is not net?

Mr. KORELL. That is the total savings in the way of saving on freight.

The CHAIRMAN. Transportation charges. That is the gross saving. What I would like to have you figure out right in that connection is, taking into account the increased maintenance, how much the net saving will be.

Mr. KORELL. It will be upward of $200,000 a year. I will submit the exact figures to you in just a minute. I have them here.

The CHAIRMAN. All right.

Mr. KORELL. The available statistics show that the tonnage of the port is increasing at the rate of about 100 per cent every five years. Accordingly, the saving each year from the enlarged channels will increase at approximately the same ratio.

I quote the following extract from the report of General Jadwin on this subject:

"The advantages of a channel depth greater than that provided by the existing project are discussed in detail by the district engineer. The higher value package freight traffic necessitates more rapid and regular movements. Such business is now handled at Pacific ports principally by combination passenger and cargo steamers and by fast freighters operating on regular schedules. Such craft now in service have drafts when fully loaded of from about 30 feet to 32 feet 9 inches. Vessels of this type are unable to enter the Portland trade on account of inadequate channel depths. The district engineer is of the opinion that the use of such vessels in the Portland trade would result in increased tonnage of high-grade imports and an increase of all export business. Such a traffic, together with savings resulting from the use of deeper draft carriers in the oil trade, elimination of delays due to groundings and waiting for favorable conditions to navigate the channel, would result in savings estimated at about $609,000 per annum. The gradual increase in business of the Northwest and increasing trade with the Orient would still further increase the savings from an enlarged channel."

It is essential to the development of the Columbia River Basin and the prosperity of the entire Northwest that an adequate channel be maintained to permit the quick and economical movement of the products moved to and shipped from the port of Portland. So long as there is an excessive cost in moving such products to the consumers' markets that cost will continue to be reflected and borne by the producers of the inland empire. The delegation believes that the producers of the Columbia River Basin are justified in asking the Government to be placed upon a parity with the producers of other sections. The report of General Jadwin and the recommendation of the Board of Army Engineers recognizes the equity and the necessity of the proposed project. Before I leave this subject I would like to call the attention of the committee to the importance of the development of the Columbia River as a means of transporting supplies in time of war. This is perhaps pertinent to the inquiry—as the War Department exercises jurisdiction over rivers and harbors in the United States.

PROJECT AID TO NATIONAL DEFENSE

In writing about the military advantages of connecting the Great Lakes with the Hudson River and the Atlantic seaboard, under date of March 8, 1926, Secretary of War Davis wrote as follows:

"In general, inland waterways are of military value as a supplement to rail and highway transportation. War frequently makes increased demands on railroads even when these are not located in the theater of operations. Delay caused by congestion of transportation facilities may have a decisive military effect. The availability of waterways to relieve railways at the time of their peak loads is a great military asset."

Needless to say, the argument advanced by the Secretary of War in regard to the particular project mentioned in his letter is applicable with equal force to the project under consideration by the committee at this hearing.

Again, the tendency is constantly toward larger and faster vessels. On this point I quote the following from the report of H. M. Laurie, economist, Bureau of Operations, United States Shipping Board, under date of March 4, 1928:

"The failure of the American merchant marine to carry the major portion of the foreign trade of the United States since 1920, in accordance with the national policy in the merchant marine act of 1920, is due largely to the failure of the Government in providing for the expansion and speedier service necessary to keep pace with the Nation's rapidly increasing foreign trade and to meet the competition of faster foreign-built merchant vessels. And thus, the surrender of the carriage of the foreign trade of the United States by American to foreign-flag ships becomes more complete."

Also the following from the same authority:

"The more active development of our river, lake, and canal systems has been followed by increased water transportation. The existing great need for the cheapest transportation on bulk commodities should expedite the more comprehensive development of our waterway system and that branch of the American merchant marine engaged in transportation on our rivers, lakes, and canals should show an accelerated development."

Of course, it is apparent from all that has been said that if the Atlantic and Gulf ports desire to ship products in vessels suitable to the expeditious and economical handling of their commerce to the Northwest through the port of Portland, the channel from the Pacific Ocean to the port of Portland will naturally have to be enlarged to a depth and width that will accommodate their larger and swifter vessels.

IMPROVEMENT FEASIBLE AND ECONOMICAL

The next thing that I want to call to the attention of the committee is the fact that the deepening and widening of the channel is feasible and obtainable at a relatively small cost to the Government. The only thing that will be necessary to do in order to get the additional depth and width will be to do slightly more dredging than is now being done and to build a few extra wing dams. There is no rock to be cut or embankments to be constructed. The report on the cost and character of the extra work shows that to secure a channel 35 feet deep and 500 feet wide in the Columbia River, it will cost only $1,336,000, with $310,000 annually for increased maintenance, making the total annual carrying charges but $365,000. I believe that I have already given you these figures. Accordingly, considered from the standpoint of an investment the difference between the estimated yearly savings and the annual carrying charges for the larger channels will amortize the original outlay at the rate of approximately $244,000 a year. The differences in cost between an adequate channel as recommended by the board and urged by the delegation and channels of smaller dimensions are shown by a table of the estimated costs of providing channels 30, 32, and 35 feet deep and from 400 to 500 feet wide set out on page 3 of General Jadwin's report. For convenience, I have detached it and will leave a copy on the table for the committee.

| | Channel— | | | |
|---|---|---|---|---|
| | 30 by 400 feet | 30 by 500 feet | 32 by 500 feet | 35 by 500 feet |
| Willamette River (entire cost to be borne by port of Portland): | | | | |
| Original cost | $170,000 | $236,000 | $347,000 | $748,000 |
| Maintenance | 125,000 | 175,000 | 275,000 | 425,000 |
| Columbia River (entire cost to be borne by the United States): | | | | |
| Total cost if depth is same above and below Tongue Point— | | | | |
| Original cost | 85,440 | 163,550 | 605,600 | 1,366,300 |
| Maintenance | 374,000 | 408,000 | 510,000 | 685,000 |
| Total cost if depth below Tongue Point is 1 foot greater— | | | | |
| Original cost | 88,600 | 170,200 | 638,100 | 1,412,200 |
| Maintenance | 376,000 | 412,000 | 520,000 | 700,000 |

Another point that I desire to bring to your attention as forcibly as I possibly can is that the proposed project is not a new one. It is not an impulsive or unreasoned gesture. It is the product of a steady, consistent development accompanied by years of thought and investigation. The first survey for a 35-foot channel, 500 feet wide, appears in House Document 1009 of the Sixty-sixth Congress. This survey shows that the engineers estimated about seven years ago that 21,000,000 yards of material would have to be moved from the bed of the Columbia below the mouth of the Willamette and 13,347,000 yards in the Willamette in order to secure adequate depth and width for the safe navigation of vessels entering and clearing from the port of Portland. The survey upon which the present recommendation was made is authorized by an act of Congress passed on March 3, 1925. The survey was completed by the United States district engineer in charge at Portland. It was forwarded to the division engineer on September 24, 1926. The report which accompanied the transmission of the survey shows that the amount of dredging to be done in the Columbia River below the mouth of the Willamette is 13,000,000 yards, as against the original estimate of 21,000,000, and that that to be done in the Willamette is 6,600,000 yards, as against the previous report of 13,347,000 yards. The diking required to obtain the additional depth and width is such as would be needed to assure the maintenance of the existing channels at smaller dimensions.

RIVER APPROACHING STABILIZATION

Both the recommendation and the report which accompanies it contain detailed statements showing how the figures of costs and maintenance were calculated. I will not stop to go over these—I have already commented upon them to a sufficient extent—but I will call the committee's attention to paragraph 12 of the recommendation of the board, which in substance stated that the Columbia River Channel is fast approaching a condition of stabilization; that good results have been obtained from the permeable dikes placed in the rivers to reduce the necessary annual dredging; that an estimate made shortly after the 1927 freshet showed that about 1,000,000 cubic yards of material had been scoured out of the channels by the dikes since the survey of 1926; that it will cost $385,000 to construct dikes for a 32-foot depth and but $453,000 for a 35-foot depth, making a difference of only $68,000. From experience with the existing project it appears reasonable to expect that the extra contraction works will, after a few years, reduce the annual maintenance dredging.

EXTENT OF LOCAL COOPERATION

The committee has no doubt observed that the recommendations of the Board of Army Engineers specifies certain conditions; namely, that the port of Portland shall assist in the work of improving and maintaining the channel of the Columbia River as required under the terms of the existing project, also to be responsible for obtaining and maintaining a channel of equivalent dimensions in the Willamette River. With reference to these conditions I want to say that they are not only such as the port of Portland is willing to meet, but, in fact, has already in part met.

The Willamette River channel has always been kept to a depth of 35 feet during the past 8 or 10 years. I am not going to take up time enumerating the many particulars in which the people of Portland have cooperated with the Government in channel work during the past. I will content myself with merely saying at this time and in this connection that Portland has been a partner with the Government on channel work for many years and that its record for cooperation has still to be equaled by any other port in the United States. The city has, as I stated at the outset, expended over $10,000,000 for deepening and widening the channels to the sea and $15,000,000 in providing docks and port facilities. To date its total expenditures have equaled if not exceeded the total expenditures of the Government on the Columbia River and channel work.

You may be interested in knowing that at one time when work on one of the Columbia River jetties, which is approximately 100 miles from Portland, was suspended owing to lack of sufficient funds to continue with its construction, Portland voluntarily, of its own accord and on its own initiative, contributed approximately a half million dollars to enable the work on that strictly Federal project to proceed. Indeed, the first money that was actually spent for improving the river channels was $350,000 donated by the people of Portland.

Again, every dredge that the Government has placed in the Columbia River has been matched by an equally powerful dredge of the port of Portland. The city has, as your chairman has already remarked, the greatest dredge in the world in the river. Our local engineer designed it. Again, the port actually has loaned its dredges to the Government without charge, except operating costs. There has been no dodging of local responsibility in connection with river and harbor work I can assure you; moreover, there never will be any. On this Congress can absolutely depend. The city recognizes the vital necessity of maintaining its port, not only for its own future prosperity, which is bound up in the improvement and enlargement of its facilities for handling its growing water-borne commerce, but for the advantage of the people of the inland empire and the entire Northwest, who, as I have endeavored to point out to you, must to a large extent depend on Portland shipping. I suppose the committee has heard that Portland capital recently purchased 11 Government-owned vessels to add to the present shipping facilities of the port. This is additional and up-to-the-minute evidence of local pride and faith.

WILL DEVELOP NORTHWEST

As I mentioned before, the recommendation of the Board of Army Engineers does not advance a new idea. Similar recommendations have been made by other officials and boards in the past. The resident engineer recommended the proposed depth and width in his report to the division engineer on December 1, 1919. In fact, the gradual deepening and widening of the channel to conform with the present recommendations of the board was visioned in the very earliest plans for the development of commerce on the Columbia and Willamette Rivers. The time is now at hand when the completion of the plans must be hastened. If they are not, a large section of the country will continue to be unduly handicapped and its natural and necessary development unfairly retarded.

In conclusion, I want to say that I have faith in the committee's ability to recognize the justice and need for giving Portland and the people of the Columbia River Basin an adequate channel for carrying their products to the Pacific Ocean, to expedite the settlement and development of the inland empire, and to add materially to the prosperity and greatness of a great section of a great Nation.

I again thank you for granting the Oregon delegation this very early and much-appreciated opportunity to be heard upon such a vitally important matter as that which it has been the delegation's privilege and my pleasure to present to you in part.

The CHAIRMAN. Let me make this suggestion, Mr. Korell. The real questions here are the questions I have propounded to you, and if you have anything further to say on that, we will be glad to hear it. We are convinced of the fact that Portland is a large city, has a very rich surrounding country which produces a great commerce. We are convinced that the improvement to the extent that is necessary to foster that commerce is desirable. All we want is just this: Are the facilities—are the vessels which would carry that trade, if we give them this added depth, such as would draw the increased depth, and, second, is it necessary on account of the rafts and the frequency of the passage of vessels to have the increased width? Those are the two questions I would like to have answered.

ADDITIONAL WIDTH AND DEPTH NEEDED

Mr. MCDUFFIE. May I ask how wide these rafts are that are towed up and down this stream?

Mr. KORELL. They vary in size. I have seen rafts there that are probably 100 to 150 feet wide. Some of the largest log rafts in the world are made up in the Columbia River and towed up and down the river and out the mouth of the river to distant ports.

Mr. MCDUFFIE. A little over half of the tonnage of that port, or two-thirds of it, is timber or timber products, isn't it?

Mr. KORELL. No; I have called attention to the fact that we are shipping——

Mr. MCDUFFIE. I notice the figures here give wood and paper.

Mr. KORELL. I have called attention to the fact that we are shipping grain; we are shipping pulp for paper; we are shipping all kinds of agricultural products, and we are shipping flax, salmon, and wool. I think that we stand as one of the outstanding ports in the world in the shipment of all these classes of products.

Mr. MCDUFFIE. Of course, your timber is a very valuable product, but the figures here seem to show that your domestic wood and paper was over a million and a half, and the internal commerce, that stuff handled up and down the river there, was three million or more, so that makes quite a large percentage of the total.

Mr. KORELL. On page 854 of the report of the Chief of Engineers of the United States Army for 1927 you will find a detailed statement of the character and quantity of the tonnage shipped.

*Columbia and lower Willamette Rivers, below Vancouver, Wash., and Portland, Oreg.*

SUMMARY

| Classes of commodities | Foreign | | | |
|---|---|---|---|---|
| | Imports | | Exports | |
| | Tons | Value | Tons | Value |
| Animals and animal products | 2,029 | $205,950 | 5,932 | $1,627,400 |
| Vegetable food products | 60,720 | 7,612,061 | 1,152,893 | 64,490,071 |
| Other vegetable products | 559 | 356,725 | 839 | 209,038 |

[1] The internal traffic includes 2,324,075 tons of rafted logs and piling valued at $18,563,030. It also includes 141,311 tons of hogged wood valued at $32,502 and 48,741 tons of stone valued at $58,489, used in connection with works of river and harbor improvement.

General ferry traffic: Five ferries carried 388,987 automobiles and vehicles.

Mr. McDUFFIE. Yes; I was just reading from that.

The CHAIRMAN. A question in my mind on those tables is this; what are your timber products classified under?

Mr. McDUFFIE. Wood and paper. Is there much current in that stream from Portland down to the mouth?

Mr. KORELL. There is quite a little current, and the current, I might say, has been quite a valuable agency in scouring out the channel. It is utilized for this purpose by the construction of wing dams along the river which narrow the channel and speed up the current thus scouring the bottom of the river at places where sand and gravel would accumulate.

Mr. McDUFFIE. Is the Columbia River very tortuous, with a lot of crooks in it, or bends or sharp turns, or is it an ordinary straight stream?

Mr. KORELL. This map on the wall will indicate to the committee the course and flow of the stream. You will see by the map that there are quite a number of bends.

Mr. MORGAN. They are not very sharp bends, are they? I rode up and down the river, and my recollection is that they are not very sharp.

Mr. KORRELL. They are not particularly sharp, but you can see from that map that they are there.

The CHAIRMAN. You can get a better idea of that from the general map.

Mr. McDUFFIE. The general craft pass each other in a 300-foot channel; especially when the tide is running one way or another they might find it difficult to navigate.

The CHAIRMAN. What do you call it, General Deakyne? Do you call it a fairly straight stream, or is it a stream that has more than the average number and sharper than the usual bends?

General DEAKYNE. I would say it was a stream with fairly sharp bends compared to the Delaware River, for instance. Philadelphia is about the same distance from the sea as Portland. I think the Columbia has much sharper bends than the Delaware.

The CHAIRMAN. And more of them?

General DEAKYNE. And more of them; yes.

The CHAIRMAN. Mr. Korell, let me ask you this: Here is a trade of which we have heard quite a little lately, in lumber and timber from the Pacific coast to points on the Gulf and on the Atlantic. Now, that, to be economical, will probably be carried in vessels which will go to the harbors and into the rivers on the Gulf on the Atlantic coast, and make straight delivery, we will say, from Portland to places like Albany, N. Y. What is the draft of vessels which are engaged now in that trade?

Mr. KORELL. They are the largest size vessel. They are vessels that carry passengers, in addition to tonnage, for a great part. We have one or more lines now that run from the port of Philadelphia on a regular schedule.

The CHAIRMAN. Mixed passengers and cargo or straight cargo?

Mr. KORELL. I think they take some passengers, but I wouldn't want to go on record as to that.

Mr. McDUFFIE. Is that the Luckenbach Line?

Mr. KORELL. No; that is the Columbia-Pacific (Quaker) Line. That line, or the same capital that just purchased 11 Government vessels to add to its fleet.

Mr. McDUFFIE. Coastwise or foreign trade?

Mr. KORELL. For both coastwise and foreign trade.

The CHAIRMAN. Well, now, which is growing more rapidly of your outbound traffic, your timber and lumber or your other exportable products?

Mr. KORELL. Our higher-value package freight. That is referred to here in the report as growing to such an extent that there is about $609,000 a year lost because of the fact that all of that class of business has to be diverted by rail to other ports that can receive ships of an adequate draft and speed to handle that class of commerce. This excessive freight charge is an economic waste.

The CHAIRMAN. Well, isn't your greatest volume of tonnage for the future in your forests?

Mr. KORELL. There is a tremendous volume of tonnage there, but this area which is referred to as the Inland Empire and the back country which we drain produces wheat and agricultural products that increase in volume yearly. I call your attention to the fact that the value of that at the present time amounts to about $700,000,000 a year.

The CHAIRMAN. We had testimony in the matter of Gulf ports. My recollection is that what we are giving them there is 27 feet, and they are sending redwood direct from the Pacific coast to the Gulf ports in, as I understand it, whole vessel loads. I assume that that will be true very soon of all the distributing centers on the Atlantic as well as on the Gulf.

Mr. KORELL. Of course, the chairman has in mind that redwood is a very light wood, much lighter, in fact, than the pine, spruce, and fir woods, and generally that class of woods that grow in our forests; and, further, that there is a squat or water depression when a vessel moves in fresh water that requires a deeper draft or deeper channel than when it is operating in salt water, which has more buoyancy. I don't know whether I am correct in my figures, but I have been informed that it will draw from 1½ to 2 or 3 feet more, all depending, of course, on the size and speed of the ship, if it moves in clear water than when it is merely standing still or moving in salt water.

OTHER PORTS FAVOR PROJECT

The CHAIRMAN. We are looking in the East, I will say to you frankly, to getting our lumber from your coast in full cargo shipments, and we think that we will have to depend on it. It is a matter of necessity, and we think the cheapest way it can come is by water, and I see the need of the improvement of our waterways in the East in order to receive and distribute that lumber. We think the problem is a combined problem between the two coasts and the Gulf coast. It seems to me, with lumber being exhausted as it is in the South, and a supply that is inexhaustible on the Pacific coast, we on the Atlantic coast must look away up as far as Chicago, at least, to transportation by water and distribution by water of lumber.

In Detroit they are figuring they can save $9 a thousand, at least, over the rail haul to Detroit by transportation by water.

Mr. MANSFIELD. That would go by the Erie Canal?

The CHAIRMAN. I don't know. We are going to need waterways for the distribution of that lumber, and all I am suggesting to these gentlemen on the Pacific coast is that you are just as much interested in providing waterways which will carry your lumber for distribution in the original cargo, the original vessel, to the great consuming centers in the North—and that is where it is, in the northeast part of this country—as you are in deepening the waters right on your own coast. It means just as much to you in dollars and cents. You are going to save just as much at the one end as you are at the other. You are going to get just half the benefit if, when you get to New York or Albany, you have to stop and can not distribute any farther.

Mr. HAWLEY. Mr. Chairman, we have always recognized that. We have supported projects on the Atlantic for that very purpose, marketing our lumber.

The CHAIRMAN. It seems to me we ought to recognize that fact. If you haven't anything more, Mr. KORELL, we will hear Congressman HAWLEY, and then we will hear General Deakyne for a few minutes and adjourn.

Mr. HOUSTON. Mr. Chairman, there is just one thought that occurs to me. Have you any trans-Pacific trade out there?

Mr. KORELL. Yes; we have considerable.

Mr. HOUSTON. And what railroad facilities does the port afford?

Mr. KORELL. I mentioned in my statement that we have six lines that are feeding the port of Portland at the present time, and all of those railroads, I might say, run down grade through different sections of this basin, passing over the only water-level routes that exist out there.

FLOOD CONTROL

Mr. REID of Illinois. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3740, the flood control bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with Mr. LEHLBACH in the chair.

The CHAIRMAN. The Clerk will read the pending amendment.

The Clerk read as follows:

Page 4, strike out all of the paragraph beginning with the word "Just," in line 23, down to and including the word "paid," in line 12 on page 5, and insert the following:

"The United States shall provide flowage rights for destructive flood waters that will pass by reason of diversion from the main channel of the Mississippi River, and shall control, confine, and regulate such diversion."

The CHAIRMAN. The question is on the amendment.

Mr. TILSON. Mr. Chairman, I have an amendment to offer by way of a substitute.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Connecticut.

The Clerk read as follows:

Amendment by Mr. TILSON: Page 5, after line 12, strike out the pending amendment and insert as a substitute therefor the following: "Any property taken by the United States for the purpose of carrying out the terms of this act for which compensation is required by the Constitution of the United States shall be paid for by the United States."

Mr. TILSON. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Connecticut asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. TILSON. Mr. Chairman, as it will take me all of the time allotted to make my statement, I trust that Members will not interrupt me.

Mr. Chairman, I first wish to thank the members of the Flood Control Committee for the long, painstaking though strenuous efforts they have made in trying to bring to us a bill that will be acceptable. I also wish to thank those members of that committee who have met some of the rest of us in informal conferences for a fine spirit of cooperation and a willingness to help get as good a bill as possible. I wish to thank them for this spirit, because it is in such spirit I think we get the best legislation. Anything I may say here I hope will be considered in full accord with that spirit, for that is my only purpose in offering this amendment.

Mr. Chairman, local contribution is the accepted principle upon which this work has been done heretofore, and in that so-called stump speech that was incorporated in section 2 we reiterated that principle. But we proceed to deviate from it at once, and I think for good reasons, in order to meet the expense of doing the construction work.

There is one principle of local contribution, however, that I think should never under any circumstances be deviated from, which is that the land upon which the improvement is made, the ground upon which the levee works are constructed, should be furnished by the State or locality in which these works are situated. Mr. Chairman, to deviate from this policy might introduce a new principle into the liability that may arise by reason of anything that may occur after the completion of these works.

What is the problem here? It has been accepted in this bill that local authorities shall furnish the levee sites, even though they are new levees, for the main stem of the river. We come now to the question—and it is the crux of the whole question—who shall furnish the land for these flood ways. We ought to have an understanding as to what the flood ways are. In the first place the flood ways do not run over the mountains or the tops of ridges. They are for the most part natural flood ways where the water has been going down from time immemorial. We are simply making a plan by which along these natural flood ways the new flood hereafter is to be confined.

What is going to happen to the rest of the country? Outside of these levees there will be protection that these lands have never had. Inside of these leveps—mark this—inside of the levees, unless there is a flood substantially equal to the 1927 flood, those who are inside between the new flood-way levees will be in just as good a situation as they have ever been. We are not going to pour destructive floods down these flood ways, except when there are such floods that would overflow the territory were there no additional levees there. Of course, if the river is confined in some other place the flood may be somewhat greater in volume after it tops the levee at the proposed height, but up to the time it tops the existing levee there is no water going down there that has not gone down there before. So we are not doing such a tremendous damage after all. We are, in fact, furnishing protected land behind the levees for a great reclamation scheme, and I hope it turns out so that they may have hundreds of thousands of acres there that have been valueless before but which will be highly valuable after this work is done. For one, I am glad that the lands there are owned by large corporations, because the same corporations that own the floor of the flood way will probably own on both sides of the levees, and if they do receive damages to the land in the flood way they will receive compensating benefits for the reclaimed land on either side.

Suppose a flood should come down these flood ways; it is not coming without notice. If, for instance, flocks are being grazed within the flood way, there will be plenty of time to remove them, and if anybody within the flood way continues to live in the little houses down through that part of the country they will have plenty of time to remove themselves and their belongings behind the levees. So that there is no danger of anybody being drowned by a sudden flood turned down through the spillways or flood ways.

But I must pass to the next point, because this is the nub of the question. The amendment of the gentleman from Illinois [Mr. REID] as offered yesterday and printed in the RECORD proposes that the United States shall provide lands for rights of way over which destructive flood waters shall pass by reason of the diversion from the main channel of the Mississippi, and for levees along such diversions, flood ways, and spillways, and any needed lands and easements—and this lets in the railroads again. Do not think for a moment that because we cut out section 4 that we cut the railroads out. They are in this amendment.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. TILSON. Yes.

Mr. COX. The gentleman is reading the amendment that was proposed yesterday and was printed in the RECORD this morning, and not the one that was offered this morning.

Mr. TILSON. Yes; I am reading the one that is in the RECORD that the gentleman from Illinois [Mr. REID] offered yesterday.

Mr. COX. But that is not the amendment that was offered a few moments ago.

Mr. TILSON. I am at least showing what was originally proposed. As I understand the amendment that was just read from the Clerk's desk, it is that we shall simply buy the flowage rights in advance. Why should we buy flowage rights? Why should we not stand on the constitutional right which every citizen has to receive just compensation if his property is taken for a public use? In the amendment that I have offered it is stated, in effect, that in case private property is taken in the constitutional sense, the United States assumes the responsibility for it. How can anyone suffer if his constitutional rights are preserved and these are buttressed by an assumption of the obligation by the United States in case his property is taken within the meaning of the Constitution?

We have reached the crucial point in this bill. In my opinion, any provision for buying flowage rights, easements, or anything else relating to land, in advance that requires the United States to condemn or purchase something now that may not be needed for 10 or 12 years, or never, will be dangerous to the bill itself. I hope that we may arrive at a bill which will be acceptable and one that we need not be ashamed of hereafter, a bill that will not open the doors of the Treasury to raids upon it.

Mr. FREAR. Mr. Chairman, will the gentleman yield?

Mr. TILSON. Yes.

Mr. FREAR. And in addition to the question of flowage rights it requires the rights of way for the levees to be purchased by the Government, notwithstanding that the levee rights on the Mississippi River are to be furnished by the locality.

Mr. TILSON. In the pending amendment direct reference to rights of way is stricken out.

Mr. FREAR. No; it is in there. I leave that to the chairman.

Mr. TILSON. I am afraid the gentleman is correct and that the words "flowage rights" will include a lot of things. My point is just here: The amendment that I have offered gives everyone ample protection, as he is protected under the Constitution, and fixes the obligation of the United States for such damage as may accrue under the Constitution. Why should we not be satisfied with this? Why is it not enough to protect any citizen of the United States? I think it is, and that when we go beyond this and propose to buy lands, easements, or flowage rights in advance we enter upon dangerous ground. We should try to get away from the word "buy" if we can in this connection. There is danger in this bill if under it we start out to buy a lot of land, easements, or flowage rights, and since the Constitution takes care of the situation there is no necessity for affirmatively conferring different or additional rights to those guaranteed in the Constitution.

I hope my amendment will be accepted as it is, and, if accepted, then, in my judgment, it will be possible to iron out all of the other differences in this bill. So long as it requires the United States to buy lands, easements, or flowage rights I fear that the bill may fail to be acceptable to enough of us to finally pass it. [Applause.]

Mr. DENISON. And the gentleman's amendment merely gives the property owners their constitutional rights?

Mr. TILSON. And fixes the obligation to pay upon the United States. It does not attempt to unload upon any levee district or any State or anybody else, but provides that any compensation anyone is entitled to under the Constitution shall be paid by the United States.

Mr. REID of Illinois. Mr. Chairman, I told you the first day that we agreed to everything that the President's representatives said they wanted except turning destructive flood waters down upon innocent people, and I stand to-day reiterating that same proposition. The only relief provided by the amendment that the gentleman from Connecticut [Mr. TILSON] proposes would give to a man after his property has been destroyed by the destructive flood, or probably some of his kin have been drowned, would be to say to him, "You go to the United States courts, start a lawsuit, and at the end of 5 or 10 years, perhaps, you will be thrown out, and then you will be able to come to Congress and be sent to the Court of Claims, and after fussing around there for a year or two you will be

forgotten." If that is the kind of Government we have, then we better have a change in the form if not in the administration of it. You do not know what you do when you try to turn this water on the people and leave them to their constitutional rights. At the present time these are not natural flood ways.

Mr. TILSON. Is it not true that in time past there has been water running down from the channel and is running now?

Mr. REID of Illinois. The water running down from the channel now is not in a flood way. It does not come within your category. The spillway is through the New Madrid flood way. When you make them that, you are simply enlarging a place where the destructive waters go now. It is untrue.

Mr. TILSON. The New Madrid and the Bonnet Carre are not in this at all.

Mr. REID of Illinois. The amendment I have offered is to the effect that no water shall be turned from the main channel of the Mississippi River until the United States acquires the flowage rights, and when they do divert it from the main channel, they begin there and regulate it.

What can be fairer than that? The people of Louisiana and Missouri are not asking you to do that. Would you want it sent over your front yard? It is of no benefit to the people hundreds of miles away. Yet you turn this water down on them and say, "Go to the Constitution" as the ark of the covenant.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. REID of Illinois. Yes.

Mr. BURTNESS. The flowage rights are stricken out?

Mr. REID of Illinois. Yes.

Mr. BLACK of New York. Mr. Chairman, will the gentleman yield?

Mr. REID of Illinois. Yes.

Mr. BLACK of New York. In cases where you condemn the flowage rights it would be considered whether the water had passed over that area before in assessing the damages?

Mr. REID of Illinois. Yes. If there was water running through there now it would not be of any value. Yet the gentleman from Connecticut says they are trying to get money for the flood way now. That is not correct.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. REID of Illinois. Yes.

Mr. MOORE of Virginia. Is not this the difference between the amendment offered by the gentleman from Connecticut and your amendment: That you provide that when the Government acquires the flowage rights the Government shall then pay for them, while the amendment of the gentleman from Connecticut provides that the persons affected may secure compensation by legal proceedings if they can?

Mr. REID of Illinois. We are not going to turn the water down on those people if the flowage rights are furnished—turn the water down on those innocent and helpless people. That is the iniquity of the proposition.

Mr. MOORE of Virginia. The Government is to take the flowage rights, and the people affected are to do the best they can to secure compensation?

Mr. REID of Illinois. Yes. General Jadwin said he would turn the water down on those people and let them take their chances.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. COX. Mr. Chairman and members of the committee, I desire to make a brief explanation of the amendment that has been offered by the chairman of the committee, and also to make reply to the argument of the gentleman proposing an amendment to the amendment.

I invite your careful attention to the amendment that the gentleman from Illinois has proposed. You will find from reading it that it does not undertake to commit the Government to purchase a single foot of land in any of the diversion ways or flood ways. It does not propose, and does not mean, that the Government shall acquire flowage rights for all of the land within the flood ways. It simply means that where the turning in of this additional water inundating land not heretofore subject to overflow, the Government shall acquire flowage rights thereto.

Mr. GRIFFIN. Mr. Chairman, will the gentleman yield at that point?

Mr. COX. Yes.

Mr. GRIFFIN. Is there any way of approximating the comparative value of the flowage rights, as you designate them, and the actual purchase in fee simple of the bed of the diversion?

Mr. COX. I am not in a position to state to the gentleman the difference in the cost of flowage rights and the actual title to the land.

Mr. GRIFFIN. If the gentleman will permit me——

Mr. COX. Will not the gentleman ask me that question a little later on?

Mr. GRIFFIN. To keep to the context I would like to ask it at this point. The purchase of flowage rights in advance would amount to an agreement between the Government and the owners that the Government might have the permission to turn the stream into the bed, between the levees into the channel area?

Mr. COX. I do not understand that there is any question as to the right of the Government to turn the water in. The amendment simply proposes that when the land is flooded that has not heretofore been subject to flood, the Government may acquire flowage rights.

Mr. GRIFFIN. You refer the effect of the flowage rights on the land and the value to be determined?

Mr. COX. Yes. Gentlemen, allow me to call your attention to the amendment proposed by the gentleman from Connecticut [Mr. TILSON] to the amendment offered by the gentleman from Illinois [Mr. REID]. His position is that the Government ought not to be required to acquire any interest in the flood ways except that which may be made necessary as the result of the actual taking of the land. Let me say to you, gentlemen, that amendment does not mean that if the Government turns water into these flood ways and floods land which has not been heretofore subject to the waters there is any obligation on the Government to make compensation.

I want to say to you, my colleagues, that the whole question revolves around the meaning of the word "taking." The courts have held time and time again——

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. COX. Mr. Chairman, may I have 10 minutes more?

The CHAIRMAN. In there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. COX. The Supreme Court held in the case of Bedford against the United States that—

> Damages to lands by flooding as the result of revetments erected by the United States along the banks of the Mississippi River to prevent erosion of the banks from natural causes are consequential and do not constitute a taking of the land flooded within the meaning of the fifth amendment to the Federal Constitution.

That is the case of Bedford *v.* United States (192 U. S. 217). In another case the court held that—

> No action will lie for damages consequent upon the erection of public improvements, although the result of such erection may impair the value of property by rendering ingress and egress thereto more difficult. It is axiomatic that private rights are always subservient to the public good.
>
> To constitute a taking of private property such as is inhibited by the fifth amendment unless just compensation is made, it must be shown that the owner thereof has been wholly deprived of the use of same. If it has been merely injured or its use impaired, there is no taking such as is contemplated by said amendment.

Mr. LAGUARDIA. What is the citation?

Mr. COX. That is Transportation Co. *v.* United States (99 U. S. 635). Again, in Mills *v.* United States (46 Fed. 738), the court said:

> No action can be maintained against the United States to recover damages in the nature of a trespass, whether proximate or consequential, because such action would sound in tort, and therefore without the jurisdiction of the court.
>
> Where the Government of the United States by the construction of a dam, or other public works, so floods lands belonging to an individual as to totally destroy its value, there is a taking of private property within the scope of the fifth amendment.

That is United States *v.* Lynath (188 U. S. 445).

> Permanent overflow is a "taking" within the meaning of the constitutional provision.
>
> A destruction of private property for public purposes may as well be a taking as would be an appropriation for the same end.

Now, here is the meaning of this amendment: The Government may come in and turn all of these waters into these flood ways, which will result in damage to the owner of the property, and yet because the lands are not perpetually flooded and therefore their value not totally destroyed, there is no taking on the part of the Government within the meaning of the fifth amendment.

Mr. SNELL. Will the gentleman yield?

Mr. COX. Yes.

Mr. SNELL. I am not a lawyer, and I do not understand all of this, but I can understand some things. Is it the gentleman's

position that if the Federal Government turns the water in here that then it would not be liable for damages under the provisions of the Constitution?

Mr. COX. No, sir; it would not be liable for damages. That is the fixed and settled law, and no one familiar with the rulings of the Supreme Court will contend to the contrary. In other words, under this amendment the Government might, through the turning in of these flood waters, in a period of 5 or 10 years do tremendous damage to the property affected as a result of the flood; and yet under the Constitution there is no taking of the land, and therefore no right of action on the part of the owner as against the Government.

Now, as to the amendment proposed by the gentleman from Illinois, the amendment that the gentleman from Illinois offers simply means this: That where lands are flooded the Government shall provide flowage rights thereto, and that is all it means. The amendment does not propose that the Government shall buy a foot of land except——

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

Mr. COX. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to proceed for three additional minutes. Is there objection?

There was no objection.

Mr. COX. Except such lands the value of which is perpetually destroyed by the Government, and that simply means that the Government does not commit itself by this proposal to buy anything except the land for levee rights of way. There may be a difference of opinion as between many of you and myself as to that, but I take the position that the construction of a levee will constitute a taking in the sense that the value of the property will be totally and permanently destroyed and, therefore, under the law there will be a necessity on the part of the Government to pay for it. And that is the same meaning of the Tilson amendment. If the Tilson amendment is passed, the Government is only required to pay for that which it takes, and under his amendment, though he contends to the contrary, as I understand it, there would be a taking of the rights of way for levees and, therefore, an obligation upon the Government to pay.

Mr. BURTNESS. Will the gentleman yield

Mr. COX. Yes.

Mr. BURTNESS. Can the gentleman give us any estimate at all as to what the flowage rights will be worth as compared with the actual value of the land?

Mr. COX. I am sorry I can not.

Mr. BURTNESS. Will they be worth one-third or one-half more?

Mr. COX. I am sorry I can not give the gentleman that information.

Mr. BRITTEN. Would not that depend entirely on the local conditions?

Mr. COX. Of course.

Mr. BLACK of New York. Will the gentleman yield?

Mr. COX. Yes.

Mr. BLACK of New York. Does the gentleman understand from the decisions he has just read that there could be any damage to an owner, part of whose property was taken, for consequential damages to the remainder of the land?

Mr. COX. There might be, and the courts have so held, but in this case the Reid amendment is a fair proposal. It is a liberal concession on the part of the committee and is an effort on the part of the committee to meet the objections urged to the section as it was originally drawn, which we all concede was bad and should not be legislated into law.

Mr. SNELL. Will the gentleman yield?

Mr. COX. Yes.

Mr. SNELL. Then does the gentleman understand it will be necessary for the Federal Government to provide these flowage rights under the amendment offered by the gentleman from Illinois?

Mr. COX. It would never be necessary for the Federal Government to provide flowage rights until it had been determined that it would be necessary to have such rights.

Mr. SNELL. Then, it is not necessary that they procure those rights immediately?

Mr. COX. No, sir; and the Reid amendment does not mean that the Government must procure rights to all of the property within the flood ways. There is a lot of territory that is included within these rights of way along the flood ways that will not be flooded.

Mr. SNELL. And no one knows how much of that land we would need?

Mr. COX. No one knows.

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

Mr. FREAR. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. FREAR. Mr. Chairman, ladies, and gentlemen of the committee, there ought to be no difference between us personally and we ought to be willing to extend to every one who is here and who speaks on the subject the same courtesy, and I am sure you are so disposed. I do not think there is any disposition to misrepresent, but I wish to explain to you, gentlemen, the situation in which you find yourselves by the presentation of this (Reid) amendment at the last moment.

Yesterday you had another amendment to substitute on this section; to-day this amendment comes in, and a good lawyer tells you what the law is in his judgment. He is prepared with authorities. Are you going to pass upon that now, when in ordinary court proceedings you would ask that both sides be presented and the law discussed?

This is a clever amendment, as clever as anything can be offered, as clever as sending this bill over to the Senate and letting them bring it back with a unanimous report in order to influence the House.

This is an amendment to require the United States to purchase all the flowage rights. The question has been asked by my friend the gentleman from Illinois [Mr. BRITTEN] and others, What will the flowage rights be? Suppose you owned land down there, what would you be willing to do? You would say, "I am going to have all I can get." This would be natural. What will this amendment do? You say, "I will not sell the flowage rights; you can condemn them," and then you have got your local jury just the same. If the Government wants to buy the property and it asks how much it will be, it will be told, "Buy my property at my price. You can not compel me to take less."

You have the very same proposition here you have had throughout the bill. This is not a question of ownership of land, because the United States is to transfer back, under the old proposition, to the States whatever land title it has.

In addition, under this Reid amendment, while you have provided in the bill that the rights of the levees on the main river are to be purchased by the localities, you will not get these rights in this case on the flood ways as you will on the main river. The Government has got to pay for the levee rights under this amendment and also the flowage rights which may make up the full value of the property.

"The United States shall provide flowage rights for destructive floods that will pass by reason of diversion from the main channel of the Mississippi River and shall control, confine, and regulate such streams." This is the language proposed, and the chairman of the committee says, "Are you going to throw these waters down there through the flood way to drown these people?" Yes; that is what you are going to do unless they get away. Do not mistake that. There is not a particle of distinction whether you buy the flowage rights, whether you condemn them, or whether you leave them to their rights of action, so far as drowning the people is concerned. The flood ways will be dangerous places in time of great floods. They are to be used for that purpose.

These diversions are for the purpose of allowing the waters to escape down the flood way, and no one is going to drown, because they will have plenty of time to get behind the levees if they so desire, and they are living there with full knowledge of the danger in time of floods.

The purpose of the amendment is to require the Government to bring action against 7,500 people who are the owners of the property or else the Government has got to buy flowage rights, which does not make any difference in principle or expense.

Mr. COX. The gentleman assumes by that statement that they are all robbers.

Mr. FREAR. Simply because you have got to buy the property they are not robbers. Who is going to give it? No man is going to give it if he owns the property unless it should be some one like my distinguished friend, who, like myself, would possibly be generous.

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. FREAR. Not for just a moment. When one man interrupts a speaker it is the nature of all of us to want to jump in with inquiries, but let me continue with my statement, please.

Seven thousand five hundred owners are to be sued by the Government unless they pay the money or unless they agree to give transfers otherwise. Is not that right?

The measure of damages no man can tell. It may be $100,000,000 or it may be $200,000,000 or over. If we accept the

authority of Mr. Blake, who says much of the land is worth $100 an acre, it may cost the full amount of $200,000,000.

Mr. COX. I am sure it is not the judgment of the gentleman that the land is worth anything like $100, or $20 an acre for flowage rights.

Mr. FREAR. I do not want to interrupt the gentleman, but I do not care to yield any more.

The situation is just this, gentlemen: Under this amendment, which has been offered by the chairman at this last moment without any thought of presenting it to any of us yesterday, it is not in the nature of a compromise, because it does not compromise one single thing in the purchase of land but takes in the whole proposition. The Government does not want this land, and it is exactly the same proposition you have had before you throughout.

Now, are you going to accept it? You are shrewd enough to see into this proposal, just as well as my clever friend, and I do not blame him if he can get it through as an amendment; but, as I have stated, this will require lawsuits against every landowner unless you can buy these rights, and you are sure to have such a situation.

Now, this is the same objection that has been urged in the past.

The gentleman from Connecticut [Mr. TILSON], who is the Republican leader, has another proposition, the administration proposal we are supporting, and remember that this water has overflowed through these flood ways before—not all the time; but it is an old flood way, all of them necessarily are, and it is to be used now for this diversion maybe not over once in 10 years. No man can tell what the damages are going to be now, but if he has any damage he can proceed against the Government. My friend says he has looked up the law and has the decisions here. The Attorney General, as I understand it, wrote this provision. I will be corrected by the leader [Mr. TILSON] if I am wrong. The Attorney General wrote that provision, did he not?

Mr. TILSON. I understand the Attorney General passed on it.

Mr. COX. I know the gentleman who offered it will agree with me on my interpretation.

Mr. FREAR. Now, Mr. Chairman, with all due deference to the able gentleman from Georgia—and he is able—I will accept at this time for the protection of the Government the opinion of the Attorney General of the United States in such an important matter.

Now, if there are no damages, as the gentleman from Georgia says, that can be collected against the Government of the United States, I say they ought to have damages. I agree with him in that. He says it is a question of law. I do not want to put the question as a matter of law; but if they do have damages, I am willing to support any provision in subsequent legislation to give them an immediate right to show their damages in court, so that they may collect such damages without delay. I do not care how you do it. I do not want them to be delayed. But at this time on the single and unsupported statement of one lawyer against another, I say it is a dangerous thing to give away all the Government's rights without knowing where we stand.

That is practically all that I wish to present.

Mr. COX. Will the gentleman yield now?

Mr. FREAR. I will.

Mr. COX. May I ask the gentleman if he understands the amendment to be contrary to the statement I made?

Mr. FREAR. The measure drawn by the Attorney General—as I understand the law, and I may be mistaken, and so may the gentleman from Georgia—that in case of unusual damage different from what they have suffered in the past they can bring their claims against the United States and the Government is responsible.

Mr. COX. The gentleman does not mean to say that the Attorney General has rendered any such opinion?

Mr. FREAR. No; this measure, as I understand, was drawn by the Attorney General. Why do you wish to purchase flood rights without knowing what the rights are and what the expense will be?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. REID of Illinois. Mr. Chairman, I ask unanimous consent that all debate upon this amendment and the amendment thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that all debate upon the pending amendments close in 10 minutes. Is there objection?

Mr. TILSON. Mr. Chairman, reserving the right to object, this is a crucial point in the bill, and does not the gentleman think that it would be well to allow a little more debate upon the amendments?

Mr. REID of Illinois. I am willing to grant that. If anybody wants to speak upon it say so, and I will extend the time.

Mr. FULBRIGHT. Mr. Chairman, reserving the right to object, I happen to represent the district in southeastern Missouri that is affected by the flood way that is under discussion. I have tried to get recognition time after time.

Mr. REID of Illinois. How much time does the gentleman want on this amendment?

Mr. FULBRIGHT. I want 10 minutes.

Mr. REID of Illinois. Very well, Mr. Chairman; I modify my request and ask unanimous consent that all debate upon this amendment and the amendment to it close in 30 minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that all debate upon the pending amendments close in 30 minutes. Is there objection?

There was no objection.

Mr. DEMPSEY. Mr. Chairman, both amendments proposed in this case will protect the rights of the property owners. The only question involved is whether the Government will be protected. The Attorney General has passed upon the amendment presented by the gentleman from Connecticut [Mr. TILSON], and holds that the property owner will have a right of recovery under the amendment. So as to that amendment we have the property owner protected. It is clear that under the other amendment the property owner would also be protected. Let us take the two methods of protection and see whether the Government is protected under both. Under the methods proposed by the gentleman from Illinois [Mr. REID], we attempt to fix for all time the damage caused by the flowage rights. Is it possible to do that? Do we not enter upon a realm of infinite speculation? The times when the floods come, the frequency of recurrence of floods, the extent of the floods, are all involved in that question. Can you in any way settle that question with fair definiteness, so as to determine the amount of damages sustained by the property owner? Of course, you can not. Of course, that is utterly impossible. Of course, it is a mere matter of speculation and guess upon every one of these questions as to how often the floods will come, what the magnitude of the floods will be, and what the extent of the damage suffered by the property owner will be. Are you going to guess? Every man who is a lawyer, who has ever had any experience in condemnations, knows that you guess in favor of the property owner to the extent of at lease five to ten times the value of the actual damage. I have acquired a right of way for a railroad, and I know what the result is, and every lawyer here will agree with me.

Let us take the other side. Let us suppose for a moment what is not the case, that the property owner is not protected, and he does not have, as the gentleman from Georgia [Mr. Cox] says he has not, the right to come here for damages. Is not all this discussion upon the basis that the property owner shall be reimbursed for the actual damage that he sustained? Is there any doubt that if an amendment is needed to the law to give that actual effect, that the Congress will be ready to send him to the courts to determine what the actual damage is that he has sustained? Should he have any more damage than he has actually sustained? You can not in advance estimate, you can not do anything except guess what the damage will be, but, when once the damage has been sustained, you will know what it is, and the property owner will be held down to at least approximately what the actual damage has been. Is not the property owner fully, fairly, adequately, and completely protected by that method, and will not that be certain and definite?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. FULBRIGHT. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FULBRIGHT. Mr. Chairman, ladies and gentlemen of the committee, in the first place, I want to vouch for the honor of the citizenship of Missouri, and I resent the reflections that have been made on the integrity of the citizens of southeast Missouri. There are not in the State of Missouri, so far as I know, or anywhere else in the alluvial valley of the Mississippi, any bands of hijackers or marauders who are seeking to fleece the Government and make a raid upon the Treasury. We have a great question confronting us. Southeastern Missouri has felt the effects of a calamity such as she has never experienced before. In addition to the Mississippi deluge, the St. Francis Basin nine times in succession in 1927 was overflowed. In that section of the State there has been cre-

ated one of the greatest drainage systems in the United States if not in the world. The people of this community have obligated themselves in excess of $50,000,000 in the construction of this drainage system, and they can not bear additional burdens. The amendment offered by the gentleman from Connecticut [Mr. TILSON] would deny to those people the right to any damages that the Government might cause as a result of attempting to control the flood waters of the Mississippi River through the New Madrid flood way. What is the situation? These canals that have been dug at great expense to southeastern Missouri will be obstructed by the so-called New Madrid flood way. This flood way is not provided for the purpose of protecting southeast Missouri. The damage sustained to southeast Missouri would be in excess of the benefits received as a result of this flood way, and you seek to make the people of southeast Missouri bear the burden of a project that is intended to protect some other section of the Mississippi Valley. It is unfair, it is unjust, and the people of my district will never submit to that kind of a proposition.

Not only that, but the lands proposed to be taken for a flood way in southeast Missouri are not waste lands, as some gentlemen would infer. They include some of the best farm lands in the Mississippi Valley; lands which have been in cultivation perhaps for a hundred years, owned by small landowners, not by lumber companies or timber speculators. Sixty per cent of this land is owned by small farmers who have invested the savings of a lifetime in these improvements. This is the land you undertake to make into a flood way in southeast Missouri.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield there?

Mr. FULBRIGHT. Yes.

Mr. LAGUARDIA. It has been conceded all the way through that that land is very valuable and highly cultivated land.

Mr. FULBRIGHT. That is not true with respect to all of it, but it is true of southeast Missouri.

Mr. LAGUARDIA. We concede that.

Mr. FULBRIGHT. But you want to take that land without the payment of a dollar to the people who own it and make it into a flood way. I say the people of the United States are not in favor of that kind of practice.

Mr. WILLIAMSON. Mr. Chairman, will the gentleman yield?

Mr. FULBRIGHT. Yes.

Mr. WILLIAMSON. My understanding of this proposed flood way is that the flood way will never be used at any time except when the water goes over the levees that would be built. It might not be used more than once in 10 or 15 years.

Mr. FULBRIGHT. In one county alone more than 1,000 homes and other buildings were destroyed or damaged by the 1927 flood; 1,000 homes damaged or washed away.

Mr. NELSON of Missouri. Mr. Chairman, will the gentleman yield?

Mr. FULBRIGHT. Yes.

Mr. NELSON of Missouri. In answer to the statement of the gentleman from South Dakota [Mr. WILLIAMSON], may I say it is proposed to cut down the present levee 5 feet and build another levee 5 miles back. This would result in flooding the lands intervening.

Mr. FULBRIGHT. We constructed in southeast Missouri a drainage system that has cost the people an enormous amount of money. The Federal Government has not contributed to that project. Engineers tell me that if this flood-way project goes through, it will cost the drainage districts in this flood-way section from one to five million dollars. A great per cent of New Madrid County and Mississippi County would be included in the new flood way.

This is valuable property. We are not asking for a flood way. We are not asking to sell any land or sell anything. We are not making prices on our property. I am told by competent engineers—by practically every engineer I have talked with, and whom I have heard express themselves on this matter, except General Jadwin—that the proposed new flood way is not a protection to Cairo, and some other method should be adopted by which Cairo would be protected. But the men who attempt to amend this bill undertake to take from southeast Missouri perhaps 200,000 acres of valuable farm lands for a flood way, not for our benefit but for the protection of Cairo, and ask us to pay the damage. We resent that action. We are opposed to it.

I want to say, in the language of the gentleman from Illinois [Mr. MADDEN] yesterday, when he said he would finally vote against the flood bill if certain amendments were not in it, if you undertake to take from southeast Missouri these valuable lands without contribution, I will vote against the proposition, and I voice the sentiment of the people of my district.

We want flood control. We are interested in it. We want to see Cairo protected. We want to see Illinois protected. We want to see the entire Mississippi Valley protected. We do not believe, ladies and gentlemen, that this Congress is going to place the expense upon the people in southeast Missouri who derive no benefit but suffer damage.

That is not all. In the recent flood there was a loss or damage to the people in southeast Missouri, as estimated by the Flood Control Commission, of approximately $8,000,000. As I stated a moment ago, over a thousand buildings were destroyed or materially damaged in one county in the district, and in another over 400 buildings were destroyed. The crops were destroyed, and the $8,000,000 of damages that was estimated does not include the damage to the lands in that section of Missouri.

The problem that exists between Illinois and Missouri is a problem that can not be settled between the States. It is a Federal problem, the burden of which the Federal Government should bear. And do you know, ladies and gentlemen, that after this great flood had taken place in 1927 the eminent men of this country pledged themselves to a comprehensive flood program that would protect us from another such flood as we experienced in 1927. But as the time elapsed they have grown cold. Mr. Hoover, in whom the people of the Mississippi Valley placed the greatest confidence and hope, when it came to the time when he was put to the test he straddled the fence, and we do not know where he is to-day. [Applause.] I am not intimidated by threats of a veto. If this House, the people's forum, has become impotent under the withering blasts of threats and coercion, then Bunker Hill and Yorktown were empty victories, and the blood of the Revolution was spilled in vain. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. FULBRIGHT. I ask unanimous consent for three minutes longer.

The CHAIRMAN. The time has been fixed.

Mr. LAGUARDIA. Mr. Chairman, I agree with the gentleman from Missouri in his objections to the engineering provisions of this bill. But I do not agree with the gentleman from Georgia [Mr. COX] in his opinion as to the effect of the Tilson amendment. The gentleman from Georgia speaks of damages incidental to Government work; in other words, where the property damage was not in contemplation of the project.

But the bill here provides for a comprehensive plan of flood control, and any property found within the path of a flood way or a spillway in this comprehensive plan would naturallly come within the purview of the constitutional provision as to property rights. So that the cases cited by the gentleman from Georgia are not in point.

Mr. REID of Illinois. Will the gentleman yield?

Mr. LAGUARDIA. I have only a few minutes, but I will yield if the gentleman will get me more time.

Mr. REID of Illinois. I will get the gentleman more time. I know he wants to be right. Is there a single phrase in the bill which says it is the duty of the Government to pass water safely from Cape Girardeau to the Gulf of Mexico through flood-control works?

Mr. LAGUARDIA. The bill provides for a comprehensive plan, as submitted by the engineers.

Mr. REID of Illinois. Will the gentleman answer the question?

Mr. LAGUARDIA. I will come to it. In this comprehensive plan you have certain flood ways and spillways definitely mapped out. Now, any property in that spillway or flood way path would be entitled to just compensation under the Tilson amendment and under existing law. In the case of Monongahela Navigation Co. against United States, reported in One hundred and forty-eighth New York, the court said, speaking about the taking of property by the Government under eminent domain and where Congress sought to limit the value of the property by excluding the franchise value:

> The question presented is not whether the United States has the power to condemn and appropriate this property of the Monongahela Co., for that is conceded, but how much it must pay as compensation therefor.

Then, it goes on to say:

> But we need not have recourse to this natural equity, nor is it necessary to look through the Constitution to the affirmations lying behind it in the Declaration of Independence, for, in this fifth amendment, there is stated the exact limitation on the power of the Government to take private property for public uses.

In the case of United States against Great Falls Manufacturing Co., reported in One hundred and twelfth United States, it was held that any property taken by the Government for public use implies the duty of the Government to pay for it.

Such an implication—

Says the syllabus—

being consistent with the constitutional duty of the Government, as well as with common justice, the owner's claim for compensation is one arising out of implied contract.

So that the difficulty suggested by the gentleman from Illinois as to leaving these people with an indefinite remedy and undecided as to what tribunal they should resort to is fully decided in the case of the Great Falls Manufacturing Co., reported in One hundred and twelfth United States. They can treat it as a contract, and they can go directly to the Court of Claims if they so desire.

In the case of United States against Jones, reported in One hundred and ninth United States, it was held that—

there is no reason why the compensation to be made may not be ascertained by any appropriate tribunal capable of estimating the value of the property. There is nothing in the nature of the matter to be determined which calls for the establishment of any special tribunal by the appropriating power.

So that any property that is in direct danger or imminent danger which lies within the path of the spillway or flood way would be fully protected under the provisions of the Tilson amendment.

Mr. REID of Illinois. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. REID of Illinois. The United States Supreme Court, in the case of Jackson against United States, held just the opposite from the statement made by the gentleman from New York. That was a case where they built a levee 1 mile back of another man's house and left it within the confines of the flood way, and in that case the court held that he had no right of action and could get no damages.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. LAGUARDIA. The gentleman from Illinois promised to get me additional time.

Mr. REID of Illinois. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five additional minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from New York may proceed for five additional minutes. Is there objection?

There was no objection.

Mr. LAGUARDIA. Now, Mr. Chairman, in the case cited by the gentleman from Illinois, I repeat that the damage was incidental and unexpected. It was not within the contemplation of the project itself, and I say for the third or fourth time that in the case of the bill we are now considering you have a certain definite and specific proposition mapped out in a comprehensive flood relief plan, and that comes clearly within all of the decisions I have cited. And let me say to the gentleman from Illinois that I was not citing my views of the law; I was citing from decisions of the Supreme Court.

Mr. COX. But the gentleman from New York puts an erroneous construction on the decisions referred to.

Mr. FREAR. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. FREAR. I want to ask the gentleman if it is proper, in a state of confusion and disagreement of this kind on the law, that we should adopt a plan of this kind, which may mean $100,000,000 or $200,000,000 in cost to the Government?

Mr. REID of Illinois. Or leave 100,000 people to drown and their heirs go to the courts under such confusion.

Mr. FREAR. They will be drowned under either proposition, as we all know.

Mr. LAGUARDIA. I will say to the gentleman from Illinois and the gentleman from Louisiana, who, I think, suggested that under the Tilson amendment the people would have to run out and look for lawyers, under your plan the lawyers would go out and look for the people.

Mr. REID of Illinois. They would if they were from New York.

Mr. LAGUARDIA. And they will be. I am trying to protect the people of Mississippi Valley from the confidence men of Broadway and the tin horns of Chicago. I said that yesterday.

Mr. BLACK of New York. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. BLACK of New York. Will the gentleman tell us just what the Reid amendment adds to the rights of property owners as defined by the gentleman in those decisions?

Mr. LAGUARDIA. It broadens the scope, if anything, and will throw the doors wide open.

Mr. MOORE of Virginia. Tell us exactly how that will be done?

Mr. LAGUARDIA. Certainly. You provide specifically for payment or compensation way beyond any direct, actual, and definite damages.

Mr. MOORE of Virginia. Be a little specific and tell us how and how far beyond.

Mr. LAGUARDIA. Why, in this way: You now have your property fully protected under existing law as laid down in a long line of decisions. If there is anything that is protected in this country, and no one knows this better than the gentleman from Virginia, who is a great defender of human rights, it is property. Property is fully protected under the Constitution. You need not add anything to this law to do that, but by writing a specific provision into this law you are going far beyond the law as laid down in these decisions, generous as the decisions have always been to a property right, and you provide for a system of condemnation and local commissioners inviting the opportunity for excessive awards of damages in cases where there may be no actual damages sustained.

Mr. MOORE of Virginia. Yes; but my friend has not told me yet how we throw the doors wider open than the Constitution and the statute which is cited in this section.

Mr. LAGUARDIA. You provide for the condemnation of all this property; you provide for the appointment of local commissioners; and there is no limit to what you can condemn under local influence, under the specific provisions of the bill; while under existing law you must make out a case of material property damage actually sustained, or they are not entitled to compensation.

Mr. MOORE of Virginia. Let me go one step further, and I may say to the gentleman I am talking without any preconception, but am trying to get at the case we have before us. This section itself says nothing about the Constitution, but, of course, we assume that the Constitution will be observed, but it does say that the provisions of sections 5 and 6 of the river and harbor act of July 18, 1918, shall apply.

Mr. LAGUARDIA. Yes.

Mr. MOORE of Virginia. Under that act, unless the Government is able to agree with the landowner in respect of the acquisition of any interest in the land, the flowage rights or otherwise, then there shall be a resort by the Government to condemnation and the Government has the right to take possession of the property at once.

Mr. LAGUARDIA. Then if that is so, why does the gentleman object to the Tilson amendment going into the bill, in lieu of the specific provisions reported by the committee?

Mr. MOORE of Virginia. I will say to the gentleman I am not trying to do anything more than get at his view.

Mr. WILSON of Mississippi. Mr. Chairman, I am not surprised at the argument of the gentleman from New York. The argument of the gentleman from Wisconsin [Mr. FREAR] has many times nauseated me upon this floor, full of inaccuracies and errors.

Mr. FREAR. Will the gentleman point out in what respect?

Mr. WILSON of Mississippi. Oh, yes; talking about land being worth $100 an acre in the valley.

Mr. FREAR. That was the testimony before the committee.

Mr. LAGUARDIA. The gentleman from Missouri [Mr. FULBRIGHT] just said so.

Mr. FULBRIGHT. I beg the gentleman's pardon. The gentleman from Missouri did not make any such statement.

Mr. WILSON of Mississippi. Wait a minute. That is just another inaccurate statement from the side opposing adequate flood-control legislation, and the other gentleman, the one from Iowa, who has sought safety in flight, Mr. KOPP, stated upon this floor not long ago that it was the duty of these people never to have gone to the Mississippi Valley if they did not want to assume this responsibility. Why, the gentleman from Iowa [Mr. KOPP] made the argument upon the floor of this House that the people who went into the Mississippi Valley to reclaim that rich domain knew the dangers incident to the occupancy of the valley, and to use a term of the lawyers, they assumed the risk and ought to abide by the consequences.

The gentleman from Wisconsin [Mr. FREAR] has just said in his argument here in reference to this amendment that the people ought to get away from the levees and get behind them. That argument would not dignify a gentleman in the Dark Ages of the past——

Mr. FREAR. Will the gentleman——

Mr. WILSON of Mississippi. I refuse to yield; sit down.

Mr. FREAR. That was for the protection of human life.

Mr. WILSON of Mississippi. Sit down. That argument would not have dignified a Member of Congress, if there had

been such a governmental organization in the Dark Ages of the past, when one man had no regard or respect for the rights of his fellow citizens.

What do you want to do under this amendment? You want to put a further and an additional responsibility upon the back of our already burdened people in the Mississippi Valley.

Here is a river that we can not build a bridge across without the Nation's consent. You can not float a boat upon its waters without the Nation's consent. You can do nothing in reference to it, because the United States Government says in times when there is no flood, "It is my property and my river."

You have marines down in Nicaragua, whether rightfully or wrongfully, to do what? To protect, you say, the lives and property of American citizens. When there has not been a dollar's worth of property endangered or a human life sacrificed until the marines got there. You have already sacrificed the lives of 24 of these American boys and spent $1,600,000 of the taxpayers' money. You never asked the cost when you sent them. You have them to-day in China, so you say, trying to protect American lives and American property. You had a move in the Sixty-second Congress initiated by the Hon. Herbert Hoover that culminated in taking $70,000,000 out of the Treasury of the United States, sending it as a free-will offering to the famine-stricken people of Russia—more than you ever contributed here in all the history of this great country to the people of the Mississippi Valley to save their property and their lives in your own country. [Applause.]

My people have already spent approximately $300,000,000 in an effort to protect themselves against the Government property—the Mississippi River, owned, and should be controlled by this great Government of ours. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut as a substitute for the amendment of the gentleman from Illinois [Mr. REID].

The question was taken; and on a division (demanded by Mr. TILSON) there were 76 ayes and 119 noes.

So the amendment was rejected.

The CHAIRMAN. The question now is on the amendment of the gentleman from Illinois [Mr. REID].

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Page 6, line 10, strike out the words "local interests" and insert in lieu thereof "levee districts."

The amendment was agreed to.

Mr. BLACK of New York. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. BLACK of New York: Page 5, line 23, after the word "final," insert "but in no case shall the damages exceed the market value of such property as of the date of this act, and as if the United States were not to undertake any comprehensive plan of flood relief.

"No awards shall be paid to any person taking title to affected property after the passage of this act, except through a judgment of a court of competent jurisdiction nor to assignees of anticipated awards.

"The Secretary of War shall employ such experts and engineers as to him may seem necessary in the conduct of such condemnation proceedings and benefit proceedings as are provided by this act."

Mr. BLACK of New York. Mr. Chairman and gentlemen of the committee, we all understand that in nearly all efforts at public improvements there is always liable to be a little larceny; there is always somebody willing to take advantage of the public. But that of itself is not sufficient reason against public improvements. There is a probability in this public work, as in all others, that there may be somebody around who will be low-minded enough to defraud the Government. Of course, there are a great number of general penal statutes that will take care of this after they have been caught. I propose by this amendment to try and protect the Government in the beginning. I realize that we should undertake the flood-control plans even though there may be some collateral fraud.

A large part of the agitation against this great work has been due to the fact that some think that in the condemnation proceedings the Government will have to pay extravagant prices. By this amendment I fix a rule of evidence. I say that the value of the property taken shall be the market value as of the date of the passage of this act, and, further to guard against high speculative damages, I say that when the property is taken its value must be considered as if the Government never thought of putting through any comprehensive flood-relief plan. Lawyers who know anything about condemnation work understand that in measuring the value of property you can take into contemplation any potential utilization of that property. I want this amended so that a man whose property is taken by this plan can not say to the court that if the plan was shifted his property would be three times as valuable. That is the reason I want it understood that the property shall be taken as if there was no great Federal project for a comprehensive flood control.

Mr. DEMPSEY. The gentleman's amendment does not provide anything in respect to rights of way or easements. The gentleman provides only for the title.

Mr. BLACK of New York. The easement would be dependent upon the value of the greater right, the title.

Mr. DEMPSEY. But the gentleman could provide for that in his amendment.

Mr. BLACK of New York. Then, again, I provide that no award shall be paid to anybody who takes title after the passage of this act, or prior to the improvement, nor shall there be awards made to any assignee of awards. That is to meet the objection that comes from the gentleman from New York, [Mr. LAGUARDIA]. He anticipates there will be speculation down there. That happens at every great contemplated public improvement where there are immense parcels of land taken. This would protect the Government against these speculators, by refusing to acknowledge assignments, by refusing to acknowledge titles taken after the passage of the act. Moreover, this would discourage any kind of rigging of the real-estate market after the passage of this act. Titles would not be passing to and fro with the idea of building up a false measure of value, due to sales immediately prior to the improvement. Further, we have done nothing here in this extraordinary proposition to give the Secretary of War competent real-estate experts and engineering help to carry on these improvements.

Generally speaking, I am in favor of this bill. I feel this way about it. At the time of the flood all the country wanted to help the flood sufferers. We all realized that nature is the enemy of the United States in this respect, and not only of the people immediately affected. We can effect no treaty with nature. People of the Mississippi Valley, the people of the interior, of the West, contribute to the Navy, contribute to the East coast and the West coast fortifications, which are for the immediate protection of us who live on the coasts. Nature is just as dangerous an enemy in the case of the Mississippi as any foreign foe may happen to be, and you can effect no treaty with nature. We all understand from the White House to this House, and everywhere else, that this is a national project, and we must treat it as such; but at the same time I think that in the conduct of this proceeding we ought to see to it that those who are not public-minded, that those who would defraud the Government, are discouraged by the bill itself from going into these speculative processes that some of us have in mind, by the adoption of amendments such as I have suggested. [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. REID of Illinois. Mr. Chairman, the intent may be all right in this amendment, but the way it is worded and the place at which it is to be put into the bill will destroy all of the safeguards the distinguished leaders on this side of the House have tried to keep in the bill. Under the law at the present time, of course, benefits are to be considered. Under this amendment you would have to consider benefits before the improvement was thought of. Consequently benefits would not be taken into consideration. Of course, you could not violate the Constitution and the law and prohibit anybody from being an assignee to any rights, and prevent any payment to that person. It is inconsistent with my idea of ordinary law. As for the Secretary of War needing experts, we have a lot of experts now that know everything about every subject under the sun. It is not necessary to provide in this bill for any new experts, because up to date every question that we have been able to think of in regard to flood control has been answered by the War Department.

Mr. DEMPSEY. Is not the chief objection to the amendment that it deals with titles, and that titles are practically not involved at all, that it is a question of easements and rights?

Mr. REID of Illinois. That may be the chief objection.

Mr. LAGUARDIA. And, of course, as to the matter of benefits, that comes in the measure of damages under the general condemnation law.

Mr. REID of Illinois. That is all. Mr. Chairman, I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

The amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 5, in line 23, strike out the period after the word "final" and insert the following: "If such award does not exceed 50 per cent of the amount for which said land was locally assessed on January 1, 1928, but if in excess of such an amount the Secretary of War shall submit to Congress a report containing the findings of facts and law of such award, together with all details on which said award is based" and in line 24, after the word "price" insert the following: "Not exceeding 40 per cent of the amount for which said land was locally assessed on January 1, 1928," and strike out the word "for" on line 24 and all of line 25 and on page 6, on line 1, strike out the words "reasonable he" and insert in lieu thereof the words "Secretary of War," so that the same will read, "when the owner of any land, easement, or right of way shall fix a price not exceeding 40 per cent of the amount for which said land was locally assessed on January 1, 1928, the Secretary of War may purchase the same at such price."

Mr. LAGUARDIA. Mr. Chairman, my amendment simply does this. The bill provides that the Secretary of War may purchase at private sale if he deems the price reasonable.

My amendment would limit the Secretary of War to private sale where he can obtain the land as of the assessed valuation of January 1, 1928, plus 40 per cent. That is as to private sale. Now, as to condemnation, gentlemen are familiar with the law laid down in the Monongahela case. We can not limit the price. In that case Congress sought to eliminate the franchise value of the company whose property was taken, and the Supreme Court held that Congress could not do that. I therefore provide that the award on condemnation, if it exceeds the assessed valuation of January 1, 1928, plus 50 per cent, it is not final. When it exceeds the assessed valuation, plus 50 per cent, the Secretary of War submits the findings of facts and law, together with the details on which the findings were based, to Congress. That would put the line upon all these proceedings so that it would be very difficult for excessive awards to be made under the control provided in my amendment. If we should provide that an award should not be beyond a certain amount, under the law as it is to-day it would be declared unconstitutional.

Mr. LOZIER. Does the gentleman know that in my own State they do not have full assessments of property and make up the decreased value by the rate? In States where they have a 40 per cent valuation your amendment would limit the power to purchase to the assessed valuation plus 40 per cent?

Mr. LAGUARDIA. Of the value of the land.

Mr. LOZIER. That would be manifestly unjust in those jurisdictions where they do not have a 100 per cent valuation for assessment purposes, but make up the revenue by increasing the rate, having a high rate or percentage of tax on a low valuation.

Mr. LAGUARDIA. In my city, where we have a tax limit, we naturally raise the assessed value. Will the gentleman offer an amendment to my amendment making it 100 per cent? I will accept it.

Mr. LOZIER. No; because under the law this body can not legislatively limit the amount of assessment that may be taken as damage. The only effect of the amendment of the gentleman from New York is to limit and place the Government in a strait-jacket and prevent it from going beyond a limit.

Mr. LAGUARDIA. My amendment as to private sale does that, but private sale, of course, contemplates agreement on the part of both parties, so that the contention of the gentleman from Missouri does not apply to my amendment.

The other does not limit the Government in any way. It simply requires that before the award is final it shall be submitted to Congress. The gentleman from Illinois has constantly appealed for the weak and needy down in the Mississippi Valley. I want to protect the weak and the needy, and my amendment would give protection to the weak and needy and protect the Government against the wicked and the greedy. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. LAGUARDIA. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 54, noes 76.

So the amendment was rejected.

Mr. BLACK of New York. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLACK of New York: Page 6, line 1, after the word "price," insert "and such price may be used as evidence in condemnation proceedings affecting similar property."

Mr. BLACK of New York. Mr. Chairman and gentlemen, I am friendly to this legislation and I realize that the great run of men who will be connected with the project are honest, but it has been suggested that there are some who will take advantage of the situation, and I am trying to make this bill as burglar proof as possible. The best evidence available as to the value of the properties affected will be the price paid by the Government to the private owners at these arranged sales, and I would not want to see any judge hold that this price, this best test of the market value, must be ruled out for any technical reason, on the theory that to a certain extent the sale is a forced sale. All I want to do by this amendment is to have the Government offer in evidence, if it cares to do so, as to the value of any property taken the price which the Government paid at private sale to another property owner holding and owning similar property. As I say, it is absolutely the best test of the value; it is nearest to the time of the taking, it is under the best conditions, and no court should be allowed to rule it out as evidence.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York [Mr. BLACK].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York [Mr. LAGUARDIA].

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 5, in line 23, strike out the period after the word "final" and insert the following: "if such award does not exceed the amount for which said land was locally assessed on January 1, 1928, plus 100 per cent, but if in excess of such an amount the Secretary of War shall submit to Congress a report containing the findings of facts and law of such award, together with all details on which said award is based"; and in line 24, after the word "price," insert the following: "Not exceeding the amount for which said land was locally assessed on January 1, 1928, plus 80 per cent," and strike out the word "for" on line 24 and all of line 25; and on page 6, on line 1, strike out the words "reasonable he," and insert in lieu thereof the words "Secretary of War," so that same will read, "when the owner of any land, easement, or right of way shall fix a price of the amount for which said land was locally assessed on January 1, 1928, plus 80 per cent, the Secretary of War may purchase the same at such price."

Mr. SCHAFER. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Wisconsin rise?

Mr. SCHAFER. Mr. Chairman, I rise in favor of the amendment.

The CHAIRMAN. The gentleman from Wisconsin is recognized for five minutes.

Mr. SCHAFER. Mr. Chairman, I believe this amendment more clearly safeguards the pending bill than the one which I suggested yesterday. If we adopt this amendment, we will send word to the country that this Congress has prevented unwarranted raids on the Treasury. The interests of the property holders are safeguarded under this amendment and at the same time the limitations will prevent excessive and unjustifiable payments to those who might desire to raid the Treasury. However, I am frank to say that the speculators who hope to profit excessively by the passage and enactment of this flood relief bill will not look with favor upon this limitation.

If this amendment is adopted I shall be glad to vote for the pending bill as amended. If the amendment is not adopted, I shall be very happy indeed to vote against the bill with a sincere hope that the President of the United States, with whom I do not always agree, will veto it if it goes to him in the form as passed by the House.

This is a very comprehensive, fair, and proper amendment and should be supported particularly by those from the valley States who have been so vehement in their assurances that there is no pork in the bill.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. SCHAFER. Yes.

Mr. COOPER of Wisconsin. Does the amendment specifically provide that there shall not be more paid than the assessed value plus 80 per cent?

Mr. LAGUARDIA. Eighty per cent on private sales and 100 per cent under condemnation.

Mr. COOPER of Wisconsin. That seems to be fair.

Mr. ALLGOOD. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Alabama rise?

Mr. ALLGOOD. For the purpose of opposing the amendment.

The CHAIRMAN. The gentleman from Alabama is recognized for five minutes.

Mr. ALLGOOD. Mr. Chairman and gentlemen, it seems to me this is a very unfair amendment. It is based upon the 1928 assessment. Just think, gentlemen, what happened in the Mississippi Valley in 1927, think of the millions of dollars of improvements that were washed away and were not placed in the 1928 assessment, and then to ask these people to take the 1928 tax valuation, or even a 100 per cent increase, is wholly unfair to them. It seems to me to be very unfair, and I think those who have put this amendment forward did not think of this feature of it. I have just risen for the purpose of recalling to your mind what took place in the Mississippi Valley in 1927—the destruction of life and property beggar description.

Mr. McSWAIN. Will the gentleman yield?

Mr. ALLGOOD. Yes.

Mr. McSWAIN. Will it render the amendment less obnoxious if the date is fixed as January 1, 1927, or January 1, 1926?

Mr. ALLGOOD. It would make it less obnoxious.

Mr. LaGUARDIA. I will accept that.

Mr. McSWAIN. The gentleman from Alabama says the amendment as proposed is unfair because of the depreciated value of the property in the Mississippi Valley.

Mr. LaGUARDIA. Mr. Chairman, I ask unanimous consent to change my amendment; and wherever it reads "January 1, 1928," make it read "January 1, 1926."

The CHAIRMAN. The gentleman from New York asks unanimous consent to modify his amendment in the manner indicated. Is there objection?

There was no objection.

Mr. FULBRIGHT. Will the gentleman yield?

Mr. ALLGOOD. Yes.

Mr. FULBRIGHT. I want to make this suggestion to the gentleman from Alabama who has just spoken, that in southeast Missouri the values of the land in the territory affected by the flood, for the purpose of assessment, were reduced by the State authorities from the very fact that they had sustained such a terrible damage in 1927. In many instances the taxes have been reduced on lands in southeastern Missouri as a result of these floods more than 25 per cent, and in some cases as high as 40 per cent of the value.

Mr. ALLGOOD. The Governor of the State of Louisiana called the legislature in extraordinary session last fall before the taxes became due for the purpose of relieving the taxpayers in that State where their properties had been destroyed or damaged by the floods.

Mr. REID of Illinois. Mr. Chairman, I rise to oppose the amendment for a number of reasons. The basis is not fair and it is not based upon the mover's knowledge of any assessment value in any of the States involved. I am sure the gentleman would not undertake to have the Government buy $20 land and only pay $18, under an illustration that might be seen from the face of it.

But here is the worst part of the amendment. The gentleman wants them to report back to Congress before the Secretary of War buys a piece of property. This is the bad part of the amendment. The amendment provides that if the price is in excess of a price based on the gentleman's amendment, the Secretary of War shall submit to Congress a report containing the findings of fact and law of such award, together with all details on which said award is based.

Mr. LaGUARDIA. That is in the case of condemnation proceedings.

Mr. REID of Illinois. Yes; so that every case you have in court they are going to send to Congress, and we are going to be like the House of Lords of England, where every lawsuit they can not settle satisfactorily to themselves in the lower courts they bring to the House of Lords. They are going to provide for that procedure here. I should not, perhaps, object to that, because I could learn a lot more law than I have learned here to-day.

Mr. LaGUARDIA. Perhaps, the opponents of the bill likewise.

Mr. REID of Illinois. Yes; that is a good idea.

I do not think the amendment is fair, and I think it would endanger the proposition.

Mr. WINGO and Mr. WHITTINGTON rose.

Mr. REID of Illinois. I yield first to the gentleman from Arkansas.

Mr. WINGO. Take the last provision of the amendment which provides for an assessed valuation plus 80 per cent, and I want my friend from Wisconsin to notice this: We will take one State that has a 50 per cent assessment and taking a tract of land worth $20 it would be assessed at $10 an acre. This amendment says the Secretary can pay only the assessed value plus 80 per cent, which would be $18 for land that is admittedly worth at least $20. Of course, the Secretary of War would be barred from buying any of that land, because he would be paying $2 less than the man admits it is worth for taxation purposes, which certainly is not an exorbitant price when it is to his interest to have it assessed as low as possible.

Mr. LaGUARDIA and Mr. DEMPSEY rose.

Mr. REID of Illinois. I yield to the gentleman from Mississippi [Mr. WHITTINGTON] after the gentleman from Arkansas [Mr. WINGO] is through.

Mr. WINGO. Let me finish this statement, if the gentleman will permit. If the gentleman from New York is familiar with tax decisions he will know that there is more than one State where the courts have held that it will take judicial knowledge of the fact that the assessed value is a certain percentage. In one State I know of, which is not in the Mississippi Valley, it is 33⅓ per cent and in another one 20 per cent. There is one State in the Mississippi Valley where the Supreme Court has said it will take judicial knowledge of the fact that the assessed value of the property does not exceed 50 per cent of the actual value. Of course, under the gentleman's amendment, they could not buy that land at all.

Mr. WHITTINGTON. I should like to ask the chairman of the committee a question. Is it not true, Mr. Chairman, that the condemnation provision in the bill here is substantially the language of every condemnation statute for the condemnation of property for rivers and harbors, post offices, and for public works that has been written for the last 100 years?

Mr. REID of Illinois. That is right.

Mr. WHITTINGTON. Is it not also true that the proposed amendment would change the rules of law that have heretofore obtained for condemnation proceedings?

Mr. REID of Illinois. Yes; that is quite true.

Mr. MOORE of Virginia. Let me ask the gentleman this question, if the gentleman will permit.

Mr. REID of Illinois. Certainly.

Mr. MOORE of Virginia. Suppose this amendment should be adopted, what is Congress going to do with these reports that come in here?

Mr. REID of Illinois. The gentleman from New York [Mr. LaGUARDIA] and I are going to look them over. [Laughter.]

Mr. MOORE of Virginia. Does not the gentleman think there would be a flooding of Congress as well as a flooding of the Mississippi River Valley?

Mr. REID of Illinois. There is no question about that.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken; and on a division (demanded by Mr. SCHAFER) there were—ayes 11, noes 83.

So the amendment was rejected.

The Clerk read as follows:

SEC. 6. In an emergency, funds appropriated under authority of this act may be expended for the prosecution of such works for the control of the floods of the Mississippi River as have heretofore been authorized and are not included in the present project; or for the maintenance of any levee when it is demonstrated to the satisfaction of the Secretary of War that the levee can not be adequately maintained by local interests.

The CHAIRMAN. The gentleman from Illinois [Mr. REID] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. REID of Illinois: Page 6, line 22, strike out the words "in an emergency, funds" and insert in lieu thereof the word "Funds."

Page 6, line 23, after the word "of," insert the words "section 1 of."

The amendment was agreed to.

The CHAIRMAN. The gentleman from Illinois offers another amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. REID of Illinois: Page 7, line 1, after the word "project," change the semicolon to a comma, strike out the rest of the section, and insert in lieu thereof the following: "including levee work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on the outlets and tributaries of the Mississippi River between Rock Island and Head of Passes, in so far as such outlets or tributaries are affected by the backwaters of the Mississippi: *Provided*, That for such work on tributaries the States or levee districts shall provide rights of way without cost to the United States, contribute 33⅓ per cent of the cost of the works, and maintain them after

completion: *And provided further*, That not more than $10,000,000 of the sums authorized in section 1 of this act shall be expended under the provisions of this section."

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Page 7, after the amendment proposed to be inserted at the end of section 6, add a new paragraph, as follows:

"In an emergency, funds appropriated under authority of section 1 of this act may be expended for the maintenance of any levee when it is demonstrated to the satisfaction of the Secretary of War that the levee can not be adequately maintained by the State or levee district."

The amendment was agreed to.

The Clerk, proceeding with the reading of the bill, read as follows:

SEC. 7. That the sum of $5,000,000 is authorized to be appropriated as an emergency fund to be allotted by the Secretary of War on the recommendation of the Chief of Engineers, in rescue work or in the repair or maintenance of any flood-control work on any tributaries of the Mississippi River below Cape Girardeau, Mo., threatened or destroyed by flood.

The Clerk read the following committee amendment:

Page 7, line 10, after the word "river," strike out the words "below Cape Girardeau, Mo."

Mr. FREAR. I would like to ask the gentleman from Illinois what the purpose of this amendment is?

Mr. REID of Illinois. It was called to the attention of the committee by the gentleman from Arkansas [Mr. RAGON] that during the last flood it was impossible to get an engineer down there to do the work.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. HASTINGS. Mr. Chairman, I want to call attention to the words "an emergency." In the previous section the word "emergency" was stricken out. Does not the gentleman think this word "emergency" should be stricken out and "a" inserted?

Mr. REID of Illinois. I do not think so.

Mr. RAGON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. RAGON: Page 7, line 11, after the word "flood," strike out the period and insert the words "including the flood of 1927."

Mr. RAGON. Mr. Chairman, I do not think there is a man in the House that will object to the amendment I have offered. As I have said on the flood before, I think the district that I represent suffered the greatest amount of permanent irreparable damage by the flood of 1927. The Arkansas River Valley region from Muskogee, Okla., to Pine Bluff, Ark., will not come in the bill you are about to perfect except in this section and in the surveys. The Arkansas River practically ruined that valley last year—one of the richest valleys in our State. The Arkansas River is a navigable stream. Therefore we are precluded from doing anything in the way of obstruction that does not meet the approval of the War Department.

After the overflow had passed away I was called to a little city in my district. Just below there is an area of 50,000 acres of the richest bottom land you can find anywhere.

The river had made great inroads in that rich bottom land, cut out the banks of the river for a distance of a quarter of a mile as perfectly as you could have done it with a steam shovel.

One of the most pathetic sights I ever saw were these farmers, without any engineering experience, trying to build a levee. They had four or five teams, and each team was attached to a railroad slip. They were trying to build up a little levee, and they had it 3 or 4 feet high. One of the men who had it in charge asked if I could not do something toward getting an engineer there who knew his business and who would advise them how to protect their homes and farms.

I went back and wired General Jadwin. He was out of the city, but turned it over to General Deakyne, who referred it back to the Mississippi River Commission. Then Colonel Potter wired me that they did not have an engineer and they did not have a dollar which they could send there and help these people in these dire circumstances.

There they were—thrown wide open to the inroads of every bank-full rise in the Arkansas River.

Now, I have taken up the section that the Flood Control Committee put in the bill. I have taken it up personally with General Jadwin; and while it may be possible that he could furnish engineers and do a little revetment work on the Arkansas River under the present section, he thinks it would be better to make the intention well known and write in the bill "including the flood of 1927."

I have had appeals from three different sections asking the Army engineers to come there on that river and make investigations with reference to the river caving its banks and injuring the levees they have constructed.

Mr. JACOBSTEIN. Mr. Chairman, will the gentleman yield?

Mr. RAGON. Yes.

Mr. JACOBSTEIN. Is it the gentleman's thought that the language of the committee bill would restrict the use of the money to floods in the future, and not to repair works on account of floods in the past?

Mr. RAGON. I rather think so. The situation is this: The Army engineers went down there, and in one place they said, "We can not do anything with this, although something should be done. The reason we can not do anything with it is because we have not any jurisdiction on this section of the river for the purpose of flood control." They said that they could go in there and handle it from the standpoint of navigation, but that there was no feature of navigation involved, and so when you give them this authority they will be in a position where they can go in there and stop the caving of those banks that eats into the levees which would open the river on from 30,000 to 40,000 acres of land. This is true in several different places in the Arkansas River Valley between Fort Smith and Pine Bluff.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas.

The amendment was agreed to.

The Clerk read as follows:

SEC. 8. The project herein authorized shall be prosecuted by the Mississippi River Commission under the direction of the Secretary of War and supervision of the Chief of Engineers and subject to the provisions of this act. It shall perform such functions and through such agencies as they shall designate after consultation and discussion with the president of the commission. For all other purposes the existing laws governing the constitution and activities of the commission shall remain unchanged. The commission shall make inspection trips of such frequency and duration as will enable it to acquire first-hand information as to conditions and problems germane to the matter of flood control within the area of its jurisdiction; and on such trips of inspection ample opportunity for hearings and suggestions shall be afforded persons affected by or interested in such problems. The president of the commission shall be the executive officer thereof and shall have the qualifications now prescribed by law for the Assistant Chief of Engineers, shall have the title brigadier general, Corps of Engineers, and shall have the rank, pay, and allowances of a brigadier general while actually assigned to such duty: *Provided*, That the present incumbent of the office may be appointed a brigadier general of the Army, retired, and shall be eligible for the position of president of the commission if recalled to active service by the President under the provisions of existing law.

With the following committee amendment:

Page 8, after line 11, insert:

"The salary of the president of the Mississippi River Commission shall hereafter be $10,000 per annum, and the salary of the other members of the commission shall hereafter be $7,500 per annum. The official salary of any officer appointed or employed under this act shall be deducted from the amount of salary or compensation provided by or which shall be fixed under the terms of this act."

With the following amendment offered by Mr. REID of Illinois to the committee amendment:

Page 8, line 15, after the word "officer," insert the words "of the United States Army or other branch of the Government."

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Illinois to the committee amendment.

The amendment was agreed to.

The CHAIRMAN. The question now is on the committee amendment as amended.

The committee amendment was agreed to.

The Clerk read as follows:

SEC. 9. The creation of any material obstruction not affirmatively authorized by Congress to the flood-discharge capacity of such portion of the alluvial valley of the Mississippi River below Cape Girardeau as is embraced in the project adopted by section 1 of this act is hereby prohibited, and it shall not be lawful to build or commence the building of any levee or other structure in said portion of the alluvial valley or in any flood way therein that will materially affect the flood flow in said alluvial valley or in any flood way therein unless the work

has been recommended by the Chief of Engineers and authorized by the Secretary of War. Any person or corporation who shall violate any provision of this section is guilty of a misdemeanor, and on conviction shall be punished by a fine not exceeding $2,500 nor less than $500 or by imprisonment (in the case of a natural person) not exceeding one year, or by both such punishments, in the discretion of the court; and the removal of any structures, or parts of structures, erected in violation of this section may be enforced by injunction or other process in the district court of the United States in the district in which such structures may exist, and proceedings to this end may be instituted under the direction of the Attorney General. The provisions of section 17 of the river and harbor act of March 3, 1899, are hereby made applicable to this section.

With the following committee amendment:

Page 8, line 19, after the words "Sec. 9," strike out all of the balance of that page, and all down to and including the words "Attorney General," on page 9, line 15.

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

On page 9, line 18, strike out the word "section" and insert the word "act."

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the amendments offered by the gentleman from Illinois.

The Clerk read as follows:

Amendments by Mr. REID: Page 9, line 16, strike out the word "section" and insert in lieu thereof the word and figures "sections 13, 14, 16, and"; page 9, line 17, after the word "to," insert the words "all lands, waters, easements, and other property and rights acquired or constructed under the provisions of."

The CHAIRMAN. The question is on agreeing to the amendments offered by the gentleman from Illinois.

The amendments were agreed to.

The Clerk read as follows:

SEC. 10. That it is the sense of Congress that the surveys of the Mississippi River and its tributaries, authorized pursuant to House Document No. 308, Sixty-ninth Congress, first session, be prosecuted as speedily as practicable, and the Secretary of War, through the Corps of Engineers, United States Army, is directed to prepare and submit to Congress at the earliest practicable date projects for flood control on all tributary streams (including such of their main tributaries as may be deemed necessary) of the Mississippi River system subject to destructive floods: *Provided*, That before transmitting such reports to Congress the same shall be presented to the board created in section 1 of this act, and its conclusions and recommendations thereon shall be transmitted to Congress by the Secretary of War with his report.

With the following committee amendments:

Page 9, line 21, after the word "to," insert the words "the act of January 21, 1927."

Page 10, line 2, after the word "stream," strike out "(including such of their main tributaries as may be deemed necessary)."

Page 10, line 4, after the word "flood," insert "which projects shall include: The Red River and tributaries, the Yazoo River and tributaries, the White River and tributaries, the St. Francis River and tributaries, the Arkansas River and tributaries, the Ohio River and tributaries, the Missouri River and tributaries, and the Illinois River and tributaries."

Page 10, after line 13, insert the following:

"The sum of $5,000,000 is hereby authorized to be used out of the appropriation herein authorized, in addition to amounts authorized in the river and harbor act of January 21, 1927, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers for the preparation of the flood-control projects authorized in this section."

The CHAIRMAN. The question is on agreeing to the committee amendments.

Mr. FREAR. Mr. Chairman, I move to strike out the last word for the purpose of making a brief statement which I think the House is entitled to at this time, in respect to the character of the motion to recommit, which I shall offer if I am recognized as one of the committee. It will be the bill that was offered by Mr. TILSON, the leader on the Republican side, excepting that I shall strike out the provision which was defeated yesterday, offered by the gentleman from Illinois [Mr. MADDEN]. That related to the New Madrid and the Bonnet Carre propositions. That is stricken out. Otherwise it will be the Tilson proposition which will be read from the desk at that time. I do this in advance so that all the Members will understand what the motion to recommit includes.

Mr. NEWTON. Did I understand the gentleman to say that in the motion to recommit there will be included the proposition which was submitted by the gentleman from Illinois [Mr. MADDEN]?

Mr. FREAR. No; that will be eliminated, but all of the other sections will relate to the position taken by the gentleman from Connecticut [Mr. TILSON] as to what is understood to be the agreement with the Attorney General, and that will be the motion that will be offered.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The CHAIRMAN. The gentleman from Illinois has offered an amendment, which the Clerk will report.

The Clerk read as follows:

Page 10, line 9, after the word "tributaries," change the colon to a semicolon and insert the following: "and the reports thereon, in addition to the surveys provided by said House Document 308, Sixty-ninth Congress, first session, shall include the effects on the subject of further flood control of the lower Mississippi River to be attained through the control of the flood waters in the drainage basin of the tributaries by the establishment of a reservoir system; the benefits that will accrue to navigation and agriculture from the prevention of erosion and siltage entering the stream; a determination of the capacity of the soils of the district to receive and hold waters from such reservoirs; the prospective income from the disposal of reservoired waters; the extent to which reservoired waters may be made available for public and private uses; and inquiry as to the return flow of waters placed in the soils from reservoirs; and as to their stabilizing effect on stream flow as a means of preventing erosion, siltage, and improving navigation."

The CHAIRMAN. The question is on agreeing to the committee amendment.

Mr. RAGON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Arkansas moves to strike out the last word.

Mr. RAGON. The first part of this section, as you have completed it, provides for flood projects on these different tributaries. Now, is it the committee's idea that these flood projects should be held back until after they have made surveys of the power potentialities, soil analysis, and the reclamation features of this bill, or is it the idea of this committee that these flood-control surveys shall progress independently, and that they will bring in the flood-control projects whether these other surveys are completed or not?

Mr. REID of Illinois. I am not doubtful about it.

Mr. RAGON. I do not believe you intend to have any such idea.

Mr. REID of Illinois. I do not have, and I do not intend to have.

Mr. RAGON. General Jadwin has suggested that perhaps these surveys under the House document mentioned here might require as long as five years, and in some cases 10 years.

Mr. REID of Illinois. It is intended that they shall have five years' protection, and in the meantime that the surveys will be expedited.

Mr. RAGON. Surveys for the flood projects?

Mr. REID of Illinois. For all the flood projects enumerated.

Mr. RAGON. Then it is your purpose, and the purpose of the committee, not to have them report on a flood project before they shall have a report on these other projects in the House document?

Mr. REID of Illinois. The committee's amendment contemplates flood-control projects authorized by this section, which takes in all the Mississippi Valley.

Mr. RAGON. Then I take it that the purpose of the committee is to develop these flood-control projects and bring them in at the earliest possible moment?

Mr. REID of Illinois. What the committee proposes and my notion is that as fast as one survey is completed it should be brought in here and acted upon by Congress. That is my idea.

Mr. RAGON. On the Arkansas it would delay a flood project for five years, if you awaited a report on the other projects.

Mr. REID of Illinois. Everyone has confidence in the President and in the Secretary of War and the engineers.

Mr. RAGON. I think the understanding that we have here ought to help the engineers in carrying out the provisions of the section.

Mr. REID of Illinois. I think the work should go on as fast as possible, and if you put in too many details you delay the progress.

Mr. RAGON. I am keeping details out of it. I would make it strictly a flood-control proposition.

Mr. SHALLENBERGER. So far as this particular point is concerned, this survey has no relation whatever to matters of reservoirs?

Mr. REID of Illinois. Oh, yes.

Mr. SHALLENBERGER. I can not find the word "reservoir" in it.

Mr. REID of Illinois. It is there.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Wisconsin is recognized.

Mr. COOPER of Wisconsin. The amendment contains no reference, apparently no provision, for surveys to determine the possible development of power.

Mr. REID of Illinois. That is provided for in the act of January 21, 1927, referring to power. But this is to expedite the flood control part of the act of January 21, 1927.

Mr. COOPER of Wisconsin. I was interested to learn why everything in the way of survey as to possible power was eliminated.

Mr. REID of Illinois. The act of January 21, 1927, was a power survey act.

Mr. COOPER of Wisconsin. In a great many printed statements that I have read it was suggested that the power interests would not permit a proposition to be enacted for surveys with a view to possible power development.

Mr. REID of Illinois. Nobody has tried to influence the committee in any way in regard to that.

Mr. COOPER of Wisconsin. There has been such a change here and such a careful elimination of reference to possible power development that to me it would look as though possibly some of these accusations were true. Otherwise why this careful omission of everything about power?

Mr. SINCLAIR. Mr. Chairman, will the gentleman yield?

Mr. COOPER of Wisconsin. Yes.

Mr. SINCLAIR. There is a sentence in the amendment which can be construed to mean that it would cover power surveys.

Mr. COOPER of Wisconsin. Will the gentleman read it?

Mr. SINCLAIR. It is in line 21, page 12 of the bill that I have here. It says:

> The prospective income from the disposal of such waters including both agriculture and power; they shall inquire as to the return flow value of waters placed in the soils from reservoirs, as to their stabilizing effect on stream flow as a means of preventing erosion and silting and improving navigation conditions, and shall determine to what extent reservoired waters may be available for municipal and domestic uses and to what extent reimbursive.

It is assumed that that would cover all propositions of reservoirs for power.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. BLACK of Texas. Mr. Chairman, may we have the amendment read again?

The CHAIRMAN. Without objection, the amendment will again be read.

The amendment was again read.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment offered by the gentleman from Illinois.

The Clerk read as follows:

> Page 10, line 15, after the word "authorized," insert the words "in section 1 of this act."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HOWARD of Oklahoma. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

> Amendment offered by Mr. HOWARD of Oklahoma: Line 20, page 10, after the word "section" insert "*Provided further*, That the flood surveys herein provided for shall be made simultaneously with the flood control on the Mississippi River provided for in this act, and if said surveys made on these tributaries shall disclose any flood-control project which in the judgment of the commission here provided for will be effective in controlling or assisting in controlling the floods on the Mississippi River, the said commission is hereby empowered, with the approval of the President, to include such flood-control projects as a part of the work of controlling floods on the Mississippi River, and there is hereby made available for such purpose or purposes any part of the moneys for flood control on the Mississippi River authorized to be appropriated by this act."

Mr. HOWARD of Oklahoma. Mr. Chairman and gentlemen of the committee, we of the tributaries appreciate very much the section that has been placed in this bill relating to them. We believe it is the most important section in this bill, and I am seeking by my amendment to make this section available, if the commission and the President of the United States shall find them of benefit to the entire people of the Nation.

Now, Mr. Chairman and gentlemen of the committee, there are many of us who yet believe that the control of the tributaries by reservoirs would be the economical and best means of controlling the Mississippi. All the way through the evidence before the Flood Control Committee has run the information that not only would reservoirs be economical but that they will do what is required.

Only yesterday you were shown here that reservoirs on these rivers would have reduced the flood in the Mississippi 17 feet last year and had the flood been reduced in the Mississippi 17 feet you would not have had the flood you are now attempting to take care of. Not only that, Mr. Chairman and gentlemen of the committee, but I am only trying to do in this amendment what we did yesterday when the suggestion of the chairman of this committee was adopted, as found on page 2, line 16, whereby we put it into the power of the President of the United States to select the plans that had been offered by either Jadwin or the Mississippi River Commission. Now, I am by this amendment simply offering the President and that commission another way and another plan to wholly or partly solve this problem, if the commission, in its judgment, reports such a plan to the President and the President approves of that plan. We are not appropriating another cent; we are not mentioning reservoirs in this amendment; we are simply broadening this act in order to give the President the opportunity, if he sees fit, to build a reservoir here or yonder and, perhaps, cut out some expensive spillways.

I want to say to my friends on the Democratic side of the House, if I may, that we hear it said the President may veto this bill if my amendment goes in; they have said that about every amendment that has been put into this bill, but we of the tributaries, who suffer just as much as you do, have voted for your amendments, and we were much surprised yesterday when you turned your backs on your allies. We hope you will not do it to-day. I hope the chairman will accept this amendment and only give us one other opportunity to economically control the floods on the Mississippi and at the same time control them for the people on the tributaries, who are just as much entitled to that control as the people on the lower Mississippi. [Applause.]

Mr. WINGO. Mr. Chairman, I would like to have the attention of the gentleman from Illinois [Mr. REID] and the other members of this committee. Now, gentlemen, we want the members of the Committee on Flood Control, as well as all Members of the House, to notice what this amendment does.

I challenge any man who is opposed to the whole bill to give any reason why he should oppose this amendment. It does not authorize the expenditure of another dollar; it does not authorize the creation of any new project; all on earth it does, gentlemen—and it does not mention reservoirs—is that the surveys which are being made on these tributary projects shall be carried on simultaneously with the principal work. Listen:

> *Provided further*, That the surveys herein provided for shall be made simultaneously with the flood-control work on the Mississippi River provided for in this act.

Remember, now, that this must not only be recommended by the engineers but must be approved by the President. And if those surveys—do what? If those surveys made on these tributaries—

> shall disclose any flood-control projects which, in the judgment of the commission herein provided for, would be effective in controlling or assisting in controlling floods on the Mississippi River, the said commission is hereby empowered, with the approval of the President, to include such flood-control projects as a part of the work of controlling floods on the Mississippi River.

In other words, what does it do? Gentlemen, you may be against the whole bill and yet you can vote for this amendment, and the committee which reported this bill can vote for it,

because what does it do? It meets the very objection that was brought out in the colloquy between the chairman of the committee [Mr. REID] and my colleague [Mr. RAGON] a while ago. The gentleman from Illinois said that if the amendment he had offered was not definite enough to prevent these long delays he would be willing to accept an amendment which would cover that. This amendment does it.

Let us look at the amendment which has just been adopted by the committee. Turn to page 7031 of the RECORD and I will show you that this amendment is vitally necessary, if you do not want to make the people in those parts of the Red River and the Arkansas River, who stood the major part of the losses of life and of property—if you do not want to make them wait, in the language of the engineers, from 5 to 10 years before we get any report on their projects, then you must adopt this amendment. Turn to the RECORD and I will prove my assertion. Turn to the RECORD, page 7031, and look at the amendment you have just adopted, and to which this amendment is a proviso. It comes in the bill at page 20. Now, listen:

And the reports thereon—

I am reading from the amendment, along about the middle of the first column on page 7031.

And the reports thereon—

What reports? The reports on these tributary projects—

shall include—

What?

shall include the effect on the subject of further flood control of the lower Mississippi River to be attained through the control of the flood waters in the drainage basins of the tributaries by the establishment of a reservoir system; the benefits that will accrue to navigation and agriculture from the prevention of erosion and siltage entering the stream; a determination of the capacity of the soils of the district to receive and hold waters from such reservoirs; the prospective income from the disposal of reservoired waters; the extent to which reservoired waters may be made available for public and private uses; and inquiry as to the return flow of waters placed in the soils from reservoirs; and as to their stabilizing effect on stream flow as a means of preventing erosion, siltage, and improving navigation.

This is to be accomplished through investigations which the Army engineers say will take from 5 to 10 years. Now, you have just adopted an amendment which says to the engineers, "You can not bring in these flood-control projects on the Arkansas and the Red Rivers until you do"—what? "Until you include in them certain data which it will take you years to prepare."

It will take from 5 to 10 years to get it. Gentlemen, it is vital to us on the Arkansas and Red to put in this amendment. Whatever side you are on, whether you are with the President or against the President, you certainly can agree to this proviso going into the bill.

If they are going to have these surveys of the tributary projects, in the name of fairness, ought you not to provide that they carry on the work simultaneously with respect to these projects, and in doing this, if they do find that any of these projects will be effective in assisting in your major project, then the engineers, with the approval of the President, certainly should be authorized to carry on that work and coordinate it.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. RAGON. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. DENISON. Will the gentleman yield?

Mr. WINGO. Yes.

Mr. DENISON. The gentleman is ordinarily very cautious about entering upon great projects of this kind. Does not the gentleman think it would be unwise for Congress to instruct any of its representatives to enter upon a proposal of this kind without knowing anything about what it is going to cost?

Mr. WINGO. Listen—you do not do that.

Mr. HOWARD of Oklahoma. Did you not do that yesterday?

Mr. DENISON. Oh, no.

Mr. HOWARD of Oklahoma. Yes; you did.

Mr. WINGO. You do not do that under this provision any more than you have already done it, because the authorization goes back to and is limited by the exact provision to the sum you have authorized as part of the original appropriation in section 1 of the bill.

Mr. DENISON. Yes; that is for the surveys, but this amendment will instruct the President, or authorize the President and the Secretary of War, to enter upon this program if they find from this survey that control of the tributaries will aid in the control of the floods, and so forth.

Mr. HOWARD of Oklahoma. Is not that also true with respect to the New Madrid project in which the gentleman is interested?

Mr. DENISON. Suppose the survey should show that the cost would be two or three billion dollars; does not the gentleman think Congress ought to reserve the right to decide at a later date whether we should enter upon the project or not?

Mr. WINGO. My friend, all of us might agree in the abstract to the proposition the gentleman has just laid down. We can suppose any kind of proposition, but with my knowledge of the President of the United States, his whole fight is to do what? To guard against the thing you point out as a possibility, and you tell me that by this amendment I will authorize the President to do something that is the very basis of his opposition to the proposition. I can not conceive of that.

Mr. DENISON. But if we adopt the amendment we instruct him to go ahead with it whether he wants to or not.

Mr. WINGO. Not only have the Army engineers got to approve but they have got to say that it is a necessary part of the work that you authorize them to do upon the Mississippi; and, in addition to this, the President of the United States has got to do it. My friend, I have great admiration for the President of the United States——

Mr. DENISON. I understand——

Mr. WINGO. Let me finish. I have great sympathy with his desire and his sense of responsibility to protect the Treasury against extravagant expenditures. I would not support this amendment until the gentleman from Oklahoma wrote upon the margin in pencil that it had to be approved by the President of the United States.

All on earth I ask you to do, my friends, is not to say positively as you have already done that we on the Arkansas and the Red shall have to wait from 5 to 10 years before Congress will even consider what the engineers may recommend.

We only ask you to say this much. If the engineers find that by going up a little farther on the Arkansas, the Red, the Missouri, the White, the Ohio, and all the others, it will aid and be necessary and effective in the Mississippi River project proper—then if the engineers so find, what is the President of the United States to consider or what will he say? He will say, "If it is not too extravagant, if it is not too expensive, if the engineers are ready, then I will approve it." They can not spend one dollar under this amendment unless the President of the United States O. K'd the finding and directed that it be done.

I have appreciated the difficulties that confront you, but it is a serious thing to those of us on the Arkansas and the Red and some of the other rivers. It is uncontradicted by the record that the major part of the loss of property and of life in Arkansas was outside of the backwaters down there on the Mississippi River. We have gone along and we have tried to be reasonable. We at first thought we ought to be a part of the original project, but when you refused that and said we must survey the tributaries first, then we said, "All right; of course, you have got to have surveys made," but just a moment ago what have you done? You have said that these reports of these surveys shall include certain things which the engineers have told you they can not get under 5 or 10 years, and this means, so far as this bill is concerned, if you do not adopt my amendment the tributaries get absolutely no assurance in this bill. [Applause.]

Mr. SNELL. Mr. Chairman, this is exactly the same proposition, although couched in a little different language, that was before the committee on yesterday. I am not speaking against the adoption of this amendment at this time as a man who is opposed to the reservoir scheme, because I am one of the men in this House who has always believed in the reservoir scheme. However, I am opposed to this amendment at this time, for this reason: It transfers to the President of the United States a larger power than has ever been transferred to him since I have been a Member of Congress or has ever been even suggested, and some of the people who are now proposing this amendment have guarded most earnestly the power of the House at all times in the past, and generally would be the first to object to any such wholesale transfer of power.

This is not a small proposition. This is bigger than the main proposition contained in the bill itself, and here it is proposed to adopt it as a simple amendment without consideration or information. Every investigation that has been made by Army engineers or by private engineers admits that the cost of proper river regulation controlled by a reservoir system will go into billions of dollars.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. SNELL. Not just now. I am not sure that it will not pay, but when these examinations are made and when the recommendations are ready, I want them submitted to this House to let us pass upon them in the usual way. Give them the consideration matters of such importance are entitled to receive. Perhaps the cost will be so out of proportion that Congress would not consider it at all. No man would think of giving such authority to any executive, and I am mighty sure no executive would want it.

Now I yield to the gentleman from Oklahoma.

Mr. HOWARD of Oklahoma. Has the gentleman any record where the private engineers have made an estimate that this will cost billions of dollars?

Mr. SNELL. No; but I know that estimates have been made running into a tremendous sum and the estimates of the Army engineers go over a billion dollars.

The gentleman from Oklahoma said that this was the same power given the President in the early part of the bill. I do not so understand it. We gave power to the commission of which the President is a member or has a member to simply synchronize the conditions between the two plans now before Congress; that is all the power we gave him. We did not give him power to adopt anything new.

Mr. HOWARD of Oklahoma. The gentleman would accept the amendment as to the work going on at the same time the Mississippi flood-control work is going on?

Mr. SNELL. I have no objection to that part of the amendment, but at the same time I am opposed to so amending the bill as to put anyone in the power of pledging the country to a billion-dollar expense without the approval of Congress, and I am a friend of flood control.

Mr. HOWARD of Oklahoma. The reservoirs are not mentioned in my amendment. They might find that spillways would do the work. We can show a place on the Red River where with a spillway of 10 miles they can turn all the water away from the Red River.

Mr. SNELL. The gentleman's amendment authorizes the adoption of any project that this commission and the President may see fit to adopt. It makes no difference what it is if it can aid flood control, and it makes no difference what it costs. There is no doubt but that it may aid in flood control, yet I am opposing the granting authority to adopt a blanket proposition.

Mr. DENISON. I have never heard any doubt by the engineers that it would aid in flood control.

Mr. SNELL. No man knows how far afield it would go and I think it would be a very foolish policy to adopt the amendment at this time. I say to you people who live in the Mississippi River Valley that it is going to be a serious proposition for your flood control if this amendment is adopted.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SNELL. I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WHITTINGTON. Will the gentleman yield?

Mr. SNELL. I yield.

Mr. WHITTINGTON. The last part of the proposed amendment to which the gentleman objects and which I understand the gentleman from Oklahoma is willing to modify or withdraw is that provision which would make available for construction of any project the entire authorization of this bill; they could authorize the expenditure of $325,000,000 carried in the bill, and more, without a report to Congress?

Mr. SNELL. If they saw fit to do so they could spend every dollar up in Arkansas on the Arkansas River.

Mr. HOWARD of Oklahoma. Could not they spend every dollar of the money on the gentleman's project up in Cairo?

Mr. SNELL. I think not, because this is a definite project, and it is a small amount.

Mr. WHITTINGTON. This bill authorizes the expenditure of $110,000,000 to $150,000,000 in aid of navigation. If this amendment is adopted the $110,000,000 or $150,000,000 that is provided for the aid to navigation could be utilized for reservoirs?

Mr. HOWARD of Oklahoma. The money provided to protect Mississippi by the unnecessary spillways could be expended for reservoirs.

Mr. SNELL. I want to make it clear to the House what you are doing, if you adopt the proposed amendment. You are authorizing and committing the Government to the reservoir proposition without any definite plan whatever. You could not demand that it be brought back here before the money could be expended on that plan. You are voting for a pig in a bag, for nobody knows anything about it at the present time. It would absolutely destroy the purpose of the original bill.

Mr. HOWARD of Oklahoma. Is not the gentleman insisting that we are voting for a pig in a bag upon the whole bill?

Mr. SNELL. Not entirely. I am an earnest supporter of flood control and have been earnestly endeavoring to bring it about. This bill does not wholly meet with my approval, but on the whole it has many good features.

Mr. RAGON. Will the gentleman yield?

Mr. SNELL. I will.

Mr. RAGON. The gentleman would not object to the provision which provides for surveys to commence at the same time the work on the other surveys is begun?

Mr. SNELL. I do not object to that part of the amendment if all the rest is cut out, so far as I am individually concerned, because I am a friend of the general proposition; but I am bitterly opposed to adopting a proposition of that kind without knowing what we are doing. It is important that it should come back to Congress and that Congress should act upon it at that time.

Mr. RAGON. Suppose they should make this survey and it should develop that it was not any more expensive; might it not be a good thing to adopt that?

Mr. SNELL. It might be; but let it come back and be brought before the House and let us definitely discuss it at that time.

Mr. RAGON. That would suit me exactly; but that is not what we have before us.

Mr. SWANK. Mr. Chairman and gentlemen of the committee, on the 5th day of January, 1928, I called your attention to the necessity of enacting legislation on flood control, and stated that this subject and farm relief would be the leading measures for our consideration during this session of Congress. We now have a bill for the control of floods on the Mississippi River and its tributaries before us, and next week we will consider a farm relief bill. If these two bills are enacted into law, this session will go down in history as one of the most important Congresses ever assembled in this country. Nothing is now engaging the attention of the country as are these two bills, and they affect the country as a whole. These bills are not sectional nor political. The Committee on Flood Control has done most important and industrious work in framing a bill for our consideration, and if enacted into law will be of great benefit to our people, and will do much to prevent disastrous floods in the future and the destruction of life and property.

When we consider the fact that the floods last summer in the Mississippi River system affected 31 States of this Union, 41 per cent of the total area of the United States, covered 12,500,000 acres of good land, made 600,000 citizens homeless, and damaged property to the extent of more than $400,000,000, it is time that a solution in the control of these flood waters be found, or at least that the best possible start be made. In addition to this great destruction interstate commerce was interfered with and our mail suspended, and all of these items taken into consideration, it has become a national problem commanding the best attention of our ablest minds.

Mr. Chairman, the report of the Committee on Flood Control shows that in my own State of Oklahoma damage was done by this flood to the extent of more than $20,000,000 on the Arkansas River and its tributaries alone. In addition to this damage we also suffered greatly from the floods on the Red River and its tributaries. The evidence presented to the committee shows that if these flood waters are controlled on the tributaries that it will affect the flow on the Mississippi. If these waters are held back from the Mississippi, it will decrease the floods on that river. It is just as important and necessary to have the floods controlled on these streams, to protect life and property, as it is on the lower Mississippi, and the committee recognizes that fact. In the Sixty-eighth Congress I introduced a bill for a survey on the South Canadian, North Canadian, Cimarron, and other rivers in Oklahoma for flood-control purposes. Provision for these surveys was in the bill that was enacted into law and appoved May 31, 1924. The Arkansas River was also included, and provision for the Red River in Louisiana, Arkansas, Oklahoma, and Texas was included later. This was the beginning, and we now have the opportunity before us for real legislation looking to the control of these floods, and if this bill becomes a law we will afford our people real assistance.

When we study the question and look to the destruction caused on these streams last year, consider the evidence presented to the committee, we must come to the conclusion that the levee system alone will not do the work, but that the headwaters must also be controlled and prevented from entering the Mississippi during flood seasons. This can be accomplished by the use of reservoirs and storage basins in connection with

the other plans. In so far as flood control alone is concerned, I believe the entire cost should be borne by the Federal Government, for it is a Federal question and affects all our citizens. All the money will not be spent in any one year, but sufficient appropriations should be made each year to carry the plans to completion just as speedily as possible. Whatever the entire cost may be, it will be spread out over a number of years.

This bill creates a board consisting of the Secretary of War, the Chief of Engineers, the president of the Mississippi River Commission, and two civil engineers chosen from civil life, to be appointed by the President, by and with the advice and consent of the Senate. The bill provides for work on the Mississippi and provides that all diversion work and outlets constructed shall be built in a manner which will amply protect the adjacent lands as it is protected by levees on the main river. The bill authorizes an appropriation of $325,000,000 and provides that just compensation shall be paid by the United States for all property taken, damaged, or destroyed in carrying out the plan in the bill. Five million dollars is authorized to be appropriated as an emergency fund for rescue work or in repair or maintenance of any flood-control work on any tributaries of the Mississippi River threatened or destroyed by flood. This is an excellent provision of the bill.

The bill provides that projects for flood control on all tributary streams of the Mississippi River system subject to destructive floods shall be prepared and submitted to Congress at the earliest practicable date. Under the terms of the bill these projects shall include the following: The Red River and tributaries, the Arkansas River and tributaries, in addition to tributaries in other States. This provision includes the South Canadian, North Canadian, Cimarron, Washita, and other rivers in Oklahoma, and $5,000,000 is authorized in the bill in addition to the amounts authorized in the rivers and harbors act of January 21, 1927, for the preparation of the flood-control projects authorized in the bill in reference to these tributaries.

The bill provides that the President shall at once proceed to ascertain, through the Secretary of War or other agency, the extent to which floods in the lower Mississippi Valley may be controlled by a reservoir system. Under this provision the agencies shall invite the aid of State engineers, university and technical men, and State officials. These studies shall include the effect on flood control in the lower Mississippi River in the drainage basins of its tributaries by the establishment of a reservoir system, the benefits that will accrue to navigation, agriculture, and power, and kindred questions.

The bill also provides that as soon as the studies of reservoirs shall have been completed and approved by the Secretary of War or other agency, with definite estimates of cost and working data, they shall be reported by the Secretary of War or other agency to the President of the United States, with all related findings and conclusions, and on his order the Secretary of War or other agency shall proceed with the construction of such reservoirs as soon as money is available for such purposes, provided the President concludes that such construction will have a substantial and beneficial influence in the control of floods on the navigable waters of the lower Mississippi Valley, and is economically justifiable. Provision is made that when any reservoir is completed the Secretary of the Interior shall have authority to dispose of any impounded waters, under rules made by him and approved by the President.

Mr. Chairman, the bill provides that aid shall be asked of State engineers and university men, and that is a most excellent provision, for the board will certainly consider recommendations made by such engineers who are just as able as those employed as Army engineers or by any other department of our Government. This aid would not be asked and then disregarded. By this provision, and other provisions in the bill, I feel that we will make a real start by the enactment of this bill into law. Testimony and estimates by competent and reliable engineers were presented to the committee during the hearings on this bill, that showed that 200 reservoirs and storage basins could be constructed in Colorado, New Mexico, Texas, Kansas, and Oklahoma at a cost of $130,000,000, which reservoirs would make the Arkansas and Red Rivers harmless during the flood seasons, and which would prevent this water from flowing into the Mississippi to such an extent as to affect the floods on that river. This would not only relieve the States mentioned but would also greatly assist in controlling the floods on the lower Mississippi.

The committee report says that in the consideration of any comprehensive plan of flood control on the Mississippi River, it is almost elemental to state that regard must be given to the contributory effect of the tributaries. The report says:

> Nor is there any lack of expression on the part of eminent engineers of wide and extensive experience to the effect that an investigation of the flood problem on the Mississippi River, that is limited in scope to the application of suggested works along that river and its contiguous banks, can not be classed as an intelligent and thorough treatment of the subject.

This report further says:

> The ultimate solution of the flood problem of the valley must include as well the possible use of flood-control works on these tributaries at their source or between their source and mouth. In the 1927 flood the tributaries contributed more than three-fourths of the flood waters.

The committee says that it is of the opinion that the floods of the lower Mississippi Valley can be controlled by impounding the headwaters of the tributaries, and that if this can be accomplished at a cost not in excess of other proposed plans, the resulting benefits will be far greater, not only to the lower valley but also to all the territory adjacent to the location of the various reservoirs.

The committee report makes the following statement:

> The engineering profession, including civil and Army, are in accord on the theory that the ideal method of controlling floods is through the use of reservoirs by means of which waters are impounded and controlled in the source streams.

I believe a careful study of the evidence given the Committee on Flood Control during its extensive hearings, will convince any reasonable person that the construction of reservoirs will greatly relieve floods on the Mississippi and that the cost will be a small item when compared to the destruction of life and property by floods in the Mississippi River system. Many times in the past Congress has made large appropriations for the assistance and relief of our people, and let us not adjourn this Congress without an adequate law for relief from these disastrous floods. We should do everything that we possibly can do, that such destruction will never happen again.

As the levee system has failed in the control of these great floods and in the relief of our citizens, let us try spillways and reservoirs in connection with the levee system. Remember that the people in the States affected by the floods on the tributaries are just as much entitled to protection as are those who live upon the Mississippi proper. The legislation should apply to all our people alike and not alone to those of one section. The evidence shows that this plan is feasible and workable. There are changes that I would make in the bill, but this will be a good beginning and amendments can be added later as they become necessary. It is impossible to get everything that each Member of Congress would like to have in the bill, and I believe the plan outlined in the bill now under consideration should be tried. I am interested in the work on the lower Mississippi, and am especially interested in having the tributaries also protected. I hope the bill will soon be passed by both Houses of Congress and that the President will approve the measure, that work may be commenced in the near future for the protection of the people of this country. [Applause.]

Mr. WILLIAM E. HULL. Mr. Chairman, so far I have not said anything with reference to this bill, and I shall confine my remarks now to this point. This bill, so far as it has gone, is a good bill. The amendments that have been put in the bill are satisfactory to the administration.

Mr. FREAR. Just a moment——

Mr. WILLIAM E. HULL. Not you. I am talking about the administration.

Mr. FREAR. Will the gentleman yield?

Mr. WILLIAM E. HULL. No.

Mr. FREAR. That statement is not correct.

Mr. WILLIAM E. HULL. I do not yield. This bill has been amended along lines as has been stated that will meet the approval of the President of the United States. So far we have avoided any loopholes or any amendments that might cause the bill to fail. You people of the South must realize that you are now going toward a proposition that gives you flood control. Reservoirs are a part of flood control. Reservoirs will assist flood control, but the very fact that all of the reservoir part of this bill was taken out because those of us who are interested in flood control realize that if we put it in we would have the bill killed, ought to have some weight with you gentlemen now, and I beg of you men, Republicans as well as Democrats, to kill anything further with reference to any kind of an amendment that has not been acted upon and approved by the committee which has worked so hard to bring this bill on the floor in a proper manner.

I say to the Republicans of the House that I believe, as far as this bill has gone, with the present amendments, that the bill is a good bill. I do not believe that anyone belonging to the Republican Party can afford to vote against the bill, but I am opposed to putting in amendments that will endanger its passage and the signature of the President of the United States. I hope that you will vote this amendment down.

Mr. FREAR. Mr. Chairman, I have never assumed to speak for the administration. I am sure that a gentleman who has not been on the committee, who has not been in sympathy with part of the measure relating to method of acquiring flood ways that we have tried to put through—and I know that Mr. TILSON and the administration have tried to put it through—can not speak for the administration at this time when he says that the administration is in favor of this bill as it stands. We feel that the large proposition in the bill is the question of the purchase of lands. I am not expressing any opinion on this as to the attitude of the administration. Everyone has a right to use his own judgment, but the bill is not satisfactory. I do not believe it is satisfactory to the administration. That is the reason that the motion to recommit will be offered. Otherwise, it would be a useless performance to offer it.

Mr. WINGO. Mr. Chairman, I am going to offer the following substitute for the pending amendment, and I think it can be accepted by all:

*Provided further*, That the flood surveys herein provided for shall be made simultaneously with the flood-control work on the Mississippi River provided for in this act.

That is not what I think we ought to have; but if it is the best we can get, with the present temper of the House, we will take that.

Mr. SNELL. Ask to withdraw the other amendment.

Mr. WINGO. Will the gentleman from Oklahoma accept that substitute?

Mr. HOWARD of Oklahoma. Yes.

Mr. WINGO. Mr. Chairman, I ask unanimous consent to substitute this proposition just read for the pending amendment.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The question is on the substitute.

Mr. WHITTINGTON. Mr. Chairman, I ask that the amendment as substituted be reported.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

*Provided further*, That the flood surveys herein provided for shall be made simultaneous with the flood-control work on the Mississippi River provided for in this act.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. WINGO. Mr. Chairman, it is thought that this is the best we can get, and we shall have to take it.

Mr. HASTINGS. Mr. Chairman, I want to say just one word further. I believe the amendment of my colleague [Mr. HOWARD] ought to have been adopted by this House. I believe it would strengthen this bill. I believe that it would not incur the displeasure of the President. I think it would strengthen this bill on the final vote in this House, and in the event of the President's disapproval I think it would strengthen the bill then. Other Members on the floor of the House who are friends of flood-control legislation think differently, and in these circumstances, against my judgment, I am willing to yield to them.

We are in a desperate situation up on these tributaries. We have suffered tremendously. A great many Members of this House do not know how much damage we have suffered upon the Arkansas River. We have suffered there, and they have suffered upon the Missouri, and on other tributaries of the Mississippi River almost if not quite as much as those on the lower reaches of the Mississippi River. We have the advice of some of the best civil engineers in the country, and they are of one opinion and agree that the reservoir plan will aid flood control on the lower Mississippi and at the same time it will help us upon the main tributaries, including, of course, the Arkansas River and its contributing streams.

This amendment embodies what we have been asking for. This amendment is what we want. We believe that this work ought to go forward simultaneously. We are trying to offer an additional and supplemental method of flood control. We have been trying for a hundred years the levee system on the lower Mississippi, and it has been inadequate. You are now going to try your levee system and your spillway system. All that my colleague asked for in his amendment was to give to the Board of Engineers and the President of the United States, provided it was acceptable to the President, the right to try out this other method. Suppose that in the investigation that is to be made it is found that flood control on the lower Mississippi can be more adequately and more effectively and more economically obtained by the reservoir plan—all that this amendment does is, if the President approves the project, to provide that it may go forward out of the money authorized to be appropriated in this bill. The substitute amendment helps to the extent that it expedites the work. The original amendment as offered would proceed with each project as and when approved by the President.

The CHAIRMAN. The question is on agreeing to the amendment to the amendment.

Mr. HOWARD of Oklahoma. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. HOWARD of Oklahoma. Mr. Chairman and gentlemen of the House, as explained by my colleague from Oklahoma [Mr. HASTINGS], we have seen fit to accept this substitute, although we do not think it is all that we on the tributaries are entitled to. However, we have accomplished by the offering of this amendment, if you adopt this substitute, a thing the lack of which has handicapped flood control on the tributaries all these years. By forcing those in authority to now, under this amendment, go to work instead of stalling off the people of the tributaries by reason of not having authority and instructions on the subject we have made a very considerable gain in our fight for flood control on the tributaries.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Arkansas [Mr. WINGO] to the amendment offered by the gentleman from Illinois [Mr. REID].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. HOWARD of Oklahoma. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 151, noes, 0.

So the amendment to the amendment was agreed to.

The CHAIRMAN. The question now recurs on the amendment of the gentleman from Illinois as amended.

The question was taken, and the amendment as amended was agreed to.

Mr. LEAVITT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Montana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEAVITT: Page 10, after the amendment of Mr. WINGO just adopted, insert as a further provision: "The President shall proceed to ascertain from the Secretary of Agriculture the extent to and manner in which the floods of the Mississippi Valley may be controlled by proper forestry practice."

Mr. LEAVITT. Mr. Chairman, the purpose of this amendment is not to add the expenditure of a single cent under the appropriations provided in this bill. It has this purpose, however, that there shall be written into this measure, which is the greatest and most important flood-control measure ever considered by this Congress, and thus into the national policy, an acceptance of the principle that any flood-control plan to be final and ultimately effective, must include forestry practice at the heads of all streams involved. It adds only one thing, that the President shall proceed to secure information from the Secretary of Agriculture, under whose supervision comes the Forest Service and other agencies having correct and scientific information in regard to the forestry problem, and to coordinate and consider that information in connection with this entire effort to control the floods of the Mississippi River.

We have at the present time the Clarke-McNary law, and the Weeks law, and we have the McSweeney-McNary bill and the McNary-Woodruff bill now in process of enactment; to authorize the appropriations necessary to do this work. But we need to have the problem studied in connection with flood control in order that the steps taken may be most constructive and that they may prove most valuable and effective in connection with the Mississippi River floods, and especially that forestry may be given its proper place in the ultimate plans of all flood control.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Montana.

The question was taken; and on a division (demanded by Mr. DRIVER) there were—ayes 112, noes 22.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 11. That the Secretary of War shall cause the Mississippi River Commission to make an examination and survey of the Mississippi River below Cape Girardeau, Mo., (a) at places where levees have heretofore been constructed on one side of the river and the lands on the opposite side have been thereby subjected to greater overflow, and where, without unreasonably restricting the flood channel, levees can be constructed to reduce the extent of this overflow, and where the construction of such levees is economically justified, and report thereon

to the Congress as soon as practicable with such recommendations as the commission may deem advisable; (b) with a view to determining the estimated effects, if any, upon lands lying between the river and adjacent hills by reason of overflow of such lands caused by the construction of levees at other points along the Mississippi River, and determining the equities of the owners of such lands and the value of the same, and the commission shall report thereon to the Congress as soon as practicable with such recommendation as it may deem advisable: *Provided*, That inasmuch as the Mississippi River Commission made a report on the 26th day of October, 1912, recommending a levee to be built from Tiptonville, Tenn., to the Obion River in Tennessee, the said Mississippi River Commission is authorized to make a resurvey of said proposed levee and a relocation of the same if necessary, and if such levee is found feasible, and is approved by the board created in section 1 of this act, the commission is authorized to build same out of appropriations hereafter to be made.

The CHAIRMAN. The gentleman from Illinois offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. REID of Illinois: Page 11, line 22, after the word "act" strike out the words "the commission is authorized to build same," and insert in lieu thereof the words "and by the President, the same shall be built."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

Mr. REID of Illinois. Mr. Chairman, section 12, as it originally appeared in the bill, is now unnecessary, the same subject matter being included in the amendment which I put in section 10 in regard to reservoirs. I ask unanimous consent to consider that section as stricken out.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to withdraw the committee amendment incorporating section 12 in the bill. Is there objection?

There was no objection.

The Clerk read as follows:

SEC. 12. All laws or parts of laws inconsistent with the above are hereby repealed.

The CHAIRMAN. Without objection the numbers of the sections will be made to conform with the action of the committee.

There was no objection.

The CHAIRMAN. The Chair desires to make a statement. Earlier in the afternoon he was notified of an amendment which was sought to be offered at this point in the bill but the Chair for the moment does not recall who made the suggestion. This is the time to offer the amendment in the event it is desired to do so.

Mr. GREEN. Mr. Chairman, I have an amendment I desire to offer after section 14. That section will be read later on.

The CHAIRMAN. Surely. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On page 14, after line 4, insert:

"SEC. 14. That the project for the control of floods in the Sacramento River, Calif., adopted by section 2 of the act approved March 1, 1917, entitled "An act to provide for the control of the floods of the Mississippi River and of the Sacramento River, Calif., and for other purposes," is hereby modified in accordance with the report of the California Débris Commission submitted in Senate Document No. 23, Sixty-ninth Congress, first session: *Provided*, That the total amounts contributed by the Federal Government, including the amounts heretofore contributed by it, shall in no event exceed in the aggregate $17,600,000."

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. Without objection, the correction of the number of the section will be made.

There was no objection.

Mr. GREEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Florida offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GREEN: On page 14, after line 15, insert a new section, as follows:

"SEC. 15. The sum of $10,000,000 is hereby authorized to be appropriated for the control of floods in the Florida Everglades."

Mr. REID of Illinois. Mr. Chairman, I make a point of order against the amendment.

Mr. GREEN. I will ask the gentleman to reserve his point of order.

Mr. REID of Illinois. Mr. Chairman, I will reserve it.

Mr. GREEN. Mr. Chairman, I would like to say to my colleagues that the State of Florida at its last legislature authorized a bond issue of $20,000,000, and if $10,000,000 is appropriated by the Congress it would bring flood control in the Florida Everglades on a parity with flood control in the Sacramento Valley.

I would like to advise my colleagues that inasmuch as 31 States are benefited by flood control in the Mississippi River, and, as we acknowledge, it is a national problem, and as we are supporting it as such, it seems to me reasonable that we should consider the flood which was in the Florida Everglades only a few months ago. You have read of the destruction of life and property there, and it seems to me it is a problem which should be coped with by our National Government.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. GREEN. I gladly yield to the gentleman from New York.

Mr. WAINWRIGHT. I would like to ask the gentleman, and ask some other gentlemen, what the Sacramento River and the Everglades of Florida have to do in a Mississippi River flood control bill?

Mr. GREEN. I will say to the gentleman from New York that the State of California and the State of Florida and other States of the Union contribute to our Government the same as the 31 States in the Mississippi Valley, and I believe we ought to get in on this problem the same as the Mississippi Valley. [Laughter and applause.] I am in favor of this flood control, and I expect to vote for it. It is a national problem and we should treat it as a national problem. Likewise we should treat the Sacramento Valley and the Florida Everglades problem in a national way.

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. REID of Illinois. Mr. Chairman, I make the point of order.

The CHAIRMAN. The Chair is ready to rule.

The bill as originally reported to the House dealt solely with the control of floods on the Mississippi River and its tributaries. An amendment was submitted by the committee, incorporated in section 14, for the control of floods on the Sacramento River, Calif. This amendment was clearly subject to a point of order, but no point of order was made, and now it is in the bill.

The bill now contains two similar projects to control floods in two different sections of the country. It is a well-known rule of germaneness that where there are two similar projects, a third project may be added by a germane amendment. For instance, where two Territories are admitted to the Union, an amendment to admit a third Territory is in order. In the same way where authority is given for the construction of buildings in two cities it is perfectly in order to put in an amendment for a building in a third city. For this reason the amendment is in order and the point of order is overruled.

The question is on the amendment offered by the gentleman from Florida.

The question was taken; and on division (demanded by Mr. GREEN), there were—ayes 25, noes 117.

So the amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, I have an amendment which I have sent to the Clerk's desk.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: On page 14, after line 15, add the following as a new section:

"SEC. 14. In every contract or agreement to be made or entered into for the acquisition of land, either by private sale or condemnation, as in this act provided, the provisions contained in section 3741 of the Revised Statutes, being section 22 of title 41 of the United States Code, shall be applicable."

Mr. LAGUARDIA. Mr. Chairman, this simply makes applicable the provisions of the Revised Statutes—section 3741—to all agreements and contracts for the acquisition of land, either by private sale or by condemnation. The provision is very short, being section 22 of title 41 of the United States Code. That is the public contract law. I will read it:

In every contract or agreement to be made or entered into or accepted by or on behalf of the United States, there shall be inserted an express condition that no Member of (or Delegate to) Congress shall be admitted to any share or part of such contract or agreement or to any benefits to arise thereupon.

I am sure no one can object to making the provisions of the Revised Statutes applicable to this law.

Mr. GRIFFIN. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. GRIFFIN. Would not that provision of law apply in any event?

Mr. LAGUARDIA. No; this is just with respect to public contracts.

Mr. GRIFFIN. Would not that apply without the enactment of this amendment?

Mr. LAGUARDIA. I do not think so, because this is a provision with respect to public contracts, chiefly for the purchase of departmental supplies, and it would not be applicable to this bill. I will say to the gentleman from New York that in order to make the provisions of this section applicable, we ought to insert my amendment in the bill. Surely it will carry out the purpose. I am sure every Member of the House is in sympathy with the provision of the Revised Statutes and that it should be made applicable to this bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was agreed to.

Mr. REID of Illinois. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Under the rule, the previous question is ordered on the amendments. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The amendments were agreed to.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, and was read the third time.

Mr. FREAR rose.

The SPEAKER. For what purpose does the gentleman from Wisconsin rise?

Mr. FREAR. For the purpose of offering a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. FREAR. I am.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk began the reading of the motion.

Mr. FREAR. Mr. Speaker, unless the House desires to have the motion read, I will say that it is the same that was offered by the gentleman from Connecticut.

Mr. BANKHEAD. Let the motion be read.

The Clerk continued the reading.

Mr. McKEOWN. Mr. Speaker, I ask unanimous consent that the reading of the motion be dispensed with.

Mr. FREAR. I object.

Mr. BANKHEAD. Mr. Speaker, I interposed an objection thinking that the gentleman from Wisconsin had a specific motion. I did not expect that he was going to have the whole bill read. I think the House would agree to let the gentleman state what his motion involves.

Mr. FREAR. I have already made a brief statement that this was an agreement supposed to have been reached with the Attorney General and the delegation that went to the White House. It differs slightly in some respects from the provisions of the bill. The question of the acquirement of property is the main proposal. It strikes out the Bonnet Carre spillway and the provision in relation to the New Madrid flood way which was discussed and carried by the House last night, so that is not involved.

The SPEAKER. Is there objection?

Mr. GRIFFIN. Mr. Speaker, a parliamentary inquiry. In the event that the unanimous consent is given to dispense with the reading will the motion be printed in the RECORD?

The SPEAKER. It can be printed in the RECORD.

Mr. GRIFFIN. I ask unanimous consent that it be printed.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. Is there objection to dispensing with the reading of the motion?

There was no objection.

The following is the motion to recommit:

Mr. FREAR moves to recommit the bill to the Committee on Flood Control with instructions to report the bill back forthwith, and in lieu of S. 3740 insert the following:

"That the project for the flood control of the Mississippi River in its alluvial valley and for its improvement from the Head of Passes to Cape Girardeau, Mo., in accordance with the engineering plan set forth and recommended in the report submitted by the Chief of Engineers to the Secretary of War dated December 1, 1927, and printed in House Document No. 90, Seventieth Congress, first session, is hereby adopted and authorized to be prosecuted under the direction of the Secretary of War and the supervision of the Chief of Engineers: *Provided*, That a board to consist of the Chief of Engineers, the president of the Mississippi River Commission, and a civil engineer chosen from civil life to be appointed by the President, by and with the advice and consent of the Senate, whose compensation shall be fixed by the President and be paid out of the appropriations made to carry on this project, is hereby created; and such board is authorized and directed to consider the engineering differences between the adopted project and the plans recommended by the Mississippi River Commission in its special report dated November 28, 1927, and after such study and such further surveys as may be necessary, to recommend to the President such action as they may deem necessary to be taken in respect to such engineering differences, and the decision of the President upon all recommendations or questions submitted to him by such board shall be followed in carrying out the project herein adopted. The board shall not have any power or authority in respect to such project, except as hereinbefore provided. Such project and the changes therein, if any, shall be executed in accordance with the provisions of section 8 of this act: *Provided*, That all diversion works and outlets constructed under the provisions of this act shall be built in a manner and of a character which will fully and amply protect the adjacent lands: *Provided further*, That pending completion of the Cypress Creek or Tensas diversion and flood way the levee along the west bank of the Mississippi River within the diversion and flood way shall be completed and maintained to the 1914 grade and section on any part of the river on such west bank within said diversion and flood way where the levee has not been completed to such grade and section. The sum of not to exceed $20,000,000 is hereby authorized to be appropriated for this purpose.

"All unexpended balances of appropriations heretofore made for prosecuting the work of flood control on the Mississippi River in accordance with the provisions of the Flood Control acts approved March 1, 1917, and March 4, 1923, are hereby made available for expenditure under the provisions of this act excepting section 14.

"SEC. 2. That it is hereby declared to be the sense of Congress that the principle of local contribution toward the cost of flood-control work, which has been incorporated in all previous national legislation on the subject, is sound, as recognizing the special interest of the local population in its own protection, and as a means of preventing inordinate requests for unjustified items of work having no material national interest. As a full compliance with this principle in view of the great expenditure estimated at approximately $292,000,000, heretofore made by the local interests in the alluvial valley of the Mississippi River for protection against the floods of that river; in view of the extent of national concern in the control of these floods in the interests of national prosperity, the flow of interstate commerce, and the movement of the United States mails; and, in view of the gigantic scale of the project, involving waters of a volume and flowing from a drainage area largely outside the States most affected, and far exceeding those of any other river in the United States, no local contribution to the project herein adopted is required.

"SEC. 3. Except when authorized by the Secretary of War upon the recommendation of the Chief of Engineers, no money appropriated under authority of this act shall be expended on the construction of any item of the project until the States or local interests to be benefited and protected have indicated their desire for Federal assistance, by giving assurances satisfactory to the Secretary of War that they will (a) maintain all flood-control works after their completion, except controlling and regulating spillway structures, including special relief levees; maintenance includes normally such matters as cutting grass, removal of weeds, local drainage, and minor repairs of main river levees; (b) provide, without cost to the United States, such drainage works as may be necessary, and the rights of way for all levees and other structures as and when the same are required.

"No liability of any kind shall attach to or rest upon the United States for any damage from or by floods or flood waters at any place.

"SEC. 4. Any property taken by the United States for the purpose of carrying out the terms of this act, for which compensation is required by the Constitution of the United States, shall be paid for by the United States.

"The Secretary of War may cause proceedings to be instituted for the acquirement by condemnation of any lands, easements, or rights of way which, in the opinion of the Secretary of War, are needed in

carrying out this project, the said proceedings to be instituted in the United States district court for the district in which the land, easement, or right of way is located. In all such proceedings the court, for the purpose of ascertaining the value of the property and assessing the compensation to be paid, shall appoint three commissioners, whose award, when confirmed by the court, shall be final. When the owner of any land, easement, or right of way shall fix a price for the same which, in the opinion of the Secretary of War is reasonable, he may purchase the same at such price; and the Secretary of War is also authorized to accept donations of lands, easements, and rights of way required for this project. The provisions of sections 5 and 6 of the river and harbor act of July 18, 1918, are hereby made applicable to the acquisition of lands, easements, or rights of way needed for works of flood control: *Provided,* That the title to any land acquired under the provisions of this section, and used in connection with the works authorized by section 1 of this act, shall be turned over without cost to the States or local interests, which shall retain the same for the purposes specified in this act.

"SEC. 5. Subject to the approval of the heads of the several executive departments concerned, the Secretary of War, on the recommendation of the Chief of Engineers, may engage the services and assistance of the Coast and Geodetic Survey, the Geological Survey, or other mapping agencies of the Government, in the preparation of maps required in furtherance of this project, and funds to pay for such services may be allotted from appropriations made under authority of this act.

"SEC. 6. Funds appropriated under authority of section 1 of this act may be expended for the prosecution of such works for the control of the floods of the Mississippi River as have heretofore been authorized and are not included in the present project, including levee work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on the outlets and tributaries of the Mississippi River between Rock Island and the Head of Passes in so far as such outlets or tributaries are affected by the backwaters of the Mississippi: *Provided,* That for such work on tributaries, local interests shall provide rights of way without cost to the United States, contribute 33⅓ per cent of the cost of the works, and maintain the works after completion: *Provided further,* That not more than $10,000,000 of the sum authorized in section 1 of this act shall be expended under the provisions of this section.

"In an emergency, funds appropriated under authority of section 1 of this act may be expended for the maintenance of any levee when it is demonstrated to the satisfaction of the Secretary of War that the levee can not be adequately maintained by local interests.

"SEC. 7. That the sum of $5,000,000 is authorized to be appropriated as an emergency fund to be allotted by the Secretary of War on the recommendation of the Chief of Engineers in rescue work or in the repair or maintenance of any flood-control work on any tributaries of the Mississippi River threatened or destroyed by flood.

"SEC. 8. The project herein authorized shall be prosecuted by the Mississippi River Commission under the direction of the Secretary of War and supervision of the Chief of Engineers and subject to the provisions of this act. It shall perform such functions and through such agencies as they shall designate after consultation and discussion with the president of the commission. For all other purposes the existing laws governing the constitution and activities of the commission shall remain unchanged. The commission shall make inspection trips of such frequency and duration as will enable it to acquire first-hand information as to conditions and problems germane of the matter of flood control within the area of its jurisdiction; and on such trips of inspection ample opportunity for hearings and suggestions shall be afforded persons affected by or interested in such problems. The president of the commission shall be the executive officer thereof and shall have the qualifications now prescribed by law for the Assistant Chief of Engineers, shall have the title brigadier general, Corps of Engineers, and shall have the rank, pay, and allowances of a brigadier general while actually assigned to such duty: *Provided,* That the present incumbent of the office may be appointed a brigadier general of the Army, retired, and shall be eligible for the position of president of the commission if recalled to active service by the President under the provisions of existing law.

"The salary of the president of the Mississippi River Commission shall hereafter be $10,000 per annum, and the salary of the other members of the commission shall hereafter be $7,500 per annum. The official salary of any officer of the United States Army or other branch of the Government appointed or employed under this act shall be deducted from the amount of salary or compensation provided by, or which shall be fixed under, the terms of this act.

"SEC. 9. The provisions of sections 13, 14, 16, and 17 of the river and harbor act of March 3, 1899, are hereby made applicable to all lands, waters, easements, and other property and rights acquired or constructed under the provision of this act.

"SEC. 10. That it is the sense of Congress that the surveys of the Mississippi River and its tributaries, authorized pursuant to the act of January 21, 1927, House Document No. 308, Sixty-ninth Congress, first session, be prosecuted as speedily as practicable, and the Secretary of War, through the Corps of Engineers, United States Army, is directed to prepare and submit to Congress at the earliest practicable date projects for flood control on all tributary streams of the Mississippi River system subject to destructive floods, which projects shall include: The Red River and tributaries, the Yazoo River and tributaries, the White River and tributaries, the St. Francis River and tributaries, the Arkansas River and tributaries, the Ohio River and tributaries, the Missouri River and tributaries, and the Illinois River and tributaries.

"The sum of $5,000,000 is hereby authorized to be used out of the appropriation authorized in section 1, in addition to amounts authorized in the river and harbor act of January 21, 1927, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers for the preparation of the flood-control projects authorized in this section.

"SEC. 11. That the Secretary of War shall cause the Mississippi River Commission to make an examination and survey of the Mississippi River below Cape Girardeau, Mo., (a) at places where levees have heretofore been constructed on one side of the river and the lands on the opposite side have been thereby subjected to greater overflow, and where, without unreasonably restricting the flood channel, levees can be constructed to reduce the extent of this overflow, and where the construction of such levees is economically justified, and report thereon to the Congress as soon as practicable with such recommendations as the commission may deem advisable; (b) with a view to determining the estimated effects, if any, upon lands lying between the river and adjacent hills by reason of overflow of such lands caused by the construction of levees at other points along the Mississippi River, and determining the equities of the owners of such lands and the value of the same, and the commission shall report thereon to the Congress as soon as practicable with such recommendation as it may deem advisable: *Provided,* That inasmuch as the Mississippi River Commission made a report on the 26th day of October, 1912, recommending a levee to be built from Tiptonville, Tenn., to the Obion River in Tennessee, the said Mississippi River Commission is authorized to make a resurvey of said proposed levee and a relocation of the same if necessary, and if such levee is found feasible, and is approved by the board created in section 1 of this act, and by the President, the same shall be built out of appropriations hereafter to be made.

"SEC. 12. All laws or parts of laws inconsistent with the above are hereby repealed.

"SEC. 13. That the project for the control of floods in the Sacramento River, Calif., adopted by section 2 of the act approved March 1, 1917, entitled 'An act to provide for the control of the floods of the Mississippi River and of the Sacramento River, Calif., and for other purposes,' is hereby modified in accordance with the report of the California Débris Commission submitted in Senate Document No. 23, Sixty-ninth Congress, first session: *Provided,* That the total amounts contributed by the Federal Government, including the amounts heretofore contributed by it, shall in no event exceed in the aggregate $17,600,000."

The SPEAKER. The question is on the motion of the gentleman from Wisconsin to recommit the bill with instructions.

Mr. FREAR. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 139, nays 206, not voting 87, as follows:

[Roll No. 70]

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On the vote:

Mr. Begg (for) with Mr. Yates (against).
Mr. Cochran of Pennsylvania (for) with Mr. Rowbottom (against).
Mr. Evans of California (for) with Mr. Hughes (against).
Mr. Leech (for) with Mr. Connally of Texas (against).
Mr. Woodruff (for) with Mr. Hudspeth (against).
Mr. Watres (for) with Mr. Fisher (against).
Mr. Bohn (for) with Mr. Sears of Florida (against).
Mr. Cooper of Ohio (for) with Mr. Blanton (against).
Mr. Magrady (for) with Mr. Quayle (against).
Mr. Swick (for) with Mr. Kent (against).
Mr. Anthony (for) with Mr. Sullivan (against).
Mr. Temple (for) with Mr. Larsen (against).
Mr. Perkins (for) with Mr. Kunz (against).
Mr. Treadway (for) with Mr. Carew (against).
Mr. Bowles (for) with Mr. Shreve (against).
Mr. Ransley (for) with Mr. Weller (against).
Mr. Tinkham (for) with Mr. Milligan (against).
Mr. Wood (for) with Mr. Porter (against).
Mr. Kurtz (for) with Mr. Tillman (against).
Mr. Beers (for) with Mr. Oldfield (against).
Mr. Connolly of Pennsylvania (for) with Mr. Drane (against).
Mr. Golder (for) with Mr. Williams of Illinois (against).
Mr. White of Kansas (for) with Mr. Casey (against).
Mr. McFadden (for) with Mr. Garrett of Texas (against).
Mr. Smith (for) with Mr. Sabath (against).
Mr. Leatherwood (for) with Mr. Deal (against).
Mr. Dyer (for) with Mr. Douglas of Arizona (against).
Mr. Griest (for) with Mr. Sumners of Texas (against).

The result of the vote was announced as above recorded.

The SPEAKER. The question now is on the passage of the bill.

Mr. REID of Illinois. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 254, nays 91, not voting 87, as follows:

[Roll No. 71]

Mr. Tillman (for) with Mr. Kurtz (against).
Mr. Oldfield (for) with Mr. Beers (against).
Mr. Drane (for) with Mr. Connolly of Pennsylvania (against).
Mr. Casey (for) with Mr. Golder (against).
Mr. Sabath (for) with Mr. McFadden (against).
Mr. Deal (for) with Mr. Leatherwood (against).
Mr. Douglas of Arizona (for) with Mr. Griest (against).
Mr. Sumners of Texas (for) with Mr. Eaton (against).

Until further notice:

Mr. Hawley with Mr. McSwain.
Mr. Kiess with Mr. Jones.
Mr. Smith with Mr. Goldsborough.

The result of the vote was announced as above recorded.

On motion of Mr. REED of Illinois, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. BYRNS. Mr. Speaker, I ask unanimous consent to speak for half a minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. BYRNS. Mr. Speaker, my colleague, Mr. FISHER, of Tennessee, is absent under the care of a specialist. He is heartily in favor of this bill, and if he were present he would have voted "yea." I ask that he may be granted indefinite leave of absence.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

### EXTENSION OF REMARKS—FLOOD CONTROL

Mr. LOWREY. Mr. Speaker, it is obligatory that this Congress now enact legislation providing for the control of the floods of the Mississippi River and its tributaries. And the obligation rests upon every Member of this body.

Rivers and harbors, interstate and foreign commerce, and United States mails are all matters of Federal responsibility. The Mississippi and its tributaries is a great inland transportation system which, if controlled and utilized, is an invaluable asset to commerce and internal development in time of peace and one of our very greatest elements of national defense in time of war. If left uncontrolled we may expect it at times to block the transportation of passengers, commodities, and mails, sweep away millions of dollars worth of internal improvements, prevent the growth of that section of our country in which lies the highest possibility of our future greatness, and even take the lives of many of our citizens.

Defense of life and property of the citizen is the highest national obligation. It is the very object for which nations exist. All our resources of men and treasure are pledged to it. If we fail to do this we are unworthy to exist as a nation and unworthy of the respect of other nations. This Congress has no more right to fail to cope with this problem than did the Sixty-fifth Congress to fail to provide for the prosecution of the war in which we were engaged at that time.

There is difference of opinion here about the matter of local contributions. We claim to justify the presence of our marines in Nicaragua and China to-day on this principle of the protection of life and property. And we have not asked that those whose lives and property are being protected bear a special part of the cost. Indeed, we sacrificed billions of dollars of treasure and thousands of lives in the World War, and did not ask that those who personally suffered from German submarines bear a special part of the cost.

The principles and precedents are well established whereby we even spend millions of dollars of Federal money on rivers purely for transportation purposes without asking for local contributions; and on great harbors without asking the cities most directly benefited to bear more than their regular share of the expense.

There is also difference of opinion about the question of provision for the tributaries of the Mississippi. I should say that the unanswerable arguments for control of the Mississippi obtain with equal force for the tributaries. Not only have the people on the tributaries similar dangers and similar rights, but to me it seems unquestionable that the control of the tributaries is an absolute necessity to the effective control of the Mississippi. But other gentlemen have gone fully into this phase of the subject. I shall not take your time. We certainly can not refuse to the people on the tributaries the small request of adequate appropriations for a survey. To do so would be preposterously unjust.

Therefore, Mr. Chairman, by every principle that governs us as a Nation and by every policy that has been followed in legislating on similar matters we should provide amply for the control of the Mississippi River and its tributaries and we should act now. We have no right to fiddle while Rome burns. With thousands of lives and millions of dollars of property constantly exposed to this menace it would be tragic, cruel, and almost criminal for this Congress to adjourn without providing safely and amply against another catastrophe like that of 1927.

Under the permission to extend my remarks, I give here the "SOS to the American Legion," which I have received by mail:

SOS TO EVERY MAN OF THE AMERICAN LEGION

Every man of the American Legion has taken an oath to uphold and defend the Constitution of the United States and to support the welfare of the community, State, and Nation. Hardly a day goes by that his services are not required to perform at least one of these duties which are usually local.

Back in 1917 and 1918 we were called upon to perform a national duty, a duty that took us thousands of miles away from our loved ones, our business, and other interests. We were called upon to make the supreme sacrifice if necessary to perpetuate democracy and crush autocracy. We suffered hardships and deprivations as never before experienced. Billions of dollars were spent for this great cause; thousands of sons and many daughters sacrificed their lives, and millions of loved ones at home suffered irreparable heartaches for those who fought for the love of their country and the principles for which it stands.

Now comes another call, a national call even greater than the one of 1917 and 1918, because this need comes from home. This great country of ours is again in danger. Lives, home, and the health and prosperity of the United States are about to be affected as never before in history. The great Father of Waters, which divides our wonderful country in half and which flows down the greatest and richest valley in the world, has become a source of a grave danger and menace to those who live along its banks as well as those who live in this valley.

We can not afford to let this great old river on one of its spring high-water rampages destroy what required almost centuries to build, to say nothing of the destitution it would bring to tens of thousands of those near and dear to us. The destruction it wrought last spring upon the citizens of this valley was ghastly and horrible. And, fellows, it took place right here in our own beloved United States!

The American Legion of New Orleans appeals to all legionnaires and ex-service men to rally to this national defense. The destruction of life and property and the nonproductivity of this great valley which is bound to occur by the non-Federal control and financing of the Mississippi River will affect our great Nation to its four corners.

Comrades and citizens, this is our country, your country, and my country, and this part of the United States of America is in danger. There has risen a question of mere dollars and cents staked against the lives of our loved ones, the sanctity of the home, and the property of tens of thousands of our citizens. Therefore we should place upon it the most patriotic significance by having our Federal Government issue a gilt-edged bond of protection prompted by even a greater spirit of patriotism than was felt when the first great Liberty loan was floated.

The States along the lower Mississippi River Valley have been practically bankrupt as a result of the destruction wrought by the Father of Waters last spring. If these panic-stricken people are to be taxed for the upkeep of this great body of water which rushes so madly and destructively down its course each spring, we will be obliged to sacrifice all and leave this valley to the vultures of the air to satisfy the whims of a few who say that Uncle Sam is unable to protect the lives and property of those at home, completely forgetting how willingly and forcefully the strong arm of assistance was sent forth across the high seas back in 1918.

We plead with you at once to demand of your representatives in Congress to vote for the Jones flood relief bill, which will place the cost and maintenance of the great levees necessary to keep the Mis-

sissippi River within her banks at all times squarely on the shoulders of the United States Government.

The national convention of the American Legion has indorsed this action, and, comrades, it is our duty to protect the lives and property of the citizens of our country.

(Signed) L. B. SPACH,
*Chairman Flood Relief.*

Mr. HERSEY. Mr. Speaker, two great problems are pending before this Congress, one called the Mississippi flood control bill and the other the McNary-Haugen farm relief bill. I wish to call attention very sharply to these two bills and the acts of their friends, which imperil good legislation.

On the 6th day of December, 1927, the President laid before Congress his annual message, and among other things he said:

FLOOD CONTROL

For many years the Federal Government has been building a system of dikes along the Mississippi River for protection against high water. During the past season the lower States were overcome by a most disastrous flood. Many thousands of square miles were inundated, a great many lives were lost, much livestock was drowned, and a very heavy destruction of property was inflicted upon the inhabitants. The American Red Cross at once went to the relief of the stricken communities. Appeals for contributions have brought in over $17,000,000. The Federal Government has provided services, equipment, and supplies probably amounting to about $7,000,000 more. Between $5,000,000 and $10,000,000 in addition have been provided by local railroads, the States, and their political units. Credits have been arranged by the Farm Loan Board, and three emergency finance corporations with a total capital of $3,000,000 have insured additional resources to the extent of $12,000,000. Through these means the 700,000 people in the flooded areas have been adequately supported. Provision has been made to care for those in need until after the 1st of January.

The Engineer Corps of the Army has contracted to close all breaks in the dike system before the next season of high water. A most thorough and elaborate survey of the whole situation has been made and embodied in a report with recommendations for future flood control, which will be presented to the Congress. The carrying out of their plans will necessarily extend over a series of years. They will call for a raising and strengthening of the dike system, with provision for emergency spillways and improvements for the benefit of navigation.

Under the present law the land adjacent to the dikes has paid one-third of the cost of their construction. This has been a most extraordinary concession from the plan adopted in relation to irrigation, where the general rule has been that the land benefited should bear the entire expense. It is true, of course, that the troublesome waters do not originate on the land to be reclaimed, but it is also true that such waters have a right of way through that section of the country, and the land there is charged with that easement. It is the land of this region that is to be benefited. To say that it is unable to bear any expense of reclamation is the same thing as saying that it is not worth reclaiming. Because of expenses incurred and charges already held against this land, it seems probable that some revision will have to be made concerning the proportion of cost which it should bear. But it is extremely important that it should pay enough so that those requesting improvements will be charged with some responsibility for their cost, and the neighborhoods where works are constructed have a pecuniary interest in preventing waste and extravagance and securing a wise and economical expenditure of public funds.

It is necessary to look upon this emergency as a national disaster. It has been so treated from its inception. Our whole people have provided with great generosity for its relief. Most of the departments of the Federal Government have been engaged in the same effort. The governments of the afflicted areas, both State and municipal, can not be given too high praise for the courageous and helpful way in which they have come to the rescue of the people. If the sources directly chargeable can not meet the demand, the National Government should not fail to provide generous relief. This, however, does not mean restoration.

The Government is not an insurer of its citizens against the hazard of the elements. We shall always have flood and drought, heat and cold, earthquake and wind, lightning and tidal wave, which are all too constant in their afflictions. The Government does not undertake to reimburse its citizens for loss and damage incurred under such circumstances. It is chargeable, however, with the rebuilding of public works and the humanitarian duty of relieving its citizens from distress.

The people in the flooded area and their representatives have approached this problem in the most generous and broad-minded way. They should be met with a like spirit on the part of the National Government. This is all one country. The public needs of each part must be provided for by the public at large. No required relief should be refused. An adequate plan should be adopted to prevent a recurrence of this disaster in order that the people may restore to productivity and comfort their fields and their towns.

Legislation by this Congress should be confined to our principal and most pressing problem, the lower Mississippi, considering tributaries only so far as they materially affect the main flood problem. A definite Federal program relating to our waterways was proposed when the last Congress authorized a comprehensive survey of all the important streams of the country in order to provide for their improvement, including flood control, navigation, power, and irrigation. Other legislation should wait pending a report on this survey. The recognized needs of the Mississippi should not be made a vehicle for carrying other projects. All proposals for development should stand on their own merits. Any other method would result in ill-advised conclusions, great waste of money, and instead of promoting would delay the orderly and certain utilization of our water resources.

On the 8th day of December, 1927, the President sent an additional message to the Congress on flood control, as follows:

*To the Congress of the United States:*

There is submitted herewith a letter from the Hon. Dwight F. Davis, Secretary of War, transmitting with favorable recommendation the report of Maj. Gen. Edgar Jadwin, Chief of Engineers, containing the plan of the Army Engineers for flood control of the Mississippi River in its alluvial valley.

In my message to the two Houses of Congress at the beginning of the first session of the Seventieth Congress, the flood-control problem of the lower Mississippi and the urgent necessity for its solution were outlined. The general duties and responsibilities of the Federal Government in connection therewith were therein discussed.

The total cost of the recommended project is $296,400,000, distributed over a period of 10 years. This large sum is manifestly justified by the necessities of the situation and the benefits that will result. In determining the distribution of the costs there must be considered not only the people of the valley itself, who receive the major portion of the benefits, but also the great mass of taxpayers who suffer less directly from Mississippi River floods and upon whom most of the burden of Federal taxation falls. It is axiomatic that States and other local authorities should supply all land and assume all pecuniary responsibility for damages that may result from the execution of the project. It would be revolutionary for the Federal Government to establish the precedent of buying part of the land upon which to build protective works to increase the value of the remainder. Similarly it would be very unwise for the United States in generously helping a section of the country to render itself liable for consequential damages. The Federal Treasury should bear the portion of the cost of engineering structures for flood control that is justified by the national aspects of the problem and the national benefits. It may even bear 80 per cent of such costs, but substantial local cooperation is essential to avoid waste. The portion this would leave to be borne locally for flood-control structures represents an expenditure of about $3, or 30 cents per year for 10 years for each acre in the alluvial valley to be protected every year from Mississippi River floods. The value per acre, including railroads, towns, cities, and other improvements, is estimated at something over $200. It would seem that the States should share with the Federal Government the burden of assisting the levee districts and individual property owners, especially in view of the fact that the States benefit directly by the increased taxes from land made more valuable by reason of its protection.

The plan transmitted herewith is comprehensive and appeals to me as being adequate in its engineering. I concur in general in the conclusions and recommendations reached in the report, and suggest that appropriate legislation be enacted putting them into effect.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 8, 1927.*

For many days we have been discussing these two messages. There was formed early in the present session of this Congress a combination or bloc, so called; one is the Mississippi flood-control bloc, composed of Representatives and Senators who reside along the Mississippi River and its tributaries which would be affected by flood-control legislation. The other bloc is the old and familiarly known farm bloc of the Wheat and Corn Belt States that is interested in the passage of the McNary-Haugen farm relief bill, which has met much condemnation in the past outside of these farm-relief States, so called. This combination has assumed formidable proportions. The full proceedings in the flood-relief debates show clearly that this combination has been formed for mutual benefits, political and otherwise.

Evidently the understood agreement is that these blocs would combine and put over the flood control bill, making the whole Nation pay everything in the erection, building, and flood-control protection on the Mississippi River and its tributaries, and then join to put over the McNary-Haugen bill in the same vicious form of the last Congress which called for a veto which was approved by the people throughout the land, except by those interested in putting the Nation into business, Government ownership, and price fixing.

Yesterday these blocs, on the eve of a political election, forced through the Mississippi flood control bill forcing the Govern-

ment to pay all the costs, damages, and expense in the building of the levees and other works under this bill, and thereby ignoring the recommendation of the engineers and the bill of the administration and thereby inviting a veto, which they will most certainly have.

It is one of the weaknesses of our form of government that such blocs and combinations can be formed like the old river and harbor pork-barrel legislation—you vote for my project and I will vote for yours, and thus loot the Treasury of the people and extort from one portion of the country tribute for the protection of the wealthy interests of another portion of the country.

In the flood control bill as passed by the Senate and House it can not be claimed for one moment that there is any evidence whatever that the poor man is going to suffer any damages by the engineers' and the President's plan, but it clearly appears that the large landowners along the Mississippi are going to benefit greatly without a cent of cost to themselves in the way of building these new improvements and protections.

Eighteen millions of charity poured in along the Mississippi Valley has taken care of the poor tenant farmer who does not own the land. The building of the levees and other improvements under the plan of the engineers and the President would greatly benefit those who own the land as well as to protect forever these landowners from future floods, yet in spite of all this, when, however, an opportunity is given to a majority interested in this legislation to attain all they want without regard to the Treasury of the United States or the taxes to be imposed upon the whole people, they will not pay much attention to argument and reason, or to the rest of the country. This is one of the sad things in government at the present time. The old pork-barrel river and harbor matters have been by legislation so restricted that they can not now loot the Treasury. Future legislation must in some way provide against these combinations and blocs in legislation that will coerce representatives and Senators to vote for legislation for particular localities to form combinations under the threat that they must vote them into law or they can not be reelected. God save the United States of America!

Mr. CARTWRIGHT. Mr. Speaker, the destruction wrought last spring upon the citizens of the Mississippi Valley was ghastly and horrible. When we consider the fact that the floods affected 31 States of the Union, 41 per cent of the total area of the United States, covered 12,500,000 acres of good land, made 600,000 citizens homeless, and damaged property to the extent of more than $400,000,000, it is time that a solution for the control of these flood waters be found, or at least the best possible start be made.

In addition to the great destruction, interstate commerce was interfered with and our mail suspended and, all of these items taken into consideration, it has become a national problem. To a certain extent it is an international question. It is the greatest producing region in the world, and every factor which goes to make up the prosperity of the world is seriously affected.

My friends, we should look to flood control in the lower valley, but also to flood prevention, forest and soil conservation, and such other methods as may be found practicable upon the Mississippi and its tributaries. It is just as important and necessary to have floods controlled on tributaries, just as important to protect life and property on tributaries as it is on the seven lower basin States.

In my own State of Oklahoma it has been said that damage was done by this flood to the extent of more than $20,000,000 on the Arkansas River and its tributaries alone. In addition to this damage, we also suffered greatly from floods from the Red River and its tributaries. These two rivers, with their tributaries, such as the Washita, South Canadian, Boggies, Kiamitta, and other streams in Oklahoma, contribute much to these flood waters. It hurts a farmer just as much to have his crops, land, and property destroyed on one of these rivers in Oklahoma as it would if he lived on the Mississippi. Mr. Speaker, I am strong for flood control, and I have waited patiently for the Flood Control Committee to report a bill, and now it is here. I know the members of the committee have worked long and hard in trying to bring us a bill that will be acceptable. But I believe I speak the sentiment of the majority when I say if the plan only touches the pocketbook of Oklahoma and other tributary States there will not be quite so much sympathetic interest in the bill. I believe the Government should undertake a comprehensive survey of the whole Mississippi River with the idea of discovering, and later utilizing, all practicable means of flood control, including reservoir construction, reforestation, deepening of channels, prevention of erosion, and so on.

Since my mind has not undergone many changes on flood control since I made a speech before the State flood-control conference at Tulsa, Okla., on the 15th of last July, I wish to insert it in the RECORD at this place:

FLOOD CONTROL—ADDRESS BY CONGRESSMAN WILBURN CARTWRIGHT BEFORE THE FLOOD-CONTROL CONVENTION AT TULSA, JULY 15, 1927

Ladies and gentlemen, ever since I was a small plowboy I've been in favor of flood control and irrigation. I was first in favor of damming up the branch in order to conserve its waters for swimming-hole purposes. Later, as I followed old Beck down the parching corn rows, stirring the hot dust with a go-devil or a Georgia sweep, and watching the blazing skies for a sign of a cloud that might bring the rain that meant redemption of the corn crop and meed of prosperity to the farm home, I wondered then why the people through some sort of cooperation could not build a system of reservoirs and canals by and through which the floods could be stored and distributed to the parching fields when the rains failed to fall.

It appears now that my dreams are going to come true; that the great Mississippi Valley flood disaster is the wreck from which the greatest flood control, canal, and irrigation system the world has ever dreamed of is going to spring. I hope there will be wisdom, unselfishness, and energy enough to lay out a plan that will comprehend flood control and irrigation from the western slopes of the Alleghenies to the eastern slopes of the Rockies. It may take billions of dollars and many years of time, but in my opinion it will be a paying proposition from every angle and will mean for this Nation leadership of the earth in agriculture, horticulture, commerce, and manufacturing. And it will mean, as I see it, a Nation without famine and want, no matter what pestilences or misfortunes may befall. The time is not 100 years distant when the products of the soil will be more than ever the foundation upon which will rest the prosperity, happiness, contentment, and well-being of the people of this earth.

Automobiles, airships, railways, and other inventions for the advancement, convenience, and happiness of mankind will all be dependent more then than now upon the productiveness of the sil; for out of the soil, after all, come practically all the real necessities for the comfort and happiness of mankind. When the population of this earth becomes so dense that the soil and its productiveness will mean everything to the welfare of the human race, it will then be necessary to make the soil productive in every season whether or not it rains. The agricultural and horticultural world to-day must depend largely upon the seasonable rainfall. Proper flood control, proper water storage, and proper distribution of this stored water will mean bumper crops every year for every section of this Nation. Therefore, my fellow citizens, I am heartily in favor of this Nation, together with the States, solving now and once for all this major problem of this age.

As to what plan or plans are to be followed in this great undertaking, the average citizen does not know, and, in my opinion, should hold an open mind until the experts have somewhere nearly agreed. At any rate, it is my earnest hope that the different States will join wholeheartedly and unselfishly with the National Government in whatever system is decided upon. True, the task is a colossal one and should be approached carefully, unselfishly, and with a determination to solve it thoroughly.

Let me say that I am in favor of Oklahoma joining her flood, storage, and irrigation problem with that of the National Government, and working it out so that the State's great project will dovetail exactly into that of the Nation's. Oklahoma, as I see it, should lay her flood control and irrigation plan broad and deep. She should comprehend every section of the State that it is at all possible to reach. There is no room and no time for cutting corners or becoming niggardly with expenditures and plans. Let our waters be controlled and conserved. Let us prepare to use every drop of extra rainfall possible. Let us harness our rivers and direct them where we will. Let us have both power for commerce, and water for irrigation from these abundant waters. And as we march forward toward the consummation of this great project, let us not forget to keep step with science and progress in the matter of better agriculture and horticulture, and also in the matter of better stock, better poultry, better farms, and better homes. Let us produce in this great Commonwealth empire every necessity and every luxury to satisfy the needs and the tastes of an advancing people.

Oklahoma, properly watered, can live independently within her own boundaries and enjoy practically every luxury in both raiment and food indigenous to the Temperate Zone. This can be done even without inexhaustible resources in mineral deposits, and when we add that into the bargain what more can the most optimistic desire in order to visualize a Commonwealth brimming with prosperity, contentment, and happiness.

And, gentlemen, judging from the success of our great Panama Canal, the colossal Mississippi Valley irrigation project, if properly planned and carried out, should pay for its cost in dollars and cents in a quarter of a century after its completion. Furthermore, it will be the greatest stabilizer, the greatest civilizer, and the greatest educator since the dawn of society. I am for it and behind it with all the powers and energy I can command.

Mr. Speaker, I now ask permission here to insert a letter from my district which gives the farmers' slant on flood control. It is a timely letter and should be carefully considered during the deliberations on this important bill:

COOPERATIVE EXTENSION WORK IN AGRICULTURE
AND HOME ECONOMICS, STATE OF OKLAHOMA,
*McAlester, Okla., March 22, 1928.*

Re farmer method of flood control.

Mr. WILBURN CARTWRIGHT,
*Washington, D. C.*

DEAR MR. CARTWRIGHT: Find inclosed some ideas which we discussed over in part in my office concerning flood control. This to me is the biggest service that could be performed by any Congressman, Senator, or President. Flood water properly controlled at its source would mean millions of dollars of saving in soil and plant food. It would mean more economical production and in turn more substantial agriculture and a higher standard of living on the farm.

It is well known and admitted by all engineers that millions of tons of soil high in plant food and which is really the best soil that we have is going down the Mississippi annually. This soil is a direct loss to the farmers, to farm prosperity, to State prosperity, to county prosperity, and to the prosperity of the entire United States. This means millions of dollars lost in the basin of the Mississippi with nothing gained whatever but resultant losses because of this erosion and excess water at the lower Mississippi Valley. If we should spend millions on the lower Mississippi to control floods, we are still, at the same time, losing millions at its source. This in turn makes a double loss and increases taxes of our National Government. If we spend millions in control at the source, these millions are returned each year in greater and more economical production of crops, in the farmer's ability to pay more and to pay his taxes easier, and in greater economic wealth gained by counties and States.

For every million that we spend at the source, any student of the subject will admit that three million can be gained in return, so there is really no expense whatever to the State or Nation if flood waters are controlled at the source. But, on the other hand, if we control flood waters after they have been formed, when it takes millions of dollars for its control, this money is merely dumped into the sea and the loss is doubled and trebled by the continued loss at the source.

In view of the fact that control of the Mississippi River floods is a much-discussed question now before the Congress of the United States, I wish to present the following:

No harmonious scheme has so far been presented which is acceptable to all interests. No scheme of prevention has so far been advanced, but to the contrary all schemes presented look to control and not to prevention.

The Staple Cotton Review, which is the official organ of the Staple Cotton Cooperative Association, in the December issue states, "We ask only to be relieved of the burden of protecting this portion of America against the flood waters of the Nation. * * * What flood control does and all it does, is to keep the surplus river waters from overflowing the land when the river rises above its banks. * * * We have a right to ask that the Nation protect us from floods which originate in the national domain, and to do this not as a favor but as a national duty at national expense. * * * Flood control is either a national duty or it is not a national duty. There should be no recognition of a policy of halfway duties in national problems. * * * As long as we have to depend upon local contributions for cost of construction, we must necessarily also have to allow local participation or even local contributions for a local spillway which destroys local property by the very means employed to protect property elsewhere. It would never be attempted to require a contribution from people along the lower reaches of the Mississippi toward the construction of reservoirs along the tributaries a thousand miles away. The whole theory of local contribution and dual responsibility is illogical, unsound, and impossible of fair and equitable application whether it is for levees, spillways, or reservoirs, and just as inequitable with one as with the other."

A report prepared for and presented to the Chamber of Commerce of the United States on referendum No. 51 says, in part: "To successfully accomplish the greatest benefit to the greatest number at a justified economic burden, there should be cooperation between the Nation, the State, and the property owner, both in the location of the work, extent of expenditure, use of the water, and the extent of control. * * * History seems to prove that control of the Mississippi River should not be left to any single centralized agency, but in the interests of the commercial developments of the United States which the United States Chamber of Commerce should represent, every interest should be considered, every section be represented, every means be employed, every district with its particular interest be served, and both legislation and administration be so widely distributed as to attain a truly national result. * * * Inevitably the cost of such a project would greatly exceed the total value of the protected properties, would give to a very small local area of the United States a protection without cost, but at a great cost to the remainder of the United States much of which has equal hazard and an equal right to protection."

At the Arkansas-Red River conservation and flood-control convention, in Oklahoma City, November 30, 1927, plans of flood control were discussed. The Army engineers' scheme of control was outlined by Maj. Donald H. Connolly. The impression gained from this discussion was that no scheme of control was worthy of attention, which included territory not immediately adjacent to the flooded area. It seemed to be the opinion of the Army men that flood waters contributed by the State of Oklahoma to the Mississippi River were extremely unlikely to have any effect upon the floods in that river. The contention seemed to be that the flood waters of Oklahoma would reach the Mississippi River long after the flood crest had passed downstream, and therefore could be easily carried by the river without damage. This contention seems rather illogical, in view of the fact that humans have no control over the periods during which floods shall occur. It is quite conceivable that flood waters from Oklahoma or other States could reach the Mississippi at the critical time when the crest of the flood is passing and so increase the crest of the flood waters as to make control well nigh impossible.

I would like to point out here the fact that the opinions of three interests have now been quoted in this letter, and that all are opposed to each other.

An honest-to-goodness dirt farmer attempted to make a speech on the subject at the November convention. This man gave a homely similé to the matter in hand by likening the actions of men in controlling fires to attempts at flood control. He pointed out that usually, as soon as fire appears, every effort is made to stamp it out immediately. We do not wait until one fire starting here, another there, and another yonder have assumed such proportions as to make control doubtful. His plea was that we should attempt flood control in much the same way. It is the opinion of many other farmers in this section that flood control should start at the grass roots. Many farmers in Oklahoma are well acquainted with the beneficial results of erosion control by terracing. There is nothing spectacular in this method; it is largely a matter of hard work; but in the control of erosion it is certainly effective. Erosion control is nothing more or less than flood control applied in a small way on individual farms. The method employed on large areas would undoubtedly be equally effective on a much larger scale.

For a more comprehensive discussion of terracing and its benefits I would refer you to the division of agricultural engineering, Bureau of Public Roads, Washington, D. C.

The National Geographic Magazine, in writing on the subject of the Mississippi floods, made the statement that the floods were actually composed of only 25 per cent of the rainfall of the area. It is an accepted, though unproved, fact that terracing farm lands results in the absorption by the soil of more than 25 per cent additional of the rainfall of the area. The well-worn motto that prevention is better than cure will surely never find better application than in the present issue. The conservation of flood waters in the soil upon which they fall would not only prevent the necessity of control but would add materially to the wealth of the Nation by increased productivity of all farm lands affected. Throughout the Great Plains area soil moisture is the limiting factor of production. By inducing the farmers of this region to conserve the moisture to their own benefit an enormous increase in production per acre per man would eventually result.

I fully realize that the great engineering feats and the great reservoirs that would be formed and the great inland seas that would appear would be wonderful to look at, cost probably a billion dollars, with a loss of thousands of acres of fertile fields, with the lives endangered of all those who live in the valleys below the reservoirs where probably thousands of lives would be snuffed out at any great flood just as they have been by the breaking of the wonderful dam that the city of Los Angeles had built. These feats would be spectacular; they would cost millions of dollars; and they would not in any way justify the expenditure after they had been built.

The farmer method of control is in no way spectacular; each farmer would control his own flood water, where possible, build a pond that would furnish fish the year round, a wonderful source of food supply, no dangerous reservoirs formed, but in turn fertile fields, economic production, and prosperous farmers. If one really stops and thinks about flood control, and sees the benefit that can be derived from controlling it at its source, and then would picture in his mind the disaster and expense that have to be brought about by moving thousands away from the homes they now occupy, flooding the fertile fields of the Mississippi with reservoirs, and in turn endangering the lives of all those who live in these valleys, because these reservoirs are man made and imperfect and little is derived from their presence. In a few years they would be filled by soil deposits and our present danger again arise.

One can hardly conceive of the working of a mind or working of great minds that would choose the latter source; except that they enjoy to do things in a big way and spend millions of dollars of tax money in order to gain a reputation for themselves or their engineering ability. I recommend without any reservation whatever the farmer

method of control, and the man who will sponsor it and who is able to take up this humble banner and carry it through to perfection should in turn be rewarded with the greatest offices that this Nation provides.

County agents and farmers all over the basin are the tools and machinery to work with. All that is needed is leadership and organization. To him who can furnish one or both of these should go the reward for the greatest feat that can be carried on in his age. As to how this can be done is a matter to be worked out probably as a mathematical problem. Personally, I think that the tax-exemption method of a certain per cent of taxes each year on each acre of land terraced and an exemption for each acre-foot of water impounded on the farm would be the correct method of procedure.

Permitting each county to draw on the Federal Government for such taxes as are exempted in the county is a mathematical problem that can probably be worked out in your office. Men who would do spectacular engineering feats will choose the expensive method of flood control. Men who would do a service to humanity and to their Nation without the necessity of reward will choose the flood control at its source.

Respectfully,

E. H. HOUSTON, *County Agent.*

P. S.—I have just read your speech before the House and know how willing and anxious you are to be of service. To me the "farmer method" of flood control is the greatest service that you can render.

I am sending you other articles concerning terracing which will give you an idea as to the interest which it holds in the minds of Oklahoma farmers.

Mr. BRAND of Ohio. Mr. Speaker, the discussion on the floor relative to flood control reveals some facts. The estimates of the value of the land to be used for flood ways by the Government have ranged from $5 to $10 per acre up to as high as $24 per acre.

I understand this land is, of course, in the river bottom and that it is made land for the most part of very great agricultural value, as it represents the cream of the soil washed down by the river and deposited.

As such land is not worth to exceed $24 per acre, there must be a reason, as agricultural land of this kind is worth at least four times that much in any other territory in the United States.

No doubt the reason that it is estimated at not over $24 per acre is because of its danger from flood, and this only goes to prove that if we follow out the provisions of this bill that there is a great area that will be made safe from flood conditions and thereby improved in value many times.

The cities and towns in all of this territory will likewise be affected favorably as to value.

We are therefore by this bill increasing the value of the property of individual citizens without securing any contributions from them, but making the entire Nation pay the entire bill.

We are asked to go to all of the expense toward making this improvement, and we are asked to pay all the damage that results from the improvement, and yet the local property pays nothing.

In Ohio we had a disastrous flood in 1913. Heavy rains and cloudbursts followed each other in March of that year when the ground was frozen and the rivers swelled to enormous sizes, and cities like Dayton and Columbus, Ohio, were entirely covered with water, in many cases up to the second story of the houses, and the water came so swiftly that the people were not warned of the danger, and more lives were lost in this flood in Ohio in 1913 than there were lost in the Mississippi flood of 1927.

The property loss in Ohio was immense, but I am unable to give the figures.

Did the people of Ohio come to the Government of the United States and ask that the Federal Government protect their property at Government expense? They did not.

The people affected by the flood went before the Ohio Legislature and asked them to provide a flood-control commission, with power to levy taxes to cover the expense of flood control. This commission went to work to provide against flood in the future and taxed local property at least $35,000,000 for the improvements that they made.

This commission adopted the reservoir plan, and I would like to point out to the House that a reservoir plan for controlling floods is not a plan which can be used for power generation or for irrigation. The reason is probably clear only to those who will take the trouble to see just how such a flood-control reservoir is built. Perhaps I can make it clear.

A site is selected along the river which can be made into a natural reservoir and a cement wall is put across the river. The remarkable part of the plan is that there is a hole in the cement wall that lets out the capacity of the river all the time and the reservoir is empty all the time except at flood time. This, of course, makes it of no account as a means of producing power or as a means of irrigation.

I am happy to say that since the location of these dams in the flood area of Ohio that we have had no high waters that have not been adequately handled by these reservoirs. They fill up during the flood and cover the country for a mile or more back from the dam in the river and then in a day or two the water has all escaped through the hole in the dam wall.

The point I wish to make is that in Ohio we have met the flood conditions and have paid the bill ourselves, and with that in mind I am not inclined to vote for this bill which puts all the burden on the United States Government and at the same time improves the property affected.

Mr. MORROW. Mr. Speaker, the passage of the Jones-Reid bill for the control of floods upon the Mississippi River and its tributaries is perhaps by far the most important piece of legislation that has passed Congress for many years. The people of the Nation expect this measure to be construed broad enough so that the purposes which caused its passage will be fully carried out. It is committing the Government to a general plan of flood control upon the Mississippi River with a mere gesture as to a survey of the tributaries which really cause the floods upon the lower basin of that river.

There are many features of the bill, placed therein by amendment, which, if carried out, will broaden the terms of the legislation and will tend to solve in the future the problem of destruction by the river. I refer particularly to the question of surveys of the tributaries of the Mississippi, with the view to securing the construction of impounding dams for water storage upon the upper tributaries for the purpose of flood control.

It is stated in the committee report that an investigation of the flood problem on the Mississippi—which is limited in scope to the application of suggested works along the river and its contiguous banks—can not be classed as an intelligent and thorough treatment of the subject. The committee in charge of preparing this bill consisted of some 21 members, representing nearly every one of the States within the basin of the Mississippi; they had before them the testimony of prominent officials and citizens within the flooded areas. That committee saw fit to report that there were other necessary flood-control features to be considered aside from spillways, flowage rights, and levees.

One of the particular features being the plan of storage reservoirs upon the tributaries of the river, this evident need caused the gentleman from Nebraska [Mr. SHALLENBERGER] to introduce an amendment, permitting the construction of reservoirs for impounding of the waters of the Mississippi and its tributaries. The information that floods can be controlled and prevented by such reservoir systems is to be obtained by the President from the Secretary of War, or other agencies of the Government. The amendment failed by only 4 votes of being placed in the bill.

Practically the same amendment was offered by the gentleman from Oklahoma [Mr. HOWARD], and a part of his amendment was adopted in so far as surveys were authorized to be made simultaneously with flood-control work upon the Mississippi River provided for in the act.

It would appear from the attitude of Congress that with more knowledge about this particular feature that the impounding dam or reservoir proposition will be the policy to be followed.

Careful consideration should be given to a paragraph in the report of the Committee on Flood Control. That paragraph states that the ultimate solution of the flood problem of the valley must include also the possible use of flood-control works on these tributaries at their sources, or between the source and the mouth. In the 1927 flood the tributaries contributed more than three-fourths of the flood waters.

It is apparent that if a careful, comprehensive study is made of the reservoir system upon the tributaries of the main stream, and if this water is impounded in reservoirs and used beneficially for reclaiming the arid land and for generating hydroelectricity, the Government need in no instance assume the cost of reservoir construction as a whole.

By proper contract with conservancy districts, formed for that purpose under State authority, the larger if not the entire cost of construction of these impounding dams may be during a term of years repaid to the Government.

If the admissions of those who oppose the reservoir idea are taken to be their absolute honest thought, then the Government is now entering upon an expenditure of perhaps three-fourths of a billion dollars which could have been avoided by the reservoir system. This huge expenditure may be avoided in the future should investigations and data be properly and carefully obtained.

The reservoir system would solve the flood problem of two States which suffer immense damages yearly. The plan should appeal to those in charge of the efforts of the Government to find a correct and broad solution. The States to which I refer are Oklahoma and Arkansas.

From the report of the committee it would appear that it was their opinion that the floods of the lower Mississippi Valley can be controlled by reservoirs at the upper reaches of the tributary sources of the watershed.

The levee system used for nearly half a century has proven inadequate, and the present plan of levees, spillways, and flowage rights may solve the problem for the lower basin of the Mississippi for a period of years. This is accomplished at a huge expense and at a small possible return to the Government; more than a million acres of land are lost for use to the Nation.

The reservoir system must come, and is needed, for many of the States upon the tributaries of the main stream. Such a plan is their only remedy for the solution of the flood-control problem.

Storage reservoirs erected in the Dakotas, Nebraska, Kansas, Colorado, New Mexico, Texas, and Oklahoma will solve the flood situation upon the lower Mississippi and will restore to use millions of acres of agricultural land. Perhaps this land is not needed for the immediate use of the Nation, yet it can be converted into a dairy-producing and beet-culture area. Such dairy products and beet cultivation will not interfere with the present market prices or overproduction. It is only a few years until all our available food-producing land will be so needed. It is further known that this method of utility of waste land can be beneficially employed only by Government assistance and under Government control.

Certainly it is that, under proper Government contracts, this investment by the Government will be repaid.

The committee having in charge the carrying out of the provisions of the bill, should it become a law, must attempt to meet the spirit intended by the legislative bodies. The law must be so interpreted to bring substantial relief to the flooded districts of the Nation. The bill should be so broadly constructed that the menace of future floods may be avoided.

Mr. REED of Arkansas. Mr. Speaker and Members of the House of Representatives, under leave granted, I desire to put in the RECORD some observations upon the major problem before the American people, to wit, that of flood control.

It has been my intention for many weeks to call to the attention of the Members of the House, as well as to the attention of the country, the importance of early legislation along the line of flood control. The reason I have not done so prior to this time is, I have been waiting for those in control of the organization of the House to bring upon the floor of the House, where it could be discussed at length and amendments proposed thereto, a bill for flood control.

In making speeches in my district last fall I told the people that I did really believe that, owing to the fact that the Mississippi River and her tributaries affected more than 40 per cent of the physical area of the United States, that this gigantic problem of flood control would in no way be considered from a partisan, sectional, or narrow standpoint by those in control of the Seventieth Congress or even the President of the United States. It does seem now that I spoke flatteringly of those in control of legislation in the American Congress. We have been in session more than three months and the President of the United States is now insisting upon local contribution from those affected in the flooded areas, notwithstanding the bill on the calendar of the House known as the Reed bill does not ask for local contributions from the people in the local territories.

In my judgment the bill as reported by the Flood Control Committee of the House is the bill that should be passed by the Congress with proper amendments more properly caring for the tributaries in this system of flood control.

The question of local contributions is either right or wrong. I take the position that it is wrong. The argument is advanced that heretofore the people in the flooded areas have made local contributions in attempting to control the Mississippi River and her tributaries. This is true. Two wrongs will not make one right. There never was any justification or equity in the people making local contributions toward controlling the flood waters of the mightiest stream in the world. This river belongs to the United States in the most essentials. You can not sail your boats of commerce or span the stream with bridges without permission of the Federal Government. Its nature makes it essentially a national problem. There is only one Mississippi River in the world.

The people of the Mississippi Valley have heretofore, due to their great energy and their earnest desire to control the waters of this stream, made great sacrifices of their personal assets in making local contributions—indeed, without a murmur—but now in many instances their property and their belongings have been swept away by the floods of the spring of 1927, and they are no longer able to contribute as they have heretofore toward controlling the flood waters of the Mississippi River and her tributaries. It seems to me that this Government of ours, the richest government in the world, instead of still insisting upon local contributions should be really appreciative of the contributions heretofore made that in reality and legally speaking, in my judgment, should not have been made; but those in control of both the legislative and executive branches of our Government should without hesitation be glad at this late hour to assume complete and full control of this mighty project and act accordingly.

I recall that the President of the United States sent the Secretary of Commerce, Mr. Hoover, to visit the flooded areas during the time the flood was on and immediately after the flood had ceased. It was understood by the people of the Mississippi Valley that the Secretary of Commerce was the personal representative of the Chief Executive of this Nation. I certainly think this course of sending a representative to go over the premises was a wise one. It is to be regretted, however, that the President of the United States himself did not go over these premises during the floods or immediately thereafter. I attended, with other Members of Congress from Arkansas, a great gathering of the people in the capital of my State on the statehouse lawn in Little Rock, Ark., this past summer. There were probably 10,000 people present on that occasion. Both of our United States Senators were there, and many other men of distinction. Mr. Secretary Hoover, of course, was the principal guest of the evening. He spoke at great length, and amid the enthusiasm of perhaps every person present, we watched his speech carefully. In that speech the Secretary of Commerce, Mr. Hoover, plainly stated that the Mississippi River and her tributaries were not a local but a national question. He proposed that the Federal Government should and would assume complete control of it in order that the devastation that accompanied the floods of 1927 would never again occur in the history of this Republic. Mr. Hoover did not mention or intimate that the local people would be called upon for any contribution whatsoever.

Now, when the legislation is at hand we find the Secretary of Commerce, Mr. Hoover, either lined up with the President or mum upon the question of local contributions. He is either fishing in Florida or contesting for State delegations for the presidential nomination with favorite sons in Ohio, Indiana, and other States, while those of us who relied upon him are completely disappointed. It reminds one of the old expression, "Where, oh where is Roderick Dhu when one blast from his bugle to-day" would or should mean so much for the people whom he led to believe he would do his utmost to help.

I deem it necessary to put into the RECORD the best data I can get upon the losses that occurred during the last flood in the sixth district of Arkansas, the district I have the honor to represent in this Congress:

ARKANSAS COUNTY

| | |
|---|---|
| 400 houses destroyed and damaged | $320,000 |
| 10 stores destroyed and damaged | 10,000 |
| 400 barns destroyed and damaged | 160,000 |
| 200 other buildings destroyed and damaged | 20,000 |
| Damage to merchandise | 10,000 |
| Damage to farm implements | 3,000 |
| Damage to feed | 3,000 |
| Damage to seed | 2,000 |
| Damage to household goods | 50,000 |
| 10 horses and mules lost | 1,000 |
| 25 cattle lost | 500 |
| 250 hogs lost | 2,500 |
| 350 poultry lost | 175 |
| Cost of replanting | 13,600 |
| Loss of rents on lands not cultivated by reason of overflow | 200,000 |
| Business losses | 250,000 |
| Damage to growing crops | 100,000 |
| Total property damage | 1,145,775 |

CLEVELAND COUNTY

| | |
|---|---|
| 10 houses damaged | 3,000 |
| 3 barns damaged | 600 |
| 2 other buildings destroyed | 600 |
| 20 other buildings damaged | 2,000 |
| Damage to farm implements | 1,000 |
| Damage to feed | 10,000 |
| Damage to seed | 100 |
| Damage to household goods | 500 |
| 10 horses and mules lost | 1,000 |
| 25 cattle lost | 625 |
| 500 hogs lost | 5,000 |
| 50 sheep and goats lost | 100 |
| 500 poultry lost | 500 |
| Cost of replanting | 5,000 |
| Damage to land by washing and spreading of obnoxious grasses | 1,000 |

| | |
|---|---|
| Loss of rents on lands not cultivated by reason of overflow | $500 |
| Business losses | 20,000 |
| Damage to growing cotton crop | 5,000 |
| Damage to private roads and bridges | 1,000 |
| Damage to private ditches and drains | 1,000 |
| Total property damage | 58,525 |

DREW COUNTY

| | |
|---|---|
| 10 horses and mules lost | 1,250 |
| 10 cattle lost | 400 |
| Business losses | 10,000 |
| Total property damage | 11,650 |

DESHA COUNTY

| | |
|---|---|
| 3,000 houses destroyed | 1,500,000 |
| 3,000 houses damaged | 900,000 |
| 35 stores destroyed | 26,250 |
| 165 stores damaged | 82,500 |
| 5 gins destroyed | 50,000 |
| 5 gins damaged | 5,000 |
| 500 barns destroyed | 300,000 |
| 500 barns damaged | 150,000 |
| 6,000 other buildings destroyed | 600,000 |
| Damage to merchandise | 75,000 |
| Damage to baled cotton | 175,000 |
| Damage to farm implements | 20,000 |
| Damage to automobiles | 45,000 |
| Damage to feed | 125,000 |
| Damage to seed | 50,000 |
| Damage to household goods | 1,800,000 |
| 3,000 horses and mules lost | 300,000 |
| 2,800 cattle lost | 56,000 |
| 3,500 hogs lost | 35,000 |
| 350 sheep and goats lost | 1,050 |
| 10,000 poultry lost | 5,000 |
| Cost of replanting | 100,000 |
| Damage to land by washing and spreading of obnoxious grasses | 375,000 |
| Loss of rents on lands not cultivated by reason of overflow | 500,000 |
| Damage to 100 miles of fence | 15,000 |
| Business losses | 1,000,000 |
| Damage to growing cotton crops | 500,000 |
| Damage to other growing crops | 150,000 |
| Damage to private roads and bridges | 50,000 |
| Damage to matured crops | 20,000 |
| Damage to school buildings and equipment | 15,000 |
| Total property damage | 9,025,800 |

GARLAND COUNTY

| | |
|---|---|
| 12 houses destroyed | 7,200 |
| 6 houses damaged | 2,400 |
| 5 stores destroyed | 3,000 |
| 2 stores damaged | 400 |
| 12 barns destroyed | 300 |
| 6 barns damaged | 750 |
| Damage to merchandise | 6,000 |
| Damage to farm implements | 2,500 |
| Damage to feed | 4,000 |
| Damage to household goods | 6,000 |
| 20 horses and mules lost | 2,000 |
| 40 cattle lost | 800 |
| 75 hogs lost | 750 |
| 250 poultry lost | 125 |
| Cost of replanting | 15,000 |
| Damage to land by washing and spreading of obnoxious grasses | 125,000 |
| Loss of rents on lands not cultivated by reason of overflow | 5,000 |
| Damage to 35 miles of fence | 7,000 |
| Business losses | 100,000 |
| Damage to growing cotton crop | 25,000 |
| Damage to other growing crops | 25,000 |
| Damage to private roads and bridges | 1,250 |
| Damage to private ditches and drains | 1,250 |
| Total property damage | 343,425 |

HOT SPRING COUNTY

| | |
|---|---|
| 40 houses damaged | 6,000 |
| 20 barns destroyed | 8,000 |
| 20 barns damaged | 2,000 |
| 75 other buildings destroyed | 3,750 |
| Damage to farm implements | 5,000 |
| Damage to feed | 10,000 |
| 100 horses and mules lost | 10,000 |
| 1,000 cattle lost | 20,000 |
| 1,000 hogs lost | 8,000 |
| Cost of replanting | 15,000 |
| Damage to land by washing and spreading of obnoxious grasses | 150,000 |
| Loss of rents on lands not cultivated by reason of overflow | 90,000 |
| Damage to 40 miles of fence | 2,000 |
| Business losses | 500,000 |
| Damage to growing cotton crop | 400,000 |
| Damage to other growing crops | 50,000 |
| Damage to private roads and bridges | 5,000 |
| Damage to private ditches and drains | 2,000 |
| Total property damage | 1,286,750 |

JEFFERSON COUNTY

| | |
|---|---|
| 10 houses destroyed | 20,000 |
| 500 houses damaged | 15,000 |
| 5 stores destroyed | 7,500 |
| 100 stores damaged | 10,000 |
| 20 gins damaged | 10,000 |
| 5 barns destroyed | 2,500 |
| 50 barns damaged | 2,500 |
| 200 other buildings destroyed | 3,100 |
| 2,000 other buildings | 8,000 |
| Damage to merchandise | 3,000 |
| Damage to baled cotton | $7,500 |
| Damage to oil mills | 5,000 |
| Damage to farm implements | 7,000 |
| Damage to automobiles | 1,000 |
| Damage to feed | 5,000 |
| Damage to seed | 1,000 |
| Damage to household goods | 2,000 |
| 10 horses and mules lost | 1,000 |
| 15 cattle lost | 250 |
| 700 hogs lost | 7,000 |
| 50 sheep and goats lost | 250 |
| 500 poultry lost | 500 |
| Cost of replanting | 15,000 |
| Damage to land by washing and spreading of obnoxious grasses | 25,000 |
| Loss of rents on lands not cultivated by reason of overflow | 50,000 |
| Damage to fences | 4,000 |
| Business losses | 75,000 |
| Damage to growing cotton crop | 50,000 |
| Damage to other growing crops | 10,000 |
| Damage to private roads and bridges | 5,000 |
| Damage to private ditches and drains | 3,000 |
| Damage to matured crops | 2,000 |
| Total property damage | 358,100 |

LINCOLN COUNTY

| | |
|---|---|
| 12 houses destroyed | 15,000 |
| 200 houses damaged | 10,000 |
| 1 store destroyed | 7,000 |
| Damage to merchandise | 5,000 |
| Damage to baled cotton | 2,000 |
| Damage to farm implements | 500 |
| Damage to feed | 10,000 |
| Damage to seed | 3,000 |
| 105 horses and mules lost | 10,500 |
| 200 cattle lost | 2,400 |
| 600 hogs lost | 4,800 |
| 10 sheep and goats lost | 25 |
| 2,500 poultry lost | 1,875 |
| Cost of replanting | 5,000 |
| Damage to land by washing and spreading of obnoxious grasses | 5,000 |
| Loss of rents on lands not cultivated by reason of overflow | 15,000 |
| Damage to 10 miles of fence | 2,000 |
| Business losses | 50,000 |
| Damage to growing cotton crop | 5,000 |
| Damage to other growing crops | 3,000 |
| Total property damage | 156,650 |

LONOKE COUNTY

| | |
|---|---|
| 50 houses damaged | 5,000 |
| 1 barn destroyed | 500 |
| 10 barns damaged | 500 |
| Damage to feed | 10,000 |
| Damage to seed | 4,000 |
| Damage to household goods | 3,500 |
| 2 horses and mules lost | 200 |
| 25 cattle lost | 1,250 |
| 1,500 poultry lost | 1,200 |
| 100 hogs lost | 1,500 |
| Cost of replanting | 75,000 |
| Damage to land by washing and spreading of obnoxious grasses | 50,000 |
| Loss of rents on lands not cultivated by reason of overflow | 50,000 |
| Damage to growing crop | 5,000 |
| Damage to private roads and bridges | 3,500 |
| Damage to private ditches and drains | 50,000 |
| Total property damage | 261,150 |

DALLAS COUNTY

By personal contact, telegrams, and letters I have attempted to get in touch with the situation to ascertain the amount of damages in Dallas County, and from such information available I can state that the damages to this county were more than $40,000.

SALINE COUNTY

By using the same means to ascertain the amount of damages for the county of Saline caused by the flood of 1927 the best estimate I can make is that the damages amount to more than $200,000.

GRANT COUNTY

By using the same information I have used in ascertaining the damages done in the other counties during the flood of 1927 my estimate of the amount of damage for the county of Grant is $50,000.

The total amount of damages, as near as can be ascertained, for the 12 counties embracing the sixth congressional district of Arkansas is $12,937,825.

This gross amount of damage that occurred by reason of the 1927 flood is obtained from the best authorities I can get on the subject. I can state that it is not overestimated, but the converse is probably true.

In addition to the excessive loss of personal property there was much damage done by reason of land being washed away and otherwise injured, and last, but not least, many lives were lost, there being 98 deaths in the State of Arkansas alone by reason of these floods.

I have attended many of the hearings before the Fool Control Committee of the House of Representatives and I can state that I do believe that committee has worked as hard as any committee ever worked and has diligently sought to bring forth a

bill that, if enacted into a law with some amendments more properly caring for the tributaries, would make it physically impossible for these floods to occur again.

I will not attempt to discuss the physical or engineering features of this mighty project, but I do know that the greatest engineering minds of our country are supporting the plan outlined in the House bill.

During the preparation of these observations the House of Representatives has passed, by a vote of 254 for and 91 votes against, Senate bill 3740, known as the Jones bill, with many of the features of the Reid bill being adopted to said Senate bill. While this bill is hardly all that we had hoped would pass the House of Representatives, all matters considered, I think this a good bill. I do believe that when this bill is finally put into operation that it will forever prevent the menace of floods on the Mississippi River and her tributaries.

Of course, this bill is still before the American Congress and will now go to the Senate, where we believe the amendments adopted by the House will be concurred in by the Senate. The author of the bill, Senator JONES, of the State of Washington, has stated in public print that the amendments adopted by the House would, in his judgment, strengthen the bill.

It is still urged by some of the administration's leaders that the President will veto this bill. It is urged that the President will veto the bill because the bill does not provide sufficiently for local contributions, and further because the bill does not provide for the upkeep of certain projects after same have been constructed by the Federal Government. Leaders for the administration state there are other objections on behalf of the President of a similar import.

I do not believe the President of the United States will veto this bill, which will doubtless be before the Congress for many days yet, but when it finally reaches the President's hand I do not believe that the President of this great Republic with the light that will be before him at that time will veto and strike down the relief offered in the bill. As stated, this bill may be far from perfect, but it does embrace the work of those of us who have done the best we could to remedy an evil that is recognized to be the great, gigantic problem of America to-day. It is not necessary to comment upon the necessity for legislation along this line; it is conceded in every part of America. It is not necessary to pick out specific instances where it is the duty of the Government of the United States to go to the relief of the affected territory. Suffice it to say that more than two-thirds of the Members of the House have subscribed their names to a bill that in the main will give protection in the future to our people who so richly deserve it.

Future Congresses will doubtless be called upon and doubtless should be called upon to enact statutes perfecting the plan as outlined in this bill. It was said on the floor of the House that before the plans as outlined in this bill are carried out it will cost the Government more than a billion dollars. To my mind, this is no argument against it. We only have one Mississippi River; it is our river, it is the Federal Government's river, and it is our duty to assume the responsibility.

Since the signing of the Declaration of Independence, as a whole the leaders of thought of this Nation have attempted to study the problems we have with us and to properly analyze and solve them, whether they be problems of war or questions before us in peace time. The passage of this bill and the putting into operation thereof will not require the physical bravery which has actuated our great generals in the past, but it does and will require the expenditure of a vast sum of money and it will require an exemplification of the best engineering thought of the world. No one can state that those charged with the promulgation of this plan have acted hastily. For more than six months the Committee on Flood Control has been taking testimony not only with reference to the damages caused by the flood of 1927 but with a view of finding a plan that will prevent a reoccurrence, or even more, an overflow whereby the slightest damage may occur. Thousands of witnesses have been heard, thousands of dollars expended in an honest endeavor to accumulate data upon which to act. And now that the Congress has acted let our people enter into the operation of this plan whole-heartedly with full confidence in the ability and integrity of those called upon officially to carry out the provisions of this bill.

Mr. GARBER. Mr. Speaker and Members of the House, the States of Oklahoma, Kansas, Texas, New Mexico, and Colorado, members of the Interstate Commission for the Control of the Arkansas and the Red Rivers, have through noted civilian engineers studied the reservoir question with a view of holding back the flood run-off from a sufficient part of the drainage basin to enable the river and its major tributaries to safely pass the remaining storm water.

They started on a theory of holding back the run-off from one-third of the area, but developed their plan to the control of something more than 40 per cent of any possible flood run-off, and of more than 50 per cent of the basin area. So far, no reported storm has ever covered the entire two basins, which comprise nearly one-fourth of the Mississippi Valley.

The civilian engineers' plan was exactly the opposite of the Army engineers' plan, the plan of the civilian engineers being to keep the floods out of the river and the Army plan being to let the floods into the river and there undertake to capture or control them.

The civilian plan resulted in the adoption of approximately 200 sites for reservoirs distributed throughout the drainage basin of the two rivers, keeping on the tributaries and off the main stem of the stream so that no storm on the basin could escape the control.

The surveys being made and the costs being carefully calculated, it developed that complete and assured control of the entire basin of the two rivers could be accomplished by the widely distributed reservoirs at a cost of approximately $100,000,000, which is about half the amount of money suggested by the Army engineers to care for the waters after they reach the so-called alluvial valley.

These two rivers furnished something more than half of the flood of 1927, and had these two rivers been under control the overflow of 1927 would not have occurred and the entire lower country would have been saved.

Considering the area and the character of the country, the length of the rivers, the average annual rainfall, and seasonal conditions, very competent engineers have estimated that the corresponding and equal control of the Missouri River, of three times the area, but much less flood flow, could be handled at about $165,000,000; that the upper Mississippi could be kept within bank limits for $40,000,000, and that the Ohio and tributaries could be completely reservoired to keep it within undestructive bank limits for $250,000,000; so that the total prospective cost of reservoir control by the civilian plan for the entire Mississippi Valley should be somewhere between $500,000,000 and $600,000,000.

A large part of this would be reimbursed in the course of years, the greatest reimbursement being the introduction into the country of dependable bodies of water where water does not exist, as promotive of the pleasures and enjoyments of life, fish and game production, and comfort accessible to people. One who has not lived in the interior has no comprehension of the value of this use. In the very far West, irrigation and tree growing would ultimately—after 20 years or more, which is a short period in governmental life—repay the outlay.

Finally, the regulated flow of these rivers would assure navigation to an extent never before known or enjoyed; would stop the washing out of the river banks and levees by the high floods, make dredging of bars and revetting and riprapping of the banks unnecessary. It is thus shown to be more advisable than the other plans of Mississippi River control.

It is also much cheaper. I know of no civilian engineer who has figured the cost of the Jadwin plan at less than $1,000,000,000, and the more general opinion is $1,500,000,000. Outside of initial money outlay, it takes out of the lower Mississippi Valley 10,000 square miles, or one-third of the valley, and dedicates it to flood ways. It is really turning back to the river for flood use a greater part of the Mississippi Valley than the river would ever overflow if there had never been built a single foot of levees. Stated in the reverse, it means that after having spent $500,000,000 to keep the Mississippi River off of the lower valley it is now proposed to spend over a billion dollars to turn it back into the occupation of more of the valley than it in nature occupied.

The reservoir board of the United States Army did make a report on reservoirs last year after two or three months of conjecture, but without any work. The interstate commission submitted to them its maps, figures, locations, and estimates, both of cost and effect. Some of the members of the board have admitted that the distributed reservoirs would have the effect stated and would cost substantially as estimated, but the reservoir board abandoned on the Arkansas and Red River Basins almost the entire work that has been laboriously and painstakingly done the past eight years, and at an expense of several hundred thousand dollars, and substituted, conjectured, or projected reservoirs across the main stems of the big rivers like the Red, the Arkansas, the Missouri, and the Mississippi, as, for instance, they placed one reservoir across the Mississippi just above Cairo, one across the Missouri just above the confluence of the Mississippi and several others in the main stem of such rivers, to which no civilian engineer yet interviewed has given approval. The effect credited to such reservoirs was

then given as very inadequate to accomplish flood control and the cost as prohibitive.

The work of the Interstate Commission on the Arkansas and Red Rivers was the work of a hundred or more very competent civil engineers, who had spent a lifetime in the practice of their profession. The work has been scrutinized, considered, and discussed by some of the most distinguished engineers in America, and has met the approval of everyone to whom it has been submitted, both as to cost and effect.

Considering the area alone, the cost of the Army plan approximates $1,000 per square mile of the Mississippi Valley. The cost of the Mississippi River plan is approximately $700 per square mile. The cost of the reservoir plan on the Arkansas and the Red Rivers, the two most dangerous rivers of the Mississippi tributaries and furnishing more than half of the 1927 flood, is $360 per square mile. Considered specifically as to the 1927 flood on the Arkansas River, which contributed more than half of the flood and may be said to have done practically all of the damage, the storm area of the 1927 flood would have been controlled under the reservoir plan of the interstate commission at a cost of about $21,000,000. That is to say, $21,000,000 would, put into the reservoirs selected by the engineers for the interstate commission, have prevented the Arkansas flood of 1927, which in turn would have prevented the Mississippi flood of 1927, the destruction of which has been given as from $400,000,000 to $800,000,000.

Charging against the Arkansas only half of the destruction of the 1927 flood, it could have been prevented by reservoirs at one-twentieth of the cost of destruction in that one year.

All these matters were fairly and fully presented to the Army engineers, but were discarded for the suggested plan of buying half of the lower river valley for the river and walling the flood waters off the other half.

In point of time, the Army plan contemplates 10 years before any effect could be had, as the chain is not completed without the last link. Every reservoir installed has immediate effect. The entire Arkansas and Red River Basins, practically one-fourth of the area and actually the dangerous half of the Mississippi flood, could be installed in two years. Nine-tenths of it could be installed the first year after the money was available. Four of the reservoirs are large enough to probably require two years to complete. However, their incompleteness would not impair the effect of the others that could be completed in a year's time. Moreover, a break anywhere in the levee chain on a floodway chain destroys the whole chain. A loss of one reservoir does not interfere with another one.

If the levee system proves insufficient or inadequate, the entire system must be increased to supply the adequacy along the whole length of the levees, 1,800 miles. If the reservoir system proves inadequate, additional reservoirs may be installed without in any way affecting the other works, other than to make them safer, as the civilian engineers stay away from the main stream and control the drainage area, the antithesis of the Army engineers keeping on the main stream and fighting the flood after it has accumulated.

The civilian plan places the reservoirs generally on unused and inexpensive land, where no economic loss is entailed and no expensive improvements must be changed. The Army plan sacrifices the richest of the Mississippi Valley and necessitates changes of railroads, highways, and other improvements, easily figured more than $100,000,000. In other words, the rearrangement of utilities alone under the Army plan exceeds the carefully calculated cost of complete control of the Arkansas and the Red Rivers under the civilian plan.

The interstate commission is prepared to submit what ought to be satisfactory proof that the reservoir plan is the cheapest, quickest, safest, more logical, and most certain of all plans suggested. In addition, it protects the properties in the valley of the river above the alluvial basin, where vastly greater property losses occur and much greater public inconvenience and interruption of commerce occur, and where greater national benefits would be received than from the installation of the Army plan.

EXTENSION OF REMARKS

Mr. REID of Illinois. Mr. Speaker, when I made the request the other day that Members might have five days within which to extend their remarks in the RECORD upon this bill, I made it for five days from that time. I ask unanimous consent to extend that now to five days from to-day.

The SPEAKER. The gentleman from Illinois asks unanimous consent that all Members may have five days from to-day within which to extend their own remarks in the RECORD upon this bill. Is there objection?

There was no objection.

Mr. MAJOR of Illinois. Mr. Speaker, I ask unanimous consent to print in the RECORD in connection with the extension of my remarks upon the bill two newspaper editorials and some letters.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD by quoting from newspaper editorials on this bill. Is there objection?

Mr. MADDEN. Mr. Speaker, I insist that any extension of remarks upon this subject shall be the remarks of the individual who makes them, without newspaper clippings or anything.

Mr. LAGUARDIA. How about the law on the subject?

Mr. MADDEN. Well, there is no law on this subject.

Mr. MAJOR of Illinois. What about witnesses who testified before the committee?

Mr. MADDEN. The gentleman means he wants to quote their testimony? I do not think we ought to have the testimony repeated. There have been thousands of pages of it. I think we ought to confine these extensions to the remarks of gentlemen who made them.

The SPEAKER. The gentleman from Illinois objects.

PENSIONS—WITHDRAWAL OF A CONFERENCE REPORT

Mr. ELLIOTT. Mr. Speaker, I ask unanimous consent to withdraw from the files of the House a conference report which I filed yesterday on the Senate bill 2900.

The SPEAKER. The gentleman from Indiana asks unanimous consent to withdraw from the files of the House a conference report upon the bill referred to. Is there objection?

There was no objection.

PRINTING OF THE BILL

Mr. REID of Illinois. Mr. Speaker, I ask unanimous consent that the bill as it passed to-day—that is, including the amendments—be printed in the RECORD.

The SPEAKER. The gentleman asks unanimous consent that the bill be printed in the RECORD as it passed to-day. Is there objection?

There was no objection.

Mr. REID of Illinois. Mr. Speaker, would that include also an order for the printing of the bill otherwise than in the RECORD? If not, I ask that that be done.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the bill may be printed as it passed to-day. Is there objection?

There was no objection.

The bill is as follows:

An act (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes

*Be it enacted, etc.*, That the project for the flood control of the Mississippi River in its alluvial valley and for its improvement from the Head of the Passes to Cape Girardeau, Mo., in accordance with the engineering plan set forth and recommended in the report submitted by the Chief of Engineers to the Secretary of War dated December 1, 1927, and printed in House Document No. 90, Seventieth Congress, first session, is hereby adopted and authorized to be prosecuted under the direction of the Secretary of War and the supervision of the Chief of Engineers: *Provided*, That a board to consist of the Chief of Engineers, the president of the Mississippi River Commission, and a civil engineer chosen from civil life, to be appointed by the President, by and with the advice and consent of the Senate, whose compensation shall be fixed by the President and be paid out of the appropriations made to carry on this project, is hereby created; and such board is authorized and directed to consider the engineering differences between the adopted project and the plans recommended by the Mississippi River Commission in its special report dated November 28, 1927, and after such study and such further surveys as may be necessary, to recommend to the President such action as it may deem necessary to be taken in respect to such engineering differences, and the decision of the President upon all recommendations or questions submitted to him by such board shall be followed in carrying out the project herein adopted. The board shall not have any power or authority in respect to such project except as hereinbefore provided. Such project and the changes therein, if any, shall be executed in accordance with the provisions of section 8 of this act. Such surveys shall be made between Baton Rouge, La., and Cape Girardeau, Mo., as the board may deem necessary to enable it to ascertain and determine the best method of securing flood relief in addition to levees, before any flood-control works other than levees and revetments are undertaken on that portion of the river: *Provided*, That all diversion works and outlets constructed under the provisions of this act shall be built in a manner and of a character which will fully and amply protect the adjacent lands: *Provided further*, That pending completion of any flood way, spillway, or diversion channel the areas within the same shall be given the same degree of protection as is

afforded by levees on the west side of the river contiguous to the levee at the head of said flood way, but nothing herein shall prevent, postpone, delay, or in anywise interfere with the execution of the project on the east side of the river, including raising, strengthening, and enlarging the levees on the east side of the river. The sum of $325,000,000 is hereby authorized to be appropriated for this purpose.

All unexpended balances of appropriations heretofore made for prosecuting work of flood control on the Mississippi River in accordance with the provisions of the flood control acts approved March 1, 1917, and March 4, 1923, are hereby made available for expenditure under the provisions of this act, except section 13.

SEC. 2. That it is hereby declared to be the sense of Congress that the principle of local contributions toward the cost of flood-control work, which has been incorporated in all previous national legislation on the subject, is sound, as recognizing the special interest of the local population in its own protection, and as a means of preventing inordinate requests for unjustified items of work having no material national interest. As a full compliance with this principle in view of the great expenditure, estimated at approximately $292,000,000, heretofore made by the local interests in the alluvial valley of the Mississippi River for protection against the floods of that river; in view of the extent of national concern in the control of these floods in the interests of national prosperity, the flow of interstate commerce, and the movement of the United States mails; and, in view of the gigantic scale of the project, involving flood waters of a volume and flowing from a drainage area largely outside the States most affected, and far exceeding those of any other river in the United States, no local contribution to the project herein adopted is required.

SEC. 3. Except when authorized by the Secretary of War upon the recommendation of the Chief of Engineers, no money appropriated under authority of this act shall be expended on the construction of any item of the project until the States or levee districts have given assurances satisfactory to the Secretary of War that they will (a) maintain all flood-control works after their completion, except controlling and regulating spillway structures, including special relief levees; maintenance includes normally such matters as cutting grass, removal of weeds, local drainage, and minor repairs of main river levees; (b) agree to accept the title to land turned over to them under the provisions of section 4; (c) provide, without cost to the United States, all rights of way for levee foundations and levees on the main stem of the Mississippi River between Cape Girardeau, Mo., and the Head of Passes.

No liability of any kind shall attach to or rest upon the United States for any damage from or by floods or flood waters at any place: *Provided, however,* That if in carrying out the purposes of this act it shall be found that upon any stretch of the banks of the Mississippi River it is impracticable to construct works for the protection of adjacent lands, and that such adjacent lands will be subject to damage by the execution of the general flood-control plan, it shall be the duty of the board herein provided to cause to be acquired on behalf of the United States Government either the absolute ownership of the lands so subjected to overflow, or floodage rights over such land.

SEC. 4. The United States shall provide flowage rights for destructive flood waters that will pass by reason of diversions from the main channel of the Mississippi River and shall control, confine, and regulate such diversions.

The Secretary of War may cause proceedings to be instituted for the acquirement by condemnation of any lands, easements, or rights of way which, in the opinion of the Secretary of War, are needed in carrying out this project, the said proceedings to be instituted in the United States district court for the district in which the land, easement, or right of way is located. In all such proceedings the court, for the purpose of ascertaining the value of the property and assessing the compensation to be paid, shall appoint three commissioners, whose award, when confirmed by the court, shall be final. When the owner of any land, easement, or right of way shall fix a price for the same which, in the opinion of the Secretary of War is reasonable, he may purchase the same at such price; and the Secretary of War is also authorized to accept donations of lands, easements, and rights of way required for this project. The provisions of sections 5 and 6 of the river and harbor act of July 18, 1918, are hereby made applicable to the acquisition of lands, easements, or rights of way needed for works of flood control: *Provided,* That the title to any land acquired under the provisions of this section, and used in connection with the works authorized by this act, shall be turned over without cost to the States or levee districts, which shall retain the same for the purposes specified in this act.

SEC. 5. Subject to the approval of the heads of the several executive departments concerned, the Secretary of War, on the recommendation of the Chief of Engineers, may engage the services and assistance of the Coast and Geodetic Survey, the Geological Survey, or other mapping agencies of the Government, in the preparation of maps required in furtherance of this project, and funds to pay for such services may be allotted from appropriations made under the authority of this act.

SEC. 6. Funds appropriated under authority of section 1 of this act may be expended for the prosecution of such works for the control of the floods of the Mississippi River as have heretofore been authorized and are not included in the present project, including levee work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on the outlets and tributaries of the Mississippi River between Rock Island and Head of the Passes in so far as such outlets or tributaries are affected by the backwaters of the Mississippi: *Provided,* That for such work on tributaries the States or levee districts shall provide rights of way without cost to the United States, contribute 33⅓ per cent of the cost of the works, and maintain them after completion: *And provided further,* That not more than $10,000,000 of the sum authorized in section 1 of this act shall be expended under the provisions of this section.

In an emergency funds appropriated under authority of section 1 of this act may be expended for the maintenance of any levee when it is demonstrated to the satisfaction of the Secretary of War that the levee can not be adequately maintained by the State or levee district.

SEC. 7. That the sum of $5,000,000 is authorized to be appropriated as an emergency fund to be allotted by the Secretary of War on the recommendation of the Chief of Engineers, in rescue work or in the repair or maintenance of any flood-control work on any tributaries of the Mississippi River threatened or destroyed by flood, including the flood of 1927.

SEC. 8. The project herein authorized shall be prosecuted by the Mississippi River Commission under the direction of the Secretary of War and supervision of the Chief of Engineers and subject to the provisions of this act. It shall perform such functions and through such agencies as they shall designate after consultation and discussion with the president of the commission. For all other purposes the existing laws governing the constitution and activities of the commission shall remain unchanged. The commission shall make inspection trips of such frequency and duration as will enable it to acquire first-hand information as to conditions and problems germane to the matter of flood control within the area of its jurisdiction; and on such trips of inspection ample opportunity for hearings and suggestions shall be afforded persons affected by or interested in such problems. The president of the commission shall be the executive officer thereof and shall have the qualifications now prescribed by law for the Assistant Chief of Engineers, shall have the title brigadier general, Corps of Engineers, and shall have the rank, pay, and allowances of a brigadier general while actually assigned to such duty: *Provided,* That the present incumbent of the office may be appointed a brigadier general of the Army, retired, and shall be eligible for the position of president of the commission if recalled to active service by the President under the provisions of existing law.

The salary of the president of the Mississippi River Commission shall hereafter be $10,000 per annum, and the salary of the other members of the commission shall hereafter be $7,500 per annum. The official salary of any officer of the United States Army or other branch of the Government appointed or employed under this act shall be deducted from the amount of salary or compensation provided by, or which shall be fixed under, the terms of this act.

SEC. 9. The provisions of sections 13, 14, 16, and 17, of the river and harbor act of March 3, 1899, are hereby made applicable to all lands, waters, easements, and other property and rights acquired or constructed under the provisions of this act.

SEC. 10. That it is the sense of Congress that the surveys of the Mississippi River and its tributaries, authorized pursuant to the act of January 21, 1927, and House Document No. 308, Sixty-ninth Congress, first session, be prosecuted as speedily as practicable, and the Secretary of War, through the Corps of Engineers, United States Army, is directed to prepare and submit to Congress at the earliest practicable date projects for flood control on all tributary streams of the Mississippi River system subject to destructive floods, which projects shall include: The Red River and tributaries, the Yazoo River and tributaries, the White River and tributaries, the St. Francis River and tributaries, the Arkansas River and tributaries, the Ohio River and tributaries, the Missouri River and tributaries, and the Illinois River and tributaries; and the reports thereon, in addition to the surveys provided by said House Document 308, Sixty-ninth Congress, first session, shall include the effect on the subject of further flood control of the lower Mississippi River to be attained through the control of the flood waters in the drainage basins of the tributaries by the establishment of a reservoir system; the benefits that will accrue to navigation and agriculture from the prevention of erosion and siltage entering the stream; a determination of the capacity of the soils of the district to receive and hold waters from such reservoirs; the prospective income from the disposal of reservoired waters; the extent to which reservoired waters may be made available for public and private uses; and inquiry as to the return flow of waters placed in the soils from reservoirs, and as to their stabilizing effect on stream flow as a means of preventing erosion, siltage, and improving navigation: *Provided,* That before transmitting such reports to Congress the same shall be presented to the board

created in section 1 of this act, and its conclusions and recommendations thereon shall be transmitted to Congress by the Secretary of War with his report.

The sum of $5,000,000 is hereby authorized to be used out of the appropriation herein authorized in section 1 of this act, in addition to amounts authorized in the river and harbor act of January 21, 1927, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers for the preparation of the flood-control projects authorized in this section: *Provided further,* That the flood surveys herein provided for shall be made simultaneously with the flood-control work on the Mississippi River provided for in this act: *And provided further,* That the President shall proceed to ascertain through the Secretary of Agriculture the extent to and manner in which the floods in the Mississippi Valley may be controlled by proper forestry practice.

SEC. 11. That the Secretary of War shall cause the Mississippi River Commission to make an examination and survey of the Mississippi River below Cape Girardeau, Mo., (a) at places where levees have heretofore been constructed on one side of the river and the lands on the opposite side have been thereby subjected to greater overflow, and where, without unreasonably restricting the flood channel, levees can be constructed to reduce the extent of this overflow, and where the construction of such levees is economically justified, and report thereon to the Congress as soon as practicable with such recommendations as the commission may deem advisable; (b) with a view to determining the estimated effects, if any, upon lands lying between the river and adjacent hills by reason of overflow of such lands caused by the construction of levees at other points along the Mississippi River, and determining the equities of the owners of such lands and the value of the same, and the commission shall report thereon to the Congress as soon as practicable with such recommendation as it may deem advisable: *Provided,* That inasmuch as the Mississippi River Commission made a report on the 26th day of October, 1912, recommending a levee to be built from Tiptonville, Tenn., to the Obion River in Tennessee, the said Mississippi River Commission is authorized to make a resurvey of said proposed levee and a relocation of the same if necessary, and if such levee is found feasible, and is approved by the board created in section 1 of this act, and by the President, the same shall be built out of appropriations hereafter to be made.

SEC. 12. All laws or parts of laws inconsistent with the above are hereby repealed.

SEC. 13. That the project for the control of floods in the Sacramento River, Calif., adopted by section 2 of the act approved March 1, 1917, entitled "An act to provide for the control of the floods of the Mississippi River and of the Sacramento River, Calif., and for other purposes," is hereby modified in accordance with the report of the California Débris Commission submitted in Senate Document No. 23, Sixty-ninth Congress, first session: *Provided,* That the total amounts contributed by the Federal Government, including the amounts heretofore contributed by it, shall in no event exceed in the aggregate $17,600,000.

SEC. 14. In every contract or agreement to be made or entered into for the acquisition of land either by private sale or condemnation as in this act provided, the provisions contained in section 3741 of the Revised Statutes, being section 22 of title 41 of the United States Code, shall be applicable.

MESSAGE FROM THE PRESIDENT—OAKLAND HARBOR, CALIF.

The SPEAKER laid before the House the following message from the President of the United States, which was read:

*To the House of Representatives:*

In compliance with the resolution of the House of Representatives of April 20, 1928 (the Senate concurring), I return herewith H. J. Res. 244, entitled "Joint resolution authorizing a modification of the adopted project for Oakland Harbor, Calif."

CALVIN COOLIDGE.

THE WHITE HOUSE, *April 24, 1928.*

HOUSE CONCURRENT RESOLUTION

Mr. CARTER. Mr. Speaker, I ask unanimous consent for the present consideration of the concurrent resolution which I send to the desk and ask to have read.

The SPEAKER. The gentleman from California asks unanimous consent for the present consideration of the resolution, which the Clerk will report.

The Clerk read as follows:

House Concurrent Resolution 32

*Resolved by the House of Representatives (the Senate concurring),* That the action of the Speaker of the House of Representatives and of the Vice President in signing the joint resolution (H. J. Res. 244) entitled "A joint resolution authorizing the modification of the adopted project for Oakland Harbor, Calif.," be rescinded, and that in the reenrollment of said joint resolution the word "June" be stricken out and the word "January" be inserted in lieu thereof.

The SPEAKER. Is there objection?

Mr. CHINDBLOM. Reserving the right to object, Mr. Speaker, does the gentleman actually want the former action rescinded? The resolution is back here.

Mr. CARTER. Yes. It has to be signed over again, and you have to rescind their action in signing.

The SPEAKER. Is there objection?

Mr. CHINDBLOM. Mr. Speaker, I withdraw my reservation.

The SPEAKER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

ORDER OF BUSINESS

Mr. BANKHEAD. May I ask the gentleman from Connecticut [Mr. TILSON] if it is the understanding that Calendar Wednesday will function to-morrow and the Committee on the Merchant Marine and Fisheries will have the call?

Mr. TILSON. There has heretofore been some unwillingness to dispense with business in order on Calendar Wednesday. At this point in the session I think that I should not ask that Calendar Wednesday be dispensed with to-morrow unless the committee most directly concerned requests it. This has not been done in this case.

Mr. BANKHEAD. Then that means that there will be Calendar Wednesday to-morrow?

Mr. TILSON. So far as I know, that is the program.

Mr. HASTINGS. May I ask if the McNary-Haugen bill will be taken up to-morrow?

Mr. TILSON. I might ask unanimous consent to consider to-morrow a rule for the consideration of the McNary-Haugen bill, so that we could begin on Thursday morning with the bill itself.

Mr. BANKHEAD. Why not ask for that now?

Mr. RAMSEYER. I think that nothing can be gained by mapping out a program here to-day like that.

Mr. TILSON. If there is objection, Mr. Speaker, of course, I shall withdraw the request.

Mr. GARNER of Texas. I understand the policy of Congress is that in case there is no objection to dispensing with Calendar Wednesday it will be dispensed with.

Mr. TILSON. There have been occasions when committees concerned have asked for it to be dispensed with by a two-thirds vote.

Mr. GARNER of Texas. I do not know of any more important bill to consider in the House than the McNary-Haugen bill.

Mr. TILSON. To-morrow, if two-thirds should insist that we do so, it would be done. I would not ask now without the request of the committee next on the calendar.

Mr. GARRETT of Tennessee. With respect to the McNary-Haugen bill, I understand it is desired by the committee to have some change made in the rule. I do not know just what it is, but I understood that a meeting of the Committee on Rules would be called for to-morrow morning.

Mr. TILSON. To change the rule?

Mr. GARRETT of Tennessee. Yes.

Mr. TILSON. I have heard nothing of what the gentleman states.

Mr. WHITE of Maine. Mr. Speaker, the Committee on the Merchant Marine and Fisheries has three bills ready to present to-morrow. If it is the desire of the House to act on a rule making the farm relief bill in order, I would be willing to give way. We have three bills, and I think we could dispose of them within a reasonably short time.

Mr. MADDEN. What three bills?

Mr. WHITE of Maine. One establishing a steamboat-inspection office in the State of Washington.

Mr. MADDEN. Why an extra steamboat-inspection office?

Mr. WHITE of Maine. I think that will appear when the bill is taken up and discussion had of it. The Committee on the Merchant Marine and Fisheries was satisfied not only of the propriety but of the necessity for it, and has so reported to the House.

Now, there is another bill that ought not to take a long time unless many Members desire to talk upon it. That is a bill extending the thanks of Congress to the officers and crews of various ships that have saved life at sea under very extraordinary conditions and circumstances of heroism.

The third bill authorizes and directs the Bureau of Fisheries to study ways and means of protecting fish from irrigation and reclamation projects in the West. It appears that at the present time millions upon millions of edible fish are drawn from the lakes and headwaters of streams down into these irrigation ditches and when the water is let out these fish are entirely lost. We regard it as a conservation measure of real importance.

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. WHITE of Maine. Yes. I think these bills might be passed with reasonable discussion, or they might take considerable time.

Mr. CRAMTON. Have the authorities of the Reclamation Service had a chance to be heard on the last bill? Have the Interior Department authorities had any chance to be heard on it?

Mr. JOHNSON of Washington. I believe not; but hearings have been had, and the bill has been reported by agreement with the Budget.

Mr. CRAMTON. Can the gentleman give the number of that bill?

Mr. WHITE of Maine. At the moment I can not give the number of the bill. The reclamation officers were not before the committee.

Mr. LAGUARDIA. It is not the bill which creates new fisheries in various States?

Mr. WHITE of Maine. Oh, no; it simply asks the Bureau of Fisheries to study ways and means for preventing this great destruction of fish.

Mr. CRAMTON. Then it is only a preliminary study?

Mr. WHITE of Maine. That is what it is.

Mr. CRAMTON. Of course, if it is only a preliminary study, I am not likely to object.

Mr. WHITE of Maine. It would be perfectly agreeable to our committee to have the rule on the farm bill taken up when we have completed these three bills, and if it is the desire of the House to do that to-morrow we will expedite, just as rapidly as we can, the consideration of these bills.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted—

To Mr. DOUGLAS of Arizona, at the request of Mr. LANHAM, for two days, on account of illness.

To Mr. TAYLOR of Tennessee, for one week, to attend State convention in Tennessee.

BUILDING FOR PERMANENCY AND ULTIMATE SUCCESS IN POLITICS

Mr. HAMMER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech delivered by me on November 11, 1927, to the Democratic Club of High Point, N. C.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. HAMMER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following speech delivered by me November 11, 1927, to the Democratic Club, of High Point, N. C.:

It is said that years ago an obnoxious bill was brought up before a legislature in Illinois with orders from the party in control that it must be passed. The franchises carried in the bill would make piles of money for certain great and powerful interests that had been liberal in their campaign contributions to the political party which had triumphed in the preceding election.

The story goes that in the assembly there was a fine, clean young lawyer who was deeply concerned about the stand he should take in the matter. He said to a friend: "I am up against it. I know this bill is bad. You know it. Everybody knows it. I can not maintain my self-respect and vote the way they demand. If I do not vote for it, they say I'm through. Some of the men in charge of the bill are my friends. They have stood by me, and I ought to stand by them. What shall I do?" His friend said, "Why don't you talk to Roger Sullivan and get his advice?" The young man went to Sullivan and was advised to vote as his conscience should dictate. The arguments which that young man presented were the strongest ones made against the bill. It was defeated, and many prophesied his political death. Instead of being killed off, however, he went on up higher and is now a distinguished judge of the highest court in one of our large Western States.

Everywhere wise party leaders who build for permanency are on the lookout for candidates of integrity and uprightness who are able to command the respect of the public. They do not want weak men, mentally or morally unfit, for that type is known to develop such enormous appetites that they eventually eat up the party. Leaders are seeking power more than money. They are anxious to have a good government in order to maintain their power. They know that they can not lead long unless they seek out the best men for public office.

When a government is not good it is not always the fault of the party organizations. Much of the responsibility rests with the eminently respectable people who are so good that they fear contamination from engaging in an effort to nominate and elect the best men. That class of people think themselves too good to attend ward meetings or to run for office or do anything in the open. Sometimes they contribute money for campaign purposes and then refuse to attend the primaries or vote in the elections. It takes both money and time to run an organization. It is the duty of every citizen to take a hand in his own Government.

Politics and politicians are no worse and no better than business and the average business man. It is true that we find now and then, and here and there, some graft and dishonesty in politics. That also happens in business. We hear much about corruption in politics and little about the wrong conduct of business because our politicians are in the limelight and when anything goes wrong there is a great noise and many investigations. That makes some people say that all political life is dirty and that decent people should stay out of politics. As a matter of fact, politicians lead exceptionally clean lives; first, because they want to; and, secondly, because they have to, for the searchlights of the public are continually turned upon their every movement.

Those people who are too good to take any hand in seeing how they are governed seldom let their leaders hear from them, or have the benefit of their advice, unless they want something for themselves or want to back a reform against a leader. About two-thirds of such reform movements are saintly efforts of the "outs" to get in. The other third would not be necessary if the reformers would do their duty as citizens in the first place and take a proper interest in their party organizations. Every now and then some fellow comes along and talks about cleaning up and making things decent. He cries out long and loud against what he is pleased to call "peanut" politics.

A man who cries out against the existing order should take an inventory of his own physiognomy and see if he is any better than the politicians he derides and condemns. If he should decide that he is a finer breed, he should look for a few others of like thought and establish a new government of his own creation.

An able politician tries to play fair in his appointments for the good of his constituents and for the preservation of his own political future. Of course he will choose his friends rather than his enemies. He can not hope to accomplish the best and most desirable results unless his policies are executed by those who are friendly to him and to his cause. Politics is but human nature—sordid as human nature is sordid and good as human nature is good. It has bad in it and it has good in it. If we would have the good, we must choose wisely our leaders.

POLITICAL LEADERS HUMAN

Plainly our political leaders are as human as are the balance of us. Suppose, however, that we had no good leaders and no real guidance of our party organization, what sort of candidates would be selected? The loud speakers, the makers of the biggest noise and the most extravagant promises, would float to the top. All people everywhere need wise, intelligent leadership, for without leadership there must come decay and death. Responsibility rests to a great extent in the selection and guidance of proper leadership. Those elected to office should, on the other hand, think first, of course, of the public interest and, second, of the party and its leadership. This is a good, sound Democratic doctrine that has been preached and expounded from Jefferson to Wilson.

Sometimes people become indifferent and need shaking up. Such was the case when Roosevelt disciplined his party.

With many the most popular indoor sport is criticizing public men and their acts. As a rule such critics know so little of public affairs that they just act on a general clean-up principle and take a stand against whoever happens to be doing something.

Of course, criticism by the opposition is proper and permissible. Their dissatisfaction prevents stagnation and often is most healthy and useful in preventing misconduct by public officials, but the first principle of intelligent, constructive criticism is that the critic should have a general knowledge of the conditions against which his remarks are directed. "I am a dissatisfied Democrat," Claude Kitchen used to say. So am I. Contentment is stagnation and death.

If we are discontented with what we have and want better schools, better roads, better streets, or better public officials, we should realize that all of these things cost money and that taxes must necessarily be increased if we are to obtain and enjoy these benefits. We should not seek to turn out a set of local public officials for getting what we ask for at an increased cost unless waste or extravagance is found in the getting of these benefits. Some one has truthfully said that most officials are damned if they do and damned if they don't, and have to spend so much time figuring the strength of the pros and cons of the damns that the wonder is that they can find time for proper service to the public.

We try to persuade ourselves that this is a government by law, while in truth it is a government of human beings by human beings who, through wise leadership, are seeking to conserve the rights and advance the interests of the majority.

We talk about statesmen elsewhere being superior to the home product, while in truth and in fact we have as a rule better statesmen than the other nations. After the Spanish-American War we freed Cuba and paid $20,000,000 for the Philippines. After the World War Wilson doggedly refused to take any of the spoils offered us—for instance, Armenia and a few odds and ends of protectorates. The European statesmen were so impressed with our generosity that they thought up a plan to secure the inclusion of their war debts among our gifts. Our Foreign

Service has a habit, or has had until quite recently, of telling the truth and keeping its promises.

As a matter of fact politics is on a higher plane in America than in any other country on earth, and that is the case also with our business affairs. We have some plain, everyday cheating, but our generally high standard of business is recognized throughout the civilized world. The purchase of votes has never been respectable anywhere, and it is coming to be considered more and more disreputable, except in Pennsylvania and Illinois.

People who complain about politics should, if they mean what they say, get into politics and stay there and clean up. They should keep inside and help make politics better rather than stay on the outside making ugly faces and calling names.

THE DIRECT PRIMARY

The establishment of the direct primary was a protest against government that did not represent the will of all of the people. The popular demand for direct nominations has been adopted by most of the States. Forty-five have accepted the direct primary, and no State so adopting has ever been known to abandon the plan entirely.

Under the old convention system the people became disgusted with boss and ring rule. The wrongful, selfish power of the bosses has been greatly reduced by the direct-primary plan. More voters now attend the primaries. A primary can not be bought or stampeded, and dark horses can not be put forward to blind the people or split the vote.

The primary has to a great extent purified and elevated politics and in a measure restored government to the people in those offices included in its provisions. The old-time political machine has very generally been crushed, and where it does still exist the corruption and iniquities are being exposed.

It is not the direct primary but newspaper abuse and vilification and misrepresentation that in most instances keep the best type of candidate out of office. The amount of money expended in all the States except Pennsylvania and Illinois in 1926 was small. In these two States adequate laws had not been adopted limiting expenditures.

Where abuses have been found to exist under direct primaries they have been quickly exposed and punished—a thing impossible under the caucus and convention system. The convention system is best adapted to the control of an "invisible government" of the industrial-political magnates. Where States or counties are controlled by one party the reason for the direct primary is of the greatest importance. About half the States are one-party States. The direct primary is of great value and convenience to women, because few women care to attend precinct meetings and political conventions. To condemn the direct primary because all voters do not participate is like condemning universal suffrage because all who are eligible do not vote.

The direct primary is not a cure-all and it does not bring the millenium, but it does relieve many of the evils of former days, and it is a real school of political education for the so-called "common people." Active work by the rank and file is encouraged. The direct primary makes it easier for the ordinary voter to exert his influence in nominating the best choice of the people. It also enables each voter to be instrumental in defeating a conspicuously unfit person who makes a howl about indecency and corrupt politics and does not take a stand for definite policies and a constructive platform. This is the type that plays to the galleries and splits and straddles to suit the crowd to which he looks for support. This is also the type that deals in platitudes and generalities. They are for proper tariff and farm relief legislation, but do not say what kind of farm relief or tariff.

WHAT THE FUTURE OF THE COUNTRY DEPENDS UPON

The future of this country does not depend so much upon the young men who are trained in military camps to fight on short notice as upon the young men who are trained in their political party camps to take an active interest in politics from the standpoint of public needs and to be as fearless and brave in politics as they would be on the battle fields. Future wars could be averted and avoided if our men could be trained to prevent the causes and beginnings of war.

Main Street would have more influence at the Nation's Capitol than Wall Street if Main Street were only organized. The common people are like a horse in that they do not know and do not exert their strength. If they did, they would all pull together for the common good and not be guided by weak reins in the hands of selfish and unscrupulous leaders.

Let Main Street take the active hand it should in every political campaign in an effort to nominate to office the best men in each party, and then Main Street and not Wall Street will direct the policies of our Government and perpetuate the principles that were fostered and promulgated by its founders.

We should teach more practical politics and not merely the fundamental principles of government without any teaching of the practical procedures of government. We should quit teaching and preaching that all party government is bad, because it is not. We should make our nominations with a view to obtaining the best results in the direct or legalized primary.

We all agree that this is a great country, a country beyond all others in its opportunities and advantages. It is said that a country or organization is but a lengthened shadow of the individuals who compose it. That being true, let us realize and admit that this country of ours should be run by right-thinking human beings. Let us get into the running of it ourselves and see that the lengthened shadow is cast by men who stand squarely for the greatest good to the greatest number. Let all good men interest themselves not alone in studying the theory of government but also in finding out how to put their theories into practice. The philosophy of to-day is a doing philosophy. a philosophy of activity. Let us make a practical application of the principles for which we stand. We can do this by interesting ourselves in the party organization and participating actively in its primaries.

The next primary in this State will be held on Saturday, June 2, 1928. In order to perpetuate Democratic control we should attend the primaries and induce others to do so, for thus only by concerted effort can we hope to nominate and retain our most highly qualified candidates in public office.

WHAT WE SHOULD DO IN THE NEXT CAMPAIGN

Democrats should get behind a definite, constructive, progressive program. We never had a better opportunity than we have now to win a clean-cut victory; that is, if we will only act with wisdom and all pull together.

We should go into the next campaign upon a platform about which all Democrats and all other people of progressive ideas can rally. We should not listen to the beneficiaries of the Republican Party who creep into our party councils. They are trouble breeders, seeking always to inject issues that will divide the Democrats. I do not want Republicans and so-called "independents" to name our candidates and write our platform. I do not want to see them doing the things that we can and should do for ourselves.

We have a sacred duty to perform. Never did the great mass of common people in America need our party as it does to-day. With business failures more numerous than ever before, with agriculture paralyzed, bank failures increasing in an alarming degree, millions out of work, and the Government completely controlled and dominated by the ultra rich, it would be a national calamity for Democrats to divide over minor issues or fail to unite on major questions.

THE RECORD OF THE HARDING-COOLIDGE ADMINISTRATION

The record of the Harding-Coolidge administration is the issue upon which our next campaign should be waged—upon it we can not fail. Let our slogan be, "Thou shalt not steal."

The revelations of corruption in Indiana official circles are rivaled only by the saturnalia of corruption and scandalous misuse of power which began with the advent of the Republican Party following the splendid record of the Wilson administration. When Harding was elected the protective interests swarmed in the corridors of the Capitol, and they are still swarming there. Official corruption is the greatest danger that the American Nation is facing to-day. Witness the scandalous disclosures of the Walsh and Reed committees. One of the chief maneuvers of the Coolidge administration is to set up a shout of "Bolshevism" when an embarrassing situation arises. The commandment "Thou shalt not steal" was given to us by Moses and not by a bolshevist. Unfortunately it is a law that has been forgotten by the party which is in power at the present time.

WHAT THE REAL ISSUE SHOULD BE

Yes; the real issue in the next campaign should be the overthrow of the old Republican guard, through which the invisible government is exercising the powers of the people for its own private gain. Their method is to tax the masses for the profit of a favored few. Their prohibitive protective-tariff schedules which shelter private monopoly bring about an increased cost of the prime necessities of life. The poor man has to suffer to fill the coffers of the rich.

The low estate into which the personnel of the Federal Trade Commission has fallen, dominated and conducted as it is against the interest of those it was originally intended to protect, is to be regretted. It has to a large extent lost its usefulness. We must force the Interstate Commerce Commission to be more considerate of the people's interest in fixing passenger and freight rates. We must make the Federal-reserve banking system serve the people and function as it did originally and as it was intended to do by Wilson and by Owen and Glass and the rest of the Democratic Congress who gave us the Federal reserve act. Instead of serving the people, it is being used to bankrupt the people for the benefit of those against whom it was originally directed. It was intended to prevent the invisible empires of greed from feasting and fattening upon ill-gotten gains.

We should give adequate relief to agriculture, flood control, and tax reduction, and we should make it possible for the great masses to have a breathing spell of equal opportunity with the favored interests. The farm bill is requested by agriculture as an experiment, at least, although it may not be entirely a certainty that it is workable. The great industrial enterprises and manufacturers in the East are highly favored; and why should not the farmers receive the same favors, for we can not now pull down the Chinese Wall of protection?

Another one of our jobs should be to make visible the invisible and lay bare their nefarious designs and iniquitous accomplishments. It is the Jeffersonian principles that we must follow and not the practices of Harding and Coolidge.

"If everybody tried to have his own way in all things, nobody would have his way in anything," is a statement that could never be more truly made than at the present time. We will lose the great issues by disputing over small matters, and then end by losing all. Against us will be all who have grown rich, and are growing richer through favoritism, and all special privilege hunters, the great forces which buy elections in States like Illinois and Pennsylvania.

While the Democrats do not desire and can not afford to make war on honest capital, it must be remembered and kept steadily in view that this Government was established for men and not for dollars. Corruption and favoritism walked in and took control on March 4, 1921, and have been in the saddle from that day until this. The scaly hand with long, bony fingers reached into the Navy, the Interior, and the Justice Departments and corrupted high officials.

The first act of Coolidge was to indorse Harding's administration. Harding appointed and Coolidge continued H. M. Daugherty as Attorney General until overpowering public sentiment drove him from office. President Coolidge never lifted a hand, ignoring the demand of the Senate that he compel the resignation of Attorney General Daugherty and Secretary of the Navy Denby. President Coolidge publicly defended and justified those men. He even certified to the integrity of his disreputable Cabinet member, Daugherty, but he finally had to back down under the glare of public indignation.

The Credit Mobilier and star-route scandal of the Grant administration are to me no comparison with the iniquities of the Teapot Dome and Elk Hill oil scandals, with Fall, Sinclair, Doheny, and Will Hays up to their necks, with their hands in graft and corruption.

Mellon and money have been the star of hope of this administration. Nine million dollars were saved to Mellon in individual taxes under his first proposed bill for reduction of revenue after he had disposed of his Overholt distillery holdings for $15,000,000. Mr. Mellon, it is stated on good authority, raised $2,000,000 to be used in the Pennsylvania Republican primary campaign two years ago. He said the expenditures for corrupting the electors in Pennsylvania were as justified as subscriptions or contributions to churches.

This administration settled with England at 3 per cent for the first three years and 3½ per cent thereafter. The difference in the rate of interest paid for money loaned to Great Britain by the United States and that which Great Britain has paid in return is $25,747,000. The difference in the amount of interest compounded throughout the 66 years in which Great Britain has to pay is $22,000,000,000. The Italian debt was settled at 21 cents on the dollar, thus escaping payment of $1,612,000,000. Mellon and others offered to settle for less than 50 cents on the dollar. This would mean a saving to France of an enormous and almost inconceivable amount, not considering compound interest. The annual interest and charge which must be paid by our taxpayers for the money on that part of the debt thus transferred from European countries to America is $105,617,000.

Morgan and his henchmen acquired many million dollars' worth of European securities at a large discount and then demanded cancellation of the debts due us by European countries for the loan of money which was borrowed in America at the usual rate of 6 per cent. Shall we stand idly by and permit our taxpayers to be robbed in this manner while the forces of darkness and iniquity grow fat upon the spoils?

### FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate insists upon its amendments to the bill (H. R. 11577) entitled "An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes," disagreed to by the House of Representatives, agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MCNARY, Mr. JONES, Mr. KEYES, Mr. OVERMAN, and Mr. HARRIS to be the conferees on the part of the Senate.

### SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1181. An act authorizing an appropriation to be expended under the provisions of section 7 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," as amended.

### BILL PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, a bill of the House of the following title:

H. R. 11020. An act validating certain applications for and entries of public lands.

### ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 50 minutes p. m.) the House adjourned until to-morrow, Wednesday, April 25, 1928, at 12 o'clock noon.

## COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Wednesday, April 25, 1928, as reported to the floor leader by clerks of the several committees:

### COMMITTEE ON PUBLIC BUILDINGS AND GROUNDS

(10.30 a. m.)

Authorizing the Secretary of the Treasury to accept a franchise from the government of the city of New York to change the routing of the pneumatic-tube service between the customhouse and the present appraisers' stores building (H. R. 13171).

### COMMITTEE ON MINES AND MINING

(10 a. m.)

Authorizing an appropriation for the encouragement and benefit of the International Petroleum Exposition Corporation, of Tulsa, Okla. (H. R. 13150).

Authorizing an appropriation for development of potash jointly by the United States Geological Survey of the Department of the Interior and the Bureau of Mines of the Department of Commerce by improved methods of recovering potash from deposits in the United States (H. R. 496).

### COMMITTEE ON THE JUDICIARY—SUBCOMMITTEE NO. 1

(10 a. m.)

To provide for the procedure in the trial of certain criminal cases by the district courts of the United States (H. R. 10639).

### COMMITTEE ON MILITARY AFFAIRS

(10.30 a. m.)

A meeting to consider bill before the committee concerning promotion and retirement.

### COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

(10 a. m.)

To amend the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act," approved June 3, 1924 (H. R. 10710).

### COMMITTEE ON BANKING AND CURRENCY

(10.30 a. m.)

To provide legal-tender money without interest secured by community noninterest-bearing 25-year bonds for public improvements, market roads, employment of unemployed, building homes for, and financing through community banks organized under State laws, its citizens, farmers, merchants, manufacturers, partnerships, corporations, trusts, or trustees, and for community needs of the United States (H. R. 12288).

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. WHITE of Maine: Committee on the Merchant Marine and Fisheries. S. 1609. An act recognizing the heroic conduct, devotion to duty, and skill on the part of the officers and crews of the U. S. S. *Republic*, *American Trader*, *President Roosevelt*, *President Harding*, and the British steamship *Cameronia*, and for other purposes; with amendment (Rept. No. 1371). Referred to the Committee of the Whole House on the state of the Union.

Mr. WHITE of Maine: Committee on the Merchant Marine and Fisheries. H. R. 457. A bill to create a board of local inspectors, Steamboat Inspection Service, at Hoquiam, Wash.; without amendment (Rept. No. 1372). Referred to the Committee of the Whole House on the state of the Union.

Mr. STALKER: Committee on the District of Columbia. H. R. 10073. A bill to change the name of Railroad Avenue between Nichols Avenue and Massachusetts Avenue; with amendment (Rept. No. 1373). Referred to the House Calendar.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. McLEOD: Committee on the District of Columbia. S. 2511. An act to change the name of St. Vincent's Orphan Asy-

lum and amend the act entitled "An act to amend an act entitled 'An act to incorporate St. Vincent's Orphan Asylum, in the District of Columbia,' approved February 25, 1831"; without amendment (Rept. No. 1374). Referred to the Committee of the Whole House.

## CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (H. R. 973) for the relief of estate of Katherine Heinric (Charles Grieser and others, executors), and the same was referred to the Committee on Ways and Means.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. LANKFORD: A bill (H. R. 13291) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce; to the Committee on Agriculture.

By Mr. SPEARING: A bill (H. R. 13292) to extend the time for completing the construction of a bridge across the Mississippi River near and above the city of New Orleans, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. BROWNE: A bill (H. R. 13293) to amend sections 21 and 24 of the act of October 15, 1914 (secs. 386 and 389 of title 28 of the Code of Laws of the United States of America), relating to trial by jury in cases of indirect criminal contempts; to the Committee on the Judiciary.

By Mr. EVANS of Montana (by request): A bill (H. R. 13294) to provide for the payment to members of the Flathead Indian Tribe who have received patents in fee of their several shares of the equity of the tribal property; to the Committee on Indian Affairs.

Mr. HOWARD of Oklahoma: A bill (H. R. 13295) to provide for improvement of the Pawnee Indian School, Pawnee, Okla.; to the Committee on Indian Affairs.

By Mr. MORIN: A bill (H. R. 13296) to authorize the adjustment and settlement of claims for armory-drill pay; to the Committee on Military Affairs.

By Mr. LINTHICUM: A bill (H. R. 13297) to establish an experimental station and bass and trout hatchery in the State of Maryland; to the Committee on the Merchant Marine and Fisheries.

By Mr. NIEDRINGHAUS: A bill (H. R. 13298) authorizing J. H. Haley, his successor and assigns—or his heirs, legal representatives, and assigns—to construct, maintain, and operate a bridge across the Missouri River at or near a point where Olive Street Road, St. Louis County, Mo., if extended west would intersect the Missouri River; to the Committee on Interstate and Foreign Commerce.

By Mr. McKEOWN: Joint resolution (H. J. Res. 285) for the relief of the Iowa Tribe of Indians; to the Committee on Indian Affairs.

By Mr. RAMSEYER: Resolution (H. Res. 176) for the consideration of S. 3555, an act to establish a Federal farm board to aid in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce; to the Committee on Rules.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BERGER: A bill (H. R. 13299) for the relief of Eustace Reynolds; to the Committee on Claims.

By Mr. BUTLER: A bill (H. R. 13300) for the relief of Capt. J. O. Faria; to the Committee on Claims.

By Mr. BULWINKLE: A bill (H. R. 13301) for the relief of R. A. Mayer; to the Committee on Claims.

By Mr. CARTER: A bill (H. R. 13302) granting a pension to the survivors of the Jeanette relief expedition; to the Committee on Pensions.

By Mr. CRAIL: A bill (H. R. 13303) for the relief of Clyde Smith; to the Committee on Military Affairs.

By Mr. DICKINSON of Missouri: A bill (H. R. 13304) granting an increase of pension to Belle F. Shideler; to the Committee on Invalid Pensions.

By Mr. DOUGLASS of Massachusetts: A bill (H. R. 13305) for the relief of Charles Ghisoni; to the Committee on Claims.

By Mr. EDWARDS: A bill (H. R. 13306) to authorize the appointment of Technical Sergt. Tom Bowen as a warrant officer, United States Army; to the Committee on Military Affairs.

By Mr. GOLDER: A bill (H. R. 13307) granting a pension to Mary A. Fitzpatrick; to the Committee on Invalid Pensions.

By Mr. LOZIER: A bill (H. R. 13308) granting an increase of pension to Rachel McKinney; to the Committee on Invalid Pensions.

By Mr. RUTHERFORD: A bill (H. R. 13309) granting a pension to William D. Pearson; to the Committee on Pensions.

By Mr. SANDERS of New York: A bill (H. R. 13310) for the relief of the Palmer Fish Co.; to the Committee on Claims.

By Mr. SPROUL of Kansas: A bill (H. R. 13311) granting an increase of pension to Mary A. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13312) granting a pension to Catherine Bloom; to the Committee on Pensions.

Also, a bill (H. R. 13313) for the relief of Mrs. W. H. DeLong-Wheeler; to the Committee on Claims.

By Mr. TAYLOR of Tennessee: A bill (H. R. 13314) granting a pension to Drusey Owens; to the Committee on Invalid Pensions.

By Mr. VINSON of Kentucky: A bill (H. R. 13315) granting a pension to Charlie Sparks; to the Committee on Pensions.

By Mr. WHITE of Maine: A bill (H. R. 13316) granting an increase of pension to Hollis J. Ellingwood; to the Committee on Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7169. Petition of board of directors of the American Society of Civil Engineers, Washington, D. C., commending the President with reference to progress for control of the Mississippi River floods; to the Committee on Flood Control.

7170. Petition of Montana Stockgrowers' Association, Montana, relative to American beef for American Army and Navy, and extending consideration to inland abattoirs; to the Committee on Military Affairs.

7171. By Mr. BOYLAN: Petition of New York branch of National Custom Service Association of Employees, favoring House bill 13143, to adjust the salaries of custom employees; to the Committee on the Civil Service.

7172. By Mr. ESTEP: Resolution by the Chamber of Commerce, of Pittsburgh, Pa., urging defeat of Senate bill 2407 and House bill 470; to the Committee on Foreign Affairs.

7173. By Mr. HOPE: Petition signed by residents of Liberal, Kans., protesting against the passage of House bill 78 and other Sunday legislation; to the Committee on the District of Columbia.

7174. By Mr. HUDSON: Petition of citizens of Flint, Mich., urging consideration of national flood control and the adoption of such laws as will insure the impounding of unrestricted waters and thus effectively eliminate the annual danger so destructive to life, health, and property, and at the same time safeguarding the rights and interests of our citizens; to the Committee on Flood Control.

7175. By Mr. JOHNSON of Texas: Petition of George O. McMillan, president Westminster College, Tehuacana, Tex., opposing Senate bill 1752, to prevent printing of return address on stamped envelopes by the Post Office Department; to the Committee on the Post Office and Post Roads.

7176. By Mr. KADING: Petition signed by Civil War veterans, widows, and dependents residing in in Sheboygan, Wis., and vicinity, urging that immediate steps be taken to bring to a vote a Civil War pension bill for veterans and widows of veterans; to the Committee on Invalid Pensions.

7177. By Mr. LINDSAY: Petition of Anchor Club, New York Post Office, praying that the Lehlbach retirement bill with its amendments be brought out of committee and enacted into law at this session of Congress; to the Committee on the Civil Service.

7178. Also, petition of Paper Cutters, Binding Machine Operators, and Embossers' Protective Union, No. 119, New York City, urging favorable action on the Griest postal bill; to the Committee on the Post Office and Post Roads.

7179. Also, petition of Mailers' Union, No. 6, New York City, urging favorable action on the Griest postal bill; to the Committee on the Post Office and Post Roads.

7180. Also, petition of Bindery Women's Union, New York City, urging support of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7181. Also, petition of Allied Printing Trades Council of Greater New York, composed of 21 affiliated organizations, urging support of the Griest postal bill; to the Committee on the Post Office and Post Roads.

7182. Also, petition of National Customs Service Association, signed by 41 citizens of Brooklyn, N. Y., urging speedy passage of House bill 13143, providing for an adjustment of salaries paid to customs employees; to the Committee on Ways and Means.

7183. By Mr. McSWEENEY: Papers in support of House bill 13261, granting a pension to Jennie Messer; to the Committee on Invalid Pensions.

7184. By Mr. MORROW: Petition of citizens of Fort Bayard, N. Mex., indorsing House bill 5477, to extend presumptive limit for tubercular veterans to September 1, 1928; to the Committee on World War Veterans' Legislation.

7185. By Mr. O'CONNELL: Petition of the Anchor Club, New York Post Office, appealing for the consideration of the Lehlbach retirement bill (H. R. 25); to the Committee on the Civil Service.

7186. By Mr. QUAYLE: Petition of United States Customs Inspector's Association of the Port of New York, favoring the passage of the Lehlbach retirement bill (H. R. 25); to the Committee on the Civil Service.

7187. Also, petition of Anchor Club, New York Post Office, favoring the passage of the Lehlbach retirement bill (H. R. 25); to the Committee on the Civil Service.

7188. By Mr. McREYNOLDS: Petition of 118 adult citizens of Ooltewah, Hamilton County, Tenn., protesting against the passage of the Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

7189. By Mr. SEARS of Nebraska: Petition of civic and commercial organizations and municipalities of Nebraska, indorsing source, tributaries, flood control, and retention of flood waters in areas in which they originate; to the Committee on Flood Control.

7190. By Mr. STALKER: Petition of sundry citizens of Bath, N. Y., urging the enactment of legislation for an increase in pension for Civil War veterans and widows of veterans; to the Committee on Invalid Pensions.

7191. Also, petition of sundry citizens of Watkins Glen, N. Y., urging the enactment of legislation for an increase in pension for Civil War veterans and widows of veterans; to the Committee on Invalid Pensions.

## SENATE

### WEDNESDAY, *April 25, 1928*

*(Legislative day of Friday, April 20, 1928)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

#### MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had adopted a concurrent resolution (H. Con. Res. 32) providing that the action of the Speaker of the House and the Vice President in signing the joint resolution (H. J. Res. 244) authorizing the modification of the adopted project for Oakland Harbor, Calif., be rescinded, etc.

The message also announced that the House had passed the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, with amendments, in which it requested the concurrence of the Senate.

#### ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (S. 1181) authorizing an appropriation to be expended under the provisions of section 7 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," as amended, and it was signed by the Vice President.

#### PRINTING OF FLOOD CONTROL BILL

Mr. JONES subsequently said: Senate bill 3740, the flood control bill, has come from the House with quite a number of amendments. I ask unanimous consent that the bill may be printed with the House amendments numbered.

The PRESIDING OFFICER (Mr. McNARY in the chair). Without objection, it is so ordered.

#### CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Edge | Kendrick | Sackett |
| Barkley | Edwards | Keyes | Schall |
| Bayard | Fess | King | Sheppard |
| Bingham | Fletcher | La Follette | Shortridge |
| Black | Frazier | Locher | Simmons |
| Blaine | George | McKellar | Smith |
| Blease | Gerry | McMaster | Smoot |
| Borah | Gillett | McNary | Steck |
| Bratton | Goff | Mayfield | Stephens |
| Brookhart | Gooding | Metcalf | Swanson |
| Broussard | Gould | Moses | Thomas |
| Bruce | Greene | Norbeck | Tydings |
| Capper | Hale | Norris | Tyson |
| Caraway | Harris | Nye | Wagner |
| Copeland | Harrison | Oddie | Walsh, Mass. |
| Couzens | Hawes | Overman | Walsh, Mont. |
| Curtis | Hayden | Phipps | Warren |
| Cutting | Heflin | Pittman | Waterman |
| Dale | Howell | Ransdell | Wheeler |
| Deneen | Johnson | Reed, Pa. | |
| Dill | Jones | Robinson, Ind. | |

Mr. CARAWAY. I desire to announce that my colleague the senior Senator from Arkansas [Mr. ROBINSON] is detained from the Senate because of illness.

The VICE PRESIDENT. Eighty-two Senators having answered to their names, a quorum is present.

#### CORRECTION OF ERROR IN ENROLLMENT

The VICE PRESIDENT laid before the Senate the following concurrent resolution (H. Con. Res. 32) of the House of Representatives, which was read:

*Resolved by the House of Representatives (the Senate concurring)*, That the action of the Speaker of the House of Representatives and the Vice President in signing the joint resolution (H. J. Res. 244) authorizing the modification of the adopted project for Oakland Harbor, Calif., be rescinded and that in the enrollment of said joint resolution the word "June" be stricken out and the word "January" be inserted in lieu thereof.

Mr. CURTIS. I ask that the Senate concur in the resolution.

The concurrent resolution was considered by unanimous consent and agreed to.

#### MARTHA A. HAUCH

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 1368) to extend the benefits of the employees' compensation act of September 7, 1916, to Martha A. Hauch, which was to strike out all after the enacting clause and insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $2,000 to Martha A. Hauch, formerly a nurse in the service of the United States Army, who contracted tuberculosis while on duty at Walter Reed General Hospital from September 16, 1922, to August 22, 1924; and that said Martha A. Hauch shall be admitted to such Army hospital as may be directed by the Surgeon General of the United States Army for necessary care and treatment.

Mr. SWANSON. I move that the Senate concur in the House amendment.

The motion was agreed to.

#### PETITIONS AND MEMORIALS

Mr. WARREN presented a resolution adopted by the Chamber of Commerce, of Casper, Wyo., favoring the establishment and maintenance of a mining experiment station at Laramie, Wyo., which was referred to the Committee on Mines and Mining.

He also presented a letter in the nature of a memorial from John J. Spriggs, of Lander, Wyo., remonstrating against the passage of Senate bill 1752, the so-called Oddie bill, to regulate the manufacture and sale of stamped envelopes, which was referred to the Committee on Post Offices and Post Roads.

Mr. BRUCE presented a petition of sundry citizens of Baltimore, Md., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. COPELAND presented a petition of sundry citizens of Brooklyn, N. Y., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. ASHURST presented a resolution adopted by Morgan McDermott Post, No. 7, the American Legion, of Tucson, Ariz., relative to the so-called Swing-Johnson bill, which was ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas it has come to the notice of Morgan McDermott Post, No. 7, the American Legion, Tucson, Ariz., that the proponents of the Swing-Johnson bill are urging the passage of a bill to construct a dam in the Colorado River; and

Whereas it has been reported to the members of this post that the representatives of this post and other posts of the department of Arizona failed and neglected to vote against a resolution approving and indorsing the passage of said Swing-Johnson bill: Now, therefore, be it

*Resolved by the Morgan McDermott Post, No. 7, the American Legion, Tucson, Ariz.,* (1) That said action of the national convention be, and the same is hereby, disapproved and disaffirmed as not expressing the actual view and opinion of members of the American Legion.

2. That any and all action purporting to have been taken by representatives of the department of Arizona, the American Legion, approving and indorsing the passage of said Swing-Johnson bill be, and the same is hereby, repudiated and disapproved for the reason that such action does not and did not represent the views and opinions of the members of this post.

MERTON MARTENSON,
*Post Commander.*
CLAUDE SMITH,
LESLEY B. ALLEN,
JOHN C. HAYNES,
*Representative Committee.*

Mr. WALSH of Massachusetts presented numerous petitions signed by sundry members of the International Institute for Foreign-Speaking Peoples, of New Bedford, Mass., and Los Angeles, Calif.; the Young Women's Christian Association of Austin, Tex., Erie, Pa., Providence, R. I., Orange, N. J., and Bayonne, N. J.; also the Logan County Welfare Department, Logan, W. Va.; the Bethany Evangelical Church, and the Grand Avenue Congregational Church Men's Club, both of Milwaukee, Wis.; praying for the passage of Senate Joint Resolution 122, providing for the reunion of families of alien declarants, which were referred to the Committee on Immigration.

IMPORTATION OF SHOES FROM CZECHOSLOVAKIA

Mr. WALSH of Massachusetts. I have had some correspondence of particular public interest with relation to imports of shoes in recent months.

I ask that the letter from the Massachusetts manufacturer who called the subject to my attention because of the effect of imports from Czechoslovakia upon the business of domestic manufacturers of certain types of women's and misses' shoes, the report and table of the United States Tariff Commission prepared in reply to my request, and a letter and analysis by myself upon the subject be printed in the CONGRESSIONAL RECORD and referred to the Finance Committee.

There being no objection, the matter was referred to the Finance Committee and ordered to be printed in the RECORD, as follows:

WRIGHT-GOREVITZ-MCNAMARA CO.,
*Haverhill, Mass., April 3, 1928.*

United States Senator DAVID I. WALSH,
*Washington, D. C.*

MY DEAR SENATOR WALSH: I am inclosing a leaf taken out of the Boot and Shoe Recorder issued March 31, 1928, containing an advertisement issued by the manufacturers of Czechoslovakian Republic.

It might interest you to know that there are enormous amounts of shoes coming in from the Czechoslovakian Republic, penalizing manufacturers here in the States by reason of their low price.

I know how keenly you are interested in the boot and shoe industry and I think perhaps little facts like this you might want to gather together in order to be well versed on the subject of importation of shoes from abroad.

I hope I have not bothered you by this little item, likely to be of interest to you.

With kind personal regards and best wishes, I remain.

Very truly yours,

R. V. MCNAMARA, *Secretary.*

---

WRIGHT-GOREVITZ-MCNAMARA CO.,
*Haverhill, Mass., April 5, 1928.*

Senator DAVID I. WALSH,
*Senator from Massachusetts, Washington, D. C.*

MY DEAR SENATOR: Following my recent letter regarding the importation of shoes into the United States I have just one more clipping that I am inclosing to you that I am going to bother you with.

This is a little article regarding the importation of shoes from Europe consigned to the Nugent's Department Store, of St. Louis, Mo.—one of the best stores in the Middle West. You will notice the price that they are selling these shoes at, namely $3.98, with all widths and sizes. Shoes like these, as outlined by them in their advertisement, made in our factory under labor conditions that are wholesome, would cost the Nugent Co. $4.25. These shoes would be obliged to retail at a profit to Nugent at $7 a pair.

There has been in years gone by a great prejudice against European shoes because of the fact that the lasts were antiquated. To-day, it might interest you to know that their lasts are as much Americanized as our own here in the States. They have available in their factories the same machinery, furnished by the United Shoe Machinery Co., that we have. The help are taught by American superintendents, who are placed in these factories to give the shoes the American touch.

I know how greatly interested you are in the subject of unemployment in New England. It might interest you to know that this is the dullest period that we have ever had since the inception of this business at this period of the year. We have always had a very busy spring, because this seems to be a time when there is a great demand for women's shoes, prior to the Easter season. In our factory, employing over 400 people, I can say that I doubt if we have 50 people employed here to-day. I am not going to lay all of this unemployment to the fact Czechoslovakia is importing shoes into this country in enormous quantities, but it is a fact that on summer shoes, sandal effect, these people are producing shoes that we can not compete with. The sandal business that we always received prior to summer is now going to European manufacturers.

It does seem to me that it should be the concern of the Government to levy such a tax upon importation of shoes from these cheap European labor centers as to produce more employment for the people in the United States.

I know that I am bothering you much more than I have a right to, but I have always felt free to write you, because I always receive such courteous attention from you. I thought this information that I am giving you might be of interest to you.

Trusting to have the pleasure of seeing you soon, and with the writer's kind and personal regards, I remain

Very truly yours,

R. V. MCNAMARA.

---

UNITED STATES TARIFF COMMISSION,
*Washington, April 19, 1928.*

Hon. DAVID I. WALSH,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR WALSH: Receipt is acknowledged of your letter of April 5, inclosing a letter from the Wright-Gorevitz-McNamara Co., with respect to the importation of shoes from Czechoslovakia.

In answer to your request for information regarding the imports of shoes from that country there is attached a table showing, for the years 1926, 1927, and for January and February, 1928, the total imports of shoes from all countries and the imports of shoes from Czechoslovakia.

The shoe imports from Czechoslovakia are mainly specialties, and in the last few years have consisted largely of a light shoe or sandal of the McKay type, the uppers made of narrow strips of leather, braided. This type of shoe has been popular in the United States for the last two summers, and has to some extent replaced the domestic white fabric shoe. This type of shoe being all leather is imported free of duty.

Inasmuch as manufacturers in Haverhill specialize in women's and misses' shoes, sandals, and slippers, it is probable that they feel the competition from Czechoslovakian imports more keenly than other shoe-manufacturing centers.

The communication from the Wright-Gorevitz-McNamara Co., with its inclosure, are returned herewith.

Sincerely yours,

THOMAS O. MARVIN, *Chairman.*

---

UNITED STATES SENATE,
*April 23, 1928.*

Mr. RAYMOND V. MCNAMARA,
*Secretary Wright-Gorevitz-McNamara Co.,*
*93–99 Essex Street, Haverhill, Mass.*

MY DEAR MR. MCNAMARA: Since receiving your letters in reference to the importation of certain classes of women's shoes and sandals from Czechoslovakia in competition with the class of women's shoes made in Haverhill, Mass., I have conferred with the United States Tariff Commission and have obtained an interesting report from them.

Inclosed you will find a letter from the chairman of the United States Tariff Commission explaining the table which was prepared at my request and also calling attention to the fact that importations from Czechoslovakia are mainly specialties. He states, however, that "inasmuch as manufacturers in Haverhill specialize in women's and misses' shoes, sandals, and slippers, it is probable that they feel the competition from Czechoslovakian imports more keenly than other shoe manufacturing centers."

The table that accompanied this report I myself analyzed and am inclosing a copy herewith for your information.

Naturally, you will be interested in knowing what can be done to check this flow of imports from Czechoslovakia and thereby retain the market for women's and misses' shoes for domestic manufacturers.

A tariff bill providing for a sufficiently high tariff duty upon these particular kinds of specialties in women's and misses' shoes and slippers could alone result in checking imports. Such a bill must, under our Constitution, originate in the House of Representatives. It is very unlikely that any favorable action could be expected during the present session on such a measure, as it was practically agreed earlier in the

session by the administration leaders not to pass any tariff bills during the present session.

If anything further occurs to you that I can do to be helpful to the manufacturers of Haverhill, you will, of course, call upon me. In the meantime I shall keep in touch with the flow of imports and let you know whether the sharp increase in recent months is continuing.

Sincerely yours,

DAVID I. WALSH.

---

ANALYSIS OF SHOE IMPORT TABLE

By United States Senator DAVID I. WALSH

The table prepared by the United States Tariff Commission shows the number of pairs of shoes both free and dutiable imported for the year 1926–27 and January and February, 1928, from all countries. All shoes and slippers made of leather are duty free.

The percentage of imports of shoes is small compared with the production and consumption in America. It is estimated that 343,605,905 pairs of shoes were made last year in America. The total imports of about 3,000,000 pairs of shoes in 1927 is less than 1 per cent of the domestic production. The table also contains the number of pairs of shoes imported from Czechoslovakia, and it is to be noted that Czechoslovakian imports have steadily grown and that there was imported from that country in January and February of this year 50 per cent of all shoes imported, as compared with about 10 per cent of the shoes imported in 1926 and 25 per cent in 1927.

Practically the entire increase in imports from Czechoslovakia have been women's and misses' shoes and slippers. The number of pairs of women's and misses' shoes have increased from an average of 10,000 pairs a month in 1926 to an average of 120,000 pairs of shoes a month in the early part of 1928.

Another striking feature of this statement is that Czechoslovakia sent to America 70 per cent of all the women's and misses' shoes imported and 74 per cent of all sandals imported. In 1926 Czechoslovakia's percentage of imports of all shoes shipped to America was 11 per cent and in the early months of 1928 her total imports of all shoes was 48 per cent, showing that that country is doing one-half the entire import shoe business with America.

While the volume of all imports when compared with domestic production is exceedingly small, yet as pointed out in the letter from the United States Tariff Commission the imports affect the business of the shoe manufacturers of Haverhill, which is largely devoted to specialties in women's and misses' shoes.

The United States Tariff Commission also inform me that the exports of shoes has varied little, averaging between six and seven million pairs in recent years. Figures for recent months, however, show a considerable falling off, in the last three months amounting to 50,000 pairs less than a year ago.

BOOTS AND SHOES

REPORTS OF COMMITTEES

Mr. BINGHAM, from the Committee on Military Affairs, to which was referred the bill (H. R. 8963) for the relief of Richard H. Beier, reported adversely thereon and moved that the bill be indefinitely postponed, which was agreed to.

Mr. ODDIE, from the Committee on Naval Affairs, to which was referred the bill (S. 2802) to provide for the appointment of five midshipmen each year at large by the Vice President of the United States, reported it with amendments and submitted a report (No. 886) thereon.

Mr. REED of Pennsylvania, from the Committee on Military Affairs, to which was referred the bill (H. R. 11134) to authorize appropriations for construction at military posts, and for other purposes, reported it with amendments and submitted a report (No. 892) thereon.

Mr. BRATTON, from the Committee on Post Offices and Post Roads, to which was referred the bill (S. 3874) authorizing appropriations of funds for construction of a highway from Red Lodge, Mont., to the boundary of the Yellowstone National Park near Cooke City, Mont., reported it without amendment and submitted a report (No. 885), thereon.

Mr. TYDINGS, from the Committee on Naval Affairs, to which was referred the bill (H. R. 5746) to authorize the appraisal of certain Government property, and for other purposes, reported it without amendment and submitted a report (No. 887) thereon.

Mr. HALE, from the Committee on Naval Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 5465) to amend section 1571 of the Revised Statutes to permit officers of the Navy to count duty on airships as sea duty (Rept. No. 888); and

A bill (H. R. 5531) to amend the provisions contained in the act approved August 29, 1916, relating to the assignment to duty of certain officers of the United States Navy as fleet and squadron engineers (Rept. No. 889).

Mr. HALE also, from the Committee on Naval Affairs, to which was referred the concurrent resolution (S. Con. Res. 11) to investigate the problem of the control of aircraft for seacoast defense, reported it with an amendment and submitted a report (No. 890) thereon.

Mr. METCALF, from the Committee on Naval Affairs, to which was referred the bill (H. R. 21) to provide for date of precedence of certain officers of the staff corps of the Navy, reported it without amendment and submitted a report (No. 891) thereon.

Mr. WATERMAN, from the Committee on Naval Affairs, to which was referred the bill (H. R. 10276) providing for sundry matters affecting the naval service, reported it without amendment and submitted a report (No. 894) thereon.

Mr. CARAWAY, from the Committee on the Judiciary, to which was referred the bill (S. 4179) to amend the corrupt practices act by extending the same to candidates for nomination and election to the offices of Representative and Senator in the Congress of the United States, and for other purposes, reported it without amendment and submitted a report (No. 895) thereon.

HARRY C. BRADLEY

Mr. CARAWAY. From the Committee on Claims I report back favorably with an amendment the bill (S. 433) for the relief of Harry C. Bradley and I submit a report (No. 884) thereon. I call the attention of the senior Senator from New Mexico [Mr. BRATTON] to the bill.

Mr. BRATTON. I ask unanimous consent for the present consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole.

The amendment was to strike out all after the enacting clause and in lieu thereof to insert:

That in the administration of the employees' compensation act of September 7, 1916, as amended by the act of February 12, 1927, the Employees' Compensation Commission is authorized and directed, in connection with any application which has been or may be filed by Harry C. Bradley, now a clerk in the United States land office at Las Cruces, N. Mex., to consider that he contracted tuberculosis in the service of the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

A. ROY KNABENSHUE

Mr. BAYARD. On the 21st instant the House passed House bill 11764 conferring jurisdiction upon the Court of Claims or the district courts of the United States to hear, adjudicate, and enter judgment on the claim of A. Roy Knabenshue against the United States for the use or manufacture of an invention, and so forth. Yesterday afternoon the Senate passed an iden-

tical bill (S. 3809). From the Committee on Claims I report back House bill 11764 without amendment, and I submit a report (No. 893) thereon. I ask for the immediate consideration of the House bill.

Mr. KING. Let it be read.

The bill (H. R. 11764) conferring jurisdiction upon the Court of Claims of the United States or the district courts of the United States to hear, adjudicate, and enter judgment on the claim of A. Roy Knabenshue against the United States for the use or manufacture of an invention of A. Roy Knabenshue, covered by Letters Patent No. 858875, issued by the Patent Office of the United States under date of July 2, 1907, was read.

Mr. OVERMAN. It seems to me that this is unusual.

The PRESIDING OFFICER (Mr. LA FOLLETTE in the chair). The Chair will state to the Senator from North Carolina that a Senate bill in identical terms was passed by the Senate yesterday.

Mr. KING. Let me make an inquiry in line with the suggestion made by the Senator from North Carolina. My understanding is that the Court of Claims finds the facts and then an appropriation by Congress is required.

Mr. BAYARD. That is always the case. The Court of Claims finds the facts and determines the amount.

Mr. KING. Does it render judgment?

Mr. BAYARD. It renders judgment; but the judgment is of no value until an appropriation is made.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. BAYARD. I move that Senate bill 3809 be recalled from the House.

The PRESIDING OFFICER. Without objection, that order will be entered.

### MISSOURI RIVER BRIDGE BETWEEN COUNCIL BLUFFS, IOWA, AND OMAHA, NEBR.

Mr. DALE. From the Committee on Commerce, I report back favorably without amendment the bill (S. 3693) authorizing the city of Council Bluffs, Iowa, and the city of Omaha, Nebr., or either of them, to construct, maintain, and operate a free highway bridge across the Missouri River between Council Bluffs, Iowa, and Omaha, Nebr., and I submit a report (No. 896) thereon. I call the attention of the junior Senator from Nebraska [Mr. HOWELL] to the bill.

Mr. HOWELL. I ask unanimous consent for the immediate consideration of the bill. It is a bridge bill in the usual form.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, and it was read, as follows:

*Be it enacted, etc.*, That in order to facilitate interstate commerce, improve the postal service, and provide for military and other purposes, the city of Council Bluffs, a municipal corporation of the State of Iowa, and the city of Omaha, a municipal corporation of the State of Nebraska, or either of them, are hereby authorized to construct, maintain, and operate a free highway bridge and approaches thereto across the Missouri River, at a point suitable to the interests of navigation, between Council Bluffs, Iowa, and Omaha, Nebr., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. There are hereby conferred upon the city of Council Bluffs and the city of Omaha, or either of them, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

### ENROLLED BILL PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that this day that committee presented to the President of the United States the enrolled bill (S. 1181) authorizing an appropriation to be expended under the provisions of section 7 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," as amended.

### BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TYSON:

A bill (S. 4205) granting an increase of pension to Amanda C. Manners (with accompanying papers); to the Committee on Pensions.

By Mr. HEFLIN:

A bill (S. 4206) authorizing the Director of the Census to collect and publish certain additional cotton statistics; to the Committee on Agriculture and Forestry.

By Mr. GEORGE:

A bill (S. 4207) to authorize the reappointment of George Edwin Penton as second lieutenant in the United States Army; to the Committee on Military Affairs.

By Mr. HALE:

A bill (S. 4208) for the relief of Henry Stanley Wood; to the Committee on Finance.

By Mr. CUTTING:

A bill (S. 4209) to amend the World War veterans' act, 1924; to the Committee on Finance.

By Mr. BLAINE:

A bill (S. 4210) to amend the World War veterans' act, 1924; to the Committee on Finance.

By Mr. NORBECK:

A bill (S. 4211) to amend section 5153 of the Revised Statutes, as amended; to the Committee on Banking and Currency.

By Mr. JOHNSON:

A bill (S. 4212) for the relief of John Davidson; to the Committee on Naval Affairs.

A bill (S. 4213) for the relief of James E. O'Donnell; and

A bill (S. 4214) to confer jurisdiction on the Court of Claims to ascertain the damage by the United States to real property of the Mack Copper Co., a corporation and to render judgment therefor as herein provided; to the Committee on Claims.

By Mr. COPELAND:

A bill (S. 4215) granting an increase of pension to Lillian P. Dowdney; to the Committee on Pensions.

By Mr. REED of Pennsylvania:

A bill (S. 4216) to authorize the adjustment and settlement of claims for armory drill pay;

A bill (S. 4217) to authorize the removal of the Aqueduct Bridge crossing the Potomac River from Georgetown, D. C., to Rosslyn, Va.; and

A bill (S. 4218) to authorize the President to present the distinguished-flying cross to Ehrenfried Gunther Von Huenefeld, James C. FitzMaurice, and Hermann Koehl; to the Committee on Military Affairs.

A bill (S. 4219) granting an increase of pension to Julia A. Elwell (with an accompanying paper); to the Committee on Pensions.

By Mr. ROBINSON of Indiana:

A bill (S. 4220) granting an increase of pension to Rebecca A. Buschbaum (with accompanying papers); to the Committee on Pensions.

By Mr. THOMAS:

A bill (S. 4221) for the relief of John Martin; to the Committee on Military Affairs.

A bill (S. 4222) to authorize the creation of Indian trust estates, and for other purposes; to the Committee on Indian Affairs.

By Mr. McKELLAR:

A bill (S. 4223) to erect a monument to the memory of Gen. William Campbell in Smythe County, Va.; to the Committee on the Library.

By Mr. DALE:

A bill (S. 4224) granting a pension to Sarah C. Morse (with accompanying papers); to the Committee on Pensions.

By Mr. McKELLAR:

A joint resolution (S. J. Res. 137) prohibiting the maintenance of marines or troops in Nicaragua after February 1, 1929, except for certain purposes; to the Committee on Foreign Relations.

### AMENDMENTS TO BOULDER DAM BILL

Mr. PHIPPS submitted three amendments intended to be proposed by him to Senate bill 728, the so-called Boulder Dam bill, which were ordered to lie on the table and to be printed.

### MUSCLE SHOALS DAM NO. 2

Mr. McKELLAR. Mr. President, I ask unanimous consent to have printed in the RECORD a letter addressed to me by Mr. J. L. Meeks, publisher of the Florence Times-News, of Florence,

Ala., relative to the Government power facilities at Muscle Shoals Dam No. 2.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE FLORENCE TIMES-NEWS,
*Florence, Ala., April 21, 1928.*

Senator KENNETH MCKELLAR,
*Senate Office Building, Washington, D. C.*

MY DEAR SENATOR: It appears that the Alabama Power Co. is attempting to bottle up the Government power facilities at Muscle Shoals Dam No. 2, according to recent maneuvers, and therefore we believe that it is highly important that you should be informed of the situation before the present term of Congress is consigned to history with the record written again that this branch of our Government is unable to settle a business proposition of this character.

Attached to this letter you will find an article which appeared in this week's issue of the Florence Herald, a newspaper which has not been especially antagonistic to the power company, setting forth plans of the company for the extension of their lines into the eastern and northeastern section of Lauderdale County. There is also attached copy of a rough map of the county upon which are marked this and other proposed developments of the power company on the north side of the Tennessee River. On the south side of the river, the company already owns all transmission facilities and rights of way, as well as the line from Gorgas into the heart of the Government's projects here.

At the western edge of the county you will note the site of the proposed dam near Bear Creek, and markings from that point toward Florence denoting rights of way. All necessary land on both sides of the river near Bear Creek have already been purchased by the Alabama Power Co., and practically all the rights of way for transmission lines eastward have also been purchased on both sides of the river. These purchases are reported to aggregate more than half a million dollars.

You will note markings denoting rights of way from Dam No. 2 northward through St. Florian to the Tennessee line. It is reported that by this the power company intends to connect with the Tennessee Power Co., although it is understood that no authority has been granted for this purpose by the Alabama Public Service Commission.

You will also note the route marked, denoting the proposed extension referred to in the Florence Herald, which goes eastward to Killen and Rogersville and loops back to St. Florian.

These lines appear to encircle almost completely the Government's plants for generating power at Muscle Shoals, and would, no doubt, interfere seriously with any effort in the future for distribution of power, either in the adjacent region or at a distance by any other company than the Alabama Power Co., or by the Government.

The article in the Florence Herald states that the Alabama Power Co. expects to have the line into East Lauderdale completed by fall, in time to furnish power to the cotton gins; therefore it appears that if Congress fails to take some sort of definite action before adjournment in June there will be new difficulties presented when the question comes up again for consideration. It does not appear reasonable that this latest proposed extension of the Alabama Power Co. lines could be undertaken because of any possibility of direct profits from the sale of electricity, either now or for many, many years in the future; therefore we must assume that the undertaking is merely another maneuver in their fight to secure Muscle Shoals for selfish gain.

If the Government is faced with such maneuvers by an unscrupulous industry, would it not be better for Congress to enact an amended Morin bill with a view toward altering it at future sessions as necessity or experience may dictate, rather than to permit this 10-year-old debate to be made even more complicated by the strategy of the power company?

Very respectfully,

J. L. MEEKS,
*Publisher the Florence Times-News.*

---

ROGERSVILLE MAY HAVE ELECTRIC SERVICE SOON—OTHER COMMUNITIES WOULD ALSO BE SERVED

Contingent only upon the granting of a franchise by the authorities of Rogersville, one of the most important developments of recent years in Lauderdale County is assured through the extension of electric service to all communities and persons desiring it along the Lee Highway between Florence and Rogersville.

The installation of a transmission line to serve this section of the county is projected by the Alabama Power Co., and it is hoped to have it in operation by September 1, in time to serve a number of cotton gins which desire to operate by electric power this fall, as well as other prospective customers.

According to definite plans which have been worked out, the main line would serve persons in the vicinity of Shoals Creek bridge, in Killen, Center Star, Cross Roads, and Rogersville, as well as all farmers along the highway who desire light or power, or both.

After the main line is in operation it is expected that branch lines would later be constructed to St. Florian, Anderson, and Lexington, as well as intermediate communities and farm homes, so that within a comparatively short time a network of electric lines would traverse a large portion of the eastern end of the county.

Those receiving service would be granted the same rates as have been established by the public service commission for other customers similarly situated throughout Alabama, who now number several thousand and are rapidly increasing.

At a mass meeting in Rogersville on Monday night, the large number of citizens present voted almost unanimously in favor of granting the franchise sought, and the matter will probably be acted upon by the city authorities soon.

Progressive citizens of the various communities included in the plan are said to be enthusiastic over the prospect of securing this modern facility at reasonable rates. Enough prospective customers are already in sight to warrant the building of the line in case the Rogersville franchise can be obtained, as now seems assured.

Customers would have the benefit of a 24-hour service, as efficient in every respect as is enjoyed by the larger communities of the State, thus having brought to their homes and places of business all the comforts, conveniences, and economies which modern electric service affords.

It is believed that all those interested in securing these benefits will gladly cooperate with the power people in their efforts to promptly provide dependable electric service, which is now considered indispensable in a progressive community.—(From the Florence (Ala.) Herald, weekly, Friday, April 20.)

LETTER OF CHARLES B. BREWER

Mr. BLACK. Mr. President, several days ago the Senator from Pennsylvania [Mr. REED] referred to a charge made by some person about Liberty bonds, and the person to whom he referred was a citizen of Alabama. He has written a letter to me explaining the circumstances of the Liberty bonds being issued by the Secretary of the Treasury, and I desire to have the letter inserted in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD as follows:

WASHINGTON, D. C., *April 21, 1928.*

Hon. HUGO L. BLACK,
*United States Senate, Washington, D. C.*

Subject: Correction of RECORD regarding Liberty bonds.

MY DEAR SENATOR: Would you be kind enough to have correction made to the CONGRESSIONAL RECORD of March 22, 1928, page 5152, concerning certain statements made in the Senate by Senator REED of Pennsylvania relative to the investigation of fraudulent practices in Liberty bonds, which statements were largely the same as Mr. Andrew W. Mellon's when testifying as to his connection with the Hays-Sinclair bonds in the oil scandal.

There is no question as to the results of the investigation being entirely contrary to oft-repeated statements concerning it. It was covered not only by one but by two majority reports by four of the five members of the select committee of Congress, all members of the Banking and Currency Committee. (It is report No. 1635, Sixty-eighth Congress, second session, and appears also in CONGRESSIONAL RECORD, pages 5578–5586, daily; and 5536–5544, bound volume.)

One of the majority reports was signed by Congressmen KING, Illinois; STEAGALL, Alabama; STEVENSON, South Carolina; dated March 2, 1925. (One Republican and two Democrats.)

The other, a unanimous report of the subcommittee, "was submitted and approved January 7, 1925," by "a subcommittee consisting of Mr. MCFADDEN, Mr. KING, and Mr. STEAGALL," as stated in last paragraph of report of March 2, and printed with it as Exhibit A, because of a "statement" by Mr. MCFADDEN. (Two Republicans and one Democrat.)

* * * * * * *

Senator REED of Pennsylvania referred to "charges of some person that Liberty bonds had been issued in duplicate," and stated:

"It was proven, as we all remember, that * * * there had been no overissue. The whole thing was cleared up I think to everybody's satisfaction.

"The only guilt in issuing Liberty bonds during the war had been on the part of the numbering machines which every once in a while slipped its gears and made duplicate numbers."

* * * * * * *

It is a fact well known to all who saw the duplicates, including many Members of Congress and the Senate, that identical numbers on practically all the pairs of bonds found duplicated were printed from different fonts of type. One bond would bear numerals of long, thin type, and its duplicate would have fat, squatty type. The proportion of duplicates occasioned by the slipping of the numbering machines were "negligible and inconsequential," said both Mr. MCFADDEN's unanimous reports and Mr. KING's majority report.

Both these reports also stated:

"Duplicate bonds amounting to 2,314 pairs, and duplicate coupons amounting to 4,698 pairs, ranging in denominations from $50 to $10,000, have been redeemed to July 1, 1924. * * * The statement as to coupons includes only one for each bond.

"Some of the duplications have resulted from error and some from fraud.

"The extent of the duplications is also uncertain from the record as far as it has gone, and an important part of the work by which duplication is detected was stopped by the Treasury July, 1924." (Par. 1, both reports.)

Both Mr. MCFADDEN'S and Mr. KING'S reports referred to Mr. Mellon's letter to the President on duplicate bonds as "incomplete," "contradictory," and "evasive," and continued: "The main part of the proof offered to show the duplication resulted from error was demolished by the committee discovering within the Treasury Department many of the very bonds which the Secretary's report" [Mr. Mellon's] "claimed had never been printed." (Par. 3, Mr. MCFADDEN'S subcommittee report.)

When the Treasury's defense relative to the slipping of the numbering machines was exploded by recovering some of the duplicate bonds which had not been destroyed (as most of them had been and were being when President Harding stopped such destruction), and these recovered bonds showed that type of entirely different character had been used in the numbering, the Treasury then set up a new defense. This defense was that errors had been made by printing incorrect numbers, and claimed this was proven by the fact that many bonds which should have appeared in the sequence of numbers had never been surrendered. This defense was called the "allocation" of numbers. Regarding this, Mr. MCFADDEN'S subcommittee report stated:

"The committee discovered some of these 'allocated' bonds, which had been paid, had been in the Treasury for four years at the time the Secretary's report of April 26, 1924, told the President" [President Coolidge] "they did not exist." (Par. 3, Mr. MCFADDEN'S subcommittee report.)

Continuing, Mr. MCFADDEN'S subcommittee report stated:

"The committee also discovered that other such bonds are continuing to appear and are being paid. 4. The possibility of a proper balance of the books is precluded by matters shown by the Treasury records."

On the same subject Mr. KING'S majority report stated:

"This allocation of set-off numbers is merely a guess, and that it is totally unreliable is rendered patent by the subsequent appearance of the bonds with those very numbers and their payment by the Treasurer. We can not escape the conclusion that there is a considerable duplication in bonds (not merely numbers) and that the whole public debt should be audited." (Par. 3.)

Continuing, later, in the same paragraph, Mr. KING'S majority report states:

"The fact that many of the bonds are destroyed, making it impossible to tell which were honest and which were spurious when duplicate numbers are presented, emphasizes the importance of the issue as to destruction of the bonds."

Mr. MCFADDEN'S subcommittee report as to destroying the bonds states "destruction of bonds was prosecuted in haste and that destruction records are not dependable.

"7. That the bonds were destroyed in violation of law, of regulations, and of presidential order, and the best evidence of duplication thus removed."

Mr. KING'S majority report uses the identical words, except for "prosecuted" the word "conducted" is used and the word "best" is omitted, making it read, "and the evidence of duplication thus removed."

On the subject of destruction, Mr. KING'S majority report sets out a letter to Mr. Mellon from President Harding, as follows:

DECEMBER 19, 1921.

MY DEAR MR. SECRETARY: I talked with you this morning over the telephone about suspending the destruction of bonds which have been exchanged for new ones, etc., and was greatly pleased to have your assurance that this destruction would be permanently suspended. I think this administration ought to take that course as the surest means of self-defense.

"These bonds will not require any very extended storage space, and we will have a very valuable refutation of neglect on the part of this administration if these exchanged securities and other questionable cancellations are preserved for future reference and inspection.

"I trust you will make the order a very explicit one and allow no variation therefrom."

Very sincerely,

WARREN G. HARDING.

The SECRETARY OF THE TREASURY,
*Washington, D. C.:*

Mr. KING'S majority report, signed by himself, Congressman STEAGALL, and Congressman STEVENSON, after setting forth the above letter, continued thus:

"Notwithstanding this letter, destruction was continued until President Harding again, in April, 1922, demanded that it be stopped, when destruction was finally stopped."

The report was then continued by setting forth a portion of a letter of April 26, 1924, written by Mr. Mellon to President Coolidge, as follows:

"It is true that during the latter part of June, 1921, Mr. Brewer personally called on the Secretary of the Treasury and urgently suggested, among other things, that destruction be suspended. There were not at that time, however, any orders or instructions of any kind from the President on the subject of destruction, and the Secretary of the Treasury did not agree with Mr. Brewer that destruction should be stopped, nor did he issue any instructions himself."

Immediately following the quotation of this letter Mr. KING'S majority report continues:

"After June, 1921, there were about $10,000,000,000 worth of securities destroyed." (Paragraph 10, majority report.)

Mr. MCFADDEN'S subcommittee report, commenting on such destruction, states:

"Authority to destroy bonds was repealed in 1919.

"Since then any such destruction was in violation of the United States Criminal Code." (Paragraph 12, subcommittee report.)

Mr. KING'S majority report sets forth the law in detail showing, unless express authority of Congress was obtained, no right existed to destroy bonds, money, etc., and added:

"The criminal law also prohibits it." (Paragraph 10, majority report.)

The majority report then set out the penalties of fine and imprisonment and, in case of an officer in charge, quoted the provision that such officer "shall, moreover, forfeit his office and be forever afterwards disqualified from holding any office under the Government of the United States." (Paragraph 10, majority report.)

There were two of the members of the subcommittee who were lawyers and the three members signing the majority report were also lawyers (two of them the same). Both the majority report and subcommittee report referred to a lengthy defense set up by Mr. Mellon in a 200-page printed book, which he styled his "letter" to the President, which he sent broadcast to thousands of banks and others over the country. Among the abusive language which he employed he set up the same defense made by him before Senator NYE'S hearing on the "oil scandal" (as reported by the New York Times of March 14, 1928, but not carried by the local press).

It was also the same defense which Senator REED of Pennsylvania set forth in the CONGRESSIONAL RECORD of March 22, 1928.

This defense, as well as all the other contents of the 200-page "letter" of Mr. Mellon, and also as well as his annual report and other reports by him and his Undersecretary, was given "most careful consideration," both by Mr. MCFADDEN'S subcommittee and by Mr. KING'S majority committee (preamble of each report) and is the particular report which Mr. MCFADDEN'S subcommittee styled as "incomplete, contradictory, and evasive," as recited earlier herein.

With this defense and Mr. Mellon's other defenses before them, and relying not on what "some person" charged, as stated by Senator REED of Pennsylvania, both the subcommittee of Mr. MCFADDEN and majority committee of Mr. KING, relying on "its examination of Treasury reports and records and the testimony of Treasury officials and employees," stated: "Your committee finds that * * *." And after a careful analysis of their findings regarding duplicate bonds and abuses in the buying and selling of Liberty bonds and reporting indicated losses of $24,000,000, $28,000,000, and $60,000,000 the reports were summarized thus—

"16. The committee has stated herein that the evidence discloses:

"1. That there has been duplication of bonds, some fraudulent, the proportion not yet determined;

"2. That the report of the Treasury relative thereto is incomplete, contradictory, and evasive; and proof it offered to show innocent error was demolished;

"3. That records have been falsified; extent of same unknown;

"4. That indifference to duplications has been prevalent;

"5. That legal remedies have been neglected in the payment of duplicates;

"6. That destruction of bonds was prosecuted in haste and that destruction records are not dependable;

"7. That the bonds were destroyed in violation of law, of regulations, and of presidential order, and the best evidence of duplication thus removed;

"8. That under a theory of economy; evidence, not destroyed, has been rendered useless and the Government thus deprived of its main safeguard against future fraud;

"9. That the will of Congress has been overridden by connivance in the repurchase and sale of millions of dollars of bonds;

"10. That questionable methods were employed in handling these funds;

"11. That substantial, actual losses to the Government has resulted; and

"12. That the extent of these losses has been rendered uncertain by failure of records to agree." (Par. 16, Mr. MCFADDEN'S subcommittee report; also par. 13, Mr. KING'S majority report, except for a word here and there.)

The committee appealed in vain to be allowed to complete its investigation, ascertain the extent of losses and recover them. Its head

was cut off two days after it made its report. It is quite clear, however, the question was not "cleared up," as Senator REED of Pennsylvania states, "to everybody's satisfaction."

I know it to be a fact that it was not to the satisfaction of those signing the report so freely quoted herein.

There was a fifth member of the committee, Representative STRONG of Kansas. He did not agree either with the majority report of Congressmen KING, STEAGALL, and STEVENSON or with the unanimous subcommittee report approved by Congressmen MCFADDEN, the chairman, KING, and STEAGALL in a short "Statement of Mr. STRONG," made at the time.

* * * * * * *

WHAT HAPPENED TO THE "PROSECUTOR"

After 29 years of service, begun under Mr. Secretary Herbert in the Cleveland administration, including an Executive reinstatement by President Roosevelt, solely on my past record ending with chief draftsman of construction, Navy; after promotion to "attorney for the United States," under President Wilson's administration; after two years' service on this very investigation, directly under the personal supervision of President Harding; after reinstatement at the personal direction of President Coolidge as-of-the-next-morning following a "discharge" by Harry M. Daugherty in an attempt to stop the investigation: after continuing the investigation as personally ordered by President Coolidge and serving as counsel to the Congressional Bond Committee as personally directed by Mr. Justice Stone, then Attorney General; after all this, I was deprived of my position in violation of the principles of the civil service laws (under which status I came) to hush up this scandal.

There had never been a charge against my record. My sole offense was that a matter, of which I had never heard and which came to the Department of Justice from the outside in the regular way, which I was directed by the acting Attorney General to pursue, was pursued and was not smothered when it led into channels with power to bring pressure to stop it.

A duly constituted committee of Congress said I was right—that these charges from the outside which I reported as true, were true. It went further; it said that the Treasury records were falsified to prevent the truth from being discovered.

Through the tyranical exercise of power by Andrew W. Mellon over the Department of Justice, over which he is supposed to have nothing to do, I was removed after refusing a direct offer of a continuance of my position if I would use my influence with the Congressional Bond Committee to have their report suppressed. The offer came from one who has demonstrated his ability to have made it good.

Since, with this administration, might makes right, the action may be right.

In his annoyance at the condemnation of the congressional committee, Mr. Mellon spread defamatory matter about the writer the length and breadth of the land with the evident purpose, of course, of detracting attention from the findings of the committee. Redress for this was refused by the courts, which upheld the doctrine that a high official may say whate'er he will, even knowing at the time that what he says is both false and malicious if he first incorporate it in an official letter.

That being the law, I also bow to it.

But certainly as a citizen, if there be a vestige of liberty left, I should not be required to see the official organ of the Congress spread upon its pages statements entirely contrary to the findings of the only authorized agency which Congress directed to look into the matter—the select bond committee (pursuant to H. Res. 231, 68th Cong., 2d sess.).

Very respectfully,

CHAS. B. BREWER.

## NAVAL APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12286) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1929, and for other purposes, the pending question being on the amendment of Mr. BLAINE, as modified.

Mr. BRATTON. Mr. President, the President is the Commander in Chief of the Army and Navy of the United States. He is made so by section 2 of Article XI of the Constitution. In that capacity he is vested with certain powers and is authorized to perform certain official acts. I think that under that constitutional authority, coupled with the established precedents, he has the power, in the absence of any action on the part of the Congress, to cause the armed forces of the United States to be landed upon foreign soil for temporary purposes in cases of emergency, but only to insure temporary protection to nationals with respect to their lives and property. The exercise of this power has the sanction of well-recognized rules of international law as well as the Monroe doctrine. So long as the power is exercised in this guarded manner there can be no criticism. No other course would conform to the safety of the lives and property of our nationals or the nationals of other countries who are entitled to protection under the Monroe doctrine as we have declared and interpreted it. That is not aggressive warfare. It is merely the exercise of the necessary steps to protect nationals against danger occasioned by the lack of stability on the part of the domestic government.

The power to declare war is expressly vested in the Congress. It is thus vested by section 8 of Article I of the Constitution. These two functions are entirely separated and dissociated from each other. There should be little or no difficulty in distinguishing them. Under the solemn language of the Constitution active and continued warfare can be waged by our country in no other way. To do so under the guise of protecting life and property in an emergency situation is to abort the Constitution. It is subversive of our form of government. Any such departure from the plain language of the Constitution will never meet with the approval of the American people. They demand government under constitutional authority, not despite it.

With these general statements of recognized principles, I address myself to the several pending amendments having to do with our present situation in Nicaragua. I did not approve landing the marines there. I thought our action was unwise, unjust, and not sustained by the facts when measured by precedents or authority. It was my firm belief that no emergency existed sufficient to demand such action on our part. I believed then and now that neither life nor property was jeopardized sufficiently to warrant that action. I express my emphatic disapproval of the action thus taken. Neither do I desire to be understood as condoning what has gone before. I do not do so. But, Mr. President, the marines were sent there. They have remained there for many months. It is the present and future with which the proposed amendments to the pending appropriation bill deal—not the past. After the marines thus were landed an understanding, called the Stimson agreement, was entered into. The two parties in Nicaragua, the Conservatives and the Liberals, as well as the United States were parties thereto. It was a tri-party compact. It provided that the marines should be kept in Nicaragua until the election is held in October for the purpose of seeing that the election is conducted fairly and honestly. That agreement provided that upon the strength of our obligation to maintain the marines there, thus affording protection, the two contending factions should cease waging war upon each other; that they should surrender their arms, blades of battle, and implements of war. This was done, with the exception of a small remnant of soldiers. It may be said that practically all of the armed forces ceased to spill the blood of their countrymen and turned their efforts to peaceful pursuits.

They relied upon our good faith. They believed that we would perform our part of the compact. They transposed themselves from armed forces to unarmed citizens. They have been lulled into a state of unpreparedness for conflict with each other or facilities with which to protect themselves against armed attack by our assurance that armed forces of the United States will be retained and maintained there until after the next election is held. To withdraw the marines prior to that time would amount to a breach of the agreement, and would subject the Liberals to an immediate attack, which, in my judgment, would approach the proportions of a massacre. Should we do that, and an attack with bloodshed should follow, we could not escape guilt in the forum of good conscience or public opinion. The blood of those people would be upon our hands. It may be said that there was a lack of authority for the Stimson agreement. I agree with the statement. I do not believe authority for the execution of that agreement or the assurances thereby given did exist. I think there was a total lack of it. Be that as it may, those purporting to represent the Government of the United States assumed to enter into it, and the two contending forces in Nicaragua acted and relied upon that agreement.

Mr. KING. Mr. President, will the Senator suffer an interruption?

Mr. BRATTON. Gladly.

Mr. KING. The Senator stated a few moments ago, as I understood him, that without the continued intervention of the United States and the presence of our marines in Nicaragua the Liberal forces might be attacked by Sandino and bloodshed would result.

Is it the view of the Senator that Sandino would attack the Liberal elements—known as the Sacasa party? Is it not a fact that the Liberals and the sentiment of the country are with Sandino, and that whatever remnants of the Sacasa or Liberal organization now exist sympathize with him, and would assist him if they could, and that instead of his attacking the Liberals he would protect them?

Mr. BRATTON. Perhaps I did not make myself clear, at least to the Senator from Utah. I do not want to leave the

impression that Sandino would attack the Liberals, but that the Conservatives would do so; in other words, that the struggle between the Conservatives on the one hand and the Liberals on the other would be immediately resumed if our forces were withdrawn and the assurances given in the so-called Stimson agreement likewise were annulled. That is what I had in mind.

Mr. KING. Will the Senator suffer another interruption?

Mr. BRATTON. Yes, Mr. President.

Mr. KING. Does not the Senator believe that the overwhelming majority of the people of Nicaragua are Liberals, and that they refuse to join the so-called Conservatives, the Diaz régime; and, that if we should withdraw our forces, and an internal conflict should result, that the Conservatives would be more in danger than the Liberals, owing to the fact that they are in the minority?

Mr. BRATTON. Mr. President, regardless of that, I hold to the view that if the marines are withdrawn the two factions in Nicaragua will resume waging war upon each other; that the blood of citizens of that country will be spilled. It is wholly immaterial to me whether the Liberals or the Conservatives suffer by the struggle.

The result will be a resumption of war between the two struggling forces there, and the spilling of blood. It is to obviate that that I believe the marines should be continued there until after the election is held, as the Stimson agreement provides.

Mr. KING. One further suggestion, if the Senator will permit me.

Mr. BRATTON. Yes, Mr. President.

Mr. KING. I think that most of the so-called revolutions in South and Central America and in the Caribbean Islands were quite unimportant, and scarcely disturbed the life or pursuits of most of the people; they were rather opera bouffe performances, and the loss of life was inconsequential. During the discussion reference has been made to the "revolutions" which have taken place in Haiti. It is true there has been domestic strife and various Haitian "revolutions," but the military forces of the United States killed more Haitians in one year than were killed during 40 years of Haitian rule. American intervention in Haiti resulted in armed conflicts; that is, war, during which between 2,500 and 3,500 inhabitants of Haiti were killed. The conflicts among the Nicaraguans do not result in great loss of life; the occupying American forces have carried on war against the people of that country, and life and property has been destroyed.

Mr. BRATTON. Continuing, Mr. President: Regardless of whether there was technical authority for the execution of what we now call the Stimson agreement it was entered into by those who assumed to act on behalf of our Government, and practically all elements in Nicaragua relied upon that agreement and upon our assurances given thereby.

They were moved to change their position in faith of the guaranties given by us. They assumed that the authority existed. Acting upon that assumption and belief, they stacked arms; guns ceased to fire; the sacrifice of life stopped; and war between two struggling elements ended. If we were now to say that because strict authority on the part of those who acted for us did not exist, and consequently we will go no further in carrying out the agreement, we would place ourselves in the position of allowing technicality to prevail over an obligation we can not escape. Yes, Mr. President, it would amount to permitting a narrow technicality to control us to the utter disregard of the lives and property of those people who acted in full good faith, relying upon us. We must not fail them now.

Mr. President, because of these considerations I think the marines should be retained in Nicaragua until after the election is held or the time for it has passed. Nothing short of that will constitute performance of the agreement on our part. But when that is done, it is my belief that our armed forces should be withdrawn with all reasonable dispatch. They will have no proper place there afterwards.

Mr. SHORTRIDGE. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from California?

Mr. BRATTON. I do, Mr. President.

Mr. SHORTRIDGE. I understood the Senator to state that he thinks we should withdraw our forces from Nicaragua as of a certain future date. If American citizens shall as of that time be there, and be in possession of lawfully acquired property, does the Senator claim that this Government should extend no protection to them, but should suffer them to be robbed, and perhaps their lives taken? Is that the position which the Senator, an American Senator, takes?

Mr. BRATTON. By no means, Mr. President.

Mr. SHORTRIDGE. What is the Senator's position, then, with regard to the duty of this Government to guard and protect its citizens who have gone lawfully into a friendly nation and lawfully acquired property there?

Mr. BRATTON. Obviously, Mr. President, the distinguished Senator from California—for whom I entertain the highest respect—did not hear the opening part of my remarks. I said then that it is not only the right but the plain duty of our Government, under well-recognized principles of international law, to protect our nationals in their lives and property against dangers occasioned by a lack of stability on the part of local governments; that if such a situation should arise in Nicaragua after the election is held in October—a situation where our nationals are subjected to danger, either as to their lives or property—it will be the plain duty of our Government to protect them, even to the extent of landing armed forces there; but I also said that I did not believe those facts existed when our marines were sent there originally. I said that I did not believe that a careful examination of the facts would disclose that our nationals were jeopardized, either as to their lives or as to their property, sufficiently to justify sending the marines there originally, but that they are there, and that since they went there an agreement was entered into, commonly referred to as the Stimson agreement, which gave the two forces certain assurance that we would retain the marines there until after the election is held, and that I believe they should be kept there in order that our obligations enjoined under the terms of that agreement are performed. That after that I think they should be withdrawn. I agree with the Senator, however, that if changed conditions should come about jeopardizing or endangering our nationals either as to their lives or their property, clearly it would be the duty of our Government to protect them even to the extent of landing the armed forces there.

Mr. SHORTRIDGE. Due to confusion in the Chamber, I see that I misunderstood the Senator's position. I understand now the position he takes with respect to certain phases of this matter. With some of the propositions stated by the Senator from New Mexico I heartily agree.

Mr. BRATTON. I assume that the Senator and I are in perfect accord with regard to the principles discussed, but perhaps we disagree as to their application to the particular facts existing in Nicaragua.

Mr. SHORTRIDGE. That turns upon what the facts are.

Mr. BRATTON. Yes.

Mr. SHORTRIDGE. I merely observe, if the Senator will pardon me, that I claim, and I think I can sustain the claim, that everything the President has done was warranted by the facts, and fully justified under accepted rules and principles of law. The precedents in this country fully justified and justify him. Acquiescence on the part of Congress in acts done by former Presidents amount to an approval of and fully justified President Coolidge, as matter of law, based upon the facts of any order he, as Commander in Chief, has issued or caused to be issued in respect of Nicaragua. The doctrine or rule of law as to "congressional acquiescence" is set out and applied in the case of United States against Midwest Oil Co., Two hundred and thirty-sixth United States at page 450 and following.

Mr. BRATTON. Mr. President, the point at which the Senator from California and I part company is the application of the principles upon which we agree to the facts in Nicaragua.

Mr. PITTMAN. Mr. President——

Mr. BRATTON. I yield to the Senator from Nevada.

Mr. PITTMAN. I am in entire accord with the statements made by the Senator from New Mexico; but at this point I wish to call attention to the amendment, wherein it states that—

> In the case of * * * the immediate danger of such attacks, at any time, * * * the forces of the United States may be used by the President for strictly protective purposes without the consent of Congress, and appropriations may be used to pay the expenses of such protective action.

That would allow the President of the United States on February 2 or February 1 to retain in Nicaragua sufficient forces to meet such threatened attacks at the points where the attacks were threatened.

Mr. BRATTON. Undoubtedly, Mr. President. The amendment of the Senator from Wisconsin, as amended by the Senator from Nevada, does and will authorize the President to meet any emergency such as the Senator from California referred to a few moments ago.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. BRATTON. I yield to the Senator from New York.

Mr. COPELAND. May I ask the Senator what he thinks should be the attitude of the United States in a situation like this, assuming that it is true?

The Associated Press this morning says:

George Marshall, of New York, assistant manager of the La Luz y Los Angeles mine, seized last week by Sandino and his followers, was reported to have been killed by the rebels.

What is to be the attitude of the United States under these circumstances? I hope I may have the attention of the chairman of the Foreign Relations Committee to this matter. I am very much disturbed by what has happened in Nicaragua, where a citizen of my State is reported as having been killed by Sandino. What are we going to do about this, may I ask of the Senator from Idaho, by the courtesy of the Senator from New Mexico?

Mr. BRATTON. Yes, Mr. President; I willingly extend the courtesy.

Mr. BORAH. Mr. President, I regret to say that, owing to the fact that I was conversing with a colleague, I did not hear the Senator's statement.

Mr. COPELAND. May I say that I am very much disturbed over an Associated Press dispatch, which I assume to be a statement of the truth, that—

George Marshall, of New York, assistant manager of the La Luz y Los Angeles mine, seized last week by Sandino and his followers, was reported to have been killed by the rebels.

Now, what are we going to do about a matter of that sort? What can we do about it?

Mr. BORAH. Of course, I know of nothing we can do to remedy that which has happened; but it is that class of things which necessitates action upon the part of the President to protect life and property in countries where those things happen.

Mr. COPELAND. It is perfectly clear to me, if the Senator will bear with me for a moment, that it must be mawkish sentimentality on our part if we seek to bring back the marines when there is such a situation in Nicaragua that a citizen of the United States engaged in a legitimate occupation should be taken out and murdered by the rebels. I think this is a bad time for us to be talking about taking the marines out of Nicaragua, when such a murderous attack as this can be made upon a citizen of the United States. I want to see the long arm of Uncle Sam reach out and give relief to an American citizen wherever he is in the world, provided he is there upon a legitimate errand and performing a useful function.

Mr. BORAH. Mr. President, I do not understand that anyone contends that it is not within the authority and the duty of the President to protect the lives and property of our nationals when threatened in a foreign country. I do not understand that anyone contends against that proposition. I am sure I do not. It is undoubtedly his duty, and he undoubtedly has the authority, if necessary, to use the armed forces to protect the lives and property of our nationals when endangered in a foreign country. This controversy arises over the limitations of power upon the part of the President. Within what limits may he exercise that power and beyond what limits is it necessary to ask the authority of Congress?

Mr. COPELAND. Mr. President, will the Senator yield for just a moment?

Mr. BRATTON. Yes, Mr. President.

Mr. COPELAND. I am sorry to interrupt the Senator.

Mr. BRATTON. Not at all.

Mr. COPELAND. I was opposed to the President sending the marines to Nicaragua; but, within his rights, he did send them there. Now, Mr. President, there is a situation there that demands the strong hand of our Government to deal with, when an American citizen is murdered, and I do not think it is seemly for us to be talking about taking the marines out of there, or stopping our work of intervention, so long as a situation such as that recorded by this message can happen in that country. It shows, certainly, that instead of talking now about taking the marines out by the 1st of February we should be indicating to the rebels there that we are going to keep the marines there until the life of every American citizen is guaranteed against such a murderous attack as this.

Mr. KING. Mr. President, will the Senator yield?

Mr. BRATTON. I yield to the Senator from Utah.

Mr. KING. The Senator from New York has employed the word "rebels" in the interruptions with which he has punctuated the speech of the Senator from New Mexico. I am curious to know why he employs that word. A short time ago Sacasa, who is now receiving, it is claimed, the support of the United States, was a "rebel," and was so denominated by persons in our executive department. Sandino is opposing armed intervention by the United States, and denies the right of our country to send military forces to control his country and take charge of the elections therein. Because he opposes a foreign power the Senator from New York calls him a "rebel." Many persons who have inaugurated or participated in revolutions have been called "rebels," but when their revolutionary movements were crowned with success they were eulogized as patriots, and the pages of history point to them as heroic figures and the founders of states and empires. Washington and Sam Adams and Hancock and Patrick Henry were proclaimed "rebels" by Lord North and George the Third. We now honor them for the successful revolution which they inaugurated and the Republic which they helped to establish. It is a pertinent question to ask, Why are we sending thousands of marines to Nicaragua and employing many of our naval vessels to supply them with food and munitions of war? Why are we pursuing Sandino and his followers through jungles and mountains and forests? Why are we destroying the homes of some of the inhabitants of Nicaragua and carrying terror to thousands of helpless women and children? Why are we sending American boys to that far-off country where they are exposed to dangers seen and unseen, to climatic conditions which sap their vitality and undermine their health, and to the opposition of Nicaraguans who believe that their country is being invaded and their liberties jeopardized?

Senators who have defended the policy which calls for the continuance of our marines in Nicaragua admit that the United States had no right to send its military forces to Nicaragua, and that the so-called Stimson agreement which is the pretext for continuing marines in that country was made without authority and imposes no binding or legal obligation upon the United States. They say, however, that having made the mistake of landing marines in Nicaragua, and the executive department having made the blunder of supporting the wrong faction, there is a moral obligation resting upon the United States to keep the agreement signed by Mr. Stimson and representatives of one of the factions in Nicaragua. In other words, the United States was not justified in sending military forces to Nicaragua and the State Department had no authority to make the Stimson agreement, but having made it, this Government must keep military forces in Nicaragua for an indefinite period and at great cost to the taxpayers of the United States and carry on war against all persons in Nicaragua who resist or attempt to oppose the occupation of their country by the armed forces of the United States. Whether our military operations in Nicaragua are called "war" or intervention or any other name, our Government is sending its war vessels into the harbors of Nicaragua and has landed thousands of its marines upon the soil of that country. The military forces of our Government are carrying on military operations against military forces drawn from the inhabitants of that country.

The American armed forces are seeking to destroy the opposing forces, and yet it is said it is not war, and that we are only preparing for an election in that country. Any election held under the control of a foreign power and under the supervision of foreign military forces will have no binding or lasting results. It will provoke resentments and lead to future domestic discord and fratricidal strife. The claim will be made that it was not a fair election. It was not a Nicaraguan election; and undoubtedly many within the party which may win will feel bitter towards the United States because of its military operations and its military control of the election. After the election is held the unrest which will follow will lead to demands that the United States continue to occupy Nicaraguan ports with its war vessels and Nicaraguan territory with its marines. It will be claimed that if the marines are withdrawn, there will be domestic conflicts which will menace the lives and property of American citizens. Thus pretexts will be found to continue our marines in that country and to impose to a greater or less degree the will of the United States upon any government there established whether de facto or de jure.

Mr. President, if the Senator from New Mexico will pardon me for further trespassing upon his time, may I observe that I was not clear as to the idea which he meant to convey concerning the duty of the United States to send military forces into every country where an American can be found regardless of internal conditions there existing or civil war there being carried on.

American citizens, when they go into other countries, must expect to meet the vicissitudes resulting from civil war or revolutionary strife. Of course, under international law the United States has the right to protect its nationals upon land or upon sea, at home or abroad. That does not mean, however, that war must be waged against a country in which an American citizen may have lost his life or his property. Many foreigners have been killed within this Republic, but the countries to which these unfortunate persons owed allegiance did not declare war upon the United States or send armed forces to land upon our shores. Senators will recall that a number of years

ago in the western part of the United States several score Chinese were killed by American citizens. The Government of China made representations to the United States, and my recollection is that an indemnity was paid; if not, it should have been paid. In our own Civil War there were foreigners in the border States whose property was taken both by the North and the South. Property belonging to Americans was also taken and claims have been presented to Congress and appropriations have been made to cover the same. In Sherman's march through the South, property was destroyed and the country laid waste. American citizens, when there is domestic insurrection or civil war, may suffer as the nationals of the country in which the conflict is waged. During the administration of President Taft there were between fifty and seventy thousand American citizens in Mexico.

American investments in Mexico totaled a billion and a half dollars. Several hundred Americans were killed upon Mexican soil, and property of the value of tens of millions of dollars was confiscated or destroyed. A portion of this property was seized by the military forces of the Government. Much of it was taken by revolutionary forces. The United States did not declare war upon Mexico or send our naval vessels and our armed forces to protect their lives and property. Upon the contrary, President Taft issued a proclamation advising American citizens to depart from Mexico. The nationals of Mexico likewise suffered. Many noncombatants were killed and their property seized or destroyed. For a number of years the tide of revolution flowed over Mexico. Diaz was driven out. Madero came to power, but he was destroyed. Huerta became the head of the Government, but he was overthrown. We did not intervene either to preserve peace in Mexico or save the lives of Americans or to "enforce the Monroe doctrine." I may add that the Monroe doctrine, in my opinion, was not involved.

It is true that foreigners from other countries suffered injuries, some were killed, and a portion of their property was seized or destroyed. To declare that it is the duty of the United States under all circumstances to send armed forces into every country where an American is injured or killed or his property taken is to state a proposition which needs important modifications. Neither precedents nor international law justify such a proposition. Of course governments must be solicitous for the welfare of their citizens, and the executive department of our Government, as well as the legislative department, must use all proper means to maintain the honor and dignity of this Republic and defend the lives and property of its citizens.

Mr. BORAH and Mr. COPELAND addressed the Chair.

Mr. BRATTON. I yield to the Senator from Idaho, who rose first; then I will yield to the Senator from New York.

Mr. BORAH. Mr. President, the situation as depicted by the Senator from New York and the conditions of which he speaks, and the situation referred to by the Senator from Utah are two entirely different propositions, to my mind. Of course, if there is a revolution going on in a country the incidents of that revolution will necessarily be visited upon all who come in contact with it. But if the facts have been reported correctly to the Senator from New York this was merely a deliberate, individual murder, which has no relevancy to those injuries incident to a conflict between opposing armed forces.

Mr. BRATTON. Now I yield to the Senator from New York.

Mr. COPELAND. I can not conceive how any Senator can split hairs over what we call these men. The Senator from Utah found fault with me because I referred to them as "rebels." I did that because that is what the article said they were, rebels. But I do not care whether you call Sandino and his groups rebels or patriots, or what name you give them; an American citizen has been murdered, and I say that it is the duty of this Government to find out why that situation can be created anywhere on the face of the earth, I do not care whether it is in Nicaragua or where it is.

I am not discussing property rights. If these mines were in the way of military operations, perhaps it would have been well for the owners to get out of the way. But here was an American citizen, who was not there engaged in some military undertaking, who was not there fomenting some rebellion; he was there in the pursuit of his calling, and he had a right to be there. I contend that it is the business of the United States to find out why it is that anywhere on the face of the earth an American citizen engaged in a lawful enterprise should be killed in his tracks.

Mr. BRUCE. Mr. President, if the Senator from New Mexico will yield, I would like to remind the Senate that one of the most popular things in the history of the United States was the act of that commander of one of our battleships who, when a naturalized American citizen of Hungarian origin, Martin Koszta, was impressed by an Austrian ship of war, cleared the decks of his American ship for action, and made a demand for the surrender of that prisoner to him, which demand was duly honored. There is an illustration of this great Government of ours, with all its power and prestige, being prepared to bring its whole armed force to bear even upon a mere individual in a situation of that kind.

It was only yesterday that the New York Times contained a reference to that incident, one of the truly glorious incidents in the history of our land.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Nebraska?

Mr. BRATTON. I yield to the Senator.

Mr. NORRIS. I think Senators should not get excited over the dispatches that have been published in the papers this morning and yesterday morning, and insist on keeping the Army somewhere to protect Americans on account of those particular dispatches. They happen to come just at the time when this question is before the Senate, and when one reads the dispatches I believe he can not resist the conclusion that probably they come just at this opportune time, with perhaps the idea of influencing the action of the Senate. They state that "It is said such and such has happened," or "It has been reported that such and such has happened," and the information, according to yesterday's morning paper, is that Mr. Fletcher has brought this information to the United States. He is in Washington, or was yesterday. It is from his report that the information comes. The article shows on its face that Mr. Fletcher is president of one of these mines, the La Luz mine, down there.

I have before me here the testimony taken before a subcommittee of the Foreign Relations Committee some time not so very long ago, in which a man by the name of Moffat was testifying. He refers to this mine, and says it was a blanket concession, as he called it, which the Nicaraguans considered very iniquitous. I know nothing about it; it may be a good or a bad concession, but that is something which ought to be considered.

We ought to consider also that there has not been anything definite. I would like to call upon the chairman of the Foreign Relations Committee to get his committee together and let Mr. Fletcher be called before the committee—I presume he is still in the city—and let him testify as to this incident. There he can be examined and questioned. I do not believe we ought to get excited now, because this mine was taken by the Sandino forces, and a man killed in the taking of it, and insist that for that reason we either ought to send or that we ought to keep our Army in Nicaragua. It is an incident that is likely to happen in any insurrection or any war.

A few years ago 11 Italians were murdered in New Orleans. I have a distinct recollection that only a year or two ago over in Persia an American citizen was murdered in cold blood, as I remember it. I think we took some action here to give his widow a pension, or something, on account of it. No one suggested that we should send our Army over to Persia, but the Government of the United States investigated the matter, and I think the Persian Government paid compensation on account of that occurrence. They could not restore the life; that was gone. There was not even an insurrection in Persia at that time. That man was simply murdered, as far as I remember, in absolutely cold blood, without any cause whatever, by a bandit. That is to be regretted, of course, but I do not believe we ought to take a thing of that kind into consideration to the extent of sending the Army. It is perfectly proper to investigate the alleged murder that took place, and that is spoken of in the paper. One way to investigate the matter, it seems to me, is to put Mr. Fletcher on the witness stand and get the facts from him. We probably can not get them accurately from a newspaper report; it may be perfectly accurate and it may not. There are a good many things in the report itself that indicate that there is a great deal of doubt about it, because, as one can see by reading it, many times it makes no positive statement. It says it is alleged that such and such happened, or it is reported that this has taken place.

I would like to call the attention of the Senator from New York to the fact that in Nicaragua, where Sandino is contending against the American forces, it is perfectly natural he should take a mine if he could. We take their villages, we burn their houses, we kill their people. We have killed a good many who were not in the Nicaraguan Army, not in Sandino's forces. It is part of a war. I am not speaking of that in a complaining sense. Assuming that we are doing what we ought to do down there—as far as I know they have not done anything they have not a right to do—we must concede the same

thing to the opposition. They take possession of a mine. If they get gold there, they take it. If they get cattle or any other kind of property there, they naturally take it. That is what civilized countries do. It is what we always do, what any army always does. If, outside of all that, there is a murder of an American citizen there, it ought to be properly investigated, and probably will be.

Mr. KING. Mr. President, will the Senator yield?

Mr. BRATTON. I yield.

Mr. KING. I might suggest to the Senator from Nebraska that we took some eight or nine hundred million dollars of property in the United States belonging to Germans and Austrians when we entered the World War. Those persons came here under a treaty, and made their investments under the sanction of a solemn treaty and yet we took their property, and we have much of it yet.

Mr. NORRIS. If we carried out the program that is outlined in the remarks of the Senator from New York we would have to have a standing army of 25,000,000 men scattered all over the civilized world. It has not been so very long ago that 17 Chinamen were killed, I think, in Los Angeles or San Francisco—some place on the Pacific coast, I have forgotten where. They were citizens of China. We did not expect that the Chinese Army would invade us on account of that. I do not know whether we have ever made compensation to the relatives of those people for that or not. If we went to war every time somebody was killed, the whole world would be in war all the time. It is not international law, there is no government that follows that principle, and we should not expect the governments that we are fighting to follow it.

Mr. PITTMAN. Mr. President, I should like to ask the Senator from Nebraska a question.

Mr. BRATTON. I am going to yield to the Senator from Nevada, but I take occasion to express the hope that I may proceed with my speech.

Mr. PITTMAN. The very reason I have been desirous of asking this question is for the purpose of relieving the Senator from extraneous discussion. I think the Senator from New Mexico has a very ably prepared speech. I simply want to ask the question of any Senator if the President has not the same power to act with regard to the condition stated by the Senator from New York; that is, the murder or the attack down there, or whatever it was—whether this resolution passes or not, has he not exactly the same authority that exists without the amendment or with the amendment?

Mr. EDGE. Then, why the amendment?

Mr. PITTMAN. The amendment gives power to protect American citizens under the Constitution. The reason for the amendment is that it is dealing with an entirely different subject than that referred to by the Senator from New York. The amendment is simply condemning the President of the United States for entering into an agreement.

Mr. BORAH. No, the amendment does not do anything of the sort.

Mr. PITTMAN. I contend that it does.

Mr. BORAH. No; the amendment does not condemn anything. It simply announces the policy for the future.

Mr. PITTMAN. The policy announced is absolutely a contradiction of the policy that has been followed, and if that is not a condemnation of what has been done, what is it? If the Senate states that principle even in a policy of nonintervention in the domestic affairs of a foreign nation, if that is our policy and there has been an actual interference theretofore, it is a condemnation of that policy. But with the amendment recognizing the constitutional authority of the President to protect citizens of the United States against attack or threatened attack, he will have just the same power if the amendment is adopted as if it is not adopted, to protect American citizens or to do anything else that he had the constitutional right to do before the amendment was agreed to. Therefore, the argument in every particular case is entirely immaterial to the argument the Senator from New Mexico is advancing.

Mr. COPELAND. Mr. President, will the Senator from New Mexico yield to me?

Mr. BRATTON. I yield.

Mr. COPELAND. I think that I know no braver man than the Senator from Nebraska, but he is too frightened about propaganda. He thinks that propaganda stalks the earth like some great giant and now has the idea that Mr. Fletcher has created some propaganda and put out this message. There may not be a word of truth in it, and I hope there is not, but this message is an Associated Press dispatch and it is very short. I ask that the clerk may read it.

The PRESIDING OFFICER (Mr. McNARY in the chair). Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

MANAGUA, NICARAGUA, April 24.—George Marshall, of New York, assistant manager of the La Luz y Los Angeles mine, seized last week by Sandino and his followers, was reported to have been killed by the rebels in a radiogram received to-day by Clifford D. Ham, collector general of customs, from W. J. Crampton, collector of customs at Puerto Cabezas.

Crampton reported that the La Luz mine was robbed of $1,300 in cash and merchandise and livestock amounting to $8,700.

General Jiron, a rebel chief, is now in immediate charge of the mine. With 150 men, mounted on mules, he arrived last week in the Pis Pis mining region from the direction of Matagalpa. Jiron is said to have received orders to cut off the American manager of the mine. Harry P. Amphlett, who is now absent from the mine, having gone down the Prinzapolka River before the arrival of Sandino's men.

While near Matagalpa, Sandino is stated to have publicly made threats that he was going to kill all Americans because of the presence of the marines, who he called invaders, but would not harm other nationals.

The Bonanza mine, north of La Luz, also is reported to have been robbed.

The American Legation this afternoon had received no further details from the Atlantic coast.

Mr. COPELAND. The point I want to make is that if Mr. Fletcher is engaged in propaganda, he has subsidized or bribed or utilized the Associated Press, because the date line of that message is Nicaragua.

Mr. NORRIS. I have not accused him of engaging in propaganda. The Senator from New York is entirely mistaken about it. I have before me the newspaper article to which I had reference, appearing in the Washington morning Herald of April 24. I am not going to burden the Senate with reading it, because I have stated the substance of it, but it does say all the way through rather indefinitely that "it is said" this and that happened, and gives Mr. Fletcher, who it says is in the city of Washington and president of this company, as authority for the statement. The newspaper draws a great many of those conclusions, and not Mr. Fletcher.

I have not even insinuated that Mr. Fletcher is in any way in error or wrong about anything, but we only have a second-hand report, a sort of hearsay that comes from him. What I asked was that the Senator from Idaho [Mr. BORAH] call the Foreign Relations Committee together and subpœna Mr. Fletcher while he is here and put him on the stand. So far as I know, he is a perfectly reliable and perfectly honest man. I know nothing about him whatever. But the article that I have referred to gives Mr. Fletcher as authority. There would not be anything wrong about our calling him and getting the information first hand.

Mr. COPELAND. I hope that will be done, but I want the Senator from Nebraska to understand that I am not talking about the article from which he quoted. I have been referring to an Associated Press dispatch which I clipped from the morning Post, and it is dated Nicaragua. It is not sent out from Washington. It is sent out from Nicaragua.

Mr. NORRIS. But it is giving a report. It does not state in so many words that this actually happened. It is giving merely a report. It may be when we get into it that we will find this man, probably murdered, might not have been killed by the Sandino men, and, on the other hand, it may have been done by Sandino men. He might have been killed, and not murdered, when they were attempting to take his property, a perfectly natural thing. He might have been defending it, and in order to get that mine, the property they wanted to carry on the armed expeditionary work, he might have been killed. He may have killed a dozen Nicaraguans, for that matter. On the strength of that kind of report the Senator from New York would put us in war.

Mr. COPELAND. I am sure the Senator from Nebraska is as anxious as I am to find out the facts. If he has a way of finding out whether this is true or not, I shall be glad to have him put that plan in operation; but we must find out why an American citizen was killed in cold blood down in Nicaragua.

Mr. HEFLIN. Mr. President, will the Senator allow me to ask him a question?

The PRESIDING OFFICER. The Chair must make the observation that when the Senator yields for more than a question, under the rule he loses the floor.

Mr. BRATTON. I express the hope that I may be permitted to proceed.

Mr. HEFLIN. I shall not interrupt the Senator.

Mr. BRATTON. Mr. President, at the time of the interruption by the discussion, which I have enjoyed very much, I had proceeded to the point of saying that because of the agreement

entered into upon which the various elements in Nicaragua relied, the agreement providing that we should retain armed forces of the United States in that country until after the election is held in order that the election may be conducted fairly, we should retain them there until that time, and that anything short of that would amount to a breach of contract or act of bad faith on our part.

To retain them there will be unjustifiable and will constitute a transgression of international law, as well as our obligation and plain duty not to interfere in the internal or domestic affairs of that Republic. We can not afford to do that. We must scrupulously respect the integrity of other nations. We must pursue a policy of strict noninterference with the internal affairs of all countries, so long as action on our part is not necessitated in order to protect our nationals concerning their lives and property. Our duty to so protect them is plain and beyond dispute. To go beyond that is equally plain as constituting a violation of our proper restraints under the clear mandate of international law. Any other course, Mr. President, would run afoul with our preachments ever since we became a government.

The proposed amendment of the Senator from Wisconsin [Mr. BLAINE] is not confined to Nicaragua. It purports to deal with our armed forces in any nation on earth. It provides that no part of the money appropriated in the act we are now considering shall be used to defray the expenses incurred in connection with the acts of hostility against a friendly nation, or any belligerent intervention in the affairs of any foreign nation, unless war has been declared by the Congress or unless a state of war actually exists under recognized principles of international law.

That proposal is as wide and as broad as the earth itself. It is not concrete in any sense, but is strictly in the abstract. This language seems to be vulnerable because it merely declares the well-recognized provisions of existing law. We never should commit any act of hostility against a friendly foreign nation, or be guilty of belligerently intervening in the affairs of a foreign nation, or intervening in the domestic affairs of any foreign nation, unless and until war has been declared by the Congress in the constitutional manner or when a state of war actually exists under recognized principles of international law. We never should commit either of these acts under any circumstances short of a declaration of war by the Congress in the constitutional way, unless a state of war, as recognized by principles of international law actually exists. This is so regardless of any declaration we may make in this bill or elsewhere. It emanates from the clear mandate of international law as understood and applied throughout our national existence. It requires no language of the Congress to make that true. It is true already. So, Mr. President, the amendment is merely declaratory of our plain duty under existing law. There is no occasion for such a broad declaration of that which already is the law. It would be merely cumulative in character and can serve no useful purpose. It would be purely superfluous. Again, if the amendment is adopted in this language, who will determine whether either of such conditions obtains in our relation with another nation?

Who will say, when we shall land our forces upon the soil of some other country, whether it constitutes intervention wrongfully and unlawfully in the domestic affairs of the country concerned? Yet these are the three things which are embodied in the original amendment proposed by the Senator from Wisconsin. We are declaring a principle which has existed since our existence began and nothing more. I hold that there is no occasion for a broad declaration in the abstract of that which already exists and which is recognized by everybody.

The same may be said of the amendment of the Senator from Nevada [Mr. PITTMAN] in this language:

> *Provided*, That such limitation shall not apply in the case of actual physical attacks upon American citizens or their property, or the immediate danger of such attacks, at any time when the forces of the United States may be used by the President for strictly protective purposes without the consent of Congress, and appropriations may be used to pay the expenses of such protective action.

The President of the United States, in his capacity as Commander in Chief of the Army and Navy, possesses that right already, independent of any action that we may take. So that, under my view of the amendment, the provisions proposed by the Senator from Wisconsin are merely declaratory of existing principles of international law. The proviso thereto proposed by the Senator from Nevada likewise is merely declaratory or cumulative of existing law.

I recur, Mr. President. If the amendment of the Senator from Wisconsin, as proposed to be modified by the language of the Senator from Nevada, is adopted in this language, who will determine which status exists—that is, whether sending our forces to some other country constitutes an infraction of the restrictions imposed by the language brought forward by the Senator from Wisconsin, which is denounced, or whether it falls within the saving clause advanced by the Senator from Nevada? It might be held by some that the landing of armed forces in Nicaragua or any other country constitutes an act of hostility against a friendly nation. It might be thought by others that that act did nothing of the kind, but, on the contrary, constituted the protection of American citizens against unlawful attacks and against immediate danger of unlawful attacks. Are we willing to leave that to some subordinate officer of the executive department of the Government? Are we prepared to leave to the Comptroller General to determine what a given state of facts constitutes; whether a violation of the denouncements contained in the amendment proposed by the Senator from Wisconsin, or within the saving clause proposed by the Senator from Nevada?

The objection I make to the amendment is that it is too broad and is simply declaratory of that which already exists, and, in its finality, must vest a decision to some one other than the Congress or the President of the United States. In my judgment, the duty to decide that question would rest with the Comptroller General; I doubt whether any Member of this body is prepared to give his consent to that situation. I repeat, what official or tribunal will decide whether a given act constitutes an act of hostility against a friendly nation, or belligerent intervention on our part against a friendly nation, or intervention by us in the domestic affairs of a foreign nation, or whether it constitutes protection of life and property of nationals against attacks or dangers? If the former payment is denounced and denied, if the latter payment is authorized and approved, are we willing to leave that important matter to some disbursing officer?

A more serious objection to the amendment, it seems to me, Mr. President, is that to vote for its passage necessarily assumes that there is danger of our pursuing an unlawful course in dealing with nations generally, and consequently there is need to place such restrictions in the appropriation act. Such a presumption should not receive our indulgence. We should presume that the other coordinate branches of the Government will perform their duties in a lawful manner. This presumption always should be indulged toward all officials, from the highest to the lowest. The amendment is not directed at our relations with other nations generally, but at the retention of marines in Nicaragua. Whatever amendment is written into the bill should be narrow and apply specifically to Nicaragua. If that is done there will be no possibility of contravening any of our treaty obligations. This is the matter referred to by the Senator from Idaho, the chairman of the Committee on Foreign Relations. The matter thus brought to the attention of the Senate is worthy of the serious consideration of every Senator.

That is one serious objection to the amendment of the Senator from Wisconsin. Being general in terms, and not concrete in its purview, it easily is conceivable that it might contravene some treaty provision; but if any amendment that is written in this bill conforms to the purpose of those who advance legislation along that line—that is, to bring about a withdrawal of the marines from Nicaragua—there is no danger of violating any of our treaty obligations.

For that reason, Mr. President, I think the amendment of the Senator from Wisconsin should be rejected.

I now address myself briefly to the amendment proposed by the Senator from Alabama [Mr. HEFLIN]. Even at the expense of repeating myself I did not approve of sending the marines to Nicaragua; but, in view of the things which have happened, I believe they should be retained there until a reasonable time after the October election is held. The amendment proposed by the Senator from Alabama will not permit that course to be pursued. The appropriation bill will become effective July 1, 1928. The marines could not be kept in Nicaragua after that date if his amendment should prevail. If adopted the President thus would be compelled to withdraw them before the election is held, and thereby break faith with the two elements in Nicaragua. The evils which might follow that course already have been stated in résumé form. I shall not repeat nor elaborate upon them. I am unable to gain my consent to travel that route.

I think the amendment of the Senator from Alabama is good in the sense that it is concrete in form. It treats specifically with the Nicaraguan situation. It does not permit of its application to any other situation, and could not restrict the Executive in dealing with other countries, should the necessity to do that arise, while the amendment of the Senator from

Wisconsin would apply to any other country with the same effectiveness with which it applies to Nicaragua. If the amendment of the Senator from Alabama were postponed in time, so that it would not take effect until some time after the election is held, it would be relieved of the defect which I am now endeavoring to point out. It then would be incomplete, because new conditions might arise in Nicaragua during the life of the appropriation bill which would make it both expedient and necessary to send armed forces there for the sole purpose of protecting nationals under international law or the Monroe doctrine. In such circumstances the President would be restricted if the amendment should be valid, because no money would be available to defray the expenses of such a plain duty on the part of our Government.

Let us assume that after the present appropriation bill takes effect, either before or after the election is held in October, a new situation should come about in Nicaragua that would enjoin upon us the plain obligation of protecting nationals either as to their lives or property. The amendment of the Senator from Alabama would make it impossible for our country to discharge that plain duty, because there would be no money with which to defray the expenses necessarily incurred in the performance of that duty and the discharge of that obligation. But the amendment proposed by the Senator from Tennessee [Mr. McKELLAR], to which I now address myself, which will be offered as a substitute for the amendment of the Senator from Wisconsin, meets each of these objections. It is limited to Nicaragua. Under no concept could it apply to any other country. It is not abstract. It is concrete. It provides that after the 1st of February, 1929, subsequent to the date on which the election is to be held in that country, none of the appropriations made in the act shall be used for maintaining the marines there. It also provides that the restrictions thus imposed shall not apply in case the President may send the armed forces there temporarily to protect life and property under either international law or the Monroe doctrine, if the Congress is not in session, with the further provision that in such event the President shall call the Congress into session and make a report of conditions.

This amendment will allow us to carry out our agreement made with the Nicaraguans. It will permit us to perform that agreement in the strictest sense. It will allow the marines to remain there a reasonable time after the election is held. In fact, it will permit them to remain there until after the duly elected officers have qualified and assumed the discharge of their respective official duties.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from California?

Mr. BRATTON. I yield to the Senator from California.

Mr. SHORTRIDGE. Does that amendment anticipate and provide for a condition which may then exist?

Mr. BRATTON. Yes, Mr. President; the amendment as proposed by the Senator from Tennessee [Mr. McKELLAR], drafted after much thought, reads in this language. I read the entire amendment in order that the Senator from California may get the purport of the observations I intend to make:

*Provided,* That no part of the appropriations made in this act shall be used for the purpose of maintaining marines or troops in the Republic of Nicaragua on and after February 1, 1929, unless specifically authorized by the Congress; and

*Provided further,* That in the event of an emergency the President is authorized to land troops temporarily for the protection of lives and property, under international law or the Monroe doctrine, in which event the President will report to the Congress immediately, if the Congress be then in session, and upon the convening of the Congress if it shall not be in session.

I am going to make a suggestion to the Senator from Tennessee with reference to the language. I think the President has the power to send troops temporarily, even in case of an emergency. I think, therefore, that the amendment in its present verbiage may be construed as attempting to confer a power which the President already has. So in order to meet that I am going to suggest to the Senator from Tennessee that it be amended to read as follows:

*Provided further,* That the restrictions here imposed shall not apply if the President shall land troops temporarily for the protection of lives and property, under international law or the Monroe doctrine—

And so forth.

Mr. SHORTRIDGE. Mr. President, I observe that the proposed amendment recognizes the existence of the Monroe doctrine. Before the Senator closes I should be glad to hear him express his views upon that phase of the matter. I have a very definite view as to the scope and meaning of the Monroe doctrine. Under that doctrine the duty might fall upon us of protecting the lives and the property of other nationals—English, German, French——

Mr. BRATTON. Yes, Mr. President.

Mr. SHORTRIDGE. And that is a duty which we must perform if we live up to and enforce the Monroe doctrine, as I understand it. Wherefore I inquire do these amendments embrace or pay sufficient heed to that doctrine and the duty resting upon us under or according to that doctrine?

Mr. BRATTON. Yes, Mr. President; the proviso to the amendment of the Senator from Tennessee expressly states that the restrictions imposed upon the expenditure of the money contained in the appropriation bill shall not apply in case the President shall land troops temporarily for the protection of lives and property under international law or the Monroe doctrine. It expressly recognizes our obligation under the Monroe doctrine. I join the Senator in the belief that the Monroe doctrine requires that we protect our own nationals when endangered in respect to their lives and property, and also enjoins upon us the duty of protecting the lives and property of other nationals when their respective countries demand it of us, or the right to do so themselves.

Mr. SHORTRIDGE. For, manifestly, if we do not, England or Germany or France or Italy will step in to protect their several citizens or subjects.

Mr. BRATTON. Yes.

Mr. SHORTRIDGE. And we have taken a position against that being done.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER (Mr. LA FOLLETTE in the chair). Does the Senator from New Mexico yield to the Senator from Tennessee?

Mr. BRATTON. I yield to the Senator from Tennessee.

Mr. McKELLAR. I am convinced that the proposal of the Senator from New Mexico is correct. I agree with him that the language as written in the original amendment might be misconstrued, and I believe that the language which he suggests will prevent any misconstruction, and as it applies only to this case I think it should be accepted. Therefore, Mr. President, I ask unanimous consent at this time, if the Senator will permit me——

The PRESIDING OFFICER. The Chair will say to the Senator that he does not have to obtain unanimous consent; he is privileged to modify his amendment.

Mr. McKELLAR. Then, if I do not have to have unanimous consent, I propose to modify the second proviso so as to incorporate the language suggested by the Senator from New Mexico and strike out the words as suggested by him, so that it will read as follows:

*Provided,* That the restrictions here imposed shall not apply if the President shall land troops temporarily for the protection of lives and property, under international law or the Monroe doctrine, in which event the President will report to the Congress immediately, if the Congress be then in session, and upon the convening of the Congress if it shall not be in session.

Mr. BRATTON. Mr. President, the amendment of the Senator from Tennessee in this form is not open to the suggestion that it is too broad and general or that it may contravene some treaty obligation that we sustain with any other country. It will accomplish what is desired by those who believe that the marines should be withdrawn from Nicaragua within a reasonable time after the election is held. It will permit complete performance of each and every term of the so-called Stimson agreement. It will result in bringing about the end of what some of us believe is an unjustified interference in the domestic affairs of that country. It is not merely declaratory of existing law, because it applies to a specific situation and is a clear mandate to the effect that the payment of money to continue the marines there shall be withheld after a certain date. So, Mr. President, I think it is relieved of the defects inhering in the amendment of the Senator from Wisconsin and the amendment of the Senator from Alabama to which I have addressed myself briefly. It leaves nothing ambiguous or uncertain and accomplishes that which I believe should be done. It does that in the proper fashion and at the earliest allowable time under the circumstances. It corrects what I conceive to be a wholly untenable situation.

Mr. McKELLAR. Mr. President, and may I add that it does not interfere or attempt to interfere in the slightest degree with any constitutional power of the Chief Executive?

Mr. BRATTON. I accept that suggestion, and desire to lay emphasis upon the importance of it, because it should not be

the purpose of the Congress to interfere with the powers, duties, and the obligations resting upon the President. In fact, we should shrink from doing that.

The amendment declares our position upon conditions that now exist in Nicaragua. It declares that we believe, under existing conditions, that the retention of marines there after February 1 of next year is not justified. We ought to be willing to make up our minds and declare ourselves upon existing facts and conditions. At the same time we should refrain from doing that which will restrict the President in dealing with conditions which may arise in the future and which are now unknown to any of us.

Mr. HEFLIN. Mr. President, if the Senator will permit me right there——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from Alabama?

Mr. BRATTON. I do.

Mr. HEFLIN. My amendment provides:

That none of the appropriations made in this act shall be used to pay any expenses incurred in connection with acts of hostility by United States marines in Nicaragua unless and until the President shall obtain from Congress consent to keep them there.

That would not hamper the President at all. If he has a good reason for keeping them there, he ought not to hesitate to come to Congress, if my amendment should be adopted, and tell Congress why he thinks they ought to be kept there, and get the consent of Congress to keep them there.

Mr. BRATTON. That is true, Mr. President, but if the Congress should not be in session, the President would have the right to deal with emergencies, and we should not do anything that would restrict or limit him in the performance of that duty.

Mr. HEFLIN. I would not do that; I would not want to hamper him.

Mr. BRATTON. I am sure the Senator does not intend to do that, but under my view his amendment might operate to do that very thing.

Mr. HEFLIN. I specifically name Nicaragua. I am not laying down a general principle. The marines have been in Nicaragua over a year, and they have been fighting down there, and they are still fighting. They have killed Nicaraguans, and some of the marines have been killed. I am pointing out this specific matter, that the President can not use any of this money in Nicaragua for the purpose of keeping our marines there, unless he comes to Congress now and gets our consent.

Mr. BRATTON. Mr. President, this appropriation act will take effect July 1. If the amendment of the Senator from Alabama shall be adopted, the President will be required to withdraw the marines on or before that date. Under my view, they should be kept there until a reasonable time after the election is held and the amendment of the Senator from Alabama would not permit that to be done. It is upon that ground, and that ground only, that I have undertaken to show that the amendment of the Senator from Alabama is incomplete.

Mr. HEFLIN. The President, of course, would know immediately, when this amendment was adopted, that Congress had laid down this plan. He would immediately know that by the 1st of July he would have to have the marines out, or he would have to get consent in the meantime to keep them there. Then, I take it, if he does want to keep them there, he would immediately come to Congress and say, "You adopted an amendment to an appropriation bill which would interfere with my program, and I wish Congress would give me permission to keep the marines in Nicaragua." Then Congress would certainly do that, if the President had good reason for keeping them there.

Mr. BRATTON. Mr. President, there is an agreement existing; I believe we are compelled to do certain things in order to perform our obligation under it. The adoption of the amendment of the Senator from Alabama would make that impossible. I do not believe we should take that position; I do not believe we should assume an attitude which would require some further act on our part in order to permit the performance of the agreement.

Mr. President, I hold that the amendment of the Senator from Tennessee accomplishes that which should be done. It does it in the proper fashion and at the earliest allowable time under the circumstances. It corrects what I conceive to be a wholly untenable situation. It will result in the withdrawal of the marines not later than February first of next year. To their withdrawal at the very earliest reasonable time after the election is held, I am unalterably committed, because I believe that we can pursue no other course and conform to the principles for which we have declared repeatedly throughout our national existence. We must hold firmly to those principles. We must not depart from them. They have been the bulwark of our safety and will continue to be so, if we adhere strictly to them.

For these reasons it is my hope that the amendment of the Senator from Tennessee, offered as a substitute for the amendment proposed by the Senator from Wisconsin, will prevail, and that we may thereby accomplish what I conceive to be our duty under the agreement, under international law, and under the Monroe doctrine.

Mr. EDGE obtained the floor.

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Utah?

Mr. EDGE. I yield.

Mr. KING. There is an excellent editorial in this morning's issue of New York World entitled "An excellent proposal." It deals with the question which we have been discussing, and particularly refers to the amendment offered by the Senator from Nevada [Mr. PITTMAN] and commends the same. The editorial as a whole indorses the proposition for which the Senator from Nevada was contending. I send it to the desk, and ask that it be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[Editorial from the New York World, Wednesday, April 25, 1928]

AN EXCELLENT PROPOSAL

The Senate has before it an amendment to the naval appropriations bill which is intended to limit the power of the President to intervene with armed forces in foreign countries. The amendment is sponsored by Senator BLAINE, of Wisconsin. It has been improved during the course of the debate and modified, or, at least, considerably clarified, by a proviso suggested by Senator PITTMAN, of Nevada. The World hopes that the Senate will pass the amendment in its present form.

The amendment prohibits the use of funds after February 1, 1929, to pay for "acts of hostility against a friendly foreign nation, or any belligerent intervention in the affairs of a foreign nation, or any intervention in the domestic affairs of any foreign nation," without the consent of Congress, except "in case of actual physical attacks upon American citizens or their property, or the immediate danger of such attacks." As we understand this, it means that the President must either withdraw the troops from Nicaragua by February 1 or come to Congress and obtain authority to keep them there after that date. It amounts to authorization from Congress to carry out the Stimson agreement, conduct the election, see that the new administration is installed on January 1, and remain one month more to give the new administration a chance to settle itself. After that, if there are reasons why the marines should remain longer, the President must explain the reasons to Congress and obtain a vote of authority.

This policy is reasonable and in good faith. With the Pittman proviso, moreover, it empowers the President to take action to protect lives and property against immediate danger. What it accomplishes is to call a halt upon just such indefinite, elaborate, and unauthorized interventions as the President let himself in for in Nicaragua a year ago. It is an eminently proper insistence by the legislative branch of the Government that it be consulted.

There never was any good reason why the President should not have gone to Congress and asked for authority to conduct the elections and to pacify Nicaragua. An enterprise of such magnitude does not under any reasonable interpretation of his constitutional powers fall within the sole prerogative of the President. He is spending the public money which Congress alone has the power to appropriate. He is conducting what may fairly be called a war, although Congress alone has power to declare war. There is no reason why he should be permitted to do this without asking permission of Congress.

There are, to be sure, recent precedents which the administration can point to. President Wilson intervened in Santo Domingo and Haiti without consulting Congress. But only the most partisan supporter of President Wilson would maintain, we believe, that this was a sound precedent or that the policy pursued was well advised. A far better precedent is the action of President Wilson in his two expeditions into Mexico; in both these cases he came before Congress and asked for authority.

The Blaine-Pittman amendment can not cure the condition which produces our entanglements in the Caribbean area. But it does provide that we shall not become too much entangled without full public debate. That is a wise provision, for if all the facts have to be debated and authority has formally to be obtained for enterprises like that in Nicaragua we shall at least know what we are doing.

Mr. EDGE. Mr. President, I will consume only about 10 minutes of the time of the Senate. It appeals to me that the so-called Blaine amendment, and for that matter all the other propositions in the form of amendments, present the same difficulty, in that they would delegate to some authority other than the President the power of making decisions or interpretations of international law or precedents under the Monroe

doctrine. All of them, as I have followed the various discussions and the presentation of revised amendments, lead to the result that the final decision shall be delegated to some other authority than the President of the United States, who, everyone concedes, under the Constitution has full power to negotiate and conduct foreign relations.

It appeals to me that this amendment should be entitled "An amendment to the Constitution of the United States through the channel of an appropriation bill, and for the further purpose of transferring the administration of international law from the President of the United States to the Comptroller General." As I view it, there can be no other interpretation of the terms of any of the proposals.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. EDGE. I yield.

Mr. McKELLAR. I take it the Senator is now talking about the Blaine amendment, not about the one I have offered, because my amendment makes no restriction whatever on any power of the President.

Mr. EDGE. I must admit that, with the rapid changes of amendments, I am not entirely familiar with the present verbiage of the amendment of the Senator from Tennessee.

Mr. McKELLAR. I assumed the Senator was talking about the Blaine amendment.

Mr. EDGE. I am directing my remarks generally to the so-called Blaine amendment, and the modified form of that amendment offered by the Senator from Nevada [Mr. PITTMAN], and the amendment later offered by the Senator from Nebraska [Mr. NORRIS], which, as I recall it, is confined alone to Nicaragua.

It was stated yesterday that the verbiage of the amendment was simply a reiteration of international law, and as long as the President adhered to that it would be of no effect. Then the question naturally suggests itself, why adopt it, as obviously the Senate can not decide for the President. In fact, as I followed the debate, Senators disclaim any intention of so doing and freely admit this constitutional power rests alone with the President.

But the moment the Comptroller General, supervising the distribution of the funds of the United States, should suddenly decide that the President was trespassing upon one of the 57 varieties of interpretation of international law, he would be informed that, so far as using appropriations are concerned and regardless of the Constitution, he was really not Commander of the Army and the Navy.

It has since been suggested by the Senator from Nevada that if the Comptroller General refused the funds he should be summarily dismissed. So where are we, anyway? According to rumor, the Comptroller General has overruled many departments in many ways, so under the proposal before us our foreign relations will now likewise be referred to this financial autocrat. I say that in the most generous spirit.

Mr. FESS. Mr. President, will the Senator yield?

Mr. EDGE. I yield.

Mr. FESS. I may have misunderstood the Senator, but did he speak about dismissing the Comptroller General?

Mr. EDGE. Yes.

Mr. FESS. That makes the situation still more delicate, for the reason that the Comptroller General can not be dismissed except by impeachment.

Mr. EDGE. I simply referred to the suggestion made by the Senator from Nevada [Mr. PITTMAN], who stated, as I recall his colloquy with the Senator from Idaho yesterday, that if the Comptroller General should refuse any of these funds, notwithstanding the mandate of Congress, it would be the duty of the President of the United States to summarily dismiss him.

Mr. FESS. But he could not do it.

Mr. EDGE. I am not suggesting that he can.

Mr. BORAH. Mr. President, will the Senator yield?

Mr. EDGE. I yield.

Mr. BORAH. In the absence of the Senator from Nevada, it is proper for me to say, I suppose, that his contention is that under the decision of the Supreme Court of the United States in the Oregon case, the President would have the power to dismiss the Comptroller General, notwithstanding the provision with reference to his impeachment.

Mr. FESS. Mr. President, if the Senator from New Jersey will permit me a further interruption——

Mr. EDGE. I yield.

Mr. FESS. That was the one distinctive feature in the creation of the office of Comptroller General, that the man who was to audit the accounts of the executive department should not be subject to the executive department, and it is written in the law that the only way to remove this independent representative, who represents Congress and not the Executive, is by way of impeachment, or by action of the Congress. The President has no power over the Comptroller General, and it was never intended that he should have. That is the very point we tried to reach in the Budget system.

Mr. EDGE. I have no desire or thought to question the statement of the Senator from Ohio further than to suggest, that, if that is a fact—and no doubt it is—then the Comptroller General is an autocrat; that his position is apparently such that he could not be removed. Therefore Senators can readily see the possibility of the Comptroller General absolutely taking charge, so far as disbursing funds is concerned, of the foreign affairs of the United States.

Mr. FESS. Precisely.

Mr. EDGE. Mr. President, by the terms of the Blaine amendment, as I understand it, appropriation for troops will be unavailable unless, in the judgment of this official, American citizens are in danger or their property occupied or at least seriously menaced. I realize through the debate yesterday, there is some difference of opinion as to this authority, but the mere fact that able lawyers in the Senate so differ demonstrates the danger of this astounding proposition.

There is an old saying that an ounce of preventive is worth a pound of cure, and in my judgment the occupation by our troops of a country disturbed by internal dissensions has perhaps prevented many what would otherwise have been serious attacks upon the life and property of our nationals.

I point with absolute approval to the policy of President Woodrow Wilson who kept, as I recall it, about 100 marines in Nicaragua during his two terms, eight years, and not a single uprising occurred in that period. It is generally admitted that the Chamorra revolution would not have happened had the marines not later been withdrawn.

During the debate the question has been frequently asked as to whether Sandino was at the present time threatening American life or American property. I recall particularly the Senator from North Carolina [Mr. SIMMONS], who is not now in the Chamber, made such inquiry. In the debate yesterday it was alleged that such activity on Sandino's part was some time ago.

It is perhaps unnecessary for me to point to the news dispatches in the newspapers of the last 24 hours in which it was alleged that Sandino had during the last few days occupied three American mines and had taken a number of prisoners, several of whom were Americans. And yet some Senators would have the marines withdrawn at once.

No one can correctly take the position that we started an offensive movement against Sandino. The testimony of marine officers taken before the Foreign Relations Committee clearly establishes the fact that no movement whatever was made against Sandino until he had actually occupied American property and threatened American lives.

At this point I ask unanimous consent to insert in the RECORD some extracts from that testimony.

The PRESIDING OFFICER. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

Senator McLEAN. What do you think would have happened if we had acted on the defensive only?

Admal LATIMER. We did act on the defensive only. My orders were that not a shot was to be fired unless our men were attacked. I was in Nicaragua and I had men stationed at as many as a dozen different places from the time we first landed in August until the following April, and there never had been a Nicaraguan even struck by one of our men.

The CHAIRMAN. From what time until what time?

Admiral LATIMER. From August up until the end of March.

Senator ROBINSON. From August, 1926, until March 1927?

Admiral LATIMER. To March, 1927.

The CHAIRMAN. Do you know of any civilians being killed at any time while you were there?

Admiral LATIMER. There were two civilians killed by accident. One boy was killed in Bluefields, monkeying with a gun that should have been unloaded before it was put down; and another civilian was killed in the same way, accidentally. There were no civilians killed, no civilians injured, and no civilians even struck by one of our men until our men were fired on in the neighborhood of Chinandega, just before Mr. Stimson came down.

Senator EDGE. When was that, approximately?

Admiral LATIMER. In April. We were in there from August, 1926, until April 20, 1927, over seven months in that country, policing large areas of it, and, as I say, without firing a hostile shot or without injuring a single Nicaraguan.

Senator McLEAN. After Sandino's unprovoked attack, what would have happened if the United States had assumed the defensive attitude only?

Admiral LATIMER. I gave orders to start after Sandino. I can better preface that with a little history.

Sandino came into the revolution very late. He had only joined Moncada about three months before the disarmament. Sandino was a native-born Nicaraguan who had spent, according to his own statement, some 22 years in Mexico. This, of course, is hearsay, but I believe it is reliable hearsay. He stated that he had been the lieutenant of Pancho Villa in Mexico. He came in across the Honduras border and up the Coco River, separating Honduras from Nicaragua. He had a few men, mostly Hondurans, until he got up to the vicinity of Jinotega, and he recruited several hundred men and joined Moncada, I think, within a month of the time of the disarmament.

He agreed prior to the disarmament—he with the other generals agreed—to lay down their arms, and he gave his word to Moncada that he would lay down his arms.

Senator EDGE. This was approximately what time?

Admiral LATIMER. I can give you the date by reference. May 11 was the date of the disarmament, and then this was about May 9 that Sandino left Moncada and started out up toward the northeastward with about 150 men who had their arms. He went up near Jinotega, which is about 12 miles to the north of Matagalpa.

At Matagalpa we had a force of men at that time. I gave orders that Sandino was not to be disturbed; that we would first try to persuade him to lay down his arms.

General Moncada agreed to go up to Jinotega and see Sandino and point out to him how harmful it was to Nicaragua to undertake to continue what was merely banditry, and he got Sandino's father, who lives in Managua, to go with him.

They went up to Matagalpa and sent an emissary out with a safe conduct for Sandino to come in, asking him to come in to talk with his father and Moncada.

The CHAIRMAN. Allow me to interrupt you there. Who is his father, and what is his relation to the country?

Admiral LATIMER. His father is simply a peasant.

The CHAIRMAN. He is not active in this?

Admiral LATIMER. No; he just lives in the country. But his father was willing to go up and use his influence with his son.

Secretary WILBUR. Moncada, of course, was his superior officer—supposed to be.

The CHAIRMAN. Yes.

Admiral LATIMER. When this emissary returned he said Sandino would come in to Matagalpa to see them the next afternoon. It developed later that as soon as the emissary got started toward Matagalpa, Sandino and his force started for the Honduran border, with the idea of crossing into Honduras. The situation in Honduras—on the east coast of Honduras—was somewhat unsettled, and there were reports of uprisings from time to time, so that the Nicaraguan Government notified the Honduran Government of Sandino's movements, and I understand they sent troops down to catch Sandino if he started across the border. Anyhow, he was turned back. He let all of his married men that were with him go back to their homes. He retained at that time only about 40 men.

Senator EDGE. How do you know that, that he had only 40 men?

Admiral LATIMER. I know that from native sources, from people up there, from the Nicaraguan intelligence system, and from my own intelligence system; it is judgment of my opinion, based on all the information I could get.

In that country news travels surprisingly rapidly, because it is passed along by word of mouth, and after one gets enough reports from different sources, and divides the reports by four or five, one gets pretty close to a fair estimate.

He stopped at one of the small towns and arrested and took into custody the manager of a German business house, a German, and a Nicaraguan, the superintendent of a Nicaraguan firm, and held them for ransom.

Then I thought, as the Nicaraguans had no arms left with which they could preserve order in their country, that it would be about time that we started after Sandino. He had been given every opportunity to lay down his arms.

He went to one of our mines a little further to the eastward and looted that mine.

Senator GILLETT. Is that the Butters?

Admiral LATIMER. No; it is the La Luz mine, I think.

Captain KIMMEL. That is there [indicating on map].

Admiral LATIMER. It is an American-owned mine; not a very large mine; not a very large company.

Then I gave orders that the force which we had at Ocotal should go after Sandino.

By that time the rainy season was on.

Senator EDGE. Had the owner of this mine reported the occupancy of this property to you?

Admiral LATIMER. Oh, yes; not only reported it but sent loud cries for help.

Senator MCLEAN. Who owned it?

Admiral LATIMER. I do not know. It is a company called the La Luz and something company.

Senator MCLEAN. Is it an American company?

Admiral LATIMER. An American company; it is American property.

* * * * * * *

Senator MCLEAN. When Sandino took possession of this mine, what was done?

Admiral LATIMER. He took all of their dynamite and all their supplies and anything that would prove useful to him, or valuable.

* * * * * * *

The CHAIRMAN. How did he recruit his force? Did they volunteer, or did he draft them, as it were?

Admiral LATIMER. I think his were probably volunteers, because as I told you, there are plenty of men up on that border that are willing to join anybody that will promise them a profitable adventure, whether looting, stealing, murdering, or anything of that sort.

* * * * * * *

The CHAIRMAN. How were Sandino's men armed? How well were they armed, and with what?

General LEJEUNE. They were armed with rifles and machine guns.

The CHAIRMAN. Were these rifles and machine guns arms that were in their possession and which they had refused to give up?

General LEJEUNE. The general opinion among our officers in Nicaragua is that the arms that Sandino has had, the bulk of them, anyway, are arms that were not turned in at the time of the Stimson agreement. Of course, a great many arms were turned in. My recollection is that there were 13,000 rifles turned in by both sides. And then they always hide arms. These men are not well organized and are not under very good discipline, and they always have a way of hiding arms.

Senator EDGE. This attack on the garrison there was absolutely unprovoked?

General LEJEUNE. Unprovoked and without any warning.

Senator EDGE. Up to that time had our marines engaged in any combat of any kind with Sandino's men?

General LEJEUNE. Not with Sandino's men, no, sir; but at La Paz Centro, on the railway, some little time before that, the town was attacked by a band of marauders, and the town was being looted. They were all in this town; and there was a detachment of marines encamped about a mile away. They were there for the purpose of securing order. Captain Buchanan, who was in command of the detachment, took a platoon into the town. It was about 2 o'clock in the morning. He marched into the town. He got word from the inhabitants that they were being robbed and they were fearful of their lives.

Senator EDGE. The inhabitants sent for him?

General LEJEUNE. They sent for him, and Captain Buchanan took these men in there, and he and one of his men were killed, Private Jackson, from Chicago, and Captain Buchanan. This occurred before the Ocotal fight and had nothing to do with Sandino.

Senator HARRISON. How many of these bandits were there?

General LEJEUNE. In La Paz Centro it was estimated that there were about 200. Buchanan did a very gallant thing. He went right into that town in the dead of night, and the town was full of these people. They were looting the stores and houses; and he was killed by a shot from a window.

Senator HARRISON. How many men did he have when he went in there?

General LEJEUNE. About 40 men when he went in there.

Senator EDGE. How do you reach the conclusion that these bandits at that time had no connection with Sandino, General?

General LEJEUNE. It was a local force; the men around that general vicinity.

Senator EDGE. Had they done similar marauding before?

General LEJEUNE. Oh, yes. That was after the arms had been surrendered, so that you see some of them in addition to Sandino did not surrender their arms.

* * * * * * *

Senator SWANSON. Do you not know anything about how he expects to try to get control, whether by legitimate methods or to organize any real stable government there? What is your idea about that?

General LEJEUNE. I can not say what he expects to do. I might state right here that while I was in Nicaragua, after a conference with Admiral Sellers, who was in command of the special service squadron, and General Feland, Admiral Sellers wrote him a letter. The admiral initiated that. The letter was very carefully prepared. It pointed out to him that the United States was determined to bring about a state of peace in Nicaragua; that it had agreed to do so, and the fact that it was in earnest was indicated by the reinforcements that were sent down there, and by Admiral Sellers coming with his ships to Corinto, and by the Commandant of the Marine Corps going down there; that the United States had no ulterior motive, and that its only desire was to do something for the good of the people, to allow the people to live in security in their own homes and go about their daily avocations in peace and quiet, and it wanted to hold and had promised to hold a free and fair election under American supervision in November; and that it was perfectly useless for him to make a further struggle; that any further struggle was simply increasing the amount of blood that would be shed. The letter appealed to him on the ground of humanity to come in and surrender his arms, and offered him amnesty in the same terms that had been given to Moncada's force last spring.

Senator ROBINSON. Did you have any reply to that?

General LEJEUNE. Up to the time I left there had been no reply. I saw in the paper this morning that they had gotten a reply.

Senator ROBINSON. Did you know that that was delivered to him?

General LEJEUNE. We dropped several copies of it by airplane to groups of his forces. The airplanes flew over several villages where we knew his people were, and put out a white flag and dropped this message. The people hid when the planes appeared, but when the message was dropped their curiosity got the best of them and they all ran out to pick it up, so that we feel certain that he got a copy of it.

Then another copy of it was sent to him by a man who had been one of his followers, a man by the name of Lobo, who had been arrested and was confined in Managua. He returned and reported that he had given the letter to a reliable man who promised to deliver it to Sandino. He was personally afraid to go to Sandino.

The CHAIRMAN. You have no official knowledge of an answer?

General LEJEUNE. No, sir; we have no official knowledge of it. An Associated Press correspondent came to me yesterday afternoon and said they had gotten a dispatch from Managua that an answer had been received, and asked me about it, and I told him we had no information on the subject.

* * * * * * *

Senator MCLEAN. What do you think would happen if we should retire from there?

General LEJEUNE. There would be a tremendous lot of killing and looting and robbing. There is nothing there but us to stabilize the country.

Senator ROBINSON. Is he able to supply his force except by looting?

General LEJEUNE. There is a lot of coffee in that country—that is a coffee country—and he seized a lot of coffee last summer and took it into Honduras—and sold it, and bought supplies with it, and ammunition. You see, dealing in arms and ammunition in those countries except Nicaragua is an everyday business. There is no restriction on it and everybody buys arms that wants to buy them. Also, he probably receives money from some people in those countries.

Senator SWANSON. Have you ever received any proclamations, letters, or speeches made, showing his ultimate purpose in this revolution?

General LEJEUNE. Yes. He calls his force "the wild beasts of the mountains," and uses terms of that kind, I suppose, to stimulate the morale of his followers, and he talks in high-sounding terms about organizing a government. I can not see for myself what his objective is, other than to induce us to leave there; and then he having an organized force and nobody else having any, he could make it very uncomfortable for the Nicaraguan people.

Senator SHIPSTEAD. How many people are there in Ocotal?

General LEJEUNE. About 2,000. That is the normal population. It is about 1,500, probably, now.

Senator SHIPSTEAD. How many whites are there?

General LEJEUNE. No Americans. These people of west Nicaragua are of mixed Spanish and Indian blood, and some of them have very little or no Indian blood, while some have a large proportion of Indian blood. They are proud of their Indian blood.

I want to say about them that they are a very attractive race of people, very kindly, very courteous, very hospitable, very generous, and very proud. They have many good qualities. The relations between them and our men are remarkably good.

Senator SWANSON. Is Sandino a Spaniard of pure blood?

General LEJEUNE. He is of mixed blood. He has Indian blood in his veins. His father and mother live near Managua.

Senator SWANSON. It has been stated in publications in this country that those in Nicaragua who are not disposed to have an election are helping Sandino to prevent it. Have you found any indications of the truth of that statement?

General LEJEUNE. I found indications that they were opposing the electoral law that had passed the Senate, the law they call the McCoy electoral law. The Senate passed it unanimously, and it went to the House and they amended it. The amendment is practically a new law. The original proposition was that the elections should be held under the control and supervision of the United States, while the amendment provides that it should be held under the observation of the United States; a very considerable difference.

Senator SWANSON. Is the impression in Nicaragua that no election could be held until Sandino is absolutely suppressed?

General LEJEUNE. You can not hold an election in any part of the country where he is operating, of course.

* * * * * * *

General LEJEUNE. It was impressed on our men in Nicaragua that their mission was to establish peace in Nicaragua and to gain and keep the good will of the people, and it is really remarkable the evidences that are everywhere existing of the fact that they have successfully carried out this policy of good will as a part of their mission. Everywhere I went I noticed how friendly the people were to the marines and how friendly the marines were to them. The marine officers and Nicaraguan officials there were also on friendly terms, and I do not believe there is any case in recent history where a force of this size has lived in a foreign country without martial law, without military commissions, without provost courts, without control of the inhabitants, and has not had serious friction and trouble.

Senator MOSES. What percentage, do you think, of the population feels any hostility toward the activities of the American forces in Nicaragua?

General LEJEUNE. I think it is practically limited to Sandino and to the people with him.

* * * * * * *

Mr. EDGE. Still the marines should not be in Nicaragua, and the President's future decisions should be controlled by the Comptroller General. Either we scrap entirely what has been the recognized constitutional responsibility and duty of the President or we will not deliberately interpose this type of interference.

Mr. President, if this amendment is to pass, then I think, in all justness and fairness, there should be a section added giving full notice to the American citizens now residing or in business in Nicaragua, and, for that matter, in any other country where disturbances frequently occur, to the effect that the American Government has ceased protecting them, and that the advice of the Senate of the United States, at least, is that they should at once abandon their homes and business interests and return to the United States.

Certainly, if the responsibility of their protection is to be parceled around between Congress and the Comptroller General, their future interests can not but be seriously jeopardized. Of course, we must realize that the Blaine amendment is not confined to Nicaragua. In its terms it would cover China, Haiti, or any other country. I am not sufficiently informed to attempt to even give an opinion as to the effect in these countries, but from the suggestions already discussed, it raises most serious questions.

I note under the terms of the substitute amendment offered by the Senator from Nebraska [Mr. NORRIS] he proposes to confine this senatorial ultimatum to Nicaragua. The words "or unless a state of war actually exists under recognized principles of international law" appearing in the Blaine amendment have been eliminated. I assume this to mean that the President's authority to send troops to Nicaragua would be still further limited, and that if there did exist "a state of war under recognized principles of international law" the President, nevertheless, would be denied the authority of using any appropriation for the purpose unless Congress declared war on some of the belligerents, or unless it was clearly established that there have been physical attacks upon American citizens or their property, or that there is immediate danger of such attacks. Again, the question arises whether the Comptroller General or the President is to decide this situation.

As far as I can ascertain, never before has a President of the United States been restricted through an appropriation bill in the matter of exercising his best judgment in dealing with foreign affairs. Why is it necessary for his benefit to repeat international law? He undoubtedly understands its limitations as well as we, and the assumption that he has overstepped his authority is a matter of impeachment, not legislative direction.

Further, I can not conceive how Senators who opposed the Blaine amendment, when it provided December 25 as the arbitrary date of withdrawal of the marines can find justification to support it as of February 1. The only difference seems to be a difference of five weeks, whatever that means. Surely, if it was unwise to adopt it presenting one arbitrary date, it is equally unwise to accept another. Just because the language of the amendment has been slightly changed, in my judgment it in no way alters the situation. If history repeats itself, any announced arbitrary date for the removal of the United States marines will be a signal for a revolution in Nicaragua.

It has been generally prophesied the Liberals at the next election would win, which would mean the selection of General Moncada as President. Might not this contemplated action of arbitrarily setting a date of withdrawal have some influence upon the voters at the election? I do not know, but it certainly would be disturbing to the people of Nicaragua, I repeat, in view of past history. Frankly, this amendment, to me, presents a combination of near absurdity and great danger.

The traditions of more than a century are to be reversed. For myself, I prefer to run all the risks that would follow a demonstration of confidence in the Chief Executive, whoever he may be, than to transfer clearly defined powers and prerogatives either to Congress or to the disbursing agency of the Government.

Mr. FESS. Mr. President, I had not intended saying anything whatever upon the matter which has been discussed now for a week. I think as it goes along the subject becomes more or less confused. I recognize two sides to the question, especially that phase of it which deals with the United States using efforts to stabilize conditions in another country. I

think it is a rather serious question as to just how far we should go. I am of the opinion, however, that there is general agreement on all sides that if the marines are to be recalled they should not be recalled prior to the election which is to be held in Nicaragua. So far as I know there is no effort on either side of the dispute toward that end.

Mr. President, General Moncada, who made the agreement with General Stimson, would be the one man who could speak for the Liberal Party in Nicaragua, I should think, if there was any man in the country who could so speak. He was a party to the agreement; he was at the time the general commanding the Liberal army; he is the one who was himself concerned in the Liberal progress, and, as was generally conceded, would be the candidate of that party for President. General Moncada submitted his views on the question about the landing of the marines in Nicaragua in a contributed article over his signature, which was printed in The Outlook, published in New York. That article was inserted in the RECORD in January of this year. Reading portions of the statement of General Moncada, we find this statement:

Certainly Nicaraguan Liberals everywhere have approved unanimously the arrangements of Tipitapa and are grateful for the efforts of General Stimson toward peace. At first there was surprise and hesitation; but sober thought brought faith in the promises of the personal representative of President Coolidge, considering that they involve the honor of the whole Nation founded by George Washington.

There is a general statement that the agreement was unanimously commended by the Liberals of Nicaragua. Further on General Moncada said:

The worth of the election in Nicaragua depends now on the manner in which the arrangements of Tipitapa are carried out. If they are carried out honestly, as I believe they will be, due to President Coolidge's word, the elections will be made with entire equity.

Then, further on, General Moncada said:

We want the independence and sovereignty of our country, and the more we want it, the better government we will build, granted we may live under the ægis of peace and labor. The watchful eye of the United States can be no better employed than in this noble cause. The very Monroe doctrine compels the United States in that direction, for that doctrine postulates for the New World the fullest realization of republicanism and democracy. Because we have had no peace, because our national income diminishes or is used up by war, and the fields lie uncultivated, our great duty is to do away with war. Any sacrifice is small to achieve this objective.

Those are not my words nor the words of a Senator in this body arguing on one side or the other. Those are the words of General Moncada, commanding general of the Liberal army, at the very time the discussion was being carried on. He further continued:

Our country needs a profound peace. If bad government continues to prevail in Nicaragua, if Liberals and Conservatives persist in warring for power, obeying personal ambitions, no nation will be found to extend a friendly hand to us or to treat with us.

Capital is a great necessity in Nicaragua for the development of the country's progress. We have neither railroads nor highways. We are out of communication with the civilized world. The construction of the railway to the Atlantic coast is very urgent to bring us nearer to the United States and to Europe. We need more American capital, and it is our first duty to seek it here, for we are obliged to do it by the close relationship that binds together the countries of America for their mutual defense.

The interest of the United States in the affairs of the Caribbean Sea is a vital interest. If it renounce the vigilance of that sea and its bordering countries, it places its very life in jeopardy, or, at least, exposes itself to terrible responsibilities and wars. This interest of the United States is equally beneficial to our countries, for they are thus defended from all aggression of powers foreign to the continent. In this all the countries of America share a common interest and a common destiny.

Opinion, I am told—

This is very suggestive. It is rather prophetic in President Moncada writing this article prior to the opening of this year—

Opinion, I am told, is divided in the United States as to the policy that has been followed by the Department of State. We Nicaraguans think that we have acquired an explicit right and that the United States has bound itself to an explicit duty. We Liberals fought to place our country once more under the full authority of the constitution. In exchange for peace and free elections we constitutionalists agreed to disarm, and we who signed the agreement have lived up to our duty. If a few armed bands—

He specially refers to Sandino, although not mentioning him:

If a few armed bands remain active in the north of Nicaragua, that is a natural consequence of our civil wars. After these promises it must be established in full justice that if the Monroe doctrine is to be abrogated that must not be done before the United States has discharged its duty as to the 1928 elections in Nicaragua, which should be rendered impartial by its influence. Let every Nicaraguan citizen, without distinction of color or political creed, vote freely, and let power pass into the hands of the representatives of a true national majority. When it comes that day will witness the birth of true democracy in Nicaragua, the first day of genuine republican life—an occasion of rejoicing for all sincere patriots.

Those that accuse the State Department of supporting President Diaz in obedience to the pressure of bankers and for mean reasons of internal and foreign policies fail in logic when they attack the agreements of Tipitapa and the supervision of the next election by the marines. They know that, upon the premature withdrawal of the marines, power would remain with Diaz or Chamorro, and constitutionalists would lose all hope of liberty and democracy. This would be a tremendous injustice.

Here is another very prophetic suggestion coming at the opening of this year, long before the Habana conference was in session:

There is talk to the effect that a move will be made at the next Pan American Congress against interference by the United States in the affairs of Nicaragua and other Caribbean countries. If it is accepted by the Washington Government, we Nicaraguans will demand that it be put into effect after January, 1929—that is, after North American mediation has effected an entirely fair election in Nicaragua. I may add that my opinion on the Monroe doctrine and the need for the influence of the politically advanced nations on the politically backward ones is firmly rooted in deep conviction.

Mr. President, those are the words of General Moncada, who was in a position to speak for the people known as the Liberal element in Nicaragua. No words could be stronger. The statement leaves absolutely no doubt as to what is our duty from his standpoint. Were I to say this, or were Senators here on the floor to speak thus, there would be some question as to motives, but there can be no question as to the motives of General Moncada.

Mr. President, if we were to discuss here, and if we had before us in a succinct manner, the question of how far the United States should go in establishing stability in a country outside of our borders, and no other question was involved, I would be at sea as to just how far we should go. It has been a question of more or less dispute in my mind. It has been at times a question of how far we should have gone in Cuba. I recognize that our position in Cuba was largely due to our peace of mind as a Nation, which was constantly being disturbed by different movements of revolution or rebellion in Cuba, and then certain types of citizens in America going over into Cuba for personal aggrandizement. The question of just how far we should have gone has always been one of dispute.

There has been some dispute as to how far we should have gone in Haiti. So far as I am personally concerned, I think we have done the right thing there. I would not be in favor of coming out of Haiti until stability there is established, if for no other reason that for the maintenance of the Monroe doctrine. The same thing might be said in San Domingo, although we have been out of there for some time.

Mr. President, in 1914, when President Wilson ordered the marines landed at Vera Cruz, I was a Member of the House. On the Republican side there was a furious outbreak, a regular storm, when that occurrence took place. President Wilson was charged with taking steps to make war without authority from Congress, and he was denounced on the floor of that body just as President Coolidge has been chastised in the present instance on the floor of this body. Some of the men who were then Members of the House, who are now denouncing President Coolidge, were then the strongest defenders of the policy of President Wilson. I could take the time to read those speeches if it were worth while, but it is not worth while, and I am not going to use the time of the Senate in that way. I had absolutely no sympathy with the attacks on President Wilson, although I did not belong to his side of the political contest. I think that President Wilson was wholly justified in his procedure under the circumstances in the protection of American life and property, as well as in the maintenance of peace between this country and Mexico.

When Villa was touring all Mexico, in the leadership of a banditti, and President Wilson sent a punitive expedition, under the leadership of General Pershing, to hunt him out, there was

the most bitter criticism on the part of some political partisans against the President. I never felt there was any foundation for that criticism. I believe it was of a more or less partisan character. When it comes to foreign relations, no matter how bitter or intense or keen our differences here may be, they ought not to be allowed to show themselves in matters of relationship between our country and other countries. That is why I deplore the presentation of this question at this time.

Here is an agreement under which we rest and we are bound to carry it out. Whether wise or otherwise, it is our duty to go on. I think it is wise. That agreement is to supervise the elections. When that is done, if conditions will permit, without doubt the marines will be brought home. But who is here capable of saying what will be the conditions immediately after that election? Where is the man who can look into the future and tell which seed will grow and which will not, and say that at a certain time, no matter what happens, we are going to bring the marines out of Nicaragua or out of any other place?

The mere fact that on an appropriation bill we are attempting to interfere with the President's efforts to protect American life and property by stating that on a fixed date after an election in Nicaragua we are going to bring our marines out, leads me to believe that there is no one announcement that might be such a stimulus for untoward conduct in that country. It is unwise, in my judgment, in the extreme. If after the election the matter is brought up, and the question is to be threshed out as an international question as to how far we should go in matters of this kind, then it would seem to me entirely proper for us to discuss it, free of any possibility of in any way embarrassing the foreign relations of the country. To do it at this stage, however, under the threat that if it is not done we are going to prevent the passage of an appropriation bill, is in the first place unwise as legislation, and certainly as international policy it is about the acme of unwisdom.

When the matter passes over until after October, if it comes up in the regular order in the form of a resolution, I shall welcome and not oppose an inquiry into the question of just what is the meaning of the Monroe doctrine, and how far we can go in stabilizing conditions in any country, and as to what should be the proper course for us to take. I shall welcome a study of that subject in the light of the facts. But so far as protecting American lives is concerned, and so far as offering protection to American property goes, I want my country to maintain her honor in making every American feel that wherever he is, if he has a right to be there, he is protected by the authority of the Nation. Anything less than that, in my judgment, would be extremely dishonorable as a nation, and futile so far as our citizens are concerned.

So what I am hoping may be done is for us not to act upon a subject of this sort preceding this election that we must go on and carry out, but permit this appropriation bill to pass, with the understanding that after the election, in the next Congress, this matter can be brought up in a regular way; and if it is our business to define the Monroe doctrine, and to fix the limits to which the President as an Executive can go, then it is a perfectly proper procedure. It is not so, however, as I see it, at this time; and for that reason I am not going to support any of these amendments that have been proposed.

Mr. NORRIS. Mr. President, the Senator from Ohio [Mr. FESS] and several other Senators have had considerable to say about trying to put a limitation on an appropriation bill, and that it would be much better to legislate in the regular way.

With that contention I agree. I would much rather we were not handicapped as we are here by trying to do something on an appropriation bill; but if we are going to do anything, if we are going to give an expression of congressional opinion on what the President is doing in Nicaragua, this is the only opportunity that has ever been presented to us during this session of Congress.

Whatever we put on will not be anything that will last beyond the fiscal year for which the appropriation is made, I admit. It will not be permanent legislation; but it will, I think, fairly give an opportunity to Congress to express its opinion upon what the President has done.

As a matter of fact, Mr. President, the pending amendment, in my judgment, confined as we are to limitations on an appropriation bill, in substance says to the President, "Congress does not agree with you, Mr. President, in the use of the Army in Nicaragua. We do not agree with what you have been doing; but, inasmuch as you have made a contract down there, we are going to permit you to go on and do just what you started out to do and use the money of the country just as you have been doing until the 1st of February. After that we expect you to cease. We expect you then to follow the line, as far as this appropriation goes, at least, that Congress has really outlined."

It is not a condemnation of anybody. I think everybody will concede that the President has a right to his opinions. He may be as conscientious as we are; but, as I look at it, the President ought to have laid the matter before Congress in an official message asking us to legislate on the subject, and we ought to have legislated. So that we are presented as a matter of parliamentary predicament with this condition: Either we must express our opinion on an appropriation bill or otherwise we will not be able to express it at all.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. I yield; yes.

Mr. KING. As I understood the Senator's statement a moment ago, I want to express, with his permission, my dissent from it.

I interpret this amendment which has been offered by the Senator from Wisconsin and the amendment offered by the Senator from Tennessee not only as limitations upon the appropriation bill, but in voting, if I shall vote, for either of them, I intend to express my disapproval of the course of the President of the United States in sending our marines to Nicaragua and keeping them there as has been done, and particularly in entering into the so-called Stimson agreement, which, according to the view of eminent Senators, imposes a moral obligation upon the United States, an obligation even to go to war or to engage in war, if not a legal obligation upon our part.

I disapprove of the course of the administration in dealing with the Nicaraguan question. I disapprove of the Stimson agreement. I think it is unjustifiable. Whether or not an obligation has been created which morally we should carry out presents a different question; but I did not want to assent to the proposition, if I understood the Senator correctly, that the course which we take in supporting these amendments is not a criticism and a disapproval of the course of the administration in Nicaragua.

Mr. NORRIS. I do not disagree with what the Senator has just stated. I think the adoption of the pending amendment is a clear expression of Congress that we do not agree with the President in the making of the so-called Stimson agreement. I have not any doubt about that. We may differ as to how severely we ought to criticize the administration in regard to it, but the amendment does disagree with the President on what he has been doing in Nicaragua. I think I stated it that way. I intended to.

Mr. KING. Mr. President I apologize to the Senator if I misinterpreted him; but I understood him as I have stated.

Mr. NORRIS. The Senator may have interpreted me correctly, and I may not have expressed myself plainly. But, Mr. President, I have not heard anyone yet say in this debate, as I recall it—and I have heard most of it, but not all—that he believed the President had authority to make the Stimson agreement. Personally, I have not any doubt whatever on the question. It was an illegal agreement. There is no legality to it. There is no authority anywhere for it. I tried to make myself plain on that matter before when I addressed the Senate. There is no authority whatever coming from the Congress of the United States or from the Nicaraguan Congress. The President gets his authority, if he has any whatever, from the request or the agreement, whichever way you want to put it, of the Diaz régime in Nicaragua.

Personally, I think the Diaz régime are wrongfully in office. They represent us. We are really making an agreement with ourselves, contrary to the laws of Congress and the Constitution of the United States, and contrary to the laws of Nicaragua, without any sanction from the Nicaraguan Congress. I do not believe there is much disagreement with that proposition.

Some Senators, however—I do not entirely agree with them, but they probably constitute a majority of the Senate—feel that notwithstanding the illegality of that agreement the President has made it, and it is our duty now to carry it out.

I think a majority of the Senate feel that way. I doubt that myself, because if he has disarmed both sides, as the Stimson letter said he was going to do, I think it would be all right to get out, and they would be in better shape down there, perhaps, than they would have been before he disarmed them, because neither side would have any arms.

That, however, is perhaps not a practical question now. It is conceded, I think, that a majority of the Senate feel that since this agreement has been made it ought to be carried out; and so, out of respect for that opinion, these amendments to this appropriation bill have been drafted with that in view. They all permit the President to remain and do what he started to do until after the election, until after the new government is

installed; and this particular amendment puts it one month after they have been installed, so as to clear it of any doubt.

A great deal has been said—and that was the principal reason why I took the floor now—by Senators in this debate to the effect that if we adopt one of these amendments we are really giving to the Comptroller General the authority to pass on this instead of the President. I have great respect for the Senators who have made that argument, but I can not agree with them. To me it seems perfectly plain that in that respect the adoption of any of the amendments will not change the conditions one iota. I can conceive how the Comptroller General might step in and say, "I will pass on the question of whether you have overstepped the limits, Mr. President, and act accordingly." He can do that now. He can do that just the same if we adopt no amendment. The Comptroller General could say now, when any of these expenses come up for allowance, "Why, the Government of the United States has done what it has no right to do under the laws of the country or under international law, and therefore I will not approve these expenses." He can do that to-day, and if we adopt any of these suggested amendments he will be able to do the same thing then.

I do not anticipate that he is going to do it. I do not anticipate that he is going to question the decision of the President. I do not think he will do that now. I do not think he will do it if we adopt any of these amendments.

In other words, on that point it seems to me, whether we legislate or whether we do not, that we have not cleared the matter of the possibility of such a thing happening, and we can not clear it of the possibility of such a thing happening. It is a physical impossibility to do it.

I understand that the Senator from New Jersey [Mr. EDGE] has argued that to-day. I was called out and did not hear all that he said, but in talking with him I learn that that is one of the points he made. He fears that if we adopt this amendment we are going to give to the Comptroller General the authority to say whether under this amendment the President has exceeded his authority or whether he has not.

Mr. EDGE. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Jersey?

Mr. NORRIS. Yes.

Mr. EDGE. If the Senator is correct in his construction—I will not discuss the legal interpretation—what is the use of the amendment? In other words, as I followed the Senator, he contends that the Comptroller General to-day can stop the disbursement of any money spent illegally. No doubt that is so. Then why say so again and simply repeat law already existing?

Mr. NORRIS. We are saying so in these amendments out of respect for Senators like the Senator from New Jersey and others who want us to say so, as I understand.

Take the Pittman amendment, now, which has been put on the Blaine amendment to modify it. That is one of the complaints against it now; and yet it was put on to satisfy Senators who believe as the Senator from New Jersey does. I am not questioning their sincerity, but the point I want to make is that you can not escape from that dilemma. It exists to-day.

Suppose one of these bills for carrying munitions down to Nicaragua came before the Comptroller General for allowance, and the Comptroller General said, "Why, the President had not any authority to do what he has been doing. I do not think he had, and therefore I will not allow it. Under international law and the laws of Congress he can not show authority for what he is doing down there." The Comptroller General has not done that. I do not anticipate that he will. I do not anticipate that he will question now the discretion that the President possesses, and I do not understand that he will if we adopt this amendment.

Mr. EDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Jersey?

Mr. NORRIS. I do.

Mr. EDGE. Right there is the point. I repeat, what can possibly be the object of the amendment, when the Senator—one of the proponents of one of the amendments, at least—frankly says that he does not believe it will change the situation in the slightest degree?

Mr. NORRIS. I am speaking of the action of the Comptroller General. It will not control that. I do not think we can pass any law on earth but that there is a possibility of the Comptroller General coming in and saying, "Why, this is illegal. I will not allow it." We can not get away from that. We must always legislate with the idea that the executive officials who carry out the legislation of Congress may, rightly or wrongly, say that we have overstepped our authority, even though as a matter of fact it might be conceded by a fair judge that we had not done so.

So I do not see any point in that. It seems to me that Senators are worrying about something that, if it is a cause of worry, they ought to have been worrying about all this time, ever since we have done anything in Nicaragua. All of that might have occurred.

I have been told that a point of order is going to be made against the amendment as it now stands.

I am rather inclined to think, myself, that as the amendment stands a point of order perhaps is good, technically speaking, and perhaps will be sustained; but I should like to remind Senators who are going to make the point of order, who are saying to us to begin with, "You must not do anything on this appropriation bill," to which we respond, "Under the rules of the Senate we have to do nothing and say nothing, or we have to do it this way," that they are answering their own argument, it seems to me. If Senators feel that way, why not have an agreement that we will open this bill and permit legislation to take place on the bill?

I have talked with the chairman of the Foreign Relations Committee, who has a statement prepared that I think he would be glad to put on this bill. I think it is a fine statement of the law that exists, and would, if adopted, express the judgment of Congress; but it is subject to a point of order. I shall not object to it. Those of us who want any of these amendments will make no objection to that. The same Senators will object to that who, after they have cut us down to the narrow point of simply putting on a limitation, say, "Why, you must not do that, either, because it is on an appropriation bill."

Mr. WARREN. Mr. President, will the Senator yield for a question?

Mr. NORRIS. Yes.

Mr. WARREN. Why not refrain from putting that or any other matter in appropriation bills contrary to our rules? And why not, instead, take it up independently as a resolution, pass it here, pass it in the House, and thus cover the ground?

Mr. NORRIS. All right. Let us agree, then, that we will not object to an amendment on this bill because it is legislation. If Senators, who are trying to be technical, will do that, I think they will clear the surface at once, and we will get a comprehensive statement here, coming probably from the chairman of the Committee on Foreign Relations. I should be glad to do that.

Mr. WARREN. Speaking of being technical, is it not the duty of the Committee on Appropriations to obey the rules which its members, and the Senator from Nebraska and other Senators, have made, to keep legislation out of appropriation bills?

Mr. NORRIS. Mr. President, the Senator must remember that I am not criticizing, and I will not criticize, anybody for making a point against this amendment, or any other amendment, that is legislation. I am not objecting to anyone enforcing the rules. I have always gone on the theory that I would not object to whatever a Senator was entitled to, whatever the rules permitted, even though it hurt ever so bad. But I want Senators to understand that those who are complaining that we are trying to get an amendment on an appropriation bill are themselves preventing us from doing what they say ought to be done; that is, have a comprehensive proposition adopted by Congress.

I remind Senators that if any of these amendments go out on a point of order, we will have to vote on amendments not subject to a point of order. It is not difficult to draw such an amendment, although it would leave out some things I would like to have in the amendment. If we are compelled to be more technical, and to resort to technicalities, we will at least have to vote on an amendment that is not contrary to the rules of the Senate, that would be a pure limitation, and nothing else, but would curtail the power of Congress somewhat to express an opinion, which I think even the President would be glad to have us express if we are not in agreement with him.

## FEDERAL FARM LOAN BANK, COLUMBIA, S. C.

Mr. BLEASE. Mr. President, a few days ago I introduced a resolution in the Senate asking that the farm loan bank at Columbia, S. C., be examined into by the Banking and Currency Committee of the Senate.

Yesterday I received some South Carolina papers which I wish to call to the attention of the Senate. First, however, I call attention to a letter I received, dated April 21, as follows:

APRIL 21, 1928.

DEAR SENATOR BLEASE: Illness prevented me from thanking you earlier for your telegram of April 10, concerning your attempt to secure printing of my farm loan relief report. My information was that you

were to appear that morning before the committee. As I thought opportunity might then arise to use parts of that memorandum in your argument, I took the liberty of telegraphing.

Senator NORBECK wrote me later that your resolution had been referred to the Federal Farm Loan Board itself for recommendation. This course appears to me as preposterous as referring the Fall case to Sinclair for settlement! It appears to me that only throwing the matter into the presidential campaign will arouse sufficient interest to gain support for such a resolution. I have been asked by the campaign headquarters of one Democratic candidate to prepare a plank and memoranda. These have been in their hands for a week. If you can see your way to secure the adoption of such a plank, I believe that no matter which party wins a real clean-up might be had later.

Sincerely,

——— ———.

The Senator from South Dakota [Mr. NORBECK] is the chairman of the Committee on Banking and Currency of the Senate.

An article in the Columbia Record, Columbia, S. C., April 20, reads:

FARM LOAN HEAD, COLUMBIA VISITOR, SEES BETTERMENT—EUGENE MEYER ON VISIT TO FEDERAL LAND BANK IN COLUMBIA—MEETS DIRECTORS HERE—SILENT AS TO BLEASE CHARGES; BOARD MAKES INVESTIGATION

Agricultural conditions are on the mend and land values may be expected to increase with the betterment of the whole economic situation is the opinion of Eugene Meyer, of Washington, Chairman of the Federal Farm Loan Board, in Columbia to-day to meet with the directors of the Federal Land Bank of Columbia.

Mr. Meyer is accompanied by Floyd R. Harrison, member of the board, and is making his first visit to Federal land banks in the Southern States. Before returning to Washington, Mr. Meyer and Mr. Harrison will pay official visits to the system banks in New Orleans, Houston, St. Louis, and Louisville.

The Farm Loan Board has supervision of the 12 Government owned and operated banks throughout the agricultural sections of the United States. The system was established in 1918 to assist farmers in obtaining funds at reasonable rates of interest to market their crops.

Mr. Meyer was silent in regard to the investigation of the Federal land banks proposed in the Senate by COLE L. BLEASE, junior South Carolina Senator.

"The board is conducting an investigation of the charges."

The Greenville News, published in the upper part of South Carolina, on April 21 carried exactly the same telegram, which I shall not read, but I ask to have the article from that paper printed in the RECORD.

The PRESIDING OFFICER (Mr. MCNARY in the chair). Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Greenville News, Greenville, S. C., Saturday, April 21, 1928]

MEYER SAYS INVESTIGATION IS BEING MADE IN COLUMBIA BANK—HEAD OF FARM LOAN BOARD INSISTS FARM CONDITIONS ARE GETTING BETTER

COLUMBIA, April 20.—Agricultural conditions throughout the country are improving, and land values may be expected to increase with the betterment of the whole economic situation in the Nation, said Eugene Meyer, of Washington, chairman of the Federal Farm Loan Board, in Columbia to-day to meet with the directors of the Columbia land bank.

ON INSPECTION TOUR

Mr. Meyer is accompanied by Floyd R. Harrison, member of the board, and making his first visit to Federal land banks in the Southern States. Before returning to Washington, Mr. Meyer and Mr. Harrison will pay official visits to the system banks in New Orleans, Houston, St. Louis, and Louisville.

The Farm Loan Board has supervision of the 12 Government owned and operated banks throughout the agricultural sections of the United States.

TALK OF INQUIRY

Regarding the investigation proposed by Senator COLE L. BLEASE in the Senate, Mr. Meyer had no comment to make, except to say:

"The board is conducting an investigation of the charges."

Mr. BLEASE. Mr. President, it seems to me very strange, when a set of men are accused on this floor openly of being thieves, of absolutely stealing through the Federal Farm Loan Bank of Columbia, S. C., that the chairman of the Committee on Banking and Currency of the Senate should refer the investigation of that matter to the very people who are accused of being particeps criminis to this theft, and helping to conceal from the public the very thievery that is being charged by the resolution which is before the Senate.

Yet here is Meyer himself, the chairman of the board, giving out an interview in the city of Columbia to the effect that he is there investigating this situation, and here is a letter from a highly responsible and respectable citizen saying that Mr. NORBECK, the chairman of the Committee on Banking and Currency of the Senate, wrote them that the matter had been referred to Meyer, the man who, as I have said, is supposed to be protecting and helping these people down there in that situation.

I do not care to take up the time of the Senate in reading other proofs that I have here, but I am going to ask that a letter from Harmonsburg, Pa., dated April 11, 1928, from Mr. Xeno W. Putnam, secretary and treasurer of the third National Farm Loan Association in Pennsylvania, and a letter from my secretary to him and his reply to me, be published as a part of my remarks; also an article appearing in the Sunday New York Times of April 22, 1928; also an article submitted in behalf of the American Farmer. I ask that these be printed with my remarks in the RECORD.

The PRESIDING OFFICER. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

HARMONSBURG, PA., *April 11, 1928.*

Hon. COLE L. BLEASE,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR: I have been reading your remarks on the floor of the Senate regarding certain farm-loan matters with great interest, as they appear in the CONGRESSIONAL RECORD. Have just written Senator DENEEN urging a favorable consideration of Resolution 167; have also written all of the other members of the Committee to Audit and Control the Contingent Expenses of the Senate briefly asking their support.

In reading over the various hearings given in the past to farm-loan matters, and also in my own experience with them, I have found these farm-loan fellows depending almost wholly upon two things for vindication:

First. They deny all charges and stamp their denial with their official authority, and so make the complaints and charges of mere farmers inconsequential by comparison.

Second. Instead of meeting specific charges with specific evidence, they almost always resort to more or less indirect personal disparity—this man ran against one of our officers for some office; that one tried for an appointment which he did not receive; this complainant had trouble with our department over some of his own accounts; that one got delinquent in his payments; another one had a political earache where he ought to have had the gout. These and not evidence you will find occupying pages upon pages of their "defense" in the hearings or in letters to Members and others; and far too often their subterfuge has worked. It would seem that a good many men who ought to know better allow themselves to be talked away from the main issue in just this way. I suppose they must forget that the real test of any administration or of any system comes when there is some clashing of interests.

The News and Courier editorial, reproduced in the CONGRESSIONAL RECORD for April 2, brings out a striking similarity between certain of your own experiences as an investigator of the farm-loan records and one of mine. They quote Farm Loan Commissioner Meyer as saying that "the Department of Justice had investigated the situation and had found nothing to indicate that the Columbia Bank or its officers were involved in any irregularities." At about the same time, however, the Department of Justice was refusing to let an outsider (yourself) see those reassuring records.

Back in 1925 the Farm Loan Board wrote an inquisitive Member of Congress that "in order to satisfy him (myself) we had a special examination made of the National Farm Loan Association, of which he is a member. The examination disclosed nothing wrong with the accounts of the association and afforded no basis whatever for Mr. Putnam's numerous complaints." At the same time or shortly before they were refusing to let an outsider (myself) see those reassuring records, and are still refusing, although the defaulting local official who is being protected by this secrecy will be protected by the statutes of limitation within a very few months. If Farm Loan Commissioner Meyer denies my statement, ask V. R. McHale, his chief examiner. If he also denies it, I'll send you certified copies of his own letters and official figures proving what I have said, proving by figures which the Farm Loan Board possess that there was a defalcation and that the board made repeated attempts through their accounting department to conceal it; that after five years of controversy they were compelled last July to disclose a secreted bank account, in a bank that has never before nor since carried one dollar of farm loan or association accounts excepting this one which, until last July, they had concealed since November 3, 1922.

Whether these farm-loan people should be measured for stripes or whether they also carry among their concealed paraphernalia golden harps and folded wings the farmers and stockholders and bondholders have a right to know the facts, and if anyone is afraid or ashamed or unwilling to have them know facts it is all the more urgent that facts be known.

That is what farmers all over this country are talking among themselves, whether they write their Congressmen about it or not. They want facts, the truth, more light, and they are not caring specially whom it hits or whom it misses. If these men in the bureaus and departments are afraid of facts and the truth and more light, we want

Congress to help us force them to give it. Surely Congress should not be afraid.

As the farmers understand it, Senate Resolution 167 is intended to do this very thing; that is why we want it; and we do not feel that we are asking an unreasonable thing of Congress when we ask of it the chance to know what these men who have been put over us against our will are doing with our fellow farmers, our banking system, and our money.

We have found out that you are not afraid to have the truth brought out; we have faith in Congress to believe enough Senators are not afraid to turn on the light. If any of them are, some of us are watching and hoping that their fears and the cause of them will be brought to the surface. We know that among the farmers themselves a subtile intimidation that has been rather hard to locate even though we know of its presence has done a great deal in the past toward the silencing of complaints.

Trusting that Senate Resolution 167 will by its passage give us the honest facts about our own banking system which any honest business ought to court, and knowing in advance that you are going to do your best to give us that chance, I am,

Respectfully,

XENO W. PUTNAM,
*Farmer, farm writer, organizer, and for three years secretary-treasurer of the third N. F. L. Association in Pennsylvania.*

---

WASHINGTON, D. C., *April 12, 1928.*

Mr. XENO W. PUTNAM,
*Harmonsburg, Pa.*

MY DEAR MR. PUTNAM: Senator BLEASE has your letter of April 11, and in reply the Senator will thank you to advise him whether you would object to the use of this letter on the floor of the Senate, as he would like to read it and make some comments thereupon.

With all good wishes, and assuring you of the Senator's high esteem, I am,

Very respectfully,

JOHN D. LONG, *Secretary.*

---

HARMONSBURG, PA., *April 16, 1928.*

Mr. JOHN D. LONG,
*Secretary to Hon. Cole L. Blease, Washington, D. C.*

MY DEAR MR. LONG: Your letter of the 12th only reached me late Saturday night, owing to my absence. In reply I take pleasure in stating that any use whatever which Senator BLEASE desires to make of my recent letter to him will be entirely agreeable to me.

I have been following the Senator's efforts in the direction of a farm-loan investigation ever since Senate Resolution 159 was first introduced by him, and am, of course, even more interested in the furtherance of Senate Resolution 167. I have no doubt there are several bureaus and departments which need investigating. From personal experience and observation I know that the Farm Loan Bureau does.

With best wishes, and hoping most earnestly for the successful termination of the Senator's fight for the farmers' land banks, I am,

Respectfully,

XENO W. PUTNAM.

---

[Article appearing in Sunday New York Times, April 22, 1928]

EXAMPLE OF SOVIETIZATION SEEN IN FARM LOAN SYSTEM—GOVERNMENT OPERATION OF LAND BANKS IS HELD TO BE IN CONTRAVENTION OF AMERICAN PRINCIPLES

To the EDITOR OF THE NEW YORK TIMES:

The letter published in the Times of April 8 and signed "M." was to the point. He maintains that our Government is slowly but surely being sovietized, but he could have cited a more striking illustration.

DIRECT COPY OF RUSSIANIZED SYSTEM

For example, there is the Federal farm-loan system, as operated through the 12 district Federal land banks. Few people realize to what degree this great system of banks has recently been taken over by bureaucrats or the unique precedent established under our form of government, which is a direct copy of that prevailing with disaster in Russia.

This farm-loan system was established by act of Congress, which also provided that the sum of not to exceed $100,000 should be advanced out of the Federal Treasury to capitalize the 12 district land banks, to start the system going, which sum was to be repaid into the Treasury as the farmers made loans and subscribed to and paid for the capital stocks of the banks. The farmers, like stockholders in our national banks, also assumed a double liability of 10 per cent, the amount of their loan. Upon repayment of this $100,000 back into the Treasury the act provided that the banking system should then be turned over to its rightful owners, the farmers.

DEPLORABLE EXAMPLE OF "TOO MUCH GOVERNMENT IN BUSINESS"

This venture was, from the outset, a political experiment. There are many sane bankers who now testify that it is a deplorable example of "too much Government in business." Surely the system, confronted with a great grist of farm-mortgage foreclosures throughout the land, now faces a crisis which is very real.

URGENT NEED OF INVESTIGATION PROPOSED BY SENATOR BLEASE

Senator BLEASE, in making his recent appeal for the fullest investigation of the system, gave the Senate some facts to consider which were a surprise to many. He cited official documents which seem to demonstrate that all is not well; he gave the testimony of many farm-paper editors that their readers were not satisfied with the service, while many farmer-stockholders were most urgent that the banks be investigated in order that conditions which were pictured as pitiable might be remedied.

CONGRESS FAILED TO KEEP FAITH WITH FARMER-OWNERS

Much of this is due directly to the fact that Congress failed to keep faith with the farmer-owners of the banks. Before they were able fully to repay to the Treasury the sum advanced to capitalize the banks Congress passed an amendment to the fundamental act whereby the system was withdrawn from the control of the farmer-owners and vested in political appointees, who were given the widest latitude in the management, even to dictating the forms and rules of farm-loan associations. This in spite of the fact that farmers owned the stock and assumed the liability that safeguarded the entire system.

PRESIDENT WILSON'S STAND

In his first annual message, pressing home the need of a great rural credit system for our farmers, President Wilson said: "The farmers, of course, ask and should be given no special privileges, such as extending to them the credit of the Government itself. What they need and should obtain is legislation which will make their own abundant and substantial credit resources available as a foundation for joint, concerted, local action in their own behalf in getting the capital they must use."

GOVERNMENT GOES INTO BANKING BUSINESS

But the Federal Government did step right into the operation of the Federal farm-loan system, and is in it to-day, deeper than ever, despite the fact that the 12 district land banks are owned by the farmers. This is contrary to every fundamental principle of our Government.

SENATOR CURTIS OPPOSES MOVE

Senator CHARLES CURTIS, of Kansas, Republican whip of the Senate, said on this: "Would it not be better to let the farmers themselves manage these banks exactly as the law intends? * * * This is the secret of the soundness and success of innumerable borrowers' banks of various kinds, among which failures are rarer than among ordinary banks."

CONGRESS SOVIETIZED THE FARMERS' LAND BANKS

Yet Congress did take the banks out of the hands of their owners, sovietized them, and established a red-tape political administration, which has hopelessly manipulated them along political lines until many advise that a national scandal is now impending.

MANY MORTGAGES FORECLOSED

Wholesale foreclosure of farm mortgages is being carried on and, as J. B. Morman, economist of the Federal Farm Land Board, has well said, "Neither the amortization method of repaying loans nor the beneficent intention of Congress has been able to save the farmers from the fear of foreclosure. The policy which seems to have animated friend and foe alike is to fleece the farmer for all he is worth. Large numbers of farms have been sold under the sheriff's hammer in behalf of land banks as mortgagees. The heartlessness of the money sharks is not unknown to the Federal farm-loan system, for neither the farmer who fails to pay an installment on his loan nor his local association which has indorsed his mortgage can ward off the foreclosure proceedings, as this policy is being mercilessly carried out by both kinds of land banks."

JAMES G. GARVIN.

ASHEVILLE, N. C., *April 17, 1928.*

---

[Statement submitted in behalf of an American farmer who had his stock in the Federal land bank stolen by the Harding-Coolidge administration, who now manipulates that which he owns]

FOR STEALING IS STEALING STILL

"In vain we call old notions fudge,
And bend our conscience to our dealing;
The Ten Commandments will not budge,
And stealing will continue stealing."

As the Chinaman would say, "We most humble submit" the above little couplet to the leaders of the Coolidge administration as worthy of a place in the 1928 platform to be adopted at Kansas City, and as humbly suggest that this be given an honor position in their Sinclair-oil, farm-loan, and farm-relief sector. For "confession is good for the soul," and "birds of a feather flock together," as they say out in Indiana!

The Teapot Dome and farm-loan land bank steal are one and the same, both birds of like feather, the latter being less advertised, though

more gigantic, than the former, but thrusting the saber into the very vitals of our American form of government and constituting the most bold piece of highway robbery ever effected by act of any legislative body in the history of the world—the taking away from the thousands of American farmer-owners of the 12 district land banks of their property rights and depriving them of the simple privileges of managing the banks which they now own through purchase of capital-stock shares sold under legal pressure, as per an act of Congress, and assumption of a legal liability as a result of the same process of American law.

When Senator WALSH of Montana pried off the top of the Teapot he said there might have been tea in it once, but the present odor was quite different from tea! And, by the same token, when Senator COLE L. BLEASE, of South Carolina, endeavored to tilt the top of the Farm Loan Board's chest an odor equally offensive was noticeable for some distance, but the worthies (?) were at hand to keep the cover on. This only illustrates how Congress, under the present strange method of doing business, will set up a little, apparently insignificant bureau, and in 10 or 12 years it becomes greater than the parent that conceived and fathered it. We have witnessed in the past six weeks a Farm Loan Bureau that is bigger than the Senate, and which brings to its assistance those other wings of the Government to protect it from an honest and searching investigation of its stewardship—the Department of Justice, the Treasury Department, and the White House. All the power and pressure of the Coolidge administration has been brought into action to stifle every endeavor to learn the simple truth about the operation of the Federal farm-loan system. Senator BORAH, four years ago, in his endeavor to get at the truth, quickly discovered this.

The joke of it all is, "Andy" is chairman of the Farm Loan Board, which explains quite a little. And, don't forget, "Andy" isn't so particular, either. When they took up that gigantic scandalous collection in Pennsylvania to put over the Mellon-Pepper campaign, which smelled almost unto heaven, then it was that "Andy" declared that it was "as pure as a church collection." But it must have been taken up in a different sort of church than you and I are familiar with. Yes; they are different in Pennsylvania. It seems it has also got into their religion as well as into their politics.

### "WHISPERING" BILL OF THE MOVIES

But "Andy" did back up when "Whispering" Bill Hays came along with a block of Sinclair's Teapot Dome Liberties. But "Andy" hasn't thus far revealed any compunctions to holding within his iron grasp millions of dollars' worth of the farmer's Federal land bank capital-stock certificates and voting them as he pleased, although "Andy" is a banker himself and knows full well that the owners of bank-stock certificates are the only ones who can honestly vote the stock under the American plan of doing business.

It is widely proclaimed that "Andy" is keeping his rocking-horse brigade from the hills of Pennsylvania as much uninstructed as they appear unintelligent, and that, at the last second, he intends to swing them to another dark horse at Kansas City who is willing to take the Mellon bit in his teeth and gee and haw as "Andy" orders.

Therefore, we suggest that "Andy" be named a committee of one to arise at the proper moment and move that the four-line verse above be incorporated into the 1928 Republican platform. No man in the United States has had a larger hand in the steal of the farmer's bank stock, and the illegal and forceful retaining of it, depriving the farmer of his rights, than has "Andy." Therefore, "Andy" is just the fellow to demonstrate again that "confession is good for the soul," even if it does injure the pocketbook and pride.

### "QUIET IS THE WORD, BROTHER!"

How many times, in the past eight years, has that sententious sentence passed between cohorts in Washington, but now let "Andy" breathe forth confession. Yes; and it has been quiet all over the United States, so far as the Federal farm-loan system goes, under the present Mellonized political manipulators. It has been too darned quiet most everywhere, with thousands of worthy farmers unable to get their loan applications even considered by the Mellon appointees; with other thousands getting in and receiving an initiation according to the Mellon ritual—high commissions (contrary to the farm loan act), stiff fees to title attorneys who "searched" unnecessarily cumbersome titles for the Mellonized land banks, steep annual surcharges against them after they got in, and sadder still, if they made a failure for a time, giant commissions to the lawyers who foreclosed their loans and who kicked them off their farms. "Quiet is the word, brother!"

### DID NOT TELL FARMER THE TRUTH

The Mellonized efficiency and economical administration of the Federal land-bank system were just as quiet when it came to advising the unsuspecting farmer applicant regarding the true status of the Federal land-banking system, as per the same Mellonized schedule, which calls for legal sale of bank stock to unsuspecting farmers who can not vote it after they have paid for it, because Mellon withholds that privilege unto himself; the legal pressure of assuming a 10 per cent liability in a land-banking system which Mellon and his hirelings completely dominate, permitting the "foolish farmer" to pay the bills Congress refuses to pay, and a general quiet treatment with regard to advising the same farmer that he is getting into a banking system operated even more radical than any which has ever been suggested for Red Russia. Again we repeat, "Quiet is the word, brother!"

### NO STATEMENT OF STEWARDSHIP

The same Mellonized devotees of the 12 Federal land banks likewise were equally quiet in advising unsuspecting farmer applicants that they would not receive a statement of the stewardship of the Mellonized bank appointees that they could read and understand. They did not truthfully declare to these farmers wanting loans that no farmer-owner of any one of the 12 banks has up to this date had a full and a complete statement of the property which they jointly own, but that such enormous holdings as hundreds of thousands and millions of dollars' worth of farm lands which the banks have taken over are now listed on the statements of every land bank, save one, at Spokane, as "hidden assets," whereas, truth should have placed these abandoned farms under the heading of "open liabilities." Again we repeat, "Quiet is the word, brother!"

United States Senator after Senator has endeavored to secure from the Farm Loan Board and from the district land bank serving his district a simple statement of the financial condition of the particular bank, and been handed a fist full of figures which no sane man could assemble as related to a banking institution's operations. The most ambiguous phrases are used, which may mean almost anything or else nearly nothing. "Quiet is the word, brother!"

### BANKERS UNABLE TO UNTANGLE LAND-BANK FIGURES

Recently a commission representing Canadian banking interests visited various parts of the United States in an endeavor to secure something like accurate information regarding the first decade's operation of this gigantic political banking system, as dominated by "Andy," but they returned home without the facts. They reported to their members that it was impossible, with the present system of bookkeeping in vogue, from farm-loan associations through Federal land banks to the Farm Loan Board's Washington office, to secure figures and facts which were either dependable or susceptible to analysis. For example, there is not available figures to show how much the local agents get as their "rake-off" from the farmer securing a loan, or who endeavors to get a loan; and the whole system of record keeping is unfaithful and out of line with any other known system now in vogue in this country. How many farmers who are now in the ranks of the faithful, and how many trying to get in, have been told these essential facts by the Mellonized appointees? "Quiet is the word, brother!"

### PILLAGERS OF COOLIDGE ADMINISTRATION

As the pillagers of the present administration are about to retire, let them join hands in putting the verse into the platform. Any other declaration by a political administration that has thus pervaded justice with a putrid system of political plundering unparalleled in history could not be expected to do less; and, truthfully, how could they honestly do more? "Confession is good for the soul," and "Birds of a feather flock together."

Again we repeat the suggested farm relief, or "relieving the farmer" couplet, proposed as a Republican platform plank:

"In vain we call old notions fudge,
And bend our conscience to our dealing;
The Ten Commandments will not budge,
And stealing will continue stealing."

### GIVE US A REAL INVESTIGATION

If the manipulators of the political Federal farm-loan system, as pillaged under Mellonized methods, were as honest as they would have people believe, they would have absolutely nothing to fear from an honest, unbiased investigation of their administration; and they would not be so quick to come to the rescue of the "weak sisters" in their fold, who, because of shortcomings and inability, are now wrecking a great farm mortgage banking system. The record shows that every endeavor to investigate the Federal farm-loan system, from the first period when Members of the Senate and House, under pressure from farmers "back home," endeavored to get at the truth, they have been frustrated by a political gang as strong and vicious as operated in Chicago by "Bill" Thompson.

For the present silent partners of the farmer, who dominate the workings of the Federal farm-loan system, have erected in the past 10 years one of the most gigantic political machines in the land. Thousands of loan agents, thousands of attorneys who feed off fat commissions when the farmer's loan is passing through, and who needlessly spend many hours "searching" titles, resulting in fat rake-off charges, and who further pillage the farmer when they foreclose his mortgage, as court records prove; a gang of soviet secret police who travel around the country under the guise of farm-loan association examiners, "blackjacking" every individual who really represents the farming interest, and whose action and thoughts run contrary to those of the Mellonized pillage crew; a horde of hangers-on in the 12 district land banks—all these bring pressure and testify before the Banking and

Currency Committee whenever there is pending legislation or a wish for an investigation. "Ward-heeling" politics rules supreme, and the farmer who owns the capital stock in the land banks is not heard by the committees, who base their entire action upon the testimony of outside political hangers-on of the Mellonized banks.

It is now time that the country at large, and the farming industry in particular, enjoy a full, free investigation of the entire land-bank system. Therefore we suggest that the Senate adopt a resolution which will force the respective district land banks to furnish a committee with the names and addresses of the borrowing farmers, whose loans they carry, and that the Senate committee direct a communication to the farmer owners with respect to their wishes in the matter of permitting politicians to further completely dominate the business which these farmers were legally forced to purchase, which they now own, but which, through a trick during the Harding-Coolidge maladministration of the farmers' banks, was turned over to outside politicians to rule.

Let this Senate committee ask the farmer such questions as these: "Are you satisfied with the present management of the land bank in your district?" "What did it cost you to get in?" "Who received the money?" "Were any political or questionable methods adopted by those in charge prior to the granting of your loan?" "Did you know when you were legally forced to purchase and pay for capital stock in your land bank that outside political appointees would operate the bank which you would then own?" Also, "Do you believe that a political banking system is to the best advantage of agriculture, or do you believe that the farmers who now own these banks should have the fullest privileges in the management and operation of the banks, as contemplated in the original farm loan act of 1916?"

Other equally pertinent questions might be asked the farmers who now own the great Federal farm-loan system, but the answer of the nearly 500,000 farmers who are now in the fold, to the above questions, would furnish the basis of a real, honest investigation of what has been done, what should be done, and this type of an investigation could be effected without hamstringing and hog-tying methods which have characterized the alleged investigations of the past, in which Mellonized politicians have contributed the major portion of evidence, and in which the farmers, who are the only ones with any claim, have been stifled or not even permitted to peep. In fact, most of the committee hearings have been held entirely unheralded, and only those in the confidence of the politicians, possessed of the secret password, have been permitted to testify before the committee when such so-called investigation was pending.

Before the country faces a national scandal, and before a great farm-mortgage lending system which, properly administered, may prove of service to farming, has been wrecked by Mellonized politicians is the time for the Senate to act. Millions of dollars' worth of abandoned farm lands are now in the hands of the 12 Federal land banks, not even earning ample funds to pay taxes, not to mention semiannual interest charges or principal sums, so that the bond interest must be paid out of other funds which rightly belong to the farmers who are making good. These farmers, because they succeed, are being penalized under the present management.

Hundreds of millions may be saved by acting now. Surely no Member of the Senate or House can consistently state, after the scandal storm breaks forth, that he did not have ample warning that it had been pending for a long period of time. Individual farmers by the thousand, acting as individuals and through their respective farm organizations, have for five or six years demanded a different deal than has been rendered to farmers under the present management of this system. The Senators and Representatives have had ample warning and should now take note, and, better, take action looking toward a searching investigation of the entire Federal farm-loan system from top to bottom.

Not only should the activities of the 12 district Federal land banks come in for fullest investigation, but the intermediate credit banks, officered by the same staff of officers, and who now draw down fat salaries, out of all proportion received by them prior to their connection with the banks. One land bank now has as its secretary a man who drove a bakery wagon prior to his election to a land-bank office; he received only a few dollars a day salary then, but he now receives a handsome salary aggregating $7,500 per annum. What possible qualification has this man for acting as executive officer in a land bank, handling the farmers' business, and taking action which threatens destruction to the helpless farmer-owners of that bank? Another officer held an insignificant office in the Department of Agriculture when the farm loan act was passed. In fact, he received a mere clerk's pittance—$1,500 per year. Under Mellonized methods he has graduated into a land-bank president and receives $10,000 per annum plus handsome "expenses" to journey about the country. Another man was a floorwalker in a department store; he is now an expert (?) in a land bank at a fat salary—taken from the farmer-owner's surplus. These are only a few of many striking illustrations of the reason why we need a searching investigation of the present plundering of the land banks. The Senate and House should gladly help the farmer-owners of these banks to free themselves from the hobbles which now cloud the skies and which make successful, serviceable operation of the banks hopeless.

BOND SALES STIFLED

The number of farm-loan bonds offered for sale has been so small as to seriously handicap the functioning of the various district land banks. This is due entirely to the present political methods pursued in issuance and offering of these bonds, which comes exclusively under the domination of the Treasury Department, and which has given Mellon the whip hand over the farmer borrower. No bonds have been issued without the all-important Mellon O. K. Investigation will demonstrate to the entire satisfaction of any parties that the present method of handling farm-loan bonds is both unsatisfactory and needlessly expensive.

Under the guise of instituting an agency capable of handling as many Federal land-bank bonds as required to finance the needs of the farmers, a separate unit was organized. This was headed by Charles E. Lobdell, former farm-loan commissioner, and he, through the instrumentality of his own appointees—the presidents of the 12 district Federal land banks—at a secret conference held in Washington, was named fiscal agent of the banks at a salary two and one-half times as large as he ever received as member of the Farm Loan Board, namely, $25,000 per year plus handsome expenses. The farmer-owners of the banks were never given an opportunity to vote upon this expenditure and never have been permitted to speak their minds, yet the money which is devoted to the salary of the agent and the enormous expenditures—a continual monthly drain on the treasury of each of the land banks—comes out of the pocket of the farmers who own these banks. This is listed in the report of the Farm Loan Bureau under the heading of "Extension and publicity." For the month ending February 29, 1928, the figures were stated as follows:

*Expenditures for "extension and publicity"*

| District land bank | January, 1928 | February, 1928 |
|---|---|---|
| Springfield, Mass. | $1,520.48 | $1,450.30 |
| Baltimore, Md. | 864.36 | 627.93 |
| Louisville, Ky. | 86.76 | 433.12 |
| New Orleans, La. | 61.62 | 245.79 |
| St. Louis, Mo. | 4,415.55 | 3,392.34 |
| St. Paul, Minn. | 5.25 | 548.75 |
| Omaha, Nebr. | 675.78 | 993.40 |
| Houston, Tex. | | 427.93 |
| Berkeley, Calif. | 12.91 | 109.44 |
| Spokane, Wash. | 6,927.40 | 7,781.46 |
| Total | 14,570.11 | 16,010.46 |

The bond departments of the 12 district land banks expended during January, 1928, the sum of $2,641.69, and during February, 1928, the sum of $2,526.74. Thus, these items represent expenditures aggregating between $18,000 and $20,000 per month, against the respective farmer-owned bank funds, or an enormous annual expenditure. The claim is made, of course, that an enormous saving is made the banks under the present method of selling these bonds, compared with the former methods employed. Of course, the bonds do sell at a premium, but it is safe to say that a superior method could be developed of handling these bonds, and that a greater volume could be disposed of were the issuance and sale removed from the domination of the Treasury Department. This would insure the system of having sufficient bond money at hand to meet the loan requirements of every worthy farmer, instead of one out of six or eight farmers who apply for loans, as for some time past.

As the conservative Farm Journal, of Philadelphia, and the Farm and Fireside, of New York, have long insisted, the disposal of farm-loan bonds should be separated from the administration of the Treasury and vested in the hands of an independent agency, capable of meeting the urgent needs of the farmer to be served by this system of land banks.

---

[Extract from address delivered by George H. Smith, president of the Dominion Mortgage & Investments' Association of Canada, at the annual session]

BRANDS FEDERAL FARM-LOAN PLAN A QUESTIONABLE CLASS LEGISLATIVE ADVANCE TO FARMERS—MENTIONS FAILURES OF THESE BANKS—WHOLESALE FORECLOSURE THREATENS SECURITY OF ENTIRE SYSTEM

Unfortunately rural credits have become a political football due to the unprecedented political situation in which two political parties, neither of which were convinced of the necessity for any such scheme as advocated, or of its practicability, outbid one another in effecting a gigantic farm-mortgage scheme, which has not proven itself a panacea for all the economic ills, and few of those for which it was intended.

The success which it is assumed has attended the Federal land-bank system of the United States is strongly urged as an argument in favor of Canada adopting some such form of loaning money to farmers.

TAX EXEMPTION CONTRARY TO AMERICAN PRINCIPLE

The claim that lower rates of interest are possible is based upon experience in densely populated European countries where conditions are entirely different. The low rates which the Federal farm-loan system

have made available to farmers have been made possible, as you know, by the fact that their funds are obtained from the sale of bonds exempt from all forms of taxation. No one will suggest that funds for loaning in Canada be obtained by reverting to the issue of tax-free bonds, which were deliberately abandoned some years ago. If such a retrograde step were proposed, would the governments of the Dominion and the Provinces be fair enough to enable the presently constituted lending institutions of the country to similarly obtain funds for loaning at lower rates by making free from taxation the securities our land-mortgage companies sell to the public? If not, why not?

NOT PART OF ORIGINAL PLAN

Even in the United States the tax-exemption feature was not a part of the original plan, but was superimposed when it was found that the scheme was not proving successful, and after the country had been committed to it, and also before there was any Federal income tax of importance. The report of the original commission upon which the legislation was based said:

"LAND BANKS WITHOUT GOVERNMENT DOMINION

"It is the opinion of the commission that our American problem of rural credit should be worked out without Government aid.

"One of the great lessons learned in Europe is that in the long run the farmers succeed best when they help themselves. Whenever they become dependent on the government, they keep looking to the government for more aid. It is believed to be a correct general statement that rural credit is on the strongest basis in those countries where it has been developed most completely without government aid.

"Even granting the great importance of agriculture, it is improper for all the people to be taxed in order to assist the prosperity of even a great class like the farming class."

PRESIDENT WILSON CONDEMNED GOVERNMENT OPERATION OF FEDERAL LAND BANK SYSTEM

President Wilson, in his message to Congress, said:

"The farmers, of course, ask and should be given no special privilege, such as extending to them the credit of the Government itself. What they need and should obtain is legislation which will make their own abundant and substantial credit resources available as a foundation for joint, concerted local action in their own behalf in getting the capital they must use. It is to this we should now address ourselves."

A EUROPEANIZED SYSTEM FOR AMERICA WILL NOT SUCCEED—THE COOPERATIVE LOAN ASSOCIATION OF GERMANY AND DENMARK OPERATED QUITE UNLIKE THE FEDERAL FARM LOAN SYSTEM—MAKES FOR STABLE LAND VALUES RATHER THAN UNSATISFACTORY RESULTS OBTAINING IN UNITED STATES AS DIRECT RESULT OF OPERATION OF SUPERPOLITICAL LAND BANKS

Then the example of western Europe is put before us, and we are told that capital is available at 5 per cent. There is a failure to recognize the fact that rates fluctuate there as elsewhere. There have been occasions where in Germany and France money was not obtainable at all, and others in which rates as high as are charged in western Canada, and even higher, had to be paid. There have been other investigators of European conditions whose reports are available. One made in 1924 is by the Agricultural Tribunal of Investigation appointed by the British Government. It says:

"In the first instances, the German Landschaft was a means for meeting the credit requirements of the nobility. The restrictions have gradually been removed, first, in favor of properties of intermediate size, and finally there were admitted to membership all rural properties of not less than 500 thalers in value, the yield of which was such as to insure the economic independence of the owners."

The fact is that in Germany the owners and borrowers are chiefly wealthy landowners, who do not occupy and cultivate the lands but lease them. There a mortgage has a prior position as perhaps nowhere else. There are no weed taxes, no wild land taxes, no hospital or telephone taxes, no seed-grain liens, no hail tax, no irrigation charges, to take priority over the mortgage and perhaps wipe it out. The mortgage is not even subject to ordinary local taxes, which are assumed and paid by the tenant, whose goods are seized and sold if he does not promptly pay them. Foreclosure is a simple and expeditious procedure. And when the mortgagee forecloses the lands have a stable rental value, and there being always a demand for more land than is available, they have also a stable selling value which can be immediately realized. Under conditions such as these, and when a number of these wealthy landlords combine in a cooperative association, pledging the wealth and resources of all, is it surprising that they can obtain money on more favorable terms than the citizens of a Province which has gone to the other extreme and taken from mortgagees even the covenant of the individual owner after it has been voluntarily given? As far as legislation and economic conditions are concerned, it is a "far cry" from Germany or Denmark to America.

FARMERS RESPONSIBLE FOR DEBTS OF NEIGHBORS

The cooperative feature of the rural credits systems of European countries has not been emphasized when those systems have been referred to. Does anyone suggest that this cooperative system be adopted in Canada? I think not. It is too well known that Canadians, and especially the farmers of the prairies, would not for a moment consider making themselves responsible for the indebtedness of their neighbors. The possibility of loss by such action is too thoroughly understood.

UNSATISFACTORY EXPERIENCE OF FEDERAL FARM LOAN SYSTEM IN UNITED STATES SHOULD BE SUFFICIENT WARNING TO CANADA NOT TO DUPLICATE THE ERROR BY ESTABLISHMENT OF SIMILAR SUPERPOLITICAL LOAN BANKS

Let us inquire a little further into what the rural credit system of the United States has done for the American farmer. It has loaned the immense sum of a billion and a half dollars at low rates of interest, but have the beneficial results which were to follow been secured? If we are to take their experience as a guidepost, let us see where it leads. In the years between 1910 and 1920 the farm mortgage indebtedness of the United States increased by 131 per cent. The appraised or reputed values of the land increased in those years by 117 per cent, and then began to decline till in 1923 it exceeded that of 1910 by only 66 per cent. In the meantime the mortgage indebtedness continued to increase very rapidly—much more rapidly than previous to 1920—and in 1923 it was 260 per cent in excess of that of 1910. In 1920 the volume of production was 21 per cent greater than in 1910, and in 1923 17 per cent greater; the increase for these 13 years being not more than normal. The increase in the value of production over 1910 was 63 per cent in 1920 and 54 per cent in 1923. As compared with these figures, the volume of production in Canada in 1920 was 80 per cent in excess of 1910 and continued to increase till in 1923 it was 104 per cent greater than in 1910. Similarly the value of the production of Canada's farms in 1920 exceeded that of 1910 by 274 per cent and in 1923 by 125 per cent. While unfortunately there are no definite statistics of the farm mortgage indebtedness in Canada, from such figures as are available it may be stated that it is almost certainly not more than 50 per cent greater than in 1910, and probably the increase is much less than 50 per cent.

WHOLESALE FORECLOSURE AND THREATENING FARM TENANCY FOLLOW IN WAKE OF POLITICAL BANKING METHODS FOLLOWED BY FEDERAL FARM LOAN POLITICIANS

Already the United States Federal farm loan system has been compelled to resort to foreclosure proceedings in connection with more than 5,000 mortgages to the amount of about $22,000,000, has acquired about 1,400 farms, while about an equal number of cases are pending, and in the sales of lands has sustained considerable losses. A very marked increase in the number of tenant farmers has taken place, concerning which the British Agricultural Tribunal reported:

"The persistent increase in tenant farming is one of the factors in the situation which economists and bankers alike describe as undesirable and even alarming."

An official of the United States Department of Agriculture recently issued the statement that the 12 district Federal land banks had in process of foreclosure more than $5,000,000 of farm-mortgage loans, and that the year 1928 would probably see more than $17,000 000 additional farm loans foreclosed. This is wholesale foreclosure and threatens the very foundation of American agriculture. Does Canada wish a similar political system of banking invoked upon her farmers? I think not.

POLITICAL BANKING A FAILURE WHEREVER TRIED—SOUTH DAKOTA AND MINNESOTA ADD THEIR EXPERIENCE TO THE LIST OF FAILURES AT LIFTING THE FARMER INTO PROSPERITY BY THE FARMER'S BOOTSTRAPS

South Dakota deficit—Long terms abolished: Like our own Provinces of Saskatchewan, Manitoba, and British Columbia, some of the States have also their own systems of rural credit. That of South Dakota was created by legislation passed in 1917, and has issued and outstanding bonds to the amount of $47,500,000 at rates of interest varying from 4¾ per cent to 6 per cent. The latest issue in 1924 bearing 5¼ per cent was sold at par, while a number of others were issued at a discount. The mortgage loans amount to upward of $41,000,000 at from 5½ per cent to 7 per cent, the average being approximately 6 per cent. Up to the close of the system's last fiscal year there exists an ascertained deficit of $3,038,663. A joint committee of the Senate and House appointed to investigate the affairs of the Rural Credit Board made a very exhaustive report in February, 1925, in which it said:

ENORMOUS LOSSES BY STATE LOAN VENTURES

"Of approximately 12,000 loans more than 4,300 are now in default, and 465 are in process of foreclosure. How much loss, if any, there will be depends on what the security is or becomes worth, how the borrowers prosper in the future, and how the land eventually acquired is handled."

Referring to the necessity of providing for interest on the bonds outstanding the report says:

DEFICIT ON BONDS INCREASES ON FORECLOSED FARM LOANS

"It must, however, be remembered in this connection that over one-third of the rural credit mortgage loans are in default, and, therefore, a deficit of interest income has not only developed in the past, but the deficit will continue to increase as the years go on."

(This is one of the gigantic problems now confronting the political manipulators of the Federal farm loan system—how to make millions

of dollars worth of abandoned farms upon which mortgages have been foreclosed, pay even ample return to pay the bond holder interest. This is a tremendous drain upon the profit of the 12 district land banks, which is deducted from the possible participation of the farmer-owners of these banks, who, rather than the political bankers who operate the banks, pay the bill.)

SOUTH DAKOTA QUIT ISSUANCE OF FARM LOAN BONDS

Among the committee's recommendations were:

"That all outstanding bonds be retired as rapidly as consistent with the proper handling of the mortgages and other property already acquired.

"That no new loans be made except from the funds received in payment of the loans already made and for the purpose of the reinvestment of such funds."

The committee added:

LOSSES OVERBALANCE ANY BENEFIT TO THE FARMER BORROWER

"This recommendation is made for the reason that it is the judgment of your committee that any benefits which have come from the rural credit system are overbalanced by the losses present and prospective, and abuses and the complications which have followed the adoption of the system, and that the bonded indebtedness is entirely out of proportion to our assets and other State debt."

STATE GLADLY ADOPTS RECOMMENDATION TO GET OUT OF LOAN BUSINESS

The recommendations made by the committee were adopted and legislation providing for the gradual liquidation of the State's rural credits became effective July 1, 1925. This law abolishes the 30-year amortization plan and prohibits the loaning of money for more than 10 years, and then only for the reinvestment of funds. The issuing of new bonds is prohibited.

MINNESOTA DABBLES WITH GOVERNMENT-OPERATED LAND BANKS WITH LARGE LOSSES

In 1923 the State of Minnesota established a rural credit bureau. In a very short period its operations proved so unsatisfactory that like South Dakota, a committee was appointed by the senate and house of representatives to investigate.

The committee began its investigation on January 30, 1925, and presented a report on March 13, 1925, which disclosed the fact that large losses had already been sustained. The report showed that up to February 1, 1925, the bureau had accepted and closed 6,740 loans aggregating $34,523,400, while an additional 810 loans, amounting to $2,814,700, had been accepted but not yet closed. At the same date 43 loans were either foreclosed or in process of foreclosure, and there were 255 loans which were delinquent by reason of failure to pay installments and interest. On this subject the committee said:

"The number of loans delinquent does not of itself necessarily show the true condition of loans, which on the records of the bureau are not delinquent, for undoubtedly in many cases second mortgages are paying the installments and interest on State's loans.

"How long these second mortgages will continue to do so is a matter solely left to conjecture, and if such payments should cease the committee believes the number of delinquent loans will be substantially increased."

WHY MINNESOTA MADE THE SAD FAILURE AT GOVERNMENT OPERATION OF LAND BANKS

Among other comments, two or three quotations will be found of special interest, as made by the investigating committee:

"It is significant that in several instances the owner of the land not only refused to pay the first installment and interest on the loan but actually, after the loan was made, abandoned the land.

"From the records, furnished from the bureau, is appears that the State's investment in the lands where foreclosures have been completed and where the State has acquired title to the land, subject to the right to redeem, is better than $100,000. These figures are as of February 1, 1925. That there will be substantial loss to the State arising out of these foreclosures there can be no doubt. The margin between the State's investment and the bona fide value of the land is so limited that with a few years' taxes, with the addition of accrued interest, with the cost of foreclosure the margin will be wiped out, and the State then stands in the position of a lender who has loaned to the full value of the land which inevitably leads to loss. * * * What has been said here applies with equal force to the 235 delinquent loans on which foreclosure has not yet been commenced, unless the loans are reinstated.

"The aggregate amount of the delinquent loans, exclusive of those where foreclosure has been completed, is approximately $1,143,000."

FARMERS WERE NOT BENEFITED BY THIS SUPERPOLITICAL SYSTEM OF MAKING FARM LOANS, OF WHICH THE FEDERAL FARM LOAN SYSTEM IS A NATION-WIDE PROTOTYPE POLITICAL BANKING INSTITUTION—THE SAME FAILURE FACES THAT NATIONAL SYSTEM UNLESS QUICKLY HAMPERED AND POLITICIANS REMOVED FROM OFFICE

A supplementary individual report by Senator W. A. Just is worth quoting in full:

"In view of the disclosures made during the investigation of the rural credits bureau, I would like to add this personal supplementary report.

"(1) Less than two years of operation of the bureau has disclosed a large number of delinquencies.

"(2) Much worse conditions can be expected after another period of depression, particularly when we take into consideration that this was a very good year, so far as crops and prices are concerned.

"(3) The payments for the first year would naturally come easier by the close proximity of the help extended than in future years.

"(4) In my opinion, money rates by private interests will be nearly, if not entirely, as cheap as those made by the bureau when conservatively placed.

"(5) As a rule, with some exceptions, of course, the farmers have not been extensively helped.

"(6) No more funds should be available for the bureau for at least two years, if at all, to give us time to see what the conditions are after a lapse of such time."

POLITICAL BANKERS OF FEDERAL FARM LOAN SYSTEM SAW TROUBLE COMING—EVIDENTLY THEY TOOK NO ACTION TO SAVE THE SYSTEM, AS PRESENT LARGE ABANDONED FARM-LAND HOLDINGS TESTIFY

Baneful results foreseen. There were those who foresaw the baneful results of the very extensive additional credits provided in the United States. The president of the Federal land bank in St. Paul said in September, 1919:

"People are growing rich overnight; land is being bought and sold like stocks and bonds on the market exchange. Such land is not bought for farming purposes. Every speculator is interested in unloading as soon as possible so as to pass on the deal before settlement day comes. As to who will become the final owner will depend on the relative financial strength of the holders of the sixth, fifth, fourth, third, second, or first mortgages. In many cases they will break down to the second or first mortgages, and thus the prices will be back to normal again with all the inflations squeezed out. The break will be greater in some localities than in others, according to the degree of inflation. This wave of land speculation is in a way anticipating the future earnings of the land, capitalizing it in the present, and spending the profits now at the expense of the future. When this joy riding is over it will be a sorry day not only for farming interests, but will also affect many other lines of endeavor."

FEDERAL FARM LOAN SYSTEM LOANS TOO HEAVY ON CHEAP LAND—LOANS NO PRUDENT LENDING AGENCY WOULD CONSIDER—MONEY USED FOR UNPRODUCTIVE PURPOSES

Speaking on the same subject, on March 4, 1919, Senator Fordney said:

"Thoughtful and careful people everywhere counsel economy in living and caution about investment in this time of high taxes and inflated prices. * * * The Treasury Department urges us all to save money by thrift stamps and help pay the war debt. * * * The Federal Farm Loan Board takes exactly the opposite view. They urge people to borrow money, to place mortgages on their farms. With the aid of traveling lecturers, Chautauqua speakers, special newspaper writers, and others, farmers are told that Federal farm loan bank mortgages never have to be paid off, or that they pay themselves off. Many are led into borrowing money for land speculation or to invest in automobiles and nonproductive improvements.

"One of the popular phases of these mortgage promoters is: The farmer is learning that the dollar is a thing to be spent and not something to be hoarded. * * * I know that they have loaned money on farms in the country at much above the value of the property, and that the Government will never get the money back. It is a fraud. I know a piece of land that sold for $3 per acre, and the Federal farm loan bank loaned $15 an acre on it, and it would not sell to-day for $5 an acre; and that is the kind of loans they are getting sometimes. * * * The loans made by the Federal farm loan banks are such loans that prudent bankers and money lenders will not make. The Federal farm loan banks are getting such loans as no prudent money lenders will take. Those responsible for the system encouraged the farmer to borrow extensively, being desirous of proving its value by the number of loans and the amount loaned. In some cases, where the borrower was a thrifty farmer, benefit was derived, but in the majority of cases the money so obtained was used for unproductive purposes."

AFTER BITTER SPECTACLE OF FEDERAL FARM LOAN SYSTEM IN UNITED STATES, CANADIAN LEADERS VOTE TO KEEP THEIR COUNTRY OUT OF POLITICAL BANKING

The Canadian Council of Agriculture, representing leading farm organizations of the western Provinces, of the governments of Alberta, Manitoba, and Saskatchewan, and the various mortgage loan associations, as well as the secretaries of these, at a conference held in Winnipeg, adopted the following resolutions after considering the merits and demerits of the Federal farm loan system:

"That governments should refrain from legislation abrogating or diminishing reasonable contractual rights.

"That governments should review carefully all existing or proposed legislation affecting mortgage security, eliminating all that should be

eliminated, having in mind the general welfare of the community, including borrowers and lenders.

"That as it is recognized that lengthy, intricate, and uncertain legal methods in the handling of mortgages are not beneficial to either borrower or lender, such legal methods should be made simple and inexpensive, and land titles and other fees for procedure connected with foreclosure, etc., should be reduced to a cost basis, thus protecting the borrower's equity.

"We believe that if progress is made on these lines and in particular in the direction of a more general recognition of the obligations imposed by reasonable contract, the supply of money for mortgage investment will so increase that the rate of interest will inevitably decline.

"And further, the agricultural representatives at this conference having represented that, in their opinion, there is a real demand for long-term loans on the amortization plan, the mortgage association representatives agree to give full and sympathetic consideration to plans for lending on such basis."

EXPERIENCED FARM LOAN BANKER DECLARED GOVERNMENT LOAN AGENCY UNSOUND AND UNSATISFACTORY IN MEETING FARM NEED

No necessity for government rural credits: I do not believe that there is any necessity for governmental action to meet this demand for intermediate credit and have no hesitation in saying frankly to our friends of the Canadian Council of Agriculture that it is not in the interests of the farmers of western Canada, nor of the country as a whole, to have the Dominion Government undertake the furnishing of this new form of credit. I say this in all frankness and candor because I believe that the Canadian Council of Agriculture will accept this statement in the same spirit in which it is being given. I believe that the loan companies dealing with individual farmers in western Canada can handle this problem far better than any government can. I make this statement because of the experience which the company I have the honor to be connected with has had during the past few years in southern Manitoba, where there has been developed what I look upon as an ideal form of cooperation between a lending company and the individual farmer through the cooperation of our inspectors taking an interest in the problems of the farmer by making a study of prevailing conditions and taking the time to sit down and discuss these problems with the farmer and his wife. Men who were discouraged, unable to see their way clear to continue on the farm, have been encouraged to such an extent that farms that were practically a wilderness of weeds have been converted into clean, productive, self-sustaining farms, and on land which had been abandoned by former owners, leaving the farm overrun with weeds, through the assistance and cooperation of the company's inspectors, tenants have become owners in southern Manitoba.

I want to say to the representatives of the loaning institutions that it is good business to make a close study of the problems of the western farmer to decide whether it is possible for the loaning institutions, through a system of sound, intelligent, and safe cooperation, to grapple with the situation and produce far more satisfactory results than are possible by governmental action in the form of rural credits legislation.

[Extract from address delivered by A. J. M. Poole, president of the Manitoba United Farmers (Ltd.), one of Canada's strongest farmer-owned cooperative agencies, with thousands of members scattered over Manitoba]

FARM LEADER CONDEMNS UNSOUND POLITICAL BANKING AS HASTY, ILL-ADVISED PROPOSAL

There are in western Canada to-day certain elements who are taking certain positions and advocating certain things that do not augur well for the basis of credit. And in that connection I would like to read you a short paragraph from my presidential address to the United Farmers of Manitoba, delivered last January in our annual convention:

"Realizing also how necessary, as a fundamental requisite to the successful development of agriculture, is the efficiency and availability of necessary credits, we must give serious attention to this problem. Perhaps it is not so much a question of more credit as it is that of the conditions under which the credit necessary is to be had. Manitoba can only be made prosperous by the development, for her people, of our vast natural resources, chief of which is agriculture. The development of these requires that capital be made available. The conditions under which capital is provided must, in addition to protecting the interests of those supplying the credit, be of such a nature as to permit those using it doing so with advantage and profit. Therefore the conditions of credit are a matter requiring the most careful consideration possible. No scheme conceived from a prejudiced point of view for easy money and without regard to all parties concerned should be tolerated. Hasty, ill-advised proposals, not founded on sound principles, though meant only as temporary expedients, react immeasurably against the obtaining of constructive measures. Any suggestion to repudiate a debt honestly incurred, or any failure to recognize the sanctity of contracts, if continued in, must inevitably lead to the absolute destruction of all credit and the creation of a state of chaos in our whole business structure. But rather must we so plan our credit proposals and so conduct our personal and community business that those who extend us credit can have abundant confidence in us. After all, the basis of all credit must be honesty of character, good will, and reasonable security. Approaching the problem in that spirit, much can be done."

I believe in that, and believe that, after all is said and done, perhaps the biggest factor in determining whether I am a successful farmer or not is me, myself. If I am to be a successful farmer with better methods of farming, improving the quality of my wheat so that I will raise the grade of it, the only way for that to be done is for me to do it.

I think we have a good illustration of that in the wheat pool, and in the demand that existed amongst the farmers—and it was pretty general—for a Government wheat board in the years 1920–21.

I never was in favor of a Government wheat board and I spoke against it at our annual convention in 1922, and I said that if we farmers will do this thing ourselves, organize our own cooperative marketing institution, we will be bigger and better citizens for having done it, because we will then have reason to be proud of the fact that we have really done something. On the other hand, if we are asking the Government to do it, we would not be able to say that we had done anything; and I, for one, could not bring myself around to the place where I could go to the Government and ask the Government to do for me what I could and ought to do for myself. And I had another reason. At that time we were drifting toward what you might call putting too much dependence on paternal legislation.

---

[Extract from annual report of Dominion Mortgage & Investments Association of Canada]

PRIVATE LEADERSHIP RATHER THAN POLITICAL FOSTERS A SOUND AND PROGRESSIVE AGRICULTURAL FUTURE

Ample credit service: Since confederation a large number of financial organizations in Canada have been in active competition with each other in seeking to place at the disposal of agriculturists such amounts of capital as could be reasonably well secured. The operations of these organizations have extended as the area of settlement widened, and rarely, if ever, have the resources of these organizations failed to meet all demands made upon them, at rates of interest and terms of repayment as favorable as those obtainable in any other part of the world under corresponding conditions.

Largely by the cooperation of these agencies, the settled area of Canada has extended. In no other country of the empire has the State extended to individual farm borrowers less capital, under terms of repayment, than in Canada, nor is there in any other part of the empire more efficient credit service obtainable to the same class of borrowers. This service has been provided by the initiative and enterprise of the country's citizens.

CITES FAILURES OF THE FEDERAL FARM LOAN SYSTEM

Rural progress: The results of this rural credit service in Canada are to-day quite obvious. Rural population has increased more rapidly than in Australia and New Zealand, although State advances on a liberal scale have, for many years, been the rule there. In volume of, as well as per capita production of farm wealth, comparisons are flattering to Canada. But, above all, the financial position of the agriculturist in this country compares most favorably with that of other agriculturists in outlying countries of the empire. The amount of per capita debt and the annual interest or rental to be met in connection therewith are less burdensome in any part of Canada than in any country respecting which information has been procurable. In the United States, following a decade of Federal and State subsidized lending to farmers, the increase of debt and interest charges has been out of all proportion to the increase in volume of production and the ability of borrowers to meet either annual interest, principal, or rental obligations.

FAILURE OF SASKATCHEWAN GOVERNMENT LENDING

In Manitoba, Saskatchewan, and Alberta long-term farm-mortgage lending plans were instituted by the provincial governments to meet the alleged "needs" of the farmer. As the information available to the public respecting the operations of the government farm mortgage-lending schemes is not in sufficient detail to permit of any definite conclusion being formed as to whether or not they are a success, it is the belief, based upon the more extensive operations of institutional lenders, that they have not been satisfactory.

Definite information available as to difficulties in collecting debts due to Provinces by rural borrowers, to which attention is drawn, is as follows:

(a) The abnormal amount of payments in arrears under long-term mortgages held by the Saskatchewan and Manitoba governments.

(b) The large but undetermined losses of the Manitoba rural-credit societies said by Premier Bracken to be already in excess of $650,000 and which will most probably exceed that amount.

POLITICAL BANKING FAILURES NUMEROUS IN UNITED STATES

As in Saskatchewan and Manitoba, there has been a cessation of activity in extending rural credit in the adjoining territory of Minnesota and the Dakotas, where plans were put into effect to meet conditions precisely the same as existing in Canada.

South Dakota: A joint committee of senate and house on February 21, 1925, finds: "Your committee is unanimously of the opinion that it is for the best interests of the State to cease conducting a farm-loan business, except so far as may be necessary to retire the bonds outstanding." After eight years' operation, 1916–1924, mortgages taken amounted to $41,064,211 and for the provision of funds for the purpose bonds totaling $47,500,000 had been sold, the difference between these two amounts being represented chiefly by cash $3,278,616; real estate, $303,857; and deficit, $2,876,993. The deficit, however, is likely to continue to increase annually, as out of 12,000 loans 4,308 are delinquent, although made on a long-term plan at rates of interest "not less than one-half of 1 per cent nor more than 1½ per cent" added to the rate paid on the money borrowed by the State. To the deficit also must be added losses through rural credit funds being deposited in 65 banks now closed. The amount of these deposits (as at February 21, 1925) has not been definitely ascertained because of incomplete records. In explanation of so much cash being kept on deposit, the rural credits board held that it was necessary to do so in order to pay bond interest promptly, as they could not depend upon interest on mortgages being paid promptly. The total payments of bond interest to December 30 last was $10,700,781 and the receipts from mortgage interest $7,354,540, the margin between the receipts and payments of interest having steadily widened during the last four years of the operation of this system.

FEDERAL FARM LOAN SYSTEM LOANS AMOUNT LAND IS WORTH—NOT SAFE MARGIN CONGRESS ESTABLISHED

The handling of the loans foreclosed by the Federal farm loan system in the United States brings to light a striking fact which no devotee of political banking is able to deny, namely, that those banks have, in most instances, been loaning money to farmers based upon near a full value of the farm instead of the safe margin set by Congress. Sales of land have resulted in enormous losses to the system, indicating that the amount of the loans originally made was equal to the full realized value of the land sold.

After securing the maximum advances permitted, many owners then rent the land to tenants, hence the British Agriculture Tribune, in reporting to the Premier, observes:

"The persistent increase in tenant farming is one of the factors in the situation which economists and bankers alike describe as undesirable and even alarming."

In a number of States the State bankers' associations have adopted resolutions, of which the following by the Kansas Bankers' Association is typical:

"*Resolved*, That the growing menace of farm tenanting vitally affects the growth and prosperity of Kansas, and we express a sympathy and interest in a solution that will help to place actual owners on the farms."

In all these State ventures substantial subsidies in one form or another have created burdens devolving upon the taxpayer without—

(a) Reducing the amount of interest paid annually by the farmer borrower.

(b) Assisting the farmer borrower in reducing his debt, or

(c) Improving agricultural conditions or increasing the volume of production.

HANDICAP OF POLITICAL BANKING METHODS CAUSE THOUSANDS OF FARMERS TO LEAVE UNITED STATES TO SECURE LOWER INTEREST RATES IN WESTERN CANADA, WHERE THERE IS NO SUPERPOLITICAL LAND BANK SYSTEM

The part political banking has played in the past few years is becoming so great a handicap that thousands of young farmers have abandoned farms in Northwestern States and emigrated into western Canada, where better loan methods prevail under private administration, is a striking commentary upon the failure of the Federal larm loan system to meet the average demands of agriculture.

Farmers living in certain States close to the Canadian border, under the "liberalized" political system of banking, are able to secure loans which are much less favorable than those offered by the private money-lending agencies of western Canada. This explains why so many farmers have left these States; it also explains why hundreds of farmers secured all the money they could from the Federal farm loan system, abandoned their farms for the political bankers to take over, and went into Canada and started all over again.

STRIKING COMPARISON OF INFERIOR FARM FINANCE SERVICE

The following table, compiled from publications of the Federal Farm Loan Board, with respect to valuation of farm lands, rates of interest, and from authentic information as to land prices in Canada and interest on purchase price, giving a striking though unfavorable side light on the operation of the Federal land banks in assisting farmers to lower interest rates:

*Comparison of amounts of interest on land payments paid in certain border States with those paid in western Canada*

UNITED STATES

| | Farm valuations per 100 acres | First mortgage Farm Loan Board 5 per cent | Second mortgage to vendor 7 per cent | Interest, annual | Annual interest per acre |
|---|---|---|---|---|---|
| Maine | [1] $4,255 | $2,128 | $2,127 | $255 | $2.55 |
| New York | 4,573 | 2,287 | 2,286 | 274 | 2.74 |
| Illinois | 9,828 | 4,914 | 4,914 | 590 | 5.90 |
| North Dakota | 3,210 | 1,605 | 1,605 | 192 | 1.92 |
| Minnesota | 6,484 | 3,242 | 3,242 | 389 | 3.89 |
| Michigan | 4,988 | 2,994 | 2,994 | 359 | 3.59 |
| Montana | 1,816 | 931 | 930 | 112 | 1.12 |
| WESTERN PROVINCES (CANADA) [2] | | | | | |
| Manitoba | [3] $1,500 | $1,500 | | $120 | $1.20 |
| Saskatchewan | 1,250 | 1,250 | | 100 | 1.00 |
| Alberta | 1,000 | 1,000 | | 80 | .80 |

[1] Appendix No. 13, U. S. Report Federal Farm Loan Board, 1924. Average value of all farms on which loans have been made.

[2] Purchase price on 8 per cent basis, the maximum deferred payments are not infrequent on a 6 per cent basis.

[3] Approximate prices at which foreclosed lands are held for sale.

FEDERAL FARM LOAN EXACTS 92 CENTS AN ACRE ADDED TAX

From the above table it will be noted that if a farmer left Saskatchewan to buy 100 acres of land in Dakota he would have to take with him $1,605 in order to take advantage of the Farm Loan Board plan there, a sum that would enable him to-day to buy outright many a farm in the Province he was leaving. If he left without money and sought a farm in North Dakota he would have to give a first mortgage to the Federal Farm Loan Board for $1,605, and a second mortgage to the farmer he displaced, and the interest charges would be $1.92 per acre as compared with $1 per acre if he bought in Saskatchewan.

Nothing need be said as to repayment of principal further than to point out that migration to the United States would mean for the farmer the assumption of treble the amount of principal debt as well as treble the amount of annual interest charges. Higher farm-land taxation in the United States would practically absorb any gain from higher prices procurable there for agricultural products.

As there are a large number of farms in western Canada available at prices which will not at current interest rates require an annual interest charge of more than $1 per acre, the financial burden of the Canadian agriculturist is not nearly so great as that imposed upon the agriculturist in the United States.

GOVERNMENT LOAN AGENCIES HASTEN DAY OF LANDLORDISM AND TENANTISM, WITH ADVERSE CONDITIONS TO AGRICULTURE AND PERMANENT PROSPERITY OF A PEOPLE

Europe is nearly always cited by the devotee of political banking methods as the example after which one should pattern a paternalistic loan agency. This was said to have been the prime move that the United States Congress took when, in 1916, they passed the original Federal farm loan act. However, that act was so patched up as to look quite unfamiliar to the most radical of European thinkers, and failed to render to the farmer owners even the common American privileges of exercising control over the gigantic banking system which their borrowed money went to capitalize. In Europe mortgage security is not secondary to local taxes or to other taxes. The occupier or tenant, as the one utilizing the land, is responsible for the taxes, which are based upon rental value. Generally speaking, the land is not assessed. If taxes are not paid strictly within a limited period the personal and movable property of the occupier is seized. Generally, with the exception of certain parts of France, the land is owned by one person and cultivated by another. Hence taxes for current purposes and for schools are a liability of the tenant.

A large part of the so-called rural credit legislation as existing in Europe was designed to aid the landlords and did not in any respect lighten the burden upon the land tiller or tenant.

The report of the agricultural tribunal of investigation appointed by the British Government rendered this report on German loan agencies:

"In the first instances the German Landschaft was a means for meeting the credit requirements of the nobility. The restrictions have gradually been removed, first in favor of properties of intermediate size, and finally there were admitted to membership all rural properties of not less than 500 thalers in value, the yield of which was such as to insure the economic independence of the owner.

LIGHTENS BURDEN OF THE LANDLORD—INCREASES BURDEN OF ACTUAL TILLER OF THE SOIL

Thus we see how the actual tiller of the soil can not hope to achieve relief, whereas the landlord, who sits back and does not take part in the actual operation of the farm, harvests the fruit which freethinkers

allege would be bestowed upon the farmer. The latter, since tenancy displaced serfdom, has been required to pay in the form of rent the full rental value as determined by demand.

On this point, the agricultural tribunal further comments:

"As it is a mistake to suppose that any governmental measures in the last half century have brought into existence the cultivating and landowning peasantry of Denmark * * * so it is a mistake to suppose that it was ever 'created' by heroic measures in any earlier period. Wherever in Europe peasant proprietorship exists to-day as a large element in the agrarian system, it is but the persistence on the soil, though often in a greatly improved economic and legal position, of the class of cultivators who were settled upon it in the Middle Ages. And this is very clearly the case with Denmark."

If a farm becomes vacant in western Europe there is competition for its occupation and this competition determines the rental value. No matter how low the rate of interest the tiller of the soil is required to pay, the advantage is absorbed in what he agreed to pay as rent. What is paid as rent forms the security which the landlord pledges, together with the land itself, for mortgage loans which form in Europe, as will readily be seen, a much more desirable security than the mortgage in Canada where the land is directly assessable for local taxation.

Prior to the war, interest rates in Europe were lower than they are to-day, particularly in the case of mortgages.

WHOLESALE FORECLOSURE OF FARM MORTGAGES NOW BEING ENACTED BY THE FEDERAL FARM LOAN SYSTEM—THOUSANDS OF FARMERS FORCED OFF THEIR LANDS—HOMELESS AND WITHOUT MONEY, THESE FARMERS FACE A DARK FUTURE

Right now, as is well known, every one of the 12 district land banks is rigidly enforcing wholesale foreclosure of farm mortgages. The piper is indeed paying for his music, after the merry but brief period of political experimenting with banking, but the poor farmer, who entered into this unique system of credit, really pays the bill—not the politicians who manipulate it.

Mr. Xeno W. Putnam, of Harmonsburg, Pa., former secretary-treasurer of the Crawford County National Farm Loan Association, exhibited in the CONGRESSIONAL RECORD, page 4554, March 12, 1928, how these wholesale foreclosures were carried on under a system of extortion by the attorneys of a number of the land banks, who charge enormous commissions for firing the farmers off their land, it being contrary to the farm loan act for any official of a land bank or loan association to charge and accept commissions.

TITLE ATTORNEYS ARE FARM LOAN OFFICIALS

Now that their title attorneys are under fire, certain officials of the Federal farm loan system are endeavoring to side-step responsibility for the acts of these lawyers by the statement that they are "not officially connected with the system."

Let us ponder upon this. These title attorneys were appointed by the various district Federal land banks, usually upon recommendation of the national farm loan associations of the respective communities. These attorneys have passed upon the titles offered as security for more than 400,000 loans made to date; they have acted as legal representatives of the banks of the system in various ways. The Federal Farm Loan Board has authorized the issuance of bonds against the titles which these same attorneys have passed upon.

ACTED UPON ORDERS OF FARM LOAN BOARD

The title attorney, of which Mr. Putnam complains, has foreclosed Federal farm loan mortgages upon the official order of the Federal land bank, usually upon the advice and with the consent of the Farm Loan Board. In view of these facts, if the title attorney be "not officially connected with the system," and if he be not accountable to the provisions of the farm loan act, then there is no official anywhere who can be held responsible under that act.

EASY TO GET IN BUT HARD TO GET OUT

You may read herewith the startling story of how many farmers, in several States, thought they would go get themselves one of those cheap "at cost" farm loans, about which highly paid propagandists had pushed golden promises, to wit, "The mortgage that never comes due," or "The farm loan that pays itself off," etc. Yes; it was easy to get in; it usually is.

Well! These farmers got farm loans "at cost" all right! Some of them faced grim failure, in situations over which they had no control, which is about the most pitiable circumstance known to mortal man—to lose his home roof. In this hour of need, what did these farmers get? They got lawsuits "at cost" done to a nice brown color because the mortgage clauses which they had signed, in the belief they were entering a sort of cooperative heaven, provided that the attorney foreclosing their loans could charge extortionate commissions and fees.

Nevertheless, when these farmers entered the ranks, they were given to understand distinctly that they were getting into a system that permitted of no "commissions, fees, or extortionate charges whatsoever." They were surely made to believe this with all the alluring words glib-tongued artists could sling.

If this thing is permitted to continue, it will only provide another sad spectacle of the established fact that the mutual or alleged cooperative, improperly administered, is cheap to get into, but may be mighty expensive to get out of!

FORECLOSURE FORECASTED BY OFFICIAL OF THE FARM LOAN BUREAU'S OFFICE LONG AGO

The present wholesale foreclosure of farm-mortgage debts by farmer-owned, political-controlled land banks was forecast some time since by James B. Morman, economist of the Federal Farm Loan Bureau of the Treasury Department, who, writing in his popular book, Farm Credits in the United States and Canada, after discussing foreclosure proceedings, as carried on by the land banks, said:

"This is the prospective heritage of children of farmers who have long-term amortized mortgages on their farms."

IS FARM LOAN OF GOVERNMENT AGENCY A PANACEA OR PLAGUE?

That is the question Mr. Morman asks, and it is most illuminating, to say the least, to see how he answers the question, as the following extracts from his book will easily demonstrate:

"The best advice that can be given to farmers is to keep out of debt. The census of 1920 showed that 1,461,306 farm owners had mortgages on their farms; the number of mortgaged farms has undoubtedly greatly increased since.

"What are these debt-burdened farmers to do? To what extent would amortization of their mortgages aid them? Does this plan of repaying loans give farmers larger incomes by reducing the amount of interest they have to pay? If so, what has been this gain to them? To what extent has the amortization plan of paying off mortgages been adopted by money-lending agencies? And, lastly, what are the limitations of this method of paying off debts in protecting borrowers against foreclosure? These questions relate to the financial and social welfare of American farmers.

"By 'amortization' is meant the method of repaying a loan with interest by regular annual or semiannual installments covering a long period of time. An 'installment' includes interest and part of the principal. A borrower, therefore, pays off his debt a little at a time and pays interest only on the unpaid balance of the principal. The amount of an installment is determined by the rate of interest and the number of years for which a loan is granted.

"With a view of cutting down to some extent the amount of interest farmers would have to pay, Congress incorporated in the farm loan act, 1916, the amortization plan of repaying loans. The act provides that loans may run 5 to 40 years, at the option of the borrower. The direct benefit to a borrower in the interest he has to pay is shown in the following comparison of this method with a straight mortgage loan for the same amount, rate of interest, and period of loan:

| | |
|---|---|
| Comparison at end of 34 years: | |
| Under straight-loan plan— | |
| 34 principal payments of $60 each | $2,040.00 |
| Principal unpaid | 1,000.00 |
| | 3,040.00 |
| Under amortization plan— | |
| 34 installments, paying both interest and principal | 2,338.16 |
| Saving | 701.84 |

"During the 34 years that the amortized loan is being repaid, the total amount of money a borrower would pay back on a loan of $1,000 would be $2,338.16, of which $1,338.76 is interest and $1,000 principal. That is to say, a borrower pays in interest alone $338.16 more than the amount of his original debt of $1,000. Therefore the total toll exacted by interest out of the labor and capital of a farmer, if his loan should run the full 34 years, is nearly 134 per cent. The toll exacted by interest from the labor and capital of a farmer on a straight mortgage for 34 years would be 204 per cent. In either case the toll is enormous and a constant drain on a farmer's income.

ANNUAL PAYMENT ON AMORTIZED LOAN IS HEAVIEST

"The annual installment on an amortized loan is always greater than the interest payment on a straight loan. On a $1,000 loan the installment is $70 as compared with $60 paid as interest. This difference ($10) is applied in reducing the principal of a debt; with each succeeding year the amortizement on a debt is a little more until the loan is entirely paid.

"There is, however, a temporary disadvantage in the amortization of a loan because the differential amortizement is always an additional drain on a borrower's income. Neither the installment on an amortized loan nor the amount of interest on a straight mortgage changes during the loan period; for a small loan of $1,000 the difference is only $10; but on loans ranging from $10,000 to $50,000, the difference ranges from $100 to $500 a year, according to the size of the loan. The difference has to be provided every year by a debtor no matter how unfavorable the crop or livestock returns may happen to be from season to season.

LITTLE CONSOLATION TO THE FARMER

"It is not much consolation to a farmer to know that this difference is always the minimum amount applied on his mortgage toward its reduction if it becomes a burden for him to provide the amount which, if unpaid, may lead to the loss of his farm. Under any circumstances this additional amount is an extra drain on his income and possibly explains the inability of so many farmers to meet their installments regularly.

"It is evident from the foregoing that the amortization of farm mortgages is not a panacea for all the ills, actual and imaginary, which affect the welfare of the farmer.

GETTING INTO DEBT ECONOMICALLY?

"Among other things, it was expected that farmers borrowing under the Federal farm-loan system would not only get into debt on an economical basis but would even do so profitably. The principle is enunciated by authority of the Farm Loan Board, as follows:

"'The Federal farm loan act is a law the intention of which is to make it possible for the farmers to make money by borrowing money. Its intention is to place money within reach of the farmer on such terms as to convert the farm mortgage into a source of profit.'

REMARKABLE EXPECTATION OF POLITICAL BANKERS

These are very remarkable expectations, and the question is whether or not they have been realized. It would be rather unusual in the mortgage credit field to have a credit bring to the debtor an increase of income in the face of all the drains on income which have been shown to attach to borrowing money on farm mortgage. The intention may be good, but is it likely to be fulfilled?

CLAIMS BASED UPON MISCONCEPTION OF ECONOMICS

It is undoubtedly based on the provision of the farm loan act which requires that loans shall be for productive purposes. But is not this expectation of a profit from running into debt based upon failure to appreciate the fact that borrowing for productive purposes also means a corresponding burden of expenses, interest, and depreciation of capital equipment during the continuance of a loan?

It is not the difference paid as interest but the debt itself which is the real burden on a farmer. The debt must be paid either by amortization or in a lump sum. This burden, moreover, is intensified with the lapse of time because of capital depreciation, a factor seldom taken into consideration. For, long before 10 years have expired, many forms of capital equipment will have been partially or wholly worn out and the farmer will be no better off as a result of his borrowing unless he has been able to save and set aside annually sufficient to cover the value of depreciation.

On account of the precariousness of agriculture and the present difficulty of a farmer being able to save at all, he may be even worse off financially because he will still be owing nearly 87 per cent of his debt and also be under the necessity of replacing part of his capital equipment in order to continue effective farm operations. It is plain, therefore, that there are grave financial limitations attached to borrowing and repaying a loan under the amortization method so far as providing a farmer with the means of escaping the great burden and danger of debt itself is concerned.

The conclusion is borne out by the result of the operation of the Federal farm loan system. On March 27, 1923, six years had elapsed since the first loan was made under this system. To-day three clearly definite tendencies are noticeable: (1) Many borrowers have already increased their mortgage indebtedness by additional loans when the farm appraisements warranted such an increase; (2) many borrowers have been unable to pay the installments on their loans, and the Federal land banks are carrying a steadily increasing amount of delinquent payments; and (3) many farmers coming in as new borrowers are mortgaging their farms to pay off short-time or personal indebtedness incurred during the past few years as a result of unprofitable farm operations.

FEDERAL FARM LOAN SYSTEM HAS DARK FUTURE AHEAD

These tendencies are plainly discernible in general rural credit conditions throughout the United States, and they are corroborated in the case of thousands of loans made through the Federal farm loan system. They are not very promising for the future of agricultural development. The Secretary of Agriculture has already warned the country of the danger of too easy credit conditions. The danger is in our midst and has not been removed by the amortization of farm mortgage loans. In fact, it is likely that this method has increased rather than decreased the danger. Thousands of farmers have already become delinquent in their installments under the easiest method of repaying farm mortgages yet devised, so that it is evident that interest-bearing debt is one of the greatest dangers to future improvement in agricultural conditions.

FARMERS' DEBTS NOT PROFITABLE

That farmers' debts, in many cases at least, have not proven profitable is evident from the fact that the amortization of loans has not prevented delinquencies in the payment of installments; it is now evident that this method of repaying loans does not prevent the foreclosure of farms. Evidently the amortization of loans does not remove the greatest danger of farm-mortgage debt.

HEARTLESSNESS OF MONEY SHARKS IS NOT UNKNOWN TO MANIPULATORS OF FEDERAL FARM LOAN SYSTEM

Neither the amortization method of repaying loans nor the beneficent intention of Congress has been able to save farmers from the fear of foreclosure. The policy which seems to have animated friend and foe alike is to fleece the farmer for all he is worth. Large numbers of farms have been sold under the sheriff's hammer in behalf of Federal and joint-stock land banks as mortgagees. The heartlessness of money sharks is not unknown to the Federal farm loan system, for neither the farmer who fails to pay an installment on his loan nor his local association which has indorsed his mortgage can ward off the foreclosure proceedings, as this policy is being mercilessly carried out by both kinds of land banks.

SYSTEM HAS NOT RENDERED RELIEF ANTICIPATED

Taking a broad view of agricultural conditions as they have developed during the past few years, it is evident that farm-mortgage credit has not brought such great financial relief to farmers as was anticipated. While some benefits have materialized as a result of the operation of the Federal loan system, the easier opportunities which farmers now have of plunging deeper into debt are increasing their financial difficulties and dangers. Debt can only be paid by farmers getting larger incomes.

Of this be certain: Credit can not enslave a farmer to debt and free him from its shackles at the same time!

HOW FEDERAL FARM LOAN SHACKLES THE FARMER TO DEBT

That this danger is still imminent is evident from a glance at the following table, prepared primarily for the purpose of showing the regular drain on a farmer's income that occurs on long-time amortized loans and the enormous total toll of interest which is taken during the life of a loan:

*Amount of debt, total paid as interest, and semiannual installments on amortized loans*

| Amount of debt | Amount paid as interest on debt | | Semiannual installments | |
|---|---|---|---|---|
| | At 5½ per cent | At 6 per cent | At 5½ per cent | At 6 per cent |
| $1,000 | $1,242.47 | $1,304.23 | $32.50 | $35.00 |
| $2,000 | 2,484.94 | 2,608.35 | 65.00 | 70.00 |
| $3,000 | 3,727.41 | 3,912.56 | 97.50 | 105.00 |
| $4,000 | 4,969.88 | 5,216.71 | 130.00 | 140.00 |
| $5,000 | 6,212.35 | 6,520.90 | 162.50 | 175.00 |
| $6,000 | 7,454.82 | 7,825.09 | 195.00 | 210.00 |
| $7,000 | 8,697.29 | 9,129.27 | 227.50 | 245.00 |
| $8,000 | 9,939.76 | 10,433.50 | 260.00 | 280.00 |
| $9,000 | 11,182.23 | 11,737.63 | 292.50 | 315.00 |
| $10,000 | 12,424.70 | 13,041.86 | 325.00 | 350.00 |
| $15,000 | 18,636.18 | 19,620.93 | 487.50 | 524.57 |
| $20,000 | 24,848.16 | 26,162.26 | 650.00 | 699.42 |
| $25,000 | 31,060.20 | 32,702.00 | 812.50 | 874.23 |

A study of this table will convince the most skeptical that amortization of farm mortgages is not a panacea for the burden of debt.

PAYMENTS BECOME REAL BURDEN TO FARMER

Two things are especially noticeable: (1) That in each case a borrower pays much more as interest than the amount of the debt itself; and (2) that the drain on a borrower's income through the payment of an installment every six months, while not heavy on small loans, becomes a real burden when the debt is large.

From this drain on income there is no possible relief. Though it is lighter in the end than interest on straight mortgage because of the gradual repayment of the debt itself by amortization, nevertheless the drain on a farmer's income is both constant and enormous, which often deprives his family of the necessities of life, keeps him on the rack of perpetual toil and worry, and finally involves him in bankruptcy or foreclosure proceedings. From these possibilities—yea, even probabilities and actualities—long-time amortization of farm mortgage loans does not protect farmers heavily burdened with debt.

DANGERS OF DEBT ARE NOT REMOVED BY POLITICAL BANKING SYSTEM

The dangers attached to debt, then, are not removed by the amortization plan of repaying farm mortgages. Delinquencies in the payment of installments occur the same as in the case of the payment of interest on straight mortgage loans. In fact, for the first few years the danger of delinquencies in amortization payments is even greater than under straight mortgages because of the added increment of debt payment which is included in each installment of an amortized loan.

FARMER NOT RELIEVED OF DANGER OF FORECLOSURE

Nor has the farmer been relieved of the danger of foreclosure, for the nonpayment of installments has led to that unhappy event. Even if a farmer is able to pay his installment regularly, without making any additional payment on the reduction of his debt, the deterioration of

capital equipment, the gradual loss of soil fertility, and the approach of old age which lowers a borrower's efficiency—these and other factors have a tendency to perpetuate a mortgage indefinitely, as it has done in Germany for many generations, and to bind farmer debtors with shackles which have been made easy to forget but exceedingly difficult to remove. This is the prospective heritage of the children of farmers who have long-time amortized mortgages on their farms.

"THE MORTGAGE THAT NEVER COMES DUE!"

How many of the readers of Mr. Morman's reliable work on farm credit will think of that political appointee of the Federal Farm Loan Bureau who invented the heavenly slogan, "The mortgage that never comes due," or that other master thinker who first coined the phrase, "The mortgage that extinguishes itself," and used them widely in getting thousands of farmers into debt "the easy way"?

HOW THE THEORY WORKS OUT IN RUSSIA

By Elias Tobenkin

(NOTE.—Now that the United States has copied from Russia a method of the Government taking over the 12 district Federal land banks of the Federal farm-loan system, after the thousands of farmers had paid in full the money with which to capitalize these banks, and are now assuming all the liability which safeguards them as stable financial institutions—contrary to the fundamental American principle of safeguarding the interests of the property owner—it should be of wide interest to know how the Russians are making a "go" (?) of their theories, after which the present Federal farm-loan system in our own country is patterned and from whose foreign leaders the present political administrators of the Federal farm-loan system received most of the suggestions to Russianize this sovietized institution.)

SOUNDS LIKE A REPORT OF THE FARM LOAN BOARD

Danton, sentenced to the guillotine with the connivance, in part at any rate, of his friend and rival Robespierre, remarked cynically: "I shall hold the door of the grave open for him; in three months we shall meet again." Trotzki, driven into exile by his erstwhile codictator in the political bureau and other Communist councils, hurled this defi: "To-day's victory of Stalin is but the forerunner of his debacle; his downfall is inevitable."

A STRIKING PARALLEL—HEADED FOR POLITICAL BANKRUPTCY

The Bolshevist volcano, covering one-sixth of the earth's surface, once more is active. His banishment has no more eliminated Trotzki and the "Trotski idea" from Russian politics than death has eliminated the influence of Lenin and the principles he laid down. But it does serve to bring Stalin into sharp relief. With Trotski, in effect, a prisoner in a remote Asiatic Province, and the members of the opposition group he headed jailed or scattered, Stalin is brought face to face with tasks and problems which may either make him one of the great statesmen of modern times or else, as Trotski predicted, bring about his political bankruptcy.

RUSSIA, LIKE UNITED STATES, HAS BATTLE BETWEEN POLITICIANS AND PROPERTY OWNERS

In the persons of these two soviet antagonists two civilizations are struggling for the molding of Russia's future.

Trotski wants Russia made over in accord with the civilization of the Western World. Just as Peter the Great 200 years earlier forced his noblemen to discard their long Russian cloaks in favor of short German jackets and to shave their beards, Trotski would recut every form of national economy in Russia after the standards of western Europe and America. He envisages an industrial Russia, dominated by her cities, her factories, and her workmen. He would pattern the soviet state after the dictums of international Marxism.

Stalin stands both head and feet in Byzantium. A revolutionary of no less caliber than Trotski, he is less of an internationalist. Exiled under the Czar as often as Trotski had been, his banishments never took him abroad for long.

Stalin never completely loses sight of the deep-seated Asiatic roots of the Slav empire. He sees Russia's future, her near future at any rate, as cast primarily in the likeness of her agricultural population, her 90,000,000 peasants. In principle he is no less for a "socialist Russia" than Trotski is. His socialism, however, must be homespun, simple, even vulgarized, if necessary. It must be suitable to the mental acumen of the Russian peasant and flexible enough to blend with the primitive structure of the Russian village.

SOVIETIZING PROCESS

Is the régime sponsored by Stalin bringing to pass in the Soviet Union the Socialist order which the revolution of November, 1917, promised to the Russian workers?

This question has been repeatedly asked by Trotski since the death of Lenin and the gradual ascendancy of Stalin to the absolute dictatorship of the Communist Party. First by innuendo, and then openly, he charged the Stalin régime with not giving sufficient support to the Soviet industrialization program and thus encouraging the ascendancy of the peasantry over the working class.

ARROGANT BUREAUCRATS RULE

He accused Stalin of having permitted the rise of an oppressive and arrogant official and industrial bureaucracy. He assailed vehemently the stifling of the free expressions of opinions within the Communist Party and the moblike hooting down of minorities, even though the men holding such minority opinions were noted revolutionists whose loyalty could never come into question.

Again and again the Communist Party directed Trotski to cease his attacks. On such occasions, according to a leading soviet spokesman, Trotski "demonstrated with his silence." In fact, Trotski's silence on occasions stirred up greater turmoil than his speeches would have done.

The specter of civil war has been raised by both sides in the final phase of the Trotski-Stalin controversy.

IS THIS A M'NARY-HAUGEN PLAN?—ERECTING BARRIERS BETWEEN RURAL PRODUCERS AND CITY CONSUMERS

The issue which in recent months has convulsed the Soviet Government and which Stalin is called upon to face is the cleavage between town and country, between urban and rural population in Russia. The organized workers in the cities have to a considerable degree been drawn into the government's state. The factories have been nationalized. The government has a monopoly of foreign trade and transport; banks and credits are concentrated in its hands; dwellings have been socialized and food is bought and sold on a cooperative basis. The collectivist beginnings in agriculture are not nearly as impressive.

FIRST THE GOVERNMENT TAKES OVER THE FARMER'S BANKS, THEN IT NATIONALIZES HIS LAND

Although the land has been nationalized, the peasant does not feel that he has ceased to be its owner. There is no shortage of land in the Soviet Union; the government can not take it from him and give it to anyone else. The government's experiments in communal farming, begun early in the soviet experiment, have not been particularly successful. Of a total agricultural population of nearly 100,000,000, only about a million and a half are engaged in collective farming. The rest are farming on an individualist, private basis.

THE PEASANT OWNS HIS PLOW!

The peasant owns his plow. If he has a horse or a cow, they are his private property. After he has paid his share of taxes to the government, the products of his labor are his to do with as he pleases. He sells them in the open market. He buys from the government cooperative store if the government store offers him better goods or lower prices. Otherwise he buys from the private merchant, as he did before the revolution.

GOVERNMENT MEDDLING CURTAILS PRODUCTION

In the early stages of the soviet régime the peasant was forbidden to hire labor or to sublet his land. The Soviet Government after a time found that this curtailed production too heavily and the law was changed. The peasant to-day can hire workmen or sublet his land. This establishes virtually three different categories of peasants in the village—the poor peasant, the middle-class peasant, and the rich peasant.

Trotski and the members of his opposition group see in this development a danger to the soviet's experiment in socialism. All the gains that the government's socialist program makes among city workers, they assert, are to a large extent counteracted by the development of a new bourgeoisie in the villages and by the "capitalistic" trend in agriculture.

Stalin and the members of the Soviet Government do not underestimate the threat to socialism presented by the conservatism of Russia's rural masses.

The peasant was no less of a problem in Lenin's day. Shortly before his death Lenin counseled: "Ten or twenty years of correct mutual relations between the proletariat and the peasantry and we will be assured of a permanent victory." Stalin believes that such "correct mutual relations" with the peasantry can be best attained by conciliation, rather than by methods that are aggressive and hostile.

URBAN AND RURAL DIVISION

The chief factor over which the urban and rural populations divide is the sluggish tempo of industry. The peasant pays twice, even three times as much, for manufactured articles as he did prior to the World War. Even at such exorbitant prices these articles are extremely scarce. It was shown recently that 70 per cent of all the manufactured products in the Soviet Union are consumed in the cities and only 30 per cent go to the 90,000,000 peasants.

The reasons for this disproportion and for the sluggish tempo of all manufacturing are well known—old equipment and poor technique in the factories; high overhead expenses and defective distribution; high wages and wasteful use of raw materials. Finally, the most crucial reason of all—want of capital.

PRIVATE CAPITAL AND INITIATIVE SUCCEEDS EVEN IN RUSSIA OVER SUPER-SUBSIDIZED PLANS

Unless, Trotski warns, the soviet's experiments in socialism can be made to pay they will fail. "It is the basic law of history," he says, "that in the end that order of society prevails which assures to mankind a higher standard of existence." So far, he finds, "capitalism is producing goods of better quality at much smaller cost than socialism is producing them." He not only urges the intensification of the industrial processes in Russia, he even calls for the establishment by the soviet of what might be called "superindustrialism."

"We believe," he affirms, "that industrialization is the foundation of socialism."

GOVERNMENT STEPS IN AND "LIVENS UP" FARMING BUSINESS

As set down in the resolution adopted by the fifteenth congress of the communists, Stalin's policy is one of continued moderation. There are to be no startling innovations in the internal conduct of affairs. Existing institutions will be strengthened to cope with irregularities. The peasant cooperatives will be "livened up" and made more attractive to the rural buyers. The experiments in collectivist or communal farming, going on in various parts of the country, will receive government aid and will be otherwise bolstered up.

TRY TO ERADICATE BUREAUCRACY AND SOVIET BANK OFFICIALS

Drastic measures will be applied to eradicate one soviet evil—bureaucracy. Government officials, bank employees, factory superintendents—in brief, all sorts of civil-service personnel will be placed under a strict disciplinary régime. Slovenliness of every kind will be made a social crime. Grafting, whether in money, time, or materials, inattention to complaints and an air of superiority toward the public will entail not only dismissal from the job but prison sentences.

[Extract from Good Business Magazine]

RUSSIA'S OUTLAW GOLD *v.* AMERICA'S RUSSIANIZED LAND BANKS

Twenty casks of Russian gold now repose in the vaults of two of New York's largest commercial banks—$5,201,000 worth of precious gold. Why is this? Simply because the United States Treasury Department bureaucrats refused to permit the United States mint to touch gold that came from Soviet Russia. "Unclean, unclean! Touch not!" was the word handed out by A. W. Mellon's staff.

MELLON SHOULD RECOGNIZE RUSSIA!

This gold was sent over here by the Russian Soviet Government; but our Government does not recognize the soviet régime—we wonder why. The same Treasury Department, under the guiding hand of Mr. Mellon, whose political-campaign collections in the Pepper contest was "as pure as a church collection," fosters—in fact, dominates—a Sovietized method of financing farmers through the presently constituted Russianized 12 district Federal land banks, which Congress, upon the suggestion of Mr. Mellon and his hirelings, the Farm Loan Board, requested be taken away from their rightful owners, the thousands of farmer stockholders, and turned over to Mr. Mellon and his gang to plunder and manipulate as they might wish—contrary to the American principle of property ownership upon which the Mellon millions were earned. So we repeat, a politician who could be partner in putting such a trick over on the American farmers, actually stealing from them their land-bank system, depriving them of every right to manage that which they now own; such a type politician should have not the slightest compunction in recognition of his close cousin, the Russian Soviet, and should welcome as much gold as the soviet system can gather and send to this country.

WHAT DOES MELLON FEAR?

Is it because the soviets are now letting go of the things that they took away from their rightful owners—the people of Russia—and, having made almost as bitter a failure of government operation of other people's property as Mellon's political appointees have already made of the 12 district Federal land banks—is this the reason Mr. Mellon does not wish to handle any of the Russian gold? Does he somehow fear that the contaminating influence of Soviet gold might inject the germ of independence and freedom into this country, causing politicians who now tightly hang onto the farmer's property to wish to let go and permit the rightful owners to manage their own business?

You will recall, "Andy" did return to "Whispering" Bill Hays those Sinclair bonds. He must have got the habit of handing things back and played the same trick on the Russians! Thousands of farmers whose land-bank stock "Andy" also "chooses to hold as his own" now hope that he will carry this "handing-back" habit to the extent of returning to them their property!

Mr. BLEASE. It does seem to me that this investigation should not have been ordered through Mr. Meyer and his associates. It does seem to me that the Committee on Banking and Currency—and I do not know who they all are, and I do not care—have dodged, either from political cowardice or from pressure from Andrew W. Mellon's office, their duty to report my resolution either favorably or unfavorably to the Senate—I do not care which—because if they send it back with an unfavorable report, if I can get a quorum of the Senate to sit and listen to me for 15 minutes, I will convince them that this investigation should be made, and will reverse their report. I have put into the RECORD in the last two or three weeks enough on this matter to convince anybody in the world that this investigation should have been made.

A resolution similar to mine was offered by the Senator from Texas [Mr. MAYFIELD], and it was reported back to the Senate within a short time, and was unanimously adopted, and a committee was to be appointed to make an investigation of a similar institution in the State of Texas. Yet, when my resolution comes along, Mr. Mellon—and I hope any Senator who is interested in this matter will take pains to-morrow morning to read what Mr. Putnam says about Mr. Andrew W. Mellon, and what he proves about him from the official record as offered to be published here.

The Senator from North Dakota [Mr. NYE], who made some investigation of this matter, has in his hands a similar report made by these parties in reference to this matter, that I have asked and obtained permission to have printed in the RECORD.

I ask Senators in this body to take just a few minutes of their time to glance over these reports, and ask themselves the question whether or not I have asked for something that should be granted, or whether it is a frivolous complaint made by some farmers in South Carolina. I am satisfied that they will reach the conclusion that this committee, instead of bowing to the whip of Andrew Mellon, this ex-distiller and ex-liquor dealer, who holds the power to control the money of this country is his hands, should ask themselves the question whether they should bow to that lash, or whether they should come here like men and give me a report upon this resolution, that the people of my State might know if there is robbery and thievery going on in this bank as charged, or if they should have confidence in it, and continue to deal with it and with those who are in charge of it.

Mr. President, Mr. Mellon knows that the ex-assistant superintendent of the Atlanta Penitentiary who is now in charge of that bank, without any banking experience, will be put in the penitentiary himself, but as one of his henchmen, doing his dirty political work, this committee shields him, and does not allow a report to come here, but sends Meyer, a man not so long ago appointed, to help conceal this thievery and this rascality, to help Mellon with it, and make him the man to investigate whether or not there is stealing going on at which he is conniving—did you ever hear of such a monstrous proposition, appointing one of the accused thieves himself to make the investigation? I am not indulging in wild talk. Here is the proof to show the thievery going on, and how the farmers are being robbed. Yet a Senate committee, under the lash of a boss, refuses to bring a report here and let the whole Senate pass on this matter in a fair and honorable manner.

I dislike to load down the RECORD here with this proof, but I am denied an investigation. I have no other source by which to reach the people, and I shall continue to make out my case and let the people be the jury. No thief has a good opinion of the law when the halter begins to draw. Mellon, Arnold, Meyer, et al.

FARM LOAN RELIEF

Mr. BLEASE. Mr. President, I ask to have printed in the RECORD a report to the American Farm Bureau Federation in four sections, by Gertrude Mathews Shelby, specialist in cooperative credit.

The PRESIDING OFFICER. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

FARM LOAN REPORT

I

FOREWORD

Three hundred and fifty thousand farmers own the so-called Federal land banks, whose joint assets of $1,200,000,000 constitutes one of the dozen billion-dollar enterprises in the United States. All others are subject to control by their stockholders. No other besides the farmers' is compelled to permit political appointees to run its business and manage its property.

It appears that after 10 years' operation, in protection of actual property rights of present stockholders and to assure future service of loans at lower cost, a review of what has been done both for and to the farmer to date is essential, to the end that pending and future legislation may intelligently be approved or condemned. Guaranties under which farmers purchased stock have been revoked. The Farm Bureau Federation is already on record with resolutions demanding the restoration of stockholders' rights—the right to protect their property and the vast credit machine established to give them untrammeled access

to the money markets of the world. The present review of past and present situations must necessarily begin with consideration of—

THE PURPOSES OF THE FARM LOAN SYSTEM

1. To lower interest. Excessive interest rates and the increasing national mortgage indebtedness caused three Presidents to recommend that farmers' credit needs be met by the establishment of some system by and through which they could help themselves independently of existing agencies. It was not desirable that farmers should be offered governmental crutches, nor that political appointees should fatten on the farmers' institutions. Therefore, cooperative banking was extensively studied, and what purported to be an Americanized form adopted, guaranteeing farmers the right to pool their assets, issue bonds, and by economies effected in the money market and distribution, as well as elimination of unnecessary financial middlemen, to lower their interest as far as possible. No limitation in reduction was set. The law does not state that the banks are supposed to lower interest only to the point where the farm loan rate will regulate that charged by other agencies in the field yet make it possible for them still to continue making profit. The basic construction of this point, that farmers shall lower their own rates as far as the economies and earnings of their own banks warrant, is of utmost importance to the future. Successive farm loan commissioners have held that only a regulatory effect on the interest rate was contemplated by the act.

2. To suit the terms of credit to agriculture. Short term loans, with bonuses, commissions, and frequent renewals cost farmers vast sums annually. Repayment of long-term loans (33 years) on the installment plan, without renewals or other fees, was provided.

3. To provide farmers with their own self-controlled means of financing themselves independently and cooperatively. Local farm-loan associations, the cooperative corner stone of the system, cast the votes of stockholders for directors of the district Federal land bank. Farmers were required to furnish all the capital of the system and guaranteed the right to elect six out of nine directors on each land bank's board. The Government reserved the right to appoint a minority of three directors (to counsel fiscal policy), but governmental control was deliberately avoided and outside capital barred precisely so that no outside influence might ever interfere with agriculture getting the money that it requires and the credit it deserves.

Control over that most important of all functions, sale of the bonds (which convert farm mortgages into an inviting form of security suitable to the investment market), was therefore vested in the boards of the 12 land banks, whose full majority of directors was to be elected by stockholders. Those boards are empowered to issue bonds when they see fit, sell them as they see fit; in short, build and operate their own financial machine. To assure the attractiveness of the bond product, tax exemption was granted farm-loan securities.

BRIEF CAPITULATION OF FARM LOAN STRUCTURE

Ten farmers are requisite to form a farm loan association. The law fixes no maximum in membership or number of associations. There are about 4,600 to-day. Despite the law, the Federal Farm Loan Board has apparently elected a policy which discourages the formation of more associations. Farmers buy stock to 5 per cent of their loans.

Twelve Federal land banks. The original set-up of these banks called for a board of nine directors for each—six elected by stockholders and three appointed by the Federal Farm Loan Board.

One vote is cast for each 20 shares. These shares are not held by farmers but by the association.

The present set-up calls for a board of seven directors—three elected by stockholders.

Four appointed by the Farm Loan Board. The fourth man holding the balance of power is "selected" from three nominated by the associations. This arrangement was improperly interpreted as a "50–50" division of power between political appointees and stockholders. Actually it has proved a disastrous camouflage, a fraud. Presidents and other officers of the banks have "offered themselves" to stockholders as candidates, invariably receiving the appointments from the Federal Farm Loan Board. For 10 years most of the "temporary" officers of the land banks have remained in power.

Federal Farm Loan Board: Originally of five members, now increased to seven. Its functions: To "administer" or "supervise" the system. Actually it manages the banks through appointed directors, the majority of the bank boards. It controls more than 600 field employees, appraisers, assistant appraisers, registrars, examiners of land banks and examiners of farm-loan associations. The complete number of these employees and land-bank employees appears nowhere in the Federal Farm Loan Board report. Civil service does not govern appointments. Therefore the entire list of places, more than 1,500, must be regarded as subject to political influence, or patronage. The Federal board must approve all bond transactions. Although not empowered to do so, from the outset until 1923 the farm-loan commissioner actually made all arrangements.

Several remaining important parts of the farm-loan machine are:

The fiscal agent receiving $25,000 a year from the Federal and intermediate banks for arranging the terms and conditions and houses through which bonds shall be sold. This agent is Charles E. Lobdell, formerly farm-loan commissioner, therefore a political appointee, who indorsed the appointment of most of the appointed land-bank presidents and directors. He was in turn appointed by them fiscal agent at an advance in salary from $10,000 to $25,000. He sells hundreds of millions of securities, and uses a revolving fund of farmers' money in resale operations on the stock market.

Several branch land banks, one in Lexington, Ky. Louisville, close by, has the district land bank.

The Spokane commission, the thirteenth body of the Federal land-bank system, handling estimated assets of the district land bank for Oregon, Washington, Idaho, and Montana, worth between eight and ten millions. This commission is not authorized by the law, but was created by the 12 banks to handle the acquired lands of the Spokane banks. No reports of its independent activities for two years is available, although the 11 other banks have given help from funds otherwise available for dividends for a term of years. Nothing is known concerning the emoluments of the staffs or overhead of the branch banks nor of the Spokane commission.

PERTINENT FACTS TO AID IN COMPREHENDING HISTORY, PRESENT SITUATION, AND LEGISLATION

1. Farmers now own fifty-nine millions' worth of stock. Eight million original stock owned by the Government has been retired; $800,000 remaining can not by the law be adversely affected if stockholders assume control.

2. Behind bonds for $1,200,000,000 stockholders have pledged good farm lands worth twice or three times that amount. Every bank is ultimately responsible for losses of any other. Before bondholders can lose even their profit, stockholders will lose their stock, an amount equal to the stock and the accumulations of all banks. Bondholders can not be adversely affected if stockholders control. No outside interest will suffer.

3. The issue and sale of bonds by the banks and the fiscal agent has declined steadily.

Two hundred and twenty-five millions (round numbers) were sold in 1923.

One hundred and seventy-five millions (round numbers) were sold in 1924.

One hundred and twenty-five millions (round numbers) were sold in 1925.

(Unaccountable delay of issue of Farm Loan Board report makes showing for 1926 unavailable.)

That the market will absorb more securities is certain because the Treasury has disposed of all but four millions of its holdings of these bonds, originally two hundred millions, selling close to one hundred millions in these very years cited.

4. Farmers' demands for funds, approved applications, have been denied in this period. The law anticipated a method of continuous sale of these bonds now issued only periodically.

5. Land banks are not really banks at all, but mortgage concerns. They accept no deposits. They have no demand obligations.

6. Administration of this system has lowered the interest rates on the average between 1½ and 2 per cent, and provided credit on terms suitable to agriculture.

CERTAIN PERTINENT QUESTIONS AND ANSWERS

1. Has this monumental farmer organization satisfactorily fulfilled the principal purpose for which it was organized?

Without cheapening its considerable achievements it can not be said fully to have met its obligations to its farmer-owners nor to agriculture by its mere size, its present reduction of interest, nor merely suiting the terms of credit to farming. Neither does its regulatory effect, which has been roughly estimated to save farmers fifty millions a year, finish the picture

When agriculture, through farmer stockholders, is in independent control of the entire system; when stockholders elect the majority of directors of land banks who should themselves be stockholders; when these stockholders determine the issue and sale of bonds and direct the terms upon which they are sold; when only the real absorptive power of the market of these gilt-edged investments shall limit their issue and sale; and when the interest rate shall actually be lowered as fast as the actual cost of the money and economical conduct of the system shall permit—then this organization will be fulfilling its full purposes.

2. How does the interest rate of our system compare with that of other countries?

It now averages 5½ per cent, the highest in 22 countries. (See Exhibit A, attached.)

3. Does the present system of Federal control through a majority of political appointees guarantee or provide greater advantages, better service, or greater efficiency to agriculture than control by stockholders in their own interest?

By no means disparaging the work, excellent of its type, that has gone into the development of the farm-loan system, it appears that the continued control of this system of political appointees is not likely to provide:

(a) Increased volume of loans at lower interest.

(b) An increased degree of self-government and self-help to farmers.

(c) Real control of the means of access to the money market which constitutes actual independence to the farming industry.

On the contrary, in the light of other sections of this report it would appear that continued control through political appointees has not been so successful as the mere volume of loans and reduction of interest might lead one to suppose. Conditions obtaining in certain land-bank districts, the glossing over of political abuses and even outright defalcation without warranted investigation and prosecution if real facts were ascertained, slowness of service, arbitrary allotment of funds to lend, and many other conditions have given rise to a large volume of repeated complaints. It would even appear dangerous not only to stockholders but to citizens throughout the country, since everyone lives in some land-bank district, to permit the continuance of management of this vast lending power by political employees.

Please consider the above in reviewing the history which follows.

II

INTERPRETATION OF SIGNIFICANT HISTORY FROM THE STANDPOINT OF STOCKHOLDERS' INTERESTS

The farm loan act was passed in 1916 only after bitter and prolonged opposition; by (a) the Farm Mortgage Bankers' Association; (b) the American Bankers' Association; (c) certain high financiers, who held that this remunerative field of private business (and private profit) should never have been invaded by the Government or cooperative pools having Federal sanction plus tax exemption. Because of the pressure of this opinion and possible failure of farmers to take advantage of the plan, the private, profit-making system of joint-stock land banks was authorized, and tax exemption granted their securities. Cooperatives the world round are not taxed because they are in the nature of public services. To establish a competing system of banks operating for profit and to privilege joint-stock securities by tax exemption appears now to men of both Houses in Congress unjustifiable. For farmers who did not desire to go into a cooperative system or wanted loans of size exceeding the loan limit, originally $10,000, abundant private-loan facilities already existed. As the effect of operation of the Federal land banks was immediately to regulate the rates of all farm-loan agencies, no hardship would have been worked on the more prosperous farmers not desiring cooperative liabilities, had the joint-stock banks never been created.

Organization of the Federal banks, and the network of farm-loan associations, from the standpoint of a national utility, was brilliant. From the standpoint of cooperation, it was bad. All healthy cooperatives grow from the bottom up. This was top-down extension. Farmers were never sufficiently instructed in the fact that this was their own system—not the Government's. They were not compelled to take their own initiative. They were advised against making a stockholder the secretary—the key position. Instead of holding elections as soon as the requirements of the law were met, in eight banks within the year the Federal board actually recommended an amendment which, in an indirect way, nullified the will of the law and was the beginning of the permanent political control of these banks.

Condemning "banks controlled by borrowers," the amendment provided that so long as the Treasury should hold any of the two hundred millions of bonds—purchased to keep them out of the way of Liberties—the "temporary" boards should continue to manage the banks.

This amendment, passed in 1918, has been heartily condemned and was clearly unconstitutional.

In the same period a contract was made with part of the "Morgan group" of investment houses, which formed a primary syndicate to distribute and sell farm-loan bonds. Without wholly discounting the alleged patriotic reasons given by members of this banking group for undertaking this sale, it must nevertheless be pointed out that they secured:

(a) Exclusive sale of these bonds for themselves and the secondary syndicate they organized of investment houses in other cities; and that they have maintained these exclusive arrangements over the sale of $1,200,000,000 worth to date.

(b) That they were in position to advise against the continuous offerings of securities contemplated by framers of the law, and recommend periodic offerings of the amounts which they deemed reasonable at such times as they thought it advisable that investors should buy farm-loan securities It has been testified at hearings by members of the early boards that this help was acceptable to the Federal Board. On the resignation of the first commissioner, G. W. Norris, a Philadelphia banker, Judge Lobdell was appointed in his stead. At later hearings he admitted that he had never sold a bond before coming to the Farm Loan Board.

Senator Robert Owen, a leading Democrat, denounced, in a Democratic administration, this method of awarding the bond sale. Owen had been chairman of the Senate Banking and Currency Committee which recommended this act.

W. F. Flannagan, first secretary of the Farm Loan Board, a liberal banker, convinced of the benefits of cooperative credit, repeatedly pointed out to the board various matters in which the board evaded or refrained from fulfilling the provisions of the act. His anxiety covered two main points. He agreed with Owen about the bond sale. He believed farmer stockholders in their associations had been denied justice concerning the right to control and manage their own banks and bond sale. McAdoo gave down an able opinion in support of this latter view. Finding himself out of harmony with the board, Flannagan resigned.

THE RIGHT OF STOCKHOLDERS TO FEDERATE AND SUPPORT THEIR FEDERATION FROM ASSOCIATIONS' FUNDS

Flannagan attempted to inform stockholders of their rights and organize them into a National Union of Farm Loan Associations, each association contributing $10 toward the support of activities eventually to secure restoration of stockholders' control. With his inside knowledge of affairs he was an ideal secretary.

The Federal board spared no effort to break up this National Union. The board demanded that any sum subscribed from funds of the association be promptly restored, in some cases insisting and threatening prosecution under the penal clauses of the act. Nevertheless, unpaid but faithful, Flannagan continued his efforts for farmer stockholders until his death.

THE FIRST MAJOR ATTEMPT BY COMPETING FARM MORTGAGE INTERESTS TO KILL THE SYSTEM

Suit attacking the constitutionality of the farm loan act was brought in Kansas City in 1920. The Supreme Court upheld the act, giving decision in 1921. During this period when agriculture was suffering acute distress the Farm Loan Board shut up shop. Competitors got all this emergency business. During 1921 applications for $296,859,381 were approved. Loans for $73,230,626 were granted by the banks—only 25 per cent of what was needed.

SUIT BY AN ASSOCIATION TO COMPEL ELECTIONS

The Brentwood Farm Loan Association, Elwood Gates, president, later Flannagan's successor as head of the National Union of Associations, sued in the Supreme Court of the District of Columbia to compel the Farm Loan Board to take the necessary steps to enable associations to elect directors in the Berkeley Federal Land Bank. Lester C. Manson entered the lists in defense of farmers at this juncture. He was special investigator in a brilliant investigation of income-tax cases in 1926.

ATTEMPTS TO DESTROY ASSOCIATIONS AND INSTITUTE DIRECT AGENTS

This suit was rendered more imperative by successive bills, to which it appears the Federal Farm Loan Board gave support, which proposed that loans should be made directly through appointed agents, and providing for voluntary dissolution of associations.

Representatives of the board and banks argued that efficiency would be increased and service bettered; that the association was cumbersome, and its secretary often obdurate concerning desires of the banks or the Federal board.

The associations retorted that direct agents would make loans which did not bear the indorsement of any association; that such indorsement, after appraisal of lands by a local committee, was an essential factor in the security behind the bonds. That therefore actual security would be lessened or destroyed. That direct agents upon whom there would be no local check to safeguard the character and distribution of loans, and who would naturally be biddable by the appointive power, would soon constitute an ideal political body. Under these circumstances "any stockholder who did not ask for the voluntary dissolution of his farm-loan association should have his head examined." (Manson.)

The cooperative democratic control of the system would be destroyed forever; chief purpose of the law, self-help, would be defeated; and a situation inimical both to farmers and good government would almost inevitably result. This argument defeated successive bills until 1926. (See Legislation, Section IV.)

FARM LOAN BOARD ADMITS DEFEAT AND PROPOSES COMPROMISE

Before the Brentwood Association's case came to trial the Federal board, admitting defeat, and that some sort of representation must be afforded stockholders, brought Merton L. Corey, counsel to the Omaha bank (paid by stockholders) to Washington, where he spent the winter of 1922–23. He has been said to have written, and at least continuously urged passage of the Strong bill, offering the stockholders right to elect three directors while the Government appointed four. Representations were made by the board in its annual report that the continued sale of bonds rested largely if not entirely on close Government control. Yet every bond sold for six years was purchased with the explicit understanding that these banks were to go into permanent management by stockholders. Certainly, Manson pointed out, "it can not be said that bondholders were induced to purchase these bonds by the fact that these banks were to be managed by political appointees."

Always at the crux of the discussion of stockholders' control appears the pivotal problem: Who shall control the issue and sale of bonds? Arguments follow against removing this from political hands.

Two intermediate credit bills were up in this 1923 session. Supported by the Federal board, by land-bank officials (who appeared to lobby and remained some time about Washington), the Strong bill, betraying stockholders, cheating them of their birthright, was urged until it passed the House. Farm loan officials who advocated it were receiv-

ing a salary and expense money from farmers. Those who testified against it, including Flannagan, Charles E. Lyman, of the National Board of Farm Organizations, and Lester C. Manson gave a great deal of unpaid service. Flannagan died broken-hearted. Lyman's policy on the matter was not appreciated by the organization that employed him and he resigned; Manson spent thousands of his own money, and after the end of the 1923 session retired from the fight. Stockholders lacked any dependable advocate.

The Strong bill in the Senate had not even been discussed. In the last week of the session it was agreed that it had not a chance of consideration. Nor was it ever considered.

SENATE INATTENTION COSTS STOCKHOLDERS RIGHT TO CONTROL AND MANAGE

The three credit bills were referred to a conference committee. In committee the Strong bill was jammed in between the two rural credit measures, with the inconspicuous designation "Title III." At the eleventh-hour session of Congress Senator McLEAN, of Connecticut, reported the conference bill late at night. His synopsis of the compromise measure was totally inadequate, obscuring if not deliberately hiding the fact that the Strong bill, never acted upon by the Senate, was a sweeping revision of the farm loan act depriving stockholders of their guaranteed control of banks then worth three-fourths of a billion, and permanently placing the banks under political management, without even such safeguards as civil service.

New blanket powers were granted under the act.

The loan limit was raised to $25,000.

Two unnecessary new memberships were added to the Federal Farm Loan Board.

The compromise passed without reading, entitled the agricultural credits act, effecting "quasi-confiscation of the property rights of stockholders." Yet by decision of the Supreme Court, stockholders of corporate bodies are entitled to control and manage their own enterprises.

Determination that bond sale arrangements should not be disturbed seems to have gone hand in hand with determination that political appointees should get more and better salaries out of the farmers' banks. Stockholders were helpless to protect themselves. Lobdell resigned and was appointed fiscal agent, the place being made for him by the 12 presidents of the Federal land banks. These presidents' salaries were raised to $9,000, the third raise in seven years, and $1,000 was added for serving as presidents of newly created intermediate credit banks. The fiscal agent's salary was not at this time announced, nor at all until charges made to Senators BORAH and Lodge, involving official acts of the former commissioner, caused BORAH to put in a Senate resolution to secure certain facts about Federal farm loan matters. Corey was immediately appointed a member of the Farm Loan Board.

STOCKHOLDERS PROTEST CONFIRMATION OF COREY—THE SENATE BANKING AND CURRENCY COMMITTEE CONDUCTS AN IMPROMPTU INVESTIGATION

After the death of W. W. Flannagan, M. Elwood Gates, of Brentwood, Calif., managed the National Union of Farm Loan Associations. This organization and several stockholders appeared at their own expense before the Senate committee to protest the confirmation of the new members to the board and to petition for the correction of various abuses in land bank and Federal bureau affairs. (Reference: "Hearings of the Senate Banking and Currency Committee on Nominations to the Farm Loan Board.")

The National Committee for cooperative banks also sent a representative, Gertrude M. Shelby, to whom Mr. Gates gave credentials to act as a representative of the farm loan associations that were members of the National Union.

Corey and Jones had served for months before Congress convened. They were therefore party to actions of the Farm Loan Board which were under question. It was pertinent to their fitness as board members to review these acts.

PRESIDENT HARDING'S COUSIN PREFERS CHARGES AGAINST THE FEDERAL BUREAU

R. H. Coker, a cousin of the late President Harding, employed until the Chief Executive's death as a reviewing appraiser in the bureau, appeared at these hearings to reiterate charges made personally to BORAH and Lodge to the effect that the Federal board maintained a private account in the Franklin National Bank subject to the farm-loan commissioner's check, and that the new fiscal agent, formerly commissioner, was receiving $25,000 a year, paid from that account.

Although acrid aspersions were cast by various individuals indentified with bureaucratic sources concerning Coker's motives, since he had been discharged after President Harding's death, it must, nevertheless, be stated that these principal allegations were upheld.

The representative of the farm-loan associations and the committee for cooperative banks were kindly permitted to cross-question members of the Farm Loan Board at successive hearings of the committee. Facts developed and evidence brought in by the board under compulsion showed that the Franklin National Bank account was derived from a day or two's interest here and there on hundreds of millions of funds (from the sale of bonds) sent from the East to the several land banks. By date this interest was not due the banks; therefore the board set up this account apart from other funds. No books were kept. Vouchers and receipts were missing. Purposes for which the funds had been used were dubious. The amount accounted for by a mere list was $47,000; total accruals were said to have been under $70,000.

SENATOR HOWELL, DECLARING MISAPPLICATION OF FUNDS, ASKED FOR AN ACCOUNTING OF EIGHT HUNDRED AND EIGHTY MILLIONS OF FARM-LOAN FUNDS THAT HAD PASSED THROUGH TREASURY

This minor fund had been detached from the main account without being missed.

Secretary Mellon discovered, when he complied with HOWELL'S Senate resolution, that all the Treasury had in the way of books on nearly a billion of farm-loan moneys was a list of receipts and disbursements. Because these were "private funds" supposedly handled by the Treasury as a mere "accommodation for the banks," this account No. 19189 escaped the strict Treasury rule of monthly audit.

FOR SEVEN YEARS THE MAJOR FARM-LOAN ACCOUNTS HAD NOT BEEN AUDITED AT ALL

The Treasury was obliged to put 10 accountants by day and 10 others by night working in the neighborhood of seven weeks, to compile a record of Treasury transactions that, according to Major Woods, in charge, was not an audit. This account contains much interesting information which the Senate committee did not analyze, nor any later inquirers see, since there were no copies. Accountants employed by stockholders should have studied this in detail and checked by the books maintained by each Federal land bank. It appeared that no central books whatever were kept.

MIXED RESULTS OBTAINED BY HEARING

(a) The fiscal agent and the board commenced to keep books on main funds from this period.

(b) The Secretary of the Treasury ordered the Franklin National Bank account discontinued. The money misapplied, however, was not returned. It could only be obtained by legal process.

(c) Important information was obtained. Nepotism existing was exposed, with some good results.

(d) It was discovered that since the first contract with the Morgan group of investment houses there have been no contracts whatever governing the sale of almost a billion of bonds.

(e) Large funds have been kept on deposit in banks connected with this group. While no damaging testimony was given, the value of control to financiers is illuminated.

(f) The fiscal agent uses land-bank funds on the stock market to sustain the value of bonds in the secondary market. He had used at that time close to a million dollars in such transactions.

(g) Much incidental information; names of men who drew unappropriated expenses and salaries from the private Franklin National account were obtained.

(h) The appointments of Corey and Jones were confirmed.

QUESTIONS RAISED

(a) What does the absence of contracts signify? An exceedingly close relation between the investment firms and the fiscal agent? Exclusive preferential bond-sale arrangements have prevailed from the outset.

(b) Are further advantages derived by banking houses used as depositaries? Lists of such houses should be available.

(c) What warrant in law exists for the use of a revolving fund of farmers' money for speculative manipulation of the bond market, even if such efforts are desirable? If it is considered desirable to continue the fiscal agent's high-paid office, should not the requirements, powers, functions, and salary of such an all-powerful official in determining bond-sale policy for this great system definitely be set in the law itself?

SECOND MAJOR EFFORT OF COMPETITORS TO KILL SYSTEM

In 1924 the farm-mortgage bankers aligned light, water, gas, traction, and insurance companies in a campaign to pass the Green amendment to abolish tax exemption. This was aimed at the Federal land banks, but would have deprived municipalities, schools, and public utilities engaged in public service at cost of their obvious claim to remission of taxes.

During this fight, which came dangerously near success, the existence of the joint-stock land banks was an actual protection to the Federal or farmers' banks. The Treasury favored the amendment. The Federal Farm Loan Board, nominally a Treasury bureau, certainly did not lift a finger to prevent farmers' banks from losing their right of tax exemption, even by a statement concerning the certain effect on the interest rate.

To deprive either branch of the farm-loan system of tax exemption meant that the land banks could not lower interest but must raise it. Eventually that would kill the system. Immediately its regulatory effect would be nullified and the private competitors of the system would gradually reclaim much of the vast business that was lost.

Farm-loan stockholders had no right to spend a cent of association funds to make clear their views. The joint stocks have never suffered any such restriction. The exceedingly able activities of the Joint

Stock Land Banks Association in Washington were largely responsible for the failure to pass the Green amendment, and both branches of the system shared the resulting protection.

FEDERAL LAND-BANK ELECTIONS

Two Senators sent out a questionnaire at this time (BORAH and LA FOLLETTE) and received some 800 replies from stockholders, secretaries, or presidents of farm-loan associations. Immediately on the passage of the intermediate credits act, the Farm Loan Board assembled the bank presidents in Washington. Election methods were discussed, and notices of the election were sent out. The replies to the senatorial questionnaire above referred to in large measure condemned the perpetuation of political control by the Federal board. "The election was a farce," replied a man in the St. Louis bank district. "We nominally were to select four of these directors, one being the director at large—so large by the way that he happens to be the vice president of the Federal bank at St. Paul—the other three being hand-picked favorites of the bank, and, of course, the Farm Loan Board returned the compliment by selecting three good farmers (?) like the president, secretary, and treasurer of the Federal land bank." The "hand-picked" directors were generally all bankers, not stockholders. "Can you tell me," demanded this stockholder, "of any other banking business on earth managed by those not having a cent of money invested in same?"

"As it stands to-day," commented a Montana editor, "the Farm Loan Board is the whole thing. The borrowing farmers (stockholders) are completely disenfranchised."

Unfair elections were complained of in many letters from every district. And stockholders' own money was used to defeat the farmers' candidates and elect the banks', in traveling expenses, wires, long-distance telephones, letters, etc. Appraisers' and other employees' time was devoted to securing results the bank wanted.

COMPLAINTS OF ADMINISTRATION

Since the beginning of the system complaints of importance have repeatedly been sent to the board, to Congressmen and Senators, to banks, and to certain farm journals:

(a) Interest rates too high.

(b) Inadequate service—not enough money found to loan.

(c) Discrimination between applicants or between areas.

(d) Slow and poor service.

(e) Inefficient Federal appraisers.

(f) Unreasonable reduction in amounts granted after conservative local appraisal, sometimes compelling applicants to get supplemental loans from the local bank to clear existing liens, to refund which was the purpose in taking a Federal farm loan.

(g) Undivided profits belonging to stockholders are unduly withheld. The law intended and cooperative practice compels such banks annually to distribute the surplus over and above reserves. Millions have been held under the heading "undivided profits" every year. Stockholders who pay out never get their share. After debating with association representatives whether to allow stockholders book credit or extra dividends from an announced sum of undivided profits, the officers of the banks did neither, according to one of these letters.

(h) Information to which stockholders are entitled is denied by the board and the banks.

(i) Right of stockholders to support a federation out of association funds was denied, and intimidation attempted; in some cases every effort to compel resignation of secretary was used. Threat of holding up applications is reported.

(j) Every farmer in the United States is supposed to be eligible for a loan; yet funds to lend were allotted, regardless of demand, so many to this State or that association. Nevertheless, every applicant pays a fee (at this time $10). When applications can not be satisfied fees improperly assessed are not returned.

(k) Cases were cited of the refusals of small loans. "They cater to the big man and let the little man go unhelped." This is the exact reversal of the intent of the law.

Demand for investigation was made by stockholders.

Senator HOWELL put in a resolution to investigate. It was pocketed.

FARM-LOAN BOARD APPROVES JUNKET ARRANGED FOR MEMBERS OF CONGRESS AT STOCKHOLDERS' EXPENSE

In 1924 members of the House Banking and Currency Committee were invited, at the expense of farmer-stockholders, to "take a swing around the circle." They were royally entertained. They made no report. No action was subsequently suggested upon the vital matter of repealing the unjust sections depriving stockholders of control and management of their own institutions and bond sale.

THE AGRICULTURAL COMMISSION IN 1925 REFRAINED FROM CALLING WITNESSES ON ABUSES OF FARM LOAN ACT

To discharge the responsibility entailed by the foregoing knowledge of the need for protecting stockholders, the secretary of the committee for cooperative banks applied to the commission and submitted the brief required by them before any witness would be heard. The secretary, who formerly had represented also the National Union of Farm Loan Associations, was never allowed an appointment to testify, nor to bring in competent experts.

APPEAL TO WHITE HOUSE THAT PROPERLY QUALIFIED MAN BE APPOINTED TO VACANCY IN 1925

A membership on the board fell vacant. The committee for cooperative banks, through its secretary, urged directly at the White House that at last a man genuinely qualified by knowledge of cooperative banking be appointed to this place. At the same time was pointed out the helpless condition of stockholders; the significant facts turned up in the impromptu investigation of the year before; and a request registered in writing that the White House use its power to clean up the bureau and restore management to the proper place, farmer-owners of the banks.

The Secretary was requested to nominate candidates for the position possessed of proper qualifications, and did so. In due time the committee received assurances from the Assistant Secretary of the Treasury and the White House that farm-loan matters were under investigation. Ultimately, however, the Treasury's interest in farm-loan affairs took quite a different line. The department ignored the farmer-stockholders' plight.

A. C. Williams, of the War Finance Corporation, was appointed to the board. He had no qualification of experience with nonprofit land-mortgage banking. He is said to have been a protégé of Eugene Meyer. This is apparently the point at which Meyer, the present farm-loan commissioner, began to take direct and constant interest in the affairs of the board, although as early as 1921 he was a member of the committee on rural credit in the conference called by President Harding.

SECRETARY MELLON SETS A NEW PRECEDENT

Ex officio chairman of the Federal board, as the Secretary of the Treasury always is, it is not customary for him to attend its meetings in person. Mellon himself did not change this tradition, but sent an Assistant Secretary, Mr. Dewey, to represent him at all board meetings.

Land panic was upon us—State, national, and saving banks were compelled to dispose of their overburden of farm lands; insurance and mortgage companies likewise. Deflation of land values in a large part of the country resulted. The exodus of people from farms became terrifying. The only institution in position to steady the situation, and empowered by law to do so, was the farm-loan system. Land banks are authorized to hold acquired lands five years. The law does not specify that these lands shall be written off before the end of that period.

Yet, instead of recognizing the primary need that all land banks in financial position to do so should hold acquired lands, and that, until the period of financial stringency of agriculture should pass, these banks should be operated with sound leniency, Mr. Dewey presented to the Federal Farm Loan Board a set of stringent rules. They had the appearance of having been mailed, it is said. These Treasury rules would have the effect of compelling the joint-stock banks to charge off acquired lands at a rate which presumably would mean that, to pay dividends, the lands must be dumped on a market that wouldn't absorb them and their value as assets be wiped out. If these banks don't pay dividends they can't sell stock. If they don't sell stock they can't sell bonds. Unless they sell bonds they have no funds to lend.

These rules also required the setting up by these banks of a new reserve account not required by law, which joint stocks found completely unfair, threatening them with a deficit.

JOINT STOCKS IN DISTRESS

After months of debate the Federal Farm Loan Board adopted these rules on November 30, 1925. Immediately the securities of joint-stock banks, which had been selling well, slumped alarmingly. News leaked out that the Farm Loan Board had fallen behind on examinations, that certain banks had suffered from misrepresentations and mismanagement. The Treasury took unprecedented steps. The Farm Loan Board alone had legal authority to conduct examinations of the banks, and objected to the Treasury's proposal to send national bank examiners to help catch up with overdue examinations, on the excellent ground that, since land banks are not banks of deposit and have no demand obligations, examiners familiar with the farm loan act and trained to accurate estimate of land assets were alone fit to do this work. National bank examiners accustomed to provisions in the national banking act could hardly be expected without experience to understand the difference.

Nevertheless, the Treasury sent national bank examiners in December, 1925, without permission of the Federal board, not to all banks, but a picked group. If certain documents filed with the board and congressional committees are even partially true, a congressional investigation would appear to be warranted. The Treasury subsequently sought, and after several trials obtained, certain indictments. The affairs of six or more banks were at first reported to be in terrible condition, although Mr. Dewey himself later testified that every bank in the system was solvent. Yet all joint stocks had practically to cease business for more than a year because of the course pursued by the Treasury.

In June, 1927, the Treasury appointed receivers for two banks on charges of mismanagement. The law sets up two grounds on which a receiver may be appointed—insolvency or default of interest on bonds. Neither condition existed in the case of these banks.

It would appear that banks serving farmers, even when privately owned, are subject to harassments not shared by commercial institutions.

Representatives of the other joint stocks, Mr. Powell and Mr. Selleck, gave testimony worth reading in the hearings concerning certain other charges against this branch of the system, showing that procedures for which land banks were severely criticized by the Treasury were recommended in the printed rules issued by the comptroller for national banks. If six national banks had required special investigation, would the whole national-bank system have been hampered in operation?

The active branch of the system, joint stocks, do not wait for business—they solicit it. This activity rendered the joint-stock branch of the system particularly liable to attack by old-line farm-mortgage interests. It is understood that these groups to-day believe that the row started by those rules, apparently not of Treasury origin, was part of a

THIRD DELIBERATE ATTACK BY COMPETITORS ON THE FARM-LOAN SYSTEM

It is thought by some to have been backed by an important faction within the joint-stock system itself, identified by ownership with certain trust companies and national banks which, while taking advantage of tax exemption under the farm loan act, nevertheless were opposed root and branch to the system. Those who interpret this row this way say that rules which would adversely affect all other land banks than their own might readily have been furnished by this faction to the Treasury with the apparent authority of a disinterested banking organization behind them.

So strong were the representations of the joint stocks to the Federal Farm Loan Board to the effect that fifty-odd banks would be crippled, that the board never enforced those rules of November, 1925. The Treasury was ill pleased. In June, 1926, modified rules were issued under which the joint stocks generally could live.

JOINT STOCKS ENJOY PRIVILEGES DENIED FEDERAL LAND BANKS

The joint stocks were newly required to charge off acquired lands at the rate of 20 per cent a year for five years. They considered this a hardship. Yet lands acquired by Federal land banks have always been charged off 100 per cent immediately upon foreclosure. Lands have not been listed as having any value whatever. This serious discrimination was defended on the ground that, while possibly overconservative, the 100 per cent charge off imposed on Federals was "sound policy." The obvious intent of the act is that these two systems shall be impartially administered.

SUBJUGATION OF THE FEDERAL BOARD TO THE TREASURY WAS THE MOST IMPORTANT ISSUE INVOLVED IN THE JOINT-STOCK ROW
